MINERAL EXHIBIT.

For some time it looked as if Boundary creek would be the only district of great importance that would not contribute specimens to the mineral exhibit to be displayed at the Spokane Fruit fair, but now matters are taking a different course, and the exhibit that will be forwarded for the inspection of visitors from east and south, in fact from all quarters, will be one that will be truly representative of the mineral deposits of the district, and one which will, we are certain, compare favorably with any other collection, from whatever source.

Mr. J. C. Haas, vice-president for Boundary creek of the Northwest Mining association, will take charge of the collection of the exhibit, and will personally as far as possible make selections of ore from the claims to be represented. It is intended that four of the principal claims in each camp shall be selected and samples taken therefrom.

As a goodly number of camps exist hereabout, there should be no difficulty in collecting about two tons of specimens, and these if they are properly displayed at the exhibition will give a very good idea of the ores and their characteristics to be found in this, the greatest mineral bearing region of British Columbia.

Every miner and prospector will do well to lend every assistance to Mr. Haas, so that the collecting of specimens may be made as easy as possible.

FACTORS TO DEVELOPMENT.

Professor W. A. Carlyle, provincial mineralogist, has this to say touching the means that must be employed to ensure the greatest amount of development to our mines and the greatest amount of benefit to the province. He says:

"Perhaps the greatest factor that will determine the progress of mining and the realization of the wealth that undoubtedly is now locked up in these mountains, is the means of communication and transport. The ores must be carried to the metallurgical centers for treatment, and if the ore deposits now known to exist, and those that may yet be discovered, are to be made available and to become a most valuable part of our resources, trails, roads and railroads must be constructed to make possible the concentration of the ores, fuels and supplies at the most *favorable points; and if this part of* the industry is to be retained in Canada, Canada must assist in boldly advancing these means of communication to make easily accessible the coal fields and the mines from which the different classes of ore can be obtained, that separately are difficult to treat, but brought together and intermixed, can be reduced at minimum smelter charges. Favored by the trend of the mountains and valleys, American railroads are rapidly entering from the south to transport Kootenay ores to the American smelters; but, notwithstanding much greater difficulties of construction, Canadian roads must be energetically built, and, not only will more mines be opened up, but the large reduction works with the large employment of capital and labor will be mostly retained within this province. The opening up of Kootenay during the last six or seven years has been rapid, but the most marked advance has followed the building of the various lines of connection already completed, as is seen, for one instance, in the rise of the new camp at Rossland, but more rapid advance is awaiting these better facilities, which it is safe to predict will be called on to carry a heavy tonnage. Several important lines are seeking aid to be built; lines that will open country that already is proving most promising as it is further prospected, and it is hoped that this aid will be granted, so as to permit the immediate commencement of these important undertakings. Not only is the bulk of this ore being shipped to the south, but the large proportion of the fast increasing demand for mine and mercantile supplies is being satisfied by the cities on the other side of the border, with the result that a great revival in their business affairs has followed the opening up of these good markets in British Columbia, greatly due to the fact that orders can be now more promptly filled and forwarded from this source, this advantage more than *counterbalancing the customs duties* that are imposed upon imports. Not only this, but much of the mining machinery manufactured in Eastern Canada, and now being extensively ordered, is being brought most of the way over American railroads to the point of entry, Northport. If our own centers of trade are to benefit by this growing business, strong efforts must be made to get these facilities for rapid and prompt delivery which, with customs dues, will more than give Canadian concerns the advantage, as the fact should be realized that new and large markets are opening up in British Columbia. American business men are making strong efforts to secure this trade, and the current once set in, it will be difficult to deflect it into that channel most beneficial to the commercial interests of this country."

CROW'S NEST PASS COAL.

The Fort Steele Prospector, speaking of the Coal fields of East Kootenay, says:

"The western outcrop of the field is on the side of the mountain in the valley of Elk river, one of the largest tributaries of the Kootenay. On the eastern side the coal seams have been traced a distance of 40 miles, with surface crosscuts made at intervals, showing seams and walls. The lowest known seam is some 1,500 feet above the drainage level of the valley, and 30 feet in thickness; 100 feet higher there is another seam 30 feet thick, then comes another seam 15 feet thick, then a small 3-foot one, then a 7-foot one, then another 30-foot seam, and above these are five more workable seams from 4 to 10 feet in thickness; *Eleven seams in all, making a total of* 148 feet in thickness of coal exposed. These seams dip with the mountain easterly at an angle of 30 to 35 degrees, the upper seams having the least dip.

