Reseizure of C. P. R. Company's ties.---New tug for Kootenay Lake.

Another Newspaper for Revelstoke.—Mr. A. R. Sherwood Appointed Inspector of Agencies.

Rev. Dr. Sutherland, secretary of Methodist Missions, left Toronto, 2nd inst., for Manitoba and British Columbia.

It is rumored that Revelstoke is shortly to have another newspaper. It is to be Liberal in politics. A number of local Liberals are taking the initiative.

Mr. A. R. Sherwood, of Nelson, has been appointed Inspector of Agencies in Southern British Columbia for the Birbeck Investment Security and Savings Co., of Toronto.

April produced fifteen fires in victoria with a total loss of less than $1,000, but twelve of the fifteen were incendiary, half-a-dozen being apparent attempts to destroy Chinatown.

Mr. H. H. Pitts, mayor of Sandon, has inserted an advertisement in a Nelson paper asking mechanics, laborers, and all people looking for business openings to stay away from Sandon, as there is not accommodation or work for those already there.

At Victoria recently the full court sustained the judgment of the lower court imposing a fine of $5,000, on Union Colliery Co. for alleged negligence in connection with the Trent river bridge disaster. The company will appeal to the supreme court of Canada.

Mr. J. R. Martin, Government Timber Inspector, has gone to the Crow's Nest in response to telegraphic instructions from headquarters to reseize the ties and timber there belonging to the C.P.R. which were recently released in consequence of the railway company having settled the dues against them. The reason for this reversal of orders is not known.

Mr. F. W. Peters, of the C. P. R. has wired the Mayor of Sandon that the C. P. R. will carry free all clothing and supplies sent to the relief committee at the burned out town. It is understood that the Kaslo and Slocan Railway has also made a similar offer, so no part of the relief fund will be used in conveying necessary supplies to those who need them so badly.

The new C. P. R. tug built to replace the Kaslo was launched informally on Saturday, at Nelson. The craft has not been named but she will be christened within a day or so as the officials have been casting about for a week or so to secure an appropriate name. The tug is a staunch and tidy little steamer and looks particularly well just now while her paint and varnish are unsullied. The master and crew will be selected on captain Troup's return and it is probable that she will be placed in commission this week. She will be used as a "handy tug" around the port and with the repairs and improvements to her engines, which went through fire when the Kaslo was destroyed, will be a very useful addition to the fleet.

PLACER MINING NEAR MIDWAY.

Rich Finds on Boundary Creek close to the Town.— A Number of Claims Staked.—Numerous Visitors to the Diggins.

During the past week no little excitement has been created over the finding of gold on Boundary Creek in the vicinity of Midway. On Friday Mr. M. Moran exhibited some fine specimens taken from the bed of the creek just above Lamb Bros. dam scarcely a mile distant from the town.

A party of four men on their way to the Similkameen, satisfied with the results of Mr. Moran's work decided to try their luck and, it is reported, have since been making good wages. A number of claims have already been staked and numerous people have visited the diggings. It is Mr. Moran's intention as soon as the Midway Company's ditch, which is a good height above the workings, is running to bring water from it, by means of a rubber hose, and thereby lessen the expense of removing the earth.

This is not the first gold that has been found on this creek, as far back as '62 "Jolly Jack" with a few men worked for a time, since then large numbers of chinamen are said to have made money.

It seems to be the general opinion of placer miners that no gold exists on Boundary creek above the confluence of Norwegian creek with that stream.

DOMINION NOTES.

Strike of Hamilton Carpenters.--Bridge to be Built over the St. Lawrence River.

Montreal Man Sentenced for Forgery.—Shooting Accident in Quebec.— Officers of Prince of Wales' Fusiliers of Montreal, Resign.

The Canadian Patriotic fund up to May 2nd amounts to $256,163.

Mr. Francis E. Brooks, machinist, of London Ont., has fallen heir to $9,000,000.

A cantilever bridge to cost $5,000,000, will be built over the St. Lawrence at Quebec.

The carpenters' strike at Hamilton has resulted in success for the men. The moulders of the Ambitious City may strike.

Mr. William Ingram, who was suspended by the Government some four months ago, has received notice of his reinstatement.

