THE MINING NEWS

OF THE PROVINCE FOR THE PAST WEEK.

A Year Prospecting in the Peace River Country—The Cinnabar Mine Near Kamloops—Hydraulicing on the Tulameen—Burke Mines to Be Developed—Cariboo News—Work in the Big Bend.

Mr. P. Teller, a California mining man has just arrived in town after spending a year prospecting in the Peace River country. Mr. Teller went in by way of Edmonton in company with three other men, and after proceeding as far as possible on horses, the river was used for navigation. He is highly pleased with the country, which he says possesses great mineral wealth, and it is his intention to return there next year.—News-Advertiser.

From the Kamloops Sentinel.

Several mineral locations have recently been made at Savonas.

J. B. McNab, of Savonas was in on Wednesday. He reports that the Cinnabar company has its retorts ready for work now, and already some of the rock retorted to quicksilver, the return being almost five per cent., which is considered a very large yield.

R. L. Hogg, manager of the Tulameen Hydraulic company, was in on Wednesday on business connected with the company. Though he started to develop this claim only this spring, he has had water on for about a fortnight, the first monitor to be put to work on Granite creek. The works are not extensive now, but he will prospect the bank by the hydraulic to see whether results will warrant the outlay on a more expensive plant. The Scott company, he says, are prospering well and expected to turn water on the day after he left, Tuesday last. R. Stevenson expects to put water on this season but if he does it will be a big summer's work. Mr. Hogg returns at once to Granite creek.

ALBERNI.

From the Daily Colonist.

Some very rich rock from the Alberni claim came in to-day. The vein has widened to thirty inches and prospectors are demanding large prices for their claims.

A new ledge has been found in a hill about twenty miles from Alberni, running northeast and southwest. The ore is almost coal black and carries free gold, which is visible to the naked eye and assays $600 to the ton in gold. Four of the claims have been bonded for $16,000. Another ledge has been discovered six miles from town which assays $22.

CARIBOO.

From the Ashcroft Mining Journal

It is proposed to put in a ditch costing $40,000 on the Van Winkle.

Pay dirt has been struck in the 80-foot shaft of the San Juan Mining company on Norton creek.

It will take two or three years to put the Cariboo Hydraulic claim in good shape for working.

The Quesnelle Gold Mining company are building a dredger 100 feet long, 26 feet beam, 5½ feet depth of hold, 125 horse power, 8 inch pump and a capacity of 1,500 cubic yards per hour.

ROSSLAND.

From the Rossland Miner.

The Le Roi is now raising about 90 tons of ore daily and shipping 75.

A third interest in the Highland was sold for cash to a San Francisco man last week.

Twenty feet of ore is reported to to have been struck in the crosscut on the Violet.

The showing in the new opening on the Homestake assays 100 ounces in silver and $12 in gold.

The shaft on the Palo Alto is now down over 30 feet and some rich copper has made its appearance.

The last assay of the Commander ore showed 30 per cent. in copper and $12 in gold. This claim is running two shifts and the shaft is now down 18 feet.

What are known as the Burke mines are to be developed with vigor this winter. These are the West Le Roi, Great Western, Robert E. Lee and Maid of Erin. The companies that own these properties are in good financial condition and are in for business. Mr. Burke holds large interests in all these mines as well as in the Homestake. He has been on the outside for some time completing his financial arrangements, and it is gratifying to know he has been successful. The money ($10,000) is now up for the developement of the Great Western, and will be available as soon as the crown grant to the property is made, which will be soon. The Great Western and Golden Chariot go together, the two covering some of the most valuable ground in the camp. Both are in line to catch veins from the Le Roi and Nickle Plate, and both have extensive and marked ledges.

SLOCAN.

From the Nelson Tribune.

Good reports come in of the mineral belt only discovered last year, from which some excellent ore has been taken out. In one instance 60 pounds were sent to the Tacoma smelter, and the result showed $197 gold to the ton. There has been but little work done and that only on the surface. This camp is called Burton City, and is located about seven miles below Nakusp, and at an elevation of about 7,000 feet.

BIG BEND AND ILLECILLEWAET.

