Review of The Present Unsatisfactory Copper Situation

World Conference May Decide to Curtail Production

The following interesting article on the present copper situation was published last month in the monthly letter of the Royal Bank of Canada:

It is the customary practice to divide world copper consumption under two headings, that consumed in the United States, amounting in normal years to approximately 50 per cent. of the total, and that consumed in other countries. It is a commentary both on the general trend toward world recovery and on the part that electric power is to play in the developments of the next few years that copper consumption in countries other than the United States during 1934, was at a rate in excess of the peak year 1928. Consumption in those countries in November amounted to 100,000 tons, the highest on record, compared with an average monthly consumption of 85,500 tons in 1928. As a further indication of the upward trend in the use of copper, the consumption of electrical energy in Canada is now 20 per cent. above the record of 1929. While part of the amount produced is consumed in electric boilers, even this use of electric power implies increased use of copper products.

In spite of the high rate of consumption, unofficial estimates of copper stocks in countries other than the United States, have increased by 5,750 tons since January 1, 1934. There is some question, moreover, regarding the extent to which the high November record in foreign copper consumption was influenced by purchases in anticipation of the proposed copper cartel. Preliminary discussions of plans for international control of copper have been in progress over a period of months and the final meeting will take place in New York in January.

There are four principal sources of copper—South Africa, Chile,

Continued from page 2

Seven Children Baptized At Christ Church on Sunday

A record was established at the Anglican Church, Anyox, on Sunday evening the 20th. when no less than seven children were baptized. There were three boys and four girls. The Rev. A. Abraham performed the ceremony, which was attended by a large number of people.

Rovers Spring Surprise On Vandals "B"

Oh what a surprise! After being the underdogs for a season and a half, and being looked upon with more or less pity as a hopeless aggregation, the Rovers came out from behind, or under, or somewhere else, to administer a crushing defeat on Vandals B, leaders of the B League. It was a crashing go from the start, with the Rovers playing as though inspired. Their speed and open style of play caught their opponents off guard. Passes galore were beaten down by the flashy Rovers, who had a sharpshooter under the basket and fed him nice buns all evening. Every man was on his toes, chief credit being due to Kergin, Cadillac and Thompson, whose combination was nice to watch. At half-time the Rovers were two points ahead. The gap was widened in the second stanza, till the final figures showed 19-14. For the losers, White, Whitaker and Southey played a splendid game, although the latter was unable on numerous occasions to secure points. Several long shots by the Rovers were futile: short passes to the basket would have been better.

The teams: Vandals B: White 6, Whitaker 2, Southey 6, Graham, W. Horne, Powell, D. McDonald. Rovers: Kirby, Kergin 3, Cadillac 4, Thompson 12, Flye.

The Unemployed Clear Govt. Land at Stewart

The Stewart News

The Government having adopted the policy of requiring that able bodied men shall, as and when possible, work out the relief given, some twenty-two men are being employed cutting wood for the Government offices, as well as for a number who are not physically capable of either working or purchasing their own fuel. Over and above this, a considerable number are being employed clearing some two blocks across the track, reserved by the Government some years ago, at the instigation of the old Stewart Citizens Association, for recreational park purposes, and comprising some 5½ acres.

Mr. Currie, of the firm of Currie and Son, contractors, Prince Rupert, arrived at Alice Arm on Monday, to await the arrival of lumber from Vancouver and the pile-driver from Prince Rupert, for the construction of the new float and approach at Silver C

The Deer Are Already Invading Anyox

A young deer made its appearance at Anyox, on Wednesday morning last. It was first seen about 11 a.m. on the beach near the Customs Office, and became an object of interest for a number of people at the Granby Stores. Taking refuge later in an empty boathouse, it was easily captured by John Curti, and conveyed to his home, where it was installed in the chicken pen. John is seeking permission from the authorities to retain the animal as a pet. It has already attracted many visitors.

Anyox Badminton Club Holds Tournament

Eleven couples took part in a Badminton tourney, which was held in the Gymnasium on Thursday, January 17th. The winners proved to be Mrs. G. Campbell and T. Cloke, who received as prizes a Badminton Spoon and Wallet and Key Case respectively. Refreshments were served after the tournament. The few entries for this event is no indication of the interest taken in this popular sport as many members have attended the practices during the season.

