ASPEN GROVE DEAL.

Big Dutchman, Golden Sovereign, and Cincinnati Sold.

A recent arrival from Aspen Grove brings the news that Messrs. Bate Bros., have sold three important groups of claims in that camp to an Indiana company, the purchase price being $135,000.00.

A. W. Wright, of Terre Haute, Ind., put the deal through. The Big Dutchman and Golden Sovereign groups are situated about half a mile east of the Big Sioux. The Big Dutchman group is composed of four claims, through which a strongly defined lead carrying copper glance and native copper, is traceable for a length of 2000 feet or more. This mineralized zone has been exposed for a width of 150 feet by means of open cuts.

The Golden Sovereign group, which adjoins the Big Dutchman, has produced some remarkable specimens of native copper, nuggets weighing as much as 100 lbs. having been met with in doing development work. This group is composed of five claims. Its ore showings are separated from the Big Dutchman by a dyke of limestone.

The Cincinnatti group lies two and a half miles south of the Golden Sovereign. A tunnel has been driven on this group for over 300 feet in an endeavor to strike at depth an ore body cropping higher up the hill.

A very promising lead was run through near the mouth of the tunnel. Surface stripping has exposed a large ore body on this group, from which excellent copper assays are obtained.

The highly satisfactory results of the development work which has been done on the Portland claim by an Indiana company, is thought to be responsible for the making of the present large deal. On this claim a shaft has been sunk 110 feet in ore, and crosscut for 25 feet without meeting any walls. Assays are said to run $54.00.

Like all claims in Aspen Grove camp, the principal values are in copper.

Freighters are busy hauling lumber from the saw mills here, for a number of new buildings going up at Hedley City.

F. S. Findlay, representing the Hudson's Bay Co., and H. T. Lockyer, the Vancouver manager, came up the river Thursday from Keremeos.

Mr. Bert Thomas and bride, nee Miss Grace Allison, returned on Saturday last over the Hope trail from the coast, where they had been united in marriage. The STAR joins their many friends in wishing the happy couple a long life of prosperity and happiness.

PRINCETON COAL.

Davis-Calyx Drill Explores New Ground.

Mr. Ernest Waterman resident manager for the Vermilion Forks Mining and Development Co., operating a Davis-Calyx drill here, reports having struck coal in their third drill hole at a depth of 301 feet. The seam is 4 ft. 9 in. thick, and of similar quality to that being mined in their tunnel. The drill hole is about 500 yds. up the Similkameen River from where the first hole was sunk, and the seam pierced crops above the 24 ft. seam in which the tunnel has been driven. It is estimated that on account of the angle at which the sandstones dip, it will be necessary to drill 70 or 80 feet yet before striking the tunnel seam.

Mr. Waterman says that with the seams exposed in the tunnel and those cut by the drill, they now have accurate knowledge of the existence of six seams and the positions in which they lie. These seams which are all within 310 feet of the surface in this portion of the basin, will aggregate in thickness over 63 feet.

Messrs. Pouwels and Bonnevier are working in the new tunnel near the Similkameen bridge, which is now in 170 feet. Four feet of fine looking coal is exposed in the face of the drift, and another 11 feet of tunneling will strike the old workings.

In order to encourage the more general use of the coal for domestic purposes, Mr. Waterman agrees to give a ton of coal at the tunnel mouth to anyone putting in a coal stove. As a ton of coal will easily last as long as three cords of wood, the advantage of making the change will be readily apparent.

TULAMEEN DANCE.

Mr. Geo. Aldous, proprietor of the Hotel Tulameen, celebrated Hallowe'en night by giving a dance in the dining room of his popular hostelry. Owing to a heavy rain, a number of guests coming from a distance were prevented from attending, and the crowd was therefore smaller than it would otherwise have been.

Messrs. Knight, Dunsmoor and Hitchings furnished the music, and Mr. Aldous supplied refreshments. The dance broke up about 1 a. m. All present appeared to enjoy themselves thoroughly, and those who were unable to attend missed an excellent evening's entertainment.

