Treadwell, ½ interest, F. C. Woods to P. J. O'Laughlin.

An Outside View.

The Toronto Telegram discusssing the political situation in British Columbia says in part:

The Turner Government readjusted the constituencies of British Columbia to suit itself, went to the people at a time of its own choosing, counted in two men elected as independents, and practically usurped two seats in the Cassiar district, and, at that, could *only muster as many members* in the new Legislature as the united Opposition.

British Columbia had been so gerrymanded that a majority of the popular vote did not ensure a majority in *the Legislature; but the Opposition* secured a majority of the popular vote, and the results of the election reduced the Ministers of the Crown to the rank of conspirators against the will of the people.

Lieutenant-Governor McInnes would *have been false to any true idea of* duty if he had sat idle and allowed a discredited Minister breathing time of several months to be spent in the hard work of using the country's money in a desperate effort to purchase a majority which it could not secure at the polls.

McKinley's Peace Proclamation.

The following is the peace proclamation issued by President McKinley on the 12th of August.

By the President of the United States of America—A proclamation:

Whereas, a protocol concluded and *signed August 12, 1898, by William R. Day, secretary of state of the United* States and his excellency, Jules Cambon, ambassador extraordinary and minister plenipotentiary of France at Washington, respectively representing for this purpose, the government *of the United States and the govern*ment of Spain, the United States and Spain have formally agreed upon terms on which negotiations for the establishment of peace between the two countries shall be undertaken.

And whereas, it is in said protocol *agreed that upon its concession and* signature hostilities between the two countries shall be suspended and notice to that effect shall be given as soon as possible to each government, and to commanders of its military and naval *forces.*

Now, therefore, I, William McKinley, president of the United States, do in accordance with the stipulations of the protocol declare and proclaim on the part of the United States a suspension *of hostilities and do hereby command that orders be immediately given* through their proper channels to commands of the military and naval forces of the United States to abstain from all acts inconsistent with this proclamation.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this, the 12th day of August, in the year of our Lord, one thousand eight hundred and ninety eight, and of the indepen*of the United States, the one hundred* and twenty-third.

WILLIAM MCKINLEY, President.

Shewing Her Hand.

As the tension becomes *more severe* between Russia and England over the far eastern question, Russia is gradually shewing her hand, in fact by the following it will be seen that should the two countries really come to blows, *India and not China will be the real* battle ground.

Following is a Russian press comment on the situation:

Following in the footsteps of the Novosti the Novoe Vremya eulogizes the Marquis of Salisbury for the wisdom with which he keeps in check the Russophobe outburst of members of his party and the prudence with which he endeavors to obviate all pretext for misunderstanding between Great Britain and Russia.

The paper says that it observes that unfortunately more than half the British public shares Mr. Chamberlain's views but cannot understand why the Russophobes are apprehensive of the Russians at Port Arthur.

The Govoe Vremya says the results of the cession of Port Arthur and Talienwan will not show themselves for some time to come and a considerable period must elapse before they can serve the purpose for which they were intended by the Russian policy, that of providing a permanent outlet on the Pacific ocean.

Quite otherwise is Russia's position on the Indian frontier, where everything has been long organized for military operations if some extreme excess of ill-will upon the part of Great Britain should drive Russia to such action.

EDITORIAL NOTES.

The action of the Lieutenant-Governor in dismissing the Turner government called forth a perfect fusillade of criticism, principally from the former government organs. That he did not exceed his authority all seemed to recognize, but that he should summarily dismiss a discredited and defeated ministry seemed to them to be a perfectly inexplicable act.

To ourself the subsequent action of the Lieutenant-Governor in calling upon the Hon. Robert Beaven to form a new ministry was the puzzling feature of the political crisis, and until further light is thrown upon the subject it will always remain so. That we are however at a loss to know why His Honour should, after dismissing Mr. Turner, have overlooked the recognized leader of the Opposition, Mr. C. A. Semlin, does not however prevent our presenting our readers with the correspondence which passed between two of the principals interested, and although the following letter does not even hint at the reason why Mr. Semlin was ignored at the time, yet does it give a fair idea of the relation existing between the Lieutenant-Governor and the Premier, as also it points to the erroneous conviction held by the writer, that it was possible to fuse the two provincial parties, by calling upon an individual out of sympathy with both.

