Bismarck is Dead.

About 11 o'clock on the evening of July 30th, *Prince Bismarck*, the great German statesman, passed away.

The death of the ex-chancellor comes as a surprise to all Europe. Despite the family's denial, there was an undercurrent of apprehension when the sickness of the prince was first announced, inspired more by what the family left unpublished than by any information given. But when the daily bulletins chronicled improvements in the prince's condition, detailed his extensive bills of fare and his devotion to his pipe, the public accepted Dr. Schweninger's assertion that there was no reason why Bismark should not reach the age of 90. The reports were deemed to be a repetition of the alarm that Prince Bismark was in extremis, which had been oft repeated in the past.

It appears that the ex-chancellor's death was not precipitated by sudden complications, but was rather the culmination of chronic disease, neuralgia of the face and inflammation of the veins, which kept Bismark in constant pain, which was borne with the iron fortitude which might have been expected.

Prince Otto Eduard Leopold Bismarck-Schonhausen was borne of an old and noble family of the "Mark" (Brandenburg) at Schonhausen, April 1st, 1815. He was created a Count, September 16th, 1865, and Prince (Fust) von Bismarck in March, 1871. He was educated at the University of Goettingen and at Greifswald. He spent some time in the Army and subsequently settled down as a country gentleman.

Brought up in the political faith of the "Junkers," or Prussian Tory squirearchy, he became, in 1856, a member of the Provincial Diet of Saxony, and of the Prussian Diet, in which he first attracted attention by his fiery speeches in defence of the old Monarchial party. During the revolutionary period of '48, the services he rendered in the public debates to the Conservative cause led to his appointment as representative of Prussia in the Diet of the Old German Bund at Frankfort. Austria was then powerful in the German Bund. From the time of Bismarck's appearance, however, the voice of Prussia began to have increasing weight. The successful audacity with which he checkmated Austria in intrigue at Frankfort, was the source of constant irritation at Vienna, and naturally tended to produce some estrangement between the Austrian and the Prussian Courts.

Bismarck was sent as an Ambassador to St. Petersburg in 1859, and held that position until 1862. In May of 1862 he became Prussian Ambassador at Paris. Five months later, he was made First Minister of the Prussian Crown. Within the next ten years he humbled the Austrian Empire; destroyed the French Empire and created the new German Empire. He remoddled the map of Europe, dismembering Denmark and France. He enlarged the frontiers of Prussia, and, by the annexation of the various provinces, including the dominions of three dethroned German princes, succeeded in placing Germany, which had previously been the weakest and least-respected of all the Great Powers, at the head of all the States of Europe. The German Bund having at Bismarck's instigation resolved to invade the Elbe Duchies in support of the claim of the Duke of Augestenburg, Austoria, Prussia and Saxony were entrusted with the execution of the task, and war broke out, in 1864, with Denmark, resulting in the loss to her of the Duchies of Schleswig-Holstein and Lauenberg. Instead of giving them up to the Duke, Bismarck, who was now a Count, determined, if possible, to annex them to Prussia. The Austrian and Saxon troops were recalled, and the quarrel eventually led to the war in 1866 between Prussia and Austria, the last-named country being joined by Bavaria, Hanover, Hesse-Cassel, Hesse-Darmstadt and Nassau.

The arms of Prussia were victorious. Austria suffered a crushing defeat at Sadowa (Roniggeratz) in Bohemia. Hanover and the South German States were likewise vanquished, and the War, which was over in seven weeks, led to the treaty of Nikolsburg, by which Austria was permanently excluded from the German Band, and Hanover, Nassau, Hesse-Cassel, and Frankfort, as well as Schleswig-Holstein and Laurenberg were annexed to Prussia, and the North German Confederation, with Prussia at its head, was established in the place of the old Bund, while with the South German States an offensive and defensive alliance was concluded, giving the King of Prussia supreme command of all their troops in time of war.