An outbreak of diptheria has occurred at Letellier, Manitoba, there being already 28 cases recorded and several deaths have resulted.

Thos. W. Burdon, of Montreal, will spend two months in prison. He is manager of the Smardon estate, and pleaded guilty to forging notes on the Merchants' Bank.

The Government of Manitoba has asked the Dominion Government to grant it the control of all passenger and freight rates on new railroads within the province.

A Galt woman wrote to the Mayor of that town urging that a by-law should be passed prohibiting hens being kept in the city limits. A rooster's crowing kept her awake at night.

Mr. B. B. Osler, Q. C., an eminent lawyer of Toronto and well-known throughout the Dominion, has been obliged to cancel all his engagements for some months owing to ill health.

While handling a revolver Alex. Sabiston, head of the firm of the Sabiston Lithographing and Engraving Company, of Montreal, accidentally shot himself in the temple, death resulting 15 minutes afterwards.

Mr. E. F. Pullen, of Toronto, formerly a clerk in one of the Queen City banks, who went to South Africa at his own expense, turned up at Bloemfontein on March 2nd, and was taken by Lieut.-Col. Otter on the strength of "C" Company.

Registrar Cartwright, of the Court of Appeal, has awarded Alphonse Carlebois, of Quebec, $310,000 as due him for the building and equipping of the first sixty miles of the Great Northwest Central in Manitoba. The finding is under a reference directed by the Privy Council.

The quarrel between the commanding officers of the Prince of Wales' Fusiliers of Montreal and some of the inferior officers has resulted in five of the latter resigning their commissions. They are: Capt. W. L. Bond, Lieut. F. L. C. Bond, Lieut. B. M. Humble, Lieut. B. A. Burke and Surg. Lieut. Ridley Mackenzie, M. D.

Official figures show that 1,258,280 bushels of wheat were inspected at Winnipeg in April. The C. P. R. is moving about 100,000 bushels of grain per day from the west for Fort William, and the elevator owners seem anxious to get their elevators cleaned out, ready for next crop. There are at present between 6,000,000 and 7,000,000 bushels of wheat in the elevators west of Winnipeg.

Justice Rose has dismissed the case of Mr. Clarence McCuaig, of Montreal, against Mr. George Gooderham, to enforce an option in favor of the plaintiff, or his nominee, alleged to be contained in an agreement between the defendant and plaintiff and one Williamson to purchase 35,000 paid-up shares of the War Eagle Consolidated Mining Co., at eight cents a share.

The Dominion Government has given a preliminary judgment in the case of the Independent Oil Company and the consumers, against the C. P. R. and G. T. R. for discrimination in favor of the Sarnia and Petrolia oil fields, which are controlled by the Standard Oil Company. The case was argued before the Railway Committee some time ago. The decision of the Government is that the rates for Suspension Bridge and Black Rock to Montreal must be restored to what they were previously, namely, 23 cts., the companies having raised them to 35c, while the Sarnia rate, although the distance was greater, was reduced about 20c to 21c from 35c. The sarnia rate remains the same.

THE MINERAL WORLD.

Reconstruction of the Hall Mines, Ltd.--Ontario's Mineral Production.--Sale of Placer Mines.

Greatest Piece of Modern Engineering Known.—Report of Chamber of Mines of South African Republic.

It is stated that the Dominion Government has decided to sell at auction all the placer mining claims that it has reserved. Gold Commissioner Senkler is quoted as having said that the sale will be held on June 1st prox.

The returns to the U. S. Mint at San Francisco show the employment of 18,701 miners in gold, silver, lead and copper mines of California, which is a decrease of 1,122 as compared with the numbers of the previous year.

The Delaware and Hudson Company, which owns and works a large anthracite coal estate in Pennsylvania, besides its system of railways, last year produced 4,183,315 long tons. The average return per ton of coal mined was $1.83. The average cost of mining was $1.22; handling, selling, etc., $0.44; total $1.66, leaving a profit of $0.17 per ton.

The annual report of the Chamber of Mines of the South African Republic (Transvaal) for 1899 is necessarily incomplete in regard to most of the mines after August. The output of gold from the Witwatersand mines amounted to 4,008,325 ozs., from outside districts, 187,635 ozs.; total, 4,295,960 ozs. The total yield per ton of one crushed was 10.10 pennyweights, of the value of about $10, the weight being a trifle higher but the value the same as in 1898.

