Granby Co. Will Log Their Limits at Alice Arm

The Granby Consolidated Mining Smelting and Power. Co. Ltd. have decided to commence logging operations on a number of their timber limits in the vicinity of Alice Arm and preliminary work has already commenced.

Mr. Haffner, assistant general manager of the Granby Co. stated to the Herald that the company intends to commence logging operations on three of their limits as early next spring as possible. These three limits contain 40,000,000 feet and lie on the north and west of the land now being logged by the Abbotsford Logging Co. The only work undertaken this fall is the grading of one mile of railway, and this work was commenced on Thursday by Mr. Eric Carlson who has secured a contract.

Mr. Haffner stated an early start will be made in the spring with the building of camps, railways etc. and the assembling of equipment so that as much logging as possible can be done next year. He estimates that from 100 to 120 men will be employed throughout the summer, and that if operations were successful, logging would be carried on in the Alice Arm district for a good number of years. No arrangements had yet been made for utilizing the Dolly Varden Railway for the hauling of logs from land on the west side of the Kitsault River.

The company's sawmill at Larcum Island, which was operated a few years ago will be again put in commission and the logs will be sawn into squares for marketing. The mill will be overhauled this winter.

The Granby Co. own considerable timber in this locality, the total being 55 sections, making 55 square miles, containing 450,000,000 feet of lumber.

Twenty-eight of these sections are in the Kitsault and Illiance river districts, the balance being located down the inlet, with the exception of three sections in Hastings Arm and three on Observatory Inlet. The timber limits of the Grandy Co. extend about twelve miles up the Kitsault river.

Moose Charter Closes This Month

The Anyox Lodge of this Order continues to expand. It can now boast a membership of nearly two hundred and fifty members, and there is every prospect of the three hundred mark being reached before December 25th, the date the open charter closes.

The charter fee is now $10.00, but will be doubled after December 25th.

The District Deputy Supreme Dictator is coming to Anyox from Juneau, Alaska to pay an official visit to this Lodge, which is now so firmly established and has a great future before it. The aims and purposes of the Loyal Order of Moose are to inspire lofty sentiments relative to humanity's welfare.

Final Payment Paid on Lone Maid Property

The Anyox syndicate who two years ago obtained a bond on the Lone Maid property made the final payment last Saturday November 24th. to Mr. Geo. Chambers of the Naas Harbor Cannery. The total sum paid for the property was $7,000.00 and the syndicate is composed of seven men.

Since taking a bond on the property the Anyox syndicate have done considerable development work and have proved that good paying ore exists. In the last drift driven five feet of ore was encountered with a value of $52.00 per ton in gold and silver, but owing to poor transportation facilities none of this ore was shipped.

It is the intention of the company that now the final payment has been made, to again undertake development work with a view of blocking out sufficient ore for the installation of an aerial tramway for the shipping of ore.

Esperanza Shipping. Ore Getting Richer

The Esperanza mine is shipping thirty tons of ore this week. The staff at the mine will be increased in order to mine as quickly as possible the high grade native silver ore now being encountered. This vein of native silver ore is now a good six inches wide, with three feet of good secondary ore on the hanging wall. Samples of this high grade recently brought to town proves that the vein is increasing in richness, some of the samples containing more silver than rock. In fact no such rich ore has been located in the camp since the Dolly Varden ceased operations.

Dolly Varden Bonded

According to an article appearing in the Canadian Chemical and Metallurgy Journal, of Toronto, the Dolly Varden, and Wolf mining properties, together with the railroad and wharf has been bonded by New York capitalists, and that according to present plans, work on the properties will commence in the spring. The bonding price was not stated. nor the name of the company taking the bond.

Cottonwood Lumber From Alice Arm

Messrs. Miles Donald and A. McPhail have taken out a quantity of cottonwood logs, containing about 15,000 feet of lumber for the Granby Co. from their timber limits a short distance up the Kitsault river. These logs will be shipped south to ascertain if the lumber is marketable. Should such be the case, the Granby Co. will log off all the cottonwood on the Kitsault flats when logging the other timber. The logs were dumped into the river and floated down to tidewater.

ANYOX NOTES

Mrs. A. Rowlandson and child returned on Thursday from her vacation.

Whilst at Mooseheart, David Lloyd George and family became members of the Moose Order.

Mr. G. H. Jessop, late of the Mine Cafe, left for Powell River on Thursday.

We hear that Jimmy Thompson is building a rockery.

Mr. and Mrs. Hedges arrived in Anyox on Monday.

Mr. and Mrs. C. Hague and family left on Monday for Vancouver.