Of the North-German Bund Bismarck was created Chancellor, and President of the Cessal Council. In addition, he obtained great popularity for creating a representative branch of the New Federal Government on the basis of manhood sufferage. The Diet, which first assembled in 1887, consisted of delegates representing a nation of two million Germans.

Bismarck's next achievement was to prevent the attempted annexation of Luxembourg by Napoleon III.

In 1866, Bismark withdrew for some months from active public life, but he was in power again before the end of the year. Then came the Franco-German War of 1870, and with it an unbroken series of victories. King William was able, through his Chancellor, to dictate terms of peace to his helpless assailant.

A Big Stampede.

Dawson City, N. W. T., July 11 (via Seattle, July 30.)—The Canadian gold commissioner issued a proclamation July 9 declaring the Dominion creek hill and bench claims open for location by all persons holding free miners' licenses. In less than one hour the greatest stampede in the history of the Klondyke had started to Dominion creek, 40 to 50 miles away, over hills and marshes. Many women joined the procession. In two hours 1100 people had reached the Bonanza creek ferry two miles away. The trip will require six days, and will be attended by many hardships. Some of the stampeders have already returned in disgust. The value of the Dominion bench claims is entirely a matter of conjecture.

EDITORIAL NOTES.

The B. C. Elections.

Referring, a day or two ago, to the General Election in British Columbia, the Journal, Independent Conservative, says editorially: "Premier Turner of British Columbia has announced that his Government will not resign, but will meet the Legislature to see what will happen. It is admitted that he has but eighteen supporters in a House of 38 members and also in a minority of 1,500 in the general election vote. When that is the best a Government can do which goes to the polls with the advantage of patronage and prestige it is a pretty sorry result. Mr. Turner ought to have the self-respect and decency to resign at once. Any of his supporters who value responsible government and the welfare of the State more than the mere interests of salary-grabbers should tell him so."

The above comment in the main is very much to the point, yet there is one thing the Journal evidently overlooked or did not understand, viz: that although the Turner party had the advantage of patronage, it laboured under the disadvantage of possessing an execerable prestige, so much so that had it not wielded a weighty patronage the result of the elections would have left the party in such a position that it would have been practically annihilated. The prestige of the Turner Government stinks in the nostrals of the people.

The Corbin Charter.

At will be seen in another column in this issue in which reference is made to one of Mr. Corbin's railway projects, much speculation is aroused on account of his having declared his intention to again apply to the Dominion Government for a charter to construct the Kettle River Valley Railway.

Why he should make another application for permission to build the road in the face of his former defeat is hardly understood says the Spokesman-Review, unless he has received new assurances of support. Evidently the Journal referred to loses sight of the great influence the outcome of recent events in this province will exercise upon the successful application for a charter if again made, and also the International turn the aspect of affairs took just before the defeat of the former application, is evidently also overlooked.

It will be fresh in the minds of our readers the attitude which the Turner Government assumed when it petitioned the Dominion Government to disallow the charter for the Kettle River Valley Railway, and although it can be said that this petition did not carry as much weight with a majority of the members of the Commons as might have been expected, yet did it no doubt influence some to some extent.

Much or little as the influence was which was asserted by the Government petition, recent political events have so changed the status of the two provincial parties that in the forthcoming application to the Dominion house, it is safe to say that no adverse influence will be exercised as far as the dominent provincial party in the province is concerned, and therefore one stumbling block is removed, and so much encouragement given to Mr. Corbin.

Then again, as before mentioned the International phase of the question has to be taken into consideration, and an answer given as to weather it is politic to refuse a foreign corporation the right to construct railways in our territory, when all that is asked of the state is the bare permission to do so.

For years the two great parties in Canada have preached the doctrine, freer trade relations with the United States, and great efforts have been made seeking a better understanding between the two countries upon the subject, therefore if the protestations have been sincere, the question naturally presents itself; how is it possible for such desires to be consummated, if avenues of communication between the two countries are not established?