The mines of Ontario yielded last year, according to official returns, a value of $8,785,251, or about two thirds of the worth of our British Columbia output. The word mines is, however, rather comprehensively used in Ontario, for it not only includes stone quarries, but also brickfields, which account for $2,313,750 of the total value. Other items than bricks included in the Ontario yield were: iron, $808,157; gold, $417,328; building stone, $1,041,350, and oil $1,059,485. There were 9,979 men employed, who earned wages of $2,921,397. Evidently some of them were only engaged for small parts of the year, as the average wage under the returns is only about $300 per caput per annum.

The one perpendicular shaft in the Calumet mine, Michigan, runs down a distance of three-quarters of a mile. The sinking of this shaft was the greatest piece of modern engineering known. The management figured that if the copper vein dipped at an angle of 43 degrees from the surface and kept on for a great distance down, it would certainly be caught by running straight down from the surface if a shaft were sunk a distance from the others. This was done and after three years of sinking and encountering nothing but earth, the copper was struck. The miners working from a drift in the perpendicular shaft and those working from the other direction came together one day, and the picks struck within an inch of the surveyors' underground estimate. Now a man can go down the shaft at the Calumet hotel, run down half a mile in a perpendicular shaft, cross over in a drift, and come up on the surface two miles from where he started on the top of the ground—the most novel underground promenade in America.

At a meeting of shareholders in the Hall mines Ltd., held in London, England, last month it was decided to reconstruct the company, winding up the old company and registering a new one to be named the Hall Mining and Smelting Company, Limited. The scheme approved by the meeting provides that the capital of the reconstructed company (the new company) shall be $325,000, in £1 shares, of which 250,000 ordinary shares are to be given in exchange for 250,000 ordinary shares held by shareholders in the existing company, credited with 15s. paid up thereon; 25,000 ordinary shares to be allotted as fully paid to the shareholders of 25,000 preference shares in the present company, and 50,000 ordinary shares to be placed to reserve to satisfy the debenture holders' right of conversation. There will be five shillings per share payable on the 250,000 ordinary shares, from the proceeds of which the company will acquire sufficient funds to pay off its liabilities, and will have, in addition, a working capital of from £40,000 to £45,000 sterling to proceed with the work of developing the Hall Mines near Nelson, B. C., and operating the smelter. The Directors will not proceed to allotment unless sufficient shares be applied for to warrant them taking that step.

Published weekly at Midway, B. C. Subscription Price, $2.00 per annum, payable in advance, either yearly or half-yearly at the option of the subscriber.
Advertising Rates sent on application.

MONDAY, MAY 14, 1900.

The Canadian Magazine for May is entitled the Tourist Number and is a credit to the literary tastes of the Canadian people. Among its many handsome illustrations are scenes of British Columbia which are beautifully described.

The London Graphic says: "Believers in the occult will be interested to learn that a 'White Mahatna' has foretold that Pretoria will be taken by the British on the 6th day of July, and that the war will be over in September." It is interesting to know for certain just when Pretoria will be taken, but why didn't this vendor of predictions make it July 1st? Then we could have celebrated two events in one.

According to a published report of the Premier's public meeting at Camp McKinney the electors present requested that a lock-up be provided and a sub-recording office opened in that town. Apparently though they have but little confidence in the Premier, for they urged, so it is stated, that these public conveniences be granted them before election day. They evidently place but little value on Mr. Martin's pre-election promises so want to make sure that their reasonable requirements will be met beforehand, so that, as is most likely, should the Martin candidate be in a minority on June 9 in their part of East Yale they shall not be longer deprived of what they are legitimately entitled to. It would seem that at Camp McKinney the Premier met with even less encouragement than in the Rossland Riding of West Kootenay where he must have realized that his candidature is by no means assured of success.

