Legislative Assembly MAY 4 1906 VICTORIA, B. C.

JUDGE IMPOSES LIGHT SENTENCES ON LAW BREAKERS

Ah Lee Will Serve Four Years for Sodomy, Simon Pierre Fifteen Months for Wounding and A. H. Chrysler Nine Months for Assault--Jury Makes Presentment And Is Complimented By Judge Irving.

"Guilty, with a strong recommendation to mercy," was the verdict brought down by the jury at the spring assizes, in the case against Chrysler of Burnaby, who stood accused of assaulting E. J. Bramwell, with intent to do grievous bodily harm. His Lordship Judge Irving, after hearing pleas for mercy advanced by friends of the prisoner sentenced Chrysler to three months imprisonment with hard labor. In passing sentence, his lordship said:

"Your trouble, Chrysler, seems to be that when you get angry, you get too savage. You have got to learn to keep a grip on yourself and keep control of your temper. You went for that man unmercifully, and beyond all reason. If he had died you would have had to face a charge of murder. In view of the testimony of your friends, I am going to send you down for three months, with hard labor, and you must not allow your temper to get away with you or you will surely come to grief."

Gabriel Pierre Guilty.

The Gabriel Pierre case, in which the prisoner was charged with wounding with intent, Edmond Victor and Dan Murphy, was handed over to the jury and they eventually brought in a verdict of "Guilty of wounding with intent to do grievous bodily harm." Before his lordship passed sentence Pierre's counsel, Joseph Martin, K. C., said that the police department had given him permission to state that Pierre had assisted the police very materially in securing a conviction against Lemon, of Agassiz of selling liquor to Indians.

His lordship in passing sentence said that that fact would lead him to make the sentence as light as possible, but considered that he could not give him less than fifteen months. Addressing the prisoner his lordship said: "If you want to keep out of jail you must leave liquor alone, for it will down you every time. Another thing, you must not use knives. If either of those men had died you would have been here to answer to a charge of murder instead of wounding. I am going to send you to jail for fifteen months."

Four Years for Ah See.

Ah Lee, who was accused of Sodomy, was found guilty by the jury after about ten minutes absence from the court room. His lordship sentenced him to four years imprisonment. He stated that he was making the punishment somewhat severe as a warning to others of his countrymen who were inclined to practice the same crime.

Grand Jury Presentment.

The grand jury, through their foreman, Marshall Sinclair, made the following presentment, to which the judge briefly replied, thanking the jury for their promptness in attending to their duties. He would see that the recommendation they had made was laid before the proper authorities:

To the Honorable, Mr. Justice Irving:

We, the grand jury, beg to make the following presentments:

We have visited the various public institutions of the city, and beg leave to report as follows:

The first call we made was at the provincial gaol. We found everything in a very satisfactory condition. The cells were all clean, neat and showed singns of very careful attention. A new heating appliance has been installed by the Vanstone Company, which gives entire satisfaction. New mattresses and springs have replaced the old bunks and the improvement is very marked indeed, especially from a sanitary point.

The next place visited was the Public Hospital for the Insane. We were met by Dr. Doherty and Chief Attendant Matthewson who very courteously conducted us through the institution and we are pleased to report that we found everything in perfect order. Every department seemed to be running smoothly and with perfect system. The rooms were neat, clean and thoroughly ventilated and we observed various improvements throughout the building. The new addition or hospital ward, just completed, will be occupied at once. It is well constructed and seemed to be what was required for such an institution. A new fire alarm system has been installed and works perfectly. The old carpenter shop has been transformed into a hall, where concerts, meetings and Sunday services are held.

The last place visited was the Royal Columbian Hospital and it is needless to say that we found everything in good working order under the efficient management of Miss Martin and staff. The building throughout was scrupulously clean and the patients well looked after. The hospital seemed to be inadequate for the demands and no doubt the time has arrived when New Westminster should have a larger and more modern building and one that would meet all requirements.

We would respectfully call the attention of the government to the wretched condition of the Douglas Street Cemetery, part of which has never been cleaned and we have been informed that frequently bodies from the asylum and gaol are buried in graves from which deceased Chinamen have been removed.

On behalf of the grand jury.

M. SINCLAIR,
Foreman.

Civil Suit.

A civil suit in which the New Westminster & Southern Railway company was sued by a rancher named Coen, for the destroying of a mare and colt on the railway track by one of the company's locomotives, was concluded and his lordship reserved decision.

RUSSIA PLAYS DEEP GAME

St. Petersburg May 2.---Further intimation that Russia is playing a deep game in the Far East is given in a circular sent by the censorship to all newspapers and periodicals forbidding the publication of any news with regard to the demobilization of the army and movements of troops in Manchuria, and the reorganization of the military establishment in Siberia and the Far East.

It is generally supposed the circular was incited by the publication of the news of a halt in withdrawing the Russian army from Manchuria and the dispatch of the Novitski expedition to Mongolia which though supposed to be federal staff secrets were published even in official papers, and are liable to seriously embarass Minister Pokotaloff's negotiations in Pekin.

RESUME WORK IN PARIS

Paris, May 3.—The city has resumed its usual appearance. The military and police patrols have been withdrawn and most of the labor organizations have resumed work.

King Edward has arrived here on a three day's visit.

1905 MAY DAY ACCOUNTS.

At the meeting of the May Day celebration committee last evening it was reported that one or two accounts in connection with the 1905 celebration remained unpaid. The secretary was instructed to call for all outstanding accounts in order that they might be paid immediately. These accounts will be received, up to 4 o'clock on the afternoon of Friday, May 4.

Masons to Build a Monument.

New York, May 2.—Between two double rows of masons in their regalia, stretching the length of Madison Square Garden and before a great congregation some of the most distinguished in Masonic circles in the United States and Canada passed last night to the large platform put up at the eastern end of the ampitheatre to open the benefit concert for the fund to build a monument in this city to Daniel D. Tomkins once Governor of New York, vice-President of the United States and Grand Master of the Grand Lodge of New York.

Grand Master James H. Burritt, K. C., of Canada, received a rousing welcome as did the past grand master of Canada, Benjamin Allen.

Scotch Company's Loss.

Aberdeen, Scotland, May 2.—At the annual meeting of the Northern Assurance company today, the chairman, Sir David Stewart, announced that the company's total risk in the destroyed portion of San Francisco would amount to a little over $2,500,000.

The Aetna's Loss.

Hartford, Conn., May 2.—A statement has been issued by the Aetna Fire Insurance Company of this city on its liabilities resulting from the San Francisco fire. The nett loss is estimated $2,500,000. The total amount of insurance carried by the burned city was $4,000,000.

McPherson Recovers.

After being detained at the police station for thirty-six hours, John McPherson, the Scotchman who asked the chief to lock him up on Monday evening, was allowed his liberty this morning after breakfast. McPherson was positive that he was insane, but Dr. De Wolf Smith who examined the man on Tuesday, declared that there was nothing the matter with him except the after effects of a heavy drunk. By the time he got properly sobered up, McPherson declared that the machinery that had been working overtime in his legs had now stopped buzzing and humming, and as he appeared quite rational he was sent off. He immediately went out to look for work on a sewer construction gang on which, he says, he had been promised a job as bricklayer's helper.

Finds Ancient Irons.

A pair of old English hand-cuffs, of the type still in use on warships were found yesterday on Harry Freeman's property by C. Macdonald. These ancient relics were brought to the police station by the finder, but as they have been buried in the ground for many years, and are covered with rust, it is not likely that they will be used until the present supply gives out. One cuff is broken and the other is locked and there is no key at the station to fit it. In the meantime they have been added to the collection of curios in Chief McIntosh's office.

Trouble at Hamburg.

Hamburg, May 2.—The lock-out participators in the May Day demonstrations here threaten to inaugurate a general strike. At a meeting of the merchants' ship brokers and representatives of coal firms today it was decided not to modify the action which they took yesterday when it was voted to discharge until May 11 all longshoremen who did not appear for work yesterday.

TORNADO WRECKS TEXAS PROPERTY AND KILLS PEOPLE

Fierce Cyclone Sweeps Through Farming Districts and Leaves Dead and Injured in Its Wake--Buildings and Crops Are Destroyed.

Dallas, Texas, May 2.—A tornado swept over parts of Brown, Wise, Denton and Grayson counties late yesterday afternoon doing great damage to crops and farm property. Two persons are known to have been killed. At the village of Cown, Wise county, one house was destroyed and Mrs. Parks was killed. Two other people were so badly injured that they may die.

