24. St. James, ½ interest, J. E. Walker to W. A. Glover.

THE LADY OF THE LAKE.

The assessment work has just been completed on this claim, which is an extension of the Roderick Dhu, in Long Lake camp. Agreeable to the literary association of the two names, there is a striking similarity in the ore from both claims. Two shafts have been put down on the Lady of the Lake, one 12 feet deep and the other 16, while a tunnel has been run for 18 feet. The ledge, which is well mineralized, is clearly defined between the walls. A three-fourth interest in the property is controlled by Spokane mining men, C. L. Thomet owning a quarter interest. The work was done by contract labor.

GREENWOOD NOTES.

Special Correspondence.

The water works dam is retarded by the pipe coming in.

Mr. Robert Wood has been slightly indisposed the last few days.

Bathing in the pool is all the go. Very much like pool Blue on red Black in hand, and requires more than three lives to stand the game.

Mrs. Galloway and her son have arrived and moved into their new cottage. Mr. Galloway has been suffering from illness, but is now improving.

Mr. Buckley has nearly completed his harness shop. A harness business is just what is wanted here, and there will be plenty of work for the shop.

The berrying season is now fairly on and a well organized crowd will saunter forth by arrangement and grab the festive fruit. Orders for preserves by the ton will be taken.

The new road being made east to Grand Forks shows life and energy, Quite a small camp of canvass to cover the workmen proves they are bent on getting it through shortly.

Miller Bros'. stock of jewelry is on the way, and will attract attention, no doubt. They also carry a good stock of readable matter, which is timely for some kind of mind recreation.

Dick Taylor is busy fixing his store preparatory to getting his drugs which are now on the way from Penticton, Then it will become fashionable to be sick as soon as he starts up.

A very sociable dance was held in Rendell & Co's. Hall, whereat some dozen couples tripped the light fantastic, and thoroughly enjoyed themselves. Mine host of the Pioneer hotel dispensed the refreshments.

The hospital is assuming shape and picturesqueness, and when finally completed will be a boon to the country at large. A little forethought in its planning would make a decided and beneficial difference in its accommodation.

Mr. Clems, the English expert, is still actively going over the various camps and thoroughly examining and testing by assay some of the principal claims. As usual he and his party are very reticent, but it is hoped some good will result from his investigation.

The soi disant R. H. DeGrey, captain, doctor, mine speculator, etc., has raised havoc with some people and the bowels of the earth by his investments. Born of poor but honest parents in West Zora, Oxford county. Ontario, he has now sought quietude in the Azores and will there drop the De no doubt the same as his many friends are dropping it after him now.

The n ew store for Mr. Louis I. Ostroski, being erected at Greenwood City, the dimensions of which are 25 foot frontage by 80 feet deep, with basement and living rooms over the store proper, will be fitted up with all modern improvements, to be lathed and plastered and in every way finely finished, making it a substantial structure. The contractor is to complete it by 1st September to enable the proprietors to get their goods in by that date.

IRON CAPS IN GREERWOOD.

A number of new locations have been made recently in Greenwood camp. Unlike the older veins, which invariably showed copper stains on the surface, iron caps are the prominent features of the ground lately staked. It is impossible to estimate how thick this capping as a general rule is, and doubtless it varies to a very wide degree even on neighboring claims. The assessment was done on the Center in Greenwood last week, but the owners failed to penetrate through the iron.

MINERAL EXHIBITION.

An exhibition of mineral specimens is to be held at the Twin Cities, Minnesota, during the first week in September, at which collections from British Columbia will be given a special prominence. At a meeting held at Spokane last week, the secretary was instructed to write to leading men of the more important mining towns in the province, to solicit their co-operation and assistance. Mr. G. B. McAuley has been asked to make an exhibition of ore and concentrates from the Cariboo mine, Camp McKinney. Boundary creek will be represented and also the districts of the Colville reservation.

WORK ON THE COPPER.

