MR. CHAMBERLIN'S VIEWS.

Mr. Chamberlin, receiver of the Washington Central railway, after passing through the Kettle River country recently, gave expression to the following views to a Spokesman-Review representative:

"The great need of the country is railway transportation. I was surprised to see how easy of access that section is to railroads. The grades are easy, and it is evident the country already has a vast amount of tonnage in sight. Freight is now being hauled in there from three railroads—from the terminus of the Central Washington at Coulee City, from the Canadian Pacific via Penticton, and from Marcus on the Spokane Falls and Northern. The vastness of the country and its resources cannot be realized until one goes there and sees for himself. It will be to the interest of Spokane business men to become better acquainted with the country and its adventurous people. The business man who is thinking of taking an outing can not do better than to combine business and pleasure by taking a trip into that section."

When a successful railway man like Mr. Chamberlin tells us that all that Boundary creek needs is railway transportation to ensure its success as a great mining country, his words convey much encouragement to those who are so strenuously endeavoring to build up the country, and no doubt will also carry weight with outside business men and capitalists. Those thoroughly acquainted with the varied resources of the district, have for some time past recognized the fact that a vast amount of tonnage would be insured any railway entering the Boundary Creek country, and now that railway magnates themselves are beginning to look at the matter in the same light, the fact may we think be relied upon that the time is not far distant which will see this vastly rich mineral country connected with the outside world by not only one, but two or three lines of railway.

ALL SAME WHITE COURT.

The Indians are proverbially fond of aping the manners and customs of the whites, and now that Louis Jim, who aspires to be chief of the Okanagans, rules at Black Town, our judges will have to look well to their laurels, for their judicial functions are in danger of being thrown into disuse by the action of the dusky potentate who rules with such a high hand within the sphere of his influence.

The other day, having cause to suspect some Chinamen who were placer mining upon a creek within reach of his domain, were driving a lucrative business selling whiskey to some of his subjects, the would-be chief sent out his officers, with the result that two Chinamen were arrested and brought up, charged with having supplied whiskey to a klootchman, or Indian woman. The evidence adduced being of a very positive character, Judge Louis Jim exercised his self-constituted authority and fined the almond-eyed offenders $10 each, which they, fearing other and more direful punishment, paid cheerfully and went on their way rejoicing.

REID ON THE MONEY QUESTION.

Before the Republican Editorial association, assembled at Canton, Ohio, a letter was read which emanated from the pen of Whitelaw Reid, editor of the New York Tribune. Mr. Reid, touching upon the subject of currency, which the democrats are endeavoring to make the one great issue of the coming campaign in the United States, exhorts his fellow editors as follows:

"I hope Ohio editors will deal with this matter in a straightforward fashion and call a spade a spade. Many of our opponents are as sincere as we, and mean to be as honest; but the thing they want is the wickedest, most immoral public act since secession. To pay the national debt in silver, to pay private debts in silver, to nullify and declare invalid any contract, however honestly entered into for paying gold, and to turn 53 cents' worth of silver into a dollar at our mints as often and as long as any silver mine owner at home, or any silver-burdened Chinaman or Hindoo from Asia chooses to bring it to us; to effect all this is simple robbery. To ask intelligent, honest men to vote for it is to insult them, as well as to declare that the people have the right to overrule Mount Sinai at the polls and reverse the moral law if they want to. Dishonesty never pays. There's a dozen ways of proving it in this case. But first, do make the moral nature of the proposals clear to the average voter, and there should be no more doubt of the verdict this honest, Christian nation will give than there is of to-morrow's sunrise.

"Then if you like, it may be well to go further and show, for instance, that a real nation, a mere colony or an isolated province cannot get on with what our New York candidate for governor called currency that cannot stand salt water. We sell now more than fifteen times as much of our products to gold countries as we do to silver countries. Do we want to take pay for this wheat, beef, pork, cotton, corn, etc., not as now, in gold or its equivalent, but in silver bullion to be given free coinage at our mints? This becomes a question, not so much of paying silver, but of taking silver.