Citizens of Midway are asked to decorate their individual places of business or residences, as the case may be, on May 24th. If we each take an interest and go to work with a will the town will present a pretty appearance on that day. Midway is pretty at any time, but let us follow the old adage that "fine feathers make fine birds" rather than satisfy ourselves with the old saying of "beauty unadorned, etc." Last year the committee set apart a certain sum for this purpose, but then there was only Fifth street to decorate. This year, owing to the growth of the town, Sixth and Seventh streets will have to be similarly recognized, and to do this it would take considerably from our prize money, while the expense borne individually would be but trifling. We want to give prizes that will make it worth peoples' while coming from a distance to compete for and in order to do this it is necessary to curtail expenses as much as possible, so we would urge upon the people of Midway to help out in a way that they are all capable of, namely, to decorate on May 24th.

Among the heaps of chaff Mr. Smith Curtis spread before his hearers on the occasion of his recent electioneering visit to Midway there were, it must be admitted, a few grains of wheat, though but very few. His statement as to what he is doing to advertise the mineral resources of this Province at the Paris Exposition is a case in point. He said that he had given instructions to the Provincial Mineralogists to prepare a synopsis, "containing only the meat", of the lengthy report of Provincial Minister of Mines for 1899, and he intended to have 100,000 copies of this synopsis printed and sent to Paris for free distribution there. Further he was having an extra 1,000 copies of the full report printed and these he would use in sending a copy to every mining engineer in the United States, Great Britain, France and Germany, these being the countries taking most interest in mining, that later he would "bombard" them with literature giving recent and reliable information relating to the mineral resources of British Columbia. There can be little doubt that publicity would attract much attention to the Province and eventually do good. But since Mr. Smith Curtis will not remain in office long enough to carry out his plans he will have to rest content with the credit of having inaugurated so excellent a policy and leave it to his successor to reap the fuller benefit of it.

Hon C. H. Mackintosh has Returned.

Hon. C. H. Mackintosh returned to Rossland from the East last Friday evening. When the train arrived at Smelter Junction a numerous and influential gathering gave him a very enthusiastic reception, which was quite unexpected by Mr. Mackintosh. He heartily acknowledged the cordiality with which he had been welcomed and sincerely thanked his many friends and supporters for their good wishes and promises of assistance to ensure his success at the coming election.

candidate for the Rossland Riding.

At Rossland notwithstanding the lateness of the hour there was a large crowd assembled at the Railway station to welcome Mr. Mackintosh on his return. When the train reached the platform the City band struck up "See the Conquering Hero Comes" and after a quarter of an hour's hand shaking and personal greeting, Mr. Mackintosh entered a carriage with Mayor Goodeve and Dr. Bowes, chairman of the Trail Creek Liberal-Conservative Association. A procession, headed by the band, was then formed and with much cheering and enthusiasm the coming member for the district was escorted to his committee headquarters where his arrival had been awaited by a still larger assemblage than the one that gave him such a hearty welcome at the station. After a brief speech by Dr. Bowes Mr. Mackintosh addressed the gathering, closing a vigorous and inspiriting speech with a declaration that the fight will be fought with determination and energy from now until the close of the election when he was confident there would be victory for himself, for the Province, for the people and for good government.

The chairman having announced that there would be a grand rally tonight, at which the Premier and Hon. Smith Curtis had been invited to meet Mr. Mackintosh, "God Save the Queen" was sung and the crowd dispersed.

Polling Places, Rossland Riding.

The following is the list of polling places at any one of which electors whose names are on the revised list for Rossland Riding of West Kootenay may poll their votes:

Rossland, Miners' Union hall.
Trail—Hannox Building, the Bowery.
Gladstone—Burnt Basin Hotel Building.
Cascade—Townsite Building.
Grand Forks—Grand Forks Mercantile Co. Store Building,
Columbia—Fire Hall.
Eholt—Chesser Hall Building.
Phoenix—Miners Union Building.
Greenwood—Store building adjoining Postoffice.
Midway—Government Building.

Railway Officials Visit Midway.

