Grey Eagle, ½ interest, M. McMynn to J. P. Graves.

Look out for Brown Rot.

People in the Okanagan and Kettle River districts who are interested in *the fruit industry, and they are many*, will do well to watch carefully for the first signs of a disease which is growing very *destructive in some parts of* British Columbia, more especially on the lower mainland. The disease is known as Brown Rot (*Monilia Fructigena*) and it attacks plums, prunes cherries and in fact all stone fruits.

The committee of the board of horticulture to whom was relegated the task of equiring into, and reporting upon the disease, very lucidly explains it in the following words, at the same time offering suggestions for its prevention. The report says:

Brown Rot (Monilia fructigena) affects all kinds of stone fruits, and is well know in the eastern provinces besides the states of Oregon and Washington and British Columbia, causing more or less loss, as the seasons are favorable to its development or otherwise. Warm, moist weather at the time the fruit is about full-grown, will almost certainly develop the disease to a *very large extent in districts subject* to its attacks, when measures of a preventative nature have been neglected, *and cause the loss of a large portion of* the crop.

The ash-colored, velvety coating or mould *seen on plums infested with the* disease, shows the final or fruiting stage of development. If examined with a pocket lens, this mould will be seen to consist of numerous tufts of minute thread-like projections, and if further examined under a common microscope, will be seen that each of these "minute threads" is composed of a number of small oval bodies joined end to end like a string of beads. These bead-like bodies are the spores of the fungus, and each infected fruit is capable of producing them in thousands.

These spores may remain unchanged for a great length of time, or on the other hand, they may when conditions *are favorable to them, germinate* and grow so rapidly that infected fruit soon becomes capable of producing fresh *crops of spores. Through the agency* of winds, insects, etc., spores are distributed widely, and when one of them *lodges on a fruit sufficiently soft, and* when moisture is present, it starts the disease again, sends out a germinating tube which penetrates the skin of the fruit; here it grows rapidly, branching through the pulp in all directions forming a dense mass of micelium, which absorbs the contents of the cells of the fruit, disorganizing the tissues and causing the so called "brown rot."

Infected fruit first turns brown in spots, which gradually enlarge, until the whole fruit becomes brown and rotten, and in its turn becomes covered with fruiting spores.

The mycelium or plant body of the fungus remains dormant during the *winter in the dried or mummied plums* which are left on trees infected with the disease, or on the ground beneath *them, and when warm weather comes* the following season will produce an abundant crop of spores to start in*fection afresh.*

In dealing with this disease, it will be easily seen that the most successful treatment will necessarily be of a preventative nature. It is usually first noticed in the season on cherries, especially on soft varieties which burst their skins after a rainstorm, such as the Governor Wood, and undoubtedly infected fruits which are left to dry upon these trees are a fertile source of infection to plums, later in the season. Great care should be taken to gather and burn these and also the first infected mouldy fruit noticed on plum trees. In orchards which have been infested this season, the first thing to be done is to pick off as soon as possible in the fall all dried up or mummied fruit which may have been left on the trees, then with a fine-toothed garden rake, gather together all fruit that may have fallen on the ground, together *with fallen leaves and trash, and burn* up all these sources of infection; after which the trees should be thoroughly *sprayed with Bordeaux Mixture of* double strength, viz, 8lbs. sulphate of copper, 8lbs. lime, and 50 gallons water, the ground beneath the trees should also be well sprayed with the mixture. This should be followed by a thorough spraying with No. I mixture, or lime, salt and Sulphur spray during the dormant season, both of the trees and of the ground beneath them.

In the spring, the spraying of the trees with Bordeaux mixture of the ordinary strength, should be commenced as soon as growth starts, and at least two sprayings given after the blossoms have fallen.

If there is reason to expect an attack *of the disease after the fruit has at*tained its size and, before ripening, spray No. 10, the carbonate of copper spray should be carefully used, as at this stage the fruit is particularly liable to be infected. Cherry trees should be carefully sprayed with double strength Bordeaux mixture as recommended for plum trees, while the trees are dormant, and in the spring the trees should be sprayed with Bordeaux mixture of ordinaryy strength when growth commences, and again after the fruit has formed.

Formidable Indeed.