Work has been steadily going on upon the Big Copper for some time, and the shaft is now down between 50 and 60 feet. The men have lately not been working in ore, and drifting has been attempted to catch the ledge. From the appearance of the rock now being taken out, ore will come in when the drift reaches a distance of about 20 feet from where it was started. It has now been driven 16 feet. The main shaft, which is intended to be used as the working shaft, is on the lower end of the ledge, and instead of following the direction of the dip, is sunk vertically. Hence the reason for the present occurrence.

THE FIRST LADY PROSPECTORS.

Monday of this week Miss Minnie France and Addie Kowland, of Gray's Harbor, accompanied by their kinsman, C. E. Brown of Greenwood City, were in Marcus outfitting for a prospecting trip through the reservation. These young ladies are teachers by profession and have taken this trip as their summer's outing, combining the business of prospecting with the pleasures of the trip. They went from here overland on horseback.—Marcus Patriot.

REGULATION OF FIRES.

On the 15th ult., by order-in-council, the whole of the province, excepting district and city municipalities, was constituted a fire district, the following regulations to preserve the forests from fire, thus come in force:

"It shall not be lawful for any person to set out, or cause to be set out or started, any fire in or near the woods, within any fire district, between the 1st day of May and the 1st day of October in any year, except for the purpose of clearing land, cooking, obtaining warmth, or for some industrial purpose; and in cases of starting fires for any of the above purposes, the obligations and precautions imposed by the following sections shall be observed:

It shall not be lawful for any person to set out, or cause to be set out or started, between the 1st day of May and the 1st day of October in each year, within any fire district, any fire for the purpose of clearing land, unless the trees and undergrowth on such land shall have first been cut down and a space cleared around the margin or outer edge of the land which is to be cleared by fire, of sufficient width to prevent the fire from spreading and burning up the timber and forests adjoining and surrounding the land which is set be cleared by fire. The owner of any land on which fire shall be so made or started for the purpose of clearing the same, shall, by himself or his servants, constantly watch over, manage and care for such fire, and observe every reasonable care and precaution to prevent such fire spreading as aforesaid.

"Every person who shall, between the said 1st day of May and the 1st day of October in any year, make or start within any fire district, any fire in any woods or forest, or upon any lands adjacent thereto, for cooking, obtaining warmth, or for any industrial purpose, shall clear a sufficient space surrounding the place in which he is about to light or start such fire, and shall completely extinguish such fire before leaving the place.

"Whosoever unlawfully neglects or refuses to comply with the requirements of this act, in any manner whatsoever, shall be liable, upon summary conviction before a justice of the peace, to a penalty not exceeking $50.

"It shall be the special duty of every government agent, gold commissioner, timber inspector, forest ranger, mining recorder and provincial police officer to enforce the provisions and requirements of this act, and in all cases coming within the knowledge of any such official, officer or constable, to prosecute every person or body corporate by whom there is reasonable cause for believing any contravention of this act has been committed,"

MINING NOTES.

The Kettle River Milling and Mining company are making preparations to open up work on their six claims, four and a half miles north of Marcus, and purchases of steel, forge and other supplies will be made in Spokane this week, on the arrival of which work will be pushed with vigor. The company has a valuable group of mines just in sight of town and if powder and muscle count for anything we may expect valuable showing in this camp very soon.—Marcus Patriot.

Charles Luft, Henry Leader and Julius Ehrlich left Marcus for Deep Creek, about 65 miles above here on Kettle river, to go down on their claims there. The boys have some very pretty ore in sight and they propose to give it a few weeks' work before submitting the ore to a test. The looks of the rock justifies them, for it is as fine looking rock as we have yet seen.—Marcus Patriot.

Time, 4:00 a. m.

Mrs. Jones (severely)—William, is that you?

Jones (ditto)—An' who, may I ashk are you exshpectin' thish timeonite but me?—London Fun.

MINERAL EXHIBITS AT FALL SHOWS.

Our contemporary, the Grand Forks Miner, suggested some little while ago the advisability of effort being made to secure a representative exhibit of ores from Boundary creek and Kettle river to be shown at the Spokane fall show. This is a capital idea, and we trust that it will meet with the support it deserves. Spokane is irrefutably the principal market, almost the only market for the sale of prospects from this part of the province at the present time, and a well-selected assortment of mineral samples could not but produce good. On the other hand, we must remember that there are other places in the world besides Spokane, in which judicious advertising might not have an ill effect.

