...Copper and Gold...

The Similkameen district is noted for

its ledges of Copper-Gold ores.

Quality and Price.

While W. T. Shatford & Co. are noted for the quality and price of the goods sold by them. PROSPECTORS and MINERS operating in the Similkameen and surrounding mining camps, would do well to outfit at one of our stores, where everything is kept that is needed in the mining business.

Instead of buying outside, buy right at home, and so save money, and this more particularly refers to prospectors going into the district above referred to.

W. T. Shatford & Co.

USE O.K. FLOUR:

The Best Flour in Canada.

Winner of 1st prize at New Westminster exhibition AGAINST ALL COMERS.

Certified by analysts to be absolutely pure, a perfect flour, and strongly recommended for use by all, as superior to any flour in the British Columbia market. Our flour is heralded by every dealer from Penticton to Grand Forks. Insist on receiving O. K. flour and you will get the best.

OKANAGAN FLOUR MILLS CO.
ARMSTRONG, B. C.

MIDWAY HAS THE BEST SMELTER SITE.

No Other Site in Boundary Creek District to Equal it.

Its Advantages and Superiority Conclusively shown.

The coming of Mr. Paul Johnson to the Boundary district has given rise to much newspaper talk as to the purpose for which he comes and the particular part of the district that will most largely directly benefit by the carrying out of the undertaking he is stated to have in hand. Cascade City, with its fine water power; Grand Forks and Columbia, elated with the prospect of prosperity following the commencement of construction of the Granby company's smelter, and Greenwood with neither water power nor a site suitable from the point of view of economic operation, are all endeavoring to make capital out of their assumed superiority one over the other in respect of the advantages they offer for the location and continuous working of a large smelter.

Now those whose business it is to enquire into these matters assert that nowhere on Boundary creek, unless within reach as well of Kettle river, is there sufficient water, taking the minimum flow as a basis for their calculations, to operate a large smelter under modern economic conditions, in which the handling of ores and the disposal of the slag by water-power are very important items. They state that probably a small smelter could be profitably run, say at Anaconda, below Greenwood, where the British Columbia Copper company, of New York, owning the Mother Lode mine, has already secured a site for ore-treatment works of some kind and has applied for a record of about three times as much water as comes down Boundary creek at the time of its smallest flow. It is quite practicable they say to operate even a large smelter in the old way of removing by trucks or wagons all the slag as it leaves the furnaces, but this involves a much heavier expense right along than the modern method of removing it by water power. The question, therefore, appears to be largely one of water power, and if this be granted, it resolves itself into one of locating large smelters near enough to the Kettle river to allow of the water of that stream being utilized to advantage.

Keeping in mind this important question of water power, there can be no doubt a smelter

SITE AT OR NEAR MIDWAY

would offer the most advantages for the operation of a smelter on the western side of the Boundary mountain.

There are two sites in particular in the vicinity of Midway that are regarded by smelter experts with much favor. One is above the town, near where the Boundary creek valley meets the Kettle river valley, and the other about two miles west of the town on the Sullivan property. The former is much preferred for several important reasons. It is on a high bench of more than sufficient area to meet the requirements of extensive smelting operations, has a dumping ground that would take all the slag likely to be produced for years, is crossed by the Columbia and Western railway so is easily accessible to both fuel and ore trains, is at an elevation that would admit of the use of water from Boundary creek could suitable arrangements be made with the holders of prior water rights, and is within easy pumping reach of the Kettle river which by means of big force pumps would supply the requisite additional water power to handle ore and slag economically. Further there is clay in the neighborhood for bricks and furnace purposes and there is plenty of lime for fluxing should it be found that the ore of the district, much of which contains lime, carries too little for the purpose. Then there is another great advantage in that this site lies below all the important mines of Boundary creek so that there would be a down grade for the haulage of ore to the smelter.

The foregoing considerations have reference to the location and operation of a

LARGE CONVENIENTLY-SITUATED SMELTER.

Of course small local smelters can be and possibly will be established in different parts of this extensive area of mineral-bearing country. There is an excellent site below Boundary Falls for a smelter, with ample room for works and a good dumping ground, but the comparatively small quantity of water available would materially restrict its treatment capacity. There is another site about four miles west of Midway, offering similar advantages to those just mentioned with the additional one of being near Kettle river, but it is high above railway level, so that every thing would here have to be handled up-hill and so would be the reverse of economical in working. At Rock Creek, too, twelve miles from Midway there is a suitable site not far from Kettle river, but as yet it is uncertain whether the railway when constructed westwards from Midway—which may not be for a couple of years to come—will pass near it or not. Possibly, too, there will eventually be local smelters up the main Kettle river above the West Fork or on the latter stream itself, but these are all of minor importance as compared with the question of the prospective early establishment of a big smelter somewhere in or near the Boundary creek valley.

