VOL. 2. NO. 4. SANDON, B. C., SATURDAY, JULY 2, 1898. PRICE FIVE CENTS.

[L.S] THOS. R. McINNES.
CANADA.
PROVINCE OF BRITISH COLUMBIA.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, QUEEN, Defender of the Faith, &c., &c., &c.

To Our faithful the Members elected to serve in the Legislative Assembly of Our Province of British Columbia, and to all whom it may concern,—GREETING.

A PROCLAMATION.

D. M. EBERTS, ATTORNEY-GENERAL. WHEREAS We have thought it, by and with the advice and consent of Our Executive Council of Our Province of British Columbia, to dissolve the present Legislative Assembly of Our said Province, which stands prorogued until summoned for dispatch of business.

NOW KNOW YE that We do, for this end, publish this Our Royal Proclamation, and do hereby dissolve the Legislative Assembly accordingly, and the members thereof are discharged from further attendance on same.

IN TESTIMONY WHEREOF We have caused these Our Letters to be made Patent, and the Great Seal of British Columbia to be hereunto affixed: WITNESS, the Honourable THOS. R. McINNES, Lieutenant-Governor of Our said Province of British Columbia, in Our City of Victoria, in Our said Province, this seventh day of June, in the year of Our Lord one thousand eight hundred and ninety-eight, and in the sixty-first year of Our Reign.

By Command.

B. H. TYRWHITT DRAKE,
Registrar of the Supreme Court.

THOS. R. McINNES.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, QUEEN, Defender of the Faith, &c., &c., &.

To the Returning Officer of the Slocan Riding of West Kootenay Electoral District:

WHEREAS His Honour the Lieutenant-Governor of British Columbia has, by a Proclamation bearing date the 7th day of June, 1898, been pleased to dissolve the Legislative Assembly of the said Province; and whereas it is necessary to hold Elections throughout the said Province to fill the vacancies caused by such dissolution, We command you that, notice of the time and place of Election being duly given, you do cause Election to be made, according to law, of One Member to serve in the Legislative Assembly of the Province of British Columbia for the Slocan Riding of West Kootenay Electoral District, and that you do cause the nomination of Candidates at such Election to be held on the 25th day of June, 1898, and do cause the name of each Member, when so elected, whether to be present or absent, to be certified to Our Supreme Court, at the City of Victoria, on or before the 31st day of August next, the Election, so made, distinctly and openly under Your Seal and by indorsed upon this Our Writ.

IN TESTIMONY WHEREOF, We have caused these Our Letters to be made Patent under the Great Seal of Our said Province of British Columbia: WITNESS, the Honourable THOMAS R. McINNES, at Our Government House, at Victoria, this seventh day of June, in the the year of Our Lord one thousand eight hundred and ninety-eight.

By Command.

B. H. TYRWHITT DRAKE,
Registrar of the Supreme Court.

PROVINCIAL SECRETARY'S OFFICE.

IS HONOUR the Lieutenant-Governor has been pleased to appoint the undermentioned persons to be Collectors of Votes, under the provisions of section 16 of the "Redistribution Act, 1898," namely:

JOHN D. SIBBALD, of Revelstoke, for the Revelstoke Riding, West Kootenay Electoral District.

ALEXANDER LUCAS, of Kaslo, for the Slocan Riding, West Kootenay Electoral District.

RODERICK F. TOLMIE, of Nelson, for the Nelson Riding, West Kootenay Electoral District.

JOHN KIRKUP, of Rossland, for the Rossland Riding, West Kootenay Electoral District.

And His Honour the Lieutenant-Governor has been pleased to appoint the undermentioned person to be a Distributing Collector, under the provisions of section 17 of the said Act, namely:—

In the former Electoral District of West Kootenay, GEORGE A. McFARLAND, of Nelson.

Victoria, May 20, 1898. 4t

PROVINCIAL SECRETARY'S OFFICE.
8th June, 1898.

HIS HONOUR the Lieutenant-Governor has been pleased to appoint Fletcher S. Andrews, Esquire, to be Returning Officer for the Slocan Riding of West Kootenay Electoral District; and

His Honour the Lieutenant-Governor has been pleased to appoint and declare the Government Office, Kaslo, to be the place for the nomination of candidates for election to the Legislative Assembly in the Slocan Riding of West Kootenay Electoral District.

AGENTS.—Book business is better than for years past; also have better and faster selling books. Agents clearing from $10,000 to $40,000 weekly. A few leaders are: "Queen Victoria," "Life of Mr. Gladstone," "My Mother's Bible Stories," "Progressive Speaker," "Klondyke Gold Fields," "Woman," "Glimpses of the Unseen," Breakfast, Dinner and Supper," "Canada: an Encyclopedia." Books on time. Outfits free to canvassers. THE BRADLEY-GARRETSON CO., Limited, Toronto.

NOTICE.

The first sitting of the Court of Revision for the purpose of hearing all complaints against the Assessment for the year 1898, as made by the Assessor of the City of Sandon, B.C., will be held at the Council chamber, City Offices, Sandon, on Wednesday, the 6th day of July, 1898, at 2 o'clock, p.m.

(Signed.)
FRANK C. SEWELL.

APPLICATION FOR RENEWAL OF LICENSES.

Notice is hereby given that at the next meeting of the Board of License Commissioners for the City of Sandon, I shall apply for a renewal of my liquor license for the Filbert Hotel, situate on Reco Avenue, in the City of Sandon.

WM. SUDROW.

Sandon, June 16th, 1898.

Certificate of Improvements.

NOTICE.

Rawdon Mineral Claim situate in the Slocan Mining Division of West Kootenay District. Where located: Joining the east side line of the Bluebird Claim on Carpenter creek.

Take notice that I, Charles A. Stoess, of Kaslo, B. C., acting as agent for James L. Montgomery, F. M. C. No. 4650 A, and Daniel C. Corbin, F. M. C. No. 1401 A, and George D. Rotter, F. M. C. No. 4750 A, Free Miner's Certificate, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 30th day of April, 1898.

CHARLES A. STOESS.

Certificate of Improvements.

NOTICE.

Victoria No. 8 Mineral Claim situate in the Slocan Mining Division of West Kootenay District, about one-half mile from Sandon and northeast of the Argo Mineral Claim.

Take notice that I, J. M. R. Fairbairn, acting as agent for G. D. McMartin, F. M. C., 5694 A; T. P. Durham, F.M.C., 20613 A; Thomas Milne, F.M.C., 9145 A; Thomas Irwin, F.M.C., 4347 A; G. D. Scott, F.M.C., 8505 A; A. R. Johnston, F.C.M., 559A; W.K. Leighton, F.M.C., 454A, intend, sixty days from the date hereof to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 11th day of June, 1898.

Certificate of Improvements.

NOTICE.

Elvira Mineral Claim situate in the Slocan Mining Division of West Kootenay District. Where located: On Payne Hill, northwest of Ruth about 2,000 feet above Carpenter Creek.

Take notice that I, J. M. R. Fairbairn, acting as agent for G. D. McMartin and T. P. Durham, Free Miner's Certificates, Nos. 5694A and 20613 A, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under Section 37, must be commenced before the issuance of such Certificate of Improvements.

Dated this 11th day of June, 1898.

THE GOVERNMENT OF THE
PROVINCE OF BRITISH COLUMBIA

Notice to Provincial TaxPayers

NOTICE is hereby given that those persons who desire to take advantage of the lower rate for the current year must send the amount thereof to me on or before the 30th June, instant.

JOHN KEEN,
Provincial Assessor and Collector.
Kaslo, B. C.

[L.S.] THOS R. McINNES.
CANADA.
PROVINCE OF BRITISH COLUMBIA.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, QUEEN, Defender of the Faith, &c., &c., &c.

To all to whom these presents shall come,—GREETING.

A PROCLAMATION.

D. M. EBERTS, ATTORNEY-GENERAL. WHEREAS We are desirous and resolved, as soon as may be, to meet Our people of Our Province of British Columbia, and to have their advice in Our Legislature, We do make known Our Royal Will and Pleasure to call a new Legislative Assembly of Our said Province; and do further declare that, by the advice of Our Executive Council of British Columbia, We have this day given orders for issuing Our Writs in due form, for calling a new Legislative Assembly for Our said Province, which Writs are to bear date on the seventh day of June, instant, and to be returnable on or before the thirty-first day of August next.

