Masquerade Dance By P. T. A. Was Jolly Affair

The Annual Masquerade arranged by the P. T. A. on Monday was attended by over one hundred guests in costume and by a fair crowd of dancers. Heading the Grand March was a towering giant, Mr. Winkleman on stilts, who received the prize for originality among the men. Miss Margaret Winkleman as Barnie Google's entry won a similar prize among the ladies. Other awards were: Miss Richards, "Dutch Girl;" Miss Brisbane, "Irish Rose;" Mrs. Gorman, "Millbanks;" Mr. Gibb, "Viking;" Mr. Archie Morton, "Old Man;" Mr. Mike Cranley, "Old Chum." Mr. R. Peel won the lucky prize.

Convening the Dance Committee was Miss Hester Richards with Miss Daisy Hoadley arranging refreshments. The Savona Orchestra was in fine form.

Mr. Fordyce Clark acted as master of ceremonies.

Alice Arm Card Party And Dance

A card party was held at the Alice Arm School on Saturday evening. It was sponsored by the Alice Arm Junior Sports' Club, and like its predecessors was a decided success.

Bridge was played during the early part of the evening, after which a number of dances were enjoyed. A very pleasant evening was spent by all present.

Winners at bridge were: Ladies' first prize: Mrs. W. M. Cummings, consolation, Mrs. E. Moss. Gentlemen's first prize: Mr. J. Trinder, consolation, Mr. J. Wilson.

Several more such card parties will be given before the winter season expires.

Rain Follows Cold Spell

The cold weather spell that has held this district in its grip during the past three weeks, broke a few days ago, and was followed by a rainstorm. Coal and wood piles suffered severely as did many water pipes. Abnormal ice conditions prevailed in the vicinity of Anyox which interupted the mail service last week-end. The Herald not arriving in Anyox until early this week. Everything is now back to normal. The light snowfall is fast disappearing and an early spring is predicted. Autos and wagons are being used in Alice Arm.

Badminton Tournament On Tuesday

The Badminton Club will hold tournament in the gymnasium ext Tuesday evening.

Esperanza Development Shows Richer Ore

Development work of the big ore ledge at the Esperanza mine is being proceeded with as rapidly as possible. It has been decided to drift on the ledge a distance of twenty feet each way so that an idea of its persistency can be gathered. It is possible that a shaft may be sunk on it later, or failing that a lower tunnel driven in order to determine its depth and values.

An additional number of samples have been sent out for assaying. The ore recently broken into appears to be of a higher grade than even that from which the high gold values were recently obtained.

An emergency meeting of the Directors was held in Prince Rupert last week. No important business regarding the future of the mine was discussed. The main business of the meeting being the disposal of stock of which there is now only a limited amount for public subscription.

Hard Times Dance This Evening

A Hard Times dance will be held at the Alice Arm Hotel this evening. No need to doll up. Old clothes, old shoes, and old hats will be the fashion this evening. White collars and jewelry can be left in care of the hotel management, but your whiskers can be left on. Good company, good eats, (beans) and good music. What more is required?

Two men, both Finlanders, were killed at the Big Missouri mine last Monday. Death was due to an explosion.

Annual Meeting Anyox Community League

The Annual Meeting of the Anyox Community League will be held in the Recreation Hall, on Wednesday, February 27th. Officers will be elected for the coming year and a report of last year's operations will be read.

Port Simpson's Best Basket-Ballers Will Visit Anyox

Port Simpson's best Indian team will visit Anyox for a two game series with the local All-Stars.

Games are on Monday and Wednesday.

Some good basketball is assured. It will furnish a test for those who will journey to Rupert on the 22nd.

It is hoped also that there will be a profit on the games to apply to the Prince Rupert expenses.

Capt. Living Donates Medals

Through the generosity of Capt. Living of the Monarch Life Insurance Company there will be medals for competition in the senior division of the Basketball League. Capt. Living was the donor also last year.

P. T. A. Meeting on Monday

The members of the executive of the P. T. A. are requested to attend a meeting in the High School on Monday, at 4 p.m. to hear reports and decide certain business.