There are three large creeks cutting this coal field, and the seams are exposed on the banks of these creeks, and openings can be made to mine the coal without much preliminary expense, the cuts made by the creek being more valuable than so many tunnels to prospect the coal, because there is room to operate on both sides of the creek, and the mines are proved to be permanent without any cost, in fact nature did the prospecting.

"In addition to the coal on Elk river, further east on Martin's creek, and other tributaries of Mitchell creek, which is a fork of Elk river, there is another large body of coal, above the Elk river field, but of smaller area, a great amount of this field having been carried away through the different ages since the coal was formed. The aggregate of the depth in the upper basin is somewhat more than on Elk river, so that if a shaft be sunk through the whole field, there would be 300 feet of coal in the workable seams.

"It would be hard to find another field of coal with as much coal to the acre, and so easy and cheap to work.

"The eastern outcrop is near the summit of the Rocky mountains, the average distance from western crop being 10 miles, showing a coal field 40 miles north and south by 10 miles east and west, and an area exceeding 250,000 acres. The coal in these fields differ, owing no doubt to the different ages of the coal, there being three different qualities; the lower seams are anthracite in their nature, while the upper seams are the bituminous coals, in between are a number of seams of coal different from anything heretofore known. It is somewhat similar to cannel coal, but superior to any cannel coal known.

"The coals have been assayed and tested by Professor Hoffman, government assayer at Ottawa, for the geological department, and the results shown in the department reports prove that these coals would lose nothing by comparing them with the best coals of the same variety in Pennsylvania. Owing to their position these coals can be mined at a small cost, and can be placed on cars ready for shipment at $1.25 per ton, and with ordinary freight rates can be placed on all the western markets, to compete with any and all the coal now used. It would be well for the government to hasten matters in regard to the building of the Crow's Nest railway, for experts from the other side are investigating these fields of coal, which are wanted by all the smelters, and works of all kinds on the other side of the line, and we call the attention of those interested to the utterances of the president of the Great Northern railroad, J. J. Hill, who, on his recent trip to the coast, told the people of Kalispel that should his experts, who are now at the coal fields, substantiate the reports already in his possession concerning the coal fields at the Crow's Nest pass, they would have an inland city second to none on the Great Northern railway."

WAR EAGLE NOT SOLD.

Patsy Clark, the president of the War Eagle company, positively denies the sale of the great mine, and is greatly displeased at the newspaper talk which is taking place with reference to it. He says the bond expired on the 1st of August and no extension of time was ever given.

The report of the sale of the War Eagle originated from a telegram sent by Frank Loring from Toronto to F. E. Snodgrass of Spokane, stating that the War Eagle deal had been consummated. Where or how Mr. Loring got his information is not known, but it does not appear to have been correct.

MONDAY, SEPTEMBER 14, 1896.

THAT no stone may be left unturned to bring the perpetrators of the recent gold brick robbery to justice, the Cariboo Mining company now offer the handsome reward of $1,500 for the recovery of the stolen property, and $2,000 for the detection and conviction of the robbers, making in all $3,500. Just why the provincial authorities are so inactive in the matter it is hard to determine, yet, up to the present, we are not aware that any reward, supplementing that of the company, has been offered by the government, although as a rule in similar cases it is generally done. We are reminded that when robberies have taken place in other parts of the province, the government have immediately stepped forward and have offered a generous reward as an incentive to the detection and capture of the criminals. The apathetic manner of the authorities in their treatment of the most daring robbery ever perpetrated on the Pacific coast, is beginning to gall the people of this district, and the state of feeling of the members of the Cariboo company upon the subject can far more easily be imagined than described. We have before on former occasions pointed out the necessity of an auxiliary force of detectives being added to the police force of the province, and when a bold robbery like the recent one takes place and the criminals are not speedily brought to justice, we are all the more convinced that a detective service is an imperative necessity, if due regard is paid to the lives and property of our citizens.

INFORMATION has been received by Mr. Stuart to the effect that the Midway townsite owners really intend to carry out this fall the project of bringing water into the town, and also of furnishing the whole valley with water for irrigation purposes. The company have many acres of land which would be extremely valuable if supplied with water. The townspeople here have been justly incensed at the apathy displayed by the company in the past, and if again they are disappointed their only prayer will be that the company step down and out of the townsite business altogether.

VERNON NOTES.

From Our Own Correspondent.