At Stoney, in Denton county, the house of Joseph Foster was blown down and the ruins took fire. Mrs. Foster and the children crawled out of the ruins safely but Mr. Foster was pinned down and before rescuers could get him out he was so badly burned that he died last night.

At Sherman a Methodist church was blown down, and at Brownwood several houses were partly wrecked.

Received 2,000 Volts and Lives.

Winnipeg, May 1.—A lineman named Hesser, employed by the Street Railway company, while working 40 feet from the ground today, received a shock of 2,000 volts, and dropped unconscious to the ground, where he was caught by fellow-workmen. He thus escaped injuries from the fall, and shortly afterwards recovered from the shock and is now little the worse for his remarkable experience.

Irr parably Ruined.

San Jose, Calif., May 2.—Architect Hudson of Los Angeles, Cal., who has inspected the asylum buildings at Agnew, declares that all the buildings have been irreparably ruined, in his report to the governor. Mr. Hudson will recommend the speedy erection of cottages to accommodate the patients until modern structures in which neither fire nor earthquake are possible, can be occupied by the patients.

Newmarket Surprise.

London, May 2.—At Newmarket today the 2,000 guinea stake for entries of colts and fillies, foaled in 1903, distance one mile, was won by Georges.

Dame Agnate (a colt by Diamond Jubilee) was second and Ramrod third. Twelve horses started.

Georges won a splendid race by a neck. A head separated second and third horses. Bepso, ridden by "Danny" Maher, led most of the way but finished fourth. The favorite Gingal was never dangerous. The betting on Georges was 20 to 1 and on Damo Agneto and Ramrod 100 to 7.

Witte's Resignation.

St. Petersburg, May 2.—The resignation of Count Witte as Premier has been accepted. He will be succeeded by M. Goremyky, former Minister of the interior. The official announcement of the change in the cabinet will be made tomorrow.

Earthquake Improves the Mokelum River

Stockton, Cal., May 2.—It has been discovered that in the vicinity of Windbridge, the Mokelume river has fallen 12 feet, the bed of the river having dropped from the effects of the recent earthquake shock. As the waterway has overflowed frequently farmers along the stream are highly pleased with the change since it can carry far more water than heretofore and not endanger their lands. Another incident of the earthquake is the drying of the Tracy Lake in the northwestern part of San Joaquin county.

ELECTRIC CAR GRADES ARE TO BE REDUCED

Road Between Collingwood and Earl's Road to Be Made Two Per Cent Grade.

The B. C. Electric Railway company is busily engaged in road improvements at the present, and is doing considerable work along the interurban line to Vancouver, chief among which will be the reduction of the grade extending from Collingwood to Earle's road, to a two per cent. grade. This grade was at one time the stiffest one on the line, outside of New Westminster city, and when the grade is lowered the change will be quite noticeable.

In making the cuts at this point the roadbed will be widened to some extent in order to permit the laying of double tracks when the company starts operations on a double track system over the entire line. This looks as if the double tracking of the entire line is an assured fact, although as yet no statement has been made as to when operations will be commenced. At present the object is to widen out any and all grades, in order that they may be prepared for double tracking when the time comes.

Much interest is taken over the probable outcome of the visit of General Manager Sperling, and his engineers to the scene of the proposed Port Moody road yesterday, and it is felt that the road will soon be in operation, as it is the general opinion of certain parties on the inside that work on the construction of the road will start at an early date.

ATHENS BRINGS NEWS OF KILMENY DISASTER

Crew of "Hoodooed" Vessel Get Ashore and Watch Its Finish on the Rocks.

The halibut schooner Athens came in this morning with a load of halibut for the B. C. Packers'. The captain reports that halibut were fairly plentiful. They carried with them a cargo of from ten to fifteen tons of halibut which they have unloaded today.

The crew of the Athens brought in the news that the halibut schooner, the Kilmeny, which was running into this port all last summer with halibut for the B. C. Packers', had gone to pieces in St. Joseph's Bay off Quatsino sound. There was a very heavy gale blowing and the captain of the Kilmeny put out a couple of anchors. It continued to drift, however, in spite of the anchors and eventually went all to pieces on the rocks. The crew managed to get ashore all right and stood on the beach and watched the swell life the little schooner up and down and pound it to kindling wood on the rocks. The schooner had been engaged in the halibut business on the coast for several years, and had met with such poor luck that it had become a common saying among halibut fishermen that the Kilmeny was hoodoed.

Jay Gould Wins.

London, May 2.—Jay Gould of Lakewood, N. J., in the amateur court tennis championship contests at the Queen's Club today defeated V. W. York by 3 to 0.

Many Men Are Idle and Shipping Trade is Badly Demoralized

Baffalo, N. Y., May 2.—The strike of the longshoremen put an effective embargo on Lake Erie commerce yesterday and today and it is expected that traffic will stop at all upper lake points. All unions affiliated with the longshoremen either quit or made preparations to quit work. There are about 25,000 men idle and that number will be vastly increased when industries dependent on lake commerce for supplies are compelled to cease operations. The strike being primarily in aid of the lake pilots, the returns of the first day were expected to show the number of pilots affiliated with the longshoremen but that important point is still clouded.

Vessel owners claim that not 10 per cent. are in the labor union and the longshoremen claim 80 per cent. are.

Milwaukee, Wis., May 2.—A decision was reached by practically all the moulders in the city last night to strike today. Nineteen shops and 1,200 men are affected. The moulders ask a uniform rate of $3.25 a day.

Detroit, May 2.—Dispatches from Lake Michigan and Lakie Erie ports indicate that there has been an almost unanimous response among the local unions to the strike order. It is impossible, however, to get from the silent officials of the union here even an estimate of the number of men out, but an unofficial estimate set the figure at 20,000.

Building Strike in Chicago.

Chicago, Ills., May 2.—Just as the wreckers started the demolition of old structures yesterday, to make room for $6,000,000 of new buildings in the Loop district, a strike was called which promises to tie up the building industry of Chicago. One thousand structural iron workers will drop work today and their idleness will precipitate the first labor disturbance in the building trade since the 1900 lockout. The strike promises to stop nearly all construction work of a large character. It was decided on at a vote last night. Arbitration offers made at the last moment failed to avert it. The iron workers insist on a wage of $5 a day for eight hours work. The contractor's offer of $4.60 for four months and $4.80 for the rest of the coming year was rejected. The strike will throw out of employment several thousand other building workmen.

Clear Away Wreckage and Resume Business

San Francisco, Cal., May 2.—Conditions of life are gradually becoming more normal in this city and the work of clearing up the wreck in preparation for rebuilding in the down town section of the city is going on more rapidly. Business is being resumed by retail traders of every description throughout the destroyed section of the city. The commission firms located along the water front are doing a thriving business.

Mayor Schmitz has announced all time restrictions as to the lighting of dwellings will be removed today, with the suggestion that candles be used until electric lights can be resumed.

Petroleum for lighting purposes is especially prohibited until the water supply is fully restored.

The United Railroads has already operated seven lines of street cars and today will cover nearly all sections of the unburned district. The work of inspecting chimneys is proceeding rapidly. The inspectors are all architects or builders, and are giving their services free. Every chimney in the city will be thoroughly inspected before any permits are issued to make fires indoors. Many of the largest factories left unharmed are starting up work with all the rapidity possible under the circumstances. At the Union Iron Works 2,300 men are now employed and the management expects within a fortnight to have the full complement of 4,000 at work. No damage was done to the three new warships being built at those works for the government, the cruisers California and Milwaukee and the battleship South Dakota.

The City of Puebla which was sunk in the bay has been raised and is being repaired. Workmen are also engaged in fixing the steamer Columbia which was turned on her side. The hulls of the new Hawaiian-American Steamship company's liners were pitched about four feet to the south but were uninjured and only need to be replaced in position.

FIND RIVER CHANNEL IN GOOD CONDITION

Party of Gentlemen Representing the Pilotage Board, City Council and Board of Trade Take Trip on Sampson—Discuss Improvements for Fraser River Navigators.

The Sampson yesterday conveyed a large party of gentlemen down the river to make an inspection of the channel, between this port and the Lightship at the mouth of the river. The resident engineer of the department of public works, G. A. Keefer, was in charge of the party.

Soundings were taken at Annieville bar, Cottonwood Point, Steveston, and at the Sandheads, to verify the latest survey of the department. The channel was found to be in a very satisfactory condition at all points, the soundings giving a somewhat greater depth at the entrance to the channel than was expected.