Mr. Jack Sherman left on Monday, bound for California.

Buy your private Christmas greeting cards from Mr. Bert Scott. Every order promptly filled at the Herald Office.

Mrs. Archie Morton was a homeward bound passenger on Thursday after spending a vacation in the south.

Congratulations to Mr. Frank Stringham. His up-to-date hairdressing saloon is attracting a large clientele. We admire his artistic taste in curtains.

Mrs. R. H. Manzer and children returned on Thursday last, after an extended vacation to Toronto.

The Sale of Work and Dance held last week under the auspices of the Christ Church Ladies Auxiliary was a great success, and attracted large crowds. The results must have been very encouraging to the ladies who worked so hard to arrange this function.

The Cardena resumed her usual run this week. The vessel has been undergoing repairs to her engine room.

The Union Church will soon be a reality. Great progress has been made during the past week, and every hope is entertained of its being ready by the New Year.

The new government building is a distinct acquisition to Anyox, and reflects great credit to the contractors, Messrs. Greer, Beatty and Douglas.

Miss S. Brentzen arrived back in Anyox on Monday, and will resume her duties at the General Hospital.

Why does Allan McDonald wear such a satisfied look nowadays?

Tree felling has been the go all around the flats. The view from the Mine road is a novel one, and reminds one of the eastern front.

Mr. Sigurd Wallstedt, District Deputy Supreme Dictator, of the Loyal Order of Moose, will be in Anyox next Monday, paying an official visit to the local Lodge. He will bring with him two reels of Mooseheart pictures, which will be interesting to the community.

As will be seen from the advertisement appearing in this week's issue, the Mine Cafe has changed hands. Mr. Geo. Jessop is leaving Anyox for Powell River to open a general store. The new proprietor, Mr. J. Foxley, is well known to Anyox residents, having been in the service of the Granby Stores for a number of years.

Anyox Moose Lodge Entertain Ladies Chapter

On Wednesday last, the members of the Loyal Order of Moose, No. 1412 entertained their Ladies' Chapter. The first part of the evening was devoted to a whist drive, the prize winners being Mrs. A. Cross and Mr. Simpson, and the booby prize was secured by Mr. M. Marshall. Then came refreshments under the supervision of Mr. R. W. Clayton, which speaks for itself,

The inner wants having been satisfied, the audience settled down to a well varied programme. There was a spirited selection by the orchestra, consisting of Messrs. Liddell, Varnes, Haesler, and Stivenard. Mr. J. Webster acted as accompanist. Messrs. Hegarty and Moran were in fine voice. Mr. McKinnon and the bagpipes were as popular as ever. Mr. J. Varnes said "he did" so everybody believed him and said likewise. Jock Tierney danced in splendid style. Mr. Grimaldi acted as Chairman with great credit. The committee consisting of Messrs. Clayton, Grimaldi, Harrington and Wilson, are to be congratulated.

The officers of the Lodge were in attendance, and everyone went home thoroughly satisfied, the nature of one big jolly party.

The next function of the Order will be a smoking concert, on December 7th. at 9 p.m. for members and friends.

Alice Arm Man Flirts with Davy Jones

Mr. Gus Webber had a narrow escape from a waterv grave on Saturday last a few miles down the inlet, Gus was delivering a message onto the Awake from a row boat when he took a high dive into the icy water. A nasty wind was blowing and a strong current was running and after swimming for several minutes making frantic efforts to reach the Awake, Harry Fowler the skipper managed to hook him with a pipe-pole, and the treacherous waters of the inlet were cheated of another victim.

Homestake Will Work Throughout the Winter

The Homestake Mining Co. has settled down for the winter with a crew of four men. Mining will be carried on until next spring, when a vigorous campaign of development work will be undertaken.

Births at Alice Arm

Born to Mr. and Mrs. A. McGuire, at their residence, on Friday November 16th, twins, both boys.

Born to Mr. and Mrs. J. Lulich, on Tuesday, November 27th, at the Anyox Hospital, a daughter.

Interesting Debate Held at Alice Arm

The second debate to be held this year under the auspices of the Alice Arm Social League, was held in the Anglican Church, on Tuesday evening. A large number of people were present who had the pleasure of listening to a very interesting debate.

The subject under discussion was: "Resolved that hotels be permitted to sell beer and light wines." Those speaking in the affirmative were: S. Dumas, A. D. York, F. Miller. Negative: Al. Miller, J. M. Morrison, C. P. Riel. President C. Drennan presided in the chair.

The debate was opened by the leader of the affirmative; Mr. S. Dumas, who in a forcible speech stated that prohibition was based upon a lie. The crime bill of the United States was over $30,000,000 and that drinking beer in a public bar was preferable to the present system of drinking whisky in a room, among wild companions.