From the Revelstoke Mail.

Harry Abbott is applying for a certificate of improvement on the King William mineral claim.

Gus Lund is down from McCulloch creek He brought down some gold amalgam, the product of his stamp mill and sent it away for a test at the mint.

The Revelstoke Mining company have about completed a deal for their gold quartz property on Carnes creek. Eastern capital is being interested in the enterprise, and it is proposed to spend $5000 in immediate development work.

Andy Parks was down from the Bend this week for supplies. He expects some big returns from the Parks claim on Smith creek in the very near future. Their shaft is down 63 feet and he thinks they are near bed-rock. He says the gravel is improving as they go down.

It is said that the Lanark and Maple Leaf people of Illecillewaet, have arrived at an agreement whereby the latter will use the tunnels of the former in getting out Maple Leaf ore, and in return the Lanark ore will be afforded transportation to the C. P. R. by the Maple Leaf Tramway.

KETTLE RIVER MINING DIVISION.

Oct. 1. Davenport, ½ interest, James Anderson to C. H. Brown.
" 1. North Star, ⅛ interest, R. Stuart to C. L. Thomet.

Panning Out Poorly.

Archie Cameron returned on Tuesday from the Athabasca gold diggings. where he spent about three weeks prospecting. He says miners are making from 50 cents to $1 per day by hard work. Several miners who left here about three months ago had only made $25. There is a large number now on the way back who intend to try their luck on the Saskatchewan again.—Edmonton Bulletin.

Military Cars.

The C. P. R. has just completed two special military or war trains, which comprise fourteen cars for men, two cooking cars, two Pullman cars for the officers, two cars for wines and stores, and two dining cars. The officers' cars are fitted up in luxurious style, and contain state-rooms, lavatory, smoking rooms, etc. Each train consists of eleven cars and engine, and has ample accommodation for nearly 400 men. With these fast war trains the C. P. R. expects to be able to cover the distance from the Atlantic to the Pacific in five and a half days.

LONG LAKE CAMP.

A NUMBER OF SALES HAVE LATELY TAKEN PLACE.

Properties There Are Attracting Capital, and Recently Half Interests in the North Star and Lake View Claims Have Changed Hands—The Camp Has Made Very Substantial Progress in the Past Few Months.

Since its discovery last spring by Messrs. Bosshart and Dittmer, Long Lake camp may be considered to have made very substantial progress. This will be the more readily apparent, when it is stated that at first it was considered that only one or two ledges or veins of ore would be found in the camp, but which theory has been thoroughly dissipated by the summer's prospecting, and the large number of claims recorded as a consequence. Up to the time of its discovery, few entertained the idea that free gold quartz would be found to the north of the large bodies of heavily mineralized, or smelting, ores, that exist in our other camps, such as Greenwood, Deadwood, Summit and Copper. And when, therefore, the news was noised abroad that free gold had been discovered on Long Lake, it was no wonder a rush was made to the new field. Those who grasped the opportunity offered have very little reason to regret the hardships they endured, while struggling into a new camp over the rough and rugged country without a trail, as such locations as the Gold Drop, Jewel, North Star, Silent Friend, Roderick Dhu, Lake View and a host of others, are not to be easily procured even in what are perhaps considered better, and much more widely known camps, than the Long Lake one. That the veins of ore are of good intrinsic value, assays have clearly shown, and that they are of a permanent character is plainly demonstrated by the development work done, and by the fact that first-class mining men have considered them worthy of attention and investment. The sale of a portion of the Roderick Dhu a short time since, the bonds on the Jewel and other claims, upon which the holders are carrying on, and are to carry on development work, and now the disposal of one half interest in the North Star and the Lake View claims, by Mr. C. L. Thomet to Messrs. R. and J. W. H. Woods, should convey a true meaning to the outside world, that not alone in any one of the Boundary Creek camps is all the golden treasure to be found. Not only is Mr. Thomet to be congratulated upon his recent sales, but the country generally, as now that it is known that the camp will have, either this fall or next spring, road communication, which will facilitate the transportation of machinery, we confidently look forward to the importation of the same, and, in fact, should the winter's development work prove of a satisfactory character, which we are sure it will, we are given to understand that without doubt the silence of the Long Lake region will be awakened in the spring by the screech of the steam whistle and the rumbling and dropping of stamps.