Plans of work were discussed with the engineer with a view to the improvement and permanent maintenance of the channel. The day was all that could be desired, and the trip was thoroughly enjoyed by all present, a hearty vote of thanks being tendered to the resident engineer, Mr. Turner and the captain and officers of the boat.

Those on board were: George Turner, engineer of the department, Messrs. W. A. Gilley and J. C. Armstrong of the pilotage board, Pilot J. W. Rogers, President D. S. Curtis and Secretary A. E. White, representing the board of trade, Ald. Henley, representing the city council, Mr. Lester W. David of the Fraser River Sawmills, Mr. E. H. Bucklin of the Small & Bucklin Lumber Co., Mr. R. J. Rickman of the Royal City Mills, Mr. L. A. Lewis of the Brunette Sawmill Co., Mr. H. R. Davidson, manager of the Bank of Commerce, Mr. G. D. Brymner, manager of the Bank of Montreal, Messrs. T. S. Annandale, J. Reichenbach, Jas. Cunningham and Capt. Wm. Rogers.

Prices Are Smashed on the Stock Market

New York, May 2.—Prices were smashed at the beginning of the stock market today. The rush to dispose of securities seemed to indicate that liquidations of an important character were under way and speculative holders of stocks generally became alarmed and made a precipitate rush to get out of the market.

Forced selling was caused by calls for additional margins over night from brokers to which responses this morning were lacking or were unsatisfactory. Congested selling orders resulted in some wide variations in parts on simultaneous sales on the opening and orders to sell at the market price in other stocks found no bids but at concessions of many points.

SERMON TO CONVICTS

By Rev. F. Lardou, O. M. I., D. D., At the Penitentiary Sunday, April 29. . . . .

First Peter 11th chapter, 21st verse. "Christ also suffered for us leaving you an example that you should follow his steps."

When a man, conspicuous for his civic virtues, as well as for the integrity of his private life, addresses the public in behalf of some important measure, his words are listened to with respect and attention. But let a man without character, though equally eloquent, advocate the same cause, he is listened to with doubt, perhaps with impatience because his public utterances are measured by his private life. The clearness and force of this line of reasoning is nowhere so manifest as in the life of our Saviour. We admire, indeed, the beauty of His maxims, but we admire still more the splendor of His spotless life, of His virtues.

Jesus never inculcates a moral duty which He does not practice. He taught by example before He taught by precept. "Jesus," says the holy Scripture, "began to do and to teach." The sermons of Christ inspire us with esteem for virtue, but His own conduct stimulates us to the practice of it.

If our Lord had restricted His mission to the preaching of the word, like the Scribes and Pharisees, without illustrating His doctrine by the splendor of His example He would never have caused that mighty moral resolution which has changed so much of the dark pagan world to the glorious Christianity, nor would He be adored today by the many millions of faithful followers all over the world who call Him, "Lord and Master."

When Christ was asked by the disciples of John the Baptist whether He was the true Messiah, He laid more stress on His deeds than on His words in proof of His being the promised Redeemer. "Go," He said, "and relate to John what you have heard and seen; the blind see, the lame walk, etc.," thus relying on His wonderful works to prove His divine mission.

When we hear our Lord say: "Blessed are the poor in spirit for theirs is the Kingdom of Heaven" we are impressed with the promise and the condition on which it rests. The qualifying words "in spirit" do not exclude the idea of poverty in any condition and when we see Him in his infancy lying in a manger, when we see Him later experiencing the privations of poverty, and when we hear Him in mature life express His condition by this comparison: "The foxes have holes, the birds of the air have nests, but the Son of Man has not whereon to lay His head," we see the wonderful force of the example He has set for us, we accept our humble lot more cheerfully, and while struggling in the battle of life with all our energy, we have the consoling assurance that, should our steps continue in the paths of poverty, we are walking in His footprints.

When we hear Jesus say: "Blessed are the merciful," we admire mercy as a great virtue. But when we see Him practice that virtue, that mercy, in his compassion for the hungry multitude, for the pentinent Magdalen, and when we see Him add humility to mercy by washing the feet of His apostles we are profoundly moved in our admiration. If we are men of judgment we shall take Him as our model, and show compassion for the unfortunate, the afflicted, the distressed. We shall be merciful to the erring, charitable to the poor and ever ready to lend a helping hand to our fellow man when struggling hard in the trials of life. But it is at the cross that we behold the wonderful evidence of His merciful nature. There He is nailed to the cross, suffering all the physical anguish that slow torture can produce, and yet through all this agony, above all this torture, His love of man soars as the strongest sentiment in His soul, and that love finds expression in prayer for His murderers: "Father forgive them for they know not what they do."

We study the records of pagan antiquity, but we find nothing to compare with this harmony of example and precept as exemplified in the life of Christ. Sages of old have left us many sublime maxims, sublime moral lessons, but while they taught virtue we very often find they neglected to practice it, and when the hour of trial came they hesitated to sacrifice their life for their principles. How such examples pale in the presence of a crucified Christ, who, though fully conscious of the terrible tortures awaiting Him, confronts death with calmness and dignity, thus illustrating to the last moment that He practiced what He preached.

If then we wish to be perfect we must study and imitate the life of Christ as it is told in the gospel. Let us make ourselves familiar not only with His words but with His deeds. If we do so we shall find Him to be our light in darkness, our companion in solitude and our life in death. Through His abundant grace we may persevere to the end, living good lives as Christian and as citizens, and, full of hope, in awaiting expectation of the better life to come.

Mr. Carnegie Talks Again.

Montreal, May 1.—Mr. Andrew Carnegie paid a visit to Montreal today, arriving this morning from Ottawa. Immediately after his arrival he took a drive on the Mountain in company with some of the authorities of McGill university, and then attended luncheon at the Canadian club. Here he spoke for a few moments, urging unity of the races, but saying nothing new on the subject. He was in a humorous frame of mind, and this continued when he attended the special convocation of McGill, at which the honorary degree of LL. D., was bestowed upon him.

At this gathering he had the pleasure of meeting Sir William MacDonald, who is vice-chancellor of the university, and who occupies the same position in Canada that Mr. Carnegie does in the United States, having given more of his money for public interests than any other man, his donations to McGill alone exceeding three millions. In his speech, Mr. Carnegie referred to Mr. Macdonald, saying that although he had only known him for ten minutes he already felt well acquainted with him and that they were good friends. "Ar'nt we, Mac"? he asked turning to Sir William, amidst the laughter of his hearers.

This evening Mr. Carnegie was the guest of officials of McGill at the St. James club.

The Divine Sarah at Winnipeg.

Winnipeg, May 1.—The audience which Madame Bernhardt attracted tonight was a record one for Western Canada, and a fitting tribute to the great actress' art. The advance sale was slightly in excess of $6,000, and even the divine Sarah never faced an audience before, which represented such a vast section of country. People were present from Calgary, 900 miles west, from Fort William, 400 miles east, and from Prince Albert, 600 miles to the north-west. Her performance justified the greeting extended.

Miss Pyne, accompanied by her neice, Miss Beatrice Annandale, of this city left yesterday for England where Miss Annandale will enter a young ladies' college. It is expected that Miss Annandale will be absent from the city for some time.

A Joke That Failed Twice.

Miss Adelbert had just returned from a vacation spent at a tiny village on the Maine coast. In recounting her experiences she talked somewhat for the benefit of a cousin, a quiet person, who was visiting her city relatives for the first time in many years.

"There was just one store in the place," said Miss Adelbert, "and they kept everything—that is, everything they had to keep. One day I went in to buy some soap, and just on a venture I asked the clerk if they had Browning. He stared at me a second, then went off and looked under the counters and on the shelves. Presently he came back and said: 'No, miss, we ain't got none. We got blacking, an' we got bluing, an' we got whiting, but we ain't got a bit o' browning in the store.'"

Miss Adelbert had to make several protests to assure her audience that this really happened. Finally the cousin asked gravely, "But, Cousin Bert, why didn't you say varnish in the first place?"—Youth's Companion.

The First Fiction.

The "Tale of Two Brothers," written 4,200 years ago by the Theban scribe, Ennana, librarian of the palace to King Merenptah, the supposed Pharaoh of the Exodus, is the oldest work of fiction extant. The tale was written apparently for the entertainment of the crown prince, who subsequently reigned as Seti II. His name appears in two places on the manuscript—probably the only surviving autograph signatures of an Egyptian king. This piece of antique fiction, written on nineteen sheets of papyrus in a bold hieratic hand, was purchased in Italy by Mme. d'Orbiney, who sold it in 1857 to the authorities of the British museum, where it is now known as the D'Orbiney papyrus. Other specimens of ancient Egyptian fiction have since come to light which appear to prove that the Nile valley was not only the birthplace of the arts and sciences, but was also the cradle of romance.

