## LA PLATA'S NEW PLANT

### Giving Most Satisfactory Results and Running Splendidly

**Saving Effected is Far Greater Than Was Anticipated--The Mine Was Never in Better Shape for Production**

The mill and concentrator at the La Plata Mines, near Kokanee creek, better known to the public as the Molly Gibson, which started up for the first time at 3 o'clock on the afternoon of May 23, are having a most successful run, the machinery working smoothly and satisfactorily, and without the slightest hitch of any kind, and the results from a mining standpoint exceeding markedly the expectations of the management.

Captain T. H. Trethewey, superintendent of the property was at the Strathcona last evening, coming to the city for the first time since the new plant was started on May 23. To a representative of The Daily News captain Trethewey expressed his unbounded gratification at the working of the new plant and of the excellent saving effected at the mill. "We have done much, better than I anticipated with such refractory ore to deal with as we have in the La Plata mine," said the superintendent. "Last Saturday and Sunday for instance the heads went 14 and 14 1-2 ozs. of silver to the ton, respectively, and the tailings were 2 1-2 one day and 2 the other. The lowest lead concentrates gave 112 ozs. silver per ton and the highest 156 ozs. The highest feed has yielded 23 1-2 ozs. of silver and the biggest loss in the tailings so far has been 7 2-10, to be exact.

"We have succeeded in assembling and starting the plant considerably ahead of my expectations for our directors hardly expected a start would be made before July. Considering the very refractory ore we have to deal with I am very agreeably surprised at the results we have obtained, here again my expectations, as reported to the directors, have been greatly improved upon. The saving is really remarkable under the conditions.

"The plant has a guaranteed capacity of 75 tons per day, but its real capacity is between 80 and 90 tons a day of 24 hours, perhaps I had better be conservative and say 80 tons at least. Just at the start we are running one shift of 12 hours a day, but as soon as I can get more men we will start running a double shift. The plant now running so satisfactorily consists of Jiggs of from two to five compartments; Overstrom tables, and six flue vanners. The crushing plant consists of a Blake crusher, two setts of 36x14 inch rolls, and a five stamp battery for fine crushing. We have ordered and will shortly install a compressor and electric light plant.

"What is the situation at the mine? It never was better. I am very pleased with conditions as I know them today. We are driving five levels and there is pay ore in each one of them. We are also making two raises and there is pay ore in each of them. The development work is away ahead of the mill requirements. We have been and will continue to rush development work. All told just now we are working 55 men, but we want more as quickly as we can get good men.

"Just now we are making two products—zinc and lead concentrates. What we will do in the future depends largely upon the rates offered. We may decide on making lead concentrates only.

"Until we get the plant thoroughly adjusted we shall only treat low grade ore, that is the ore carrying the lesser values. The high grade ore, that is the crude ore, will be stored at the mine and shipped as usual.

"Where are we shipping to? We are sending our output to the Hall Mines smelter as we have been doing in the past."

Captain Trethewey will remain in the city for the next couple of days before returning to the mine.

### REDUCTION OF ARMAMENTS

German Paper Thinks That England is in Best Position to Set Example

Berlin, June 5.—Commenting upon the proposition for the reduction of armaments, the Cologne Gazette says:

"The representative of the British government indicated that it was impossible that England might perhaps take a first step, and it is manifest that England, in consideration of her insular position and in view of the immense superiority of her navy, might be better able to take the initiative than Germany, who is encompassed by great powers on every side and whose navy, in spite of manifold exaggeration abroad, is, as the experts very well know, solely designed for defense. However this may be, if the question were to pass from the sphere of parliamentary discussion into that of execution, efforts in this direction might be received not only with keen interest but with sincere good will."

### YUKON GOLD DISCOVERY.

White Channel Gravels to Be Worked By Cyanide Process

Vancouver, June 5.—Late Dawson despatches state that the gold output of May creek so far this year is over $1,000,000, which is double that of last year to this date.

High water has been a serious check to working. Creek traffic has been almost entirely suspended for two weeks. The Yukon is the highest it has been since 1898. The high water mark was reached yesterday and is now receding.

It has been discovered that the gravel of White Channel carries gold in paying quantities and can be successfully mined by the syanide process. Subscriptions are being raised to make a public test of a large amount of gravel.

If it is as reported it means a new source of wealth in the Yukon, greater than the original discovery, as the gravel beds are inexhaustible.

## WORK OF AN INCENDIARY

WOODSHED OF NEW CHIEF OF POLICE FIRED

MAYOR NADEN OFF ON PROSPECTING TRIP NORTH.

(Special to The Daily News)

Greenwood, June 5.—At 2.25 yesterday morning an incendiary fire occurred opposite the public school house, when Kenneth Mackenzie's woodshed at the rear of his residence was set on fire. The prompt response of the fire brigade saved the structure from total destruction though the contents, consisting of clothing that had been temporarly stored therein and household utensils, were destroyed. The loss is about $125. No insurance.

Kenneth McKenzie, the proprietor, had just recently been appointed chief of police, a position for which there had been several applicants, one being supported by a petition. McKenzie's appointment was keenly opposed by a certain class and it is firmly believed by the public that the fire was started for spite. Chief McKenzie was on duty on Copper street when the fire was first noticed and he at once turned in an alarm. The brigade responded with commendable speed and in a few minutes the fire was out. There is practically no doubt as to the origin of the blaze as nothing of an inflamable nature was stored in the shed and it was detached some distance from the dwelling and had no electric wires connected with it.

Mayor G. R. Naden left today for Vancouver, from whence he will proceed to Hazelton and Port Essington and the Bulkley valley in northern British Columbia. He will be absent for some three months during which time he will be engaged in timber cruising and mineral prospecting. During his absence alderman H. Bunting will perform the duties of acting mayor.

The list of property upon which unpaid taxes are due has been completed and will be published in the local paper this week

### TO HANG OR NOT TO HANG

Fate of Alleged Murderer Tucker Now in the Balance.

Boston, Mass., June 5.—After constituting himself a court of justice for the day, governor Guild left the state house late tonight without officially deciding whether Charles L. Tucker, convicted in 1905 of the murder of Mabel Page, shall be executed next week or suffer life imprisonment.

From 11 a.m. until after 6 p.m. counsel for Tucker adduced evidence to support the plea for a commutation of the death sentence. Former attorney general Herbert Parker appeared in opposition to a commutation. The grounds for clemency urged by Tucker's counsel were based upon the alleged unreliability of evidence regarding a Canadian stick pin found on Tucker at the time of his arrest, and said to have belonged to Miss Page; and on the medical testimony as to the nature of the wounds. Dr. Francis A. Harris, one of the experts testified at the trial that a knife like that found in Tucker's possession must have been used, but later he retracted his testimony. The defence also relied on statements of one or two witnesses who heard of tramps going through Connecticut relating stories of trouble with a woman in Massachusetts.

### QUIET REIGNS AT PLUM RUN.

United States Coal Company Will Operate Mines With Non-Union Labor

Steubenville, Ohio, June 5.—Quiet neings today at Plu mRun, Dillonville, throughout the coal regions of sub-district No. 5.

No further disorder has been reported from any point and with the arrival of the troops today, it is expected peace will be completely restored.

The first detachment of troops, numbering 300 men reached Dillonville at 6 o'clock and marched at once to Bradley, the scene of yesterday's conflict. On their way to the mines the soldiers passed several groups of strikers but the latter made no demonstration, and there is no apparent hostility towards the troops. The situation this afternoon is orderly. Operations continue today in the Plum Run mine. The United States Coal company announces that hereafter it will operate with non-union men regardless of any agreement which may be reached with other owners.

### JOLY BIDS FAREWELL

Victoria, June 5—Sir Henry Joly de Lotbiniere, retiring lieutenant governor of British Columbia, bid farewell to Victoria this evening, leaving at 8 o'clock by the dominion government steamer Quadra for Vancouver, en route to his old home in Juebec. Owing to sir Henri's indifferent health the leave taking was very quiet, but none the less heartfelt on the part of citizens of the capital.

### CROPS IN FINE CONDITION

Winnipeg, June 5—Reports from provincial points indicate that crops are growing remarkably well under present favorable conditions. Wheat is 16 inches high and prospects are particularly good.

## ANARCHISTS OF PATERSON

### Said to Have Plotted Attempt on Life of King of Italy

**And to Have Planned Assassination of all the Crowned Heads of Europe--Washington Asked for Explanations**

London, June 6.—According to a despatch from Vienna printed in the Daily Telegraph this morning, the Italian police learned that Italian anarchists, living in Patterson, N. J., decided upon at attempt on the life of king Victor Emanuel of Italy, at the opening of the Milan exposition and despatched one of their number to make the attempt. This anarchist, the report relates, was followed through England, France and Switzerland, and arrested the moment he set foot on Italian soil, but the whole affair was kept from the public. It further appears, the despatch says, that all the European governments were informed that Paterson anarchists had plotted the assassination of their respective sovereigns. It was this that led to the discovery of bombs at Ancona, and of a plot against king Victor Emanuel.

The Daily Telegraph's correspondent says that premier Gioletti and foreign minister Tittani had a conference on the matter with ambassador White, who was instructed by the Washington government to afford full information regarding the proceedings of anarchists in America.

### CONSUMPTION AND CANCER

War to be Waged Against These Dread Scourges in England

London, June 5—The most practical and at the same time the most extensive plan for fighting the dread scourges consumption and cancer that has ever been devised has been successfully launched.

The secretary of the "National Movement against Consumption and Cancer," explained the project as follows:

"It is briefly a gigantic scheme of provision against accidents and illness," he said. "The profits of the scheme are to be devoted to the furthering of every useful prospect for fighting consumption and cancer. We estimate these profits at $375,000 a year, a sum which will enable the committee to establish sanatoria for consumptives, to help hospitals for sufferers from cancer all over the country, to aid scientists and medical men in research work and to supply funds to existing institutions which are carrying on the work of fighting these diseases.

"Under our system we offer for a yearly subscription of $9 compensation against accidents and illness on a scale which would cost about $20 yearly under any ordinary insurance policy. The benefits range between $10,000 for death in any accident to a public conveyance and $30 a week for eight weeks for incapacitation from typhoid, scarlet fever, diphtheria, appendicitis and various other specified illnesses. Anybody between the ages of 12 and 70 may become a subscriber."

### LABELLING PATENT MEDICINES

Change Opposed by Manufacturers Before Parliamentary Committee

(Special to The Daily News)

Ottawa, June 5.—The special committee of parliament that has been looking into the patent medicine question examined today David Watson, president, and J. A. McKee, chairman of the board of control of the Dominion Proprietary Medicine Manufacturing Association. Mr. Watson protested against the addition of a law that would compel patent medicine men to print on their bottles the nature of the contracts. It would provoke warranted suspicion on the part of the public if the labels to which they have long been accustomed were changed. Mr. McKee pointed out that where individuals are now addicted to the cocaine or morphine habit the announcement that certain medicines contained these drugs would only enable these victims to get these drugs the easier.

### APPOINTMENT FOR CUTHBERT

Former Colonel of Scots' Guards Favored By the King.

London, Junt 5.—Through the intervention of the king colonel Cuthbert of the Scots Guards ,who was ordered to resign his command owing to the famous "ragging scandal' in his regiment, has obtained a good appointment as adjutant general of the forces in Egypt. The army council did not wish to give the colonel any appointment, but the king insisted that he should have one, although his majesty strongly objected to the ragging episode itself.

### MINING RECORDS

At the mining recorder's office on June 5th the placer claim and one transfer were recorded and nine certificates of work were granted.

John Youngberg recorded the Venena placer claim on the Salmon river about one and a half miles north of Porto Rico siding and adjoining the Reco placer claim on the south.

Belle Harvey Marchessenault of Tabor, Alberta transferred to Samuel Marshall a one quarter interest in the Chantal claim situated three-quarters of a mile east of Grohman creek about three miles north of Kootenay river Consideration $500.