On the 17th inst. thousands of people witnessed the launching at Portsmouth England, of the ram battleship Formidable. The Formidable is said to be the largest war ship in the world being of 16,000 tons displacement. She is 400 feet long has 75 feet beam, and draws 26 feet 9 inches of water. A notable feature of the launching of the battleship was the entwining of British and American flags on the official stand.

The armament of the Formidable *consists of four 12-inch guns, 12 6-inch* quick firing guns, 18 12-pounders, 12 5-pounders and eight Maxim guns. *She carries 900 tons of coal in her* bunkers, and will have a compliment of 750 men. Her 12-inch guns are in *hooded barbettes. She is to be driven* by two propellers, and will have 15,000 indicated horse-power.

MONDAY, NOVEMBER 28, 1898.

As a result of the government's invitation, from many sources petitions will be forwarded to the Lands and Works department, praying that good wagon roads be built up the main Kettle river, and its western branch, known as the west fork, during the coming summer. That these roads are an actual necessity, if the immence natural resources of the region penetrated by the Kettle river is to be developed, all those acquainted with the country will readily testify. The records too will show how necessary is this public work, for during the past two years very many mineral locations have been made, and a number of pre-emption claims taken up within the territory referred to, thereby furnishing ample evidence that the near future will recoup the government for any outlay it may make in carrying out the wishes of the people who are interested in seeing the above work done. From a miners point of view the region referred to is second only to Boundary Creek, and what good roads have done for Boundary Creek, can be repeated up the Kettle river, therefore, it is to be hoped the government will favorably receive the advice to be tendered to them by those who now have the matter under consideration.

Corbin's Battle.

In its characteristic manner of treating subjects, the New Denver Ledge referring to the struggle which took place and which will again take place over the Kettle River Valley railway charter, says: "Corbin's battle before the Canadian parliament a year ago for a charter for his road into the Boundary country, though resulting in defeat, educated the people in the Dominion to the advantages of competition in railway business. Corbin is out of the running now, but his place has been taken by Jim Hill, who desires the same concessions for his rapidly extending interests in British Columbia. He will have more influence at Ottawa, and it is beyond question that the C. P. R.'s antagonism will not prevail at next session's combat. Slocan lake can sympathize with the Boundary in their desire for a competing line, and both districts will in all probability gain relief from the same source—the Great Northern railway. Big corporations are often a curse, but in this instance the cloven hoof is surely hidden beneath a thick pad of blessing."

A Big Platinum Find.

The Spokesman Review is authority for the statement that an enormous ledge carrying platinum has been discovered on Mad river in Okanagan county in Washington territory. Referring to the find it says:

"On Mad river in Okanogan county a discovery has been made which, if it proves to be all that tests so far made indicate, is the most important event in the history of mining in Washington. It is reported that a great ledge of remarkably rich platinum ore has been found and that tests prove it to be of immense value. C. R. Aldin brings the news of the discovery. He is a mining engineer who came to Spokane over a year ago and after establishing his family here went on to Okanagan county to take charge of the Lake View mines on Mad river, about 25 miles north of Leavenworth. The property is owned by a Chicago company. It is one of the free milling ledges of Okanogan county and the company has installed a 20-ton stamp mill during the past year. From the first day of the operation of the mill the company was bothered by the persistent presence of a white metal which seemed to be as heavy as the gold and which seriously interfered with the milling operations. The ledge was yielding fair gold values, however, and so operations were continued in the face of the difficulty mentioned. It was not until about a month ago that it was determined that this bothersome metal was platinum, one of the most valuable of the precious metals."

The ledge in which the platinum is found is from 14 to 20 feet wide, and only a certain portion, about one half, or 8 feet of the ledge carries it. The vein filling is a siliceous quartz carrying gold and a steel gray ore which looks like iron ore, but is considered to be crystalized serpentine. The portion of the ledge carrying the platinum is said to run several ounces to the ton in that metal. Should there be no mistake about this the find will prove very interesting, for up to the present the worlds supply of platinum was derived from placers, and came principally from Asia, although in recent years a considerable quantity has been derived from British Columbia sources, the metal having been found in some quantity at Granite creek on the Similkameen.

OUR OTTAWA LETTER.

Ottawa, Nov. 19th, 1898.