IN TESTIMONY WHEREOF We have caused these Our Letters to be made Patent, and the Public Seal of the said Province to be hereunto affixed: WITNESS, the Honourable THOS. R. McINNES, Lieutenant-Governor of Our said Province of British Columbia, in Our City of Victoria, in Our said Province, this seventh day of June, in the year of Our Lord one thousand eight hundred and ninety-eight, and in the sixty-first year of Our Reign.

By Command.

B.H. TYRWHITT DRAKE,
Registrar of the Supreme Court.

MR. RETALLACK'S ADDRESS.

TO THE ELECTORS OF THE SLOCAN RIDING OF WEST KOOTENAY ELECTORAL DISTRICT.

GENTLEMEN,—At the request of a large proportion of the community representing every section of the Riding, I beg to announce myself as a candidate for your suffrages in the coming elections.

In respectfully soliciting your votes and support I declare myself a supporter and follower of the Hon. J. H. Turner as the Leader of the only Party in this Province with a defined policy and coherent existence.

During my eight years residence in this District I have been a consistent supporter of his party in recognition of their attitude in meeting, and in cases anticipating, the requirements and expansion of this great mining region.

I am in favor of the following reforms:—

1. The abolition of the Tax upon working miners.

2. The abolition of the Mortgage Tax.

3. The distribution of seats in the Legislature in direct proportion to population.

4. I do not approve of the policy of the late Legislative Assembly in using their influence to exclude foreign railroads, such as the proposed railroad to Boundary Creek.

5. I favor certain revisions in the Mineral and Land Acts, particularly of some easy plan by which the holders of claims can advertize out their defaulting co-owners.

6. In filling all government appointments I am in favor of appointing bona fide residents of the district in all cases where such can be found competent to act.

7. I believe that the Provincial Legislature should bring all the aid and influence at its command to the assistance of the lead mining industry, especially in the direction of obtaining stronger recognition from the Federal Government at Ottawa of the importance of this industry and the disadvantages under which it now labors.

If you do me the honor to elect me as your representative I will at all times endeavor to protect and further the interests not only of the prospector but also of all those employed in and around our mines, recognizing that our entire community is dependant upon the mining industry.

I am, Gentlemen,
Your obedient servant,
JOHN L. RETALLACK.

Sandon Ore Shipments.

The following is a list of ore shipments over the K. & S. from Sandon for the week ending June 30:

MINE.	TONS
Ruth	105
Slocan Star	60
Wonderful Bird	1
Total	166

[L.S.] THOS. McINNES.
CANADA.
PROVINCE OF BRITISH COLUMBIA.

Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland, QUEEN, Defender of the Faith, &c, &c., &c.

To all whom these Presents shall come.—GREETING.

A PROCLAMATION.

D. M. EBERTS, ATTORNEY-GENERAL. WHEREAS it is advisable to establish the following polling places in the several and respective Electoral Districts hereinafter named:

NOW KNOW YE that, by virtue of the authority contained in the "Provincial Elections Act," the Lieutenant-Governor in Council declares that the following polling places shall be, and they are hereby, established for the several Electoral Districts, the names of which are set opposite such polling places, respectively, that is to say:—

POLLING PLACES.	ELECTORAL DISTRICT
Kaslo	West Kootenay—Slocan Riding
Ainsworth	
Pilot Bay	
Argenta	
Sandon	
New Denver	
Silverton	
Slocan City	
Robson	
Jubilee Point, Houser Lake	
Whitewater Station	
Three Forks	
Deer Park	
Slocan Junction, C. & K.R'y	

IN TESTIMONY WHEREOF We have caused these Our Letters to be made Patent and the Great Seal of British Columbia to be hereunto affixed: WITNESS, the Honourable THOS. R. McINNES, Lieutenant-Governor of Our saiy Province of British Columbia, in Our City of Victoria, in Our said Province, this fifteenth day of June, in the year of Our Lord one thousand eight hundred and ninety-eight, and in the sixty-first year of Our Reign.

By Command.

A CAMPBELL REDDIE,
Deputy Provincial Secretary.

MR. GREEN'S PLATFORM.

M. L. GRIMMETT,

CHAIRMAN OF THE CONVENTION OF INDEPENDENT ELECTORS, AND FELLOW ELECTORS OF THE SLOCAN RIDING OF WEST KOOTENAY:

Having been nominated by a representative convention of the Independent electors of the Slocan Riding of West Kootenay, over which you presided, as a candidate for the representation of the riding in the Legislative Assembly, I beg leave to accept the high honor thus conferred upon me, and to assure you that if elected, as I feel confident that with your active assistance and support I shall be, I proposed to labor earnestly and constantly for the promotion of the material interests of the riding without distinction of locality, and of the Province of British Columbia generally.

In accepting the nomination thus offered me I desire to state briefly the position which I shall assume upon questions affecting district and provincial interests.

I believe that the so-called Turner Government has not dealt fairly with the question of representation. Representation by population is the only fair and equitable manner in which the Legislative Assembly may be constituted. The necessities of an ephemeral government should form no element in acting upon such an important question.

Expenditure upon public works should I believe, except in extreme and important cases, be kept fairly within the provincial revenues, and in most cases necessary works and improvements of local interest should be decided upon and recommend by local advisory boards, and undertaken under the supervision of the provincial engineer and not left to the tender mercies of a gold commissioner other similar officer.

I believe that there should be revision of the methods in which the provincial accounts are kept, and such system adopted as will eliminate all doubtful and worthless assets and such true and plain statement of expenditure and assets be made as will truly and fully indicate to the plain and average citizen the condition of the provincial finances.

I believe that there should be such laws enacted and promulgated as will entirely prevent the competition of cheap oriental labor with that of the white citizen.

I believe that legislation, hitherto prevented by the local government, should be adopted to remove the unjust tax imposed upon the mine laborer, and the industry of the worker in metalliferous mines be placed in the same position as that of any other classes of laborers.

I believe that encouragement should be given for the construction of railways intended to develop the resources of the province, and that the railways bonused by the province should be under provincial control as to time allowed for construction, freight and passenger rates, and such other regulations as will protect and guard the best interests of the public whose funds have contributed to the roads constructed.

I believe that the interests of the province and of each of its constituent parts will be best promoted by an entire divorce of the local goverment from all close corporations and companies which find profit in preying on the provincial resources without making any adequate or even small return for the benefits which they enjoy.

I believe that the mortgage tax imposed by the Turner government is unjust, inequitable and unfair; a direct imposition upon the infortunate debtor temporarily compelled to place a charge upon his property. I should, therefore, in common with some of the foremost provincial financiers labor for its prompt removal.

I believe that West Kootenay, which contributes so largely to the provincial revenue, should receive a larger sum for the development of the district than has been hitherto allowed by the government, and the provincial revenues should be expended within the province and no devoted to extra provincial schemes as has been pleged by the Turner government.

I believe that no important amendments should be made to the Mineral Act affecting the prospector or mineral claim owner until the great body of miners in every section of the province has been consulted and their views ascertained.

I have the honor to be, gentlemen,
Your obedient servant,
R. F. GREEN.

CHURCH NOTES.

METHODIST, Rev. A M. Sanford, A.B., pastor.—Regular services will be held to-morrow at 11 a. m. and 7.30 p. m. Subject for the morning, "Growing careless"; evening, "The crafty politician."

PRESBYTERIAN—Services in Virginia hall to-morrow at 11 a. m. 7.30 p. m.—Preacher, Rev. J. A. Cleland. Holy Communion in the morning.

Union Sabbath School at 2.30 p.m. in the Methodist church.

THE MINES OF SLOCAN.

A correspondent of the Mining and Engineering Journal writes as follows:

The town of Sandon is located in a narrow gulch, with one long street, built up solid with business houses and residences erected on terraces cut along the mountain sides, which enclose the gulch. It has two lines of railroad, a well appointed social club, waterworks, electric lights and excellent hotels. In May, 1892, the present site was staked as a mineral claim by Mr. Jno. M. Harris, but the building of the town was not begun until January, 1896; today it has a population of more than 1,000, is the junction of the Canadian Pacific with the Kaslo & Slocan Railroad, and the shipping point for four dividend paying mines, Reco, Ruth, Slocan Star and Payne, besides about 20 prospects in the course of development.