Certificates of work were issued to Alex Long on the Copper Butte; to L. J. Humer on the Elsie Homes; to G. A. Hunt on the Gladstone, the Salisbury and the Beaconsfield; to F. T. Morrison on the Winstead; to W. J. Murphy on the Bywabik; to Gus Rotch on the Winnipeg, and to T. P. Moran on the Walla Walla.

### U. S. CANNED GOODS BARRED

London, June 6.—The Daily Telegraph this morning asserts that all admiraly and war office contracts which have been placed since the disclosures affecting the meat packing industry in the United States, stipulate that canned meats must be British or colonial products.

### WON BY NANAIMO BOY

Victoria, June 5.—Harry Bray, B. A., son of Marshall Bray, government agent at Nanaimo, tonight won the Rhodes scholarship.

## NEW COLLIERY COMPANY

NOW IN COURSE OF FLOTATION IN LONDON.

TO BE KNOWN AS WESTERN DOMINION COLLIERIES, LIMITED

Winnipeg, June 5.—The Western Dominion Collieries, Limited, is the title of a company that is inviting in London subscriptions for a share capital of $1,000,000 of which $500,000 will be held in reserve to be used only for the purpose of conversion of debentures, which are being issued to the extent of $500,000, bearing a first mortgage on all the freehold properties, railway and fixed plant of the company, and also by a first floating charge on the undertaking and the other assets of the company.

The agent of the company in Canada is J. Scarvelt Cape, Winnipeg, and the general manager is R. R. Taylor, Winnipeg. The secretary of the company is H. Barker, whose office is at 6 Old Jewery, London, E.C.

The directors of the new company are as follows: Frank Hardcastle, J.P., D. L., director of Thomas Fletcher & Sons, Limited, colliery proprietors, 87 Lancaster Gate; Archibald Gordon Pollock, managing director of the London and New York Investment Corporation Limited, 18 St. Helens Place, E. C.; Colin George Ross, J. P., director of the Gresham Life Assurance Society, Limited, 18 Beaufort Gardens, S.W.; John Robert Tennant, director of the Western Canada Land Co., Ltd., 19 Hanover Square, W.

Mr. Taylor has just arrived back from England and when spoken to said that the announcement was a preliminary one and a further statement would be made in the near future.

## OHIO TOWN WASHED OUT

FLOOD CAUSED BY HEAVY RAINS SWEPT EVERYTHING AWAY

INHABITANTS FLEE TO MOUNTAINS IN NIGHT CLOTHES.

Irontown, Ohio, June 5.—Scottown a village 20 miles north of here with a population of 200 was washed away today. Not a house was left on its foundation. Mrs. Sayre and daughter were drowned. Bridges were washed away and telephone lines are down. The disaster was due to a flood which was caused by a heavy rain lasting for six hours.

The town is situated at the confluence of branches of the Indiana and Guyan creeks. The valley above Scottown is narrow and the flood swept everything before it. Men, women and children escaped to the hills in their night clothes. Four persons were so injured that they cannot recover. The valley from Scottown to the river was swept clear. Four iron bridges were swept away and many horses were drowned. The damage to crops cannot be estimated.

### CHIEF OF POLICE SUSPENDED

General Inefficiency of the Force Given As Reason by Mayor Buscombe.

Vancouver, June 5.—Chief of police North was summarily suspended by his worship the mayor today, the notice merely embodying the information that the general inefficiency of the force was the reason of this move.

Sergeant. Butler is appointed acting chief.

Provincial health officer Fagan outlined the objects of the anti-tuberculosis association at this afternoon's annual meeting of the branch in this city. The local association hopes to raise $5000 toward the $100,000 required for a sanitarium.

### IN MEMORY OF SIR JOHN

Kingston, June 5—Tomorrow is the 10th anniversary of the death of sir John A. Macdonald, P.C., C.M.G., Canada's grand old man, and throughout the dominion his memory will be honored by everyone without distinction or party lines.

## WASHINGTON TO 'FRISCO

### Bill Before Congress to Build an American Appian Way

**National Pike to Stretch From Shores of Atlantic to Pacific Coast--Big Project That May be Carried Out**

Washington, June 5.—A national pike to run from the Atlantic to the Pacific is the latest proposition in this land of big schemes. The first step has been taken. In a sentence almost as long as the proposed pike itself the Washington Post announces the fact thus:

"The creation of the American Appian Way, beginning at Washington, on Atlantic tidewater, following the train of the historic National pike through the passes of the Appalachians and across the Ohio, through the great Middle West to St. Louis, and then in two great boulevards on to the Pacific, one of which will cross Montana to Puget Sound and te other through Denver and Salt Lake over the Rockies and Sierras to 'Frisco, will be the magnificent fruition of plans, the first tentative steps of which have been taken in the introduction of a bill in congress by representative Pearre of Maryland, for an appropriation for the restoration of the monuments and landmarks and the reconstruction of the ancient Cumberland road that by its building made an empire possible."

Automobile associations and good roads folk all over the country are pledged to the support of the bill. "Honk! Honk" is the warcry of the new movement.

Save to the historian and those who live along the dusty thread of macadam that binds together Washington and St. Louis, the story of the old National pike is an unknown chapter.

The route is prehistoric. Even before the Indians invaded America herds of buffalo roamed the continent. They were America's first road makers. They did their work so well that a map of their trails and "traces" would duplicate the great highway and railway systems of today.

The National pike, or the Cumberland road as it was popularly called, was first a buffalo track worn deep across the Appalachians by the pounding hoofs of millions of bison. When the Indians came they followed this same trail in their hunting excursions and war expeditons, retreating over it to the west before the ever advancing, relentless frontier of the white man.

Over this path came the Anglo-Saxon hunter and trapper, followed by the home maker, until at last the tide of immigration poured in a deluge through the mountain passes to the land of promise.

### PRIVATE DETECTIVES REMOVED

National Guards Now in Control of United States Co.'s Mines

Dillonvalt, Ohio, June 6—With a total of about 1150 members of the Ohio National Guards on duty, quiet regins tonight in this section. The main body of the troops is bivouacked on the hills surrounding the Bradley mine, the property of the United States Coal company near Smithfield. At the offices of the coal company, it was announced that all of the guards or private detectives, whose appearance is alleged to have been the cause of the riot Sunday night, have been relieved of duty, and that the military will be in full control of the mines till further notice. There was no outward display of hostility on the part of the miners on the arrival of the state troops and officials of the miners' organization say there will be no trouble between them and the sodiers.

### CASE AGAINST PACKERS

Charge of Accepting Rebates to go to Jury Tomorrow

Kansas City, June 5—By an agreement of counsel the cases against the packing companies of Swift ,Cudahy, Armour & Nelson Morris, charged with accepting rebates, were consolidated in the United States district court here today and judge McPherson agreed to allow the attorneys to present their cases to the jury on a statement of facts. No witnesses will be examined. The attorneys have practically agreed upon their statement this afternoon but as they had not been signed, the court adjourned the case until Thursday. At that time the statement will be read in court and the case given to the jury after brief arguments.

### AT THE THEATRE

Roscians Produce Martha to a Crowded House—Fra Diavolo Tonight

"Standing room only" was the signal hung out at Sherman's opera house last evening shortly before the curtain went up for the first act of the ever popular opera, Martha, presented by the Roscian Opera company.

The company, if anything, improved the excellent impression they created here last December and with the single exception of the enforced want of an orchestra, the whole performance last night left nothing to be desired.

Miss Lucia Nola, who filled the principal role of Martha, was heard to particularly good advantage. She has a strong, sweet and clear soprano voice and her rendition of that old favorite, "The Last Rose of Summer," fairly brought down the house, as might be expected, and the good natured songstress gracefully responded to demands for a double encore.

F. W. Walters, the leading tenor was at his best as Lionel, and thoroughly deserved the hearty applause showered upon his efforts.

Miss Winnifred Crowley, well known to all musical people in this city, appeared here for the first time in opera and as Nancy, charmed the audience with her singing and graceful acting.

Claude Amsden, the comedian of the company; Hilliard Campbell and Jack Dewey all rendered their respective parts very acceptably.

The chorus showed evidence of careful and effective training, the play was well staged and the whole production quite the best seen here this year. The company will close their all too brief engagement here this evening when Fra Diavolo will be put on.

## JAPAN WANTS THE CASH

MONEY TAKEN FROM BANK MUST BE RETURNED.

CZAR OF RUSSIA WLL LIKELY HAVE TO MAKE GOOD

Berlin, June 5.—The conflict between Russia and Japan in the far east, which, it is generally conceded is inevitable, may come very much sooner than anticipated unless a serious disagreement between the two countries is speedily adjusted

Japan is demanding from the Russo-Chinese bank the large amount of cash belonging to Russia and said to have been in the possession of the bank at the time Port Arthur was surrendered.

Immediately before the Japanese troops entered the fortress the Russian officials succeeded in smuggling the money out of the city hidden, it is supposed among the Red Cross supplies which they were allowed to take away, lest the wounded in Manchuria should suffer, but from the books of the bank which fell into their hands the Japanese learned the exact amount which, it is said, was many millions of roubles.

The Japanese government now holds that the Russo-Chinese bank, being a government institution, the money, according to the act of capitulation, should have been turned over to the victorious general Nogi. A demand for the delivery of the money has been made by the Japanese ambassador at St. Petersburg, who has also told the czar that unless it is forthcoming the mikado will seize the valuable holdings of the bank at Port Arthur and Dalny.

As might be expected, the money never reached St. Petersburg. It has, in fact, never even been heard of in that city. Possibly general Stoessel knows something about it or it may have found its way into the capacious pocket of some grand duke.

This matters little to the mikado, who does not care where it comes from if he gets a similar amount. An investigation has been ordered, but investigations are no more effective in Russia than elsewhere, and the probabilities are that the czar will pay it out of his own pocket, having had and still having all the war he wants.

## WANTED TO RIDE FREE

ITALIAN LABORERS TAKE POSSESSION OF CABOOSE

TRAIN CREW TURN HOSE ON THEM WITHOUT EFFECT

Moose Jaw, June 5—Six Italian laborers were taken to Regina tonight under guard of corporal Mundy to stand trial as the result of an attempt of 15 fellow countrymen to forcibly ride on a train from Aikin's point to Moose Jaw. They boarded the train but refused to pay their fare as they said they were employed by the C.P.R. and the train crew put them off. When the next train arrived they were ready and with knives drawn they compelled the conductor to allow them to ride in the caboose. At Parkberg they were all asleep in the caboose and the train crew turned the hose on them in an attempt to drive them out, but only excited them the more. The conductor wired ahead to the police here so when the train arived in Moose Jaw corporal Mundy and chief Johnson handcuffed the crowd while they were still asleep.

Today the ringleaders were taken to Regina.

### UNION DEPOT AT PORT ARTHUR.

Port Arthur, Ont., June 5.—It is proposed to erect a fine terminal here for the joint use of the three railways centering in the town. The council will vigorously oppose the application of the G. T. P. to secure land at Dog lake, as such would prevent the development of the excellent water power available there.

### FATAL EXPLOSION

New York, June 5—One woman was killed and 11 persons injured so badly that they had to be taken to the hospitals, by an explosion tonight in the building of the New York & Boston Dyeing company, and 10th avenue and 57th street. Nine of those injured were firemen.

### BANK TELLER MISSING

Ottawa, June 5—Teller Ross of the Union bank, Winchester, has been missing since the 24th of May and so, according to report are several thousand dollars of the bank funds. The lowest estimate is $12,000. The last seen of Ross was when he bought a ticket for Brockville. Sureties have made settlement with the bank.

### GOVERNOR OF OREGON

Portland, June 5—George E. Chamberlain, democrat, has been re-elected governor of Oregon by a majority of not less than 15,000 and perhaps as much as 25,000.