"Is the great American republic to seek to hold towards all Europe such financial relation as India now holds towards England, or a worse one? Surely fresh water currency is only fit for people content with fresh water commerce. You can make free silver men see from the past history of every nation that ever tried it, that while making more money does inflate prices, it works both ways. It raises prices for what they have to buy as well as for what they have to sell, and is apt to raise the former first and highest. The grocer raises his figures long before the day laborer can have his wages advanced; and labor never really catches up till the inevitable crash comes and both tumble together. Cheap money never did cheapen the necessities of life, but it cheapens men. Look at Mexico, China, India.

NEW TUNNEL.

The Okanagan Outlook says the big tunnel has been started that is to tap the Black Bear, War Eagle and several other mines situated on Palmer mountain, which in its turn is situated just west of the Okanagan river. By the driving of this tunnel it is expected the different ledges of the several claims will be tapped at a depth of a thousand feet or more, and as very rich ore has been taken out of some of them, the significance of exposing the different ore bodies at such a depth can readily be understood and appreciated. The driving of the tunnel is by far the most gigantic piece of work undertaken in the western portion of the State of Washington for many a day, and it is needless to say its progress into the mountain will be watched with great interest by the mining fraternity generally. Should the ore bodies, which are of a free milling character, be encountered as expected, it is hard to say what amount of impetus would not be given to the industry of gold mining in that section, as also to the adjoining territory on this side of the line. It is greatly to be hoped that those who are courageous enough to put their money into the enterprise, will be richly rewarded, and if so they certainly will have deserved it.

RECORD CLIPPED.

At Glen's Falls, New York, on September 10th, John R. Gentry, the famous pacing stallion, won the first and second heats in a match against Star Painter for $5,000, in the phenomenal time of 2.02¼ and 2.01¼ for the mile. Upwards of 7,000 people witnessed the race, which may truly be looked upon as the most extraordinary performance up to the present time. This places John R. Gentry upon an equal footing with the world's record made against time by Robert J. at Terre Haute two years ago. It is reported that Gentry will soon be sent in an effort to make 2.01 against time, which if made would place him at the the top of the world's record-breaking pacers.

LI AND THE IRISH.

The great Chinese statesman has corrected his remark about the Irish and claims it was the result of a misunderstanding, he having made a joke in answer to a question in an interview which was not understood by him. This explanation no doubt will soothe Pat's ruffled feelings, yet many will be inclined to take it cum grano salis, and the reflection will stand to Pat's credit for many a day to come.

SEATTLE BANKS AND CANADIAN MONEY.

For the future the banks of Seattle will refuse to accept Canadian money except at a discount, and no doubt similar institutions throughout the length and breadth of the States will adopt the same policy. The Seattle Post-Intelligencer, in an editorial upon subject, declares the action was taken not in a spirit of retaliation, but on account of the annoyance and loss which the acceptance of Canadian money at par entailed upon the institution in question. It says: "The banks, to get rid of it, have been forced to ship it to their correspondents in British Columbia, paying express charges on it. They are given credit for it, but in any settlement of accounts they would be paid in Dominion bills, which, of course, are not legal tender on this side and are redeemable in coin only at Ottawa. So long as the amount of Canadian money in circulation on this side was small, the Seattle banks accepted it for the purpose of accommodating their customers."

EDITORIAL NOTES.