Many of the locators of the best paying mines, as well as the miners working in them, are Americans, many from Idaho and Montana; but the capital that has been furnished to work several of the mines has come from England and eastern Canada: although the Reco and some others are still owned and operated by Americans. The producing mines are located on the mountains, within an area of about 8 miles square, with Sandon almost in the centre, so that the distance between the town and any of the shipping mines does not exceed 4 miles. The nearest to the town are the Slocan Star, about 1 mile distant, and the Ruth about 1½ miles. Those more distant are the Reco and Payne groups, Noble Five, Deadman, Sovereign, Last Chance, Queen Bess and Idaho. During a recent visit I was enabled, through the courtesy of the superintendents, to examine the underground workings at the Ruth, Slocan Star and Sovereign mines.

Ruth Mine.—Property comprises the Ruth, Ruth Fraction, Hope, Despair, and Wyoming claims. The workings have attained a vertical depth of 350 feet from the outcrop to the heading of the lowest level. The levels are opened by four drifts. No. 1 being 600 feet; Nos. 2 and 3 1,100 feet each; No. 4 the lowest, is 800 feet. The average thickness of solid ore is 3 feet 6 inches, the maximum from wall to wall being ten feet. The thickness of ore in the heading of the stope at the fourth level is 4 feet 6 inches. This is banded through with quartz and siderite. The minimum thickness is about 2 feet. It is noticeable that in the thicker portions of the vein the ore body carries more carbonate and concentrating material, while in the thinner portions, it is usually solid galena. The chief gangue material is siderite, the proportion of silica being comparatively small, often only from 3 to 4 per cent. Only the solid galena has been shipped; this is graded in two qualities, the first class averaging about 120 ozs. silver and 65 to 70 per cent., the second class about 65 oz. silver and 25 per cent. lead.

The strike of the country is nearly N. W. while that of the vein is nearly N. E., the dip being almost vertical. The country rock is slate with intrusive dikes of a porphyritic quartzite. In the underground workings some faults have occurred, which have disturbed the regularity of the vein. The workings I examined were on the lowest level, and the heading of the stope was between the third and fourth levels, in which the ore was 4 feet 6 inches thick, having a banded structure. This level is 850 feet above the town of Sandon, and about 1½ miles distant to the south by the ore road.

The machinery plant consists of an air compressor and saw mill. The ore is run from the lowest level by a gravity tram track to the dump at the wagon road. The haulage by wagon to town costs 95 cents per ton. The product is shipped to the smelter at Pueblo, Colo., and Everett, Wash. The company has paid dividends, but being a private corporation the amounts are not made public. At present between 80 and 90 men are employed.

Slocan Star.—Here the deepest workings are about 100 feet in vertical depth. They comprise five crosscut tunnels, run to the ore body, which has been drifted on at each level, and stopes opened. No. 1 tunnel intersects the ore body at 50 feet from its mouth, No. 2 at 100 feet, No. 3 at 150 feet, No. 4 at 575 feet, No. 5 at 900 feet. At the third and fourth levels the vein has been drifted on 440 feet, and at the fifth level about 300 feet. The maximum thickness of ore is 35 feet, the minimum is one foot, and the average 10 feet. The vein is quite well defined, with its strike nearly east, dip toward the south at an angle of 52 degrees. The strike of the country rock is N.W.; this is the argillite common to the district, having the same intrusive porphyritic dikes. The altitude of the third level is above 1,000 feet above the town of Sandon.

About 20 per cent. of the vein matter is solid galena, averaging about 100 oz. silver and 70 per cent; this is shipped direct to the smelters. The remainder of the ore body is concentrated in the company's mill situated below the mine, and connected with it by a gravity tramway ¾ mile long, having a grade varying from 30 to 50 degrees. The mill has a capacity to treat 120 tons of ore per day; it is run by water power, furnished from Carpenter creek, and brought around from near the head in a flume, the average altitude of which is 500 feet above the town. Jigs and round slime tables are used for concentrating the ore, which yields from 12½ to 15 per cent. of concentrates, averaging according to the the smelter returns nearly 80 oz. silver and 70 per cent. lead. A good deal of zinc occurs in the ore, which carries silver values, but cannot be saved except by a second concentration, and at present is allowed to pass off with the tailings from the slime tables.

The mine being located only about half a mile from Sandon, the ore and sacked concentrates are hauled by wagon to the railroad. This mine is also a good dividend payer, and the ore body is the largest in the Slocan district so far as at present discovered.

Sovereign. This mine is located on Reco Mountain, about 2½ miles easterly from Sandon on the same trail that leads to the Reco mine, and about half way between the town and that property. The workings are 1,500 feet above Sandon, and consist of two drifts run on the vein, which dips at an angle of 55 degrees towards the southeast, the strike being towards the northeast, and strike of the country toward the northwest. The upper level is 365 feet, and the lower 740 feet. A winze has also been sunk on the vein, 60 feet deep from the lower level. The country rock is the agillite of the district, with intrusive dikes of porphyritic quartzite. The vein carries a percentage of porphyrite as gangue, and averages about 5 feet in thickness. No stoping has been done, but 100 tons of solid galena has been shipped from the drifts, and there is a large quantity of concentrating ore on the dump, awaiting shipment to one of the concentrators.

The hanging wall of this vein is very clearly defined, but the footwall is not well defined, the mineral having apparently impregnated the country rock from the hanging wall instead of from the foot, as is usually the case in this district. On the upper level near the heading a fault occurs, which has thrust the vein several feet to the west of its usual course, but as the workings have been extended ore has been again exposed. This fault appears to have been of small extent and has not been disturbed. As the bulk of ore is not solid, the questions to be solved as to the paying qualities of this mine will be the quantity and grade of the concentrates, as well as the permancy and extent of ore body as greater depth is attained. The work so far performed has been done in a systematic and economical manner.

At the Reco and Noble Five mines, situated at a much higher altitude on the same mountain, development work was only carried on, but the Reco has been shipping ore all winter, as long as the trail was in good condition to rawhide over. The Noble Five mine was shut down during the winter, but work has been resumed to explore for extensions of the ore body. The mine is equipped with a concentrating mill, connected with the mine by an aerial tramway, 6,100 feet in length. The elevation of the loading station above the mill is 2,050 feet. The tramway is of the Finlayson design, was built by the Colorado Iron Works of Denver, and erected by B. C. Riblet, an American engineer from Spokane Falls. It was finished in January, 1897. The longest span is 1,000 feet, having an elevation of 400 feet above the surface. There are 20 towers, not including the terminals, with a tension for standing rope in the centre. The capacity is 20 tons per hour, carried by 64 buckets, each holding 600 lbs. of mateial. The standing rope is 1¼ inch on the loaded side and 1 inch on the unloaded; the hauling rope is ¾ inch steel. It works automatically at both ends, and the speed is regulated by three friction brakes on a grip wheel. Two men operate it at the upper end, one to work the brake, the other to load buckets, but no one is required at the lower end. The tramway was in operation about 8 or 9 months previous to the shutting down of the mine last winter. All supplies and mining timbers are hauled up to the mine, and the saving of the freight on these was sufficient to pay 6 per cent. interest on the investment, besides operating expenses.

Mr. Riblet has given a great deal of attention to aerial tramways, and after constructing the one at the Noble Five, designed and constructed another at the Payne mine. This is designed with some original alterations from both the Finlayson and Bleichert patterns. This connects the ore bin at the switch on the Canadian Pacific Railway with a gravity tram, built at an earlier period from the Kaslo & Slocan Railroad track to the mine. The length is 1,420 feet built in three spans, the longest being about 1,000 feet. The fall is 450 feet between loading and unloading stations. It is built on the principal of a surface tram, working on a cable. Two buckets with a caparity of 15 tons per hour, carry the loads. Attached to these is a hauling rope in two sections, the head end, the heaviest, being ¾ inch steel, and the tail end ⅝ inch. This system works better than a hauling rope in one section, because the tail end rope relieves much of the tension, which is excessive on such a length of tram if only one endless rope is used. The standing rope is ¾ inch steel, with flattened strand. The speed is regulated at the upper end by a three wheel brake. The buckets are automatic dumpers, and the plant is operated by one man at $3.50 per day, which brings the cost of hauling ore to about 2¾ cents per ton. The construction was begun January, 1898 and the tramway was finished, ready to run, on February 5th.

The Reco Mining Company, as well as others of the Slocan mines, contemplate putting in aerial cable plants during the coming season, so as to reduce the cost of transportation of supplies and ore, which heretofore has been excessive by the crude methods of packing in summer and rawhiding in winter.