Mr. J. G. Sullivan, C.E., Superintendent of Construction for the Columbia and Western Railway; Capt. J. W. Troup, C. P. R. Superintendent of the Kootenay and Boundary lines; Mr. C. L. Johnston, C. E., Roadmaster (West Robson to Midway) and Mr. J. S. Lawrence, Trainmaster, Columbia and Western system, paid Midway an official visit on Saturday morning. They came down in the first passenger car to reach Midway. The conductor in charge of the train was the veteran Sam Woods, and the engineer was A. Davis, who enjoys the distinction of having been the first to run a locomotive across the Selkirk Mountains. From Mr. Sullivan it was ascertained that it is expected the surfacing gang will complete work they now have in hand on the spur lines in about ten days and that within a fortnight they will begin ballasting the main line between Anaconda and Midway. Capt. Troup intimated that Mr. D. McNicol, General Manager of the C. P. R., Mr. R. Marpole, Superintendent Pacific Division, may be expected to visit Midway on Thursday or Friday next. Passenger trains will be running to and from Midway after about June 15 The time table will be altered so that trains will reach Midway late at night and will leave at noon of each day, Sundays excepted. The officials went out on Saturday afternoon's C. & W. train.

Only a Bait to Catch Votes.

The Province's credit is quite inadequate—after taking into account present loan liabilities—to secure on practicable terms, a further advance of at least $10,000,000 or more probably $15,000,000, for the building and working of a long and difficult railroad at the public risk and cost. * * * * Every sensible British Columbian knows, or should know, that the financial position of the Province is wholly unequal to the strain of at once taking up the construction and ownership of a railroad, more than 300 miles long, and so costly and difficult to construct that none has yet been able to show that it can under existing circumstances, be made and operated, save at vast cost and with very doubtful results as to profit. * * * To say that there is any chance of the Province's early building and operation of a Coast-Kootenay line that will involve a capital expenditure of nearly if not quite $15,000,000, necessarily all borrowed, is to attempt to deceive the electors. This those who hold out the bait well know, for they are careful on the platform to say that if they are returned to power, they will at once take steps to see, if the Coast-Kootenay Railroad can be built and worked by the province and do this, if feasible. But Mr. Martin and his eleventh hour borrower of his railroad scheme of "ifs and buts," both know well that under present circumstances the Province's operation of a three hundred mile Coast-Kootenay Railroad is absolutely impossible. The suggestion is consequently in essence only a bait to catch the unwary voter.—Vancouver "News-Advertiser."

Lake View and Orient, Kruger Mountain.
Copper King, Kruger Mountain.

Not Yearning for it.

Mr. Martin's scheme to build a Government railroad from the coast to the interior has more attractions for the coast people than for those of the interior and Mr. Smith Curtis betrayed the fact that it is intended rather to catch votes among coast merchants and Fraser River farmers, when he suggested the building of a copper smelter at Vancouver to treat Boundary ores. When the Boundary people already have a smelter in operation at Trail, another about to be blown in at Grand Forks and a third in course of erection at Greenwood, they are not likely to show any great enthusiasm over a scheme to pledge the public credit for the building of a railroad to haul their ore to Vancouver for the purpose of building up the smelter industry there. The Trail people do not look kindly on a scheme which aims to undermine their chief industry. Nor are the Boundary people suffering so grievously for smelting facilities that they yearn for increased taxes to pay interest on the cost of a railroad which is to haul their ore 300 miles over a range of mountains to the coast.—Rossland "Record."

Jimmy Wood of Greenwood, and A. D. McDonald of Grand Forks. The contest will take place at Greenwood.

Mr. F. W. McLaine has returned from Vernon, where he went as a witness in the Everett case. He brought with him two fine horses, one of which he purchased from the B. X. ranch. Both will be entered for the races on the 24th.

A heavy shower of hail fell in Deadwood camp and Greenwood City yesterday afternoon. The hailstones were large and the storm lasted for about a quarter of an hour. Apparently it was not general throughout the district.

Messrs. H. A. Cousens and W. R. Robertson, both former residents in Midway, left last week accompanied by Mr. A. E. Ashcroft, P. L. S., to the Burnt Basin east of Christina Lake, where that gentleman has three or four weeks' surveying to do.

Mr. G. C. Hodge, manager for the Vernon & Nelson Telephone Co. in the Kootenay and Boundary districts, having recently connected Deadwood camp with his company's telephone system, is now engaged in improving and extending its Phoenix service.

The Greenwood "Times," which is in a position to know, is authority for the following: "Through an unfortunate accident this morning J. W. McBride, the well-known Bolster townsite agent, is laid up at the hospital with a sprained ankle. A bucking broncho collided with his team, throwing James Kerr and himself out."