Mr. W. Murray came up the river from Hedley last week, and left again on Saturday for Nicola Lake.

MAY BE BUILT HERE.

A Smelter for Treating Ores of Nickel Plate Mine.

M. K. Rogers of the Nickel Plate mine, in Hedley camp, is reported as having said recently that unless the company of which he is a member is able to arrange for a portion of the Indian reserve adjoining Hedley City townsite, they may possibly erect the smelter for the treatment of their ores at this place.

One of their chief reasons for building here instead of further down the river would be on account of the cheap fuel here, in the form of unlimited quantities of excellent coal.

Another attractive feature would be the likelihood of getting custom ores to treat, from the different camps surrounding Princeton.

There are a number of properties on Copper and Kennedy mountains, about 12 miles up the Similkameen, from which large quantities of ore could be extracted by open quarrying. A tram line from this place could bring this ore to a smelter here at a very small cost.

A PROMISING PROPERTY.

Mr. J. Beaver, owner of the Diamond B. claim on Wolf Creek Mountain, has been engaged for some time sinking the shaft on his lead to a greater depth.

The vein of white quartz which he followed from the surface dips to the south, and only the foot-wall shows at the bottom of the shaft. To the north of this first lead, which is about four feet wide, the shaft cuts about two feet of diorite heavily impregnated with iron, and enters what appears to be a second quartz lead dipping at about the same angle as the first and carrying like values in gold, copper, silver and platinum. The second lead shows a width of six feet with only the hanging wall in sight. It is possible that the two feet of diorite intervening between the veins is only a horse that may work out with greater depth. As the property now stands there is 10 feet of ore of good workable grade in sight.

Mr. Beaver intends going down a short distance further, and then cross-cutting to determine the exact width of his ore body.

Mining Recorder Hunter returned late last week from a trip to Fairview and Hedley City.

The young man arrested for stealing mail matter at Fairview has been sent to Kamloops for trial. His name is McRostie.

LOCAL AND PERSONAL

Brief News Notes of Princeton and Vicinity.

Messrs. W. Martin and J. Pollard returned on Saturday last from Boulder Creek, where they have been placer mining for the past few months.

Mr. C. E. Thomas is circulating a petition for a mail service between this place and Penticton, which is being very generally signed.

Mr. Angus Stewart, who has been acting for some time as night engineer at the Stemwinder mine in Fairview camp, is back to Princeton again until the stamp mill resumes operations.

Mr. Jno. Love, the Fairview druggist, whose face and hands were severely burned at the time the Hotel Fairview was destroyed, is said to be rapidly recovering from his injuries, and will not lose one of his hands, as at first feared.

Mr. C. P. Eagan, representing J. W. Peck & Co., wholesale clothiers and furnishers of Vancouver, visited town late last week with full a range of samples.

Messrs. Hitchings, Knight and Wampole, are taking advantage of the first snow of the season, to hunt deer on Nine Mile Creek.

On Sunday there will be service at Granite Creek at 7:30 p. m., and at Princeton 10:45 a. m. Everybody heartily invited. Sunday school at 9:45 a. m. On the following Sunday service will be held at Hedley City.

HOTEL ARRIVALS.

ALLOWED TO CROSS.

A meeting of the Railway Committee was held in Ottawa on Oct. 28th, for the purpose of considering the application of the V., V. & E. for the right of crossing the Grand Forks & Kettle River railway, which runs from Grand Forks to Republic. The fight was really between Hill, who controls the V., V. & E. charter, and the C. P. R., which is interested in blocking the progress of the American company. Hon. A. G. Blair, chairman of the railway committee, who recently visited this country decided in the face of strong opposition, that it would be in the interests of this country to allow the V., V. & E. a crossing.

Mr. Blair had better use greater caution. The interests of the people are not usually considered at Ottawa when they conflict with the interests of the C. P. R. In creating a precedent of this kind he is likely to turn the great corporation back to its first love—the party of Sir Chas. Tupper; or worse still, pressure may be used to give his position to Clifford Sifton, the Minister of Interior, who was never yet known to refuse the C. P. R. anything it wanted.

