Legislative Library
VICTORIA, B. C.
1923

GRAND FORKS is situated in the center of Grand Forks valley, the premier fruit growing district of Southern British Columbia. Mining and lumbering are also important industries in districts contiguous to the city.

The Grand Forks Sun
and
Kettle Valley Orchardist

THE SUN is the favorite newspaper of the citizens of the district. It is read by more people in the city and valley than any other paper because it is fearless, reliable, clean, bright and entertaining. It is always independent but never neutral.

TWENTY-SECOND YEAR—No 52 | GRAND FORKS, B. C., FRIDAY, OCTOBER 26, 1923 | "Tell me what you Know is true I can guess as well as you." | $1.00 PER YEAR

REGULAR SESSION OF CITY COUNCIL

Mayor Hull and all the aldermen were present at the regular meeting of the city council on Monday evening.

A communication from the Children's Home, Vancouver, relative to the Brau children, was referred to the health and relief committee.

A letter from McCallum & Harrison drew the council's attention to the expiration of an insurance policy on a city building The insurance was ordered to be aenewed.

The clerk was instructed to write to W. W Lazareff in regard to the sale of the Pacific hotel. Lazareff was forbidden to move the building until the terms of the sale are complied with, and in the meantime the council decided not to cash the cheque for $25 advauced.

The chairman of the water and light committee reported that the Mill creek flume had bsen completed at a cost of $2700. On motion, Ald. Liddicoat and Electrician Meakes were appointed a committee to inspect the flume.

The chairman of the water and light committee suggested that the reservoir be drained and cleaned and that the weeds be removed from the vicinity of it and that a screen be placed over the intake of the flume.

The council decided to allow the West Kootenay Power company a ¾-inch water pipe when the water is turned into the Mill creek flume.

Chairman Liddicoat of the cemetery committee reported that the cemetery is now in a very nice condition.

The meat peddling license question was discussed at considerable length. The council finally decided that under the provisions of the trades license bylaw the city did not have the right to refuse a traders' license to a citizen receiving his mail at the Grand Forks post office.

The clerk was instructed to file a second applfcation for a water right on Sand creek for water for municipal and irrigation purposes.

UNITING COLONNIES FOR WINTER SEASON

One of the essential factors for successful wintering of bees is to have the colonies well filled with young bees that have done little or no field work. There should be at least enough bees in the hive to cover at least six or sevnn full-sized frames at the end of September or early in October. Any colony with less bees than this should be united One good strong colony is worth more than many weak ones.

When uniting colonies two things must be borne in mind: first, that flying bees have located themselves and if their hive is moved they will return to the old location, especially if it is good flying weather when the moving is done, and second, that bees of different colonies are likely to engage in a free for all fighe when brought together in one hive.

When a beekeeper has two or more apiaries the first difficulty can be overcome by uniting the weak colonies of one yard to anolher. Where there is only one apiary the uniting is best done during the dull weather when the bees are confined to their hives for several days at a time.

An easy method to unite two colonies without the bees fighting is to first smoke the colonies well and then to remove the cover and quilt from one of them and placing over the frames a single sheet of newspaper. The other colony is then lifted off its floor-board and placed over the first colony with the paper between them. The bees will gnaw holes through the paper in a short time and will gradually unite together through these. If there is brood in both colonies this can all be placed in the lower chamber later on, and the top chamber removed. It is well to kill one of the queens just before uniting the colonies, the best queen of course being left. If there is no preference for queens they can both be left and the bees will kill one of them.

Another plan of uniting, a d one in which all the queens are saved; is as follows: During dull weather in the late fall when the bees have been confined to their hives for several days remove from each of the weak colonies five of the lightest combs, shaking the bees from them down in front of the hive and pushing the other five to one side of the hive Two or three days later place a tight fitting division board in the center of half of the hives with the bees on one side and then bring the combs and bees from the other hives and place on the opposite side of the division boards, thus bringing together two weak colonies into one hive. Provision must be made for a double entrance. These colonies can be fed in the usual manner and can be wintered either in the cellar or outside. By this method a surplus of queens can be had in the spring.—C. B. Gooderham, Dominion Apiarist.