Mackenzie King Sympathetic To Bennett Reforms

Sympathetic consideration of the reform policies of the government, was pledged in the House of Commons this week by Rt. Hon. W. L. Mackenzie King, Leader of the Opposition, who suggested sidetracking minor debates and legislation to give precedence to the proposed measures.

The government could introduce such legislation as unemployment insurance, revised old age pensions, new company incorporation laws and "they will receive the support of members on this side of the House, reserving to ourselves the right to consider each on its nerits."

K. Eve Is Top Scorer In Ladies' Hoop League

Figures showing the leading point getters, in the Ladies' Basketball League have recently been compiled, and result as follows:

K. Eve 115; points; B. Muir 64 points; J. Pinckney, 55 points; L. Dresser 47 points.

Consistent improvement in play makes the ladies' games well worth watching, and keen interest is being taken by the partisans of the various teams.

Vandals Give Decisive Beating To Trojans

There was no stopping Vandals A in their league fixture with the Trojans on Friday 18th. and they gave the youngsters a real trouncing, to the tune of 31-18 in the score book. Trojans started well and held their own for several minutes, but the speed, aggressiveness and uncanny passing ability of the orangemen, soon had them limping along desperately. The Gillies brothers and F. Gordon were checked very closely and had few chances to score, but the rest of the team got in some baskets that were much needed.

McDonald and Shields played a sterling game, but the original Trojans power-play was not working. The scoring machine of the Vandals was kept at slow speed by thorough checking, but the Calderoni-Kulai combination was working nicely. Woodman and Gourlay played well at guard.

The teams: Trojans, B. Gillies 2, F. Gorron 3, W. Shields 5, H. Dresser 4, A. McDonald 4.

L. Gillies controlled the game most efficiently.

BASKETBALL BREVITIES

After making a name for himself as a coming player, Frank Gibson had the misfortune to suffer an accident and is in hospital with an injured eye. Hurry out Frank, the Warriors are calling you!

In the ladies' game on Monday last, Jean Pinckney threw a ball which went right round the rim of the basket before dropping inside. We have seen many heart stoppers but never one like this!

Overhead shots are becoming common with Freddy Calderoni. He scored another beauty in the game with the Elks on Monday last. The versatile Bud Gillies makes them too sometimes.

The Dresser girls have lost none of their ability at long shots. Practically all their points are made with field shots—and can't they make 'em!

Predictions that the value of gold produced by Canadian mines during 1934 would reach a total of one hundred million dollars have been realized. Gold production in 1934 amounted to 2,964,395 fine ounces, a slight increase in weight over the 1933 output, but the value in Canadian funds rose to $102,242,000 as compared with the 1933 value of $84,350,237. The average price of gold in Canada during the year was $34.49 per fine ounce as against an average of $28.60 for 1933.

Operations of Premier Gold Mining Co. World Wide

Under the efficient management of the American Smelting and Mining Company, the Premier Gold Mining Company of Stewart has paid in excess of $20,000,000 in dividends. The Premier Company has also, aside entirely, yet out of profits from its original property, acquired a 38 per cent. interest in the B. C. Silver. In reference to this property it was lately reported a deal had been consummated whereby B. C. Silver and Premier holdings would be jointly operated under Premier management. To date, however, officials of both companies decline to confirm any such deal.

The Premier Co. also controls Porter Idaho, a potentially important silver producer, and Prosperity a similar property, both located near Stewart, and both of which are already equipped with a half million dollar tramway ready to operate.

The Premier Company also owns 80 per cent. of the stock of the Toburn mine in Ontario, which is making a good profit.

Other properties of importance controlled by the Premier are the Tarkwa in West Africa, in which a half interest cost Premier $340,000 although it was reported a few months ago that a bid equivalent to $1,200,000 for Premier's half interest had been refused.

Another property controlled by the Premier Co. is the Relief-Arlington in Southern Kootenay, which is not yet completely developed, but from which production is averaging more than $20,000 per month,

The Big Bell, a gold property in Western Australia, in which the Premier owns a half interest, has reacted well to the past two year's development, and is now being further developed and equipped for production.

Bennett Introduces Bill For Unemployment Insurance

Premier R. B. Bennett has placed on the order paper of the House of Commons a resolution which, if passed, would lead to a bill being introduced establishing unemployment insurance.

The resolution asks for such contributions as may be necessary to carry into effect the proposed legislation.