COAL AND OIL.

Statements have been freely made during the past year that coal was destined to be driven completely from the market for steam and fuel purposes by oil. The discovery of wonderful oil wells in Texas and California, and its utilization for the purposes mentioned, led to these predictions. It was so cheap and so abundant that a number of railway and steamship companies adopted the new fuel, and a thorough test was made of it. Under these circumstances it is interesting to note that the United States navy has rejected oil as a steam fuel, and is again using coal.

The Southern Pacific Railway, which penetrates the oil fields, and has had every opportunity to test the relative merits of the two fuels, has returned to coal, after having expended a large sum on its engines converting them into oil burners, and has recently renewed its purchases of 25,000 tons of coal per month.

From a consideration of these facts we may well conclude that the replacement of coal as a fuel is yet in the far future.

EDITORIAL NOTES.

Until after the appearance of last week's STAR it seemed impossible to get an accurate account of the Fairview fire. All particulars were received second hand, and this accounts for the errors made in one or two of the names given of killed and injured.

Hedley City seems to be the Mecca of the Similkameen these days. The construction of the stamp mill, flume and tramway by the Nickel Plate Company, is responsible for the interest at present being taken in that place.

The Slocan is rejoicing over the market that is being opened for its zinc ores in the States. In place of being a detriment to the ore the rebellious black jack seems about to become a source of profit. The ores of Summit camp in the Hope range contain a considerable percentage of zinc.

The Phoenix Pioneer says:—"If one can believe the stories that come from the political hatchery at the coast, Premier Dunsmuir is in a quandry whether to resign or not. And meanwhile the other politicians are already fighting over spoils which they see in sight when a new deal is made. That's a great game they play at Victoria, and as far as the up-country goes, it's always, 'Heads I win, and tails you lose.'"

NOTICE.

A sitting of the County Court of Yale will be held at Princeton on Monday, October 13th, 1902.

By Order,
HUGH HUNTER,
Registrar County Court

Princeton, July 12th, 1902.

The above Court is postponed until Novembe 17.

NOTICE.

Notice is hereby given, that application will be made to the Parliament of Canada, at the next sittings thereof, for an Act to incorporate a Company, under the name of the "Vancouver and Coast-Kootenay Railway Company," to construct and operate a line of railway from a point at or near the City of Vancouver, thence southeasterly to the City of New Westminster and across the Fraser River, thence easterly by the most feasible route, to a point at or near Midway, in the Boundary Creek District; from a point on the main line of the railway south of the Fraser River, to a point at or near the mouth of the Fraser River; from a point on the main line east of Hope, to a point at or near Nicola Lake; and from a point on the main line of the railway at or near the City of Vancouver, northerly across Burrard Inlet, at the most feasible point, to North Vancouver Municipality, thence westerly to a point at or near the mouth of the Capilano Creek.

WITH POWER to construct and operate branch lines, from any point on the main line of the proposed railway or branches thereof not exceeding in any one case thirty (30) miles in length; and with power to construct, own, and operate, wharves, docks, elevators, and warehouses, in connection therewith; and to own, construct, and operate steam and other vessels, on any navigable waters; and with power to construct, own, maintain, and operate, a suitable ferry from the most convenient point on the mainland of British Columbia, to the most convenient point on the Island of Vancouver, so as to make connection with the City of Victoria, or to connect therewith by the same; to construct, operate, and maintain, telegraph and telephone lines, along the route of the proposed railway or its branches, and to transmit messages for commercial purposes, and to collect tolls therefor; to generate electricity for power and lighting purposes, and for all rights, powers and privileges, necessary, usual, or incidental to all or any of the aforesaid purposes.

Dated at Vancouver, B. C., this 1st day of October, 1902.

John Mitchell.