New Discovery on Lake Superior.

The Port Arthur correspondent of the Winnipeg Free Press writes to that paper of the discovery of a rich gold deposit on the north shore of Lake Superior. The locality in which the discovery has been made is in the mountains near Jackfish bay, about five miles from the C. P. R, where it skirts the shore at that point. The vein on the ledge has been traced for one and one-third miles, it having a width of from 16 to 25 feet, and conservative estimates are that it carries from $8 to $10 per ton in free gold, besides the sulphurets; in addition to this, in places on the vein, quartz may be broken out which is literally spattered with the precious metal, and would easily go $20,000 to $50,000 per ton. This is the richest and most important gold discovery so far made in the Algoma district.

Arrow Lake Branch of the C. P. R.

The contract for the building of the extension of the Arrow Lake branch of the C. P. R. has been awarded to Mr. D. McGillivray of Vancouver. The work is to be completed by the end of November of the present year. To do this a large force of men will be employed. By this extension and the extension of the Nakusp and Slocan railway to Sandon, which is now rapidly approaching completion, the company will be able to keep communication open with the Slocan district throughout the year, a most important matter for the province, and especially for the large shipping mines in that locality. It will also be of great advantage to the coast cities, as it will tend very greatly to increase their trade with a very large and important section of West Kootenay.

EDITORIAL NOTES.

To give an idea of the extent of the mineral bearing area of the Kettle River Mining division, it is only necessary to call attention to the number of claims located since the 1st of January of the present year. Reference to the official records will show that 600 represents the sum total up to the present time, and when compared with the number, 93, recorded last season, it will be quite apparent that in one mining district of the province, at any rate, prospectors have not been idle. Allowing 1,500 feet square to each location, which virtually means 50 acres, it will be seen that no less than 30,000 acres of land have been staked off into mining claims. Six hundred and ninety-three does not, however, represent the total number of claims in the district, as prior to last season a large number of locations had been made, among which are to be found a majority of the largest and most valuable ore bodies. This is only reasonable and can be readily understood, as the old time prospector had the whole of the vast mineral belt to select from, and undoubtedly staked some of the choicest locations to be found. Large as the number of the season's records, there is, (among the vast extent of territory yet unprospected), no reason to doubt that the coming summer will quite equal if not excell the present one, not only in point of numbers but for extent of ore bodies, as some of the claims recently located in different parts of the district would tend to show that not formerly had all the largest ore bodies been uncovered. Undoubtedly under development it will be proven that a large percentage of these prospects will have little or no intrinsic value. Yet among so many, the conviction can readily be entertained that at least a small majority of them will develop into mines; and such being the case, the future prospect of the district may be considered bright beyond comparison.

The *Colonist* of the 22nd September contains an elaborate report on the China creek portion of the Alberni gold fields (which are now attracting so much attention), compiled by W. J. Sutton, assistant professor of geology and mineralogy in the Michigan school of mines, who, at the request of the *Hon. Col. Baker, provincial minister* of mines, recently made a thorough examination of the claims within the mineral zone above referred to. The report as presented by Mr. Sutton, conveys to the reader a large amount of very valuable information, and from a geological and mineralogical as also a miner's point of view, may be said to be thoroughly interesting. So sadly have matters pertaining to the mining industry of the province been neglected in the past, it is quite refreshing to note the commendable action of the honorable the minister of mines in this instance, and at the same time to observe, now that a precedent has been established, of employing competent men, such as Mr. Sutton undoubtedly is, to report on the mineral resources of one section, that the matter may not be allowed to drop, but that other sections may receive the same treatment, until the whole province has been explored, and the gigantic possibilities of British Columbia as a field for investments pointed out, not only to men in the country, but to financial and mining men the world over. A few such reports as the one from Mr. Sutton, embodied in the annual statement furnished by the minister of mines would, without doubt, add an air of respectability to the same, and cause it to be looked upon with a much greater amount of respect than unfortunately it is at present, which would, we venture to say, not be either to the detriment of the honorable minister or the province.