Review of The Present Unsatisfactory Copper Situation

World Conference May Decide to Curtail Production

Continued from page 1

Canada and the United States. The output in the first three countries has shown rapid expansion during the past year and the percentage increases in African and Chilean production have been greater than that in Canada. Part of the growth is attributed to the rapidity with which the famous Rhodesian mines have been placed on an operating basis. Costs of production in these countries are very low and it is estimated that present world prices of aproximately seven cents per pound provide an ample profit margin for many mines.

Since these, South African and Chilean mines are primarily producers of copper, their output can more or less be readily adjusted to changes in world demand and these countries accordingly will be forced to bear the brunt of any programme to balance world production and consumption. Canadian producers while anxious to co-operate, point out that unless the world is prepared to do without its supplies of other necessary metals, their output of by-product copper cannot be reduced. This problem has been recognized by the other countries interested in the curtailment of output and a proposal will be laid before the conference whereby American and other foreign producers of copper will endeavor to overcome this difficulty. Under this arrangement a joint pool would be formed to purchase Canadian by-product copper as it is offered and to hold it off the market until conditions warrant its sale. Although such a plan appears to have the disadvantages inherent in the accumulation of stocks which may overhang and depress the market, it is considered the most practical method of removing one of the major obstacles to an international agreement.

Aside from this proposed pool to hold Canadian stocks, a few details of the curtailment programme to be discussed at the New York meeting have been announced. It is understood, however, that the organization may follow the system which has been successfully applied by the International Tin Company, which controls world output of that metal. On this basis, production quotas for each signatory of the agreement would be fixed quarterly in relation to estimated world consumption. Reports vary as to the degree of restriction that will be imposed, but it is generally believed that the original reduction in output will be 20 per cent. As far as the United States is concerned, the plan will probably involve the restriction of exports and the regulation of output in order to prevent accumulation of stocks from current production.

The present situation in the United States is practically the reverse of that in other countries. Prices are high, consumption has fallen off and output is being maintained at low levels. In view of the increase in consumption in other countries during the past year, however, it is logical to assume that any gain in industrial activity in the United States will see an even more pronounced gain in the use of copper.

The price for "Blue Eagle" copper, which is produced under the conditions established by the N.R.A., has been maintained at nine cents per pound, substantially over world parity. Since the United States Government will purchase no article which is not guaranteed to contain only "Blue Eagle" copper, few producers care to use other copper in ordinary products which may ultimately be offered for sale to the government. Stocks of this other copper have also been reduced by exports. Of course, "other copper" does not command a premium.

In the face of low consumption and poor demand, the "Blue Eagle" copper price has been maintained by the curtailment of production. Since the middle of September, primary producers, have waived their quotas and preference has been given to the output of custom smelters and producers of reclaimed copper. This waiver will remain in force at least until January 31st,, 1935. These measures have been taken because the "weighted average costs" of copper production in the United States are estimated at 8.9 cents per pound and in individ ual cases the cost is even higher. The high cost of production is due to the chemical complexity of the ores, the elaborate technical equipment required and the relatively high labor costs. Since the domestic situation is under the firm control of the Code Authority, United States' interest in the world restriction programme arises principally from large investments in Mexican, African and South American mines.

The Provincial Economic Council is considering aid to prospectors to prospect known mineralized areas in the North.

Language conceals thought as well as expresses it.

Pacific Great Eastern Makes Good Profit

Premier Pattullo, Victoria, announces that for the first eleven months of 1934, Pacific Great Eastern Railway made an operating income of $113,348, as compared with $52,687 for the first eleven months of 1933. The expense account includes all maintenance of way and equipment except three permanent bridges constructed out of capital.

The Minerals of British Columbia

This Province offers excellent opportunities for useful and profitable investment. British Columbia has produced OVER $1,352,000,000 WORTH OF MINERALS.

The gross value of mineral production for the six months ended June 30th. 1934, exclusive of gold premium, is estimated at $18,667,691.00, an increase of 50.5 per cent. over the estimated value of the production in the corresponding six-month period of 1933.

GOLD PRODUCTION: Gold production showed a decided increase; a total return in Canadian funds to the gold producers of British Columbia during the first six months for 1934 being approximately $5,028,124.00, an increase of 81.3 per cent. over the return in Canadian funds received during the first half of 1933.