There are though, other things to be considered than the advantages named above. Possibly the operation of a smelter in the neighborhood would injuriously affect vegetation and, too, render the town and immediate vicinity less desirable for residential purposes, but since

A GREAT INDUSTRY

employing continuously much labor brings with it a big pay roll, a large accession of population, an expanding trade and enhanced values for real estate, these eminently practical considerations would probably outweigh sentiment, with the result that for business reasons it would be welcomed here. After all it is the pay-roll basis that determines the commercial importance of a town and makes for substantial and permanent progress. Midway has more natural advantages than any other town in the Boundary Creek district. It is so situated that it should be the distributing point for Boundary Creek, Rock Creek, the upper main Kettle River, Camp McKinney and the flourishing mining camps south and south west across the International Boundary line. It will be for some time, the terminal divisional point of the Columbia and Western Railway and the most important railway point in the district. Later it will be the junction station of branch lines coming from Republic, Wash. on the south and the upper Kettle River mining camps on the north-west. It has, too, numerous very promising mineral showings in the neighborhood only awaiting development. If to these substantial advantages can be added industries that will give it a large local pay-roll its future will be assured and the most sanguine expectations of its founders be more than realised.

PUBLIC OFFICES.

POST OFFICE—
Mails going west close about 3 p.m. on Tuesdays, Thursdays and Saturdays; going east on Sundays, Wednesdays and Fridays at about 2 p.m.
P. O. Money Order Office.
Edward A Hain, Postmaster.

CUSTOMS OFFICE—
Office hours 9 a.m. to 4 p.m; Saturdays 9 a.m. to 1 p.m.
R. Gardom, Acting Sub-Collector.

MINING RECORDER'S OFFICE—
Office hours 9 a.m. to 12:30 noon, and 1:30 p.m. to 4 p.m; Saturdays 9 a.m. to 1 p.m.
Wm G McMynn, Recorder for the Kettle River Mining Division.

COUNTY COURT OF YALE—
Wm Ward Spinks (Vernon) Judge.
Wm G McMynn (Midway) Registrar and Clerk of the Peace.
A G Pemberton (Ducks) Sheriff.
G B Taylor (Greenwood) Deputy Sheriff.

SUPREME COURT COMMISSIONERS—
J P McLeod and Wm G McMynn, Commissioners for taking affidavits within British Columbia.

PROVINCIAL POLICE—
Wm G McMynn (Midway) Chief Constable for Southeast Yale with constables stationed as under:
Cascade City, D J Darraugh,
Grand Forks, I A Dinsmore,
Niagara, G D Cox,
Midway, Geo Cunningham,
Camp McKinney, Chas Winter,
Fairview, J R Brown,

DISTRICT CORONER—
Dr R W Jakes, M D, C M, Coroner for Kettle River and Grand Forks Mining Divisions.

REGISTRY OF MARRIAGES—
Wm G McMynn, Registrar.

PUBLIC SCHOOL—
A A McPhail, Teacher.

BOUNDARY CREEK LICENCE DISTRICT—
E Jacobs (Midway) and T W Coleman (Trail), Licence Commissioners.
D J Darrough, Chief Licence Inspector. All Provincial Constables are Licence Inspectors. Regular meetings of Board on June 15 and Dec. 15; special meetings when ever called by Chief Inspector.

MONDAY, AUGUST 21, 1899.

THE SMELTER SITE QUESTION.

It has transpired that after all Mr. Paul Johnson did not have in his pocket a ready-made smelter for Greenwood to "be completed by the 1st of November" as common report would have had people believe. Since the article upon this subject appearing on our first page was printed Mr. Johnson has visited Midway two or three times and although nothing definite has yet been done in the matter it is an open secret that he is very strongly impressed with Midway as a most favorable site for a smelter. At present it is premature to say anything more upon the subject.

SURFACE RIGHTS TO MINERAL CLAIMS.