Looking at the matter from the broader or International standpoint, it is easy for people to see the necessity for the granting of such a charter as the one Mr. Corbin applied and will apply for, and under these circumstances it is easy to entertain the conviction that when the application for a charter for the Kettle River Valley Railway is again brought to the attention of the federal authorities, the same will be granted without hesitation, and in spite of all that the C. P. R. or any other influence can do to prevent it.

OUR OTTAWA LETTER.

Ottawa, July 29th.

In a few days, or at most a week or two, the Quebec Conference will be in session, and it is difficult to estimate the extent of the benefits that may reasonably be expected to accrue to those participating in this most important convention. Not only will the occasion be a very gratifying one, as indicating the vast improvement in the feeling between the British Empire and the States, which has made such a gathering possible, but it is also of more than ordinary home interest to Canada, as the preliminary discussion upon the action of the Government which led to the meeting being arranged, has produced less partisan cavilling than perhaps any other act of the present adminstration. It would be pleasant to believe that in all matters, where it is to the advantage of Canada that her people should present a united front. This demeanor of the Opposition should be set as the standard.

THE PERSONEL AND THE PROGRAMME.—The importance of the gathering may be seen at a glance, from its personel. On behalf of the Motherland, the Imperial Government has sent Lord Herschell, twice Lord High Chancellor of Great Britian; Canada will be represented by her Premier (Sir Wilfrid Laurier.) Sir Richard Cartwright, Sir Louis Davies, and Mr. John Charlton, and Newfoundland by her Premier (Sir James Winter) or Receiver General A. B. Morine. On the other side the United States will send General John W. Foster, John A. Kasson, Nelson Dingley, Senator Gray, Senator Chas. W. Fairbanks, and Thomas J. Coolidge.

The list of question which in all probability will be considered, also gives one the idea of the tremendous importance of the gathering. The Trade Relations; the Behring Sea Dispute; the Atlantic Fisheries; the Preservation of the Fisheries; the definition of International Boundaries; the Bonding Privilege; the Alien Labor Law;—these are some of the items on the bill of fare. More than one of these has created trouble, and been a perennial source of irritation since the Declaration of Independence and all of them have for many years occupied the best efforts of the keenest and most trained statesmen of both Empires, but never before have these questions been approached in the spirit of mutual goodwill and reciprocal confidence with which they will now be treated; and as these sentiments must always be the strongest influences in the settling of disputes, there is better hope to-day than ever in the past, that the Quebec Conference of 1898 will go down in history as one of the grandest epoch making events of the century. That it will accomplish all that is hoped of it, it is scarcely reasonable to expect, but the very fact that our Government has been able to bring about such a meeting entitles them to the gratitude, not of Canada but of the Empire at large, and evidences are not wanting that this fact is appreciated, both at home and abroad.

THE STORY BEARS REPEATING.—The story of Manitoba's splendid progress is becoming almost monotonous in its unvarying completeness, but it is a pleasant page to dwell upon. Mr. W. D. Scott, Provincial Immigration Agent in Ontario, for the Prairie Province, who has just returned from a trip to the West corroborates everything that has been said of the magnificent outlook. "Crops are going to be heavy." "Business is active in all lines." "Land is selling well." "There is work for all who want it." "Everybody seems to have money." "It has been a great year for settlers." and so on. Such is the epitome of his report. Settlers are coming from everywhere he says. New districts recently opened up are filling rapidly. The class of settlers is all that can be desired—even the poor Galicians are going to turn out all right.

NOTES.—The announcement that the Earl of Minto has been chosen as Lord Aberdeen's successor, receives additional interest from the fact that, as Lord Melgund he came to Canada with the Marquis of Landsdowne and served under General Middleton as chief of his staff in the Northwest Rebellion. During his previous residence here Lord Melgund gained golden opinions, both in civil and military circles, and he therefore comes back to fill the gubernatorial position, with all the prestige and advantage then obtained.

Prof. Saunders, Director of Experimental Farms, has left on his annual tour of inspection through the West. He goes from here to Brandon and then on to Asassiz where he will meet Prof. Fletcher, Dominion Entomologist. Dr. Saunders will be away five weeks.