At Government House, Victoria, B.C.,
Aug. 8, 1898.

To the Hon. Robert Beaven, Esq., Victoria, B. C.

SIR—I have the honor to inform you that, by letter of even date herewith, I have relieved the Hon. J. H. Turner and his colleagues from their functions as my advisors and members of my Executive Council. This action I have taken, in view of the results of the general elections held on the 9th of last month. This is, probably, the most important period that has yet been known in the development of the resources of the Province, and, during the month that has elapsed since the said general elections, I have deeply felt the need of advisers in whom I could place full confidence and whose recommendations I could unhesitatingly approve. And, knowing your thorough knowledge of the special needs and requirements of the Province, and having in view your long and honorable experience throughout a quarter of a century in the adminstration of its affairs, and regarding you, moreover, as peculiarly fitted to reconcile its contending political factions, I hereby call upon you to assume the task of forming a Ministry, and to once more act as chief adviser to the representative of the Crown.

(Signed) THOS. R. MCINNES,
Lieut.-Governor.

If the pre-election pledges of the Opposition party are fulfilled and there is every reason to believe that they will be, then the 15th of August, 1898 the day upon which Mr. C. A. Semlin and his colleagues assumed the reins of government, should remain forever memorable in the history of British Columbia. For years Mr. Semlin, with a small following, fought manfully in the provincial legislature against the policy of the government which was presided over by Mr. Turner and his predecessors, and although at times it must be said he seemed to make little progress when he attempted to force his opponents to recognize the best interests of the province, and govern themselves accordingly, yet in the light of recent events must it be acknowledged that his struggle for the right was being noted, and that too by a people gradually awakening to the necessity for a political change. Associated with Mr Semlin in the new government are men of sterling worth and these as they have pledged themselves to a policy of reform in many directions, will no doubt conduct themselves in such a manner as to earn the gratitude of not only those who placed them in power, but as well the respect of those who are and have always been politically opposed to them. The people of the province expect much from the present government, and we believe the people will not be disappointed.

OUR OTTAWA LETTER.

Ottawa, Aug. 13th, 1898.

Among the varied and often unique criticisms which the ingenuity of the Conservatives have devised against the Government none have been more persistent than the charges of extravagance and reckless expenditure of the public moneys.

FACTS THAT TALK.—No better illustration of the fact that real and substantial retranchment is being practised by the Government can be found than in the report of the Post Office depastment for the fiscal year just closed. It is a well known fact that the Post Office has never paid for itself, but perhaps it is not as well known that the actual deficit when the present Postmaster-General took office was over $700,000. This huge sum was the result of an annually recurring balance on the wrong side of the ledger and was therefore the result of a permanent lack of sound business management and not of exceptional adverse conditions. It was therefore the more difficult to overcome and could only be changed by a complete remodeling of the entire system. This difficult task Mr. Mulock set himself to accomplish and with the result that at the end of his first term he had cleared off over $100,000 of the deficit, and when the complete returns are in for the year just closed there will be another half million wiped out, so that the deficit will thereby be the comparatively insignificant sum of $74,000 only. A reduction of the ufavorable balance by $627,000 in two years is most eloquent of the splendid administrative ability that is now governing the department.

EFFICENCY WITH ECONOMY.--This immense saving to the public has not been affected at the cost of efficient service, on the other hand reforms and improvements have followed each other so rapidly that the story has become almost montorous.

NO PARTISAN CONTRACTORS.—But perhaps the most notable improvement has been in the way in which the mail contracts have been re-let and when so much is being said of the disregard of the Government for the principles of awarding public works by open tender, it is worthy of note that contracts previously given to political friends without competition are now in the hands of those who have secured them by public tender at a saving of over $100,000 annually although the territory covered by the new contracts is several hundred miles greater than before.