Mr. H. Mortimer-Lamb, recently co-partner in this publication, has relinquished his interest, the same being absorbed by the company, which, for the future, will be designated by the firm title of Norris & Co. Mr. Lamb intends devoting his attention to his ranching interests in the vicinity of Midway.

Emigration.

By looking over the published annual report of the Department of the Interior for the year 1894, it may be seen that out of a total number of 1,579 who came into the country and settled between Calgary and Edmonton, in the Northwest territories last year, no less than 2,551 came from the United States, as against 1,962 from all other countries, including Canada. Out of thirty states from which emigrants were drawn, no less than 1,746 came from the five following states, the ratio being in the order in which the states are named: Minnesota, Washington, Dakota, Nebraska and Kansas, as against 808 from the balance of 25 states. The total value of settlers' effects brought into the country by the emigrants was $337,560, of which amount the Americans contributed the large share of $259,610, as against $77,950 by all others com'bined. The total number of live stock imported by the settlers, to the enrichment of the country, was, horses, 1,741; cattle, 1,013; sheep, 24, and pigs, 303, of which 1,549 horses, 394 cattle, 9 sheep and 231 pigs came from the States.

Cupid at It Again.

For some time past the pleasing intelligence had been whispered among friends that one of the best known and most highly respected of our old time prospectors and miners, Mr. James Sutherland, was in a fair way of passing from forlorn bachelorhood into the blissful state of benedictihood, and this being the case, we were not taken by surprise when, on Wednesday last, the news was heralded abroad that the bride, Mrs. Pine, and bridegroom, had, together with acquaintances, proceeded to Grand Prairie, where the ceremony was performed by the Rev. Mr. Paton, which joined two hearts as one and two loving souls entwined. After the ceremony the bridal party returned to Boundary Falls, where, at the hotel, a sumptuous repast was partaken of, and many hearty congratulations tendered Mr. and Mrs. Sutherland, who proceeded to their new home at Glenwood. The ADVANCE offers best wishes, and an ever increasing amount of happiness as the years roll by.

VERNON NOTES.

Mr. Thos. Ellis, of Penticton, was in Town on Friday. He left on Saturday's train for the coast.

We are pleased to learn that Miss Riley, who has been quite ill with typhoid fever, is recovering rapidly.

Mr. Geo. Jacques and his two children, who have been visiting Mr. F. Jacques of this city, returned home to Calgary on Monday's train.

Mr. John Hutchinson, who has been for the past two weeks in Revelstoke on business connected with his firm, returned home on Saturday's train.

Some of our leading merchants are already preparing their exhibits for the coming exhibition. Mr. W. J. Armstrong will have the finest exhibit of stoves ever shown in Vernon.

Mr. J. C. Campbell and wife returned on Monday's train from Rossland, where Mr. Campbell has been engaged in looking after the branch store which his firm opened there a few months ago. He reports business still booming there.

Edward Tronson was brought before Mr. Price Ellison, S. M., last week, charged with stealing and killing a calf. He was committed for trial at the next sitting of the supreme court. *This adds another to the list of criminal* cases to be tried at the fall assizes.

One of the prettiest weddings ever witnessed in Vernon took place in the Presbyterian church on Thursday afternoon, when Mr. Richard R. Lowe, one of our most popular young men, was united in marriage to Miss Beatrice M. Myatt of this city. The ceremony was performed by Rev. G. A. Wilson, pastor of the Presbyterian church, Vernon. The bride was given away by his excellency the Earl of Aberdeen. Misses Middleton and Dallas acted as bridesmaids, while the groom was ably supported by Messrs. J. A. McKelvie and R. A. Taylor. After the ceremony the wedding party repaired to the Kalemalka hotel to partake of a sumptuous repast prepared by the genial hostess, Mrs. Meakin After spending a very enjoyable time the young couple proceeded to their new home, receiving the hearty congratulations of friends present.

LOCAL AND DISTRICT.