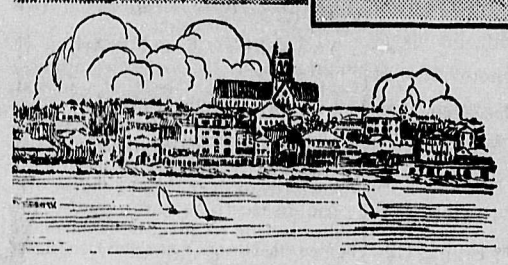
BERYL AND BANANAS



To which should be added another "B"—Bermuda. Perhaps it seems strange to link "a silicate of beryllium and aluminium, which", as the dictionary puts it, "when transparent flashes blue and green," with the familiar yellow fruit that, so surprisingly, when you find it growing, is upside down and green.

It is strange. But then it is just as strange to leave the snow and ice of Canada and less than 60 hours later to find oneself in the gentle, sub-tropic warmth of Bermuda.

"Beryl", as a metaphor, expresses the transparent beauty of the seas around Bermuda; bananas are the least strange of the many luscious fruits with which the island abounds. It is a fascinating combination of ancient and modern that one reaches by 20,021 ton Canadian Pacific Duchess liners sailing from New York every Wednesday and Saturday. No motors are allowed in the island—yet there is an ultra-modern Diesel-electric railway. A "cow's breakfast" hat, a sketch of a shirt, and nondescript pants held up by a one-strap "gallus" suffice laughing darkies for costume, yet five minutes from where the Duchess of York and Duchess of Atholl dock is the up-to-date Hamilton Hotel, Bermuda's largest hostelry. Only a 20 minute walk separates ship and Princess Hotel, while short drives or launch trips reach many other delightful inns and guest houses.

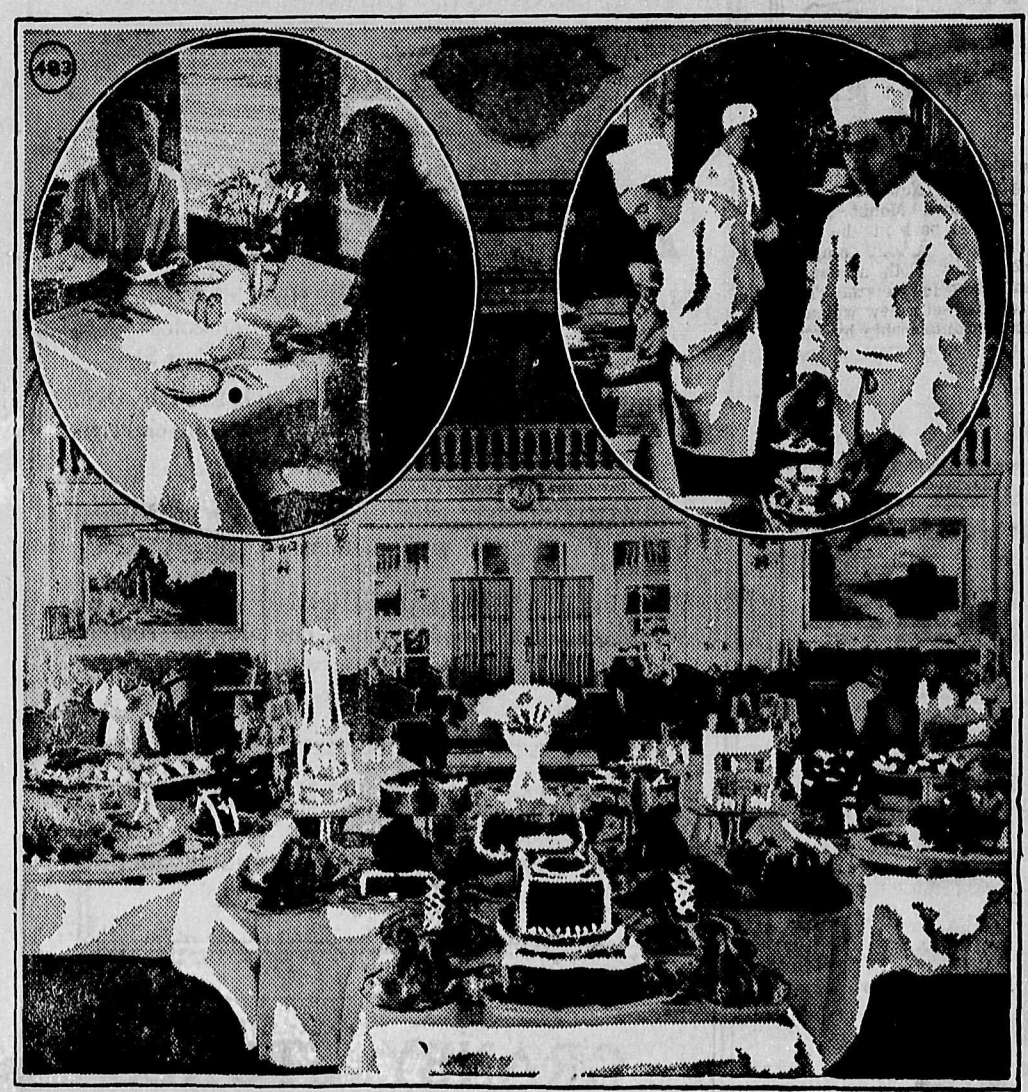
Canadians in increasing numbers are making Bermuda their winter playground, more so since the inauguration last year of steamship service by trans-Atlantic liners.