Before leaving the subject it is worth noting that in a spirit curiously lacking in patriotism, the "Old Flag" party have criticised the Imperial penny postage scheme most persistently upon the grounds of the deficit which they claim it is bound to create. It would appear in better taste for the party responsible for the old $700,000 deficit to say as little upon this point as they conveniently can.

THE YUKON "SCANDAL."—During the past week the editoral columns in Conservative papers in Ontario have been pretty evenly divided between excited dissertations on the inquities of the Hardy Government and the "awful revelations" of malfeasance of office among the Government officials in the Yukon. The fact that these stories have all come by way of the American papers makes no difference, so long as a whack can be had at the Administration, it matters little the source or authenticity of the "facts". The principle upon which the yarns are circulated is a safe and easy one,—spread them broadcast before there is any chance to investigate, if subsequent information brings corrobration, then repeat, embellish them, if they prove false, leave somebody else to say so!

Already the other side of the story is reaching the East, and as was to be expected, a very different aspect is given to the various "scandals". It appears that Messrs. Wade and McGregor, the Crown Attorney and Mining Inspector respectively at Dawson City did not follow the example of members of the late government, and locate claims upon information secured in their official capacity. On the contrary they heard of the strike on Monte Cristo Island just as scores besides heard of it, on the street, and started out with the such, staking their claims with others as ordinary miners. It would surely be an absurd restriction to forbid a man having any pecuniary interest in the country, simply because he is an official. The conditions of life are admittedly extremely arduous and no reasonable salary could be offered that would induce competent men to undertake the work. So long as there is no trafficing in their official capacity the country will refuse to endorse the ridiculous outcry that is being raised, having confidence in the Department to step in with a firm hand if it is shown that improper use has been made of confidential information.

The Contre Star.

The Gooderham-Blackstock syndicate has purchased the Centre Star mine in Rossland camp. The purchase price is stated to have been $2,000,000. This is the company which owns the War Eagle and other claims in the same camp.

The B. C. Mine.

The statement is made that the owners of the B. C. mine in Summit camp, are considering a proposition for the disposial of their property on the basis of a $1,000,000 deal, but weather such is actually the case it is not possible to say just at present. As far as the purchase of the property from the original owners is concerned, that is at anyrate settled as the final payment of $27,000 was made on Friday last.

Just at present work is not being prosecuted upon the B. C., the managment having closed down the works a few days ago, but that everything is satisfactory may be gleamed from the fact that the final payment on the purchase price was made since the working force was laid off.

Whatever may be the outcome of the negotiations which it is said are now pending, it is safe to say that before the work of development at the mine is continued, a very large machinery plant will be installed in the place of the one which up to the present has done good service, but which is to small for deep workings.

With the advent of the railway to Summit camp, no doubt the B. C. will again assume a buisy appearance.

A Great Shuswap Property.

A group of claims situated on the shore of Shuswap lake, 5 miles from Sicamous station, on the main line of the C. P. R., the ore of which is identical with the Rossland ore, will furnish an eyeopener in the way of a new mining camp. A ledge has been uncovered here, partly by nature and partly by several months of work quietly carried on, which shows clean sulphide ores running from $50 to $700 in gold, with an average of 8½ per cent. copper values. When we state that this large ledge drops at an incline of about 40 degrees down an escarpment almost perpendicular for 1600 feet, and is in places of a width of 50 feet of clean ore on an almost right angle face, and is continuous from where it strikes into the water to the point where work has been carried on to date, a distance of over 8,000 feet, and as yet no diminution in size, we think we have made out a case of a new camp that will quickly give Rossland a run for first place. This may sound over sanguine, but the fact of the matter is that with a dip of 45 degrees into the mountain, natures work alone has given us a perpendicular depth with continuous stoping ground of over 1600 feet, more than twice the present depth reached at Rossland, and a continuous ore chute many times longer than any yet uncovered in the Trail creek district. Among the various claims along this ledge are the Mono, Dufferin, Bluebird, Milton and three others, through which this great ledge is cantinuous and exposed. Staked only last winter, nothing but prospecting by means of stripping and as yet shallow shafts has been done, with the result of a fine hanging being shown to be in place. The geology is made up of the well-known Shuswap schist with considerable porphyry float in the slides below the ledge, which cuts the schists at an angle of about 30 degrees. The property is now attracting much attention.—B. C. Mining Critic.