Rails were laid on the spur line from Hartford Junction to the Golden Crown mine last week. It is anticipated that track laying from the Junction to Phoenix will be completed this week. The tracklaying gang is comprised of about 125 men who lay the ties and rails by hand, the track-laying machine having been dismantled at Midway after completing the laying of steel to this town, the terminal point of the main line.

Mr. J. Howell, of Grand Forks, was in Midway last week looking for a suitable site for a brickyard. Mr. Howell is an experienced brickmaker and expressed himself as much pleased with the outlook for that industry here, as the quality of the clay is excellent and he feels confident that in the near future there will be a great demand for brick in and around Midway. Mr. Howell will visit Midway again next week and in all probability will complete final arrangements to start work at an early date.

Mr. Clive Pringle, barrister, of Greenwood, went out on Saturday's train to Rossland. Mr. F. J. Finucane, manager of the Greenwood branch of the Bank of Montreal, left today. Both gentlemen intend going to London and Paris. They expect to be absent about three months. Mr. Finucane is a delegate from the Greenwood and Rossland Boards of Trade to the Fourth Congress of Chambers of Commerce of the Empire, to be held in London next month.

The other day while two Doukhobors were celebrating one of their national holidays, one of them became playful under the influence, and kept pulling the hat down over his compatriot's eyes, which was resented accompanied by many gesticulations and expostulations, but finding this did not have the desired effect more forcible means were adopted, the result—a serious mix-up. The bystanders then interfered, pulled them apart and advised them to celebrate in a less boisterous fashion in the future. The Doukhobors then left for their respective homes seemingly well satisfied that they had demonstrated their patriotism in the orthodox style.

Mr. H. C. Shaw, of the firm of Hallett & Shaw, barristers, Greenwood, left that town on Saturday afternoon for Victoria, where he will appear as counsel for Rendell & Co., in connection with that firm's action against the Corporation of the City of Greenwood. It will be remembered that when the case was heard in Rossland several weeks ago a verdict was given in favor of the plaintiff for $1,200 as damages suffered by them by the lowering of the street grade opposite their fine new business block in Greenwood by the Corporation. The verdict was subject to several points of law which are to be argued at Victoria, Mr. Shaw expects to be absent about ten days.

Dr. Boyce, so well and favorably known in the Southern Okanagan district, whose departure from Kelowna on a visit to the east was mentioned in THE ADVANCE several weeks since, has returned to this province and has joined his old college friend, Dr. Jakes, in the practice of his profession at Greenwood. Dr. Jakes has so many calls to outlying parts of the district that he is quite unable to also attend to the numerous patients who require his services near by. By the arrangement now made Dr. Boyce, who is also a skilled and experienced physician and surgeon, will attend to the home practice should Dr. Jakes be absent, whilst Dr. Oppenheimer will thus be left free to attend closely to hospital duties at the Greenwood hospital.

Mr. Wm. St. Quintin has received a consignment of fresh candy from the Vancouver candy factory.

tain for Mr J. G. Gillespie. The hotel being situate about 25 miles west of Midway will prove a convenient stopping place for travellers to and from Osoyoos and places beyond.

A report was given publicity last month in effect that a quarter interest in the Summit City townsite had been sold for $25,000. Information just received from a source believed to be reliable places the consideration at $2,500 instead of $25,000. It is astonishing how things grow in this country sometimes.

Mr. L. B. de Veber, accountant of the Rossland branch of the Bank of Montreal, will act as manager of the Greenwood branch of the bank during the temporary absence of Mr. Finucane. Mr. de Veber has been many years in the service of the bank. He was formerly of St. John, New Brunswick, and has been in the West about four years.

At Beaverton the other day an Englishman and a pro-Boer sympathizer got into a heated argument over the present trouble in South Africa. The Englishman was suddenly seized with a desire to change the color of his opponent's eyes, so that he could look at this important question in a different light, after accomplishing the object of his desire and changing his general appearance so that he was afterwards taken for a phrenologist's model, the desciple of Oom Paul Kruger, thinking discretion the greater part of valor, promised never again, while on British "Illahae," to wag a jaw on behalf of the Transvaal.

MINING NOTES.

Mann & Mackenzie, the Toronto railroad magnates, have ordered a 5-drill compressor for the Emma, Summit camp.