Common Sense Will Keep Anyone From "Sniffling" Army

Neglect of simple precautionary measures is largely responsible for the recurrence of influenza in the mild form commonly known as a cold, according to health authorities. Anyone who takes ordinary commonsense care of his heath and pays special attention to the following list of rules as winter approaches need not join the army of "snifflers." These rules have been issued by Dr. F. T. Underhill, M.H.O. of Vancouver and printed in the Sun of that city.

Avoid needless crowding; influenza is a crowd disease.

Smother your cough and sneezes others do not want the germs which you would throw away.

Your nose, not your mouth, was made to breathe through; get the habit.

Remember the three "C's"—a clean mouth, clean skin and clean clothes.

Open the windows always—at home, at night, at the office when practicable.

Your fate may be in your own hands; wash them before eating.

Don't use a napkin, towel, spoon, fork, glass or cup which has been used by another person.

Don't kiss.

Don't get your feet wet.

Don't spit.

Don't let your children out late at night in the damp air.

Don't use ano her person's handkerchief.

Avoid rowded assemblies.

Gargle throat several times a day with formolid, listerine or some other antiseptic solution.

Eat heartily.

Sleep well.

Keep the bowels regular.

Drink lots of water.

Take abundance of fresh air.

Do not worry.

Another contingent of hunters departed for the hills this week.

Coming Home

TENDERS FOR LIBRARY BUILDING

Victoria. October 26.—It has been announcsd by Dr. Sutherland, minister of public works, that he intends to call for tenders for the erection of a fireproof permanent library building for the University of British Columbia. As an indicotion of the growth of this provincial institution of learning, it is interesting to observe that the books to be housed already number 50,000 volumes.

It will be understood, of course, that the cost of the building for which tenders are about to be called will be met entirely from the sale of adjacent lands that belong to the people of the province. These have been set aside for the purpose of furnishing the wherewithal essential to the development of the university.

VICTORIA, October 25.—After a half century of misunderstanding and legal difficulties a matter between the Dominion and the provincial government of British Columbia has been cleaned up satisfactorily by the government. Under the terms of an agreement reached between Hon. Ernest Lapointe, federal minister of m rine and fiheries, and Hon. T. D. Pattullo, minister of lands, for the government, ownership of False Creek, English Bay and West Vancouver, outside the First Narrows, are vested in the government of British Columbia. Burrard Inlet, including the North Arm, it is agreed, is under the ownership of the Dominion. The conference agreed upon the boundaries of certain British Columbia harbors, ownership. of which by the federal authorities is conceded. These harbors are: Vancouver, Victoria, New Westminster, Esquimalt, Nanaimo and Alberni.

Both Hon. Mr. Patulloand Hon. Mr. Lapointe stated after the settlement that the best interests of the province should be s rved as the result of the conference, and in future there will be no complications with regard to industrial development in the harbors of the coast province.

Much has been ssid and written about the freight rates fight waged by Premier Oliver and the government for the past two years. The recent announcement by the board of railway commissioners that a further 10 per cent reduction on grain would become effective immediately is an evidnce that the fight has not been for nothing. However, the premier expects that the reduction is only a forerunner of others to be announced later. Meanwhile, he shows that on the 20,000,000 bushels of grain shipped west to Vancouver from August, 1922, the reduced rates have resulted in a saving of $1,020,000, a very substantial sum. The anticipated reduction, when rates have been equalized, wi l mean millions of dollars to the people of British Columbia as well as to the farmers of the prairie provinces. The government's expenditures in connection with the freight rates fight have been fully justified, even if no further gains are made.

Inventory

Banker—How much liquid assets have you?

Customer (cautiously)—About a case and a half.

Summer weather still prevails in this district.

Gordon S. Smith, second son of Mr. and Mrs. G. A. Smith, of this city, died very suddenly in Toronto on Thursday of last week. Deceased was 28 years of age and carried on the qusiness of a druggist. The father of the late Mr. Smith left for Toronto last Friday.

News of the City

Vancouver island is seeking tropical climatic publicity because a gardener at that place is still gathering strawberries. Up to the time of going to press The Sun man has obtained his daily rations of berries from his own everbearing patch. Climatically we acknowiedge no superior.

E. C. Henniger, M.P.P., left for Victoria on Wednesday to attend the forthcoming session of the legislature, which opens on Monday next.