BETTER WORK FOR LESS MONEY.—In face of the results which are becoming more and more evident every month, it is not difficult to realize that there was never greater activity or better directed efforts in the Agricultral Department than under the present administration, and yet the great improvement that is manifest has been brought about at a very considerable decrease in the cost in running expenses. In 1895, when the present government took hold, it found 98 clerks employed in the main branch of the department, while the cost of maintenance was $75,379.49; at the present time there are but 68 clerks employed and the expenses of the last fiscal year were $63,543. In other words the staff has been reduced by nearly 30 per cent.

Such too is the record of the Post Office Department, the Department of the Interior, Public Works, and in fact every other branch of the service. Every dollar of the public money is being judiciously spent and while the sum total of expenditure has not been materially decreased, the sum total of permanent and beneficial results has incalculably advanced within the last two years. Expenditure and extravagance are not synonymous words.

NEW POSTAL REGULATIONS.—Official announcement of the changes in the postal regulations which comes into force on the first of the New Year have been issued by the department. There is nothing therein of wide spread intrest, the changes have to do principally with commercial details Everyone is now aware Imperial penny postage rate will come into operation on Christmas Day, when the rate will be dropped from five cents to two cents per half ounce, upon all letters passing between Canada and the United Kingdom, British India, Newfoundland and various points in British Africa. It should be bourne in mind that this rate is per half ounce and not per ounce; the domestic postage rate is three cents per ounce, the foreign rate has been five cents per half ounce and will now be two cents per half ounce. The difference should be borne in mind, as want of attention to this simple matter has caused many an over charge to be levied on old country letters.

THE QUEBEC COMMISSION.—The Joint High Commission for the arrangement of the various difficulties between Great Britain and the States has resumed deliberations, this time at Washington, and having utilized the adjournment for the work of completing details it is confidently believed by all who are not irredeemibly pessimistic that definite results will soon be arrived at. Of course sections of the opposition press still persist in mistaking their own unpatriotic desire for failure for the actual probabilities, and declare accordingly that irreconcilable differences exist. There is happily not one iota of credible evidence that such is the case; on the contrary those best able to judge of the situation take exactly the opposite view. It was recognized from the first that each country must and did approach the negotiations in a conciliatory spirit of give-and-take, and as far as Canada is concerned there is complete confinence that her representatives are not only willing but thoroughly able to protect her essential interests and consent to no conditions that would be inimical to her welfare, progress and prosperity.

EGGS FOR ENGLAND.—As in the case of most of the products of the farm, the export trade in eggs is steadily forging ahead, but there is lots of room for further development, for the $1,255,304 worth which Great Britain took from Canada last year is but a small proportion of the $21,000,000 worth she annually requires. We are advised that England wants "fresh eggs, clean eggs, good big eggs, winter eggs as well as summer eggs, and they must be sent regularly, nicely packed and all of even size. And the Englishman dearly loves a brown egg." Poultry farming is receiving much attention just now; more than one experiment upon a considerable scale has been inaugurated this fall, and the results will be watched with more than ordinary interest throughout the Dominion.

Land Act.

SECTION 29 A.

I HEREBY give notice that 60 days after date I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase the following described pieces of land situate near Fairview in the District of Yale, B.C., viz:

Commencing at a post planted on the East boundary of my pre-emption at a point twenty chains North of the South East corner thereof; thence East forty chains to the S. E. corner of land applied for; thence North, forty chains, to the N. E. corner of land applied for; thence West, forty chains to the N. E. corner of my premption; thence South along East boundary of my pre-emptiona, forty chains to point of commencement and containing 160 acres more or less.

J. K. ROBINSON.
Dated at Fairview, Oct. 22nd, 1898.

THE partnership heretofore subsisting between Frank Donald, Thomas Donald and James M. Lynch, doing business as hotel keepers at Camp McKinney has this day been dissolved by mutual consent. The business will hereafter be conducted by James M. Lynch and Thomas Humphrey under the name of Lynch & Humphrey to whom all debts due the late firm must be paid.

Dated this 10th day of October, 1898.

JAMES M. LYNCH.
THOMAS HUMPHREY.

NOTICE.

Came to my premises on the first of April last, a small sorrel mare, with white strip in face and branded "G C" on the nigh shoulder. Mare now has a foal by her side. Owner proving property and paying expenses, can take the same away.

DAVID McCUAIG,
Fairview B. C.

MINERAL ACT, 1896.

Certificate of Improvements.

NOTICE.

VIRGINIA MINERAL CLAIM.

Situate in the Kettle River Mining Division of Yale District. Where located Grahams Camp.