ANYOX NOTES

Mrs. Davie arrived from Vancouver on Monday.

L. Anderson and P. MacDonald were arrivals on Monday's boat from Vancouver.

Mrs. Redman arrived on Monday from Alert Bay.

A. Knight, N. Wasserman, J. R. Bray, W. Thompson, J. T. Plumb arrived in town on Monday from Prince Rupert.

Mr. and Mrs. Donaldson and child arrived on Thursday from the south.

G. Walker was an arrival on Thursday's boat.

There are numerous brands of cigars; some good, some fair and some rotten. The best is an ElDoro.

Mrs. James left on Thursday for the south.

F. S. McNicholas was a southbound passenger on Thursday.

Mr. Goldbloom was a passenger to Prince Rupert on Thursday.

Miss Robertson left on Thursday for the south.

Value of copper production in British Columbia to date is about $234,000,000.

Russian Asiactic Are Huge Concern

Who are the Russian Asiatic Consolidated that has made an offer for the Toric mine is a question that has been asked frequently during the past two weeks.

Below we are publishing a report of their negotiations with the Russian Government, which was recently published in the Vancouver press. It shows that they are a powerful organization, with considerable experience in mining, and with sufficient capital to develop the whole mining district of Alice Arm if necessary.

"A step toward the resumption of Anglo-Russian trade relations, embracing the return of seized properties, with United States participation is reported in London.

"It is stated negotiations now are almost completed between the Soviet Government, the British Commission, the Russian Asiatic Consolidated and Guggenheim and Harriman interests of United States, promising an amicable settlement of the long standing dispute between Britain and Russia.

"The basis of the negotiations include:

"In settlement of the Russian Asiatic Consolidated's claim against the Soviet Government of $280,000,000, the Soviet Government will issue $10,000,000 in 3½ per cent 15-year bonds. The bonds will be discounted for cash at par by the Guggenheim and Harriman groups.

Continued on page 2

Offer Made For Silver Crest Mine

New interest was centred in Silver Crest mines recently in Vancouver following receipt of a wire from P. E. Peterson, engineer of the company, who is now in New York asking what the company would take for its Saddle property on Hastings Arm. Silver Crest officials are now looking into the offer. The Saddle property is now near the shipping stage, the aerial tramway requiring only a few weeks work to complete when the snow clears.

Mr. Peterson was formerly connected with the Anaconda Company and later was with the Granby. The wire does not say what the interests are who have asked for a price on the Saddle property.

Good Basketball Games Witnessed Anyox During Week

Anyox Intermediates have shown some activity lately. The long lay-off told on the High School who lost to the Rinkydinks on Monday 24-21 but came back strong on Wednesday to defeat the Concentrator 20-15.

High School Boys Again Defeat Public School

High School Junior boys advanced another step in the race for the P. T. A. Basketball trophies when they turned back the public school squad 20-13. Play was close in the first half but the winners stepped out in the third quarter. Henry Deeth again refereed.

The teams were: High School: F. Calderoni, 3; T. Calderoni, 15; S. Brown; F. Dodsworth; I. Davies; B. Loudon, 2; G. Anderson. Total —20.

Public School: F. Mikeli, 5; D. Gillies, 3; A. Dodsworth; M. Patrick, 1; A. Deeth; L. Kirby, 4. Total—13.

Mine Girls Defeat High S.

High School girls have broken even in their first two starts in the second half. On Monday the Mine Girls came down to carry off a 9-6 victory. The first half went 5-4 but in the second frame the Mountaineers outshot the students to win at 11-6.

Teams: Mine, J. Calderoni 2; M. Rowland; M. Marriott 2; E. Steen; H. Calderoni 7. Total 11.

High School: F. Cameron 2; M. Cloke; L. Dresser 4; M. Dresser; W. Cameron; F. Dodsworth; K. Eve. Total 6. Referee: McCallum.

Beach Defeated By High School Girls

On Wednesday in a fairly open game which was anyone's until the end, the School girls downed the Beach 10-8 after coming from behind to tie the score late in the second half. Nearly thirty free shots were awarded of which only two were converted.