IN A former issue we had occasion to refer to what we considered a mistake on the part of the government in appointing Mr. G. M. Sproat a stipendiary magistrate for the Kettle river mining division of Yale district. We notice the Rossland Miner takes the matter up and gives expression to views very similar to those entertained by ourselves. Since commenting upon the subject, matters have taken a very precipitate turn in this district, for at the present time no less than five petitions are in circulation, four of which favor the creation of a new appointment, and the fifth, the removal of Mr. C. A. R. Lambly, who is already a stipendiary magistrate as well as gold commissioner, from Osoyoos to Midway or some other point on Boundary creek. Just what action the government will take in the face of so much pressure it is hard to determine. Undoubtedly the majority of miners in this section of the district, for the sake of their own convenience, would prefer the gold commissioner's residence much nearer than it is at present, but it is to be hoped no precipitate action will be taken by the government, for undoubtedly other sections of the community have a right to consideration, even if they are, as at present, in a minority. The rapid development of the country, and consequently the vast increase of judicial work, naturally suggest the necessity of a resident stipendiary magistrate, but before the government takes action in the matter one way or the other, they may be relied upon to give to the question an earnest consideration, and will not, we are certain, appoint any one to the position who has not the entire confidence and respect of the community.

A REPORT is current to the effect that Mr. Heinze has failed to float the bonds for the building of the Columbia and Western railway. Whether such is the case or not we are not in a position to say. One thing is certain, however, and the fact should not be lost sight of, and that is he has four years in which to build the road, so that if he has immediately failed to procure the necessary funds wherewith to start construction, that does not give any guarantee that they may not in the near future be forthcoming. In the meantime another corporation is in the field carrying on active operations in the matter of making a preliminary survey for a line, which it is proposed to build from the coast to the Columbia river, which would pass through this district, and this being the case, if eventually Mr. Heinze is not successful and cannot procure funds for the construction of the Columbia and Western railway, we may yet hope for the best, and take comfort from the fact that not alone is he in his desire to furnish railway transportation to this section, which at present is receiving recognition at the hands of not only one or two, but several railway corporations.

"THE whole country is staked," was the common expression among miners two years ago; yet last year prospectors went to work and discovered, located and recorded over seven hundred mining claims in this di trict. Having done so much last season, many were dubious as to their success this year, yet what do we find? Up to the present, and it is now only the middle of September, over one thousand claims have been recorded in the Midway office alone, and every day sees a large number of fresh records being made, which shows that prospectors are yet in the hills busy at work, and that success still crowns their efforts. What this all means may readily be conceived if the slightest thought is given to the subject, for, if only one per cent. of the prospects recorded eventually becomes mines, the near future will see no less than thirty or forty dividend-paying properties in the Boundary Creek district alone. Thirty or forty dividend-paying mines would support many good sized towns, give employment to several smelters, furnish transportation for more than one line of railway, and would in fact build up a community the size and importance of which would make itself felt throughout the length and breadth of the land. Such are the prospects in store for Boundary creek, and from the present rate of development, it would seem, such a state of affairs may not be long in coming.

VERNON NOTES.

From Our Own Correspondent.

Mr. Samuel Morrow is down with malarial fever at the Victoria.

Lord and Lady Aberdeen are expected here about the end of the month.

Mr. Thomas Godwin is now pronounced out of danger, and is on the mend. Tom has had a close shave.

Assessment work is being done all around, and from the present outlook very few locations will go by default on that score.

In spite of the numerous cases of sickness in town, the water question remains status quo. "How long, Oh Lord, how long?"

Hop picking is now in full swing at the Coldstream ranch, between 600 and 700 Indians being engaged in that occupation. The most perfect order prevails, and as yet not the slightest evidence of the disturbing influence of fire water has been observed.

Messrs. Gid. Milligan & Co. are doing development work on the Bachelor claim. They purpose running a drift 40 feet and will then sink a shaft. The ore in this claim is similar to the Morning Glory, and the mine will no doubt prove as valuable a property.

An entertainment is to be given by a number of the school children during the fair in aid of a school library. Rehersals are being pushed along with much enthusiasm, under the direction of Miss Coughlan and Mr. Harry Knight. From what I can glean, the performance promises to be unique.