TAKE NOTICE that I, Forbes M. Kerby P.L.S., as agent for Edwin Smith Graham free miner's certificate No. 80180, intend, sixty days from the date hereof, to apply to the Mining Recorder for a certificate of Improvements for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 12th day of October, 1898.

Notice of Dissolution of Partnership,

NOTICE is hereby given that the co-partnership heretofore existing between A. R. Tillman and E. A. Mason doing business under the name and style of The B. C. Lumber Co., at the town of Fairview B. C., has this day been dissolved by mutual consent. The business in the future will be carried on under the same name and style by A. E. Mason and G. N. Maurer, the new firm assuming all liabilities and collecting all accounts of the old company.

It is said work will be started on the Brooklyn claim in Greenwood camp in a few days, the owners Messrs. McKenzie & Mann having decided to develop the property in conjunction with their other, the Stemwinder claim.

The Final Act.

The final act in the transfer of the assets of the Cariboo Mining, Milling & Smeling company, of Camp McKinney, to the new Cariboo Consolidated Gold Mining company recently organized in Toronto, took place in Spokane a few days ago, when the cash in the treasury of the old company, amounting to $25,606.99 was turned over. The October output of the Cariboo was 1698 ounces of bullion averaging $13.70 per ounce, and valued with the concentrates at $26 265. Not a bad showing for a free milling proposition, which has worked steadily since the 26th of April 1894.

Seeking Information.

Evidently the Minister of Mines is of the opinion that the Mineral and Placer Mining Acts are not now in a state of perfection, as by a notice which appears in this week's Gazette an invitation is extended to Gold Commissioners, Mining Recorders and others interested, to forward without delay, any alteration or amendments they deem advisable should be made to the atoresaid Acts. The invitation being a general one, those having long cherished ideas of what would constitute a perfect mineral Act, will now have an opportunity of ventilating them, and if they will only do so and that freely, no doubt good will result.

The Le Roi.

At last the British America Corporiton controls the great Le Roi mine at Rossland, as on Monday last a deal was closed with the minority stock holders, whereby the B. A. C. people obtained 205,000 more shares at a cost of $7.25 per share. Thus the B. A. Corporation controls 480,000 out of the 500,000 shares. That the big corporation controls the Le Roi is the most fortunate thing which has happened in British Columbia mining affairs for many a day, as the influence for good it will exert in the worlds financial center, London, is almost incalculable.

For some time, in fact ever since the Le Roi was first brought to the notice of English investors, the unsatisfactory state of affairs with regard to the purchase of the mine has had a repressive influence upon those desirous of putting money into British Columbia properties. Now that this is removed, and the dividends from this great mine for the future will find their way to the old country instead of into the pockets of people who live in the United States, a great change will no doubt come over the spirit of the investing public and money will flow into the province in an ever increasing amount, to the detriment perhaps of other parts of the world, but to the advantage of British Columbia and those who turn their attention, to the development of her mineral resources.

The Minnehaha.

In a recent issue of THE ADVANCE, the statement was made that the management of the Minnehaha in Camp McKinney, was considering the advisability of sinking the main shaft on the property another 100 feet. In confirmation of the statement, the following is observed in the Toronto Globe.

"The Minnehaha, of Camp McKinney, has now sufficient money in its treasury to continue the development of the mine on a big scale. Measures will at once be taken to purchase a ten-stamp mill to crush the ore and to buy other machinery for expanding the underground works. This was made possible by the purchase of a block of 200,000 shares by a Toronto Syndicate. About $30,000 was paid in cash for the stock, and the money will be devoted exclusively to the development of the mine. The deal has been on the tapis for some time. A number of syndicates were after the stock, which was bought in by the company and set aside for that purpose. Two of the syndicates were composed of local capitalists, while the other two represented outside money. The details of the agreement of transfer have not yet been arranged in their entirety but the deal has gone through definitely."

Up to the present the work done on the property consists of a 5x7 shaft sunk to the depth of 110 feet, a drift to catch the ore body and drifting on the ledge, in all about 160 feet of drifting. The claim is well equipped with machinery, having a 20 horse power boiler and engine, a steam hoist and one Rand steam drill, therefore work can be prosecuted with vigor.

CERTIFICATE OF THE REGISTRATION

—OF AN—

Extra-Provincial Foreign Company.

"COMPANIES ACT, 1897."