Last month the question of the right of owners of Crown-granted mineral claims to purchase surface rights was discussed at a meeting of local representatives of such owners. It appears that legal difficulties in certain cases restrict owners in this matter. It is scarcely politic at present to state what these difficulties are. We have reason to believe, though, that the Provincial Government has no intention to deprive the owners of mineral claims of any rights they are legally entitled to, nor indeed to do anything that may tend to hamper the development of the mineral resources of the Province.

The Federal House Prorogued.

An Ottawa dispatch says:—The Dominion Parliament was closed on 11th inst., with the usual ceremonies. It was the third longest session on record, other long sessions being in 1885 and 1891. Altogether this year's session was unprofitable. The only Bill of consequence passed was that providing for the extension of the Intercolonial Railway to Montreal commenced three years ago.

Attorney-General Henderson.

A press despatch states that Mr. Henderson's return in New Westminster is a foregone conclusion. Certainly neither Mr. Munn nor Mr. Reid could defeat him. The electors of New Westminster by an overwhelming majority intend to take advantage of this opportunity of securing cabinet representation. While there is plenty of opposition talk, there is no organization and no enthusiasm.

Silver Bell Consolidated.

The Directors of the Silver Bell Consolidated Mining Company, finding the ore in their mine in the Southern Belt of the Trail Creek district entirely refractory, decided to suspend work on it for the time. Recently they issued a circular to the shareholders in which the following occurs: Knowing that it does not require such a large outlay to successfully develop and operate and operate a free-milling property, the directors requested an expert whose judgment could be relied upon to be on the look out for a free-milling claim, and they have now the pleasure of informing the shareholders that they have secured a working bond on three claims in Camp McKinney, viz., the Pathfinder, New York and Gold Cup, being near the Ecuador, Fontenoy and other well known properties. Work is being vigorously prosecuted on these three claims, and the last report from the Superintendent states that a good strong ledge has already been found on the New York, which is apparently the same as the one found on the Ecuador, and can be traced across the Night Rambler. Development work will also be done on the Gold Cup and the Pathfinder.

Ex-Attorney General Martin.

Coast newspapers report that Ex-Attorney General Martin before the benchers of the Law Society has admitted the facts alleged in the case of champerty charged against him by the defendant in the suit of Cavessa vs. Nichol, in which Martin took the case for half the money to be recovered and a lease of the quarry involved. The benchers suspended him until the first week in October and in the meantime he will appeal to the full court as to whether champerty is an offence in this province.

Company now has about 50 men employed at the mine and on the new road from the mine to near Carson.

The steam hoist having been installed on the Snowshoe, Greenwood camp, the shaft is being deepened. It is already down 180 feet.

The mine buildings on the Gold Drop, Greenwood camp, are about completed.

A machinery site is being graded on the Sunset, Deadwood camp.

The new road to the Buckhorn, Deadwood camp, and the mine buildings are about completed, so attention is now being given to shaft sinking and to bringing in water to the machinery site. The shaft is already down about 25 feet.

The Vancouver "News-Advertiser" remarked in a recent share market notice: As the railway gets further into the Boundary country so do prospects there increase and the various Boundary Creek stocks are firmer.

The Vernon "News" says: Mr. Forbes G. Vernon, who returned recently from London, has gone up to the Cariboo country, having been successful in forming an English Company, with a capital of $250,000 to prosecute hydraulic mining in that district.

The tunnel on the Morrison, in Deadwood camp has reached the ledge at about 625 feet in. Where intersected some nice-looking copper ore was opened up. Drifting both ways in the footwall is the work now being carried out, to determine the strike of the ledge.

A fine lump of ore, weighing between 400 and 500 lbs. is being sent from the Boundary Creek Mining and Milling Company's Gold Bug claim to Rossland. Native silver, galena and copper pyrites show freely in it so it cannot fail to attract much notice in the metropolis of West Kootenay.

The north drift at the 200-foot level of the Mother Lode mine, Deadwood camp, is now in about 400 feet from the main shaft. At about 100 feet further ahead it will be under the winze in the old workings. A station is being cut for a "Special" hoist to be used whilst sinking this winze about 200 feet through to connect with the north drift below.

At the Knob Hill mine, in Greenwood camp, a mass of ore about 225 feet each way on the four sides and about 170 feet from the surface, is blocked out ready for stoping. A station is being cut out at 350 feet in from the mouth of the main tunnel preparatory to installing a hoist and sinking a shaft in the big body of ore here crosscut by the tunnel.