Ex-Finance Minister Foster has gone West, and expects to address public meetings at all important points en route to the coast. It is rumored that his chief topic will be—"The fulfillment of my prophecy that Grit rule meant inevitable ruin."

Great reports are coming in of the tremendous shipping business being done this season by Canadian liners. All the Montreal boats are congested with traffic both in passengers and freight. Halifax, St. John and Victoria are having similar experience and the various lake ports were never busier.

Terms of Peace.

Although not as yet definitely known yet are the following supposed to be the terms offered by the United States to Spain in reply to the latters overtures for peace.

The absoute cession to the United States of Puerto Rico and all islands in the West Indies save Cuba.

The relinquishment by Spain of her sovereignity in Cuba.

The United States will exercise control there until a stable government can be established.

The acquisition of coaling stations in the Lardrone islands and perhaps the Carolines.

No assumption of Spain's Cuban or Puerto Ricoan debts by the United States.

No war indemnity from Spain.

With regard to the Phillipines the ultimate policy to be pursued will depend greatly upon the turn affairs may take in the very near future, but the general disposition of the United States would seem to be to allow Spain to participate in the final adjustant of affairs in those islands.

The Commission.

Lord Herschell, P. C., G. C. B., formerly Lord High Chancellor, the head of the British commission to settle the differences between the United States and Canada, arrived in New York on July 27, on the White Star liner Teutonic from Liverpool. He was accompanied on the voyage by his son. Lord Herschell declided to speak of his mission on this side of the Atlantic, or express himself in regard to the Spanish-American war or the peace prospects, initiated by the French ambassador at Washington. Lord Herschell left to-night for Ottawa in a special car via the New York Central and Hudson River railroad.

The joint high commission to settle the difference between Canada and the United States will convene at Quebec on August 10. The questions upon which there is so much dispute and which will be considered by the commission, included the following: Fur seals in Behring sea and the North Pacific ocean; Atlantic and Pacific coast fisheries, and fisheries in inland waters contiguous to the frontiers; delineation of the Alaskan boundary; alien labor laws; transportation of merchandise in bond through the United States and Canada; naval vessels on the lakes, mining rights of citizens of one country within the territory of the other; reciprocity in trade, and in conveyance of persons in the custody of officers of one country through the territory of the other.

The United States will be represented at the Quebec conference by John A. Foster, reciprocity commissioner Kasson, Senators Grey and Fairbanks and Representative Dingley. The Canadian and Newfoundland arbitrators, of whom Lord Herschell is the recognized head, are Sir Wilfred Laurier, Sir Louis Davies, Sir Richard Cartwright, Mr. Charlton, M. P., and Sir James Winter, premier of Newfoundland.

MINING NOTES.

Recent work on the Bullion claim in Greenwood camp, disclosed two fine outcroppings of ore, which have every appearance of belonging to two strong ledges. The Bullion belongs to R. Stuart, F. M. Kerby and others, and is so sutuated among the other large properties of the camp, that it is destined no doubt to become a very valuable claim.

Mr. J. Myers is in charge of the work being carried on on the Keno claim in Wellington Camp. The Keno is a promising property and the owners expect to have it in presentable shape in the near future.

Quality is the Starting Point Here.

To Start Work.

A. B. Patterson of the Lemon Gold Mining Company, oparating claims in Camp McKinney, was in the city Saturday. "I have just returned from Omaha," said he, "where I have been conferring with the stockholders of the company. Arrangements were made for the development of the property and the erection of a stamp mill. I am going up Monday to commence operations. We have encountered a fissure vein on the Gold Standard claim, one of the group, and the stamp mill will be erected there. Mining experts have assured us that we have the Cariboo vein."—Spokesman Review.

Corbin's New Plans.

An indication of what D. C. Corbin proposes to do with some of his money realized from the sale of the Spokane Falls & Northern and Nelson & Fort Sheppard railways to the Great Northern was received last night in the following special despatch:

"Ottawa, July 29.—Notice will appear in tomorrow's official Gazette of D. C. Corbin's intention to make a new application to parliament for a charter for the Kettle Valley railway. The announcement has caused a sensation in the railway circles opposed to the bill."