THE WATERLOO MINING AND MILLING COMPANY.

Registered the 29th day of October, 1898,

I HEREBY CERTIFY that I have this day registered "The Waterloo Mining and Milling Company" as an extra-Provincial Company under the "Companies Act 1897" to carry out or effect all or any of the objects hereinafter set forth, to which the legislative authority of the Legislature of British Columbia extends—

The head office of the company is situate at the City of Spokane, State of Washington U.S.A.

The amount of the capital of the company is One Hundred Thousand dollars, divided into one million shares of ten cents each.

The head office of the company in this Province is situate at Camp McKinney, and Thomas Graham, miner whose address is Camp McKinney aforesaid, is the attorney for the company.

The objects for which the company has been established are:—To work, operate, buy, sell, lease, locate, acquire, procure, hold and deal in generally, mines, metals, mineral claims of every kind and description within the United States of America and British Columbia, to carry on and conduct a general mining business smelting, milling and reduction business; to purchase, acquire, hold, erect and operate electric light and power plants for the purpose of mining and treating ores, and for the purpose of furnishing lights and creating power for all purposes; to bond, buy, lease, locate and hold ditches, flumes, and water rights; to construct, lease, buy, sell and operate railroads, ferries, tramways and other means of transportation, for transportating ores, mining and other material; to own, bond, buy, sell lease, locate timber and timber claims; to do and conduct a general mercantile business, and, finally, to do anything consistent, proper and requisite for the carrying out of the objects and purposes aforesaid, in their fullest and broadest sense, within the territory aforesaid.

Given under my hand and seal of office at Victoria, Province of British Columbia, this 29th day of October one thousand eight hundred and ninety-eight.

(Seal) S. Y. WOOTON,
Registrar of Joint Stock Companies.

J W. NELSON - - - PROPRIETOR

LOCAL AND DISTRICT.

Mr. Wichman, our local tonsorial artist, has moved into his new premises next door to the townsite office, on Fifth street.

Mrs. W. Davis and family, accompanied by her mother, left a few days ago for Northport, Wash., at which place they will all spend the balance of the winter.

Mr. H. T. Wildgress, the C. P. R. right-of-way agent, Mr. F. J. Finnecane manager of the Bank of Montreal, Greenwood, and Mr. Pearce of Rossland, were in town on Saturday last.

Mr. Glaze, one of our local contractors, contemplates the erection of a business block on his lots on Fifth street, early in the spring. The building will be 25x60 feet and two storeys.

Mr. H. Cameron, owner of some of the prominent Camp McKinney mining properties, spent a day or two in town during the past week, having come down from the camp on Wednesday last.

That horrible disease which the Grand Forks Miner designates "green eye" seems to have emigrated to this side of Boundary mountain, as witness the remarks of the Midway correspondent in the News Advertiser, re the Sullivan property, recently purchased by a syndicate of Midway capitalists.

In anticipation of a big building boom next summer, local saw-mill proprietors are figuring on getting out two or three millions of feet of logs during the winter. It is pleasant to contemplate that there will be no dearth of lumber next year, a state of affairs which will certainly be conducive to the up building of the town.

A Toronto Syndicate, represented by Mr. Richard Armstrong, purchased the townsite of Grand Forks and much adjoining land, a few days ago. As a result the Grand Forks Miner predicts that its town will be one of great importance in the near future. It is sincerely to be hoped the Miner's expectations will be amply fulfilled.

The people of Greenwood are to enjoy the distinction of having a first class skating rink this winter, as Mr. Geo. Guess has undertaken to provide them with the same. The rink will be 75x150 feet, and in connection with it will be reception rooms for both ladies and gentlemen, also a refreshment pavilion. Skating carnivals will be held at stated periods during the course of the winter.

Having finished his contract, under which he built about 20 miles of a heavy mountain wagon road, in the Kootenay near Ymir, Mr. Glaze returned to Midway on Saturday last. Questioned as to the mining and business outlook in the Kootenay, Mr. Glaze said it is very promising, as the country is gradually being opened up by railways, and every facility provided for the expeditious transaction of business. Mr. Glaze leaves in a few days for Cascade City, at which point he expects soon to secure a contract for a heavy piece of work.