John Mitchell might pass for a priest or a clergyman. He wears a wagon-wheel collar, a black necktie, a long Prince Albert coat of a bygone vintage, black trousers, and a black slouch hat irregularly dented at the top. His large, round face has an intense expression. His eyes and hair are jet black, his features regular and expressive. He is below the average height, but his diminutive stature is forgotten when he speaks. His words are incisive, his articulation perfect and pleasant. even musical. His vocabulary equals that of any polished, professional man. He avoids all positive statements, and, when addressed, listens with the closest attention. Though during the past 30 days he has been the most prominent figure in the United States, little is known of his history. He is 34 years old and was born in Braidwood, Illinois, a little mining town. His father was a miner in the bituminous coal fields of Illinois. He went to the public schools until his fifteenth year, when he began working in the mines as a miners' helper. He was married shortly after he attained his majority, and settled down at Spring Valley, Illinois, where his wife and four surviving children still reside. One of his children died. He was always a union miner, as was his father. He began to be prominent in the United Mine Workers of America in 1897, when he was elected national organizer. In the following year he was elected national vice-president. In October, 1898, when the president of the United Mine Workers was given a place on the labor commission by President McKinley, John Mitchell became the acting national president. In 1899 he was elected national president, and each year since that date he has been honored by re-election. Mitchell's forefathers were Scotch Presbyterians; his wife, however, is a Roman Catholic.

Health is Capital

Health is capital as truly as money is, and the man who so regards it will be as careful in its expenditure, as cautious in its investment, as prudent in husbanding its resources, as the financier is in the management of the principal from which he derives his income. Many persons have no other capital than health. The strength they use in their daily business may secure a comfortable living so long as it remains unimpaired, but once let the health springs be exhausted by carelessness, improvidence or too lavish expenditure, there is but one way to replenish them—right living and rest. Wealth accumulates by saving, and just in the same way health comes from saving strength, not wasting it upon trifles, not exhausting it in too severe or too prolonged efforts; by recuperating in rest and sleep, by taking such exercise and food as shall invigorate instead of depleting the physical powers. It is never wise to work to the extreme limit of one's ability. When weary, rest; when exhausted, sleep. The whole man will be recreated by it. It is by spending less than his income, by turning his honest pennies over and over, reinvesting as they accumulate, that a person builds up his fortune.—New York Ledger.

Familiar With the Work.

An Irishman out of work applied to the "boss" of a large repair shop for a "job." After quizzing him for some time, says the Pittsburg Bulletin, the superintendent put him this question:

"Do you know anything about carpentry?"

"Sure, I'd like to see the man can bate me at it."

"Do you know how to make a Venetian blind?"

"I do that!"

"Tell me, then, how you'd make a Venetian blind?"

"Sure, I'd poke my finger in his eye!"

THIRD FURNACE.

Granby Smelter to Blow It in Soon.

The good news comes that the management of the Granby smelter is making preparations to put a third furnace in blast in a day or two. This will make the daily output of the smelter over 1,000 tons—something that has not occurred since May last, before the accident in the Fernie coal mines. It is now certain that in a short time the Granby's fourth furnace will be blown in, making seven all told in Boundary's smelters, and which will reduce a good round 2,500 tons per day.

Orders have been received at the Granby mines to begin sending out 1,000 tons or more daily next Monday, and the railway officials are preparing to handle the increasing tonnage.—Phoenix Pioneer.

Simple Politics.

The following monologue of an old-time colored voter, printed in the Atlanta "Constitution," burlesques a state of affairs that to a certain extent may have existed in some parts of the South long ago:

Politics hez changed mightily in dis country. Hit's all diffunt. De time wuz when Marse Bill would mek up his min' dat he wanted a office, and he'd shoulder his shotgun en walk right in de middle er de crowd en say.

"Boys, dat's de office yander, ain't it?"

"Yes," dey'd say, "dat sho' is it!"

"Well, I'm done 'lected ter dat office, ain't I?"

En dey'd all speak up ez one man, "Co'se iyou 's 'lected ter it! Go 'long in dar en hang yo' hat up en shet de do'! What yo' stan'in' roun' heah fer, anyhow? Go 'long in whar yo' b'longs!"

What It Taught

A gentleman visiting a minister was asked to attend a Sunday school at his host's church, and address a few remarks to the children, relates the Scottish American. He took the familiar theme of the children who mocked Elijah on his journey to Bethel—how the youngsters taunted the poor old prophet, and how they were punished when two she bears came out of the woods and ate forty and two of them.