(A) Stepping from ship to street.

(B) "Have a banana!" A bright-hued chameleon winked a bright eye and dodged when the young lady approached the tree—otherwise it was just like picking an apple in the orchard back home.

(C) Ancient and modern! The palatial Hamilton Hotel is in effective contrast with the horse-drawn carriage.

Provides Millions of Meals Yearly



About 13,500,000 meals a year are served to travellers by the Canadian Pacific, which is the equivalent of saying that it provides 37,000 every day and 259,000 every week of the year. This gigantic total is made up of about 4,200,000 in dining cars and station restaurants; 4,450,000 on Atlantic and Pacific steamships; 1,350,000 on inland and coastal steamers; and 3,500,000 in the company's hotels and bungalow camps. Lay-out shows first-class dining saloon on "Empress of Australia"; lunch for two on typical trans-continental Canadian Pacific flyer; and kitchen on C.P.R. dining car with the men in action behind the guns.

Aces Continue Their Winning Streak

Two more victories recently fell to the lot of the Aces, when they defeated the Spooks in a fast encounter on Friday 18th. and downed the Mine Girls, in an interesting tussle on Monday 21st. The first of these league fixtures was a ding dong go which might have been anybody's Aces led 11 to 6 at half-time and kept up a spirited attack on their old enemies, who however, were six points behind when the final whistle blew, the score being 23-17. The teams: Spooks: K. Eve 7, N. Salmon, E. Morris 5, M. Wenerstrom, J. McDonald 4, D. Campbell 1. Aces: P. London 6, L. Dresser 4, M. Dresser 7, J. Pinckney 5, A. Carrick 1, D. Rogers.

In their tilt with the Mine Girls on Monday 21st. the Aces showed speed, as well as good passing and scoring ability, the girls in orange and black being somewhat outclassed. The final score in this game was 17-10. The teams: Mine Girls, H. Calderoni 1, J. Roberts, P. Arscott 1, Y. Cannon, B, Cannon 4, N. Wenerstrom 4, Aces: L. Dresser 4, M. Dresser 9, J. Pinckney 4, A. Carrick, D. Rogers.

Anyox Notes

C. Graham, District Inspector of Mines, arrived on Monday from Prince Rupert.

Wallace McBride and George S. Slough arrived on Monday from Vancouver.

John Pavich and Martin Purebber arrived on Monday from Vancouver.

C. Gibbs arrived on Monday from Prince Rupert.

J. Armula and J. Feasby left on Monday for Vancouver.

Mr. Atkinson and Mr. Noble, auditors, left on Monday for Vancouver.

Mrs. C. Eklof and her daughter Miss B. Muir, left on Wednesday for Vancouver.

Miss E. Johnson arrived on Wednesday from Vancouver.

BANFF BEAUTY WINTER QUEEN

Ski-joring behind a fast running horse; mushing with a team of huskies; skating; or ski-ing on the mountain trails all come under the heading of real sport, according to Miss Dorothy Standish, who reigns this year during the winter sport season in the Canadian Rockies. Visitors from many United States cities as well as from Canadian centers are enjoying all the thrills which only this area can provide, and which reach a peak during the annual Banff Carnival held this year February 13-17 inclusive.

The World's Oil Production Shows Big Increase

The world's production of petroleum in 1934 will be substantially higher than in the preceding year, and will equal, if not exceed the peak output of 1929, according to statistics prepared by V. R. Garfias and R. V. Whetsel, of the foreign oil department of Henry L. Doherty and Co.