The Kettle Valley railway project is that for which a charter has been secured from congress to cross the north half of the Colvill indian reservation. The projected line is to leave the line of the Spokane Falls & Northern presumably in the vicinity of Kettle Falls, go up the Kettle valley, cross into British Columbia, follow the valley for about 15 miles into British Columbia territory, then cross back into the reservation, still following the valley, and once more cross into British Columbia, touching and tapping the rich Boundary creek countay. Mr. Corbin made application to the last dominion parliament for the charter in British Columbia but he was bitterly opposed at Ottawa by the Canadian Pacific and finally defeated after a long and hard fight, the defeat coming right after the Easter holidays this year.

Now that Mr. Corbin has sold out his interests in the S. F. & N. system and connecting lines the supposition is that he has an agreement with President Hill to construct this line or to construct it for himself, probably the latter. Mr. Corbin has gone to New York. This announcement from Ottawa would indicate that perhaps he will soon be in the Canadian capital.

Speculation is aroused by his new application. Why he should make it in the face of his former defeat is hardly understood, unless he has received new assurances of support.—Spokesman Review.

Mad About It.

Referring to the question of road building between Glenora and Teslin lake, of which so much was heard in pre-election days, the Glenora News approaches the subject very much in the same spirit a bull would approach a red rag, when it says in a recent issue:

"The 200 Klondikers between Glenora and Teslin lake who are waiting for a wagon road to be built had better order in another year's supplies to sustain them until the road has been built, for in spite of all talk to the contrary, there is no hope of a wagon road this year.

For a month past, every mail has brought us Victoria or Vancouver papers telling us that wagon roads and railroads were to be begun immediately. The premier has talked for publication, and in all his talk has not left a possibility of a doubt that at least a wagon road would be built. Yet the instructions that are sent from Victoria to the government officials and the Mackenzie, Mann & Co. men at Glenora, have been directly to the contrary.

"The latest papers have contained declarations to the effect that Mackenzie, Mann & Co. have signed the contract to build both wagon road and railroad and that work would begin immediately, yet the instructions sent on here are to put on the necessary men and build a trail to Teslin.

"Last year the Calibreaths built a trail from Telegraph creek to Teslin lake. Then the government appropriated $12,000 for trails in this vicinity, and some of that was put on the Calibreath trail. Then the government official here was told to take the balance of the money and build a trail on top of the trail previously built. Then came further instructions to the government agent to build another trail on top of the one now existing, no matter what the expense might be, and now comes orders to Mackenzie, Mann & Co. to build another trail on top of all of 'em, the government to pay the freight.

"The result of all this is that there will be a good trail to Teslin lake, one trail on top of another until the pay-streak of trail is as thick as the muck on some parts of it."

This is only one instance in which the people are finding out that prior to election days the Turner party pursued a policy of complete duplicity, but more instances will be brought to light soon and then politically speaking the province will be shaken to its center.

LOCAL AND DISTRICT.

The midsummer holidays over, the several public schools of the district open to-day, much to the regret of both pupils and instructors no doubt.

Mr. J. McNicol and his partners are having some work done on the Meadow Lark claim which is situated in Skylark camp and near to the Skylark claim.

The Brooklyn Hotel in Greenwood Camp has changed hands, Mr. Graff having a few days ago sold out his interests to Messrs. McDonald and McMillan.

The new government buildings at Fairview are being pushed forward, and it will not be many weeks now before the officials at Osoyoos will move to their new place of abode.

Cascade City is enjoying quite a building boom, as four or five new hotels, and other places of business are in course of erection. Cascade City is commencing to feel the effect of railway construction, and soon this influence will be felt throughout the whole of the Boundary creek section.

Good progress is being made with the construction of the new road between Fairview and Keremeos. As soon as this road is completed it is to hoped attention will be directed to the improvement of the roads leading up the main Kettle river above Rock creek, and between Rock Creek and the Anarchist mountain settlement.