A Jofner.

"It seems to me," said Mrs. Oldcastle, "that in these days there is no hope for the man who lacks initiative."

"I know it," replied her hostess, "That must be one reason why Josiah has such wonderful success. He gets initiated in something new nearly every week."—Chicago Record-Herald.

He Ate Often.

Doctor—You must take a quarter of an hour's walk before every meal. Stout Patient—But, doctor, you surely don't want me to walk all day long!—Fliegende Blatter.

Conscientious.

Young Wife—What's the trouble? Why do you sit on the edge of the chair? Husband—Well, dear, you know we are buying it on the installment plan and that's all I feel entitled to.—Life.

Too Late.

She—I hear you have just got married. Is it too late to congratulate you? He—Oh, much too late. I was married three weeks ago.—Illustrated Bits.

Tenders for a Licence to Cut Timber on Domonion Lands in the Province of British Columbia.

SEALED TENDERS addressed to the Timber and Mines Branch, Department of the Interior, and marked on the envelope "Tender for Timber Berth No. 471," will be received at this Department until noon on Wednesday, the 2nd day of May, 1906, for a licence to cut timber on Berth No. 471, situate in the Railway Belt in the Province of British Columbia, commencing at the southeast corner of Section 14, Township 5, Range 27, West of the 6th Meridian; thence North 44 chains; thence West 80 chains; thence South 20 chains; thence West 20 chains; thence South 24 chains more or less to the North boundary of Section 10; thence East along the North boundary of Sections 10 and 11, 100 chains more or less, to the point of commencement, containing an area of 400 acres more or less.

The regulations under which a licence will be issued, also printed forms of tender and envelope, may be obtained at this Department or at the office of the Crown Timber Agent at New Westminster, B. C.

Each tender must be accompanied by an accepted cheque on a chartered bank in favor of the Deputy of the Minister of the Interior, for the amount of the bonus which the applicant is prepared to pay for a licence.

No tender by telegraph will be entertained.

PERLEY G. KEYES,
Secretary
Department of the Interior,
Ottawa, March 20th, 1906.

WARNING GLANDERS.

In districts where the existence of glanders is suspected and especially in neighborhoods where actual outbreaks have occurred the adoption of the following precautions by owners of horses and others interested will do much to prevent the spread of the disease and the establishment of fresh centres of infection.

1. Horses or mules having a nasal discharge or other supicious symptoms should not be admitted to livery or feed stables or yards, blacksmith shops, church or school sheds, railway stock yards, private stables or other places where they are likely come into direct or indirect contact with animals of the equine species.

2. All stables, yards, or sheds used for the accommodation of horses or mules should be regularly and frequently cleansed and disinfected in the manner prescribed below.

3. After cleansing the premises thoroughly, and burning all debris, the interior should be well gone over with hot steam, or boiling water, adding to the latter at least one quart of crude carbolic acid to each five gallons after which the entire surface should be thickly coated with a hot solution of fresh lime wash, to which crude carbolic acid has been added in the above mentioned proportion.

Outbuildings, fences and tying posts with which infected animals have been in contact should also, when possible, be thoroughly treated in a similar manner.

All ordinary harness and stables utensils, which have been in contact with infected animals or infected premises, should be thoroughly soaked in a hot solution of crude carbolic acid of a strength of one part to twenty.

Materials which might be injured by the above treatment such as valuable harness, robes, cushions, etc., which have been in contact with infection should be placed in an air tight room and fumigated with Formaldehyde *after which they should be* thoroughly cleaned.

4. In stables where outbreaks have occurred or where diseased animals have, inadvertently or otherwise, been stabled, even temporarily, the cleansing and disinfection should be especially thorough and in such cases it is safest to remove and burn feed boxes and mangers when of wood; iron articles can be rendered harmless by passing them through fire or by immersing them for some time in boiling water. All litter from suspected animals should be burned or carefully fenced until used.

5. Farmers and others should, whenever possible, avoid admitting strange horses or mules to the premises occupied by their own animals especially of the same species. It is a good plan to reserve an isolated building for outside horses or mules but where this is impossible they may be accommodated in cow stables, cattle not being subject to glanders infection. Such horses and mules should be watered from special pails, which, together with all other stable utensils used on or about them, should be carefully cleansed and disinfected before being used for other animals. Stalls occupied by strange horses or mules should be well cleansed and disinfected and, if at all possible, left unoccupied for some time.

6. Where new horses or mules are purchased in or from districts where glanders exists, they should, unless carefully tested with Mallein prior to purchase, be stabled apart and closely watched for some time before being brought in contact with other animals of the equine species.

7. It must be borne in mind that while nasal discharge, or ulceration, enlarged glands, the presence of farcy buds, unaccountable swelling of the limbs and general unthriftiness often characterize cases of glanders, the disease exists in many animals without, for the time being, any external manifestations whatever, the only means of detection in such cases being the Mallein test, and that these occult or latent cases are in some respects the most dangerous because unsuspected. Our experience shows that it is possible for animals of this class to convey infection to others without themselves developing acute symptoms. It is therefore plain that great caution should be exercised in the purchase or handling of strange horses or mules especially in those districts where the disease has become established.

8. The carcases of animals dying from onslaughtered as being axected with glanders should, when possible, be burned or, failing this, buried at least six feet beneath the surface.

9. Owners of premises where outbreaks have been dealt with should bear in mind that Inspectors cannot recommend release from quarantine unless disinfection has been carried out in a satisfactory manner and that compensation for animals slaughtered cannot be paid until a certificate of cleansing and disinfection has been received by the Minister of Agriculture.

10. Horse owners should have no hesitation in reporting to this Department or to its inspectors the existence of actual or suspected cases of glanders. The disease has been spreading rapidly of late years and it is a matter of public interest that every fresh centre of infection should be discovered and dealt with as promptly as possible.

J. G. RUTHERFORD,
Veterinary Director General.
Department of Agriculture,
Ottawa, March, 1906.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

COAL—Coal lands may be purchased at $10 per acre for soft coal and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2000 pounds shall be collected on the gross output.

QUARTZ—Persons of eighteen years and over and joint stock companies holding free miners' certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end of the line of the lode, or vein.

The claim shall be recorded within fifteen days if ocated within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made and upon complying with other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a Royalty of 2½ per cent. of the sales of the products of the location.

PLACER MINING—Manitoba and the N. W. T., excepting the Yukon Territory: Placer mining claims generally are 100 feet square, entry fee $5, renewable yearly. On the North Saskatchewan River claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, not exceeding 1000 feet. Where steam power is used claims 200 feet wide may be obtained.

Dredging in the Rivers of Manitoba and the N. W. T., excepting the Yukon Territory—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below any low water mark, and subfor first year and $10 per mile for each subsequent year. Royalty same as placer mining.

Placer mining in the Yukon Territory—Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1000 to 2000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days if the claim is within ten miles of the mining recorder's office. One extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1000 feet in length, aand if the party consists of two, 1500 feet altogether, on the output on which no royalty shall be charged the rest of the party ordinary claims only.

Entry fee $10. Royalty at the rate of two and one-half per cent. on the value of the gold shipped from the ject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan River, where the lessee can dredge to high-water mark on each alternative leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction thereof is sufficient. Rental, $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent. collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory—Six leases of five miles each may be granted to a free miner for a term of 20 years; also renewable.

The lessee's right is confined to the submerged bar or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental $100 per mile Yukon Territory to be paid to the comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been not, the claim shall be deemed to be abandoned, anad open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum—All unappropiated Dominion Lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the minister may reserve for an individual or company having machinery on the land to be prospected, an area of 1920 acres for such period as he may decide, the length of which shall not exceed three times the breadth. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well, will be sold to the prospector at the rate of $1 an acre, and the remainder of the tract reserved, namely, 1280 acres, will be sold at the rate of $3 an acre, subject to royalty at such rate as may be specified by Order in Council.

W. W. CORY,
Deputy of the Minister of the Interior.
Dept. Interior.

Rennie's Seeds
at Half Price and Less

VEGETABLE SEEDS.