Mr. John Jones returned from his initial trip as guide last Friday. Johnny was quite a success in his new role, as he was able to obtain some good shooting and fishing for Mr. McPherson, a Scotch traveler, who expressed himself highly delighted with the trip, as the contry reminded him of his ain lochs and fens so much.

Messrs. Simmonds & Costerton are engaged developing the Bon Diablo. They are thoroughly convinced that this claim will turn out a good devil yet, though his satanic majesty has frequently shown his horns since they made his acquaintance. I understand Lord Sudeley is going to take a share in the development of this mine.

Apropos of the B. C. game laws, a supreme court judge residing in the suburbs of Vernon, who is an ardent sportsman, was looking forward with considerable eagerness a few weeks ago to the promised elucidation of them by the ADVANCE. He was not surprised, only disappointed, when the ADVANCE, like the remainder of the press of the province, had to regard the act as a conundrum.

The first application for a crown grant for a mine in the neighborhood of Vernon has been made by the Messrs. Morden, for their mine, the Morning Glory. They have incorporated the mine and are selling stock, which is being taken up very satisfactorily. A good 8 by 8 shaft is down 40 feet, and the rock improves steadily as it goes down. There is no doubt the Morning Glory is a bonanza.

Mr. Cuppage, the newly appointed road superintendent, spent a few days in town last week. Mr. Cuppage is, I think, just the man to fill the bill—active, energetic, with good executive ability, and the appointment ought to give general satisfaction. Of course there are some cavilers who imply he obtained the position through the influence of the agent-general; be that as it may, if the Hon. Forbes George did put in a good word for his young kinsman, is is certainly only natural, were it otherwise, Mr. Cuppage would be excused for crying "give me more of kith and less of kin."

CROWN GRANTS.

When applying for crown grants for mineral claims, request that the same be advertised in THE ADVANCE, the officially recognized paper of the district.

A New Drug Store

We beg to inform the public that we have opened our new Drug Store and solicit a share of their patronage.

Buying drugs is entirely a matter of confidence, as in no other business is sophistication easier; nor does any other avenue afford so ready a means of disposing of worthless articles.

You can buy a pair of shoes for $1 or for $10. It is entirely a matter of quality. There is as much difference in the quality of drugs as there is in shoes, except in purchasing one you can use your own judgment, and in buying the other you are entirely dependent upon the integrity and judgment of the druggist. In one case it is only a matter of comfort and appearance, and in the other frequently of life or death.

If you want the purest and best drugs obtainable, we solicit your patronage; if you want the cheapest, we cannot accommodate you.

If you need medicine, you need the best and purest obtainable, compounded by a skilled and experienced prescriptionist, with the most scrupulous care and fidelity.

Human life may be in the balance and dependent on the prompt action of the remedy prescribed; and if the latter be not of standard strength and purity the physician's skill is of no avail, and the patient fails of improvement.

We carry a full line of patent medicines, invalids' specialties, toilet requisites, etc. in great variety.

Mail orders receive prompt and careful attention, and anything not in stock will be procured at once without extra charges.

Dated this 1st day of July, 1896. 25

DISSOLUTION OF PARTNERSHIP.

NOTICE is hereby given that the partnership heretofore existing between the undersigned in carrying on the hotel business at the Pioneer Hotel in the City of Greenwood, British Columbia, has been dissolved by mutual consent, J. M. Hubbell retiring. All debts owing by the partnership will be paid by Frank Wood and J. W. Nelson, to whom all debts due and owing to the late partnership are to be paid.

FRANK WOOD.
J. W. NELSON.
J. M. HUBBELL.
PHILIP WESTEL.

Witness, C. W. H. SANSOM.

Dated 30th July, A. D. 1896. 21

LOCAL AND DISTRICT.

Mr. John S. Harrison of Greenwood City has been appointed a notary public within and for the Yale electoral district.

Mr. Joseph Frank has rented Lequime & Powers' sawmill, and under the new management everything and everyone around the mill is being run under high pressure.