Another attempt was made to rob the government liquor store on Thursday night of last week. This time the front door was tried, but the lock was either too complicated for the would-be robbers o else they were scared away.

Markets Commissioner Grant reports that the prices for McIntoshes are forming up on the prairies. Country trade there is dull, as retailers are waiting for British Coiumbia shippers to send on consigment as was done last year Prices dropped slightly in Vancouver during the past week and the movement is still slow. Extra Fancy Macs and Jonathans are wholesaling at $2.

The apple picking season is about over in this valley.

Ten Commandments For the Motorist

The ten commandments of good driving are as follows:

1. Drive on the right side of the road; it is just as good as the left.

2. Slow down when approaching a crossroad; it is nearly as dangerous as a railroad crossing.

3 Look out for children. You can never tell what they will do, and you are always in the wrong if you hit one.

4. Try to help instead of hinder the traffic officer; he is there for your good, and he's got a tough job.

5. Be sure that your "dimmers" really dim; it's no joke driving into a blinding glare, as you probably know.

6. Read and obey the warning signs; they are not put up as ornaments.

7. If you feel you've got to speed—do it where it won't kill anybody but yourself.

8. When making minor repairs stop where your car may beseen from both directions; otherwise you may stop longer than you anticipate.

9. Speeding around corners is a straight route to the hospital. Don't race past a stopped street car. Some day the jury will call it manslaughter.

10. Use discretion. The fact tnat you had the right of way won't bring anybody back to life, least of all yourself.

MIRACLES OF SCIENCE

Dr. Mayo, Famous Surgeon of Rochester, Tells How to Prolong Life for Five Years

Chicago, October 23.—Boys born nowadays under normal condisons have 12 years more to live than did their grandfathers.

Death ould be delayed an additional five years if every man and woman would undergo a rigid examination when 40 years old and abide religiously by the rules laid down by the examining physician.

The days of medical secrecy are past, and the physician or surgeon who hides facts from his patient is out of date.

If you don't like the Volstead act, change it. But while it's here obey it.

These were the high points in an address delivered before the Rotary club by Dr. Charles H. Mayo, famous surgeon of Rochester, Minn., who is in Chicego attending the annual session of the American College of Surgeons.

Dr. Mayo said that germs, which are blamed for so much of the world's ills, are 98 per cent good—both those which inhabit the human body and those found in the soil.

In the regular sessions of the college of sngeons, which are being attended by distinguished practitioners of this and other countries, it was announced that cancer is spreading more rapidly and has a greater death rate than tuberculosis. Next in importanee to cancer is goiter, a menace to the health and beauty of every woman and every girl. Chicago is the center of the "goiter belt;" of the United States, and is due, it is claimed, to lack of suffiient iodine in the water. The disease is not prevalent in other parts of the United States, but claims thousands of victims in Europe and Asia. In Chicago alone, it is said, there are 200,000 goiter cases, about 20,000 of which are under treatment.

Speakers admitted that important gains are being made in the prevention and cure of tuberculosis. but when cancer is mentioned they shrug their shoulders and say the cause and cure are still mysteries.

In some of the clinics there were demonstrations of the value of "ethylene," the new anaesthetic discovered by a Chicago surgeon. It does not cause nausea or other distressing aiter affects of ether and chlorofoim. In 900 cases in which it has been issued in hospitals here, but one fatality has resulted, and that was not entirely due to the new gas.

Among interesting exhibits was a coop of former hens, that now have all the characteristics of roosters because uf transplanted glands. Dr. Victor D. Lespinasse, who recently treated H. F. McCormick, millionaire head of the International Harvester company, just prior to his marriage to the Polish diva, Ganna Walska, exhibited the chickens. The former hens have developed brilliant red combs, wattles and a strut and piercing crowing sound that hitherto belonged exclusively to cockerels.

Various speakers also made it clear that surgery is now the last resort, instead of the first.

If you wish to accomplish great things, busy yourself with what the mediocre refer to as "mere details."