Mr. A. Miller leader of the negative, in a speech that made the audience sit up and take notice, maintained that beer and wines in hotels would convert them to saloons strewn with drunks, and the travelling public would be given second consideration. The present system also means lower taxes.

Mr. A. D. Yorke, affirmative, in a convincing manner was certain that the present system was doomed unless there was a moral uplift and the only solution was the sale of beer and light wines by hotels. The non-enforcement of the present law, is detrimental to the whole province.

Mr. J. M. Morrison, negative, who was in a humorous vein, was of the opinion that the present agitation for sale of liquor in hotels was being done by the brewers. The price would be higher than under the present system. The old graft would be back, and the return of the bar would provide a greater temptation to drink.

Mr. F. Miller, affirmative, claimed that the people demanded a change from the present system and the only solution was to revert to the old days, when the bar was in vogue. Before prohibition,

Continued on page 2.

How the Anyox Ore is Smelted

In our last issue we printed a portion of a paper read by Mr. L. R. Clapp, assistant general manager of the Granby Company, at the Trail meeting of the Canadian Institute of Mining. This week we are printing a portion of the second part of the paper read by Mr. Clapp.

"Semi-pyritic smelting, such as is conducted at Anyox, in contradictinction to standard reduction smelting is strictly an oxidation process. Chemically it is identical with the operations in a converter when matte is blown up to blister; although it is conducted in a different vessel, and continuously, with the duty of liquifying the charge added to the usual one of oxidizing and slagging the iron. If you consider the heavy sulphide ore as a cold, low grade, matte and the remainder of the charge as a siliceous flux for slagging the iron, with the coke present only to drive off

Why the Herald Did'nt Arrive

A large number of our readers have doubtless wondered why they have not received the Herald for the past few weeks, but the fact of the matter is the paper has not been published. The cause of the suspension of publication was due to the fact that the major portion of the staff was on the sick list. As it was impossible to procure efficient help, at the time we were reluctantly obliged to discontinue publication, We are extremely sorry to disappoint our readers, but it was a matter over which we had no control. With the commencement of publication this week, we hope, however, to give you an uninterrupted service for a long time.

The announcement of the Granby Co. that they intend to undertake extensive logging operations at Alice Arm next summer, is good news for the people of the town, and is the kind of news we delight in publishing. The entry of the Granby Co. in the local logging field will help considerably towards the prosperity of the town. and if they decide to log all their timber limits in this locality it will mean a big payroll for a number of years. The Granby Co. have always been strictly a mining company, but by going into the logging business they are entering a new field, and we wish them the best of luck in their new venture.

Victoria, November 27—"a good provincial police force is particularly needed at the present time", said Hon. A. M. Manson, Attorney-General, speaking to the Provincial Police bill in the Legislature the other day. "If we can establish a force which is loyal and has real esprit de corps, we will be relieved of the necessity of employing special officers in order to secure enforcements of the provisions of the Liquor Act. We do not want to use such officers and this bill is an effort to work without them" said Mr. Manson.

Local News in Brief of the Past Three Weeks

The Granby Co. will not operate their Copper Mountain property until the price of copper increases and stabilizes,

The sum of $79.60 cents has been collected for the Alice Arm Children's Christmas Tree. Collecting boxes were placed in the various stores around town.

A successful card party was held by the Alice Arm Social League on November 13th., and great credit is due to the ladies, who were the organizers.

Owing to the prevailing low price of copper, the Granby Co. were forced to make a cut of 50 cents per day to all their employees at Anyox.

As a result of the heavy rains, a landslide occurred at Anyox on November 6th. carrying away abont fifty feet of the big water pipe from the dam to the power house. The plant was closed for five days, until repairs were made.

The big rains occurring in the early part of November, did considerable damage to the Dolly Varden railway, washing out considerable portions of the track, and damaging several bridges. The town of Alice Arm was in no danger of being flooded, the main body of water keeping well to the east bank of the river.

The returned men of Anyox and Alice Arm celebrated Armistice Day, on November 12th. in royal fashion. The Anyox celebration was heid in the Elks Dug-out, with Dr. Learoyd as chairman. The Alice Arm boys gathered at Miss B. Crawford's and Mr. C. V. Evitt of Prince Rupert was the man in the chair.

Hon. Willian Sloan, minister of mines, speaking in the Legislature, showed that during the past few years fatalities in coal mines had been reduced 42 per cent., and that conditions had been materially improved. During the present session further amendments to the Coal-mines Regulations Act will be passed.