## GROCERS IN CONSPIRACY

### Aged Kingston Wholesaler Tells of Iniquities of the Guild

**Unable to Purchase Sugar Although Offered to Take it by the Car or Train Load --Other Evidences of Combine**

Hamilton, Ont., June 5.—When the preliminary investigation into the conspiracy charges against the Dominion Wholesale Grocers' Guild officers was resumed, almost the entire session was devoted to hearing the evidence of Andrew McLean, Kingston, a wholesaler, who had a rough experience with the guild. Until 1888, McLean said, he could buy direct from manufacturers, but after that when he applied he was told he was not on the list. He went to Montreal this month and saw sir William Macdonald, who still refused to put him on the list, because he was not a member of the guild. McLean had similar experiences with sugar refiners. When he saw sir George Drummond of Redpaths, he told McLean he was only one against sixty, and refused his pleas for sugar. He was ready to buy anything, from a car to a trainload, and pay for it in advance. When he got supplies from other places the guild traced the men and stopped them selling to him. He became hopeless, and applied for admission to the guild, but was refused. McLean declared he was so angry with Craig, one of the defendants and officers of the guild, he was preparing once to punch his head. If the government would lower slightly the duty on sugar and rice, he thought all the dealers would get along nicely.

"You ask," said the aged witness, "how this affected my business. It has held me down for 60 years. I slaved, and those men kept me from the position I am justly entitled to." McLean paid a final visit to the refiners this month to see if they would relent, but they refused.

The charge of the crown that the organization conspired to unduly enhance prices seems to be substantiated to some extent by the evidence of John Curtis, a wholesale and retail merchant of Port Hope. Under the equalized rate system of the organization, he said, it cost 14c more per cwt. to get Montreal sugar to Port Hope than it did to Toronto. The guild rate to Port Hope for less than carlots was 22c and 17c for carlots. To Peterboro it was 11c for less than carloads and 6c for carloads. The guild price in Hamilton, on the other hand, was 9c for less than carload lots, though the distance was much greater. He also said the prices along the Grand Trunk from Toronto to Montreal were higher than they should be, because the guild and the G. T. R. kept them up.

Mr. Bristol brought out the point that these rates were fixed largely by railway competition. The G. T. R. had no competition to Port Hope but had to Peterboro and other western points.

Alfred Powis, a Hamilton broker, who acts as agent for sir Willim Macdonald, eastern sugar refiners, and the Pacific Selling company, when called to the stand admitted he only canvassed members of the guild for business.

### C. P. R. EARNINGS.

Splendid Showing For April And Past Ten Months of Fiscal Year.

The Canadian Pacific Railway company's statement of earnings and expenses for the month of April and for the ten months of the company's fiscal year July 1st to April 30th, which has just been issued, makes a remarkably fine showing.

The net profits for the month of April amounted to $2,342,558, as against $1,531,806 for April last year, an increase of $810,752.

The net profits for the ten months ending April 30 amounted to $18,847,600, as against $12,584,220 for the corresponding period of last year, an increase of $6,263,739.

The figures in detail are:

| | April, 1906. | July 1 to Apr. 30, '06. |
|---|---|---|
| Gross earnings | $5,490,999.86 | $50,613,406.38 |
| Working expenses | 3,148,441.02 | 31.765,806.14 |
| Net profits | $2,342,558.84 | $18,847,600.24 |

### FRANK SMELTER IN OPERATION

(Special to The Daily News)

Frank, June 5.—The Canadian Metals company, Frank, commenced smelting yesterday and are producing a first class spelter, the first produced in Canada.

A large number of expert smelter men arrived last week from the United States, also a few from England, and were installed as operators. About 135 men will be employed altogether

### ANGLO-RUSSIAN ENTENTE

London, June 5.—The Daily Chronicle this morning states that following the visit of a British squadron to Cronstadt in July, a Russian squadron, probably commanded by admiral Welen, will pay a return visit to Portsmouth in August or September.

## THE HUDSON'S BAY CO.

Spring Poems and

**Maple Syrup**

These are now in season, but whilst the product of the spring poet is usually flat and tasteless, the pure product of the

**SUGAR MAPLE TREE**

is healthy and deliciously toothsome. So much adulterated stuff is on the market now, that we feel proud to be in a position to offer

**Pure Maple Syrup**

specially made for us in the Province of Quebec. The first shipment direct from the Habitant's Camp in the sugar bush has just arrived.

**Our Price is $1.50 per reputed gallon tin**

Secure a tin before it all goes.

### THE INTERIOR DEPARTMENT

The Ottawa opposition has concentrated most of its attack this session of parliament upon the administration of the department of the interior. One explanation of these tactics is that Hon. Frank Oliver is not only new to the job, but is an excitable man and easily provoked to making statements more vigorous than tactful. Naturally a parliamentary opposition will take full advantage of such a situation. There are, of course, other grounds upon which the course of the opposition can be explained.

The interior department is now a live factor in dominion affairs. Conservatives recall the days of somnolency that prevailed under the regime of T. M. Daly, and they imagine there must be something wrong when so much is doing. R. L. Borden and George Eulas Foster have led the attack, the latter making a bitter personal attack upon Clifford Sifton in that gentleman's absence.

The liberals had their innings the other day when Clifford Sifton replied. The reports of his speech occupy many columns in the eastern papers and with one accord they acclaim it as a masterpiece.

The Toronto News, an independent paper, and one that has all along been very hostile to Mr. Sifton, says of his speech:

Mr. Sifton's speech lasted nearly four hours. The first hour was a brilliantly plausible explanation of most of the points advanced by Mr. Borden. Then at great length he defended the sale to the Saskatchewan Valley Land company. Finally, he defended his administration at large. The first portion rose to a very high level of defensive debating; the second portion was rather tedious; the third not particularly important.

Analyzed, Mr. Sifton's defence amounts to the proposition that if the fullest measure of probity be granted to the men who are entrusted with wide and sometimes despotic powers, the system he adopted is excellent.

But apart from analysis, the effect of his speech on the temper of the house was electrical. It transformed the liberals from a dispirited to an enthusiastic party, and almost placed them on the offensive. Such is the strength of personality and the value of an ability which, as in Mr. Sifton's case, makes a superb debater of a man with a bad voice and an awkward style.

Apart from his effort to dissapate the cloud of suspicion which has enveloped him, Mr. Sifton fell savagely upon Mr. Foster, and revenged himself for the speech on the North Atlantic Trading company by a series of personal attacks which, for acrid wit, barbed neatness of phrasing and combination of light handedness and lack of restraint, has not been equalled for many a day.

Mr. Sifton dealt exhaustively with every charge preferred against the department of the interior since the liberals took office and he was able to show by indisputable facts that under his administration the department had accomplished work of the greatest magnitude and of incalculable value to the dominion. His exposure of the alleged Saskatchewan Valley lands "scandal" was thorough. In this case he had George Eulas Foster badly cornered and he certainly made the most of the opportunity. In concluding his speech, Mr. Sifton said:

"I have given my version of the matter as it has appeared to me. I have placed the facts before the house to the best of my ability and shall be content when the history of this country shall be written to have the history of the last eight or nine years, so far as western administration is concerned, entered opposite my name."

And the opinion of unbiassed men throughout the country is that Clifford Sifton's advent to the control of the department of the interior was the best piece of good fortune that has come to Canada in many long years. If ever any man in public life in Canada rendered valuable services to the country, Clifford Sifton is the man, and no efforts that may be made to belittle his achievements will ever persuade the mass of the Canadian people to the contrary.

### GOT HIS HAIR BACK.

**Was Perfectly Bald When He Started to Use Newbro's Herpicide.**

Frederick Manuell, Maryland block, Butte, Montana, bought a bottle of Newbro's Herpicide, April 6, '99, and began to use it for entire baldness. The hair follicles in his scalp were not dead and in 20 days he had hair all over his head. On July 2 he writes, "and today my hair is as thick and luxuriant as any one could wish." Newbro's Herpicide works on an old principle and with a new discovery—destroy the cause and you remove the effect. Herpicide destroys the germ that causes dandruff, falling hair, and finally baldness, so that with the cause gone the effect cannot remain. Stops falling hair at once and a new growth starts. Sold by leading druggists. Send 10c. in stamps for sample to The Herpicide Co., Detroit, Mich.

CANADA DRUG & BOOK COMPANY, Special Agents. K.W.C., 146 &

### EDITORIAL NOTES.

James J. Hill, the president of the Great Northern railway, was asked by an interviewer the other day: "Do you agree with the statement that has so frequently been made that British Columbia is the richest province in the Dominion of Canada?" He replied: "If you take the question of natural resources that is undoubtedly true. It has all the advantages of farm, orchard, forest, sea, and mines. The prairies, from Winnipeg westward, have unquestionably advantages of large areas of good grain land and breadstuffs, but British Columbia has everything in the way of minerals—coal, iron, gold, silver, copper, lead and zinc; large areas of agricultural land, and large valleys suitable for the production of fruit and vegetables." A very neat and accurate summing up of the unrivalled resources of this province.

The determination of the Mountain Lumbermen's Association not to raise the price of lumber at present, despite the fact that the demand is practically greater than the supply, will be learned of with very great satisfactioh. This decision is an evidence that the Association is not conducted solely with a view to the immediate profits of its members, but rather with the broader view of establishing the industry upon sound commercial lines, fair alike to producer and consumer.

A Fernie correspondent points out that there is no scarcity of labor in that section of the province If conditions there be as he intimates some of the surplus labor might well be diverted to the Boundary district and other sections of the province where labor is in great demand. Good quartz miners are in demand at the Boundary mines; railroad laborers in almost any numbers can find work on the various extensions now underway in the Boundary and Similkameen districts; from all parts of southern British Columbia come demands from sawmill and logging camp operators for labor. We notice in the Ashcroft Journal an advertisement for 100 miners and 600 railroad laborers. Labor is required all through Kootenay where fruit growing is engaged in. Our correspondent must not accept as true the silly stories he has been told about the conditions of labor at the quartz mines and sawmills. Nowhere else in the world are conditions of labor, generally speaking, more favorable than in southern British Columbia. Wages are good, hours of labor are not excessive and the relations between employer and employee are friendly to a degree not common in other parts of the continent.

The other day a special article was devoted to the improvements now beng carried out at the Rossland mines and Trail smelter of the Canadian Consolidated Mining & Smelting company. Today we devote several columns to telling of the evidence of enterprise noticeable at the Hall Mines smelter. From time to time in the past The Daily News has published annual reports and other data concerning the Hall Mining and Smelting company, and whilst latterly it has happily been possible to point to signs of prosperity, the record on the whole has not been such as to warrant any great enthusiasm on the part of the management of the company. Yet we find an abiding faith in the potentialities of the mining industry displayed by the management in the carrying out of extensive and costly improvements. One clearly defined object is manifestly kept in view. Cost of smelting must be reduced to a figure at which ample and constant supplies of ore can be ensured. The Hall Mines smelter has been an important factor in the industrial life of Nelson in the past. With the improvements now nearing completion its importance will be enhanced and it will be the earnest hope of every citizen of Nelson that the energy and enterprise shown by the management will be richly rewarded.

### HIS MAIDEN SPEECH

Senator Robert Jaffray Speaks on B. C. Railway Requirements

Hon. Robert Jaffray made his maiden speech in the senate during the adjourned debate on the motion for the third reading of the Vancouver, Westminster and Yukon railway bill. It was brief and to the point and businesslike, and only occupied a minute or two in delivery. Mr. Jaffray declared himself emphatically in favor of the measure. He said that no province in Canada stood so much in need of encouragement to develop its immense resources as did British Columbia and that those who opposed railway building would be acting against the best interests of that province. Hon. Mr. Jaffray's maiden effort was loudly applauded by his colleagues. The hon. gentleman said: "I do not know that a member so new to this house should have anything to say in a matter of so much importance as this. But although new to this house I am not new to this question. I had to discuss a subject of the very same nature in British Columbia and in the legislature of that province I had to meet the very same argument that we have heard today against the railway. When it is remembered how unanimous the British Columbians are in favor of this bill, if no other reason existed that is one potent reason why we should not hesitate in deciding what our course should be in reference to this measure. There is no province in the dominion that has the rich undeveloped resources and that needs every encouragement possible, whether in the country or out of it, to develop its railway facilities. The mountains and other difficulties and troubles that confront railway development in British Columbia ought to be sufficient reason for our giving this measure every consideration. The arguments in favor of the bill have been so aptly put forward and are so convincing that it is not necessary for me to add much to what has been already said. I have only to remark that any party that opposes the development of British Columbia will not have the support of that province, which naturally will not tolerate interference with the provision of facilities for opening up the country, more especially by means of railways. I hope that the senate will never stand in the way of the development of British Columbia by railway construction or otherwise. I would much rather see railways that would connect our country from the Atlantic to the Pacific, but in order to find business for those railways, in order to develop the country, we must allow systems that are natural to the province to be developed also, and it will be a selfish, narrow, and indefensible policy if we attempt to repress British Columbia in any matter of this kind. I am certain that if we adopt such a policy we shall regret it, and that it will not be for the benefit of Canada as a whole."