The ladies of Midway and the Thirteen club gave a birthday hop Saturday evening, the occasion being the anniversary of Mr. J. McNicol's birth. About thirty couples were present.

Mr. Neil McCallum of Grand Forks was a visitor in town on Friday. Together with other associates, Mr. McCallum will soon place upon the market some of the largest mining properties in the Kettle River district.

Mr. E. S. Graham, after spending a few days in Midway, during which time he visited his mining properties on Ingraham mountain, to see that satisfactory progress was being made in development, passed out to Spokane on Wednesday's stage.

Mr. C. A. R. Lambly returned from Grand Prairie on Thursday last and proceeded home to Osoyoos Friday. Owing to the vast amount of development going on in the district, Mr. Lambly's duties as assessor are multiplying very rapidly so much so in fact, that a great portion of his time will have to be given up to the compilation of the assessment roll.

Mr. John Campbell, of the firm of Wilson & Campbell, Victoria, came into Greenwood City from Rossland on professional and other business on Thursday last. As a professional man Mr. Campbell is well known in nearly every part of the province, and as many of the firm's clients reside in the district, no doubt his sojourn in our neighborhood will be something more than a pleasure to him.

Mr. James Holden, Jr., of the firm of Ames, Holden & Co., of Victoria, passed through the district on a business trip last week, and although it was the first time the firm had had a representative in the field here, a very good stroke of business was done with the several merchants. Vancouver and Victoria houses are beginning to appreciate the value of business at present transacted with Spokane houses.

For a few days the complete stage connection Midway had enjoyed for some time past was broken, owing to Messrs. Manley & Averill making the terminus of their line at Anaconda. Now, however, matters are running smoothly again, as Messrs. Emmett & Spawn, the new proprietors of the line, who have recently purchased Messrs. Manley & Averill's interest, have renewed connection with Midway, and are rendering a valued service, which it is to be hoped is a lucrative one to themselves.

Mr. Goepel, inspector of government offices, came over from Rossland, and after making a thorough examination of the books and accounts of the office here, passed on to Osoyoos and points north on Monday last. Mr. Goepel, interviewed, expressed himself as highly pleased with this section of the province, which he visited for the first time. He considers it unquestionably has a great future before it. Although the auditing just completed was the first to which the books of this office has been subjected, Mr. Goepel found everything in apple-pie order, and was struck with the methodical and systematic manner in which everything is kept by the officer in charge.

The Vancouver and Fraser Valley railway survey party, under the guidance of Mr. Brownlee, has shifted its base of operations from the vicinity of Okanagan lake to Pass creek, a tributary of Boundary creek. Their object in doing so was no doubt a desire to thoroughly explore the pass leading from Boundary creek to the North Fork of Kettle river during the prevalence of fine weather, as it will be found a much easier task now than when winter sets in. The country being more open, they can return later to the Okanagan, and lay out a route over the divide between the Okanagan and Kettle river valleys. Up to the present time, the engineers have met with no insurmountable obstacles between the coast and Boundary creek, and no doubt the country between Boundary creek and the Columbia river will be found equally accessable for purposes of railway construction.

On the subject of the seat of the brain and the proper diet for the different callings in life, at a home on Anarchist mountain, where one of the Presbyterian students was having a "square," the head of the house thus unloaded a few ideas: "Pass the carrots pass the cabbage; nothing like vegetables. They say the seat of the brain is in the head. All d—d humbug! Where d'spose 'tis? Why, in the lining of the stomach, of course. That's where 'tis! Take a prize fighter; he wants beef, plenty of beef; that's the stuff for him. The preacher? Why, he wants lots of pepper and lots of pork. Pepper to give him life and vim, and pork to give him stability of purpose to combat evil. Lots of pepper and lots of pork if you want more Christians and fewer politicians. Of course the brain is in the lining of the stomach!" The young preacher hasn't yet started on the pepper and pork diet.