Five-cent Packages of any of the following Seeds for 2½c
Asparagus, large white, ounce 20c, for 10c
Beans, Bush, yellow pod, green pod or Lima, lb 35c for...18c
Beets, early round or long, blood ounce 20c, for 10c
Cabbage first early, second early or main crop, ounce 30c, for 15c
Cauliflower, standard, ounce $1.50, for 75c
Carrots, large white, for stock, ¼ lb. 25c, for 15c
Celery, early fall or winter, ounce 60c, for 30c
Citron, preserving, ounce 20c, for 10c
Corn, table, extra early, medium early or late, lb. 35c, for..18c
Corn, for popping, lb. 30c, for15c
Cress (Peppergrass), ounce 20c, for 10c
Cucumber, pickling or slicing, ounce 25c, for 15c
Kale, curled, ounce 25c, for..15c
Lettuce, Butterhead, crisphead, cos (upright), ounce 25c for 15c
Leek, largest, ounce 25c, for 15c
Mangel, large red or yellow, lb. 35c for.....20c
Musk Mellon, green or salmon flesh, ounce 30c, for.....15c

ONION SEED.

Onions, early red, large yellow or white, or pickling, ounce 30c, for 15c
Onion Sets, quart 35c, for...25c
Parsley, curled, ounce 20c, for 10c
Parsnips, table, ounce 15c for 10c
Pepper, scarlet, ½ ounce 25c for 15c
Peas, early dwarf, second early or late marrowfat, lb 35c, for 18c
Pumpkin, pie, ounce 20c, for 10c
Radish, early round, long or winter, ounce 20c, for 10c
Rhubarb, pie, ounce 35c, for 20c
Salsify, oyster plant, ounce 25c, for 15c
Squash, early marrow or winter, ounce 20c, for.....10c
Spinach, for greens, ounce 15c, for 10c
Sugar Beet, large rose, for cattle, lb. 35c, for 20c
Tobacco, large leaf, ounce 50c, for 30c
Tomato, extra early, large medium early, or small preserving, ounce 35c, for 20c
Turnips, white table, yellow or table swede, ounce 15c for 10c
Turnip, large field Swede or early feeding, lb 35c, for .25c
Watermelon, early large, ounce 20c, for 10c
Sage, broad leaf, ounce 25c, for 15c
Summer Savory, ounce 25c, for 15c

GRASS SEED.

For Lawns, with or without Dutch Clover, lb. 35c, for..25c

NASTURTIUM.

Tall Climbing, or Dwarf, ounce 20c, for 10c

FLOWER SEEDS.

Five-Cent Packages of any of the following varieties for 2½c
Alyssum, Sweet Larkspur
Antirrhinum (Snapdragon)
Asters, mixed Lobelia, trailing
Asters, crimson Marigold
Asters, white Pansy
Salsam Petunia
Balloon Vine (Cardiospermum)
Bachelor's Button (Centurea)
Calliposis Poppy
California Poppy (Eschscholzia)
Canterbury Bells (Campanula)
Candytuft Portulaca
Castor Oil Bean (Ricinus)
Canary Creeper Stocks, ten weeks
Carnation Sweet William
Coxcomb (Celosia)
Climbers, mixed Salvia
Chryanthemum Scarlet Runner
Cypress Vine (Ipomoea)
Dianthus Pinks (Single)
Dianthus Pinks (double)
Evening Primrose (Oenothera)
Everlastings Verbena
Four o'clock (Marvel of Peru)
Forget-Me-Not (Myosotis)
Gaillardia Zinnia
Godetia Wild Garden
Gourds Heliotrope
Helianthus (Sunflower)
Ice Plant
Musk Plant (Mimulus)
Morning Glory (Convolvulus)
Phlox, Drummondi
Sensitive Plant (Mimosa)
Scabiosa (Mourning Bride)
Tassel Flower (Cacalia)

SWEET PEAS.

Over 100 sorts mixed, ounce 15c for 10c

Reconciled Science and Religion.

A clergyman is quoted in Everybody's Magazine as confounding an advanced young woman who was demonstrating to him that science had disproved religion with this little parable. "Madam," he said, "I once knew a member of your sex who perfectly reconciled science and religion. She is a prominent member of the Young Women's Christian association, and she was making an address to a large gathering of women, which was interrupted by a terrific thunder shower. She shared with many the awful fear of thunder and lightning, and, with the others, she trembled in silence for a few moments. When a blinding flash was swiftly followed by a frightful clap of thunder she struggled to her feet and began to pray, 'O Lord, take us under thy protecting wings, for thou knowest that feathers are nonconductors.'"

Every Bit as Good.

"Have you a belt that will go about my waist?" asked the young lady with a smile as she entered the dry goods store.

"No, but I have something just as good," replied the young man who formerly worked in a drug store.—Yonkers Statesman.

Throwing Fire at Soldiers.

Greek fire, which had several other names—wild fire, liquid fire, wet fire and fire rain—was the most destructive war material used before the introduction of gunpowder. Discovered by Callinicus, a Syrian, it was first used in the siege of Constantinople, 673-678, and at Mecca, 690. According to an eyewitness, it made a noise like thunder, looked like a dragon flying through the air and made night light as day. This, allowing for a vivid imagination, gives its strikng characteristics when poured from caldrons, shot from copper tubes in balls of twisted flax or expelled from catapults in vials during sieges and naval engagements. Water made it burn more fiercely, and wherever it fell it spread a torrent of fire. So well was the secret of its production kept that its precise ingredients and admixture were still unknown, but it is certain that naphtha, sulphur, gums of resinous trees, charcoal, saltpeter, pitch and other bitumens were used.

Hot and Cold Crystals.

Whether we watch with the microscope a tiny crystal growing from a drop of solution or contemplate with the imagination the stages by which the fiery lavas of past geological periods sank to rest and crystallized, said Professor H. A. Miers in an address before the geological section of the British association at Cape Town, we view the same process. It is the transformation of liquid into crystal—not necessarily into a solid, for research shows there is no dividing line between liquid and solid. A plastic solid body may flow; a solid glass is only a super-cooled liquid. The real primary distinction is between crystalline and noncrystalline material. There are two great liquid reservoirs from which materials have crystallized—the sea with its dissolved salts and the subterranean baths of molten glass from which the igneous rocks have been derived.—New York Globe.

German Care of Landscapes.

Most German states have laws to prevent the disfigurement of landscapes by advertisements. The district authorities are authorized to determine what landscapes, buildings or monuments of historical or artistic value should be protected. Violations of the statute are made punishable by fine, with or without imprisonment. The statute provides against the display of pictures, advertisements or other things calculated to mar or disfigure any especially attractive landscape or detract from the artistic or aesthetic effect of any building or other structure of special importance or as highly prejudicial to any street or part of a city. The alteration of buildings of historical or artistic value may be prohibited by the local authorities, as may the construction of other buildings calculated to interfere with such historical monuments.

Found a Way.

A widow of an old Lyceum theater servant applied to Irving for some sort of occupation about the theater whereby she might earn a living. Irving appealed to Loveday, his manager.

"There is absolutely no vacancy of any kind," said Loveday.

"Can't you give her a job to look after the theater cats? I think we've too many mice about, not to mention rats."

"No," said Loveday, "there are two women already on that job."

"Hum, ha, let me see," said Irving reflectively, then suddenly brightening with an idea. "Very well, then, give her the job of looking after the two women who are looking after the cats."

The widow was at once engaged on the permanent staff of the theater.

Judgments.

If judgment is obtained against a man in one state and he moves into another before the judgment is satisfied the plaintiff proceeds against defendant at his new residence by what is known as "suing on a judgment." He has simply to bring into court a certified copy of the original judgment and execution is issued. This is in accordance with that provision of the constitution of the United States which says that "full faith and credit in each state shall be given to the acts, records and judicial proceedings of another state."

A Wonderful Child.

Zerah Colburn when a child had the most wonderful memory for figures ever known. He performed operations of addition, subtraction, multiplication and division on sums involving from eleven to twenty places of figures without setting one down on paper. Being once asked to raise eight to the sixteenth power, he almost instantly responded, "The answer is 281,474,976,710,656."

Rapid Growth.

One time when Joaquin Miller was in Chicago he was interviewed for one of the newspapers. While he was telling of the progress of things western the reporter interrupted him with an inquiry about the numerous city conflagrations out west. The poet of the Sierras instantly replied, "Our fires are caused by the friction of rapid growth."

An Expert Required.

"I wish an electrician would get rejected by Miss Snubem."

"Why do you wish that?"

"Because he might be able to explain why her negative is so positive."—Baltimore American.

Not What He Wanted.

Skinflint—I have no money, but I will give you a little advice. Beggar—Well, if yer hain't got no money yer advice can't be very valuable.