A hurried study of the general geology of the Sandon camp demonstrates that the prevailing country rock is a metamorphosed agillite, very massive in places, and sometimes shistose and laminated, with intrusive dikes of porphyritic quartzite diabase, and porphyrite of varying extent.

MINING BRIEFS.

The Gibson is reported as having 14 inches of ore.

The Dardanelles mine is expected to re-open on the 15th of July.

The Silver Bell in the Best basin has a force of eight men at work.

The Payne is becoming like itself again by taking back its old force of men.

The Antoine mine shipped one car of ore last Tuesday to Kaslo, being the only shipment from McGuigan during this month.

A sample shipment of eight and one half tons of ore was made from the Mollie Hughes mine last week to the Trail smelter.

A rich strike is reported from the Tamarack. It is said that a paystreak measuring three inches has been uncovered which will run 1,000 ounces in silver.

Over 4,000 feet of air-pipe has been laid at the Noble Five mine. Also two cars of machiney arrived over the C. P. R. last week and is now being taken up to the mine.

A big strike was made last week on Tracy creek, and the ore will run up into the thousands. No particulars have been learned yet as to the extent of the find, but the people in that particular territory are feeling jubilant over the strike.

The Montezuma has made a very important strike and may result in the mill being started again. It is said the whole face of the tunnel is in concentrating ore of a splendid grade. But as it will take several days to cross the lead the full extent of the ore body can not be ascertained at present, but it is thought it will be considerable.

An application is to be made for a Crown Grant for the Carbonate Hill claim situated on Red Mountain and adjoining the L. H. claim. A splendid lead 20 feet wide runs through this property, an eight inch paystrak gives average returns of 2 1-3 per cent. copper, $18 in gold and 30 ounces silver per ton, and assays running very high can be obtained in places. The L. H. vein also runs across this property and has been traced on to it. The Carbonate Hill lies about four miles from Silverton and a good trail connects it with the town.

A ROUSING MEETING.

A meeting in the interest of Mr. Green was held in Spencer's hall, on Thursday evening, and it showed conclusively the city was with him by a a substantial majority. Mr. Lilly was chosen chairman and he discharged his duties to the satisfaction of all. The speakers for Mr. Retallack were himself, Mr. Buchanan and Mr. R. B. Kerr. Those for Mr. Green were himself, Mr. Carney and Mr. Cliffe. The speaking continued till after 12 o'clock, and judging by the applause given to Mr. Green's speakers he had a very large majority of the meeting.

Mr. Retallack asked for the reading of affidavits of bribery, and when read they were too much for his pleasure as he had nothing but hearsay to refute them. The truth is the government is doomed, and Mr. Retallack and his friends know it.

This constituency with all others in these parts, will do their share towards this end. Sandon will give Mr. Green a good substantial majority.

The Mining Review

SANDON, BRITISH COLUMBIA,

SUBSCRIPTION $2.00 PER YEAR
STRICTLY IN ADVNACE.

"UNEASY LIES THE HEAD THAT WEARS THE CROWN."

It is plain, from his restlestness, when the finances of the country are dealt with by opposition speakers, that Premier Turner knows the management of public business under him will not bear investigation, and it is no wonder. When he entered the Cabinet, in 1897, the public debt was but $482,690, and now it is $6,586,004. He is, therefore, in port at last for most of the time, responsible for over six millions of an increase. In this time the province has paid $1,500,905 on interest, if we estimate at simple rate only, or double that if we consider the sacrifice of bonds below face value, and compound our interest as we should. All this debt and interest payment might have been avoided, if the Turner government had adopted from the start proper business methods and adhere to them throughout.

To commence we find them now paying all told, $319,455 a year in government salaries, while Manitoba with two and a half times our population pays but $105,840. If we add 50 per cent. to this for extra cost of living we have $158,760, what the Turner government should pay, but they pay $160,695 more, or $1,606,950 in the ten years of Turner's administration. The parliament buildings were forced on the country to anchor the capital at Victoria at a cost of $1,200,000 when th y should have cost but $250,000—another loss of nearly a round million. With our printing bureau at Victoria costing $41,550 a year for public printing against $11,450 paid by Manitoba under competition, we lose another $30,000 a year or $300,000 in the ten years of Turner rule. These four items added together make $4,358,755 or the great bulk of the increase in debt under Turner rule. Now, Mr. Green's contention is that all these axtravagances should have been cut off, and had they been every public work done by the Turner government, if done under competition, instead of the supervision of government candidates as campaign funds, could have been done without the mortgaging of over five millions in the last ten years. We leave it to the electors to say which would have been the better policy.

Mr. Green, though not an orator, is a first-class business man, well up in finance, and with sufficient knowledge of public finance to enable him to suggest the necessary reforms in our public expenditures when the estimates are brought before the House. He is, therefore, the class of man the necessities of the hour call for. We could go on in columns showing the extravagance of the government, but we think in this and previous issues we have said enough to carry conviction to unprejudiced readers.

But why the Turner government should look for supporters in any section of West Kootenay is past comprehension. For instance in the past six years West Kootenay has yielded a revenue of $707,773, over $300,000 of it coming in last year, and against this she has received from all sources but $499,219, netting the government a gain of over $207,000.

In the past three years again the government has given the little town of Nanaimo $105,882 and has got in return $18,230, losing over $87,000. The honest, unbiased elector will say it is to Nanaimo and not to the Kootenay the Turner government should look for its support. Is not this the opinion of every honest elector in this constituency. The Turner government promises no better treatment of the Kootenay country even with the election of Mr. Retallack, so that as "Ephraim is joined to his idols" the best thing for our people to do is to let him alone and paddle our own canoes.

With the election of Mr. Green, and the certain defeat of the government in the country, a new order of things will be inaugurated, and the sign of prosperity for West Kootenay will arise in the east, and never set until the many desired reforms refused by the Turner government shall have been realized. Then vote for Mr. Green.

THE SITUATION.

There are some electors to-day in the country who are, perhaps, influenced in their decision, as to voting by the corrupt policy the government is in many instances employing. They say it may be better for us to support the government if we want their countenance in assistance to public undertakings. The government that looks at matters in that way is deserving of the severest condemnation. They are there as trustees for the people, irrespective of creed or class, to handle the public money in the interest of the country without fear, favor or partiality. To dispose of it in any other way, we repeat, is corruption which all classes ought to discourage.

There is, however, a broader platform from which to view the situation in the interest of the future of the country. The present premier entered the the ministry in 1887, when the province owed less than half a million of debt. To-day it owes well on to six millions and will in a short time owe five more through the power the government took at the last session of the legislature, and there is so very little in the shape of a revenue producing assett to show for it all—less than a million and a half.

It is argued by the government supporters that the administration has spent a great deal in school buildings, roads, bridges, trails, etc., and they must continue to make these expenditures because the needs of the country are great. This isall very true, but so much has nature done for the province that our revenues, in the natural course, are large and made doubly so by unnecessary taxation. The sales of lands are large, the receipts from mines are large, casual revenues are extensive, and violent hands are laid on lands, personal property, incomes, etc., etc., that in other provinces yield revenues, not to governments, but to municipalities. As a consequence our municip l taxes in organized districts are almost unbearable. From these latter sources the government realises $377,000 a year, a sum considerably more than half the revenue of Manitoba altogether with double our population. The fact is that extravagance has been so rampant in salaries of officials, jobbery in the expenditure of monies on public works, grants to railways, etc., that our immense revenues have been for the last ten years, so far exceeded that recourse was had to mortgaging, and now interest is eating up the best portion of our ordinary revenues. There is no course, if the country is to be saved, but to call a halt, and Mr. Turner and his party boldly declare they will pay no attention to it. They say they are going to continue borrowing and building as before, if they should be entrusted with a renewed lease of life. Will the electors nail their own coffins and give it to them. This is the bald question that is before them and on which they are asked to declare themselves on the 9th of July. For the safety of themselves and their families we hope their reply will be in the negative. The way to do it in the Slocan is by voting for R. F. Green.

The government papers at Kaslo are very anxious to know Mr. Green's position in the House on a vote of want of confidence. The anxiety of the prints is positive proof that they know he is going to be electod. Well, we think at the meeting there Saturday night he gave a full enough explanation, He stated emphatically that in such an event he would be found voting with the opposition. Is this plain enough?