I. Ogden Graham, of the Hudson's Bay company, paid Vernon a flying visit last week.

J. A. Monteith was in town Monday and Tuesday last. I understand he has received some government appointment.

Neil Thompson has leased the Benvoulin hotel from Mr. Dan Nicholson. With the combination of the blacksmith shop and hotel, Neil ought to do well.

The town is full of Indians en route to the hop fields at the Aberdeen ranch. They come from the Similkameen, Head of the Lake, Spallumcheen, and goodness knows where. The crop is very heavy, so there will be work for all.

The weather has suddenly changed from the oppressively hot spell to decidedly chilly. On Tuesday night last there was quite heavy frost here, and the too generous of the community are beginning to grieve over their summer earnings.

To the surprise of Vernon, Judge Cornwall sustained the sentence of Police Magistrate Ireland in the Beer's case. In February last our local magistrate committed him to six months hard labor, for being a frequenter of a house of ill-repute. The case was appealed, and after several adjournments through a period of seven months, Mr. Ireland's sentence was confirmed, and Beers has gone to Kamloops to durance vile. Truly the ways of the law are past finding out.

The return lacrosse match between Kelowna and Vernon, played here Saturday, resulted in a great victory for Vernon—three goals to none. The home team had spared no pains to get the ground in good shape, and it really was in excellent condition. The Vernonites won by their playing well together, good passing, etc., but undoubtedly the best individual play was done by the Kelowna boys. F. Atwood, Curtz, Fraser, Neil Thompson and Ledgeir put up a really fine game, while on the Vernon side Bob Bell, Haverty, A. Bernie, Poole and Jimmy Harris deserve special mention. The next match will be played at Kelowna on the 25th inst., and as the Mission boys are now fully on their metal, it behooves the Vernon boys to look well out if they would sustain their laurels.

And now commeneeth the season of blanketed horses, and their name is legion. Never before in the history of Vernon have so many local horses been put into training, and the coming races promise to be unusually interesting. The greatest amount of interest is centered in the two year-old trotting match, for which event ten are in training. As they are all untried, each one is a dark horse, which naturally causes excitement to run high. Trials are run and kept with a profound secrecy, that would do credit to the diplomacy of Li Hung Chang. It is perhaps a remarkable incident that, with one exception, all these youngsters were sired by the same horse—Ben Morrell—the property of Mr. D. Gallagher. A little nearer the races I will comment upon the probable winner.

A New Drug Store

We beg to inform the public that we have opened our new Drug Store and solicit a share of their patronage.

Buying drugs is entirely a matter of confidence, as in no other business is sophistication easier; nor does any other avenue afford so ready a means of disposing of worthless articles.

You can buy a pair of shoes for $1 or for $10. It is entirely a matter of quality. There is as much difference in the quality of drugs as there is in shoes, except in purchasing one you can use your own judgment, and in buying the other you are entirely dependent upon the integrity and judgment of the druggist. In one case it is only a matter of comfort and appearance, and in the other frequently of life or death.

If you want the purest and best drugs obtainable, we solicit your patronage; if you want the cheapest, we cannot accommodate you.

If you need medicine, you need the best and purest obtainable, compounded by a skilled and experienced prescriptionist, with the most scrupulous care and fidelity.

Human life may be in the balance and dependent on the prompt action of the remedy prescribed; and if the latter be not of standard strength and purity the physician's skill is of no avail, and the patient fails of improvement.

We carry a full line of patent medicines, invalids' specialties, toilet requisites, etc. in great variety.

Mail orders receive prompt and careful attention, and anything not in stock will be procured at once without extra charges.

R. N. TAYLOR & CO.

The Prescription Pharmacy

GREENWOOD CITY, B. C.

NOTICE.

In the Matter of Gus Hamlin, Deceased.

TENDERS will be received by the undersigned up to noon on the 15th day of November, 1896, for the purchase of the following mineral claims, situate near Grand Forks, in Kettle River Mining Division of the District of Yale, viz.:
The "Possum, "Grandmama's Bustle," "Little Belle Lump," and the "Coon."
C. A. R. LAMBLY,
Gold Commissioner.

NOTICE.

NOTICE is hereby given that, sixty days after date hereof, I intend to apply to the Honorable the Chief Commissioner of Lands and Works for permission to purchase one hundred and sixty acres, more or less, of land, situate in the Osoyoos Division of Yale District, in the Province of British Columbia, viz.:

Commencing at the north west corner of the north west quarter of section nineteen, township sixty-eight, running thence north twenty chains, thence east forty chains, thence south sixty chains, more or less, to the north bank of Kettle river, thence in a north-westerly direction, following meanderings of river to point of commencement. RICHARD J. DAVIES.
Dated this 12th day of September, 1896. 2

THE MORRISON MINERAL CLAIM.