The atmosphere is so clear in Zululand that objects can be seen by starlight at a distance of seven miles.

The Wasp.

Don't fool with a wasp because you think he looks weak and tired. You will find out he's all right in the end.

No Contest.

Teddie—What are woman's rights, pa? Pa—Everything they want, my boy. Always remember that.

So They Do.

"Some men are born great." Yes, but gracious, how some of them do shrink! —London Tit-Bits.

"Only Me."

There may be a world of pathos and even of rebuke in a very few words, and so the rather thoughtless wife of a contributor of ours discovered recently. She has two sweet little children, both girls, and, almost without knowing it, she made a pet and favorite of the younger and prettier child. "Sweet," as she called her, had every care and attention lavished upon her, and good natured neglect was more or less the portion of the elder.

The mother was sitting in her bedroom quietly reading recently when the soft patter of tiny feet sounded on the stairs.

"Is that you, Sweet?" she called.

"No, mamma," was the sad reply; "it isn't Sweet—it's only me!"

That pathetic little "Only me!" haunted the wife of our contributor for longer than she would have cared to admit, but a change has since marked her treatment of her eldest born.—London Tit-Bits.

English Names.

Puzzling enough to an American is the English fashion of spelling a name one way and pronouncing it in quite another, but the cities are even worse than the individuals, since they deliberately adopt some alias. The town of Hull, for instance, is Kingston-on-Hull It has no official recognition as anything else, yet as Hull it is known to nine out of ten, who would wonder if Kingston-on-Hull was near the town of Hull should they hear it mentioned Even supposedly respectable cathedral towns are not above hiding identity and to call New Sarum "Salisbury" is to give it its alias. The royal town of Windsor is really New Windsor, and the county of Hampshire, popularly shortened to Hants, is in reality the county of Southampton. Bradford-by-the-Sea is more correctly Morecambe but rightly Poulton le Sande, while Bridlington, sometimes called Burlington, is more popularly Wakefield-by-the-Sea.

Deadly Trades.

"Tobacco workers are prone to deadly nervous diseases. I have never yet seen a tobacco worker who is not a nervous crank, who is not off in his head," complained the owner of a large cigar factory. "I don't know why it is. I used to be a worker myself, and I have never recovered from the effects of the trade. Half the time my men are away sick or dying, they are always ill tempered and flighty, and a *pablic agitation makes idiots of them.* I don't know the reason, as I said." He was advised to consult a physician and find out.

The foreman of a stonecutting yard, when questioned, was better informed as to the evils of his trade.

"See those dust clouds all over the yard?" he said. "Consumption there! And quick, at that."—Technical World.

Bin Measurements.

To measure corn find number of cubic feet in crib, then multiply by 9 and divide by 20, which gives the amount in bushels. To determine amount of shelled corn to be obtained from crib of corn in ear find cubic feet of corn, divide by 2, and the product will be the number of bushels of shelled corn, as two cubic feet of corn if sound and dry will produce one bushel of shelled corn.

To find the number of bushels of apples, potatoes, etc., in a bin multiply the length, breadth and thickness together and this product by 8 and point off one figure in the product for decimals.—Iowa State Register and Farmer.

A Dilemma.

A well known college professor offers the two horns of a dilemma to advocates of coeducation.

"If you lecture to twenty boys and twenty girls in the same room," he asks, "will the boys attend to the lecture or to the girls?"

Of course the coeducationist, to be consistent, must say that they will listen to the lecture.

"Well, if they do," replies the dean, "they are not worth lecturing to."—Harper's.

Muscles.

Many muscles are located at a considerable distance from the point where their force is to be exerted and are connected with the point of operation by slender strings or tendons. This is a provision of nature solely for convenience. If all the muscles whose power is concentrated in the hand and foot were located in the hands or feet these members would assume an inordinate size and weight and become more troublesome than useful.

Mirabeau's Trumpet Voice.

Mirabeau had a voice like a trumpet, and when he raised it in threat or denunciation the effect was awe inspiring. The impression he created was greatly heightened by his manner, his personal appearance being exceedingly imposing. He had a way of lifting his head and shaking it to give emphasis to his periods that made the beholders involuntarily draw back with fear.

Temporarily Silenced.

"Why did you insist on sending that young man to congress?"

"Got tired of his speechmakin'," answered Farmer Corntossel. "We thought we'd put him where the speaker would keep him quiet for a few years."—Washington Star.

Choice of a Vocation.

Aunt Rosa—Well, Juanito, what would you like to be when you are grown up? Juanito (whose parents are very strict)—I'd like to be an orphan.—Dia

Doubting Science.

She (from a book)—A woman's brain declines in weight after she is thirty. He—How do they know? I thought a woman never got to be thirty.

The Whole Thing.

Jackson Parke—What do you consider the two most important places in the world? Gotham—Oh, that's easy, of course— Jackson Parke—Oh, don't say New York for one. Gotham—I wasn't going to. I was going to say "Manhattan and the Bronx," of course. —Philadelphia Ledger.

In Bohemia courtships are abnormally long. In that country engagements frequently last from fifteen to twenty years.

FRANK SMITH HAS DRAMATIC FINISH

Bloodhounds Locate Oregon Desperado Harry Draper of Spokane Kills Him.

Portland, Ore., May 1.—A special to the Telegram from Oregon City says:

Desperado Frank Smith, murderer of three officers of the law, lies dead in the woods, south of New Era, Clackamas county, with a bullet in his head from the revolver of Harry Draper of Spokane. The outlaw was trapped at 9 o'clock this morning and at 11:10 he was writhing in the underbrush in his death struggle.

Prior to his destruction Smith had made a sensational escape into the timber and had been surrounded and penned in by at least 200 officers and volunteers. Dynamite had been used to dislodge him and the woods had been fusillated with bullets, all of which he escaped unharmed.

Smith was traced to his lair through the sagacious intelligence of Draper's bloodhounds, which did the best work that bloodhounds have ever accomplished in this state.

Finish Was Dramatic.

In the chase for Smith the finish could not have been more spectacular nor more dramatic. His end came less than two hours after the first information had been received by Sheriff Culver that a man answering his description had begged for breakfast at a bakery near Canaby. The trail, which had been cold and dormant for the past four days, developed with remarkable rapidity and the more the officers investigated the hotter it grew, until the great climax was reached and bathed in blood.

Concealed behind a fallen log, less than twenty-five feet in a straight line from the railroad track, Smith was brought to bay and there crouched until the pursuers came upon him. The flushing of Smith was unexpected, although the men were certain he was in the timber. The officers stumbled upon him and were standing within three yards of him when he was espied. The dogs which had been following the hot scent and uttering loud cries, stopped at the log and sniffed the air, holding their heads aloft. Draper had the beasts in leash and was urging them on.

Shot by Draper.

Suddenly Draper glanced down and there, concealed partly by the log, was the murderer and fugitive. Smith saw he was cornered and made no outcry. He was industriously pulling the razors, watches and jewelery from his coat pocket and hiding them under the log when Draper saw him.

"Are you Smith?" demanded Draper.

"Yes," was the brief answer.

As Smith made this reply he pulled his revolver from the inside of his coat and started to level it at Draper. In the twinkling of an eye, Draper wiped out his own revolver and sent *a bullet crashing through* Smith's temple.

Oregon Land Frauds.

Salem, Ore., May 1.—State Agent West received two new lots of counterfeit land sale certificates yesterday. One lot of thirteen for 320 acres each of state school lands, comes from the Commercial Bank of Eureka, Cal., and the other lot of fifteen certificates comes from E. G. Jones, of Appleton, Cal. These certificates from California seem to be the only lot that the swindlers were able to dispose of before their schemes was exposed last winter.

Along with the bogus certificates from Eureka are some genuine ones which Mr. West has every reason to believe are S. A. D. Puter's personal property. He is investigating the matter with a view to securing to the state and to some of the victims a part of their losses by confiscating these genuine certificates if, as he thinks, Puter is trying to realize on them through a friend.

Pleads for Free Seeds.

Washington, D. C., May 1.—In the house today Mr. Gaines of Tennessee again pleaded for free seeds, dring which time satirical applause made the house a bedlam. Speaker Cannon wielded the gavel like a stone mason in trying to restore order, but above it all could be heard the gentleman from Tennessee vociferating that the people of his section should have free seeds. The question was discussed by several others, including Mr. Brooks of Colorado and Mr. Wood of Missouri.

Mr. Sherman of New York, immediately after the approval of the journal of the house, asked unanimous consent to take the Indian appropriation bill from the speaker's table, nonconcur in the senate amendment and send the bill to conference.