MINING NOTES.

Mr. Jas. Lynch has kindly promised to obtain some specimens of Toroda creek ores to be sent to New Westminister with the collection Mr. Jacobs is making for the Provincial exhibition to be held in that city in October next.

Work will be resumed to day in the Bruce tunnel on the Bruce claim situated on Ingram mountain near Midway, as a new contract has been let to Mr. James Beckwith and his partner. The tunnel has been driven over 200 feet and it is expected that during the life of the present contract the ledge will be reached. In the face of the tunnel some change in the formation is noticiable as the very hard granite is gradually giving way to a more limey formation.

It is reported that a good strike has been made on the Morrison claim, which is situated in Deadwood camp, but the character and value of the ore has not yet been disclosed.

Work has been suspended on the Snowshoe claim in Greenwood camp, pending the installation of a heavy machinery plant, which has been ordered and will soon be on the way to the mine. Great difficulty with water has been experienced in the Snowshoe, and it is do doubt owing to this that the management has decided to knock of the men, and await the arrival of machinery before carrying further the work of developing the claim.

All Kinds of Work Executed to the Satisfaction of Customers.

Charges not Proven.

Justice Walkem to whom a commission was issued some time ago to make inquiry into certain charges of corruption in the lands and works department has delivered his finding to the government. It is in effect that the charges were not sustained by the evidence.

Irving and Clifford win.

The further returns of the elections for the two seats in the Cassiar district show that Messrs. Irving and Clifford will be elected by very large majorities over Mr. McTavish. The interest felt in this election a short time ago, is now much dimsnished by the fall of the government. One of the two members, it is known, has expressed his intention of supporting which ever party is in power, while it is also expected that the other will do the same.

Oro Fino Mines.

It is not so stated, but it is presumed the Vancouver World means to the Oro Fino properties at Fairview, when it refers to the operations of the company as follows.

"A special meeting of the Oro Fino mines directors was held at their office, Mackinnon block, on Monday afternoon, for the purpose of reading Mr. Pellew-Harvey's report after his examination of this promising property. Mr. Harvey estimates that the ore which can be treated as soon as there is a mill erected, at over 5,000 tons, with a valuation of $1,000 per ton. The directors decided to at once set on foot negotiations for the procuring of a 5-stamp mill and hope by fall to have this in operation. A sufficient amount of treasury shares will be sold to meet the cost of this work and when ore can be shipped the directors hope to pay dividends to their shareholders."

It will be observed that in the above, the statement is made that the ore runs as high as $1,000 to the ton.

It is also noticed that another Vancouver paper the Mining Critic makes the same statement, which is obviously untrue, for from other sources it is gleaned that Mr. Pellew-Harvey in his report claims that the ore will average about $10 to the ton.

The following is some of the paragraphs in Mr. Pellew-Harvey's report to the company, and the vaines given are very much more to the point than the absurd contention put forward by the Journals referred to.

The report says:

The quantity of ore exposed by the work already done with that showing along the surface of the two claims, (Oro-Fino and Independence) will approximate 4,500 tons. The assay value of this has not been ascertained by complete sampling, but hand samples have given fair assays and indicate an average of about the same as the 450 tons of broken quartz which is now on the dumps ready to be milled, and according to the crushings of an average sample of two tons, will yield about $10 per ton, 86 per cent, of which is amalgamable.

The cost of Mining and Milling, should not exceed $5 per ton.

Thete is good timber on the properties. As far as the mill site is concerned, this is a question which will require careful consideration as the water available in the vicinity is scarce, but for battery use and a small plant with steam power, there is water enough in the ravine about three-quarters of a mile south of the camp.