Notes, Notions and Notables

The Alaska boundary line is said to be the longest and straightest surveyed line in the world. The line consists of a vista of twenty feet wide cut through tall timber, of monuments set at intervisible points not more than four miles apart, and of a detailed map of the strip of country two miles each side of the boundary. At prominent river crossings, and at main points of travel, the monuments are sectional shafts five feet high, of aluminum bronze, weighing 300 pounds, set in a ton of concrete. At less important points the monuments are three feet high, set in 1500 pounds of concrete. The commission was five years finishing the task. The boundary runs for 600 miles over great mountain ranges, glaciers, swift rivers, quicksands, bottomless morasses. High summits were crossed, raging torrents forded, camp made on glaciers. Every obstable of the wilderness was fought and conquered.

Cold storage systems have revolutioned the provision trade and the element of waste deplorable in by gone days has largely been eliminated. In Britain there is something like twenty-five million cubic feet of cold storage space available, and it is said that twenty million eggs and one hundred and fifty thousand tons of meat may be found in cold storage in London alone. But eggs and meat are not the only items which are commonly kept in cold storage for longer of briefer periods. Fabrics of all kinds, furs and silks, are kept there. Then vegetables and flowers are kept in cold storage. Flowers and fruit can be brought from Canada, Australia and New Zealand in refrigerating chambers.

An Indian legend says that the Grand Canyon of Colorado was made single handed by Pack-i-tha-a wi, who was armed with a large flint knife and a big stick. Once upon a time the world was covered so deep with water that nobody knew what to do until Pack-i-tha-a-wi took the initiative. The knife he thrust deep into the heart of the earth, hammering until the canyon was formed. Another legend says that there was a great chief who mourned the death of his wlfe, Tavwoats. One of rhe Indian gods came to him and told him his wife was in a happier land, and offered to take him there that he might see for himself if, upon his return, he would cease to mourn. The great chief promised. Then Tavwoats made a trail through the mountains. Then he rolled a river into the gorge so broad and raging that it would engulf any that might attempt to enter therebs.

French coffee, Turkish coffee, Russian coffee, all have had their vogue among those who are constantly seeking the bizarre; but in "All About Coffee" is found a recipe which should be weird enough to satisfy anyone's taste. It is "Judge" Walter Rumsey's "new and superior way of making coffee" as given in 1657. "Yon must take equal quantity of Butter and Sallet-oyle, melt them well together, but not boyle them. Then stirre them well that they may incorporate together. Then melt therewith three times as much Honey, and stirre it well together. Add thereunto powder of Turkish Cophie, to make it Electuary." Butter, salad oil, honey, and coffee mixed!

Corfu, one of the loveliest of the isles of Greece, is again in trouble. It has changed hands more than a score of times, and has had as many different owners. Known originally as Corcyra, it was the site of the first naval battle fought in the annals of Groece, the engagement taking place nearly seven hundred years before the birth of Christ. Since then it has figured in innumerable Near Eastern crises—an island which has been the cause of almost endless bloodshed. Pirates of old Illyria, Romans, French, Sicilians, English, Italians, Corsairs, Turks, and of course, Greeks, have all had a hand in its affairs at some time or other. Great Britain ruled it for not quite fifty years, when it passed under Greek control at the wish of its inhabitants. Today its future is as uncertain as ever it was.

It is related of the new premier of Japan, according to the Cincinnati Enquirer, that interrupted by the terrors of the recent great earthquake, in which the building in which he was organizing his eabinet collapsed, he calmly moved to another building and proceeded with his work. We can not do things in that way. We refuse to be deliberate. We live fast, and each day we are living faster. We are indifferent to the use of brakes. In the expressive vernacular, we "step on it," and think we are speeding in the way of superlor accomplishment. This is abnormal. There is no need for the mad haste of the western world-haste in businesss, in industry, in the pursuit of pleasure.

The newepaper, says the Florida Times Union, gives an accurate picture of the times. When you read a newspaper, remember that the things that you read there are the things that the greatest number of people are interested in, and that in future generations, when the people of that far distant day desire to know how you lived, what your ideals and ambitions were, what things you attach most value to, they will look over the files of the newspapers. If you desire the newspapers to show to coming generations that this generation is one of lofty ideals, that home life is sacred, that a man is valued for what he holds in his heart and in his head, rather than for wqat he holds in the bank, that rests with you.