Mr. Williams facetiously remarked that a girl in Arizona had been asleep for seven weeks, but on awakening found to her disgust that the statehood bill had been asleep a longer time than that, and he therefore would have to insist upon his objection. The bill will now have to be considered by the house.

SAVING WASTE FRUITS.

The fruit growers of Puyallup valley have solved the problem of how to save the waste fruits. They have signed contracts with the home canning company to supply over ripe raspberries and blackberries for the coming five years. The cannery will also handle the surplus plums, prunes, cherries, apples and vegetables. The prices to be paid are satisfactory to all concerned and will enable many of the growers to get returns of $300 an acre from berries without having to ship to outside markets. Provision is made for an increase in the output of the cannery every year to keep pace with the acreage to be planted.

Small fruit growing has proved a success in the fertile fields of Puyallup. The income from that source last year was more than $100,000. The industry represents small plots planted with berries. Some of the growers have not so much as one-half an acre devoted to berry culture. It is a real exemplification of intense soil cultivation. The reputed father of berrying for commercial purposes, who recently died in his home in Puyallup, demonstrated that he could make $1,000 an acre every year, by combining berry culture and poultry. The numerous prosperous and well-kept homes indicate that others have discovered the secret.

Saving the waste in the orchard is one of the important questions for the consideration of every horticultural community. Much of the crop of peaches, apples, berries and plums goes to waste because of getting too ripe for shipping to distant markets. The quality is not impared but considered improved by this ripening process. A few days' rain at the time the berries are ripening will generally cause the loss of much of the crop. By having the cannery located in the vicinity none need be wasted. The cannery is a necessity to success in making the orchards pay good profits. It is an illustration of the home industry plan for which every local man has a good word.

The Puyallup growers have set an example for others to follow. The acreage devoted to fruits is increasing every year. Some districts now tax the capacity of transportation facilities in getting ripe fruits away to market in time to prevent loss from being over-ripe. The canning plants utilize all such fruits and pay the growers fair prices. They give a standing of permanency to the industry by contracting for years in advance. They assist in advertising the output and bettering the market. It increases the value of the lands and advances the spirit of public improvement. More canneries will be built in the future and the fruit industry will become one of the leaders in the financial field.

---

be obtained, perforated in all directions by little tubes filled with bottle green glass formed from the fused rock.

"Some wonderful fulgarites were found by Humboldt on the high Nevada de Toluca, in Mexico. Masses of the rock were covered with a thin layer of green glass. Its peculiar shimmer in the sun led Humboldt to ascend the precipitous peak at the risk of his life."

It Won For Sardou.

It is a singular fact that the famous French dramatist Sardou owed his first success on the boards to his excellent handwriting. He had sent in his often rejected play, "La Taverne des Etudiants," to the Odeon management for consideration, and the manuscript was thrown, with some others, upon a table. One day at rehearsal the charming actress Mlle. Berengere was attracted by the handwriting and took up the manuscript, crying, "Oh, what an exquisite hand!" She read the play and recommended it so strongly to the directors that they were induced to read it and then accept it. At the time Sardou was starving. He had gone through seven long years of terrible hardship and privation.

An Example of Caring.

During the hottest fighting in the Shipka pass the leading battalion of the Russian General Dragomiroff's division recoiled before a hailstorm of Turkish bullets. The general was a very stout person and had the appearance of a peaceful German professor. But when he saw his men recoil he dismounted and walked slowly to and fro along a ridge swept by the enemy's bullets. He was a hundred yards in advance of the men, occupying the position they had abandoned. After staying there for awhile without being touched he shouted back to the battalion: "What are you doing, you geese? Did you think there was danger here? I don't find any!" The men responded with a roar of cheers, doubled up to him and charged so fiercely that the Turks were forced to retreat.

Why Bands Help Marching.

All men who have any appreciation of music feel prompted to step in time to a march tune, and music on the march therefore substitutes a new and pleasanter stimulus to exertion for the monotonous and somewhat dreary one of keeping place in the ranks. It is well known that weariness is, as a rule, more a matter of mind than of body and that the muscles of the body do not tire half so soon as the nerve centers which move them. Music, by bringing a fresh nerve center into play, will often banish all sense of weariness and will even sometimes afford rest to the usual nerve center, so that when the music ceases the soldier feels fresher than before it began.

A Girl and Her Money.

"Do you believe in marrying a girl for her money?"

"Not as a general thing, but sometimes that's the only way you can get it away from her."—Cleveland Leader.

She Knew His Secret.

"Tell me honestly, now, Clara, did Harold confess his love last night?"

"Confess! What do you think I am, a chief of police?"—Milwaukee Journal.

In New Holland scars, made carefully with shells, form elaborate patterns on the ladies' faces.

An Eskimo Dainty.

The greatest treat known to the Eskimo boy or girl is a lump of sugar. Perhaps you think there is nothing very strange in that. The strange part is the very funny way they have of eating the sugar. They roll the sweet morsel in a piece of tobacco leaf. This they place in their cheek and, smacking their lips delightedly, hold it there until it is dissolved. This dainty is called "laloop" and is the choicest morsel known to the little Eskimo stomach.

Different Service.

"Yes, sir," said the soldierly looking man, "I have spent fifteen years of my life in the service of my country."

"So have I," volunteered the low browed individual, offering his hand. "What were you in for?"—Houston Post.

The Way of It.

The Missus—Mary Ann, please explain to me how it is that I saw you kissing a young man in the kitchen last night. The Maid—Sure, I dunno how it is, ma'am, onless yez were lookin' through the keyhole.—Cleveland Leader.

Phone 138 for Ice Cream. *

E. B. Smith left on the Transfer this morning for Chilliwack on a business trip.

There will be a meeting of the Property Owners' Association in the board of trade rooms on Friday evening.

Ice Cream the purest at the Westminster Creamery. *

The Stranger brought in a very large boom of shingle bolts from the Pitt lake camp today for the Fraser River Lumber company.

Leave your orders for Ice Cream a the Creamery. *

The Transfer yesterday brought in a large consignment of excelsior manfactured at the Chilliwack excelsior factory. It will be reshipped today to Vancouver merchants.

The steamer Bute came into port from Todd Inlet this morning towing an ancient schooner loaded with 2,400 sacks of the Todd Inlet Cement works cement. There is a great demand for

P. Skaling of Vancouver left on the steamer Transfer for Barnston Island this morning to visit his sister Mrs. C. A. Hicks of that place for a short time.

The semi-weekly shoot of the New Westminster Gun club will take place this evening at Moody Square. Some good shooting is expected to be seen tonight.

R. L. Starratt, ship's husband of the Squid, was in the city yesterday. He said that the Squid had had an exceptionally good trip in search of halibut, and would be in port in the course of a few days with a full cargo.

Rev. A. J. Brace, Rev. T. C. Thom, Rev. W. J. Sipprell, Rev. Dr. White, and Rev. J. P. Bowell left on the steamer Transfer this morning for Chilliwack where they will attend a district meeting of the Methodist ministers of the New Westminster district.

H. Gilley, manager of the International Logging company, was a passenger to the south this morning. He had business in Seattle and before returning will take a run down to San Francisco to visit friends who recently passed through the earthquake.

G. C. Hinton, manager of the Stave River Power company, was a visitor in the city yesterday. He is making arrangements for the immediate commencement of the work at Stave river. It is possible that all the machinery will be ordered through New Westminster and shipped by river from this port.

Commodore J. R. Gilley went up river this morning on the flag ship Bobs. Captain Takeda was at the helm and the destination was to be Gilley Bros.' quarries at the head of Pitt lake. Quite a number of men are working at the quarries and the output of material this year will be unusually large.

Harry Munsie, machine operator at the Daily News, this morning received the sad news from Victoria that his father was dying at the family home in that city. Mr. Munsie left by the morning boat for the bedside of his father. Mr. Munsie, senior, is president of the Shawnigan Lake Lumber company, with headquarters at Victoria.

The B. C. Packers' have added to their wharf accommodation by the erection of ash ed about 40 feet wide and extending across the entire width of the wharf. This will be largely used for the storing of boxes.

Rev. W. H. Madill of the Daily News staff is confined to his home suffering with a severe attack of la grippe, which has settled in the face producing an erysipelas that is quite painful.

Conductor David Millar of the B. C. Electric Railway company, is rapidly recovering from the wound in his arm, and expects to return to work some time next week. The wound still gives him considerable pain whenever he tries to use the injured arm.