I have given as many details as are necessary for the purpose of this report. The conclusions to be arrived at are that the group contains a large body of surface quartz sufficient to warrent further exploration. This will take a good deal of money, but the chances of success are in favor of such expenditure. There are two ways which might be suggested for the execution of this purpose, viz: (a) The running of a tunnel from a point some 100 feet below the No. 1 tunnel on the Oro-Fino towards the discovery stake, in the hope of striking the lode in place there. This would give a depth of 150 feet, with a drive of about 210 feet, and would cost about $10 per foot. (b) A better proposition would be to conduct a series of open cuttings for stripping the quartz on the course of the lode; by so doing it may be expected that enough ore would be won to about pay for the development, if a small prospecting stamp mill were erected to treat the products on the spot, and thus put you in a position of great advantage, as it would demonstrate values, and at the same time would be developing the reef almost entirely with its own specie. This surface prospecting would likely lead to the discovery of the lode in place, and, as has already been explained, your one object should be to endeavor to do this, before going to any further expense by indiscriminate developments.

LOCAL AND DISTRICT.

On Friday last Mr. Louis Bosshart took over the International Hotel in Greenwood, having purchased the premises from Mr. E. B. Simmons.

Capt. R. C. Adams, president of the Midway Company, arrived at Sandon from Montreal on Friday, 12th inst. He is expected to reach Midway about a fortnight hence.

Some heavy machinery passed through town on Friday last bound for the Cariboo mine in Camp McKinney. The machinery came in from Marcus over the Kettle river wagon road.

On Tuesday last Mr. Wildgress, right-of-way agent for the C. P. R., accompanied by Mr. Rice, chief of the C. P. R. engineer party operating on Boundary creek, paid a visit to the town on official business.

The Greenwood City Mercantile Co., are about to enlarge their premises, and in doing so will place a solid stone foundation under their store building. In connection with this Mr. C. W. H. Sansom has a notice in this weeks paper calling for tenders.

Mr. and Mrs. Fotheringham, of Vancouver, came into the district from Penticton on Wednesdays stage. It is understood that Mr. Fotheringham may remain in the district, should he consider the outlook for profitable investments in mining and other property sufficiently encouraging.

The telephone line which is being extended from Grand Forks is gradually approaching Boundry Creek, for a few days ago the wires had been strung as far as Greenwood camp, which is only about four miles from Greenwood City. In a few days Greenwood City will enjoy the luxury of this modern and convenient means of communication.

It is with regret the announcement is made that during the past week Mrs. Lundy of this place was taken seriously ill, necessitating the calling upon Dr. Jakes to render medical assistence. Although still confined to bed it is learned that during the past two days the patients condition has somewhat improved, which will be pleasant news to her many friends.

It is understood that Mr. H. T. Wildgress, C.P.R., right-of-way agent last week completed arrangements with Messrs. Kerr Bros. and Sullivan for a right-of-way for the railroad through their respective farms. As the house in which they now reside is in the right-of way, Mr. Robt. Kerr and family will shortly leave the farm and may reside in Midway during the coming fall and winter.

Mr. S. H. Nottey, of Trail, whose attention was drawn to the suitability of the Midway Company's acre lots for fruit growing purposes by Mr. Thos. Earl's reference thereto in his published report to the Provincial Board of Horticulture, rode over from Trail last week and looked over the ground with a view to purchasing five or ten acres of land from the company and devoting his attention to fruit growing and chicken raising.

Death at the Old Ironsides.

On last Tuesday morning a very sad affair occurred at the Old Ironsides mine in Greenwood camp, in which one of the men working in the mine lost his life and another very nearly so.