Mr. Green's Meetings.

Mr. Green will hold public meetings at the following places on the dates as set opposite at 7.30, to be addressed by himself and others in his interest. Mr. Retallack and his friends are invited to attend:—

PLACE OF MEETING.	DATE.	
Whitewater	July	2
Robson	"	4
Deer Park	"	5
Ainsworth	"	7
Kaslo	"	8

COMMITTEE ROOMS.

Mr. Green's committee rooms open all day and evening are in Golden's old clothing store. All who are not government supporters are cordially invited to visit the rooms and render what assistance they can in furthering Mr. Green's election.

Here is what Peter Cooper, who died worth millions, said of a newspaper: "In all the towns where a newspaper is published, every man should advertise in it, if nothing more than a card stating his name and the business he is in. It does not only pay to advertise, but it lets people at a distance know that the town in which you reside is a prosperous community of business men. As the seeds are sown so the seed recompenses. Never pull down your sign while you expect to do business."

THE OLD SONG.

There is a garden sweet with rose and pink
Where honeysuckle grows and virgin's bower,
Soft turfed and shelving to the river's brink,
And in that garden grows my heart's white flower.

She moves about it like a living rose,
And from my boat as I come up the stream
I see, mid all the flowers her garden grows,
The living lily of her garments gleam.

At night I walk beside the darkling tide
Where the drowned stars among the lilies stir,
See her bright window on the farther side
And bless the happy roof that shelters her.

And when I touch that fair, enchanted land
Among the roses in the sunlit noon
She comes to me and takes me by the hand,
And life's a song and love, true love, the tune.

—Pall Mall Gazette.

THE LEAD SOLDIER.

It was a little before the revolution. At Brienne, attending the military school, was a young man who amused himself in the evenings by drilling lead foot soldiers. Everybody laughed at him, but, regardless of their mockery, he took great delight in reviewing his soldiers when ready for battle, and, radiant, led them to imaginary victories.

His schoolmates called him fool and enthusiast. He listened to them with his large, dreamy eyes opened wide, and, smiling, continued to direct his diminutive army.

This was his sole enjoyment. More earnest than the others, he worked all day, even during the hour of recreation. When evening came, as recreation he took the little soldiers from their boxes, and, talking to them as he would to human beings, he reviewed them.

One evening, after having worked harder than usual, the young man sat listlessly drilling his soldiers. He was evidently tired. As he leaned on the table he saw one of his lead soldiers turn toward a comrade and say these words:

"It seems to me that the emperor is very tired tonight."

The young man started. He rubbed his eyes, believing it to be a dream; but no, he was wide awake.

"This is," thought he, "a hallucination."

And he put his soldiers, one by one, into their boxes.

When the boxes were closed, he made his way to his bed. He was about to retire when he heard behind him a tiny voice murmur:

"The emperor is very tired tonight."

He turned around, but saw he was alone.

Vaguely frightened he said the three words:

"Who has spoken?"

"I," murmured a little voice.

"Who are you?"

"I have no name. I am a very little lead soldier."

The frightened young man looked at the boxes of soldiers scattered about on the table and distinctly saw that one of the covers was moving.

He approached the table and spied one of the soldiers standing upright on a comrade and looking at him as he made a military bow. Then the young fellow threw himself on his bed, wishing to see or hear no more. He thought he was going crazy.

A few years later this young man was made captain of the artillery.

At Toulon he fought the English, distinguishing himself as one of the bravest, astonishing his troops by his daring and his science, amazing his superiors by his courage and his unfailing designs. After several weeks Toulon was taken. The victorious army entered the city, and for the first time since the campaign the young captain fell into a deep sleep.

He who always slept armed, he who awakened at the slightest noise, slept like this? It was because he knew his work was accomplished; he had the right to take a moment's rest. During the night he dreamed that he was at Brienne, playing with his little lead soldiers, and he distinctly saw one of them salute him in a military style and say:

"The emperor is very tired tonight."

The captain awoke, and, rubbing his eyes, saw that it was broad daylight. He arose, dressed and went out, dreamily murmuring:

"Emperor, emperor! Might it not be possible? Does the little lead soldier speak truly?"

Then he heard a tiny voice murmur at his side:

"The little lead soldier cannot be deceived."

He turned in the direction whence came the voice and saw, perched on a pebble, a tiny lead soldier saluting and looking at him steadily.

In the next instant the apparition vanished.

* * * * * * *

The pupil at Brienne, the captain at Toulon, Napoleon Bonaparte, is emperor. He has been crowned this very morning, and this evening he received the embassadors of other nations and the generals of the armies. He is exhausted.

Adjoining his superb reception room is a small cell furnished with a camp bed and one chair.

Disdaining the grand bed of state, he retires to his cell. There, at least, he can sleep.

He falls asleep.

And now in a dream he sees his lead soldier of old, who again murmurs:

"The emperor is very tired tonight."

The emperor starts. Then he asks:

"Who spoke?"

"I," says a weak voice.

"Who are you?"

"I have no name. I am a tiny lead soldier."

The emperor reflects a moment, then suddenly says:

"You have no name. Do you want one?"

"I do indeed, sire."

"Very well; you shall be called L'Etoile."

"Good, sire. What shall I be?"

"You will be a soldier in my old guard."

"I am pleased, sire, but what am I to do?"

"What are you to do?"

After a moment's reflection the emperor says:

"Fight, but say nothing."

"Sire," replies the lead soldier, "I will fight and never speak. But I wish to warn you that, when about to die, I shall speak once more, but for the last time. And I shall say to you, what I have always said, 'The emperor is very tired tonight.' When I shall have said that, I will be at the point of death and you about to be vanquished."

The soldier ceased speaking. The emperor slept on, but dreamed no more.

A few days after while reviewing his old guard the emperor remarked a new recruit. He wondered and asked who the soldier was.

"Why, you know him, sire; he brought me a line signed by your hand begging me to accept him in my regiment."

The emperor, upset, approached the soldier.

"So you are called L'Etoile?"

The soldier bowed his head as though to say yes.

"Why do you not say yes? You can speak."

The soldier shook his head, meaning no. The emperor remembered, and, as if dreaming, murmured:

"You are mute?"

The soldier bowed his head—yes. And the emperor passed on and once more asked himself if he were not dreaming.

The soldier, L'Etoile, fought like a lion on the battlefields. He could never be an officer, but he was made a chevalier of the order of the Legion of Honor and never was a cross more deservedly worn. Every time the emperor passed him he would say:

"Good day, L'Etoile."

And he would continue his way, happy to see L'Etoile still dumb, for he remembered the words of the little lead soldier.

"When I shall speak, I will be at the point of death and you about to be vanquished."

* * * * * * *

After victory, then defeat!

The emperor leaves for the island of Elba. He takes L'Etoile with him. L'Etoile is always mute.

The emperor thinks of returning to France. He returns. He has hardly landed before he sends for L'Etoile and speaks to him. L'Etoile remains silent.

And, confident, Napoleon crosses France and reascends his throne.

But now the allies begin to wage war against him. He, without being disconcerted, raises armies, fights every day; always brave, always defeated, but hopeful for the future, for L'Etoile has not yet spoken.

But in the midst of his losses Napoleon wonders if L'Etoile has not been false to him.

No; he has not been untrue.

* * * * * * *

Waterloo! Behold, Waterloo!

The battle is fierce. The last square alone now remains. The emperor, from an elevation, looks over the plain. With a fieldglass he looks for L'Etoile. And now he sees him. The grenadier is fighting desperately.

Suddenly he falls, struck by a bullet. The emperor, pale as a corpse, drops his glass and comes down.

L'Etoile is about to speak. Will he speak?

He imagines he will hear the voice of L'Etoile in his ear as he did at Brienne, and that he will see perched on a pebble by his side a tiny lead soldier.

The emperor neither hears nor sees anything.

His courage returns.

Who knows? Maybe everything is not yet over? L'Etoile may not be fatally wounded.

And with a confident air the emperor surveys the horizon.

The litters carried by ambulances now pass before him. They slowly and sadly wend their way by tens, twenties, thirties—

And suddenly in one of them the emperor recognizes L'Etoile.

Like a madman he dismounts, leaving his astonished marshals, and quickly reaches the wounded soldier, whom he finds pale and rigid as death.

"Poor L'Etoile!" said the emperor.

Then, addressing the surgeon:

"Did he speak?"