## ST. CHARLES EVAPORATED CREAM

Mother and Child are equally benefited by St. Charles Evaporated Cream. It is the world's standard of purity and, next to a healthy mother's own milk, the best obtainable food for infants. Many doctors insist not only that infants be fed on St. Charles Evaporated Cream, but that mothers themselves make it a large part of their diet. The use of St. Charles Cream is economical too. It keeps forever, and by simply adding pure water in proportions, you have pure milk and pure cream, better than the best you can buy and equal to the best the best dairy in the world can produce. In using St. Charles Cream, *you take no chances.*

***Sold by Best Grocers Everywhere.***

Handsome booklet of valuable information to mothers and nurses sent free upon application.

ST. CHARLES CONDENSING COMPANY, St. Charles, Ill.

## A Talk to Men on Value.

Custom tailors buy from the wholesalers—get only enough cloth for a single suit. Of course wholesalers and jobbers have to make a profit. "Plastic Form" buyers go direct to the mills abroad, order in enormous quantities—pay cash—take advantage of all discounts—and save intermediate profits.

Every man in the "Plastic Form" workrooms is a specialist on one particular part of a garment. Naturally, he does BETTER work—and MORE work—than a tailor who has to complete an entire coat.

## "Plastic Form" Clothing

There's a corresponding saving on everything else. Just compare "Plastic Form" VALUES with the custom tailors.

# EVIDENCES OF ENTERPRISE AT HALL MINES SMELTER

While the Trail district may justly boast of its big smelter, belonging to the Canadian Consolidated Mining & Smelting company, yet the more immediate district of Nelson has a reduction works which will now compare favorably with it in many respects and whose existence is perhaps even more important to the well being of the many small shippers of the lead mine districts, whose aggregate output bulks largely in the lead returns of the province

The Hall Mines smelter, which is just completing a series of improvements, costing over $75,000, calculated to make a vast difference to its profits as well as to exercise a beneficial effect upon its customers, is somewhat disadvantageously situated upon a side hill, just above the C. P. R. depot. Owing to its situation it is cramped for room, entailing a greater use of machinery than is to be seen at Trail in proportion to the work accomplished. It has two furnaces, the one having a capacity of 80 tons daily and the other of 120 tons The raison d'etre of the smelter is, of course, the lead ores of the Slocan and East Kootenay. Though those ores are by no means poured as freely into these reduction works as the present prices of lead and silver would seem to warrant, yet it may readily be gathered from the large expenditures now being undertaken that the management has every faith in the possibilities of the lead mines and every confidence that the increase of the supply in the near future will be such as to justify the present heavy outlay of capital.

### SMELTER CHARGES

The management declines to believe that the cause of the reduced output of recent years is the heavy charge for smelting. That such is not altogether the case can be seen from even a casual inspection of the prices prevalent. Since February last the charge for lead reduction has been $12 instead of $15. Within the last two years not only has the price of lead frequently risen above the quotation on which bounty ceases to be paid but the price of silver has also advanced, going from 52 cent to 67 cents per ounce, a rise which in the great majority of Slocan ores makes a difference of $7.50 a ton. "This," says general manager J. J. Campbell, "taken together with the lessened cost of treatment and even neglecting the better price that lead is commanding, amounts to something like $10.50 per ton in favor of the shipper of today as against the shipper of 1904, and should surely be a sufficient inducement to ship." In these remarks, it is only fair to add, Mr. Campbell is sustained by the management of the other big lead smelter, Trail.

The real cause is stated to be lack of development in the lean years. This, in some cases means that those mine owners who shipped during the lean years did so at small profits, profits that would not permit them to perform sufficient development to restore those ore reserves depleted by shipment As many of these mines were worked with small capital, exhaustion of the ore reserves meant no money for development and thus a shut down of a promising property. Under the new conditions, better metal prices and cheaper smelting, mine owners are now willing enough to permit capitalists to come in and purchase at a reasonable figure either the property itself or an interest in it; willing, often enough, in the latter case, to allow the purchase money for the interest sold to go into the mine for its development. Thus the two chief requisites in the lead districts today are capital for development and labor to employ that capital profitably. Outside capital had never the opportunity in the Slocan which it today possesses.

The reduction in the cost of smelting made this year was effected in order to meet European competition. But the returns of the Hall Mines Limited show that the profits on the old rates were not such as would justify any large reduction. Still that has been done, had to be done. How it has been dealt with so as to still leave a profit to the shareholders of the company can best be shown by tracing the ore from its reception to its exist from the smelter as pig lead or copper matte.

### THE NEW MILL

Besides the ordinary custom ore there arrives at the smelter the iron flux from the Emma mine, of the Boundary, and the lime rock from the Hunter V., of the Ymir district. These are dumped into a bin under the C. P. R. siding at the upper end of the works. It is taken thence by a conveyor and passes through a crusher and, being sampled as it goes through, is sent over a gravity tramway to the storage bins near the blast furnaces.

But the great bulk of the ore goes through the new sampler and crusher. This building is perhaps the most complete and compact of its kind in Canada. It has cost upwards of $20,000 and was designed by the smelter officials, Messrs Hedley and Harris, with their assistants. Most of the machinery in this mill, which towers high above the remaining buildings of the works, was constructed by the Colorado Iron Works.

As the ore is rereived it passes from the car on the railway track directly into a crusher on a level with the platform. Thence it is fed automatically, no matter how fast or how slowly the ore may be fed into the crusher, to an elevator which conveys it to the top of the building. From there it drops into a Vezin sampler, one-fifth being taken and four-fifths rejected.

The Vezin sampler is simple enough in operation. An open spout, the area of which is a fifth of the area of the circle it describes, revolving slowly around a spindle, receives one-fifth of the ore dropping through the chute leading from the top of the elevator. The four-fifths rejected passes into a reject bin which is in automatic communication with the bedding bins at the rear of the mill. The fifth, passing and sampler, goes into an automatic mixer and feeder to a Gates' rolls which crushes it to 1½ inch.

The product is taken up a second elevator, alongside the first, passes another Vezin sampler, where again four-fifths is similarly cut out, is again mixed and fed to a Colorado Iron Works' rolls and is crushed to ½ inch size. This process is again repeated and the final sample, now reduced to ¼ inch size, is taken to the bucking room where samples are prepared for the assay office in the ordinary way, three samples, as usual, being taken, one for the smelter, one for the shipper and one for the umpire in case of dispute, the latter being sealed.

### INGENIOUS CRUSHING

But most of the ore has to be reduced to a six mesh, ⅛ inch, for the Heberlein process. The mill is not only designed for a sampler but is also a crusher having a capacity of 20 tons per hour. When wanted for crushing the ore is passed into the mill in the manner described and is taken up to the top of the first elevator. Thence instead of passing into the ore chute leading to the first Vezin sampler, by means of a swivel spout, the flow is directed to another chute leading to the first rolls, thus cutting out the Vezin sampler and the automatic mixer. Before reaching the rolls, however, the ore flow is met by an impact screen and any oversize is returned automatically to the crusher. From the first rolls it passes to the second and so on. Each time in its descent from the top of the mill it is met by an impact screen of smaller mesh, oversize being automatically returned to the rolls immediately before, until it passes a six mesh and emerges from the mill into an automatic spreader and feeder which distributes it evenly in the bedding bins.

A novel feature in the mill, which is wonderful in its compactness and reflects great credit upon the ingenuity of its designers, is the fact that all boxes on the line shafting of the machinery are fitted with Chapman double ball bearings. This so greatly reduces the friction that an official of the company was able in the presence of the representative of The Daily News to turn the whole shafting, together with a number of the machines which were coupled to it, by merely pulling by hand a pulley belting. Without ball bearings to accomplish this turnover would have meant the expenditure of 10 per cent more horse power, involving a motor. This is typical of the whole smelter methods at the Hall Mines. In this case not only is machinery saved but labor also, as the ball bearings require oiling so infrequently that the services of an oiler are unnecessary. All the rolls in the mill are duplicated so that there shall be no delay when the roll shells have to be replaced. The motive power of the mill, as with all the other machinery in these works, is electricity, supplied from Bonnington Falls.

### THE BEDDING BINS.

As stated, the ore on leaving the mill is placed by means of a feeder and spreader into the bedding bins immediately behind. These bins are of a peculiar construction. Many ores come in small shipments. By analysis the nature of these ores is determined and they are accordingly placed in this or that bin, spread evenly in a layer over the whole of its surface, 50 feet by 10

Our stock is the best in the market. Fit and finish strictly custom tailoring. Come and look over our stock. Glad to show goods.

M. WEINSTEN,
NELSON, B.C.

and remain there till the whole of the bin is filled to its depth of ten feet by other layers of custom ore or of flux as may be demanded from the nature of the ores. When the bin is full its contents are such that when a vertical section is taken out that vertical section is chemically fit for economical reduction. Each bin has a capacity of about 500 tons, rather more than less, and a whole series have been constructed. At either end of the bin is a door. Ordinarily the vertical section is taken from the door nearest the mill. A track runs along the floor along which a car is pushed and filled. Taken out it is placed immediately in connection with an endless chain, made by the Link Belt Machinery company, which lifts it to a level above that of the Heberlein roaster and converters, situated at the extreme end of the works. Here the car runs along a switchback railroad to a series of bins where it drops its load, automatically if necessary, runs on to a spring switch and back, by gravity, to the bedded bins, ready for another load, having traversed a distance of several hundred feet by itself.

THE HEBERLEIN ADDITION

From this last named series of bins, which are situated in the still incomplete converter building, beyond that of the roasters, the ore is fed on to an endless belt and is there mixed automatically in any desired proportion with other ores, and, passing through another automatic mixer, is conveyed to the Heberlein or Merton roaster, or to the converters direct. The Heberlein roaster, measuring 26 feet in internal diameter upon the hearth, is being constructed. It will have a capacity of 55 tons daily. In addition is used, in connection, an adapted Merton roaster. Ore after being calcined in the roasters is slaked, elevated again to the top floor of the converter building where it is fed automatically into the converters.

The converters are huge pots, at present six in number, although an additional six will be added later, each of which has a capacity of 12 to 15 tons. Into these are fed the partially calcined product of the roasters and there subjected to an air blast which is applied from the bottom of the pot. This has the effect of causing the almost complete elimination of the sulphur with an evolution of a large quantity of heat, bringing about the fusion of the contents. When the mass begins to cool, which it will do after about 12 hours, it is dumped out on the flour, ten feet beneath, the converters being so perfectly balanced on their standards as to be easily tipped by hands by means of the gear provided. To break up the mass it is the intention of the management to use a weight moving a crane which will drop from a height of 15 feet on to any part of the unbroken portions of the mass that may be desired.

When sufficiently broken up the product is dropped through the floor to a car beneath. The car is within a tunnel, pierced under the building. The fines are received into bins ingeniously placed to intercept them. The cars taking away the Heberlein product run over an automatic switchback incline tramway, automatically discharge into bins, run up on to a spring switch and return whence they came in much the same manner as already described in the similar switchback taking the ore from the bedded bins. The bin into which the Heberlein product is discharged is alongside the railway siding. C. P. R. cars take the product up to the first bin under the track at the other end of the works and dumping it there the product follows the course taken by the fluxes already alluded to and finds itself ultimately in the storage bins right over the blast furnace floor.