It would seem that three men, R. W. Roberts, M. Austin and W. J. Pierce were working in a drift which was being run in from the shaft at the 200 foot level. They had occasion to fire several holes and while this was being done they went to the surface. After waiting about 15 minutes they decended the shaft together until they got to the pump station, at which point Pierce stopped to fix the pump., Roberts and Austin went on to the bottom of the shaft and as soon as this was reached Roberts proceeded to go into the drift, but had not gone more than two or three steps before he fell down being overcome with powder smoke. Austin noticed Roberts fall and shouted to Pierce, and then went to where his partner lay. Having reached him he too became unconcious. Pierce slid down the cable to the bottom of the shaft but the smoke was so bad that he, feeling himself going, decided to ascend the shaft and give the alarm. This he did and immediately Pat Dermody the foreman went to the rescue. On the first trip down Dermody secured Austin but could not get Roberts into the bucket, but was more successful the second time. As soon as the men were brought to the surface means were employed to resusticate them, and in Austins case successfully, but with Roberts all efforts failed and in a few minutes he was dead.

On the following day Dr. Jaques, Corner for the district, enpanneled a jury and held an inquest, and after listening to the evidence the jury returned a verdict to the effect that death was caused by foul air, but that no blame was attached to any one.

New Appointments.

On the 15th inst., His Honour the Lieutenant-Governor was pleased to make the following appointments viz:

The Honourable Charles A. Semlin to be Chief Commissioner of Lands and Works.

The Honourable Francis L. Carter-Cotton to be Minister of Finance and Agriculture.

The Honourable Joseph Martin to be Attorney-General.

Provincial Exhibition.

A very complete prize list came to hand on the 19th., the list being sent out by the directors of the Royal Agricultural and Industrial Society of British Columbia with head quarters at New Westminister. Judging from the prize list the exhibition which will be held on October the 5th to the 13th, under the auspices of this society, will be one of the most important and successful ever held in the province, and certainly should be when the very liberal awards in all classes and divisions to say nothing of the large number of special prizes of great value, are taken into consideration. One of the important features of the exhibition will be a large collection of minerals from different sections of the province, and as these will be exhibited in a seperate building set apart for their accommodation, the display should attract much attention, and prove an object lesson to those holding skeptical views with regard to the mineral wealth of British Columbia. It is to be hoped that from all sections of the province a hearty assistance will be rendered, so that the efforts of the management of the forthcoming exhibition may be crowned with success.

The Fall of Manila.

American warships bombarded and reduced the forts, then the land forces made a furious attack.

Hong Kong, August 16.—Accounts brought by the German steamer of the surrender of Manila say Admiral Dewey gave General Augusti an hour to surrender at the time of the last demand on Saturday. Augusti refused to comply.

The bombardment which began at 9.30 a. m., was continued two hours, and then the Americans stormed the trenches, sweeping all before them. Those within the walls attempted no resistance.

The First Colorado volunteers stormed the outer trenches and drove the Spaniards into the second line of defenses. Then the American troops swept on, driving all the Spaniards into the inner fortifications, where the Spanish commander, seeing that further resistance was useless, hoisted the white flag and surrendered.

The losses, American and Spanish are not known yet. The Spaniards in the trenches probably numbered 3000 men. The Americans attacking forces numbered 10,000, and the Americans were better armed, better trained and in better condition.

The foreign fleets watched the bombardment with acute interest.

The American warships engaged were the Olympia, Petrel, Releigh, McColloch, Boston, Monterey, Charleston and Baltimore.

The Spaniards assert that the fire of the Americans for the most part fell short, the only effective fire being from a small gunboat armed with quick-firing guns that was close in shore. It is asserted by Spaniards that "the Americans lost heavily in the storming, owing to the faulty construction of their entrenchments, which the Spaniards could command from the heights, and upon which they poured a galling fire."

The Spanish trenches extended around Manila at a distance of from two to four miles from the walled city, forming a circle 10 miles in circumference, and it was impossible, the Spaniards say, to hold so long a line against the Americans attack.

Tenders

For a masonry wall 80x24 feet, and 8 feet high, with some excavating work. Plans and Specification at my office in Greenwood City. Bids to close by 1st Sept., 1898.