Teams: High School, M. Cloke; F. Cameron 2; L. Dresser 4; M. Dresser 3; K. Eve 1; F. Dodsworth; W. Cameron. Total 10.

Beach Ladies: D. Greenwood 4; M. O'Neill; Mrs. McRostie 2; P. O'Neill 2; T. Gordon; A. Scott; Mrs. Wenerstrom. Total 8.

Referee: Fordyce Clark.

Mechanics Trounce Conc't

On Wednesday the Mechanics were fine form and, shooting with positive brilliancy, overcame a 5-0 score to defeat Concentrator 22-14. The ore-crushers had won their first game of the second half against the Beach on Monday but the Mechanics have developed a defence which baffled the Meagher-to-McLeod-to-McDougall attack. For the winners Steele was outstanding on the firing line.

The teams were: Mechanics: Evans; E. Barclay; Deane, 2; Lazorek, 6; Steele, 12; T. Cloke; Dodd, 2. Total—22.

Concentrator: McConnachie, 3; Meagher, 3; McColl; McKay; McDougall, 6; McLeod; Musser, 2. Total—14.

Referee—Lee.

Mining development in the Alice Arm district has now reached the stage where the big companies are being interested. Judging from recent developments they are not only interested but anxious to acquire property in this favored section. Successful development of the Toric is the match that has started the blaze. Who will eventually own the Toric is not at present known, but it is safe to say that when operations are re-commenced they will be done by a large company, capable of mining on a large scale and also enlarging their scope. The importance of the ore deposits of Alice Arm district have been stressed by mining engineers during the past few years. The big companies, however, were loth to take a chance until tonnages of ore were exposed. The Toric has shown them that the district possesses large bodies of good commercial ore. Which proves that before the big companies enter the field the little ones must blaze the trail. Several small companies are at present developing first-class properties in the district and within the next few years several more snch mines as the Toric will have large tonnages of ore to show. A large tonnage means a large outlay of capital, and it is at this stage that the big fellow fills the gap. The little company is often spoken of as a "hay-wire outfit," but they are doing far more than the big mining companies in developing the mineral wealth of the province. Let us have as many little companies as is possible. Next to the prospector they are the pioneers, and no obstacle should be placed in their way by government restrictions, unless it is proven that they are crooks, who mine the public and squander the money. During the past few years Alice Arm has been singularly fortunate in having companies operating in the district who are making an honest effort to successfully develop an ore tonnage. We hope that we shall be as fortunate in the future and the Herald will do its best to see that it is so.

Russian Asiactic Are Huge Concern

Continued from Page 1

"The Russian Asiatic Consolidated's properties will be handed back.

"The Russian Asiatic Consolidated and the Guggenheim and Harriman groups will form a new company, in which the Russian Asiatic Consolidated and American groups will each have a half interest.

"The American group, in exchange for participation, agrees to put up another $10,000,000 working capital

"The Russian Asiatic Consolidated's properties in Russia were confiscated by the Soviet Government in 1918, and consist of a freehold leasehold on mining, agricultural and forest lands, and mining claims and concessions covering 2,500,000 acres. This includes twelve developed metal mines, coal mines, iron mines with blast furnaces and rolling mills, steel works, two copper smelting plants, a copper refinery, lead plant, zinc plant, cyanide and gold mills, and also 250 miles of railroad, a river fleet of steamers and barges.

"The Russian Asiatic Consolidated originally had $60,000,000 capital and, following their confiscation, placed a claim through the foreign office for $280,000,000. The claim was subsequently written down to just over $5,000,000 and the company's capital cut to $22,500,000."

Big Sum for Hydro-Electric Rupert and Stewart

There is a development program of $1,500,000 on hand for the development of hydro-electric at Prince Rupert and Stewart, according to an interview given to the Montreal Standard by A. J. Nesbitt, head of the firm of Nesbitt, Thompson & Company and president of Power Corporation of Canada. This is part of a huge program of development for the one company amounting to $50,000,000.

Porter (sympathetically)—Just missed your train, sir?