"No, sire, he is mute."

The emperor breathes again. But now he hears a broken voice coming from the corpse of L'Etoile:

"The emperor is very tired tonight," says the voice.

And for the first time in his life the emperor faints.

* * * * * * *

At St. Helena, Napoleon plays, as of yore, with his little lead soldiers. As before, he drills and leads them to imaginary victories.

He sometimes listens, hoping that one of them will speak, saluting him, as in the past, by the sweet name of emperor.

But the little lead soldiers are silent. Never again will they speak.

L'Etoile is dead. The emperor is fallen. The little lead soldiers will speak no more.—From the French For Chicago Times-Herald.

FOR OVER FIFTY YEAR

Mrs. Winslow's Soothing Syrup has been used by millions of mothers for their children while teething. If disturbed at night and broken of your rest by a sick child, suffering and crying with pain of cutting teeth. Send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for children teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures diarrhœa, regulates the stomach and bowels, cures Wind Colic, softens the gums and reduces Inflammation, and gives tone and energy to the system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price twenty-five cents a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."

Looking to the Future.

"Yes," said the man who had been looking at some apartments in the big building, "it's very nice, but I don't see how I can take the place."

"What's the matter?" inquired the janitor.

"I observe by your printed rules that you don't keep the elevator running all night, and I must say I don't like the idea of walking up and down five or six flights of stairs every time my wife wants to know whether a burglar is trying to get into the cellar."—Washington Star.

Or Him?

(Now word still needed.)

"How do you get along with your new typewriter?"

"Is or her?"—Chicago Tribune.

PERRY DAVIS'

Some people in the world persist in clinging to old methods. There are men who still use a forked stick in place of a modern plow. There are also men, who, when they are troubled with a disordered stomach or liver, resort to the old-fashioned violent remedies that rack and rend the whole body, and while they give temporary relief, in the long run do the entire system a great amount of harm.

Modern science has discovered remedies infinitely superior to these old-fashioned drugs, that do their work by promoting the natural processes of excretion and secretion and gently correcting all circulatory disturbances. When a man feels generally out of sorts, when he loses sleep at night, when he gets up headachey and with a bad taste in his mouth in the morning, when he feels dull and lethargic all day, when his appetite is poor and his food distresses him, when work comes hard and recreation is an impossibility, that man, though he may not believe it, is a pretty sick man. He is on the road to consumption, nervous prostration, malaria, or some serious blood disease. In cases of this description a man should resort at once to Dr. Pierce's Golden Medical Discovery. It is the best medicine for a weak stomach, impaired digestion and disordered liver. It is the great blood-maker and purifier, flesh-builder and nerve tonic. It cures 98 per cent. of all cases of consumption, bronchitis, lingering coughs and kindred ailments. Thousands have testified to its marvelous merits. It is a modern, scientific medicine that aids without goading nature, and that has stood the test for thirty years. Medicine dealers sell it.

Dr. Pierce's Pellets cure constipation.

Humor of British Elections.

Years ago when elections in England were contests in which bribery and intimidation were winked at voters who lived at a distance often found it difficult to get to the polls, whether they traveled by land or by water. A vessel carrying voters from London to Ipswich, only 70 miles distant, somehow lost its reckoning and did not discover it until Amsterdam was sighted.

Coaches conveying voters broke down mysteriously. Readers of "Pickwick Papers" will recall Tony Weller, the stout, red faced coachman who married a "widder" for his "second wentur," and who had what he called "a coincidence," while driving a coach load of voters from London to a certain town. The coach was upset several miles from its destination, and the passengers reached the polling booth only after the voting had been closed.

Ireland's reputation for practical joking at elections is maintained even in these prosaic days. At the election for the city of Cork in 1895 the contest was between the Parnellites and the anti-Parnellites. A funny incident happened. The wives of four voters held political views which differed from their husbands'. On the day of the election these four women rose early and left their homes, carrying off every stitch of male attire from the house, with the keys, after locking in their sleeping husbands.

But fate was against them. Before the polls closed, the clothesless voters were discovered. Friends wrapped them in blankets and conveyed them in carriages to the polling booths, where they arrived just in time to record their votes.—Youth's Companion.

The Moon's Movements.

The moon is the nearest, and, being the nearest, appears to us, with the single exception of the sun, the largest, although it is in reality one of the smallest of the heavenly bodies. Just as the earth goes round the sun, and the period of revolutions constitutes a year, so the moon goes round the earth approximately in a period of one month. But while we turn on our axis every 24 hours, thus causing the alternations of light and darkness, day and night, the moon takes a month to revolve on hers, so that she always presents the same, or very nearly the same, surface to us.—London Echo.

Too Sharp Diet.

IMPORTANT DISCOVERY.

A New Method of Extracting Gold from Low Grade Ores.

Two London mining engineers, Carl Von Racz and Franz H. Ascher, are reported to have hit a discovery that will greatly interest owners of low grade gold bearing veins. This is a new method of ex racting gold from its ores, which is claimed to offer the advantages of yielding all the gold present, of being applicable where the water supply is limited and of requiring an inexpensive plant.

The object of the inventors was to devise a system in which the gold ore is not brought to a finer state of division than that in which the gold occurs in nature. Well-designed rolls crush from 6 to 10 tons of gold quartz in 24 hours. The dry crushed material thus obtained is then diluted with a chemical solution, and run over Frue vanners for a preliminary concentration.

The concentrates then pass into a mixing tank, in order to be further treated wirh mercury. From this tank the pulp passes over plates, coated with mercury, of special design, so arranged as to prevent oxidation. It then passes over a second Frue vanner.

Experiments made with this method showed that it invariably yielded the gold without any appreciable loss. The chief point of the whole system is the fact that the gold is extracted from the ore in the same weight as that in which it occurs. The great loss in other methods is caused for the most part by the gold being rubbed to atoms that cannot be recovered by amalgamation, by concentration or by treatment with cyanide.

The amalgamated plates in the new method are covered with a network of wires or other metal, forming walls of a half millimetre to several millimetres in height. Above this is covering or other fabric, and the pulp flowing underneath impinges on it, and is thus more easily brought into contact with the cells of amalgam.

The composition of the dilute chemical solution, which is added to the crushed ore at the beginning of the process, in order to accelerate amalgamation, is not stated in the particulars furnished by the inventors, but is probably a solution of cyanide of potassium. The new process seems to have given remarkable results in the expermentary trials, as small an amount as one gramme of gold to a ton of quartz having been recovered without loss.

A Great Copper Mine in the Making.

One of the most remarkable displays of auriferous copper ore probably ever seen in this province is at Mr. John Cobledick's rooms in the Badmington hotel, Vancouver.

The chief distinction of this unique collection consists, not so much in its high grade (27 per cent. copper, $2.60 gold and a few ounces of silver), as in the characteristic of massiveness that is manifested in every piece of the collection. The whole display is taken from an enormous ore body, of 150 to 250 feet in width, made up of what at present appears to be three converging lodes, projecting 200 feet or more above the surface, at the base of a cone-shapped mountain of granite, several thousand feet high, evidently of a geologically modern origin.

The collection consists of typical pieces, and will bring to the mind of the observer an idea of the magnitude, and composition of the ore body, (fitly named the Colussus group), a part being taken from a few feet beneath the surface, where the outcroppings of an ore chute, 30 feet in width by 50 feet in length occurs; and a part from a cross-cut tunnel, 100 feet long, at 150 feet in depth.

A number of men have been at work on the property for several months past. A pleasing feature about the ore is the steady increase in its gold values from "traces" at the surface, to $2.60 by assay of samples taken from 150 feet in depth.

There is a somewhat unusual feature attached to this ore, viz., a grey metallack film (probably a modification of molybdenite) deposited over the metallack portions of it—eminently suggestive of "telluridic" modifications, as greater depth is reached.—Rossland Miner.

Mollie Gibson Title Settled.

G.G. Labaree and Colonel Rufus Pope were among the arrivals yesterday from Spokane. Together with Colonel S. L. Ray, they have been engaged in clearing the title to the Mollie Gibson, and have been very successful, as all the suits in which the claim was involved have been settled with the exception of the appeal taken by the jumpers of the property. Messrs. Ray, Labaree and Pope are now the principal owners in the claim, and they expect to indorporate a company to operate it if the appeal is satisfactorily settled.