T. DONALD & Co. Props. T. DONALD, Magr.

BOUNDARY CREEK MINING AND MILLING COMPANY, LTD. LY.

Incorporated October 21st, 1896.

HEAD OFFICE, GREENWOOD CITY, B. C.

Capitalization $1,500,000, in $1 Shares, Treasury Stock 700,000 Shares.

COMPANY'S PROPERTIES.

The Company's mining properties now consist of fourteen claims, viz, the D. A., G. A. R.. Big Ledge, O B, S. H. B., Fred D., S. F., J. A. C., P. H., C. S. & H., E. C. B, Prospective, Spokane and Granite Falls.

SIX OF THESE HAVING BEEN ACQUIRED SINCE INCORPORATION

OFFICERS OF COMPANY:

- - - - PRESIDENT
D. A. HOLBROOK - - - - - - MANAGER
E. JACOBS - - - - SECRETARY-TREASURER

BANKERS

BANK OF MONTREAL - VERNON, B. C

DESCRIPTION.

On the "D. A" is a vein about 20 inches wide, with a pay-streak of 4 to 12 inches; from this 8,653 lbs. of ore was shipped to the smelter, giving $103.15 gold per ton, silver 74 7-10 ozs., and 2 per cent. lead. A tunnel is being driven on this vein from which ore is being taken. On the same property is a larger vein (quartz) carrying galena and pyrites.

The "G. A. R." has a 20-foot shaft sunk on a 2-foot vein, heavily mineralized with an intimate mixture of iron and copper pyrites, galena, blende and silverglance. The finest pieces of wire silver found on Boundary Creek were taken from this shaft. Average assays from different places across the vein gave $8.00 gold, 50 ozs. silver; also $8.00 gold and 150 ozs. silver and one, the latest return—$15.05 gold and 196 4-5 ozs. silver per ton.

On the "Big Ledge" is a 10-foot quartz vein, mineralized with iron pyrites. This vein has been opened up by cross-cuts on the surface for 500 feet. A narrower vein has been opened up, being one foot wide, carrying considerable copper pyrites, and runs into the main ledge as a spur, on which a tunnel of 40 feet has been driven. Average assays gave $33 gold and 1 1-10 ozs. silver, and $49.55 gold 17½ ozs. silver, 2 per cent. copper

The "S. F." lies between the G. A. R. and D. A., in the direction of the strike on the G. A. R. vein. This location has been made on a vein of pyrrhotite.

The "O. B." has two distinct veins one 25 feet wide which, from its strike and general character would seem to be the same vein as that on the Big Ledge, although sufficient has not been done to make this conclusive. The second vein has at present a width of nearly three feet. Assays have shown values in gold from $4.00 to $170.53, while a conservative sampling by Mr. S. S. Fowler, M. E. gave $20.00 in gold.

On the "S. H. B." are two converging veins of copper and iron pyrites, on which work is now being done. An average assay gave, gold $1.50, silver 16¾ ozs., copper 11.96 per cent., or $40.44 for all values.

The "Fred D." was located in December, 1895, more as ground for a basis for mining operations for the other claims than for its present value, although there is little doubt that the large vein on the O. B. runs through it. There is a small vein of galena on this claim.

The "J. A. C." has a large iron-capping running through it from the Anaconda, at a depth of a few feet. The ore carries a considerable percentage of of copper and $10 in gold.

The remaining six claims are all good prospects, but as yet very little development work has been done on them.

This company is registered under the Companies Act, 1890, and amending acts, in the office of the Registrar in Victoria, B. C., for 1,500,000 shares at $1.00, non- assessable, of which a portion of the Treasury stock is now offered at 10 cents a share on application to the company.

Certificate of Improvements.

Notice.

GILT EDGE MINERAL CLAIM.

Situate in the Kettle River Mining Division of Yale District. Where located:—In Greenwood Camp, on the east of the Montezuma mineral claim.

TAKE NOTICE that I, John A. Coryell, as agent for James Marshall, free miner's certificate No. 88878, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 15th day of February, 1898.