A hoist is being put in position at the mouth of the shaft already sunk 330 feet on the western side line of the Victoria and the eastern side line of the Old Ironsides. Another 80-horse power stationary boiler is being bricked up in the Old Ironsides machinery house. With three boilers to supply steam, the Old Ironsides, Knob Hill and Victoria should have ample power for sinking and hoisting purposes for some time to come.

Messrs. W. S. Keith (of Keith & Ketchum, mining brokers, Greenwood) J. Edwards Leckie and Ronald Harris, M. E., last week paid a visit to Copper creek which joins the Main Kettle river about 45 miles above Rock creek. The object of their visit was to examine the Lottie F. group on one of the claims of which a strike of bornite ore was made recently. It is stated that the surface showing is 300 feet in width and that ore was met with in several openings on the lead. Specimens from the bottom of an 8-foot prospect hole assayed 40 per cent copper and $3 in gold.

The "Spokesman Review" said recently: Morrison (Boundary Creek) is mounting skyward. The stock was bid up to 16 1-2 with none offering at less than 18. Eastern Canada is taking the stock freely and the price is advancing there at a rapid rate. There is a stir in Waterloo, (Camp McKinney) Toronto and Montreal are arousing from the summer lethargy and this stock which was a prime favorite last winter, is again becoming popular. The price has not risen but the orders in hand are sufficient to clean up about all the weak stock offered. Bids of 8 1-4 were offered without response. The installation of machinery upon the Crystal Butte mine and the wakening interest in the Meyers Creek district has caused a demand for the stock of that company and 6 1-2 was bid for it freely with none offering.

The Oro Fino.

The Oro Fino at Fairview, owned by a Vancouver Syndicate, is a promising property. Mr. Fleming Robertson, Manager of the mine, returned from Fairview on Saturday with two small gold bricks, the result of a run through the prospecting mill of three stamps. One brick is 6 3-4 ounces, the other weighing 32 ounces. Both are on view in the Canadian Bank of Commerce. They are almost pure gold, there being little silver in them. Mr. Pellew-Harvey will determine their exact value, as Mr. Pellew-Harvey reported some time since it would.

"How long was the run?" Mr. Robinson was asked.

"We had a little run for the small brick, just to get things in shape. Then we ran 14 days, but there was broken time in that. It was not a steady run. There was a certain amount of delay. How many tons? Well I think the gold bricks may be considered as the result of 70 tons."

Mr. A. Grant, Secretary of the Oro Fino Mines, who was with Mr. Robinson, said:

"Of course, as you know, our mill is only a 3-stamp prospecting one. We got it to enable us to handle ore in development instead of having to send to the Coast to get it assayed. If everything justifies us to erect a mill, why in she goes."

"Does everything justify?" asked the reporter of Mr. Robinson.

"The result is certainly very good," he replied. "So far everything is very satisfactory. I am satisfied with the result of this run and it is now for the Board to decide as to the advisability of putting in three more stamps and a concentrator. We had no concentrates saved at all during this run. Although there it not very much base ore, the concentrates run from $2 to $4. What concentrates are in the rock run high; a little iron and galena."—"News Advertiser."

Fairview.

Parties are hard at work painting the Government buildings at Fairview, and when they complete their labors the Gold Commissioner's office and residence will present a very neat appearance

It is strange the Government do not provide a suitable lock-up at Fairview. Over a year ago an appropriation was made for a lock-up at this point, but so far no attempt has been made to erect the building. In the meantime the constable, who is also Mining Recorder, has, if he has a prisoner to take care of, to stop up all night to guard him, which is not by any means a reasonable state of affairs. If too poor to provide a lock-up, the Government should at least furnish the constable with four bull-dogs, three blood hounds and a patent to keep awake, and failing such the people who are residents of the Osoyoos division of Yale district, should unite in petitioning the Government to change the present state of affairs, for as matters stand it is impossible to efficiently administer justice.

The neatest and most attractive school building in Southern Yale is that at Okanagan Falls, and so presentable is the structure that beholders are given to wonder how it is a similar amount of money to that spent on this building accomplishes so little in other localities. The building at Okanagan Falls reflects credit upon those who administered the Government appropriation which provided for its erection.