The reports of local newspapers may or may not exert much influence in drawing public attention to a particular locality. At the best, the eulogisms of the local press, however honestly and carefully edited, receive scant notice unless corroborated by more convincing and indisputably convincing testimony. This testimony can be furnished. Samples of rock ticketed with a description of the claims from which they were taken, the assay values on certificates bearing the signature of a qualified professional assayer, and sent not only to the provincial autumn exhibitions, but to Montreal, Toronto, Ottawa and other places during the fall shows, would undoubtedly accomplish a great deal more towards attracting capital than any other form of advertising.

It may be argued that few prospectors could afford the expense of sending a number of heavy specimens to distant destinations. But this objection may be readily met by subscription. A very small contribution from every member of the camp should easily be made to defray the cost of transportation of an admirably complete collection of ore specimens, providing the consignment was made at one time; and it is by no means unlikely, we think, that the C. P. R., if approached, would not be indisposed to further so laudable an object, as such an attempt to hasten the development of the district would undoubtedly be—by offering, if not free conveyance, at least a considerable reduction in the rate for conveying the consignments over their line.

POSTAL REFORM.

The following notice was received in due course through the post by a resident of Midway:

"A letter posted on S. & O. R'y. to your address, is held for non-payment of the requisite postage. If you will promptly enclose this card and three cents in Canadian Pastage Stamps, in an envelope, addressed Post Office Inspector, Victoria, B. C., sealed, postage prepaid, the letter will be forwarded to you."

There are many regulations in force in the postal-department where change could not but be beneficial, but surely there can be no more glaringly ridiculous system than that in regard to insufficiently pre-paid letters. In the present case it will be at least ten days ere the letter in question can arrive at its intended destination; and supposing, as it very well might be, that the letter referred to business of importance, the loss accruing from the delay might be serious to a degree. That carelessness should meet with the natural consequences due to neglect is a sufficiently admissable proposition; but it does not necessarily follow that the post-office officials should be required to act the the part of public inquisitors. The public contribute very largely towards the maintenance of a postoffice department, and it should be the aim of the department to make the postal system as efficient, and the delivery of mail matter as regular and rapid as possible. The system in vogue in England of charging double the rate of postage to the receiver of an insufficiently stamped letter, though perhaps open to some objections, has certainly much more to recommend it than the plan of vexatious and needless delay adopted in Canada.

In our issue of the 20th ult. we drew attention to the necessity for a road to be built between the mouth of Rock creek and Sidley's, and mentioned that the settlers had received assurances from the government that the road would be constructed, but that the promise seemed to be of the "pie-crust" order, made to be broken. Under date of July 24th, Mr. Leonard Norris, assistant commissioner of lands and works, writes as follows:

DEAR SIR,—I notice in the MIDWAY ADVANCE of the 20th instant, that the government is accused of making promises of the pie-crust order. I am not aware that any promise was made, but even admitting that it was, the fiscal year during which the work is to be done is as yet scarcely two weeks old. How would do to wait and see whether the road is to be built or not?

Sincerely yours, L. NORRIS.

Vernon, July 24, 1896.

A WELCOME HOME.

The marriage on Monday at Colville of Tom Humphreys, one of the pioneers of the camp, to Miss Hattie Hopper of Midway, caused much pleasurable excitement among his fellow prospectors, with whom he is deservedly popular, and it was decided that the return of the bridal party should be the occasion for that particular form of entertainment, fully described as a "thoroughly good time." On Thursday evening, therefore, some sixty or seventy guests assembled in the Palace hotel at Anaconda in honor of the bride and groom. After congratulatory speeches had been made, the floor was prepared for dancing, which was kept up till late. After partaking of a capital cold collation, the party dispersed at about 2 o'clock. The affair was in every way enjoyable.

Pending the building of a house of their own, Mr. Lind has placed his cottage at the disposal of Mr. and Mrs. Humphreys.

MINERAL ACT.

Certificate of Improvements.

NOTICE.

THE ORO DENORO MINERAL CLAIM,
Situate in the Kettle River Mining Division of Yale District.