Output of American fields during the year is estimated at 944,700,000 barrels, compared with 933,957,000 in the preceding year, and consumption will aggregate 900,000,000 barrels against 865,447,000 barrels in the year before World production is estimated at 1,542,420,000 barrels, compared with 1,467,128,000 barrels in 1933 and consumption is placed at 1,438,800,000 against 1,378,650,000 barrels a year ago.

H. C. Crout, general superintendent, Ontario district, of the Canadian Pacific Railway, has been promoted to the post of assistant to the vice-president with headquarters in Montreal. Mr. Grout is a well-known and popular official of the railway in Ontario, where he has been stationed for a number of years.

Figures issued by the Dominion Bureau of Statistics dealing with operations in August of all steam railways in Canada having annual gross revenue of at least $500,000, reveal that higher gross earnings were offset by increased expenses, including an expansion of over $500,000 in payrolls.

Mrs. A. A. Adams, of Oak Bay Mills, Que., has been awarded first prize in the most beautiful Maple Leaf contest conducted this year by the Canadian Pacific and Canadian National Railways. More than 10,000 specimens were submitted. The largest leaf phase of the contest was won by Richard Chambers of Vancouver, who submitted a specimen with an area of 226½ inches.

Five hundred school-age boys and girls of Montreal recently took advantage of the unique all-expense trip operated by the Canadian Pacific Railway from that city to Ottawa and were addressed in the Parliament Buildings by Rt. Hon. R. B. Bennett, Prime Minister of Canada. Sight-seeing auto-bus trips across Ottawa included inspection of the Houses of Parliament, the Memorial Tower and Hall of Fame, and a special recital of the 53 bells of the famous Carillon Tower.

Bob Murray, Quebec's No. 1 tennis player, and Laird Watt, second ranking provincial player, were singled out for praise by "Big Bill" Tilden, who sailed recently by the Empress of Britain for England. "They are championship players in the making," said the one-time world's champion.

Five cruises in one may be made this winter on the Empress of Australia sailing from New York January 18. They are: the Mediterranean Cruise, the East African, South African, South American and West Indian. There is a full week in Egypt, numerous stops on the east coast of Africa, 12 full days ashore in the Union of South Africa, four stops in South America and return via Trinidad, Jamaica and Cuba.

Leading a baseball tour of the Orient and interviewed aboard the Empress of Japan en route to Tokyo, Connie Mack, manager of the Philadelphia Athletics, said it was his ambition to continue as manager until "I have passed my eightieth birthday." He is now in his 71st year.

Miss Georgia Englehart, slim girl Alpinist of New York, this summer climbed Mount Assiniboine, highest peak in the Canadian Rockies, and in doing so completed her 100th ascent in the Banff-Lake Louise area. Two years ago she set a new woman's endurance championship by scaling 38 peaks in a single summer in that section.

Neighbor—Oh, Mrs. Nextdoor, would you mind putting your scraps out for our cat while we're away? But please don't put yourself out."

Warriors Defeat Vandals "B" In Fast Tilt

Warrior supporters received a pleasant surprise on Friday the 18th. when their favorite team stacked up against Vandals B in a league fixture and ran up a score of 25 to 16 against their previous victors. Vandals were handicapped somewhat through the absence of White and Heinekey, and there was an evident weakness when the players were close to the basket and had chances to score. Southey and Whitaker fought valiantly for the miners, although the former seemed unable to connect with his usual accuracy. On the general run of play Warriors fully deserved their victory. They were fast and confident, never losing a chance to score. Phillips and McDonald were in fine trim, while Frank Gibson played a splendid game throughout. The teams: Vandals B, Southey 4, Powell 5, Whitaker 5, Graham 2, Berle. Warriors: J. O'Neill 2, Phillips 9, Dan McDonald 8, Gibson 4, Thompson 2.

Without love, beauty is an empty shell.

PRINCE RUPERT ASSESSMENT DISTRICT

NOTICE is hereby given that a Court of Revision and Appeal, under the provisions of the "Taxation Act" and amendments thereof and "Public Schools Act," respecting the assessment rolls for Prince Rupert Assessment District for the year 1935, will be held at the Court House, Prince Rupert, B.C. on Thursday February 14th., 1935, at 10 o'clock in the forenoon.

Dated at Prince Rupert. B.C. January 17th. 1935.

JOHN DYBHAVN,
Judge of the Court of Revision and Appeal.