STORAGE BINS

These storage bins this may contain either the roasted Heberlein product, the iron or lime flux, or any raw ores that may be thought advisable for feeding directly into the furnaces without passing through the Heberlein process. The storage bins are being enlarged to a capacity of 3000 tons. The furnaces are of ordinary type except that they are each fitted with a Harris distributor which is a box having the effect of separating the matte and the slag as it flows out of the furnace. This is a recently patented invention of the superintendent of the smelter.

The furnaces are fed in the ordinary way. The lead is shipped for refining to the Trail smelter, up to its capacity, and the surplus to Selby or Everett, as the market affords. The slag is all granulated and washed away, filling up the gullies on the side hill and extending the flat at the shallow portion of the lower end of the west arm of Kootenay lake.

THE SAVINGS EFFECTED

The Heberlein roaster does more with the same consumption of fuel than any other roaster. It consumes less time and uses less labor. The converters almost entirely eliminate the sulphur in the ore, permitting a one treatment of the matte through the furnace, without a second passage. The second passage necessarily largely increases the cost of smelting.

But one of the most interesting of the savings which come through the use of the Heberlein process is that which is effected in the blast furnace afterwards. Under the old system a certain portion of the contents of the furnaces away as matte This had to be broken up, crushed fine, and resmelted, each time increasing in its copper value and crowding out the iron, lead and zinc contents. After this had been done almost daily for a year the copper contents of the matte would rise until it had reached a 40 per cent grade with a little lead content, which was shipped. This meant the expenditure of much labor and was the cause of much loss.

The cause of this furnace action arose through certain chemical affinities in smelting. In the furnace sulphur unites with copper and iron, in the order named. After the units of copper, present in most lead ores in some small degree, were taken up the remaining free sulphur united with the iron; the sulphides of copper and iron passing off as a matte, which also contained lead and zinc in solution. This matte on repassing the furnace keeps the copper sulphides formerly formed. But there is more copper now in the furnace from further charges. This copper takes up fresh sulphur, forming more sulphides and as the amount of matte is about the same the other sulphides and contents go off as slag or into the lead bullion. As the amount of copper present in the ore treated is but small at the best, it took a long time to bring the matte up to grade.

But if there were no sulphur at all in the furnace the copper would go off in the slag or into the bullion and be lost. And if the pure Heberlein product were fed into the furnace alone, that product being almost sweet, i.e., free of sulphur, the copper loss would be large. It is the intention of the management to produce, therefore, a quantity of matte proportionate to the copper offering. This has been made possible by the installation of the new Heberlein process. The amount of matte is easily regulated by the addition of the requisite amount of sulphur fed into the blast furnace in the shape of raw ores, consequently saving the major portion of the copper in possibly one or two operations. This cuts out not only the constant and heavy labor of breaking up the matte for constant retreatment and the expense of that retreatment but also permits the using of raw ores without passing them through the roasters and converters, meaning yet another saving.

Hence the Heberlein process, directly and indirectly, in time and in labor, forms great savings. These taken together with the ingenuity displayed in the planning of the big crushing and sampling mill and the method of handling small shipments, making up so large a percentage of the supply or ore, in the bedding bins, et cetera, are an ample explanation of the reason why the Hall Mines smelter in Nelson is able to keep up and increase its works, while lessening its charges, in face of the competition of other smelters.

SOCIALISM IN RUSSIA

Peasant Group in Lower House Put Forward Advanced Program.

St. Petersburg, June 5.—The extent to which socialistic theories have taken possession of the proletariat is evidenced by the agrarian program adopted by the radical peasant group in the lower house, which aims ultimately not only at the complete nationalization of land, with its attendant total abolition of private property, but the socialization of industry

The program provides for the creation of a national land fund from the crown, the church and private property exceeding a certain amount in value, the state to pay for expropriated property, and in the cities the factories and mills to be gradually transferred to the state for the benefit of the workmen. After taking such land as is needed for state public needs, the remainder would be distributable to anybody desiring to till it, preference being shown to the local agriculturists. The workers of the soil would pay an occupation tax, varying in accordance with the character and amount of ground taken. Persons without means to purchase agricultural implements should be entitled to receive credit, from the land fund.

Yerketinov, South Russia, June 5.—Owing to agitation among the peasants in this province, the landlords are hastily selling their estates for anything they will bring

Tulla, Russia June 5.—The agrarian movement in this province is spreading and is assuming a threatening phase.

Ask for Minard's and take no other

HOW TO BREAK UP A COLD

It may be a surprise to many to learn that a severe cold can be completely broken up in one or two days' time. The first symptoms of a cold are a dry, loud cough, a profuse watery discharge from the nose, and a thin white coating on the tongue. When Chamberlain's Cough Remedy is taken every hour on the first appearance of these symptoms, it counteracts the effect of the cold and restores the system to a healthy condition within a day or two. For sale by all druggists and dealers.

*METHODISTS AND EDUCATION*

Smiths Falls, Ont., June 5.—At today's meeting of the Montreal Methodist conference a memorial was passed in favor of appointing a minister in every conference of the church to look after educational work, devoting his whole time to it. The memorial also expressed confidence in Rev. Dr. Potts, as secretary of education.

Ask for Minard's and take no other

UNKNOWN FRIENDS

There are many people who have used Chamberlain's Colic, Cholera and Diarrhoea Remedy with splendid results, but who are unknown because they have hesitated to give a testimonial of their experience for publication. These people, however, are none the less friends of the remedy. They have done much toward making it a household word by their personal recommendations to friends and neighbors. It is a good medicine to have in the house and is widely known for its cures of diarrhoea and all forms of bowel trouble. For sale by all druggists and dealers.

MONTREAL STRIKE ENDED

Montreal, June 5.—The strike of employees of the Dominion Transport company ended today in complete victory for the company, the men accepting the terms which they refused on Saturday. They struck for $1.75 and go back at the old rate of $1.60.

Keep Minard's Liniment in the House

THE VERY BEST REMEDY FOR BOWEL TROUBLE

Mr. M. F. Borroughs, an old and well known resident of Bluffton, Ind., says: "I regard Chamberlain's Colic, Cholera and Diarrhoea Remedy as the very best remedy for bowel troubles. I make this statement after having used the remedy in my family for several years. I am never without it." This remedy is almost sure to be needed before the summer is over. Why not buy it now and be prepared for such an emergency. For sale by all druggists and dealers.

FELL INTO VAT OF ACID.

Sarnia, Ont., June 5.—Young Taylor, a resident of this place was badly injured at the Imperial Oil works here today. He was walking across the top of a vat of acid on a plank, when the plank gave way throwing him into the acid. the temperature of which was about 180 degrees. His legs up to the knees were terribly burned.

Keep Minard's Liniment in the House

Thorpe's Ginger Ale makes happy homes.

Only part of the wheat berry is fit for food. Yet much that isn't often gets into flour. You cannot see it or taste it, but it's there. It is simply a case of the miller getting more flour from his wheat and your getting less nourishment.

Royal Household Flour

is so milled that nothing goes into it except the part of the wheat that is food. You get just what you pay for—the best and purest flour made. It goes farther because it is all flour. Your grocer can supply you.

FOR SALE—1100 pound mare suitable for ranch. Apply H. E. Croasdaile & Co.

FOR SALE—At half cost of making, a number of show tables, or would make good kitchen tables 4 1-2 and 6 ft. long, well made, with turned legs and bases, $1 and $1.75 each. W. G. Thomson, Bookseller and Stationer, Nelson, B.C.

FOR SALE—Two St. Bernard puppies, females, 3 months' old, large and healthy, pure bred with pedigree, $15 each. S. Macdonald, C.P.R. house, Cranbrook, B.C.

## ASSAYER

E. W. WIBDOWSON, CHEMIST AND Assayer, Nelson, B. C.—Gold, Silver, Lead or Copper, $1 each; Gold-Silver, $1.50; Silver-Lead, $1.50; Zinc, $2; Gold-Silver, with Lead or Copper, $2.50. Samples arriving by express or mail will receive prompt attention. P.O. Drawer, 1085; Phone A 67.

# FORT STEELE DIVISION

## MARKED INCREASE IN MINING AND PROSPECTING NOTICEABLE

## BULL RIVER IRON MINES MAY BE WORKED IN NEAR FUTURE

(Special to The Daily News)

Cranbrook, June 5—There is a marked increase in the activity in mining matters all through the Fort Steele division, of which Cranbrook is the official headquarters. As will be seen from the appended list, taken from the official records, quite a number of new locations have been filed, and the list of certificates of work granted shows that development is being steadily pushed. It is somewhat unusual for work to be completed thus early in the summer and the fact is suggestive of still greater activity along this line as the higher ground clears of snow.

It is stated on the most unquestionable authority that there are several influential parties treating for the purchase of the Bull river iron mines, on which some $7000 or $8000 have been spent in development and examinations. There is a very strong probability of this property being taken in hand by practical iron operators who will smelt the ore on the spot, either by the electric furnace or by means of the ordinary blast. If this comes to pass a new industry will be established which will have far reaching results in the progress of East Kootenay, especially having regard to the enormous coal and coke resources which should go hand in hand with the development of the great bodies of bessemerizing hematite ores on Bull river and Baker mountain.

During the month of May certificates of location were granted for the following claims: Mikado on White Fish creek, to Evan W. Evans; Summit, on Nigger creek, one mile east from the Pay Roll, to Jos. Bambrick; Red Lion, adjoining Summit, to Maurice Quain; Homestake on Perry creek adjoining the Badger, to Edwin G. Boynton; San Antoine Fraction, in town of Moyie, to John P. Farrell; Dexter, sabel and Ben, on St. Mary's Prairie, to Everett Pumpelly; Woodbine, on the west side of Lower Moyie lake, to Frank Guindon.

Certificates of work have been granted on the following claims: Follow Me, on head of Hell Roaring creek, to D. R. Munroe; Venus, Venus No. 2, and Venus No. 3, on Wolf creek, to Willis M. Violett; Copper Belt, Rob Roy and Tillicum, in Isadore canyon, to John H. Hays; Juno and Reno, on west fork of St. Mary's river, to J. Shaw Parker; Frisco and Dowdy at Moyie, to William Lawson; Cronje, 3-4 of a mile west of Swansea, to Thos. Glipin; Mineral Hill, Moyie, to Frank Guilon, and for the Canby No. 2, on Wolf creek, to W. H. Shira.

During the month of May of the present year 245 free miners' cretificates were issued as compared with 214 in the year 1905. The increase is very significant of the strong tendency to improved conditions in the industry all through East Kootenay.

## PASS BOOTBALL

### Coal Creek and Coleman Evenly Matched—Good Game Ended in Draw

(Special Correspondence)

Coleman, June 3—A football match played here yesterday between Coleman and Coal Creek, under the auspices of the Crow's Nest Pass league, resulted in a draw. This match was looked upon as a meeting of champions, as neither team has suffered defeat this year. Quite a number of Coal Creek people accompanied the team to Coleman and the red and white was very much in evidence. The line up was as follows:

Coleman—Goal, Johnson; backs, Fraser, and Robertson; half-backs, McFarlane, Hunter and Smith; forwards, McFarlane and Thomson, Barnes, O'Neil and Smith.

Coal Creek—Goal, Thacker; backs, Allan and McFegan; half backs, Gorrie, Newbigging and Page; forwards Pillier, Hughes, Banns, D. Linton, J. Linton.

Referee—Mr. Carruthers of Frank.