TAKE NOTICE that I, W. A. Corbett, free miner's certificate No. 57985, intend, sixty days from the date hereof, to apply to the Gold Commissioner for a certificate of improvements for the purpose of obtaining a crown grant to the above claim.

And further take notice, that adverse claims must be sent to the Gold Commissioner and action commenced before the issuance of said certificate of improvements.

Dated this 1st day of July, 1896. 17

TABLE

Showing the Dates and Places of Courts of Assize, Nisi Prius, Oyer and Terminer and General Gaol Delivery for the year 1896.

FALL ASSIZES.

Clinton	Thursday 24th September
Richfield	Monday, 28th September
Kamloops	Monday, 5th October
Lytton	Friday, 9th October
Vernon	Monday, 12th October
New Westmister	Tuesday, 3rd November
Vancouver	Monday, 9th November
Victoria	Tuesday, 17th November
Nanaimo	Tuesday, 24th November

NOTICE.

NOTICE is hereby given that I, Chas. De B. Green, as agent for A. Wood, intend 60 days from date making application to the Chief Commissioner of Lands and Works for permission to purchase a certain portion of land situate in the Osoyoos division of Yale district in the province of British Columbia. Viz: the unoccupied fraction of land lying west and adjoining the Government reserve on Pass creek, North Fork of Kettle river, and containing 160 acres more or less. C. D'B. GREEN.

Sidley, B.C., July 13, 1896.

NOTICE.

NOTICE is hereby given that 30 days from date I intend applying to the Assistant Commissioner of Lands and Words for a licence to prospect for coal upon the following lands: viz, starting at a stake set about the centre of the east boundary line of Ole Johnson's pre-emption claim on Meyers creek, and running south one mile, thence east one mile, thence one mile north, thence one mile west to point of commencement, the same lands being situated in Osoyoos division of Yale district.

Midway, B.C., July 13, 1896. C. J. LUNDY.

NOTICE.

NOTICE is hereby given that thirty days after date I intend making application to the Chief Commissioner of Lands and Works for permission to cut and carry away timber from the following described lands, situate in the Osoyoos division of Yale district:

Commencing at a post about half a mile north of the Schonover cabin and about 20 chains on the east side of Boundary creek, thence running north 240 chains, following the course of Boundary creek, thence west 40 chains, thence south 240 chains, thence east 40 chains to the point of commencement, containing 960 acres more or less.

JOHN SULLIVAN.

Dated this 15th day of July, 1896. 15.

Land Act Amendment Act, 1896

NOTICE is hereby given that 60 days after date I intend to apply to the Chief Commissioner of Lands and Works for permission to purchase the following described land, situated in the southern portion of the Osoyoos division of Yale district, in the Province of British Columbia, and more particularly described as follows: All the unoccupied portion of the west half of section 8, township 69, and all the unoccupied portion of the east half of section 7 township 69, containing 640 acres more or less. W. T. THOMPSON.

Midway, B. C., June 15, 1896. 14

NOTICE.

NOTICE is hereby given that the partnership heretofore existing between Jones & Rogers of Grand Forks and Midway, B. C. has been dissolved. Accounts outstanding against and in favor of the firm will be settled and collected by C. A. Jones. JONES & ROGERS.

Grand Forks, B.C., July 10, 1896.

NOTICE.

NOTICE is hereby given that, sixty days after date hereof, I intend to apply to the Hon. the Chief Commissioner of Lands and Works for permission to purchase eighty acres of land, situate in the Osoyoos Division of Yale District, in the Province of British Columbia, viz.:

Commencing at the south-west corner of the north-west quarter of Section Nineteen, Township Sixty-eight, running thence west 20 chains, thence south 20 chains, thence east 40 chains, thence north 20 chains, thence west 20 chains to the point of commencement.

WM. G. McMYNN.

Midway, B. C., July 6th, 1896. 18

LOCAL AND DISTRICT.

We are glad to report that Mr. V. Haynes is rapidly recovering from the effects of his accident.

The barbers of Greenwood City held a convention on the 30th inst. Trade questions were discussed.

Men are still working on the road from Greenwood City to the camp, but progress is necessarily slow.