The veil has been lifted from the prehistoric past of the Philippine islands aud discoveries have been made rivalling those in the tomb of Tutankhamen, according to a report which has just been received at the University of Michigan from Dr. Carl E Guthe, heading an archaeological expedition now in the islands. Dr. Guthe's report hints strongly for the first time that Chinese formerly inhabited the island, a conclusion which he says is substantiated by the deposits unearthed by him during the last year. Material so far discovered, Dr. Guthe's report says, includes hundreds of pieces of pottery, broken and unbroken, much of it of the Ming period, some Tang, some Sung and much yet to be identified. There also have been found human bones, chipstone and iron implements and weapons, copper and bronze articles, gold inlaid teeth and gold shell, glass and stone ornaments.

Honesty is the best policy and the most restful.

Always there are a number of things one doesn't know that he shrinks from finding out

It is not impossible to wear oneself out trying to be agreeable to people who don't appreciate it.

Any girl who doesn't try to conceal her age is too young to go into society.

The Objects of this Institution, for which Incorporation was recently obtained, are: "To provide a Home and Refuge for Baby and Infant Blind; to provide free Scientific Care, Training and Maintenance; to Save the Lives of even a few of the many of such unfortunates, who, for the lack of such service, perish every year; and to return these little ones to their parents, at school age with normal, healthy bodies and sound minds."

This is a large and greatly needed Child Welfare Service. Careful enquiry at the Government offices in the verious provinces reveals the fact that there are at the present time nearly 250 Infant Blind in the Dominion. Nothing has yet been done for those helpless little ones. In the United States, 16 years ago, the first home was opened in New York City; they have now homes in 13 States, all doing excellent work. In England, some time ago, Sir Arthur Pearson organized "Sunshine House," Chorley Wood, for Blind Babies, and he claims that it is the only one in the British Empire. Let us have the SECOND in Canada. To reach this worthy end money is urgently required. Fifty Thousand Dollars is the present objective of the Board. While the Home is to be located in Ottawa it will take in the Baby Blind from every province, so that this APPEAL for funds will be Dominion wide, and an early and generous response is confidently expected. Cheques should be made payable to the Canadian Blind Babies Home Association. All remittances will be promptly acknowledged.

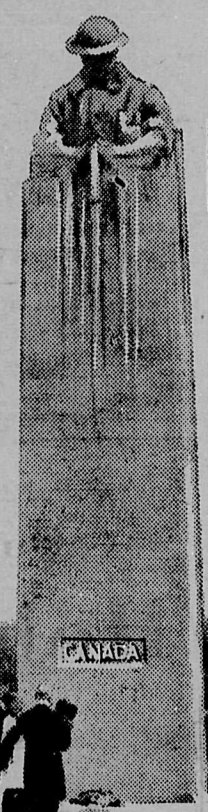
Mrs. T. J Lucal, of Tonbridge, England, is the mother of twenty-one children They live on £3 a week, but mother has to mend the shoes.



The monument to Canadian troops who fell at Ypres is unveiled there by the Duke of Connaught.

Henry Ford in Montreal, with Grant Hall, vice-president of the Canadian Pacific Railway.

Betty Hudson, the heroic little daughter of a well driller in Borneo, stayed with her father, who was injured at the City Park, Yokohama at the time of the earthquake, saving his life. Left to right, her sister Gertrude, Betty, and Miss Enid Garrand, of Duncan, B.C., aboard the "Empress of Australia."

Two young London "Cabbies," aged 86 and 88, were caught in a playful mood by the camera.

In order to save the sockeye salmon in the Fraser river system, Hon. William Sloan, minister of mines and commissioner of fisheries for Btitish Columbia, has urged Hon. Ernest Lapointe, federal minister of marine and fisheries, to carry on negotiations with the American government and the state of Washington looking to the complete closing of the Fraser to sockeye fishing for a period of twety or twenty five years. The provincial department of fisheries has been repeatedly placed on record as favoring a confervation policy with regard to this important food industry, but so far action has not materialized. This has been due largely to the lack of cooperation on the part of the United States authorities, but as the result of the recent conference between the two minisiers it is expected that a satisfactory settlement is not far distant.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

BAYER Genuine

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

A grant of $25,000 to the Salvation Army to aid Canadian emigration work in Great Britain has been authorized by a Canadian Order in Council.