The game started at 6:30, in fine weather, and before a good crowd of spectators. Coleman won the toss and elected to play with the sun and wind at their backs. From the start the game was fast and exciting, the play ranging from end to end. Coal Creek made ground through Banns and Linton and got well up in on Coleman's goal, but the ball was eventually shot past. From the goal kick Coleman forwards fastened on, and good play by Barnes and Thomson took them well in, but McFegan intercepted and kicked well down field. Banns caught on, and worked round Hunter, then passed to Linton, who shot past. Coleman made ground from the goal kick, and good play by Thomson was checked by Gorrie, who passed out to Pillier, he raced past the half and shot across but Fraser kicked clear; Nekibgging returned and Robertson miss-kicked, but the goal keeper rushed out and cleared. O'Neil and Barnes now had a fine run, O'Neil passin gto Smith, who was beaten by Allen, who kicked well up field; Hunter returned to Barnes but he failed to get past Newbigging, and Coal Creek again got away. Barnes worked through the defence but shot over the bar. From the goal kick Coleman got away on the left and O'Neil passed out to Smith who shot across, the ball striking the bar but eventually going past. Midfield play followed for a time, but Coal Creek by good play got into Coleman ground and fine play by Banns, Linton and Hughes ended by D. Linton scoring first goal for Coal Creek.

Play was a little quieter after this and fairly even. Coleman had a good look in now, and after a bit of fine play by O'Neil, Thomson sent in a fine shot, which Thacker did well to clear. Gorrie now passed out to Pillier, but he ran the ball out of play. From the throw in Cola Creek made ground, Banns and Hughes playing well together; Banns shot in but Johnson cleared, and play was transferred to midfield. Half time was called shortly after, Coal Creek leading by 1 goal to 0.

After an interval of ten minutes, play was resumed, Coleman leading off with a good run, but McFegan checked and returned the ball to the other end where D. Linton fastened on, and passed to J. Linton, who shot, but Johnson saved and the ball was returned to midfield. Newbigging caught it and passed nicely to Banns who worked round Hunter and Fraser and shot, but Johnson stopped it, and Banns rushing in was knocked down by Johnson and injured. He recovered shortly afterwards and resumed but was evidently suffering from the injury. Coleman now came away and a fine shot by O'Neil struck the post and Allan cleared; Hunter returned into goal and Thacker partially cleared, but a scrimmage followed from which Coleman scored, making the score 1 all.

Coleman played strongly now as visions of a victory appeared, but the defence was too strong for them and play was aagin transferred to the other end, where Pillier had a fine shot, but the goal tender was on the spot and saved. A diversion was now created by the appearance of a monkey on the goal bar at the Coal Creek end, who seemed to be an interested spectator of the game. The incident caused much amusement at the time. The game was now drawing to a close and several players were showing signs of fatigue. The Coleman left tried hard to add to their score but were beaten by Allan and play was transferred to center field. Shortly afterwards time was called and a hard and fast game ended in a draw of one goal each.

## MUST OBEY BYLAW

### Citizens who Allowed Their Cattle and Poultry to Stray on Public Streets

The police magistrate had a deeply interested audience before him yesterday morning when some dozen or more citizens appeared to show cause why they should not be fined for allowing their horses, cows or poultry to stray upon the public streets.

Some strenuous arguments were adduced why exception should be made, but for the most part the magistrate was stoney hearted and inflicted small fines and costs. One widow woman was allowed to go with a warning that a fine would be imposed next time. This lady, who is deaf, reduced her statement of the case to writing and handed it in to the magistrate, explaining that owing to her infirmity of hearing she could not make herself understood unless she went close to the presiding magistrate, which she said she did not desire to do.

The cases were severally disposed of as follows: Mrs. Fawcett, allowing four cows to be at large, dismissed with a warning; Wm. Thurman, J. K. Salter, F. J. Painton, H. H. Pitts, Quan Yin Low and On Luh, for allowing chickens to be at large, $1 and costs, $2.25, or $3.25 in each case. Mrs. McLaughlin, Mrs. Howard and Mrs. Hoskin, $2.25 in each case. Wm. Middleton, for allowing horses to be at large, $2.50 and costs, $2.25; A. A. Macdonald and S. Radcliffe for tethering their horses on the public highway, $1 and costs, $2.25, in each case.

The police say that others will be summoned promptly if they persist in breaking the bylaw which prohibits horses, cows and poultry from running at large upon the streets anywhere within the city.

## POLLARDS ARE COMING

### Next Week These Clever Juvenile Artists Will Delight Nelson Audiences

Pollard's Lilliputian Opera company, one of the big attractions booked for Sherman's opera house, begins its engagement of six nights, commencing June 11, when the popular success "The Runaway Girl" will be presented by this clever aggregation in their inimitable manner. The Pollards are the most remarkable musical organization in the world. They have toured Australia, South Africa, India, New Zealand, China, Japan, England and the Philippines, the Hawaiian islands, the United States and other countries, a record which no other opera company has ever attained. The organization is composed of clever and talented juveniles, who are professional in everything except size. The performances are among the cleverest operatic offerings presented on the stage. These remarkable youngsters were schooled in Australia in an academy especially equipped to educate them for operatic careers. From the many applicants for positions in the company the management carefully selecting those displaying most aptitude and they are so thoroughly trained that their performances are phenomenal. In no respect can the youngsters be improved on in their interpretation of lines and their vocal work. The repertoire to be given here is as follows: The Belle of New York, The Geisha, Lady Slavey, The Gaiety Girl, Pinafore.

## SENT UP FOR FORGERY

### Alex McGregor Sentenced to Jail for Two Years Less a Day

Mr. Crease disposed of Alex. McGregor's case yesterday by sending him to the provincial jail for two years, less a day. McGregor, whose chief weakness is to sign other people's names to cheques, whenever he gets in liquor, will be kept out of harm's way for the next two years, but whether it will cure him of the habit he has got into remains to be seen.

George Mooney who tried the dangerous game of interfering with a police officer whilst the latter was arresting a drunken companion of Mooney's, was fined $25 and costs, or in default 30 days in jail. Mooney will do his time. His friend was fined $5 and costs for being drunk and disorderly on the public street and the fine was paid.

## SCARCITY OF LABOR

Editor The Daily News—Being a daily reader of your paper, I noticed in your editorial an item entitled "Scarcity of Labor in B.C." Now Mr. Editor I wish to draw your attention to the fact that it is not so in Fernie at least. The mines where I work are overcrowded with men seeking employment ever yday and waiting here two or three weeks for their turn, and I have known instances where they have waited months. Your paper being read by so many, it gives the impression of B.C., for everybody looks to Fernie, thinking there is no other place in B.C.

If you refer to quartz mining and sawmills they are not to be wondered at, for reports say that they are worked until they are ready to drop at night. So, pheaps, that is the reason why men will not go there to work. I think myself, and the majority will agree, that there are sufficient laborers in B.C. without advertising for more men to work. I think it is capitalists you want to advertise for instead of men without capital. I would make plain where men are wanted so as people will not be misled by coming to the wrong place seeking employment. Thanking you in anticipation,

R. HUGHES.

Fernie, June 6.

## TRIAL OF EMPRESS OF IRELAND

Montreal, June 5.—A Glasgow cable says: "Empress of Ireland, sister ship to Empress of Britain, of the C. P. R. Atlantic fleet, sailed for speed trials on the Clyde today."

Whose label is on your bottle? If it is ours then you can bank on the drug quality. Canada Drug & Book Co.

# PRICES WILL NOT GO UP

## MOUNTAIN LUMBERMEN HOLD TO PRESENT SCHEDULE

### A HIGHLY SUCCESSFUL MONTHLY MEETING YESTERDAY

The monthly meeting of the Mountain Lumbermen's association was held at the head offices of the association in this city yesterday morning. F. W. Jones of Golden, president, occupied the chair, and G. P. Wells, secretary of the association, was in attendance.

Among those present were: J. G. Billings, W. J. Robertson, Nakusp; D. F. Brydges, D. B. Dulmage, S. Taylor, W. Adolphe, M. B. King, Cranbrook; T. A. Ludgate, Arrowhead; W. E. Cooke, Kaslo; Otis Staples, Wycliffe; F. D. Becker Calgary; J. A. Dewar, Ymir; P. Lund, Wardner; F. W. Jones, Golden, A. E. Watts, Wattsburg; Joseph Deschamps, Rossland.

There was a good deal of discussion over the lumber situation in the west at the present time and it was conclusively demonstrated that all the mills had more orders than they could possible fill just now. Notwithstanding this state of affairs it was decided not to advance prices for the present, though possibly in the fall a further rise may not unreasonably be looked for if the present situation remains unchanged. After disposing of a good deal of routine business the meeting adjourned without altering the existing price schedules. The next meeting will not be held until August when an effort will be made to time the gathering for the regatta days and if this can be arranged there will be an unusually large attendance of members of the association who in many cases will be accompanied by their families, a welcome addition to the regatta visitors.

It was not difficult to see yesterday that the lumbering industry as represented by the Mountain association was in a highly satisfactory and prosperous condition with every indication that the existing state of affairs will likely continue and probably still further improve during the remainder of this year. All the visitors were in high good humor and apparently enjoyed their visit here—as they invariably do. The general feeling seemed to be that there was a fair chance now of making up for the past bad times and every prospect of the industry remaining in a prosperous condition. The refusal of the association to take advantage of the situation and force price up—as could have easily been done—is taken as a healthy indication that the avowed policy of the lumbermen to combine only for self protection, and not for the purpose of holding up the consumers, is being loyally adhered to, notwithstanding the great temptation to get all the business would stand.

## SYNOD MEETS TODAY

### Seventh Session Will Open in St. Saviour's Mission Hall at 10 a.m.

The seventh meeting of the synod of the diocese of Kootenay will commence its deliberations in the mission hall of St. Saviour's church at 10 a.m. today, with the right reverend bishop of New Westminster presiding.

There will be a celebration of the holy communion at St. Saviour's at 7:30 this morning and at 9:15 a second celebration and the opening office of the synod.

The afternoon session will commence at 2:30. In the evening at 8:30 there will be choral evensong with a sermon from Rev. C. A. Procunier of Revelstoke, appointed special preacher for the occasion by the bishop.

There will be two sessions of the synod tomorrow: Morning at 10 o'clock and in the afternoon at 2:30. All the meetings of the synod are open to the public, who are cordially invited to attend.

Clergy and lay delegates desiring hospitality during their stay in the city are requested to communicate with Rev. F. H. Graham.

Interest in the morning session to day centers in the annual charge to the synod which his lordship will deliver as soon as the synod has been duly convened.

Written notices of motion to be presented have been given by Ven. archdeacon Beer—That sub-paragraph 1 of article VIII of the constitution be made to read: A quorum shall consist of not less than five members of the executive committee, etc. And by the same clergyman: That paragraph 3 of article V of the constitution be made to read: A quorum for the transaction of business of the synod shall consist of not less than one-fourth of the combined number of licensed clergy and lay delegates entitled to take part in the proceedings, etc.

By Rev. F. H. Graham—That the next meeting of the synod of the diocese of Kootenay be held in 1908 and that from that time the synod shall be convened every second year.

Ven. archdeacon Beer is clerical and W. A. Jowett is lay secretary of the synod.

## CAUSE OF WOMAN SUFFRAGE

(From the London Tribune)

As long as the suffrage was a matter for drawing room discussion it lacked support in the hard facts of life. It is often said that in England men cannot be moved by general reasoning, but that an actual grievance must be proven before a reform can be brought about. The educated woman, though in certain relations her disabilities were and are, very real, did not impress the average hard hearted man as a being with a genuine grievance. Her arguments left him unmoved, and her appeals brought as a rejoinder the question: How many of her sex would support her? She finds her answer now in the organizations of working women who have taken up the suffrage question in real earnest. Working women as a body have awakened to the fact that their economic position is bad, in some cases unspeakably bad. From men they have received legislative protection, most of it good and useful, almost all of it well intentioned, some of it occasionally selfish, but none of it devised by women for women, with women's knowledge of women's life. They have a strong case when they argue that the regulation of labor, which figures so largely in modern legislation and ordinarily applies especially to women, ought not to be imposed on an unfranchised class, but should be carried out with the consent of both the sexes which it affects and not least the consent of the sex which it ordinarily affects most. They have a strong case when they urge that on such cases as temperance, housing, education, the marriage law, the treatment of children, women have special interests, and often a special knowledge which may be set off against the greater average competence of men in other matters. But it is, above all, the industrial position of women that moves them. Woman as such, is no longer the slave of man, but a large class of women, dependent upon their own exertions to get bread, are still the slaves of the modern industrial system, and no story in the modern world is at once so commonplace and so deeply pitiful as that told by the figures recording the payment earned by the unskilled woman worker. What legislation can or cannot do to mitigate this tragedy experience alone can show. But it the sense of this tragedy and the belief that it is for women themselves to deal with it, that inspires the new movement for women's suffrage.