A trail is being cut to Pass creek from Greenwood city. Mr. Rendell is supplying the funds for the purpose.

In spite of the protest of the Indians, the town of Nelson, Wash., is growing rapidly. A number of substantial buildings have been lately added to the place.

A. L. Manley's new hotel at Grand Forks, which it was expected would be ready for occupancy last week, has the distinction of being the only three-story hotel in the Lower Okanagan.

Mr. Perrin, manager of the Manley & Averill store at Grand Forks, was in Midway on Thursday. He spoke in very encouraging terms of the state of business in Grand Forks, and of the rapidity in which the town is being built up.

The Anaconda sawmill has been moved from its former situation on the road, nearer to Boundary creek, a much more suitable spot. Mr. Tillman finds it difficult to keep pace with his orders, and there are yet no indications of decrease in the steady demand for lumber.

Mr. Sullivan, assistant-engineer in the employ of the Columbia and Western Railway company, is surveying the proposed route of the road up the North Fork and through Pass creek. He has experienced no difficulty whatever in locating the line, but has been troubled seriously with hornet-nests which impede the way.

Mr. Hubbel, erstwhile a proprietor of the Pioneer Hotel at Greenwood, has relinquished his interest in order to join a former partner in the same business at Rossland. The Pioneer Hotel will be carried on by Wood & Westell. The recent addition of a verandah in the front af this hotel has greatly improved its general appearance.

Last week the Rossland Miner, one of the best, if not the best, local papers published in the province, came out in an enlarged form—that of an eight-page six-column paper. Both from the journalistic and typographical point of viewthe publication isworthy of the district it so ably represents, and this is the highest praise that could be bestowed.

While some prospectors were passing a cabin near Norwegian gulch the other day they were startled by the whinney of a horse from within the building. Opening the door, they were surprised to find four miserable cayuses that had evidently been thus imprisoned for several days. The animals were at once liberated. It is supposed that they entered the cabin to obtain some relief from the flies, and that the door was either closed by the wind or by the horses themselves while moving about.

W. A. Losee, representing an English company, arrived in Midway on Saturday from Victoria, Mr. Losee is our authority for stating that a party of engineers are now in the field surveying the route for a proposed railroad from Vancouver to Rossland, via Chilliwack, Hope mountain and Boundary creek. The company are now applying for a charter from the Dominion government. No bonus or subsidy will be asked, and the required capital has already been subscribed. If this news is true, and there is no reason to the contrary, the beneficial results likely to accrue from the materialization of such a scheme in the near future are inestimable.

It is with sincere regret that we chronicle the departure of Mrs Palmerston from Midway. Mrs. Palmerston has resided in the town for nearly three years, since in fact the birth of the place. During her stay she has by her kindly hospitality contributed not a little to the social enjoyment of her fellow townspeople, despite the fact that she has rarely been quite free from ailments, the result of a week constitution. Mrs. Palmerston left on Monday with her children to join Mr. Palmerston in Spokane. It was the sad news that her husband's condition was so much worse that precipitated Mrs. Palmerston's intention of leaving Midway, though it had been contemplated for some time.

Men prospecting in Long Lake camp a few weeks ago were considerably startled by hearing a succession of unearthly yells within a short distance of them. The owner of the yells presently coming in view was interrogated by Spencer Bennerman as to why he so assiduously mutilated the atmosphere, interspersed with flail-like movements of his arms and hops and skips that could only be fully appreciated at a Red River hoe-down, came back the answer: "I shoot my pardnaire, bygar, yi, yip, ho-o-o-o, ho!" Thinking that the man had missed connections with part of his upper flat and had killed his partner, a messenger was sent for C. L. Thomet and his rifle. When Mr. Thomet arrived and got explanations in French, it was found that the man had only been shouting for his partner, who he thought had been lost.

J. McNICOL

DEALER IN

GENERAL - MERCHANDISE

ANACONDA AND MIDWAY

W. H. Norris left for Vernon on Monday last. He will probably be absent three weeks.

Mrs. Worgan arrived from Vernon on Wednesday's stage, and has joined her husband at Greenwood.