According to information received by the Canadian Pacific Railway at Winnipeg, sixty-three bushels of wheat to the acre has been harvested on the farm of T. M. Ballantyne, three miles north of Lacombe, Alberta. The wheat graded No. 1 and weighed 64 pounds to the bushel.

Weighing 3,170 pounds, a steer, said to be the largest ever received in Winnipeg, arrived at the union stockyards from Wainwright, Alberta. It was sold for $250, the highest selling price of any steer in Winnipeg since the war.

The Canadian Pacific S.S. "Bruton," which arrived in Liverpool on September 5th, put up what is considered to be a record in the speedy discharge of cargo when she sailed the following day, Sept. 6th, at 7 p.m., having discharged over 2,000 tons of cargo.

It is announced that the Canadian Pacific Railway will increase the size of its irrigation headgates at Kimball, in southern Alberta, by 50 per cent in anticipation of an increase in area of 40,000 acres in the Lethbridge district. Water will be turned into the ditches of the Lethbridge Northern project, it is expected, some time this fall.

Buffalo steak will be abundant in Canada this fall. A herd of 2,000 surplus Buffalo wandering on the range in the National Park at Wainwright will be slaughtered by an Order-in-Council, and the meat and skins sold. For several years the Government has paid special attention to the preservation of the buffalo and the work has been so successful that the National Parks are now overstocked.

At a dinner given in his honor by the Vancouver Board of Trade, E. W. Beatty, President of the Canadian Pacific Railway, announced that the Company proposed immediately to add two large modern steamers to its coast fleet in order to take care of its increasing tourist traffic over the Company's Pacific Coastal lines. He also announced the early completion of a new pier at Vancouver at a cost of several millions.

There have been large increases in the number of pure bred animals in Canada during the decade between the last two censuses. The increase in the number of pure bred horses between 1911 and 1921 was 44 per cent; of cattle, 139 per cent; of sheep, 75 per cent, and of swine, nearly 44 per cent. The number of pure bred horses in the Dominion in 1921 was 47,782; cattle, 296,656; sheep, 93,643, and of swine, 81,143.

A conservative estimate of the amount of money spent in Quebec by tourists reaches $2,358,750. From the beginning of May until the first of September, 15,000 motor tourists had called for information at the offices of the Quebec Auto Club. Taking an average of four people to each car, this meant that at least 60,000 people had come to the city by automobiles. Of this number there were approximately 3,000 camping parties, or 12,000 people.

At the Chateau Frontenac, Quebec, recently, Colonel J. S. Dennis, Chief Commissioner of Colonization of the Canadian Pacific Railway, outlined in a detailed speech existing conditions in Canada and prospects for the future. He emphatically stated that there was no cause for discouragement, but, on the contrary, every prospect of a renewal of rapid development, including an increase in our population and the development of our latent natural resources in such a way as to insure, in the comparatively near future, that we should be out of the woods, and progressing rapidly to a large population and favorable business and financial conditions.

After his tour of central British Columbia, when he addressed meetings all along the Canadian National railway, Premier Oliver declared himself as highly pleased with induetrial conditions and stated that the progress made since his last visit was remarkable. He incidentally found the public complaining little if any against the administration of public affairs in British Columbia today. The government is stronger than ever, he reported to his colleagues, and the manifest approval shown will made the path easier when next year's program is laid before the legislature.

Mahomet could have sold your merchandise

You know the old story of Mahomet and the Mountain --when the Mountain wouldn't come to him he like a sensible man, grabbed his Panama off the hall rack and went to the Mountain--*he wanted it badly enough to go after it*

That is precisely the situation today--the Mountain--BUSINESS--will not come to you--*you will have to go after it* and go after it hard. You have one big advantage over the Prophet--he had to take the going as he found it--you can pave the way with *advertising*

Here and There

In order to handle the grain this fall the Fort William, Ont. force of 860 elevator men will be increased to 700. From 120 to 150 grain trimmers will be employed.

For the five months to August, 1923, Canadian newsprint exports were valued at $35,303,043 against $27,257,382 for the same period in 1922. Pulp exports in the same period were valued at $20,008,461 against $16,075,598.