One of Three Things Always Cause

RHEUMATISM

Do you know the system rids itself of waste matter through bowels and kidneys? Yes, but by the skin as well.

As a matter of fact, the skin rids the system of more urea than the kidneys do.

If the skin, or bowels, or kidneys are unhealthy—they won't throw off enough urea. This urea is changed into uric acid—carried by the blood to joints and nerves—causing Rheumatism.

One never inherits Rheumatism. One does inherit weak kidneys, irregular bowels and bad skin action.

Fruit-a-tives

OR "FRUIT LIVER TABLETS"

will positively cure Rheumatism because they increase the eliminating action of skin, kidneys and bowels—and make these three organs so vigorous and healthy that there can be no urea or waste retained in the system to poison the blood and irritate the nerves.

FRUIT-A-TIVES are fruit juices, combined with tonics—the whole forming the most effective cure for Rheumatism.

50c. a box or 6 boxes for $2.50. Sent on receipt of price if your druggist does not handle them.

FRUIT-A-TIVES LIMITED - OTTAWA.

### CERTIFICATE OF IMPROVEMENTS

Golden Boy Mineral Claim, situate in the Slocan City Mining Division of West Kootenay District. Where located: About half a mile south of the sawmill on Springer creek.

TAKE NOTICE that I, F. C. Green, acting as gent for the Arlington Mines, Limited, Free Miner's Certificate No. B69,669, intend, sixty days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 14th day of April, A.D., 1906.

F. C. GREEN, Nelson, B.C.

### CERTIFICATE OF IMPROVEMENTS

Venus Fraction Mineral Claim, situate in the Nelson Mining Division of West Kootenay District. Where located: On Hall Creek.

TAKE NOTICE that I, John D. Anderson, P.L.S., of Trail, B. C., agent for Richard A. Hutchinson, of Spokane, Wash., Free Miner's Certificate No. B5185, intend, sixty days after the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 28th day of April, A.D., 1906.

J. D. ANDERSON.

### CERTIFICATES OF IMPROVEMENTS

Hope and Katie Fractional Mineral Claims, situate in the Slocan City Mining Division of West Kootenay District. Where located: North of Springer creek near the Tamarac Mineral Claim.

TAKE NOTICE that I, F. C. Green, acting as gent for the Arlington Mines, Limited, Free Miner's Certificate No. B69,669, intend, sixty days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 14th day of April, A.D., 1906.

F. C. GREEN, Nelson, B.C.

### CERTIFICATES OF IMPROVEMENTS

Empire and West Side Mineral Claims, Situate in the Slocan City Mining Division of West Kootenay district. Where located: Os North Fork Springer creek.

TAKE NOTICE that I, F. C. Green, acting as agent for the Ricowliabi Mines, Limited, Free Miner's Certificate No. B69,670, intend, sixty days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 14th day of April, A.D., 1906

F. C. GREEN, Nelson, B.C.

# TIMBER NOTICES

NOTICE is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works at Victoria for a special license to cut and carry away timber from the following described lands: Commencing at a post marked "E. S. T. N.E. C." planted at the northwest corner of F. W. Rolt's location in the Skeena district, thence south 80 chains; thence west 80 chains; thence north 80 chains; thence east 80 chains to point of commencement.

Located May 24th, 1906.

E. S. TOPPING.

NOTICE is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works at Victoria for a special license to cut and carry away timber from the following described lands: Commencing at a post marked "F. W. R. N.W. C." planted south of the Tel Kwa river, two miles west of A. H. Kelly's northeast corner, thence south 80 chains; thence east 80 chains; thence north 80 chains; thence west 80 chains to point of commencement.

Located May 24th, 1906.

F. W. ROLT.

NOTICE is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works at Victoria for a special license to cut and carry away timber from the following described lands: Commencing at a post marked "H. E. McD. N.W. C.," planted on the south bank of the Tel Kwa river, sixteen miles west of the mouth of the same, in the Skeena district, thence south 80 chains; thence east 80 chains; thence north 80 chains; thence west 80 chains to point of commencement.

Located May 24th, 1906.

H. E. MACDONELL.

NOTICE is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works at Victoria for a special license to cut and carry away timber from the following described lands: Commencing at a post marked "A. H. K. N.E. C.," planted on the south bank of the Tel Kwa river, sixteen miles west of the mouth of the same, in the Skeena district, thence south 80 chains; thence west 80 chains; thence north 80 chains; thence east 80 chains to point of commencement.

Located May 24th, 1906.

A. H. KELLY.

NOTICE is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works at Victoria for a special license to cut and carry away timber from the following described lands: Commencing at a post marked "T. S. McM. S.E. C." planted at the northeast corner of E. S. Topping's location, thence west 80 chains; thence north 80 chains; thence east 80 chains; thence south 80 chains to point of commencement.

T. S. McPHERSON.

Located May 24th, 1906.

NOTICE is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Lands and Works at Victoria for a special license to cut and carry away timber from the following described lands: Commencing at a post marked "J. J. C. S.W. C." planted at the southeast corner of T. S. McPherson's location, in the Skeena district, thence north 80 chains; thence east 80 chains; thence south 80 chains; thence west 80 chains to point of commencement.

Located May 24th, 1906.

J. J. CAMPBELL.

Notice is herby given that 30 days after date we intend to apply to the chief commissioner of lands and works, Victoria, for a special license to cut timber on the following land, situated on Smoky creek, near Slocan Junction, in the West Kootenay district: Commencing at a post marked "N. D. Stewart, S. E. corner post," planted on Smoky creek, one and one half miles from Kootenay river, about two miles from Slocan Junction; thence north 80 chains; thence west 80 chains, thence south 80 chains, thence east 80 chains to point of beginning.

May 12, 1906. N. D. STEWART.

N. C. STEWART, Agent.

NOTICE is hereby given that 30 days after date we intend to apply to the Chief Commissioner of Lands and Works, Victoria, for special licenses to cut timber on the following described lands situated near headwaters of Boundary creek and Priest creek and Monk creek:

(1) Commencing at a post marked "A. B. Buckworth N.W. corner post," and planted about 1 1-4 miles westerly of Boundary lake, about 24 miles from Kootenay river, thence south 80 chains, thence east 80 chains, thence north 80 chains, thence west 80 chains to place of commencement.

A. B. BUCKWORTH.

WM. FEENEY, Agent.

(2) Commencing at a post marked "E. R. C. Clarkson N.E. corner post," and planted near to Monk creek, and adjoining A. B. Buckworth's location, No. 1 on the west, thence south 80 chains, thence west 80 chains, thence north 80 chains, thence east 80 chains to point of commencement.

E. R. C. CLARKSON.

R. C. ALEXANDER, Agent.

(3) Commencing at a post marked "Wm. Feeney S.W. corner post," and planted on Priest creek, adjoining claim No. 1 on the north, thence south 80 chains, thence east 80 chains, thence north 80 chains, thence west 80 chains to point of commencement.

WM. FEENEY

(5) Commencing at a post marked "E. R. C. Clarkson S.E. corner post," planted on south side of Boundary lake, and lying along international boundary line, thence west 160 chains, thence north 40 chains, thence east 160 chains, thence south 40 chains to point of commencement.

E. R. C. CLARKSON.

R. C. ALEXANDER, Agent.

(6) Commencing at a post marked "J. Feeney S.W. corner post," and planted on the south side of Boundary lake and lying between the lake and the international boundary line and being east of claim No. 5, and about 22 miles from Kootenay river, thence east 80 chains, thence north 80 chains thence west 80 chains, thence south 80 chains to point of commencement.

J. FEENEY.

R. C. ALEXANDER, Agent.

(7) Commencing at a post marked "R. C. Alexander N.W. corner post," planted on north side of Boundary creek, about 20 miles from Kootenay river, thence 160 chains east thence south 40 chains, thence west 160 chains, thence north 40 chains to point of commencement.

R. C. ALEXANDER.

(8) Commencing at a post marked "J. Feeney S.E. corner post," planted on north side of Boundary creek and lying N.W. of claim No. 7, thence north 80 chains, thence west 80 chains, thence south 80 chains, thence east 80 chains to point of commencement.

J. FEENEY.

WM. FEENEY, Agent.

(9) Commencing at a post marked "A. B. Buckworth S.E. corner post," planted on the north side of Boundary lake and lying west of claim No. 8 about one mile, thence north 80 chains, thence west 80 chains, thence south 80 chains, thence east 80 chains to point of commencement.

A. B. BUCKWORTH.

WM. FEENEY, Agent.

Dated April 14th, 1906.

Notice is hereby given that 30 days from date William C. Read will apply to the chief commissioner of lands and works, Victoria, for special licences to cut timber on the following described lands near Dog creek west of the Lower Arrow lake.

Licence No. 7: Commencing on the west boundary of lot 5817 about ten chains north of the North fork of Dog creek; thence west eighty chains, thence south forty chains, thence east forty chains, thence south eighty chains, thence east forty chains, thence north one hundred and twenty chains to the place of beginning.

No. 5: Commencing where a post has been planted about twenty chains due west of the N. E. corner of the No. 7 licence, thence forty chains north, thence a hundred and sixty chains west, thence forty chains south, thence a hundred and sixty chains east to the place of beginning.

No. 6: Commencing at the N. W. corner of the No. 5 licence, thence west one mile, thence south one mile, thence east one mile, thence north one mile to place of beginning.

No. 1: Commencing one mile west of the N. E. corner of the No. 5 licence, thence two miles north, thence half a mile east, thence two miles south, thence half a mile west to the place of beginning.

No. 2: Commencing one mile west of the N. E. corner of No. 5 licence, thence north two miles, thence west half a mile, thence south two miles, thence east half a mile to the place of beginning.

No. 3: Commencing two miles west of the N. E. corner of licence No. 5, thence north two miles, thence east half a mile, thence south two miles, thence west half a mile to the place of beginning.

No. 4: Commencing two miles west of the N. E. corner of licence No. 5, thence north two miles, thence west half a mile, thence south two miles, thence east half a mile to the place of beginning.

Dated April 22nd, 1906.

A. W. McVITTIE, Agent.

Synopsis of Regulations Governing the Disposal of Dominion Lands Within the Railway Belt in the Province of British Columbia.

A license to cut timber can be acquired only at public competition. A rental of $5 per square mile is charged for all timber berths, excepting those situated west of Yale, for which the rental is at the rate of 5 cents per acre per annum.

In addition to the rental, dues at the following rates are charged:

Sawn lumber, 50 cents per thousand feet B. M.

Railway ties, 8 and 9 feet long, 1 1-3 and 1 3-4 cents each.

Shingle bolts, 25 cents a cord.

All other products, 5 per cent. on the sales.

A license is issued so soon as a berth is granted, but in unsurveyed territory no timber can be cut on a berth until the licensee has made a survey thereof.

Permits to cut timber are also granted at public competition, except in the case of actual settlers, who require the timber for their own use.

Settlers and others may also obtain permits to cut up 100 cords of wood for sale without competition.

The dues payable under a permit are $1.50 per thousand feet B.M., for square timber and sawlogs of any wood except oak; from 1-2 to 1 1-2 cents per lineal foot for building logs; from 12 1-2 to 25 cents per cord for wood; 1 cent for fence posts; 3 cents for railway ties, and 50 cents per cord on shingle bolts.

Leases for grazing purposes are issued for a term of 21 years at a rental of 2 cents per acre per annum.

Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres may be acquired by one individual or company.

Royalty at the rate of 10 cents per ton of 2,000 pounds is collected on the gross output.