Ladner Bros. are busily engaged building a fine two-story building upon their ranch recently taken up to the west of Midway.

After paying a visit, since leaving here, to Victoria and other coast cities, Captain Adams left for his home in Montreal on October 1st.

Mrs. Dowding and family have moved over to Rock Creek and will in future take up their residence on what is known as the Nicholson ranch.

Mr. John Stevens came down from Greenwood camp on Tuesday last and proceeded on to Fairview, where he has gone to make arrangements for doing development work on the Evening Star claim.

It is reported that in spite of the fact that the farmers of the Okanagan are building a mill of their own at Armstrong, the mill at Enderby has been recently taking in grain at the rate of 150 tons daily.

Mr. Norris, assistant commissioner of lands and works, left for Vernon on Tuesday last, after having completed arrangements for the carrying on of considerable road work at different points in the district.

As showing the necessity for the establishment of a money order office at Midway, we may mention the fact that on last week's mail, no less than seventeen registered letters left the postoffice for points north and east.

Mr. T. Hardy has moved into his fine new hotel, recently erected at Boundary Falls, and which will bear comparison with any in the interior.

Mr. and Mrs. Palmerston and family left on Wednesday last for Spokane, where for the present, and perhaps for the winter, Mr. Palmerston intends to remain. After a short visit spent among friends, Mrs. Palmerston and family will return to Midway.

Under the superintendence of Mr. J. Brown, the road between Anarchist Mountain settlement and Camp McKinney, is receiving some attention in the shape of repairs. The repairs to this section of road were badly needed, as a great deal of teaming is done over it, quantities of freight being hauled to and from the mines by this route.

Mr. W. Deans, formerly constable at Penticton, has been removed to Midway, having obtained the position of assistant constable here. The appointment of an assistant constable at Midway has been o matter of necessity for some time past, as the duties of mining recorder since the prospecting season opened has kept Mr. McMynn extremely busy at office work.

From a reliable source it is learned that Mr. T. Ellis, of Penticton, has purchased the Haynes estate. This being the case, Mr. Ellis will virtually own the entire Lower Okanagan valley, between Penticton and Osoyoos, a distance of some 40 miles, besides many hundreds of acres of land to the north and west of Penticton. He may now truly be looked upon as the land baron of British Columbia.

Upon their pre-emption to the north of Boundary Falls, Messrs. Winters and Leplante are building a fine residence, which, to say the least, adds quite an attractive feature to their otherwise neat and pleasant surroundings. When the contemplated clearing, fencing and plowing is carried out in the spring, few will there be in the neighborhood who will have a more cheerful home.

Mr. Watson, a recent pre-emptor in this neighborhood, is showing commendable energy by building and otherwise improving his holding. A better class of settlers than those that have taken up land in this vicinity this summer never found their way into any country. For confirmation of this a glance at what has been accomplished by such men as the Davis Bros., Mr. Hopper, Mr. Castleman and many others will suffice.

On Monday last our local sawmill owner, Mr. Powers, while engaged in the operation of greasing the saw at the mill, was unfortunate enough to meet with a rather painful accident to the thumb of the right hand. The method of applying the grease was by holding a tallow candle to the saw while it was revolving rapidly, and the candle breaking suddenly allowed his hand to come in contact with the teeth of the saw, resulting in the back back part of his thumb being badly lacerated.

Mr. R. G. Sidley, of Anarchist mountain, met with a painful accident one day last week. While engaged sowing grain with a seeder, he was unfortunate in getting his hand caught between the cog-wheels of the machine, and the result was, beside other injuries, the loss of a finger. Sympathy and congratulations may be coupled together in this instance, however, as the sowing of a finger tip upon the fertile soil of Mr. Sidley's farm may result in the raising next summer of a full harvest hand, and in a community where laborers are scarce and wages high, this is not lightly to be overlooked.

MINING NOTES.

Mr. Randolph Stuart has disposed of his one-eighth interest in the Morning Star claim, Long Lake camp, to Mr. C. L. Thomet.