A system of water works is being constructed for the north end of the town of Anaconda. The work is in Mr. Hind's hands.

A big fire is raging in the vicinity of Scott McRae's ranch. It is feared that unless rain falls shortly, it will spread dangerously through the country.

County Court has again been adjourned. This time until Wednesday. The delay, though doubtless unavoidable, has occasioned much inconvenience.

Not the least attractive feature of Greenwood City is Columbia avenue, recently cleared of brush by Contractor Glass. This part of the town will no doubt be selected as far and away the most pleasant for residential purposes.

The painters have been busy in Midway for the last two weeks. On Friday night, however, the profsssionals were ably assisted by a number of amateurs, who in an incredibly short time had tinted the whole town with a shade of brilliant vermilion coloring.

News reached us as we were going to press of an accident which occurred yesterday to Mr. T. Wake. The full particulars were unattainable, but so far as we could learn, while attempting to pass a wagon in his buggy, somewhere on the wretchedly narrow road between Boundary Falls and Greenwood, Mr. Wake's rig was overturned and he himself sustained a fracture of the left leg. Why more accidents do not occur on this road is to be attributed to the especially kind intervention of providence.

The mineral dump in Messrs. Sansom & Holbrook's office at Greenwood is assuming, from the point of view of the occupants of the room, uncomfortable proportions. The floor is almost completely covered with ungainly, though in many cases rich, samples of rock, making walking to the unwary a hazardous proceeding. Mr. Sansom proposes shortly to put in a concentrating plant at the rear of his building, and thus be able to show visitors the gold of Boundary creek in a more convenient form. Mr. Sansom's enemies have unkindly remarked that if he ever does carry gold in the shape of bullion about with him, it will be in a liquid state after the receipt of the celebrated Dr. Keeley.

MINING NOTES.

The new air-compressor for the No. 7 has arrived, and will be set up at the mine at once.

Scott McRae has just returned from a prospecting trip up the North Fork. He found several indications of big mineral deposits.

Mr. Sansom, at the request of C. McL. Brown, C. P. R. passenger agent at Vancouver, is shipping a number of samples of Boundary creek ore to Montreal, to be added to the railway company's already good collection of British Columbia mineral specimens. A collection is also being sent for exhibition purposes to the custom house at Northport. Numerous enquiries have been made there of late regarding this district.

The Svengali in Wellington camp, located recently by C. Harrington and J. Munro, is showing up well. The owners sensibly enough, instead of following the too common practice among prospectors of locating a dozen or more claims in the season, have contented themselves with staking and developing two fairly promising prospects. On the Svengali there are two leads which dip towards one another. A shaft twenty feet deep has been sunk on one of these with very satisfactory results. The ore is partly galena, and also contains telluroids. The vein matter is some ten feet wide.

The past week has seen more mining experts and moneyed men in the camp at one time than during any previous period in its history. Among others should be mentioned: Prof. Douglas of New York, Mr. Holt, a partner of Dan Mann of the North Star in the Slocan, Leslie Hill, a noted expert, Messrs. Mahon and Tallemache of B. C. Exploration Co., Mr. Pelly, who has already invested in mining property in Camp Hewett, Mr. Wullfson and his expert Mr. Clemes, and last, but by no means least, Mr. Blackstock, a brother of the celebrated criminal lawyer of that name. Mr. Blackstock is associated with the Gooderhams, whose name is a synonym for wealth.

Mack & Tholl, Proprietors.

Louis Bosshart is working on the Gold Drop, Long Lake camp. The claim is looking well.

Mr. Blackstock of Toronto, accompanied by J. C. Haas, went up on Friday to look at the Winnipeg.

Jimmie Wilbur and Harry Morgan finished last week assessment work on the Missing Link and Dandy, Greenwood camp. Both claims improved considerably in appearance with the completion of the season's work.

Samples of ore from the discovery made by T. Wake and James Atwood, eighteen miles from Midway, have been assayed by Mr. Douglas, and show according to his results, 602½ oz. in silver and 69 per cent. lead to the ton. The ledge is nine feet wide.