A force is now at work on the claim under the mangement of Byron White, the manager of the Slocan Star. The Mollie Gibson lies about 12 miles up Kokanee creek, which empties into Kootenay lake about 12 miles above Nelson.

A FORTUNE.

In the event of a stroke of good fortune you can win	The payment of the prizes is guaranteed by Govt. 1st drawing:
5000,000 Marks.	June 16th.

You are invited to participate in the

chances of winning

in the grand drawings of prizes guaranteed by the State of Hamburg in which

11 MILLIONS 349,325 MARKS

surely have to be won.

In the course of THREE ADVANTAGEOUS DRAWINGS, which contain according to the Prospectus only 118,000 tickets, the following PRIZES will be forthcoming, viz:

The HIGHEST PRIZE will be event.

500,000 MARKS.

Premium of	30,0000 Marks
1 Prize of	200,000 Marks
1 Prize of	100,000 Marks
2 Prizes of	75,000 Marks
1 Prize of	70,000 Marks
1 Prize of	65,000 Marks
1 Prize of	60,000 Marks
1 Prize of	55,000 Marks
2 Prizes of	50,000 Marks
1 Prize of	40,000 Marks
1 Prize of	30,000 Marks
2 Prizes of	20,000 Marks
26 Prizes of	10,000 Marks
56 Prizes of	5,000 Marks
106 Prizes of	3,000 Marks
206 Prizes of	2,000 Marks
812 Prizes of	1,000 Marks
1518 Prizes of	400 Marks
40 Prizes of	300 Marks
140 Prizes of	200 Marks
36952 Prizes of	155 Marks
9959 Prizes of	134,104,100 Marks

9351 Prizes of 73,45,21 Marks in all 59,180 prizes which must be surely won in 7 drawings within the space of a few months.

The highest prize of 1st drawing amounts to Mark 50,000, increase in 2nd drawing to Mark 55,000, in 3rd Mark 60,000, in 4th Mark 65,000, in 5th Mark 70,000, in 6th Mark 75,000, in 7th Mark 200,000, and together with the premium of Mark 300,000, in the most fortunate case to Mark 500,000.

The official cost for participation in the first two drawings amounts to

Dollar 4.50 for a full ticket.
Dollar 2.25 for half a ticket.
Dollar 1.13 for one-quarter of a ticket.

Half resp. quarter tickets will entitle to one-half resp. one-quarter of the amount, won by the respective number, named on the ticket.

The stakes for participation in the following drawings as well as the exact prize-table, are indicated in the OFFICIAL PROSPECTUS, which I send on demand gratis in advance. The prospectus is also sent gratis with every order. After the drawing I shall forward to every ticket-holder the official list of the winning numbers.

The payment and forwarding of the amounts won

to those concerned will have my special and prompt attention, and with the most absolute secrecy.

☞ Remittance of money can be made by American Bank-notes by registered letter or Postoffice Orders. Small amounts can also be sent by postage stamps.

☞ On account of the approaching drawing of the prizes, please address the orders immediately in all confidence direct to

Samuel Heckscher Senr.,

Banker, Hamburg, Germany.

Travellers

Should always carry with them a bottle of Dr. Fowler's Extract of Wild Strawberry.

The change of food and water to which those who travel are subject, often produces an attack of Diarrhœa, which is as unpleasant and discomforting as it may be dangerous. A bottle of Dr. Fowler's Extract of Wild Strawberry in your grip is a guarantee of safety. On the first indication of Cramps, Colic, Diarrhœa or Dysentery, a few doses will promptly check further advance of these diseases.

It is an old, reliable remedy, with over forty years' of cures to its credit, whose merit is recognized everywhere and one that the doctors recommend in preference to all others.

Sold by medicine dealers everywhere at 35c. a bottle.

Always insist on the genuine, as many of the imitations are highly dangerous.

ATENTION TRAVELLING PUBLIC.

Leave Sandon for all Coast and Sound points at 7.45 a.m. daily,
arrive Vancouver 13 o'clock next day.
arrive Seattle 17.35 o'clock next day.

Rosebery Townsite.

The many advantages enjoyed by Rosebery put before the public, CLAIMED WITHOUT OPPOSITION.

Its Advantages as a Distributing Center.

Rosebery is the only town in Kootenay having both railroad and steamboat connection that can ship goods daily to ten different towns, whereby the shipper can see his wares leave his hands and that they will be received by the consignee within two hours.

Its Advantages as a Railroad Center.

Rosebery enjoys the position of king of the funnell as it were, for the railroad business of the whole of the Kootenays. All ore and matter for shipment from Nelson, Trail Creek and the Slocan must, and is now passing out this way to the main line of the C. P. R., as well as all goods coming in from Revelstoke to the Kootenay country.

NOTE. To substantiate this: The C. P. R. are now putting in track weigh scales at Rosebery, the first and only scales that has been put in on any of the C. P. R. branches in Kootenay—which goes to show the importance of this point by the Canadian Pacific Railway Company's actions.

Its Advantages as a Steamboat Point.

Rosebery claims, without opposition, of being the only junction on the lake, unlike Slocan City, where you can step off the steamer to a waiting train and continue your journey. You can take either a north or south train at this terminus; consequently Rosebery is the best transient town in the race. Nervertheless we claim Slocan City second in importance, and would say watch the head and foot of Slocan Lake, viz.—

ROSEBERY AND SLOCAN CITY.

Its Advantages as a Manufacturing Center.

As a manufacturing center Rosebery claims to have demonstrated the fact that after the careful observation of the Denver (Colorado) Ore Coy's manager, as the natural advantages of all points in Kootenay for the treatment of ores the cheapest, Rosebery was selected, and they now are erecting works, with a capacity of 250 tons per day, which will be in operation within 90 days; and it is their intention to pay out monthly in the vicinity of $100,000. I might also add Rosebery has the largest water power from Wilson river flowing into Slocan Lake.

AS TO CLIMATE.

Rosebery claims the mildest climate on Slocan Lake, from its admirable southern exposure and absolute shelter from the north; snow always leaves the place about the 15th of March.

AS A TOWNSITE.

As a townsite, Rosebery is without a peer. It is possessed of all the flat land available at the mouth of the Wilson river leading to the valley—mining region—consequently there is no danger of any contagion. The title is a Crown Grant and is perfect. All purchasers of lots are safe in this respect. The only safe speculative townsite in the Slocan is Rosebery.

Why should I say the only safe speculative townsite in the Slocan? Because Rosebery business lots to-day are only $150 to $200 each and are bound to increase rapidly this summer. These figures can, and will, double before long. The time to buy is now. Don't wait till they are from $700 to $1,000, as you did in Slocan City last May, go in on the ground floor and make a few dollars in speculation; if you want to invest go to Vancouver or Winnipeg; if you want to speculate and and clean up money go quick to Rosebery before lots are out of sight.

What's Wanted in Rosebery.

We want a restaurant.
We want a good hotel right away.
We want a first-class general store.
We want a butcher shop.

Anyone looking for an opening spy out this place at once.

Maps and price-lists on application; prices run from $75 to $200.

TERMS: One-third cash, balance 3 and 6 months. For actual builders special terms can be arranged for a few lots by applying to

A. M. BEATTIE, General Agent, Rosebery.

MOUNTAIN ECHOES.

J. G. McGuigan has returned from Spokane.

Rev. R. N. Powell, New Denver, paid Sandon a visit on Monday.

Mayor McAnn and other Kasloites were seen in the city this week.

Miss Skinner left on Wednesday to spend her vacation in Spokane and Nelson.

Mr. A. S. Sanford went down on Monday to work on the Harris ranch, near Silverton.

Mr. and Mrs. E. J. Field have removed to Kaslo where they intend to reside permanently.

BURDOCK BLOOD BITTERS cures all forms of skin eruptions from a common pimple to the worst scrofulous sore.

C. H. Gibbons, city editor of the Victoria Colonist, travelled thougoutout Kootenay, taking down Mr. Turner's speeches.

Mr. R. L. Patterson, representing his type foundry at Toronto, travelling through Kootenay, stopped off Friday in the city.

H. Giegerich, of Kaslo and Sandon, will establish a branch at Ymir. Mr. Adams, late of Three Forks will be in charge.

Rev. J. A. Cleland preached the dedicatory sermons at the opening of the new Presbyterian church at Nakusp on Sunday last.

Mr. R. J. Midland, late foreman of the Whitewater Deep, has decided to go to Eastern Idaho, where he will develop some mining properties.