A very enjoyable dance was held in Barretts' Hall, Greenwood City, on Friday evening last, a large number of people from all over the distaict being present. The proceeds of the ball after expenses were defrayed, were donated to the Fire Brigade fund, which by this means and private donations has been added too recently in a substantial manner.

About a week ago a pet horse belonging to Lamb Bros. got bitten by a rattlesnake. Evidently the horse was feeding as the wound was inflected on the side of the neck just behind the jaw. For three or four days the animal was in such a state it could not open its mouth, but upon suppurtion setting in much relief was found and now the horse is fast recovering.

The attention of the authorities is directed to a horse roaming at large in the neighborhood, which should certainly receive treatment at the hands of it owner or be destroyed. It is understood the animal has been in its present state for the past three years, and as it presents a most disgusting sight something should be done in the matter at once.

Mr. James Beckwith met with rather a painful accident last week, which may lay him up for some time. While at work Mr. Beckwith dropped an open knife by his side, which fell with the blade pointing upward. Presently he had occasion to kneel down to do something, and was reminded of the presence of the knife when it penetrated his leg, inflicting an ugly wound.

The C. P. R. survey party under the able direction of Mr. Rice has again returned to the neighborhood of Boundary Creek, as the party is now working to the west and south of Summit camp. It is mooted that in conjuction with the construction of the main line near Summit camp, a branch road will be built which will tap Greenwood and Wellington camps, thereby giving the proprietors of properties in those camps an outlet for their ore.

Scientists tell us that the sun is gradually loosing its force, and that in a few million years that body will be in a congealed state. It is quite possible to believe this for yesterday it put forth its greatest effort of the season and was only able to make the thermometer register 101½ degrees in the shade. Poor old heavenly body! it is much to be pitied that it makes such a miserable attempt at being warm, after being fired up for so many millions of years. If it dosenot do better in future an electric stove will have to be started to lend assistance in warming up the atmosphere.

Midway is much closer to some of the principal camps in the district than many have been led to suppose. During the past week parties have been in town purchasing supplies who came from West Copper camp. These parties have constructed a short piece of trail which leads them from their camp out on to Ingram creek, and by so doing they put themselves in touch with the wagon road used by the ranchers in that neighborhood. In constructing this trail the miners of West Copper camp are closer in touch with Midway than any other point on Boundary Creek, and will no doubt make this place their purchasing point for the future.

Mr. F. Richter is having the finishing touches put to a fine residence he has built on his property at Keremeos this summer.

Dr. Jakes was in town on Saturday last, having been called to render his professional services to Mrs. C. M. Melville, who was prostrated during the week with a severe attack of gastritis. It is pleasing to be able to say that the patient is fast recovering under the doctors able treatment.

Mr. R. N. McEntire, of Greenwood, who with his wife and a party of friends had been spending a few days camping out on the the main Kettle river just above Rock creek, returned home on Thursday last. Mr. McEntire reported having had a jolly good time, as the trout were plentiful and took kindly to the fly, and the bathing was all that could be desired. If people generally could only understand what an enjoyable time can be spent while camping out for a few days in some of the lovely spots to be found in this neighborhood, many more would follow the example of Mr. McEntire and his friends.

Farmers on and in the neighborhood of Anarchist mountain are blessed with magnificent crops this year. The crops are by far the best ever seen in thta portion of the district, and would compare favorably with those of any other section of the province. The bulk of the grain will not be cut for hay as in former years, but will be allowed to mature and will then be thrashed. Five new binders have been ordered by different ranchers, beside a large quantity of other new machinery, so it looks as if the new settlers on and around the mountain, are in a flourishing condition and in a fair way to receive substantial compensation for the great outlay they have made in money and labour during the past few years.

