As at March 31, 1979 there were 45 former contributors who had left the Service more than six years prior to that date and who, while not entitled to leave their credits in the Fund in order to receive a deferred superannuation allowance, had not applied for a refund of their contributions. Individual credits amounting to $19,375 are listed in the attached schedule.

Section 29—Administration expenses amounting to $384,518 were paid from Consolidated Revenue Fund.

Section 32—An actuarial valuation was carried out as at March 31, 1977.

The valuation indicates a decrease in the unfunded liability in respect of basic pension benefits from about $158,000,000 as of March 31, 1975 to about $153,641,000 as of March 31, 1977.

In the opinion of the actuary, projected statutory employer contributions are sufficient to amortize fully the above unfunded liability in approximately 20 years from March 31, 1977, assuming all actuarial assumptions are realized.

There is an additional unfunded liability of $36,732,000 in respect of supplementary allowance payments under Section 58G based on increases in the consumer price index, described below.

Section 37—Payments to the Minister of Finance totalling $2,645 were made from the credits of five former contributors.

Section 58G—Cost of living supplements totalling $6,531,972 were charged to Contributory Pensions Account. Financing of cost of living supplements by additional employee and employer contributions, each at the rate of 0.5 per cent of salary, commenced November 1, 1976. There is provision for a further similar increase in contributions when the net accumulated payments again exceed 1 per cent of the average annual total of contributory salaries.

Comparative, statistical and detail schedules of contributions, refund and allowances granted and in force at the year end are attached to this report.

PUBLIC SERVICE SUPERANNUATION FUND

NOTES TO FINANCIAL STATEMENTS
MARCH 31, 1979

1. Actuarial Valuation

According to the *Public Service Superannuation Act,* an actuarial valuation of the assets and liabilities of the Fund is required to be made by an Actuary at least once in each consecutive period of not more than five years. The most recent valuation was carried out as at March 31, 1977.

The valuation indicates a decrease in the unfunded liability in respect of basic pension benefits from about $158,000,000 as of March 31, 1975 to about $153,641,000 as of March 31, 1977.

In the opinion of the Actuary, projected statutory employer contributions are sufficient to amortize fully the above unfunded liability in approximately 20 years from March, 1977, assuming all actuarial assumptions are realized.

There is an additional unfunded liability of $36,732,000 in respect of supplementary allowance payments under Section 58G based on increases in the consumer price index, described in Note 3 below.

2. Deposits in Treasury

All contributions to the Fund are deposited in the Provincial Treasury and administered by the Minister of Finance, who has invested available moneys in the various securities listed in Schedule 1. The net income from these investments is accounted for on a cash basis. Accordingly, accrued interest receivable at the end of the year has not been recorded in these financial statements.

3. Cost-of-Living Supplementary Allowances

Since July 1, 1974, supplementary allowance payments under Sections 58A, 58B, 58C, 58D, 58E, and 58F of the Act, formerly charged to Reserve Account, have been charged to Contributory Pensions Account. During the year ended March 31, 1978 the capitalized value of these supplements, $25,951,920, was transferred to Contributory Pensions Account from the Reserve Account, as recommended by the Actuary.

Cost-of-living Supplements, $6,531,972, shown on the Statement of Changes in Fund Balance reflects only supplementary allowance payments under Section 58G. These supplements are based on increases in the consumer price index. During October, 1976, the accumulated payments exceeded 1 per cent of the average annual total of contributory salaries. Financing of these supplements by additional employee and employer contributions, each at the rate of 0.5 per cent of salary, commenced on November 1, 1976. The Act provides for a further similar increase in contributions when the net accumulated payments again exceed 1 per cent of the average annual total of contributory salaries.

4. Additional Information

These financial statements show only the position of the Fund as at March 31, 1979 and the changes in Fund balance for the year then ended and do not purport to show the adequacy of the Fund to meet the obligations of the superannuation plan.