Archdeacon Pentreath is expected here on Tuesday, and will hold Church of England service in Spencer's hall, at 8 p. m.

F. R. Stewart and Thos. Parkinson, agent, of the firm of Stewart & Co., of Vancouver, were in Sandon this week on a business trip through the country.

Judge Lilly, who acted as chairman at the political meeting Tuesday evening, quite rose above the occasion and delivered a grand oration on good behavior.

A miner named Sherdan, working in the Idaho mine, had his face badly torn last Saturday, and under the care of Dr. Powers was sent to New Denver hospital.

The body of the man found last week in the water at Queen's Bay was so far decomposed as to render identification impossible. It was buried on the shore of the bay.

Karl's Clover Root Tea, for constipation it's the best, and if after using it you don't say so, return the package and get your money. Sold at McQueen's Drug Store.

The Roman Catholics of the city had a service in the school house on Sunday evening last. Those interested talk of fitting up a building wherein to hold services.

Catarrh cured. A clear head and for $3 and guarantee an absolute cure. Sold at McQueen's Drug Store.

The manager of the Hotel Reco complains of being troubled with dogs around the hotel. The owners of wandering canines should look after them or keep them chained.

Shiloh's Consumption Cure cures where others fail. It is the leading Cough Cure, and no home should be without it. Pleasant to take and goes right to the spot. Sold at McQueen's Drug Store.

For Constipation take Karl's Clover Root Tea, the great Blood Purifier. Cures Headache, Nervousness, Eruptions on the skin, and makes the head clear as a bell. Sold at McQueen's Drug Store.

From a peculiar figure seen on our streets the last few days one might be excused for thinking that the celebrated writer, Sir Walter Scott, was a little previous when he wrote, "The Lays of the Last Minstrel."

The ballot for the coming election is a decided improvement on those used heretofore. The abolition of the numbering of the ballot insuring complete secrecy, the true object of the constitutional ballot is attained.

Rev. — Sharp, Presbyterian minister of New Denver, preached in the Virginia hall Sunday, in the absence of the Rev. Cleland. He also reviewed part of the lessons at the Review service at the Union Sunday school.

The K. of P. will hold a special memorial service, with installation of officers, in Spencer's opera hall on July the 6th. The entertainment will not be public, but invited friends and visiting brethren will be welcomed by the Knights. Those receiving invitations are asked to present their cards at the door.

Communication.

To the Editor of The Mining Review:

Dear Sir,—I notice by the "Complete, Voters' List" that the government with its Helps and Supporters have been "doing something" anyhow for their "gaol birds" and others who have left the constituency for the constituency's good, along with a number of the "Reliable ones" and "fit to be trusted" appear on that list all right on several lines with but little and very slight variations. Of course these same government Helps, &c., will "see to it" that the above voters from the cemeteries, gaols, distant parts of the province, foreign lands, as well as those near by the reliable and trusted, &c. are all duly recorded on polling day. They know how tomanage such things as elections of all kinds, like Sandon's first municipal election for instance.

I notice also, one of the chief reasons given by Mr. Retallack and his supporters why this part of the province has been so badly treated and shamefully neglected by the present government is because we returned an opposition member.

Is any thing more required to prove to honest voters that a government who is guilty of such dishonorable conduct are entirely unfit for the positions they occupy.

Let us see to it that they give place to honest men.

Youry truly,
Greenman.

To the Editor of The Mining Review:

Dear Sir:—Our city council have passed a number of by-laws, among them one under License Act for every dealer to pay $5.00 to sell goods by retail. They have also appointed officers at large salaries to look after the city's business.

Now sir, I along with citizens—merchants, who have paid our license—would like to know how it is these by-laws are not fairly and properly carried out and not make fish of one and flesh of another. Parties are bringing car loads of stuff and pay nothing—others are carrying on their business and pay no license. How is this? are our city officials over worked? I know not. What is the matter?

Yours truly,
Fair Play.

Sandon, June 25th, 1898.

A Sad Ending to a Visit.

A feeling of gloom cast over the city when it was learned Miss Hunter, sister of Ald. Hunter, was dead at the Goodenough, where she lay afflicted with a brain fever. Although only a visitor here and a comparative stranger to Sandon people her sad case was the subject of many regretful remarks, as her brothers C. H., of this city, and James, of Rossland, are well known to the majority of the people of the town and country. The rather sudden demise is doubly sad as the deceased only came a little over a month ago to this country from Toronto to visit her brothers and a sister in Northport had only been here a week when she was taken sick. Although every care was given her she gradually grew worse and a bad turn the evening previous brought her to the brink where but a step divides this mortal life from the life eternal.

The funeral on Tursday in the Presbyterian church (Virginia hall) was largely attended by the friends of the Messrs. Hunter, as an expression of sympathy. The services were conducted by Rev. J. A. Cleland, who very feelingly touched upon the incidents of the mournful death of a young person so short a time in our midst, and in a few impressive words endeavored to convey comfort to the bereaved brothers and friends. The pall-bearers were Mayor Atherton, Ald. Mighton, Messrs. C. J. Smith, Geo. McDonald, E. M. Sandilands and J. Vallance, and with the solemn strains of the Dead March, played by Mr. Fallows, the funeral procession was led to the K. & S. depot, where the body was shipped to Ingersoll, Ont., for interment. Mr. James Hunter came up Wednesday evenin g from Rossland, accompanied by Mr. Slawson, of Northport, brother-in-law of deceased, to attend the funeral. The three went to Northport with the body, and from there James and Mrs. Slawson will accompany the remains to their last resting place.

Resolution of Condolence.

To the officers and members of Sandon Lodge, No. 24, K. of P.

We, your committee appointed to draft resolutions of condolence on the death of brother Wright, beg leave to submit the following:

Whereas, In the Decree of Divine Providence it has pleased the Supreme Chancellor Commander of the Universe to remove from our midst to the Great Lodge room above, our beloved brother, James Wright, therefore be it

—Resolved, that in the death of brother Wright, Sandon Lodge, No. 24, K. of P., loses an upright and conscientious member, the community an honest and respected citizen, and his widowed mother a loving and dutiful son; be it further

—Resolved, that we the members of this lodge extend our heart-felt sympathy to the bereaved mother and relatives of our deceased brother:

—Resolved, that we tender to the members of our sister lodge at Nel son our grateful thanks for committing the earthly remains of our deceased brother to his last resting place, and thus exem plifying true brotherly love and Pythian friendship:

—Resolved, that as a mark of further respect for our deceased brother, the charter of Sandon Lodge, No. 24, be draped in mourning for the space of thirty days, and that these resolutions be spread on the minutes of this lodge, and that a copy be sent to the Nelson Lodge, and that they be published in one of the local papers.

E. EMERSON,
L. J. DOOLAN,
GEO. F. MATTICK,
Committee.

A YOUNG GIRL'S ESCAPE.
Saved from being a Nervous Wreck BY MILBURN'S HEART AND NERVE PILLS.

For the benefit of Canadian mothers, who have daughters who are weak, pale, run down or nervous, Mrs. Belanger, 126 Rideau Street, Ottawa, Ontario, made the following statement, so that no one need suffer through ignorance of the right remedy to use: "My daughter suffered very much from heart troubles at times. Often she was so bad that she could not speak, but had to sit and gasp for breath. She was so extremely nervous that her limbs would fairly shake and tremble. Frequently she would have to leave school; and finally she grew so weak that we were much alarmed about her health. I gave her many remedies, but they did not seem to do her any good.

Then I heard of Milburn's Heart and Nerve Pills, and got a box of them, and they have indeed worked wonders with her. I can recommend them very highly as the best remedy I ever heard of for complaints similar to those from which my daughter suffered."

Milburn's Heart and Nerve Pills never fail to do good. They cure palpitation, faintness, dizziness, smothering sensation, weakness, nervousness, sleeplessness, anaemia, female troubles and general debility. Sold by all druggists at 50c. a box or three boxes for $1.25. T. Milburn & Co., Toronto, Ontario.

LIVER PILLS act on the system in an easy and natural manner, removing all poisons and impurities. They cure Constipation, Sick Headache, Biliousness, Dyspepsia, Sour Stomach, Jaundice and Liver Complaint. Price 25c.

CANADA.
PROVINCE OF BRITISH COLUMBIA.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, QUEEN, Defender of the Faith, &c., &c., &c.