Entries for land for homestead purposes may be made personally at the local land office for the district in which the land to be taken is situated, or if the homesteader desires, he may, on application to the minister of the interior at Ottawa, the commissioner of immigration at Winnipeg, or the local agent for the district within which the land is situated, receive authority for some one to make entry for him.

A fee of $10 is charged for a homestead entry.

A settler who has received an entry for a homestead is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year during the term of three years.

It is the practice of the department to require a settler to bring 15 acres under cultivation, but if he prefers he may substitute stock; and 30 head of cattle, to be actually his own property, with buildings for their accommodation, will be accepted instead of the cultivation.

(2) If the father (or mother, if the father is deceased) of any person who is eligible to make a homestead entry under the provisions of th Act, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the Act as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the Act as to residence may be satisfied by residence upon the said land.

Application for a patent should be made at the end of three years before the local agent, sub-agent or a homestead inspector.

Before making an application for a patent, the settler must give six months' notice in writing to the Commissioner of Dominion Lands at Ottawa, of his intention to do so. W. W. CORY,

Deputy of the Minister of the Interior.

Ottawa, February 14th, 1905.

## LICENCE TO AN EXTRA-PROVINCIAL COMPANY

"Companies Act, 1897."

Canada,
Province of British Columbia.
No. 345.

THIS is to certify that the "Canadian Pacific Timber Company, Limited," is authorized and licensed to carry on business within the Province of British Columbia, and to carry out or effect all or any of the objects of the Company to which the legislative authority of the Legislature of British Columbia extends.

The head office of the company is situate in London, England.

The amount of the capital of the Company is £60,000, divided into 60,000 shares of £1 each.

The head office of the company in this Province is situate at Nelson, and Leslie Hill, Managing Director of the Company, whose address is Nelson, is the attorney for the Company.

Given under my hand and seal of office at Victoria, Province of British Columbia, this 10th day of May, one thousand nine hundred and six.

(L.s.) S. Y. WOOTTON,

Registrar of Joint Stock Companies.

The objects for which the Company has been established and licensed are:

(a) To enter into and carry into effect with or without modification the agreement mentioned in clause 3 of the Articles of Association:

(b) To carry on business in Canada or elsewhere as sawmill proprietors, timber merchants and timber growers, and to buy, sell, grow, prepare for market, manipulate, import, export and deal in timber and wood of all kinds, and to manufacture and deal in articles of all kinds in the manufacture of which timber or wood is used, and to carry on business as shipowners and carriers by land and sea, and so far as may be deemed expedient the business of general merchants, and to buy, clear, plant and work timber estates and limits:

(c) To seek for and obtain openings for the employment of capital in Canada or elsewhere, and with a view thereto to prospect, inquire, examine, explore, test, and to despatch or employ expeditions, commissioners, experts and other agents:

(d) To purchase or otherwise acquire property and rights of all kinds, and in particular lands, buildings, mines, mining rights, options, concessions, water rights, and water power for the purpose of generating electricity for domestic purposes or otherwise, stations, farms and business concerns and undertakings in Canada or elsewhere, and to make advances upon the security of, and to deal in, traffic by way of sale, lease, exchange or otherwise with any such lands, mines, options, rights and property:

(e) To develop the resources of and turn to account any lands, buildings, rights and property for the time being of the Company, in such manner as the Company may think fit, and in particular by irrigating, clearing, draining, fencing, planting, building, improving, farming, grazing and by promoting immigration, establishing towns, villages, and settlements.

(f) To buy, sell barter, import, export, manipulate, prepare for market, and deal in merchandise, stores, live and dead stock, and goods and chattels of all kinds, and generally to carry on business as storekeepers, merchants, general agents, importers and exporters:

(g) To carry on business as farmers, millers, flour, corn and meal merchants, fruit preservers, dealers in and breeders of live cattle, sheep and goats and horses and all kinds of live and dead stock and agricultural produce, stockmen, graziers, dealers in meat, hides, skins, fat and other animal products, carriers, builders and contractors:

(h) To acquire, carry out, establish, construct, maintain, improve, manage, work, control and superintend any roads, ways, tramways, railways, bridges, reservoirs, watercourses, ditches, wharves, embankments, telegraphs, telephones, sawmills, smelting and other works, furnaces, warehouses, hotels, transport and postal arrangements, stands, stores, shops, stations and other works and conveniences for the working and development of any concessions, rights or property of the Company, and to contribute to, assist in, or contract for the carrying out, establishment, construction, maintenance, improvement, management, working, control or superintendance of the same:

(i) To carry on any business which may seem to the Company capable of being conveniently carried on in connection with any business which the company is authorized to carry on, or may seem to the Company calculated directly or indirectly to benefit this company, or to enhance the value of or render profitable any of the Company's properties or rights:

(j) To apply for, purchase or otherwise acquire any patents, licences and the like, conferring an exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the Company, or the acquisition of which may seem calculated directly or indirectly to benefit this Company, and to use, exercise, develop, grant licenses in respect of, or otherwise turn to account the rights and information so acquired:

(k) To lend money to such persons and on such terms as may seem expedient, and in particular to customers of and persons having dealings with the Company, and to give any guarantee or indemnity as may seem expedient:

(l) To acquire or carry on all or any part of the business or property, and to undertake any liabilities of any person, firm association or company possessed of property suitable for any of the purposes of this Company, or carrying on any business which this Company is authorized to carry on, and as the consideration for the same to pay cash, or to issue any shares, stocks or obligations of this Company.

(m) To enter into partnership or into any arrangement for sharing profits, union of interest, joint adventure, amalgamation, reciprocal concessions or co-operation, with any person or company carrying on or engaged in, or about to carry on or engage in, any business transaction which the Company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as to directly or indirectly benefit this Company, and to take or otherwise acquire and hold shares of stock in or securities of, and to subsidise or otherwise assist any company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with such shares, stock or securities:

(n) To purchase, take on lease or in exchange, hire or otherwise acquire any real or personal property, rights or privileges which the company may think suitable or convenient for any purposes of its business; and to erect and construct buildings and works of all kinds:

(o) To sell, exchange, mortgage, lease or otherwise dispose of or deal with the property, rights or undertaking of the Company, or any part thereof, for such consideration as the Company may think fit; and in particular, wholly or in part, for shares, debentures or securities of any other company, and whether any liability shall attach to such shares, debentures, or securities or not:

(p) To purchase, subscribe or otherwise acquire, and to hold the shares, stocks or obligations of any company in the United Kingdom or elsewhere, and upon a distribution of assets or division of profits to distribute any such shares, stocks or obligations, or any part of the property of the Company, among the members in specie, but so that no distribution amounting to a reduction of capital be made without the sanction of the Court where necessary:

(q) To borrow, raise and secure the payment of money in such manner as the Company shall think fit, and in particular by the issue or deposit of debentures, debenture stock or other obligations, perpetually or otherwise, or by mortgage or charge over the undertaking and all or any part of the property, present or future of the Company, including its uncalled capital, as may seem expedient, and to procure the guarantee of any moneys borrowed, raised or secured in such manner and upon such terms as may seem expedient:

(r) To make, draw, accept, sign, endorse, issue and negotiate bills of exchange, promissory notes, receipts, cheques, bills of lading, and other mercantile documents:

(s) To promote and aid in promoting, constitute, form or organize companies, syndicates or partnerships of all kinds, either for the purpose of acquiring and undertaking all or any properties and liabilities of this Company, or of advancing directly or indirectly the objects thereof, or for any purpose which this Company may think expedient:

(t) To remunerate any person or corporation, whether in the form of brokerage, commission or otherwise, for any services rendered in the formation of the Company, or any such company or syndicate as mentioned in the last preceding sub-cause, or for introducing business or otherwise assisting or rendering services to the Company:

(u) To pay the costs, charges and expenses preliminary and incidental to the promotion, formation, establishment and registration of the Company and any usual brokerage; to pay commissions to any person or corporation for subscribing, or agreeing to subscribe, whether absolutely or conditionally, for any shares in the company, or procuring or agreeing to procure subscriptions, whether absolute or conditional, for any shares in the Company; to give calls or options at a fixed price, not being less than par, or otherwise on any shares the Company has power from time to time to issue, and that either by way of commission for subscribing, or agreeing to subscribe, whether absolutely or conditionally, for any shares in the Company, or procuring, or agreeing to procure subscriptions, whether absolute or conditional, for any shares in the company, or for any payment or valuable consideration to the company, and generally to exercise the powers conferred on the Company by section 8 of the Companies Act, 1900:

(v) To enter into any arrangement with any governments or authority, supreme, municipal, local or otherwise, and to obtain from any such government or authority any rights, concessions and privileges that may seem conducive to the Company's objects or any of them:

(w) To support and subscribe to any charitable or public object and any institution, society or club which may be for the benefit of the company or its employees or may be connected with any town or place where the Company carries on business; and to give pensions, gratuities or charitable aid to any person or persons who may have served the Company, or to the wives, children or other relatives of such persons; to make payments towards insurance, and to form and contribute to provident and benefit funds for the benefit of any person employed by the Company:

(x) To do all or any of the above things in any part of the world, and as principals, agents, contractors, trustees

## NELSON'S NEWS OF THE DAY

Wm. Thurman has been called east to Winnipeg owing to the serious illness of his mother.

The city librarian acknowledges with thanks the receipt of Gertrude Atherton's "The Aristocrats" from Mrs. Frank Fletcher.

A. K. Wattie has opened a customs brokerage office in the premises occupied by the Messenger Despatch company, on Stanley street.

D. M. Macdonald leaves this morning for Ottawa to attend the annual meeting of the high court of the Canadian Order of Foresters.

Tomorrow afternoon the first half holiday of the summer will be observed here and almost all of the stores and business houses will close down early in the afternoon.

The moving picture show at the Salvation Army barracks attracted a large audience last evening when a new lot of pictures were exhibited and the two nights' entertainment brought to a successful conclusion.

Advertisers who experience trouble in preparing their announcements, or who lack time to prepare them as they would like to, can have the benefit of the services of an expert by ringing up 144, The Daily News' phone number.

Rev. Mr. McKinnon and a party of Baptists from Alberta and the east were in the city yesterday and attended the meeting at the Baptist church last evening, the reverend gentleman taking the service, greatly to the edification of all present.

Pastor Shanks has received the large mission tent which the Baptist convention board has purchased and shipped to him for use in the Kootenay district during the summer. The tent will make a tour of the country accompanied by an able band of evangelists.

The lecture tomorow evening by Andrew Lewis of Oakland, California, will take place in Fraternity hall. Mr. Lewis will discuss the recent earthquake and fire at San Francisco from a socialist point of view. Local socialists are greatly interested in the visit of Mr. Lewis, who has the reputation of being a very fine public speaker. Another matter that is interesting local socialists is the expected early visit of their leader in the local legislature, J. H. Hawthornthwaite.

E. Riondel, resident manager of the Canadian Metal company, will leave for a visit of inspection to the company's new reduction works at Frank very shortly, returning here next Sunday evening. The company has purchased some 460 tons of zinc ore from the Jackson and Ruth mines through the Kaslo works and this has been shipped to Frank. Mr. Fernau is now no longer connected with the company in any capacity.

Many clergymen are in the city in attendance at the synod which opens this morning in St. Saviour's church mission hall at 10 o'clock. In addition to his lordship, the bishop of New Westminster and Kootenay, who arrived from the Boundary on Monday evening, the following came in last night: Revs. C. A. Procunier, Revelstoke; J. A. Cleland, Rossland; C. F. Yates, J. H. Lambert, Golden and T. Greene, Kelowna.

One of the events of this summer will be the assembly to be held in Nelson for the gathering of Baptist forces from the upper country and surrounding districts. The management of the assembly is in the hands of the pastor of the local church, and in the near future the program will be announced. The dates set are July 25 to Aug. 5. Among the speakers from a distance will probably be Rev. Stephen A. Northrop, D.D. of Los Angeles. Dr. Northrop is Mr. Shank's old pastor, and one of the best known men of the denomination.