It is safe to say that not in any portion of British Columbia are finer crops to be seen than those standing at present in and around the Anarchist Mountain settlement. The splendid fields of oats, wheat and barley attest husbandry, a good soil and a genial climate, three essentials to profitable ranching in any country. With fine weather for the next few weeks a phenomenal harvest will be assured.

The Cellar.

Sinks, Garbage Boxes and Cesspools need attention now. Sometimes sickness in the summer months is due to lack of disinfectants. Be on the safe side—use CREOLIN now.

CREOLIN is a prompt, reliable and safe disinfectant. It is not poisonous, and that is one of the reasons why it is in such demand. Death through carbolic acid is frequent.

In addition to its use as a general disinfectant, CREOLIN is an agreeable deodorizer for the sick room, an effective home remedy for burns, cuts and other hurts; and a useful application in treating skin blemishes and parasitic diseases of animals.

Three table spoonfulls of CREOLIN mixed with a gallon of water makes a good disinfectant.

AT "THE ADVANCE"

g in the English after all.

trand Shadwell has written ondon (Eng.) "Daily Mail," cago, as follows:—

learned with pleasure, that s bearing the above title have d in England, I send you the new and concluding stanza:

he half of Europe hates them, d would joy in their decline, ere's something in the English er all,

ose who hate them most re- ect the thin red British line, nd fear their scant battalions er all;

know that, from the colonel to e drummer in the band, is not a single soldier in them all uld go to blind destruction, were eir country to command, ust call it simple—Duty, after all.

World's Gold Output.

roduction of the precious metal, hout the world, for 1899, is esti- t $340,000,000. The returns for t four months of the year show e ratio of increased production es, and will add $50,000,000 to duction of 1898, which was $290,- bringing the 1899 total product- to $340,000 000. The increase ca alone, if maintained for the the year, will make the output country $26,000,000 more than n 1898. For the period of thirty (1861-1890), the average annual tion in the world was very even- ntained $115,000,000, never run- ow $90,000,000 nor above $130,- . For the seven years (1893-1899), nual average was double that, ,000,000, increasing from $157,- , in 1893, to $340,000,000, in 1899.— nge.

nanent ore Exhibit in Spokane.

he Boundary Creek district will large exhibit of ore to Spokane, llowing is of interest :—"Every ople ask me what is to be done e mineral exhibit which is to be t the exposition after it is over," anager Bolster of the Spokane tion. 'Similar inquiries are com- Secretary Armstrong. Many say that Spokane ought to take hibit and put it where it can be y all visitors to the city. This be a good advertisement for the of the country. In reply to the ies I will say this: All exhibits are not returned to the senders will be turned over to the chamber of commerce under whose auspices the exposition is given. They will not be thrown together in a promiscuous pile, but will be carefully preserved in their individuality. The labels and descriptions will be carefully cared for and kept with the ore. The chamber of commerce will then be able to keep the exhibits stored away for the following year, or will be able to make an exhibit here in Spokane if it can be arranged to do so."

A Close Shave.

The Nelson "Miner" is responsible for the following:—"The Rev. H. Irwin, better known as Father Pat, arrived in Nelson last night prepared to handle the willow for his cure of souls to day. He gave an interesting account of a narrow escape he had the other day near Rossland. There had been a considerable amount of thunder and lightning accompanied by hailstones and his reverence, who had been constrained to pay a pastoral visit 'a cheval' was riding past a clump of trees when a meteorite decended and with noise as of cannon, smote a tree hard by. A similar occurrence happened near the church when he was officiating, only on this occasion the meteorite struck the bluff above the church. A spectator who witnessed the fall of the meteorite told Mr. Irwin that when it struck the bluff the rocks flew up as if a big blast had been fired.

Free Miners' Certificate Fees.

The following scale will show the fees to be charged for free miners' certificates covering only a portion of the year: Certificates issued between June 1st and 18th, $5; between June 19th and July 6th, $4.75; between July 7th and 24th, $4.50; between July 25th and August 11th, $4.25; between August 12th and 30th, $4; between August 31st and September 18th, $3.75; between September 19th and October 7th, $3.50; between October 8th and 26th, $3.25; between October 27th and November 14th, $3.00; between November 15th and December 2nd, $2.75; between December 3rd and 20th, $2.50; between December 21st and January 7th, $2.25; between January 8th and 25th, $2; between January 26th and February 12th, $1.75; between February 13th and March 2nd, $1.50; between March 3rd and 20th, $1 25; between March 21st and April 7th, $1; between April 8th and 25th, 75 cent between April 26th and May 13th, 50 cents; between May 14th and 31st, 25 cents.