A boy bought from a local dog-dealer a spotted dog.

The next morning it was raining, but he took the dog out into the woods but the rain was too much for him. It washed the spots off, so he trotted the dog back to the dealer.

"Look at this animal," he said. The spots have all washed off." "Great guns, boy he replied, there was an umbrella went with that dog. Didn't you get the umbrella?"

Alice Arm Debate

Continued from page 1.

hotels were properly conducted and would be again and a lot of the present unlawfulness did not exist.

Mr. C. P, Riel, negative, stated that the present system is excellent. Everything is done legitimately at the government stores, and the proper place to drink is at home. The sale of beer and light wines at hotels will be the stepping stone to whisky by the rising generation.

Mr. S. Dumas in a 5-minute rebuttal for the affirmatives, said, that the hotels are our homes when travelling, and we should be allowed to obtain a glass of beer when necessary, instead of buying two or three dollar's worth.

On a vote being taken, thr negatives were declared the winners by the narrow margin of two votes.

BRITISH COLUMBIA
The Mineral Province of Western Canada

Has produced minerals valued as follows: Placer Gold, $76,542,203; Lode Gold, $109,647,661; Silver, $59,814,266; Lead, $51,810,891; Copper, $170,723,242; Zinc, $24,625,853; Coal and Coke, $238,289,565; Building Stone, Brick, Cement, $36,605,942; Miscellaneous Minerals, $1,358,839; making its mineral production to the end of 1922 show

An Aggregate Value of $769,418,462

The substantial progress of the Mining Industry in this Province is strikingly exhibited in the following figures, which show the value of production for successive five-year periods: For all years to 1895, inclusive, $94,547,241; for five years, 1896-1900, $57,607,967; for five years, 1901-1905, $96,507,968; for five years, 1906 1910, $125,534,474; for five years, 1911-1915, $142,072,603; for five years, 1916-1920, $189,922,725; for the year 1921, $28,066,641, and for the year 1922, $35,158,843.

Production During last ten years, $339,280,940

Lode-mining has only been in progress for about 33 years, and not 20 per cent of the Province has been even prospected; 300,000 square miles of unexplored mineral bearing land are open for prospecting.

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any Colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, security of which is guaranteed by Crown Grants.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

Smelting Conditions at Anyox Smelter

Continued from page 1.

the moisture and help the furnace over the rough places, you will have a clear conception of the fundamentals of the process. The chief governing factor is the blast and that is used in amounts greatly in excess of the requirements of reduction smelting. At Anyox between 26,000 and 32,000 cu. feet of air per minute is pumped through each furnace, or the equivalent of 215 ft free air per minute per sq. ft. of hearth area. Other things being equal, the speed of the furnace and the composition of the slag are directly dependent upon the amount of air blown through. The greater the air, the more iron is oxided, the more slag is formed the more heat is generated and the higher grade is the matte. This of course, has its limitations; in the amount of air that can be forced through the ore column without excessive back pressure; and in the height of the ore column necessary to absorb the heat rising from the zone of intense reaction very little part in the generation of the heat. The greater part of it is distilled off in the upper part of the ore column and burns only on reaching the top and coming in contact with the outside air. Even that which is carried downtowards the focus and combines there with oxygen is immediately robbed, in its ascent through the ore column, by the incandescent coke.

"Ideally, a cross-section of a pyritic furnace in operation will show a column of incandescent silica fragrants over which trickle streams of molten sulphide exposed to the scorifying action of the high velocity blast, which, oxidizes the iron on the surface with the evolution of a considerable amount of heat. This ferrous oxide immediately combines with the nearest silica, with a further generation of heat, forming slag which drips down toward the hearth picking up on its way more silica, or lime, depending on the local temperature. The sulphide continues down losing iron continuously, until it drops through the slot in the jacket crusts above the tuyers and into the bath below. Its copper content will depend upon how much air was blowing through the channel down which it passed, and the amount of clean quartz it encountered on the way.

"The thermal balance of a pyritic furnace, even under ideal conditions will show only a small excess of heat over the amount necessary to drive off the contained mixture, decompose the limestone and melt the charge, with the necessary losses in radiation, jacket water and stack gases. In commercial operation, the introduction of any unusual amount of dyke rock, or other combined silicates, or even an excessive amount of fines in the ore, will completely upset the balance and the furnace will freeze up. While we have run a furnace for a period of 30 days or more without any coke whatever, the operation is too delicate, and we normally add from 4 per cent. to 6 per cent. of coke as thermal insurance.