A very enjoyable dance was held in the town hall at Anaconda on Wednesday evening last, the event being in commemoration of Thanksgiving Day. A large number of people were present, and from some who attended it is learned that an extremely pleasant evening was spent. At midnight all present adjourned to the Palace Hotel, and there enjoyed a splendid repast, their wants being catered to by the new proprietors of this well known and excellent hostelry. Many friends from Greenwood, Midway and other points, contributed to the number present.

The C. P. R. surveyors who about a week ago went up the Kettle river, are at present camped at the mouth of Beaver creek a northern tributary of the west fork. From this point they will work in diffeaent directions, their ultimate object being to reach the Okanagan valley either by way of McLean or Penticton creeks. Those who seem to know something about the matter claim that the C. P. R. will push on to Penticton by this route during the coming summer. The very energetic way in which the survey is being carried on certainly lends color to this assertion.

Mr. W. R. Megaw, of Vernon, passed through town on Thursday's stage to Penticton. Mr. Megaw has been paying a visit to Grand Forks, where he has a branch of his business, and also to Spokane. Referring to Mr. Megaw's visit to Spokane, a paper of that city evolved the following. "W. R. McGaw, who has been conducting a general store at Greenwood City B. C. has opened a branch at Vernon, B. C. He was in the city recently and purchased most of his opening stock here." That he has opened a branch of his Greenwood business at Vernon, will be news even to Mr. Megaw.

It is said the Kelowna Shippers Union contemplate moving their cigar industry from Kelowna to New Westminster. Should such a step be taken, it will be for the purpose no doubt of bringing the industry nearer to the principal market for the goods. Many will regret this industry being moved away from Kelowna, so soon after its establishment there, but it is evidently the duty of the directors of the above organization to protect their own best interests. Should the step be taken it is to be hoped it will not interfere with tobacco culture in the Okanagan Mission valley, and there is little reason to believe that it would, as the raw material could easily be shipped to the factory.

Now that the Bank of Halifax has opened a branch at Grand Forks, it will not be safe for the Boundary Creek Times to refer to banking matters at that point, or it will be accused of having again contracted that dreadful disease "green eye." Grand Forks is to be congratulated upon being able to give to the world such an evidence of prosperity as that afforded by the establishment of a chartered bank. "Mid-way's turn will come" and then will be fulfilled the prophesy of the great father of the town who hath on more than one occasion made use of this expression.

CAMP McKINNEY NOTES.

(From our own correspondent.)

A great change has taken place in the business and mining outlook of the camp during the past few weeks. The apathy of the residents has been succeeded by a cheerfulness which has positively affected even the oldest of the old timers. There is scarcely an idle man in camp and there is no exceptional demand for labor, the number of men employed having more than doubled during the last month. This very gratifying change is due to the re-organization of the old Cariboo company, the very opportune strike in the Waterloo and the bonding of the Sailor by some energetic Greenwood men.

Of the work on the Cariboo it only need be said that under the able management of the old superintendent Mr. J. T. Keane, development work is going ahead, while the 20-stamp mill s kept well supplied with ore.

In the Waterloo, Superintendent Murphy has one of the best working shafts ever sunk in the camp. It is now down 55 feet in a fine body of sulphuret ore, the vein being from six to seven feet in width. During the sinking, bunches of free gold ore have been met with, showing some exceedingly rich specimens. An idea of the value of the ore body may be gained from the results of three assays made by Major Megraw, sample No. 1, taken from the footwall $8,120.00, sample No. 2, about 25 feet down and showing no mineral, $5.70, sample No. 3, taken as average of vein at 52 feet, $62.20 to the ton. The stock in this property is selling at about 10 cents or the par value.

The new owners of the Sailor have a thirty-foot shaft on their vein, which is from 4 to 5 feet in width of high grade sulphuret ore. Some of the samples being so similar to Cariboo ore, that the general opinion is that the Sailor is on extension of that famous claim. Some locations in the vicinity of the Sailor and Waterloo have recently changed hands. These deals would appear to have resulted from the position of these properties, as in common with many other locations in the camp, the axe mark on the stakes is the only evidence of the handiwork of man. On the Sancho claim, Messrs. Innes and Raby are sinking a shaft, which it is there intention, to put down 50 feet at least this winter. They recently refused a very tempting bonding offer. This is the claim from which some very rich free gold specimens were taken last summer and exhibited in Midway.