As soon as the railway furnishes a means of communication between this district and Kootenay and North West territory points, a splendid market for fruit will be thrown open. If those engaged in ranching pursuits in this district could only realize this, they would pay more attention to the cultivation of fruit than they do at present. Car loads of fruit is being shipped into the North West each year from different parts of the province, and yet there is an ever increasing demand, and as this district will have direct communication with the market, it will enjoy an advantage which it is to be hoped those holding land in these parts will not allow to slip by them. Hundreds of acres of land in these valleys should be planted to fruit in the near future, and if such is done the renumeration will be a bountiful one to those who will carry it out.

BOUNDARY CREEK MINING AND MILLING COMPANY, LTD. LY.

Incorporated October 21st, 1896.

HEAD OFFICE, GREENWOOD CITY, B.C.

Capitalization $1,500,000, in $1 Shares, Treasury Stock 700,000 Shares.

COMPANY'S PROPERTIES.

The Company's mining properties now consist of fourteen claims, viz, the D. A., G. A. R.. Bi g Ledge, O B, S. H. B., Fred D., S. F., J. A. C., P. H., C. S. & H., E. C. B, Prospective, Spokane and Granite Falls.

SIX OF THESE HAVING BEEN ACQUIRED SINCE INCORPORATION

OFFICERS OF COMPANY:

- - - - PRESIDENT
D. A. HOLBROOK - - - - - - MANAGER
E. JACOBS - - - - SECRETARY-TREASURER

BANKERS:

BANK OF MONTREAL - - VERNON, B.C.

DESCRIPTION.

On the "D. A" is a vein about 20 inches wide, with a pay-streak of 4 to 12 inches; from this 8,653 lbs. of ore was shipped to the smelter, giving $103.15 gold per ton, silver 74 7-10 ozs., and 2 per cent. lead. A tunnel is being driven on this vein from which ore is being taken. On the same property is a larger vein (quartz) carrying galena and pyrites.

The "G. A. R." has a 30-foot shaft sunk on a 2-foot vein, heavily mineralized with an intimate mixture of iron and copper pyrites, galena, blende and silverglance. The finest pieces of wire silver found on Boundary Creek were taken from this shaft. Average assays from different places across the vein gave $8.00 gold, 50 ozs. silver; also $8.00 gold and 150 ozs. silver and one, the latest return—$15.05 gold and 196 4-5 ozs. silver per ton.

On the "Big Ledge" is a 10-foot quartz vein, mineralized with iron pyrites. This vein has been opened up by cross-cuts on the surface for 500 feet. A narrower vein has been opened up, being one foot wide, carrying considerable copper pyrites, and runs into the main ledge as a spur, on which a tunnel of 40 feet has been driven. Average assays gave $33 gold and 1 1-10 ozs. silver, and $49.35 gold 17½ ozs. silver, 2 per cent. copper

The "S. F." lies betweed the G. A. R and D. A., in the direction of the strike on the G. A. R. vein. This location has een made on a vein of pyrrhotite.

The "O. B." has two distinct veins: one 25 feet wide which, from its strike and general character would seem to be the same vein as that on the Big Ledge, although sufficient has not been done to make this conclusive. The second vein has at present a width of nearly three feet. Assays have shown values in gold from $4.00 to $170.53, while a conservative sampling by Mr. S. S. Fowler, M. E. gave $20.00 in gold.

On the "S. H. B." are two converging veins of copper and iron pyrites, on which work is now being done. An average assay gave, gold $1.50, silver 16¾ ozs., copper 11.96 per cent., or $40.44 for all values.

The "Fred D." was located in December, 1895, more as ground for a basis for mining operations for the other claims than for its present value, although there is little doubt that the large vein on the O. B. runs through it. There is a small vein of galena on this claim.

The "J. A. C." has a large iron-capping running through it from the Anaconda, at a depth of a few feet. The ore carries a considerable percent age of of copper and $10 in gold.

The remaining six claims are all good prospects, but as yet very little development work has been done on them.

This company is registered under the Companies Act, 1890, and amending acts, in the office of the Registrar in Victoria, B. C., for 1,500,000 shares at $1.00, non- assessable, of which a portion of the Treasury stock is now offered at 10 cents a share on application to the company.