An Advertising Song.

One of the English trade journals publishes the following parody on "I Don't Want to Play in Your Yard" which it says, is going the rounds and is likely to prove a hit:

We don't want to buy at your place,
We don't trade there any more;
You'll be sorry when you see us going
to some other store.
You can't sell us any stale goods
We have opened wide our eyes;
We don't want to trade at your place
because you do not advertise.

THE MIDWAY CO., Ltd.

E. JACOBS, Agent for British Columbia, Midway, B.C.

At last the Blockade seems to be broken and freight is rolling in, not as fast as we would like, but something is better than nothing, and we are prepared to show our friends some seasonable goods, for LADIES, CHILDREN and GENTLEMEN.

Have you seen the beautiful dinner sets we received direct from the importer? if not, don't fail to look at them soon, as we do not know how long they will be in stock. Chamber sets of 12 pieces, also cheaper ones of 6 pieces. Anything in the Crockery line from plain white stoneware to the costliest chinaware.

Our Dress Goods Department is not quite complete, as most of the seasonable goods have been sold, but we still think that we are able to satisfy almost any taste. Silks, satins and velvets in all colors for trimmings, and shirt waists. A new consignment of shirt waists has just arrived.

Our fine lot of Groceries are coming in daily, including fine Government Creamery butter, also fresh made ranch butter.

Miners' Supplies at most reasonable prices. A new consignment of the celebrated Armstrong XXXX Flour just received.

AND DISTRICT.

Hodgson is about again ight's illness.

y night a daughter was and Mrs. M. Moran of Mid-

arclay has started to run a trip (Sundays excepted) lway and Greenwood carry-ers and express.

day Mr. J. A. Tuzo returned from Nelson, to which town on a short visit.

is directed to the Midway ompany's change of adver-ewhere in this issue.

Melville has just completed ions and improvements to ttendrigh's hotel at Rock

ard is on the sick list at a result of exposure to last vy rains whilst prospecting st Fork.

. Douglas, Q.C., of Chatham, in Midway recently renew-acquaintance of many years Mr. John Douglas.

C. Scott Galloway, A. S. J. H. Macfarlane, of Green-e applied for the incorpor-reenwood Lodge, No. 28, A.

l Johnson, the well-known man, accompanied by Mr. E. M., Manager of the Brit-bia Copper Co., was in town oking over the local smelter

ncouver and Victoria Boards are advocating the construc-oad from Hope to Princeton ate transportation into the een country.

. Jackson has sold part of f dairy cattle, having deter-cease supplying milk at Ana-l Greenwood. He will now s business in this connection y.

y 12th inst. was a "red letter Cascade, the first locomotive ntered the town on that day. gly mark the occasion the of the Cascade "Record" was red ink.

unter-Kendrick Co., Russell Co. and Messrs. Miller Bros., etc., are all arranging to op-stores at Phoenix, the stir-lement near the Ironsides and ll mines.

. Powers & Lequime, of the sawmill and sash and door have not joined the district combine, but will continue to ir thing with their patrons no hat others may do.

ott McRae has in hand a bull head, the antlers of which are ly fine. The head is being preserved, and a purchaser at n easily be found but that Mr. is not disposed to sell.

f the engines at Lequime and Midway sawmill is tempor-abled owing to the breakage k of a heavy casting. The gine supplying motive power various machines in the firm's d door factory is in good work-der though.

he annual general meeting of olders in the Columbia Town-mpany held recently the follow-re elected directors: Messrs. J. cArthur, president; Henry , vice president; E. L. Beer, ary-treasurer; A. W. Ross, ger and L. M. Rice.

ing last week's heavy rain a rock rom the new railway embank-knocked out the Midway Co's. ion flume at a point about a mile the town. Messrs. Lamb Bros'. also went down a short distance the Lancashire House and for a threatened to cause a bad wash-Both flumes have since been re-d to working order.

. Bart. Ingrim's dwelling house e valley between Midway and Creek was destroyed by fire last nesday morning. Mrs. Ingrim sitting in a front room nursing aby at the time the fire started e back of the house. It is sup-d that a spark from the stove pipe the roof alight. Nearly all the ents of the building were saved.