"And now, children," said the speaker, wishing to learn if his talk had produced any moral effect, "what does this story show?"

"Please, sir," came from a little girl well down in front, "it shows how many children two she bears can hold."

Oriole and Spider Fraction Mineral Claims, situate in the Similkameen Mining Division of Yale District. Where located:—On Copper Mountain.

Take notice that I, S. R. Almond, Free Miner's Certificate No. B94414 and as agent for David O. Day, Free Miner's Certificate No. B93232; Thos. M. Day, Free Miner's Certificate No. B94412; Douglas M. French, Free Miner's Certificate No. B53392, and James Snowden, Free Miner's Certificate No. B56895, intend, sixty days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining Crown Grants of the above claims.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificates of Improvements.

Dated this 1st day of September, A. D. 1902.

S. R. ALMOND,

Notice of Forfeiture.

To ALEXANDER ALLAN, of Rossland, B. C.

Take notice that after the publication hereof once each week for ninety days, you fail or refuse to contribute your portion of the expenditure required by section 24 of the Mineral act, being chapter 135, Revised Statutes of British Columbia, 1897, in respect of the Crackerjack and the O. L. C. Fractional Mineral Claims, situate on Twenty Mile Creek, in the Osoyoos Mining Division of Yale District, British Columbia, together with all costs of advertising, your interest in said claims shall become vested in your co-owner Louis Hedlund, of Hedley City Free Miner, who has made the required expenditure. The amount due by you in respect of each of the said mineral claims, not including costs, is $35.65½.

Dated this 25th day of October, 1902.

LOUIS HEDLUND.

Notice of Forfeiture.

To SIDNEY M. JOHNSON, of the City of Greenwood, British Columbia:

Take notice that after the publication hereof once each week for ninety days, you fail or refuse to contribute your portion of the expenditure required by section 24 of the "Mineral Act," being chapter 135, Revised Statutes of British Columbia, 1897, in respect of the "June Bug" mineral claim, situate on Copper Mountain, in the Similkameen Mining Division of Yale District, British Columbia together with all costs of advertising, your interest in said claim shall become vested in your co-owner C. M. Snowden, of Princeton, Free Miner, who has made the required expenditure.

The amount due by you in respect of said mineral claim, not including costs, is $31.25.

Dated this 20th day of Sep., A.D., 1902

C. M. SNOWDEN.

Notice of Forfeiture.

To SIDNEY M. JOHNSON of the City of Greenwood, British Columbia:

Take notice that after the publication hereof once each week for ninety days, you fail or refuse to contribute your portion of the expenditure required by section 24 of the "Mineral Act," being chapter 135, Revised Statutes of British Columbia, 1897, in respect of the "Lone Star" mineral claim on Copper Mountain, in the Similkameen Mining Division of Yale District British Columbia, together with all costs of advertising, your interest in the same shall become vested in your co-owner, James Snowden, Free Miner, who has made the required expenditure.

The amount due by you in respect of the said mineral claim, not including costs, is $28.65½.

Dated this 20th day of Sep., A. D. 1902

JAMES SNOWDEN.

Notice of Forfeiture.

To GEORGE H. COLLINS, of the City of Greenwood, British Columbia.

Take notice that after the publication hereof once each week for ninety days, you fail or refuse to contribute your portion of the expenditure required by section 24 of the "Mineral Act," being chapter 135, Revised Statutes of British Columbia, 1897, in respect of the "Little Pittsburgh," "Whale," "Bullon Beck" and "Hicrence" mineral claims, situate on Twenty Mile Creek, in the Osoyoos Mining Division of Yale District, British Columbia, together with all costs of advertising, your interest in said claims shall become vested in your co-owner, Thomas Bradshaw, of Fifteen Mile Creek Free Miner, who has made the required expenditure.

The amount due by you in respect of each of the said mineral claims, not including costs, is $28.65½.

Dated this 15th day of August, A. D. 1902.