Mr. Graham has again started work on the Texas claim on Inghram mountoin, an outfit of men and provisions having passed through Midway on Wednesday last for the purpose. The two tunnels already on the property are to be extended a distance on one of 75 feet and the other 50 feet.

Since the prospecting season opened this summer, no less than 600 claims have been recorded in the office here, besides a large number of transfers and certificates of work. Together with returns from miners' licenses, etc., the total revenue to the government from this district should amount to very respectable figures before the end of the year.

A mining deal of no little importance to the future wellfare and prosperity of Long Lake camp took place here last Monday, when the half interest in two mining claims, the North Star and Lake View, was disposed of by Mr. Mr. C. L. Thomet to Messrs. R. and J. W. H. Woods, of Armstrong, B. C. Already the new change of ownership is bearing fruit, as under Mr. Thomet's direction men are now starting to drive a tunnel on the Lake View claim, which development work, should it prove of a satisfactory character, will result in a large force of men being put to work, and the probable importation of machinery in the spring.

Boundary Creek School.

Following is the report of Boundary Creek school, showing rank and merit marks during September:

Third Class, Maximum Marks 950—Jessie Murray, 894; Willie Melville, 876; Eddie Melville, 721; Alma Hopper, 657; Iva Jakes, 223.

Second Senior. Maximum marks 600—Willie Murray, 495.

Second Junior—Walter Melville, 592; Harry Palmerston, 470; Walter Murray, 464.

II Primer, Maximum marks 600—George Murray, 527.

I Primer, Maximum Marks 600—John Thornton, 459.

Chart Class, Maximum Marks, 400—Mary Thornton, 328; Colin Palmerston, 225; Caroline Thornton, 118.

A. M. LEWIS, Teacher.

Recent Publications.

We have recently received and have pleasure in noting two very valuable contributions to provincial literature: The one in the form of a pamphlet, edited by Charles St. Barbe, and entitled "The Kootenay Mines," which undoubtedly will by a wide circulation attract a good deal of attention. The pamphlet has been carefully edited and typographically is neat and clearly printed.

The other, a monthly publication, the "British Columbia Mining Record," a journal for the need of which the province has been crying aloud for many a day past, and which, should future numbers retain the same grade of excellence, both typographically and in its editorial matter, will be a welcome visitor not only to miners of the province, but to financial and mining men in any part of the world. A long felt want is now being supplied and British Columbians will be ungenerous indeed if they do not give a liberal support to the publication, of which they have every reason justly to feel proud. The ADVANCE tenders its hearty wishes for success to the most recent aspirant among the ranks of provincial journalism, the British Columbia Mining Record.

They Are Rustlers.

Quite a transformation has taken place in the neighborhood of Midway since last spring, by the settlers who have taken up pre-emptions on what formerly was considered uncultivatable and unprofitable bench lands, but which as a result of the summer's experiment in raising vegetables, fruit and grain have been proven of great value. The ranches in question lie to the east of Inghram mountain, and now that a number of families have gathered there it should be designated by the name of Hopper settlement, out of compliment to the pioneer who was the first to recognize the value of these bench lands and to put his opinions to proof by growing, and that luxuriantly, about almost every kind of vegetable and grain, as an experiment, to be found in a seedman's catalogue. To the inquisitive ones and those wishing to gain information as to the possibility of a settler going into a new country and making a living by taking up land, we would recommend an inspection of this settlement, so that they might see what could be done in the short space of one season by a family willing to work in the way of building, fencing, breaking up land and the making of a home generally. Those who are not acquainted with the energetic character of some of our new settlers, would be astonished could they see the fine houses, barns, hay stacks, grain stacks, fencing and other improvements that have been carried out in this new settlement, and which speaks volumes against the theory that only upon the bottom and irrigatible land can good crops be raised and homes be made in this neighborhood. Thousands of acres of bottom and bench land await the advent of the new-comer upon the north and west forks of the Kettle river. Who will come and take them, and by doing so add to the wealth and prosperity of this most chosen mineral and agricultural district.

Corrections Necessary.