Situated in Deadwood Camp, Boundary Mountain, in the Kettle River Mining Division of Yale District.

TAKE NOTICE that I, C. D B. Green, agent for the Morrison Gold Mining Company, free miner's certificate No. 65755, intend, sixty days from the date hereof, to apply to the Mining Recorder for a certificate of improvements, for the purpose of obtaining a Crown grant to the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements.
Dated this 2nd day of September, 1896. 1

THE NATIONAL

MATTE SMELTER.

A PRACTICAL AND SIMPLE METHOD of matting sulphide ores, such as nickel, copper, gold and silver ores. In localities where lead ores and fuels are scarce and almost unattainable, our pyritic, water jacketed Matte Smelter has been recognized with highly satisfactory results, and has been thoroughly tested on various pyritic sulphide and arsenide ores, in capacity of 2 to 80 tons of ore per day. It is the most practical, cheapest, and simplest method of gold and silver ore matting and concentrating that is known to-day.

It requires no extraordinary skill, no lead ores, no fluxing material, and no fuel of any kind for the smelter after it is started. The sulphur in the ore is its natural fuel only, and its cost has no comparison with any other process of concentrating.

We are prepared to furnish any size or capacity plant complete to substantial mining people, set it up and furnish our men to run it for them on easy payments. Prices and specifications furnished with references and testimonials on application.

DISSOLUTION OF PARTNERSHIP.

NOTICE is hereby given that the partnership heretofore existing between the undersigned in carrying on the hotel business at the Pioneer Hotel in the City of Greenwood, British Columbia, has been dissolved by mutual consent, J. M. Hubbell retiring. All debts owing by the partnership will be paid by Frank Wood and J. W. Nelson, to whom all debts due and owing to the late partnership are to be paid.

FRANK WOOD,
J. W. NELSON,
J. M. HUBBELL,
PHILIP WESTEL.

Witness, C. W. H. SANSOM.
Dated 30th July, A. D. 1896. 21

LOCAL AND DISTRICT.

Miss Haynes of Rock Creek is at present visiting Mrs. Thompson at Midway.

Mrs. C. J. Lundy left last week on a six weeks' visit with friends in Spokane.

Rev. H. W. Irwin, left last week for Enderby to attend a meeting of the Presbytery.

Mr. W. T. Thompson passed out to Rossland on Friday last, and during his absence mining men of great repute will confer with him upon matters of interest to the Boundary Creek district.

Discipline will soon be instilled into the young hopefuls of Greenwood City, as on Wednesday last Miss Grace Thornber arrived from the coast, and the opening of Greenwood City's first public school takes place to-day.

After making a careful inspection of the district, Mr. Graham, our representative in the provincial legislature, returned north on Tuesday last. Before leaving, Mr. Graham expressed himself as simply astonished at the vast strides in development the Boundary creek country has made during the past two years.

A corps of engineers are at present camped near Okanagan lake, who are engaged looking up a route for the proposed Vancouver and Frazer Valley railway, which it is intended to extend through Boundary creek and on to the Columbia. It is stated no difficulty was experienced in finding a feasible route over Hope mountain, as it was ascertained a good grade could be had, which would not at any point exceed 3 per cent.

The legal fraternity of the neighborhood object to the journalistic fraternity wearing leggings, claiming that the community is not an English one "doncher know." In return the journalistic fraternity desires the legal fraternity to spend an eternal sojourn in the land set apart for them when the world was created, and in which the temperature does not admit of their bodies ever being troubled with rheumatic pains, and in which the only sounds ever heard are those of sissing and sizzling, and—

Mr. C. A. R. Lambly came into Midway on Monday last on his annual assessment tour. Mr. Lambly's duties will necessitate his being in this part of the district for several days to come, as the great development that has taken place since he last visited the district in the like capacity, provides plenty of work for him to do, and his labor will be made apparent when the assessed value of property over previous years becomes known. In the near future the government will derive a very handsome revenue from the southern portion of Yale district, if the progress of the past year is maintained in those to come.