Passenger—Oh, no; not at all. I didn't like the the look of the thing, so I chased it out of the station.

Opinion That Smelter May Be At Rupert

That the neighborhood of Prince Rupert is likely to be the location for the coast smelter to be built by the Consolidated Mining & Smelting Company is the opinion of a number of interior mining men who arrived in Prince Rupert recently. It is stated by them that everything points to this part of the coast as a location. They say that the Consolidated is already interested in a great many mines in the interior as well as on Portland Canal and this is the logical point where rail and water meet and it would be accessible to all at the least possible cost. They say it would have to be at some point on navigable water and on the C. N. R. main line. This being a C. P. R. controlled company, it would fit in well with the suggested move of the C. P. R. to interest themselves in the railway running into Prince Rupert. The probability is that it would be locat- at the mouth of the Skeena River.

Wife—Don't you think we ought to get mother a little present to take back with her when she goes?

The Brute—What about a nice, big jar of vanishing cream?—Passing Show.

L. & L. Mine of Stewart Will Increase Capital

An extraordinary general meeting of L. & L. Consolidated Mines, Limited, held on February 4 1929, it was unanimously resolved that the capital of the company be increased to $1,500,000, by the creation of 4,000,000 new shares of 25 cents each.

The president, John Hart, informed the meeting that he was at present negotiating, through agents with a company unknown to him, with a view to the sale of control of the L. & L. made possible by the increase in capital. If negotiations developed satisfactorily the matter would be brought before the shareholders for decision, he said.

The president also informed shareholders that a very satisfactory report had been received from the mines superintendent, H. T. Thomey, at Stewart, dated January 28, in which he stated that at 355 feet from the portal a cross-cut in the No. 2 tunnel on the Rush Columbia property had established the width of the vein to be 10 feet, highly mineralized, and that the workings appear better than at any time since he has been on the property.

World's Copper Production

The world's production of copper during 127 years, since the beginning of the nineteenth century, amounts to more than 40,000,000 tons, according to Scott Turner, Director of the United States Bureau of Mines, Department of Commerce. In comparison, all previous production since the beginning of man's utilization of copper—estimated by some as less than a million tons—is relatively insignificant.

Mining Act Will Be Changed

Increased protection for the public in mining investments, broadening the scope of activities of resident mining engineers, and offering further protection for wage earners employed on bonded properties are included in a new mineral survey and development act being introduced by the minister of mines.

Victoria Chamber of Commerce is interesting itself in the possibilities of raising silk worms on the Island.

Here and There

(226)

A skin game.—Two young boys living 90 miles northwest of Edmonton started a coyote farm in 1927 by digging young coyotes out of the ground and confining them in a pen. They got 140 young animals and when their skins were mature sold them for $12 each.

A southern packing plant specializes upon horse meat for shipment to parts of Continental Europe where it is very popular. It has been suggested that the nondescript range horses straying about Southern Alberta be herded for packing purposes. It is a pity someone could not figure out a similar way of consuming some of the old motor cars that are loose on the highways.

Twenty oil burners measuring overall 97 feet in length and weighing 725,000 pounds have been ordered by the Canadian Pacific Railway and will be in passenger and freight service through the mountains this summer. Each of them will do the work of two or more of the lighter locomotives. They are the largest in the British Empire and will revolutionize transportation in the west, it is predicted.

Victoria is having a mid winter golf tournament open to members of the local clubs and to guests of the Empress Hotel, and the players won't have to play in mittens and fur coats, either. In the east they have a game called winter golf that they play with bow and arrows on skies or snowshoes, but the golf at Victoria is the legitimate article. The game is played the year round in the equable climate of the Pacific coast.

Unique and luxurious cars, differing from anything operated in this country before, will be carried by the two crack trains of the Canadian Pacific Railway, the Trans-Canada Limited between Montreal, Toronto and Vancouver, and the Mountaineer, from Chicago to the Pacific coast, it has been announced. The cars will have bath rooms, valet service, lounge and smoking space, and a solarium, with vita-glass windows.