There is a rumor in camp that Mr. H. Cameron is in treaty for the sale of the Fontenoy. This claim is rightly looked upon as one of the leading properties of the camp as in addition to a strong north and south vein, in which is an 80-foot shaft, it also has the easterly and westerly Waterloo vein, the side line of the Fontenoy being only 60 feet east of the Waterloo shaft.

Mr. Sydney Johnson P.L.S., is in charge of a party surveying claims and on completion of this work will proceed to lay out the new townsite on the Sailor claim

Yesterday being Thanksgiving Day was duly celebrated in camp, Mr. Kelsey at the Camp McKinney hotel providing a regular old time Thanksgiving dinner, which was done ample justice to by his numerous patrons, while at the St. Louis hotel a Thanksgiving Ball was given, which was well attended and thoroughly enjoyed by the elite of Camp McKinney.

BOUNDARY CREEK MINING AND MILLING COMPANY, LTD. LY.

Incorporated October 21st, 1896.

HEAD OFFICE, GREENWOOD CITY, B. C.

Capitalization $1,500,000, in $1 Shares, Treasury Stock 700,000 Shares.

COMPANY'S PROPERTIES.

The Company's mining properties now consist of fourteen claims, viz, the D. A., G. A. R, Big Ledge, O B, S. H. B., Fred D., S. F., J. A. C., P. H., C. S. & H., E. C. B, Prospective, Spokane and Granite Falls.

SIX OF THESE HAVING BEEN ACQUIRED SINCE INCORPORATION

OFFICERS OF COMPANY:

- - - - PRESIDENT
D. A. HOLBROOK - - - - - MANAGER
E. JACOBS - - - - SECRETARY-TREASURER

BANKERS

BANK OF MONTREAL - VERNON, B. C

DESCRIPTION.

On the "D. A" is a vein about 20 inches wide, with a pay-streak of 4 to 12 inches; from this 8,653 lbs. of ore was shipped to the smelter, giving $103.15 gold per ton, silver 74 7-10 ozs., and 2 per cent. lead. A tunnel is being driven on this vein from which ore is being taken. On the same property is a larger vein (quartz) carrying galena and pyrites.

The "G. A. R." has a 30-foot shaft sunk on a 2-foot vein, heavily mineralized with an intimate mixture of iron and copper pyrites, galena, blende and silverglance. The finest pieces of wire silver found on Boundary Creek were taken *from this shaft. Average assays from* different places across the vein gave $8.00 gold, 50 ozs. silver; also $8.00 gold and 150 ozs. silver and one, the latest return—$15.05 gold and 196 4-5 ozs. silver per ton.

On the "Big Ledge" is a 10-foot quartz vein, mineralized with iron pyrites. This vein has been opened up by cross-cuts on the surface for 500 feet. A narrower vein has been opened up, being one foot wide, carrying considerable copper pyrites, and runs into the main ledge as a spur, on which a tunnel of 40 feet has been driven. Average assays gave $33 gold and 1 1-10 ozs. silver, and $49.35 gold 17½ ozs. silver, 2 per cent. copper

The "S. F." lies between the G. A. R and D. A., in the direction of the strike on the G. A. R. vein. This location has been made on a vein of pyrrhotite.

The "O. B." has two distinct veins; one 25 feet wide which, from its strike and general character would seem to be the same vein as that on the Big Ledge, although sufficient has not been done to make this conclusive. The second vein has at present a width of nearly three feet. Assays have shown values in gold from $4.00 to $170.53, while a conservative sampling by Mr. S. S. Fowler, M. E. gave $20.00 in gold.

On the "S. H. B." are two converging veins of copper and iron pyrites, on which work is now being done. An average assay gave, gold $1.50, silver 16¾ ozs., copper 11.96 per cent., or $40.44 for all values.

The "Fred D." was located in December, 1895, more as ground for a basis for mining operations for the other claims than for its present value, although there is little doubt that the large vein on the O. B. runs through it. There is a small vein of galena on this claim.

The "J. A. C." has a large iron-capping running through it from the Anaconda, at a depth of a few feet. The ore carries a considerable percentage of of copper and $10 in gold.

The remaining six claims are all good prospects, but as yet very little development work has been done on them.

This company is registered under the Companies Act, 1890, and amending acts, in the office of the Registrar in Victoria, B. C., for 1,500,000 shares at $1.00, non- assessable, of which a portion of the Treasury stock is now offered at 10 cents a share on application to the company.