Mr. C. L. Thomet is making arrangements to enlarge his dwelling house here, and the boys are whispering the enquiry, what does it all mean?

The Rev. Mr. Robertson is making a collection of rattler skins. He now has several fine specimens, one measuring nearly six feet. Some members of the Thirteen club have lately been trying to make a similar collection, but the serpents have somehow managed to evade them.

Mr. P. B. Nelson, one of Carson's genial merchants, paid Midway a visit on Monday last. Mr. Nelson reports an increased activity in mining on the Colville reservation, as a great number of men who have been engaged in prospecting during the summer are now settling down and are developing their claims.

Now that an assurance has been given to residents that water will be put upon the townsite here, real estate is rapidly changing hands, quite a number of lots having been sold the past week by Mr. Stuart, the townsite agent. The property is being sold upon building conditions, and already no less than ten new residences are assured, if the company fulfill their portion of the contract.

MINING NOTES.

It is stated that within a short time the Olive Mining company will put to work no less than 100 men upon their property, which is situated on the North Fork of Kettle river.

Mr. Edward Cronan and Mr. Stanley Pelham, two prominent mining men just over from of Rossland, passed up the main Kettle river on Saturday, their intention being to look at some mining properties there.

Messrs. John Douglas and J. Atwood left on another prospecting excursion on Saturday, and will before returning pay good attention to the country on the main Kettle river in the neighborhood of their recent rich strike. They are evidently after another bonanza.

Mr. George Riter, an old pioneer of Copper camp, has disposed of one of his claims, the Honolulu, to Mr. A. E. Digby of London, England, for the sum of $2,500, 10 per cent. of which was paid down, the balance to be forthcoming before the 1st March, '97.

A. L. Lech, of Peterboro, Ontario, is operating in the district, and is actively bidding for mining interests. During the past week he secured a third share in two valuable claims—the Boundary Falls, which is situated upon Boundary creek, near the town of the same name, and the Spotted Horse, which lies adjacent to Greenwood City. The interests were secured from Mr. H. Hemlow, and the consideration paid was $3,000.

A SAD EVENT.

A report is generally current, the authenticity of which, however, we are not in a position to verify, that an extremely sad event occurred at Keremeos on Monday last, when, during a fit of temporary depression, Mr. Thomas Daley of that place committed the rash act of taking his life. It would seem that for some time past the deceased had not been in the best of health, he having found it necessary to visit the coast in search of medical treatment. The deceased was very generally known throughout the province, as his long sojourn in the country entitled him to be classed among the old-timers.

Before settling at Keremeos, Mr. Daley saw much service during the construction of the C. P. R. on the Onderdonk contract, upon the completion of which he moved to Keremeos and taking up land upon the Similkameen river, set about to build himself up a home, which he most effectually did, as the estate he leaves behind him has few superiors in the neighborhood.

The deceased leaves a widow and four children, whose sorrow will be shared, and who, in their bereavement, will receive the sympathy of a large circle of friends and acquaintances.

THE NATIONAL

MATTE SMELTER.

A PRACTICAL AND SIMPLE METHOD of matting sulphide ores, such as nickel, copper, gold and silver ores. In localities where lead ores and fuels are scarce and almost unattainable, our pyritic, water jacketed Matte Smelter has been recognized with highly satisfactory results, and has been thoroughly tested on various pyritic, sulphide and arsenide ores, in capacity of 2 to 50 tons of ore per day. It is the most practical, cheapest, and simplest method of gold and silver ore matting and concentrating that is known today.

It requires no extraordinary skill, no lead ores, no fluxing material, and no fuel of any kind for the smelter after it is started. The sulphur in the ore is its natural fuel only, and its cost has no comparison with any other process of concentrating.

We are prepared to furnish any size or capacity plant complete to a substantial mining people, set it up and furnish our men to run it for them on easy payments. Prices and specifications furnished with references and testimonials on application.