The sea is constantly productive of tales of adventure. A recently told story is that about Commander S. Robinson, O.B.E., of the Canadian Pacific liner Empress of France who turned his ship into the face of a hurricane and went 500 miles out of his course to take aid to injured seamen on a storm tossed Japanese freighter. The great liner waited beside the freighter, which had been badly battered by the huge waves and some members of whose crew had been injured, but found it impossible for boats to pass between the two ships to convey a doctor. After waiting for half a day the master of the Japanese ship reported that he could make port, and the Empress of France continued on her interrupted voyage.

MUSHER MAD

"Quebec", says Sara Hamilton Birchall, in "Country Life", "goes musher mad". It is so. Every year, and this one more than ever. Go to Quebec between February 21st and 23rd. All you will hear is dog, dogs, huskies, mushers, St. Goddard, Nolan, Chevrier, Seppala!—a score of other names. You will look at the big board in the Chateau lobby whereon the odds are shown, and you will wonder what it is all about. And then, perhaps, an enthusiastic soul will get you in a corner and tell you how on the third day of the last derby, the man who was considered in the running only for second place was held up by a freight train so long that his dogs shivered and began to stiffen, but won the 120 mile three day grind by a short minute or so; and how he was cheered and chaired, and how they come, these mushers, from all parts of the North Country, with their dogs and hounds and huskies. You will pick your dogs, Siberians, Alaskans, or just plain dogs, and before the last entrant has started on the first lap on the first day, the fever will have caught you. You will see the first team drive panting home, the next and the next; the heroes of Nome, the trail dogs from Le Pas, fuzzy animals who know the Quebec woods trails and teams of dogs bred, reared and trained for this one great derby, dogs you wouldn't want, worth hundreds; dogs you could love, but who only know a trainer's hand, and will give allegiance but to him; dogs in fours and fives and sixes, straining eager, panting dogs with forty miles behind them and eighty before. Then you too are musher mad, and the rough, shaggy individual in fur and wool, whose moccasined feet had not yet fitted into your own ideas of things becoming, is invested in the aura of a hero and a knight. You scream his name as he mushes past. You hold your breath as the minutes tick before the next arrival. A team of mastiffs, greyhounds or mongrels, swings round a corner into sight. Their time is close. They have one minute in which to reach the goal, and win the first lap. You too, are musher mad. You watch the bulletin boards with excitement and wordily exchange the gossip of the racing stables. Then, when the great exhibition of strength and endurance is over, you can perhaps settle down to enjoy Quebec herself and those winter sports in which you are permitted to take a personal if not more strenuous part.

Big Missouri Showing Up Good Under Development

Stewart News

A Toronto dispatch says: Consolidated Smelters include the Big Missouri as one of the groups being prepared on the Pacific Coast to supplement production from the famous Sullivan mine at their plant at Trail B. C. It is also mentioned as being very important in the treatment of ores from Coast Copper, another "Smelters" holding of importance in present plans calling for a copper smelter.

Late in 1928, J. J. Warren president of Smelters: S. G. Blaylock, general manager and W. M. Archibald, chief engineer, visited the Big Missouri property to inspect development work. Great headway has been made in the past five months, and while Big Missouri's importance originally lay in the extent of its silicious ores, recent work has developed valuable high-grade.

Information gathered close to the management understands that a new high-grade body six feet wide has been encountered in underground work. Three thousand feet of tunneling has been done. An ore shoot opened up not long after Smelters took hold of operations is reported to run 530 feet long in the tunnel with $50 value in gold and silver, with visible gold in one short space. Stories circulating here are to the effect that subsequent development has disclosed six unusually rich pockets, and buying of the stock was started by insiders who knew of the turning to high grade. Spokane was a heavy holder of Big Missouri stock a month ago.

Newsprint Production Breaks Records

Production of newsprint paper in Canada during 1928 exceeded the previous year by nearly 300,000 tons or 14 per cent., according to the Newsprint Service Bureau which gives the total for last year as 2,381,102 tons compared with 2,086-949 tons in 1927 and 1,881,737 tons in 1926.