"Smelting at Anyox is a tonnage proposition. Each of the four furnaces under proper conditions will put through about 800 tons of original ore each 24 hours (a duty of 6.5 tons per sq. ft. of hearth area per day), and matters of metallurgical refinement in the way of close balance of charges to furnace, composition of slag, etc., are unknown. A furnace will make its own composition of slag, depending on blast and temperature, irrespective of the furnaceman's desires in the matter. Any portion of the charge which it cannot utilize in its own self-chosen combination, will remain behind in the furnace as a crust. Whenever the furnace is temporarily out of metallurgical balance, some crust is formed and as it is not in the direct path of the descending sulphides, there is nothing to flux it out, and it remains and grows. Eventually it will close a furnace down. It can be fluxed out by the addition of large amounts of coke and limestone, but we find it cheaper to shut the furnace down, dig it out and start over again. By long practice our furnace crews have reached that stage of perfection where they can blow out a furnace, dig it, repair jackets, reassemble and have a charge in it again in 24 hours. A furnace campaign lasts from 10 to 40 days, and no attempt is made to prolong its life after the tonnage begins to fall. Any furnace which fails to make 600 tons of new ore in 24 hours is, to use a furnaceman's expression, given the hose; i. e., tapped out and the hose turned on it to chill and crack up the crust and facilitate digging."

ALICE ARM NOTES

Hand Laundry Work. Moderate Prices—Miss B. Crawford, Alice Arm.

Mrs. E. Thompson left on Thursday, on a visit to Prince Rupert.

Messrs. W. M. Meehon and F. D. Rice, have spent the week in the district surveying in connection with the forthcoming logging operations of the Granby Co.

See Al. Falconer for Wood or Coal

Mr. Harry Wilson has taken over the agency of the Prince Rupert Pioneer Laundry, and is also conducting a hand laundry.

Mr. S. Wickwire has moved his watch and clock repairing business being now located in comfortable quarters adjoining the liquor store. He has installed a nice line of jewelry, watches, etc.

Mr. Sid Davis, the well known Anyox photographer, who has spent the past few weeks here for the benefit of his health, has decided to remain here permanently, and will shortly open a studio.

Mrs. E. Vale and daughter Clothilde LaFraner arrived on Monday, from Edmonton, on an extended visit to her brothers, Messrs. Geo. and Art. Beaudin.

Mrs. W. A. Wilson arrived on Monday, from Vancouver, to join Mr. Wilson and family.

See Al. Falconer for Freight and Pack Horses.

While on police patrol duty at Alice Arm last week, Constable Dryden of Anyox met with rather a painful accident. Returning from the Lock-up Station to town on Friday evening he stepped into a hole twisting his ankle, and in falling cut an artery on his left wrist, also receiving some bruises. He is under the Doctor's care and doing well.

LEGAL NOTICE

In the Matter of the MINERAL ACT and FORFEITURE of INTEREST of Co-Owners who have failed to Contribute.

To W. J. VanHouten of Hollywood, in the state of California, U. S. A. and W. G. H. Campbell of Port Haney, in the Province of British Columbia.

WHERAS you the said W. J. VanHouten and W. G. H. Campbell are each a holder of an undivided one-quarter interest in the "Big Strike" Mineral Claim situated in the Portland Canal District, Alice Arm, B. C. located the 8th day of June 1919 and recorded at Anyox, B.C. upon the 19th. day of June 1919.

AND WHEREAS Douglas R. Shewan and Robert T. Colquhoun are each a holder of an undivided one-quarter interest in the said Mineral Claim.

NOW you the said W. J. VanHouten and W. G. H. Campbell are hereby given notice that the said Douglas R. Shewan and Robert T. Colquhoun have made the whole expenditure upon the said Mineral Claim for the year ending the 19th day of June 1923 as required by Sections 48 and 51 of the Mineral Act.

AND that if you the said W. J. VanHouten and W. G. H. Campbell shall fail or refuse to contribute your proportion of the said expenditure required by the said Sections 48 and 51 of the Mineral Act together with all costs of advertising on or before the tenth day of December 1923 your respective interests in the said Mineral Claim shall become vested in your Co-owners to wit; Douglas R. Shewan and Robert T. Colquhoun (who have made the required expenditure, pro rata) on filing with the Mining Recorder of the Division in which the said claim is situated, this Notice in full and on fulfilment of the requirements of Sections 28 of the Mineral Act: and do you the said W. J. VanHouten and W. G. H. Campbell govern yourselves accordingly.

FRANK C. SAUNDERS, Solicitor for Douglas R. Shewan and Robert T. Colquhoun, whose address for service and place of business is 402, Dominion Building, Vancouver, B. C.