The British Columbia Mining Record, in its initial number presents in tabulated form the mining centres of British Columbia and how to reach them, which, as regards that portion of the province known as Yale District, is rather inaccurate. We therefore reproduce the table and append the necessary corrections as applied to a portion of the district:

Boundary Creek—Nearest railway station, Vernon.

Fairview Camp—Communication by boat from Penticton, and by stage.

Kettle River—Communication by stage with Kamloops and Vernon

Midway—140 miles from Okanagan Landing wagon road, weekly mail.

Okanagan—Rail from Sicamous station on C. P. R.

Okanagan Mission—Rail from Sicamous to Vernon, thence by stage.

Osoyoos—Rail and stage to Okanagan Mission, thence by livery.

Rock Creek—Rail from Sicamous to Vernon, stage to Mission, and thence by livery.

Spallumcheen — Sicamous to Enderby, and thence 6 miles.

Vernon—Rail from Sicamous.

Boundary Creek—Nearest railway station on the S. and O. R., Okanagan Landing, thence by steamer to Penticton and on by stage to Midway.

Fairview Camp—Communication by boat from Okanagan Landing to Penticton, and thence by stage.

Kettle River—Steamer from Okanagan Landing to Penticton, thence by stage.

Midway—Rail from Sicamous to Okanagan Landing, steamer to Penticton and on by stage.

Okanagan Mission—Rail from Sicamous to Vernon, thence by stage, or by steamer from Okanagan Landing to Kelowna, thence by livery.

Osoyoos—Rail to Okanagan Landing, steamer to Penticton, and thence by stage.

Rock Creek — Rail to Okanagan Landing, steamer to Penticton, and thence by stage.

Any of these points may be reached by rail from Spokane to Marcus, and thence by stage, twice a week.

Mail stage leaves Penticton for Midway every Thursday morning.

More Dividends.

On Monday last, at a meeting of the directors of the Alamo Mining company, held at the concentrator, Three Forks, a dividend of 7½ per cent., amounting to $35,000, was declared.

At the same time the proprietors of the Idaho, which is a private partnership, divided $4,500 among themselves. In April last they received $30,000. Very little ore has been shipped from the mine during the summer, which accounts for the disparity in the dividends. Work is now fully resumed and the output will soon be large. The Alamo is supplying the concentrator with sufficient ore to turn out twenty tons of concentrates daily.

MURDER AT TRAIL.

Morris O'Connor, a Prospector, Kills B. Cook, a Mining Expert.

News comes of a horrible murder committed near Trail Creek last week. Morris O'Connor, a prospector owning several claims, took a mining expert named B. Cook to look at them. He and Cook camped out on a mountain, and during the night O'Connor, who had been drinking heavily, arose and taking a pick drove it clean through Cook's brain, pinning his head down to the ground. He then grasped an axe and finished his bloody deed by hacking his victim in a horrible manner. The mutilated body was found next morning by some miners, who organized a posse and soon captured O'Connor. It is thought he committed the deed while crazy from drink.

NOTICE.

PUBLIC NOTICE IS HEREBY GIVEN, under authority of the provisions of the "Land Act Amendment Act, 1895," that all arrears upon pre-emptions or purchases outstanding on the 21st day of February, 1895, are payable in five equal annual instalments, together with interest on the unpaid balance at the rate of six per cent. per annum. The first instalment, together with interest from the 21st day of February, 1895, is due and must be paid on or before the 31st December, 1895. In default of such payment immediate steps will be taken for the cancellation of any records or agreements concerning such lands.

Agent for Midway and District.

WILL HAVE TWO.

THE PEOPLE OF ROSSLAND ARE FAIRLY IN IT.

Permanent Surveys of the Canadian Pacific and Spokane and Northern Now Made—How the Two Roads Purpose Covering the Mines—All the Prominent Mines Will Be Tapped by the Rival Roads.