Mr, G. B. McAuley, accompanied by Mr. Chamberlain of Spokane, passed through Midway on Tuesday last, en route to Camp McKinney, and returned on Friday. Mr. McAuley on his way up signified his intention, or rather the intention of the Cariboo company, of putting up a first-class hotel at Camp McKinney, so that better accommodation be provided for their employees. It is said that Mr. McDonald and Mr. Conkle, who had intended building a good hotel at Camp McKinney, have changed their minds, and instead will erect one at Rock Creek.

In a new country, divine services are held anywhere and under any circumstances in which the parson finds himself, and sometimes very trying incidents for him crop up. Not long ago in one of our most ambitious young cities, just as the parson had announced the hymn, "The Church is the Sure Foundation," there was a crash. On looking up, where a moment before sat the elite and beauty of the city, there was an indiscriminate mixture of frills, furbelows, legs and feet. This was too much for the parson; he just dropped the hymn book and had a hearty laugh, which was joined in by the congregation. Before the laughter had subsided, the frills, legs and feet had adjusted themselves and the service continued without further interruption.

On Wednesday last at Midway, before C. A. R. Lambly, S. M., and W. H. Norris, J. P., Messrs. Stewart, Simmons and Comstock, of Greenwood City, appeared to answer a summons charging them with an infraction of the License act, viz., allowing liquor to be drunk on their premises, the International hotel, at Greenwood during prohibited hours. As the license appears in Messrs. Stewart & Patterson's name, the charge was dismissed against Messrs. Simmons and Comstock, who only recently purchased an interest in the business. Mr. Black of Greenwood appeared for the defence, and on behalf of his client, Mr. Stewart, pleaded guilty to the charge. Being the first case of the kind happening in the Boundary creek district that has come before the court, the magistrates exercised their discretionary powers and inflicted the nominal fine allowed by law, $20, and costs, at the same time observing that as this case would form a precedent, offenders in future must not expect to be treated with the same leniency.

Mr. E. S. Graham of Spokane came in on Friday's stage and will busy himself looking after his mining interests on Ingraham mountain for the next few days.

The first issue of the Boundary Creek Times, published at Greenwood City by Messrs. Harber & Lamb, came out Friday last. Typographically, the Times is very neat. The ADVANCE wishes the publishers every success.

The Rev. Mr. Irwin of Rossland visited the district last week and held divine service in Midway, Anaconda and Greenwood City. At each service a large congregation assembled to listen to the reverend gentleman, who is so well and favorably known throughout the length and breadth of the province.

If there is one thing more than another that the average prospector and miner has a supreme contempt for, it is the bloomer and legging attachment to young Britishers during their first season in the country. A young man starting in the newspaper business in one of our towns, was fast becoming popular among the boys, until one morning he sailed down the street encased in an extremely aggravating pair of corduroy gunny sacks, with running string and white legging attachment. A meeting of citizens was held and a legal gentleman deputed to call upon the prospective editor and suggest that the bloomer and mixed drinks era had not yet arrived in that town, and also that blue overalls and straight whiskey would be considered sufficiently advanced for the present.

MINING NOTES.

Mr. J. C. Dale has gone up the Kettle river and will start at once to develop his claims recently located, from which such good specimens of ore were shown a few days ago.

Mr. Marcus Daly's agent, Mr. W. McKay, is sojourning in the neighborhood, and under the guidance of Mr. Scott McRae is taking a look at the several camps. As there are many good prospects yet untouched by capitalists in our camps, it is quite likely it will be possible to chronicle some transactions before very long.

The water is being taken out of the Steamwinder shaft in Greenwood camp, and under Mr. W. T. Smith's guidance the owners, Messrs. Farrel and Midgeon of Butte will have a force of men working at once, as it has been decided to extend the development of the property to a very considerable extent.

ANACONDA NOTES.

By Our Own Correspondent.

Many improvements are being made around the Palace hotel, and soon Mine Host Hardy will have everything in apple-pie order.

Mr. A. R. Tillman, our enterprising sawmill man, has built himself a residence here, which for beauty of design and finish it would be hard to equal anywhere.

Upon the Mother Lode in Deadwood camp, the Weir syndicate have erected two fine buildings for the men to live in, and sinking on the ledge commenced Friday.

Several men are at work clearing on the townsite, and before long the place will assume quite a city appearance, as many new buildings will be erected before snow flies.

Your correspondent paid a visit to Copper camp the past week and found everything prospering there, as the drift which is being run in from the bottom of the 50-foot shaft, has penetrated 26 feet of solid ore in the crosscut without any indication of the wall on the opposite side being apparent. If development were carried no further, still the Copper would be a giant among the big mines of British Columbia.