Angus K. Stuart is back at his post a visit to the coast cities where y of those he met were very de-s of obtaining information about Boundary district. Among others isited was Mr. H. Mortimer Lamb, n be found busily occupied in get-out the current month's issue of useful and creditable publication "British Columbia Mining Record."

e Nelson "Tribune" says: Mr. S. haw of the Nelson customs house been sent over to the Grand Forks oms house to help Collector Gilpin his office in good running order. d Forks is a port, the same as on and the sub-ports of Midway Osoyoos and the preventive station cade City are attached to it. Shaw, who is recognized as an ex-, will be away a month.

Mr. C. A. Stoess, P. L. S., having completed the re-location of the Midway townsite, the re-plotting of the Murray sub-division immediately west of the townsite and the survey of the Columbia and Western right-of-way throughthe townsite and Murray property, left last week for Columbia, in which town and vicinity several weeks' work awaits his attention.

It is stated that C. P. R. surveyors are running a line south of that previously run between Midway and Rock creek. Leaving Rock creek about a mile above its junction with Kettle river a south-easterly course is taken to Meyers creek and passing south of the big mountain that rises at the junction of Meyers creek and Kettle river the former stream is followed down to Jackson's ranch. Thence to Midway the original survey line will be pretty closely adhered to.

A very striking evidence of the adaptability of the soil and climate of Southern Yale to the cultivation of the tobacco plant, may be noted near Camp McKinney, at McCuddy's, as in this rancher's garden at the present time are growing several fine plants, the product of seed sown rather late in the spring and without being put in a hotbed. As these plants are really very fine specimens little room is left for doubt that had the seed been properly attended to, they would have reached maturity well within the season allotted to cultivation of the plant. This test is all the more interesting in that the elevation at McCuddy's is some 3,400 feet above sea level, nearly 2,000 feet above the garden spot of British Columbia for tobacco, the Okanagan Mission valley.

McKenzie—McLeod.

The New Westminster "Columbian" says: "A quiet wedding was celebrated in St. Andrews (Presbyterian) Church, here, this afternoon, when Rev. Thos. Scouler united in the holy bonds of matrimony Miss Kate M. McKenzie, youngest sister of Mr. John McKenzie, Dominion Lands Agent, of this city, and J. P. McLeod, B. A., a rising barrister of Midway, B. C. The affair was quite devoid of any ostentatious display, the services of bridesmaids and groomsmen being dispensed with, and only a few personal friends being present."

Mr. and Mrs. McLeod reached Midway last Tuesday evening, having come in from the coast via Spokane. They were very cordially welcomed both being well-known and highly esteemed in Midway and neighborhood.

MINING NOTES.

The Vancouver "Province" of 10th inst. says:—"The superintendent of Camp McKinney Mines, arrived in the city today with another gold brick. This one is valued at $520 and is said to have been taken from 40 tons of ore."

The mineral resources of Boundary Creek will be strikingly illustrated at the Paris Exhibition. A fairly representative collection of ores, including samples from most of the prominent claims in the district, has been sent to the Provincial mineralogist for display at Paris.

Secretary L. K. Armstrong of the mining department of the Spokane Industrial Exposition announces that already 75 mining camps have promised to exhibit at the exposition this year. This certainly is remarkable. There only remain a dozen or fifteen to be heard from and probably these will still come in, for no camp can afford to miss this opportunity of advertising at this exposition this year.

The London and Canada Syndicate, which holds a controlling interest in the Boundary Creek Mining and Milling Company Ltd., published in London the following cablegram received July 25th from the manager at Boundary Creek: "Assays of samples from Gold Bug give 545 oz. of silver per ton of 2,000 pounds, 12 oz. of gold per ton of 2,000 pounds; average width is three feet; forward by express still richer samples."

Mr. Frank J. Hart, of Hart & Tuckwell wholesale fruit importers, Montreal, and Mr. Chas. F. Smith, president of the Montreal Board of Trade were recent visitors to Boundary Creek. They are stated to be both interested in the Old Ironsides, Knob Hill and Oro Denero mines. Mr. Hart is reported to have said to a newspaper representative: "If my judgment is worth anything the Boundary country possesses the richest and the largest ore deposits in British Columbia. My investments in this region are certainly very gratifying and I have no cause to regret having made them." Mr. Smith remarked: "I am well pleased with the Boundary country. I have visited several mining properties and, speaking as a layman, do not like to describe their richness for fear that people might consider me too optimistic."
