New Westminster
21st March 1866.

Sir

I herewith enclose a tracing of Burrard Inlet and False Creek, showing a piece of land marked in red opposite the narrow part of the Creek, it is very necessary to the interest of the Saw Mill Company that they should be allowed by the Government to add this land to that already under lease and that Mr. Brew should be instructed not to permit this piece of land to be pre-empted or otherwise occupied as I am informed there is an immediate intention of doing so.

I also take leave to request that the Saw Mill Company may be authorized by the Govt. to dam the Stream running from the Lake shown on the tracing at about the point marked "dam"; and to take water therefrom for the Boilers and other necessary purposes, following near the Course marked in black

Joseph Trutch Esq.
Chief Commissioner of Lands & Works
&c &c &c

in black dotted lines to the Saw Mill; the size of the flume intended to be used is 6 inches by 9 inches in the clear, less than stipulated for in the deed of agreement with the Government.

I am, Sir

Your Most obdt. Servant