Surveyors of the Canadian Pacific reached Rossland a few days ago and have been at work all week making permanent locations for the line. The road will come in by the way of Columbia mountain, running around the south base, then crossing the Monte Cristo mountain, running near the Iron Horse, and crossing Centre Star creek not far from the Centre Star mine, passing over to Red Mountain and skirting around by the Nickle Plate mine below the War Eagle and Le Roi, going around the south base of Red mountain, and getting down into the Trail Creek valley, then turning down Trail creek and running down three miles and a half, then turning north to connect with the line approaching town. Thus a complete circuit will be made with a line on a lower grade than most of the mines. The main line runs in a northeasterly direction to the Columbia river. The point where the junction will be made with the river is two miles above Sullivan creek and sixteen miles from Rossland. Should developments on Sullivan and Murphy creeks prove important the road will be in a position to serve the mines there. Just when the C. P. R. will build into Rossland is not yet announced, but it is hardly probable it will be before spring. All the surveys will be completed this fall and everything made ready for the rapid prosecution of work when the company thinks the moment to begin work has arrived.

The Spokane and Northern is not coming in this fall, but will be here next spring. President Corbin says he will be ready for business by June 1. His surveys are now all completed between here and Northport. The line will approach town by way of Little Sheep creek, and at a point a little southwest of Red mountain a line will be run off to the southeast to accommodate the Homestake, Monday, Gopher, Maid of Erin, Robert E. Lee and other mines in the South Belt, while the main line will pass around the south side of Red mountain on a line half way up the mountain and come around on the east side so as to accommodate the Le Roi, War Eagle, Nickel Plate, Centre Star and Cliff, then cross the gulch and pass on the south side of Monte Cristo mountain and on to Columbia mountain. In this way Mr. Corbin expects to gridiron the camp and serve almost every important shipping mine. The plans of both the Spokane and Northern and C. P. R. are very comprehensive and it is to be hoped that the tonnage of the camp will be ample to justify these complete systems next spring. If so, we shall have very animated times in and about Rossland.

THE NEW ENEMY.

Governor Altgeld's Sensational Speech on the Field of Chattanooga.

"Instead of an armed force that we can meet on the field, there is to-day an enemy that is invisible, but everywhere at work destroying our institutions. That enemy is corruption. It seeks to direct official action, it dictates legislation and endeavors to control the construction of the laws. It seeks to control the press, to set fashions and shape public sentiment; has emasculated American politics, and places it on the low plane of jugglery. The tendency is now for political parties to forsake principle and follow expediency, and their platforms are often drawn to evade or straddle every live issue. The idea is now to cajole rather than to convince, to ignore great wrongs and wink at abuses, to court the support of conflicting interests, though it involves the deception of one or both. We are substituting office-seeking and office-holding for real achievements, and instead of great careers in public life we are facing a harvest of slippery, blear-eyed and empty mediocrity, which glides into oblivion without the assistance of death. To be an eligible candidate for office now often means to stand for nothing in particular and to represent no definite principle, but all things to all men and in the end to be contemptible.

"Thirty-four years ago the call was to fight an open enemy in the field. To-day our country is calling for men who will be true to republican institutions at home. Never before did this republic call so loudly as it does to-day for a strong, sturdy manhood that will stand up defiantly and dare to do right. For more than a decade the tendency in this country has been towards a colorless and negative delettanteism, having the countenance of the Pharisee with the greed of the wolf, and drawing all its inspiration from the altar of concentrated and corrupting wealth. The flag has been praised at champagne dinners, while the very pole from which it floated was being eaten off by corruption, and republican institutions were being stabbed to the vitals. A new gospel has come among us, according to which 'It is mean to rob a hen roost of a hen, but plundering thousands make us gentlemen.'

"My friends, the men of the past did their duty. Shall we do ours? They were asked to face death. You may have to face calumny and obloquy. No man ever served his country without being vilified, for all who make a profit of injustice will be your enemies. But as sure as the heavens are high and justice is eternal, you will triumph in the end."

New Style Locomotive.

The G, T. R. have lately been trying a new style of locomotive fitted with patented devices, the most important of which are two cylinders, one 19 and the other 29 inches, and so arranged that the steam is used in the larger one after it has done its work in the smaller. When tested, the engine drew 46 loaded cars from Brockville to Montreal, with a consumption of four and a half tons of coal. An ordinary engine hauling half that number of cars the same distance uses five tons of coal.
