THE SPIRAL TUNNELS

Between the Great Divide (mileage 2364.6) and Field (mileage 2376.2) a magnificent engineering feat, the famous Spiral Tunnels, conquers the steep grades. Traversing tunnels under Cathedral Mountain (3,255 feet long) and Mount Ogden (2,922 feet), the tracks pass over, or under themselves inside the mountains to gain or lose 48 and 45 feet by each circle of the elongated "figure eight".

CONNAUGHT TUNNEL

Between Glacier, (mileage 2461.7) and Stoney Creek (mileage 2453.3) the 5-mile long Connaught Tunnel pierces Mount Macdonald, summit of The Selkirks.

When the sign "*f*" is shown with a train time, the train will stop to let off passengers or will stop to take on passengers—when flagged by the Agent or signalled by the passenger at non-Agency Stations or when the Agent is not on duty. Numbers following certain stations refer to tables of connecting trains

It is very important when there is a sign, letter or symbol (other than above) with a train time, that you should read the explanation which is always shown on the same page of the time table at or near the table in which the sign appears.

Parlor, Sleeping, Observation, Cafe and Dining Car Services are shown in Equipment Notes near table where train times are shown.

Sleeping and Parlor Car Fares and General Information in regard to many subjects shown in index below.