Grain loading on Canadian Pacific lines during the month of September totalled 26,376 cars or 38,-245,200 bushels. This at the beginning of the loading season which was two weeks late this year on account of the retarded harvest.

This has been the greatest season for automobile tourists Montreal has ever experienced, according to the Secretary of the Automobile Club of Canada. Cars, he stated, had come into the city over the King Edward Highway at the rate of two hundred a day, an unusual number from California, Florida, Carolina and Virginia being noticeable.

There was nearly $160,000,000 increase in the total trade of Canada for the first five months of the current fiscal year, according to a return made by the Department of Customs and Excise. The total trade of the Dominion, according to the return, for the five months ending with August, was $785,000,000, as against $626,000,000 during the same period a year ago. Imports during the period were about $393,-000,000, as against $303,000,000 a year ago, while exports of Canadian produce rose from $316,000,000 approximately to $386,000,000.

There is a heavy demand for bushmen, according to the Government Labor Bureau at Montreal. The big lumber companies have been engaging men for the bush, and the prospects are that the demand will be sufficient to make fall and winter conditions good. Wages paid this year by the lumber companies are higher than last year, the rates paid being $40 and $45 a month, whereas a year ago the schedule was down to $26 a month.

With the completion of the harbor works now in progress, Montreal will be in a much better position in 1924 to handle a record flow of grain than ever before. Windmill Point elevator will be increased by 1,250,-000 bushels storage capacity, making its total capacity 3,250,000. Four additional shipping berths are being provided at this elevator and will be in commission early next month, and the elevator's loading capacity will be increased from 30,000 to 90,-000 bushels an hour.

Reports to the Canadian Pacific Railway, show that there arrived at Winnipeg from the British Isles this year for the purpose of working on the harvest, 11,888 men. Special efforts are being made to find occupation for as many as possible to cover the winter period, and it is stated that it is now probable that a considerable number of these harvesters from Great Britain and the Irish Free State will remain in the Dominion.

Addressing a recent meeting of the Vancouver Board of Trade, President E. W. Beatty, of the Canadian Pacific Railway, announced that the company proposed immediately to add two large modern steamers to its coast fleet in order to take care of increasing tourist traffic over the company's coastal lines. He also announced the early completion of a new pier at this harbor at a cost of several millions, which has been made necessary by the steady development of Canada's trans-Pacific trade.

Official announcement has been made by the Ottawa government of the passage of an order in council fixing the date for Thanksgiving day as Monday, November 12, the date also set for the observance of Armistice day.

If you greatly admire a quality you have at least a a trace of it yourself.

The people of Brithish Columbia through the government have sent the stricken citizens of Japan a gift of $45,000 worth of shingles and lumber. A special warrant was passed for this amount.

Shipments of potatoes are being made to outside points.

News of the City

Next Wednhsday night will be Hallowe'en, and attention is directed to the warning issued by the chief of police. There will be no objection to everybody getting all the enjoyment they can out of the occasion, but a wanton destruction of properity is not fun and will be punished.

Rev. Francis Runnalls and bride, nee Miss Ellen Oliver, arrived in the city last Friday afternoon, and on Saturday they held a reception at their Winnipeg avenue home.

Mr. and Mrs. Frank Haverty returned to the city today from their wedding tour.

Locally, the most popular song seems to be, "Yes; we have no overcoats."

South Tacoma made considerable racket over the fact that an apple tree had blossomed for the second time this season. In this valley such instances are common. A week ago there was a pear tree in bloom in the Sun orchard, but we did not think that the incident was of sufficient importance to give it a two line local.

The Sun in common with numerous citizens of the city and valley has received a copy of the Peace River Oil News, printed in Vancouver. The man who invests in oil stocks, in old or new fields, is a Gump or a chump.

A Great Story Year

A golden sheaf of stories is in preparation for 1924 readers of The Youth's Companion. There will be stories of Western ranch life and thrilling adventure; stories of gumption in getting a job and making a success at it; stories of lively scrimmages on the athletice field—football, baseball; stories of girls in school and college and working their way in the world of business; stories of the old farm folks down in Maine, told inimitably by C. A. Stephens; stories of Caleb Peaslee's shrewdness and horse srnse; stories of resouecefulness and pluck in situations of danger and extremity; stories of the sea and of the mountaine—stories to please every fancy of old readers and young, for readers who love the story of character and for those who like best the story of swift action It will be a great year in the history of The Youth's Companion.