Messrs. P. S. Stanhope, R. H. Bergman and Tanner are at present doing the work on the Irish Boy, in Smith's camp.

The British Columbia Gazette contains notices of the Athelstan Gold and Copper Mining Company, capital $20,000 in one million shares of five cents each, The Standard Copper Company, Limited, capital $500,000 in 500,000 shares of $1 each.

A parallel ledge to the one already developed on the Oro Denoro, Summit camp, has been uncovered showing 20 feet of an excellent grade of copper ore. Work will be started immediately to extend the lower tunnel for a distance of about 300 feet, where it is expected to tap this new ledge at a distance of about 200 feet

The force at the B. C. mine, which thus far has shipped 2,000 tons to the trail smelter, exceeds 75 men. It will be doubled in the course of a few weeks when the new plant, comprising one-half of a twenty-drill compressor and a 200 horse power boiler, is installed. A new gallows frame is being erected, and the tramway is being extended to the ore bins.

The Summit City Water, Light and Power Company, has just been incorporated. It will supply light to Summit City, and a deal for furnishing power for concentrating purposes to the Oro Denoro is being negotiated. It is estimated that Fisherman creek and the east fork of the same stream will supply 150 miner's inches of water. The contract for constructing the dam and flume will be awarded next month

Mr. C. L. Thomet and J. A. Tuzo left yesterday for Camp McKinney, where they will prospect the Bertha C. and Winnifred mineral claims. These claims were located early last spring by Messrs. Thomet, of Midway, and D. A. Cameron, manager of the Bank of Commerce, Greenwood, and are situate about five miles west of Camp McKinney on the eastern slope of the divide. A ledge varying from eight to ten feet in width outcrops on the surface from which an assay of $59 in gold has been obtained.

The Phoenix "Pioneer" publishes the following items of mining news:

The second and third payments on the $25,000 bond on the Mountain View, in Summit camp, have been paid, making $10,000 paid to date.

About 3,000 tons of ore have been shipped from the B. C. mine, Summit camp, since February. The work done on the mine to date aggregates 3,200 feet and some 65 men are now employed on it.

The Golden Crown, Wellington camp, has about 2,250 feet of work done. It is intended to commence regular shipments of ore this week.

The Jewel in Long Lake camp will shortly resume work. A stamp mill and a cyanide plant will be installed at this mine.

A contract has been let for hauling 5,000 tons of ore from the City of Paris mine, Central camp, to the smelter at Grand Forks, at $1 per ton

Mr. A. C. Flumerfelt, of Victoria, has been appointed Assistant General Manager of the properties owned by the Miner Graves syndicate.

Mr. A. Johnson was a guest at the Oakland hotel yesterday. He is on his way to the Similkameen district and is traveling in the interests of the B. C. Mining Co. Mr. Johnson has some fine prospects on Boulder Creek, one with a five foot lead, which gives an assay of 13 per cent. copper and $65 in gold. Mr. Johnson speaks very enthusiastically of the Similkameen and predicts a bright future for that part of B. C.

done on the Hartford, in Wellington camp. The principal owners are Wm. Farwell, general manager of the Eastern Townships' bank, Sherbrooke, Que., and H. N. Galer, of the Granby smelter.

Messrs. Harry Shallenberger and R McCulloch have started to do the assessment on the Yellowstone group in Skylark camp. The group consists of the Yellowstone, Idola and Don Pedro, situated between the Lake and Crescent. They are among the earliest locations in the district. The gentlemen will also do assessment on the Klondike and Nordiak, in West Copper camp, within a short period.

Another Boer Sympathizer.

It was good Canadian gold which gave Senator George Turner of Washington the power to try and embitter the relationship between Great Britain and the United States.

The Le Roi gold mine made Hon. George Turner a Senator. He might still have been struggling to live on his rank of brevet "Jedge" if the magic of British gold had not put him in the race for the United States Senatorship.

The personal experience of Senator Turner must testify to the liberality of British laws. Spokane, the city which claims him as her own, has been boomed by her contact with the mineral resources of British Columbia. Yet Senator Turner cannot miss a chance to join the the other demagogues in an attempt to sympathize with the Boers against an Empire which is the best friend of his nation, and under whose liberal laws he acquired the wealth which dishonored the United States Senate with his presence.—Toronto "Telegram."