C. L. Thomet and S. Bennerman were fortunate enough to secure one of the best claims in Providence camp last week, the Uncle Sam, an extension to the Providence. The original owners allowed their title to lapse, intending however to re-locate, but it was a case of the "early bird." When they arrived the "worm" had been incontinently swallowed.

Work was stopped on the North Star, Long Lake camp, last week, owing to the foul air in the tunnel. The drift has been run in 64 feet on the ledge. But the best that can be said is that the appearance of the ore is better than it was a while back. The owners are, however, confident that the claim will turn out as well as the wonderful surface indications promised. They have analogous instances enough of ore bodies similar in character to that on the North Star, pinching and widening out again. This phenemenon occurs notably in the well-developed mines of Mexico.

A VEXED QUESTION.

The Spokesman-Review again raises that muchly worried question anent the true definition of the international boundary line. It says:

"A prominent barrister of Nelson, B. C., who visited in this city this week, states that the matter is of more than a little concern to the people on his side of the line, and the general belief is that the variation, on a line running east from the Pacific c ast, is of such a degree as will place the town of Rossland nearly three miles south of the 49th parallel when once properly established."

Surely there is a mistake here. If the "prominent barrister of Nelson" is quoted aright, he either has gained a very erroneous idea of what is the general belief on this side of the line regarding the question, or he is a member of a limited but despicable class, who to gain popularity or a cheap notoriety, are not afraid when visiting a country not their own to make rash or even untrue statements r gardless of consequences at the e. pense of patriotism.

KRUEGER'S FAITH IN PRAYER.

This story from the Transvaal bears every indication of truthfulness, because, by the photographs of old Krueger, and by the accounts of his achievements during the past year, it is a clear case that he does not spend any time in prayer without expecting an answer. The story runs as follows: Before the Transvaal was a republic there was a famine in the land, and a party was organized to hunt the hartebeeste. For days the party scoured the veldt in vain. Then one of the Boers declared his intention of retiring into the bush to pray for succor. He accordingly left the party in company with a native. Some hours afterwards the Boer returned and informed the party that he had prayed and in three days' time a very large troop of hartebeeste would pass that way. Sure enough, two days after the promised game appeared in sight and the Dutchmen made a great haul. From that moment the "man of prayer" became the popular hero. That was Paul Krueger. Some time afterwards the native who accompanied Krueger stated that when Krueger entered the bush he did not pray, but struck out for a neighboring Kaffir Kraal. Calling the head men, the Boer informed them that there were a large number of armed Boers on the other side of the bush, who had sent him to tell them that unless they (the natives) discovered game in less than three days they would be all shot. The frightened natives set out forthwith, discovered game and drove it toward the Boer camp.

JAPANESE TIDAL WAVE.

An authentic report of the devastation of the recent tidal wave in Japan has been received by the United States from its minister at Tokio, who says: "A horrible disaster has befallen Japan, causing the death of 30,000 of her people and leaving many homeless and starving. The evening of June 15th last the north eastern littoral of the Island of Hondo, for a distance of nearly 200 miles, was submerged by a tremendous tidal wave, 80 feet in height, which, sweeping irresistibly upon the coast, only spent its energy after a rush of miles into the interior and retired, leaving a desolate waste of sand and debris where had stood so many homes and thriving villages.

JOB PRINTING OF EVERY KIND AT THE ADVANCE

THE NATIONAL
MATTE SMELTER.

A PRACTICAL AND SIMPLE METHOD of matting sulphide ores, such as nickel, copper, gold and silver ores. In localities where lead ores and fuels are scarce and almost unattainable, our pyritic, water jacketed Matte Smelter has been recognized with highly satisfactory results, and has been thoroughly tested on various pyritic, sulphide and arsenide ores, in capacity of 2 to 80 tons of ore per day. It is the most practical, cheapest, and simplest method of gold and silver ore matting and concentrating that is known to-day.

It requires no extraordinary skill, no lead ores, no fluxing material, and no fuel of any kind for the smelter after it is started. The sulphur in the ore is its natural fuel only, and its cost has no comparison with any other process of concentrating.

We are prepared to furnish any size or capacity plant complete to substantial mining people, set it up and furnish our men to run it for them on easy payments. Prices and specifications furnished with references and testimonials on application.