The 52 issues of 1924 will be crowded with serial storles, short stories, editorials, poetry, facts and fun. Subscribe now and receive:

1. The Youth's Companion — 52 issues in 1924.
2. All the remaining issues of 1923.
3. The Companion Home Calendar for 1924. All for $2.50.
4. Or include McCall's Magazine, the monthly authority on fashions. Both publications, only $3.00.

The Youth's Companion, Commonwealth Ave. & St. Paul St., Boston, Mass. New subscriptions received at this office.

DEAFNESS CAN BE CURED

DEAFNESS, NOISES IN THE HEAD AND NASAL CATARRH

The new Continental remedy called "LARMALENE" (Regd.) is a simple harmless home-treatment which absolutely cures deafness, noises in the head, etc. NO EXPENSIVE APPLIANCES NEEDED for this new Ointment, instantly operates upon the affected parts with complete and permanent success. SCORES OF WONDERFUL CURES REPORED.

RELIABLE TESTIMONY.

Mrs. K. Wilkinson, of Slad Road, Stroud, writes:—"Please could trouble you to send me another box of the Ointment. It is not for myself, but for a friend of mine who is as bad as I was, and cannot get any rest for the noises in the head. I feel a new woman, and can go to bed now and get a good night's rest, which I had not been able to do for many months. It is a wonderful remedy and I am most delighted to recommend it."

Mrs. E. Crowe, of Whitehorse Road, Croydon, writes:—"I am pleased to tell you that the small tin of ointment you sent to me at Ventnor, has proved a complete success, my hearing is now quite normal, and the horrible head noises have ceased. The action of this new remedy must be very remarkable, for I have been troubled with these complaints for nearly ten years, and have had some of the very best medical advice together with other expensive instruments all to no purpose. I need hardly say how very grateful I am, for my life has undergone an entire change."

Try one box to-day, which can be forwarded to any address on receipt of money order for $1.00. THERE IS NOTHIG BETTER AT ANY PRICE.

Address orders to:—
THE "LARMALENE" CO.,
10, South View, Watling St., Dartford, Kent, England.

NOTICE OF CANCELLATION OF RESERVE.

NOTICE IS HEREBY GIVEN that the reserve covering Lots 2906s, 2907s and 2908s, Similkameen Division of Yale District, is cancelled.

G. R. NADEN,
Deputy Minister of Lands

Department of Lands,
Victoria, B. C.,
September 24, 1923.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

Strong Evidence Is Given By Mrs. Hopkins

"Tanlac is such a grand medicine and has done so much for me that there's nothing too good I can say for it," is the gratelul statement of Mrs. F. Hopkins, 77 Poplar St, Red Deer, Alberta, Canada.

"I took the treatment about two years ago when I was all run-down after a severe illness. My appetite was gone, I had awful headaches for a week at a time, and did not have strength to care for my housework.

"So many people were praising Tanlac that I began taking it myself, and could feel an improvement from the very start. Four bottles of Tanlac restored my appetite, gave me back my lost weight and strength, and left me feeling like a new person. After all Tanlac has done for me I could not help praising it."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Take Tanlac Vegetable Pills.

Corporation of the City of Grand Forks, B. C.

MUNICIPAL VOTERS' LIST FOR 1924

Will be composed of the names of the Registered owners of real property and registered holders of agreements for sale, as a November 30th next.

And Householders and Licensees who have taken the necessary statutory declaration during this month. Such declaration may be taken and must be filed at the Office of the City Clerk on or before October 31st.

JOHN A. HUTTON, City Clerk.

The Ultimate in Radio Reception

EVERY ADVANCE of civilization has depended upon the progress of communication. From the Athenian runner to the instantaneous transmission of intelligence by Radio is a triumph of science. As one Athenian runner was preferred over another for speed and accuracy, so today Yelco Radiophones are chosen for the most perfect reception of Radio Broadcasting.

A Yelco Receiver will give you hundreds of dollars of value in joy for every dollar it costs you. It will never disappoint you or your friends.

Let us arrange a demonstration for you.