P. C. Clark left on the Rithet this afternon for his home at Ladner.

A. D. Patterson left on the Rithet for Ladner this afternon after spending a few days in town.

A. D. Patterson was one of the Rithet's passengers to Ladner this afternoon.

Provincial Constable Lane, of Mission, is in the city attending the assizes.

The crew of the government boat Georgia are busy repainting the boat's hull and house.

A meeting of the police commissioners is being held in the committee room of the city hall this afternoon.

A contribution of $5.00 from J. H. Bowes for the San Francisco relief fund is acknowledged at the city hall today.

Rev. Mr. Betts of Ladner arrived in the city this morning on the steamer Rithet to attend the district meeting of the Methodist conference at Chilliwack.

A. Clausen left on the afternoon boat for Ladner after spending a few days in town serving on the jury in connection with the assizes.

D. Black and J. Berry, both of whom were serving on the jury for the spring assizes left on the Rithet for their homes at Ladner this afternoon.

The Schaake machine works shipped a can capping machine and a large soldering machine this afternoon on the steamer Ritchet to Steveston for the Great Western cannery.

Thomas Mayes, superintendent of the branch asylum at Vernon, arrived in the city today, having been summoned here on account of his wife's serious illness.

The final arrangements for the sale of lands held by the city for taxes will be made this afternoon at a meeting of the sub-committee appointed for that purpose.

J. J. Johnston, of the provincial assessor's department, is supplying for a few days in the land registry department. His long acquaintance with that section of the work makes him a valuable man in the provincial offices.

The following passengers arrived in the city this morning on the steamer Rithet: A. McDiarmiad, W. Foster, F. Cutting, A. Romey, C. Nicolich, E. Barber, W. Abbot and wife, Mrs. and Miss Bell, from Ladner, and Miss Dowling from Sunbury.

R. C. Clarke, of Vancouver, has posted an application in the government agent's office for 1,000 inches of water from a creek emptying itself into Nicomen slough, and known as Silver Creek. The water is needed for manufacturing and industrial purposes. The application will be heard before Water Commissioner Fisher on June 2.

The steamer Butte came into port from Todd Inlet this morning towing an ancient schooner loaded with 2,400 sacks of the Todd Inlet Cement works cement. There is a great demand for this product in the city this season and the local supply was almost exhausted. A very large amount of cement is being handled by Messrs. Gilley Bros., who are supplying the crushed rock and cement for the large drying kilns which are in course of construction, as well as for other work in progress in the city.

NOTICE.

Owners of cows, horses, and other animals in the city, are hereby notified that it is contrary to the provisions of the Pound By-Law to pasture the said animals on streets or public squares in the city, and that it is the intention of the poundkeeper to enforce the By-Law in this respect.

Sporting News and Comment.

Fight Postponed.

It was a good plan to postpone the Nelson-Herrera fight at Los Angeles to May 25. Under present conditions California is not interested in fisticuffs.

One of the cleverest pugilists in England, Spike Robson, the British 126-pound champion, arrived in Philadelphia recently. He was accompanied by George Guthrie, described as the champion of Scotland. They are prepared to meet all comers in America who can scale at their respective weights, according to the New York "Evening Sun."

Robson won his first fight in America on Saturday last, when he put a Chicago boy down and out in Philadelphia.

The heason Jack O'Brien consented to meet Fitzsimmons a second time was to prove that he can go a long distance. Few people can realise that the Philadelphian is able to retain his great speed and marvelous footwork for a greater number of rounds than six, says the "Public Ledger." It is the doubting class whom O'Brien is extremely anxious to convert. He was serious a few weeks ago when he made the assertion that he was after the middle and heavyweight honors of the world. That there was no counterfeit in his victory over Fitzsimmons, and that he is the peer of any man in his class in the world, he is anxious and willing to prove. If he can beat the Cornishman again, and he is supremely confident that he can, no one will doubt his ability or his earnestness.

Tommy Burns having declared himself champion, says that he is in a receptive mood for challenges. As Tommy explains it, a real champion never goes round hunting for fights, so he must be dignified and wait for the other fellows to carry the trouble to him.

Hyland Beats Corbett.

Ogden, Utah, May 1.—The police interfered in the fifth round of what was to be a twenty-round go between "Fighting Dick" Hyland and Young Corbett last night, saving the latter from a knockout.

The Denverite was overweight and put up a miserable exhibition. Hyland confined himself almost entirely to playing for Corbett's body. The fight soon developed into a slugging match, with Corbett on the short end. The gong saved the Denver man in the fourth, and he was hardy able to stand on his feet when the police interfered in the fifth, the fight going to Hyland.

Tommy Burns Married.

Los Angeles, May 1.—"Tommy" Burns, or Noah Brusso, will cease his bluster now and acknowledge to the world that he has met one who can deliver the knockout blow. The champion heavyweight battler Wednesday took the count of ten with a smile upon his handsome features when the minister said, "I pronounce you husband wife."

No twenty-four foot ring governed this contest, neither were the rules of the Marquis of Queensberry called upon for the decison. Tommy walked up to the county clerk's office and purchased a piece of paper which gave him the right to change the name of Miss Julia Keating of Minneapolis, Minn., to Mrs. Tommy Burns of Long Beach, Cal.

The ceremony was perfomed at Long Beach at the Catholic church, and the conqueror of the world's champion will live in a cottage already owned by Tommy in the seaside city.

CAUGHT LIKE RAT, MAN GOES INSANE

John Slater Has Terrible Experience in Compartment of a Leaking Tunnel.

Chicago, May 1.—A dispatch to the Record-Herald from Milwaukee says:

Imprisoned in a compartment of a partially constructed tunnel under the river through a break in which water water was pouring, John Slater stood for two hours yesterday watching the water rise slowly until it threatened to engulf him. When at last he was rescued he was a maniac, his mind having given way from fright.

Peering through a bull's eye in a compartment his companions saw him in his plight, and for a long time were unable to help him. Leads from the fire boats were let down into the tunnel and the engines wer worked at a furious rate to pump out the water while the rescue work went on. In spite of everything that could be done the water rose steadily above Slater's waist to his breast, to his armpits and finally to his neck. Fifteen minutes later he would have been drowned.

Barely in time to prevent this, however, the firemen succeeded in opening the door and took Slater, insane and benumbed with cold, to a hospital.

THE AMBER HARVEST.

Work of the Waders and the Divers of the Baltic Sea.

The poor people who earn a precarious livelihood by gathering amber on the shores of the Baltic sea work only in the roughest weather. When the wind blows in from the sea, as it often does with terrific violence, the bowlders are tossed and tumbled at the bottom and great quantities of sea wrack are washed up on the beach. This is the harvest of the waders, for hidden in the roots and branches of the seaweed lumps of the precious gum may be found.

In other parts of the coast divers go crawling on the bottom of the sea for the lumps of amber hidden in seaweed and under rocks. It is believed that once a great pine forest flourished here where the great billows roll and that amber is the gum exuded from the trees, of which not a vestige remains.

The finds are very variable. The largest piece known, weighing eighteen pounds, is in the Royal museum in Berlin. The usual finds range from lumps as big as a man's head to particles like grains of sand. The larger pieces are found jammed in rocks or in tangles of marine vegetation. Divers work from four to five hours a day in all seasons, except when the sea is blocked with ice. The work is so arduous that they are bathed in perspiration even in the coldest weather. For all their grinding toil the Samland natives are happy in their way and increase and multiply as in more favored regions of the earth.

Three R's—Repairing Rips and Rents.

If some American mothers heard that their young Jimmies or Waldos or Clarences had to perform the services in their private schools that English boys have to do in similar institutions there would be pity and indignation—pity for the youths and indignation at the hard hearted master. But the custom doesn't seem to hurt the young Britishers. At a school in Brighton where boys receive the first half decade of their learning even future peers are taught to sew on their buttons and darn their hose and rents in their underclothing. Only their outer garments are sent to the tailor. Any shirking of the tasks brings the same punishment that ill prepared lessons would. On certain days the small boys are taught the rudiments of cooking and laying a table, and at all times they must keep their rooms in order. It is true some parents object to this, but they must submit or take their sons away. The majority of fathers believe the plan a wise one.—New York Press.

Two of His Habits.

"Two things the average man does at every opportunity from mere force of habit," said the observing woman. "One is to set his watch every time he passes a standard timepiece, and the other—it isn't very delicate, but it's a fact—to expectorate every time he passes a pubEc cuspidor. You watch a man inadvertently pass a timepiece. He always catches himself in time, goes back, compares his watch, and ten minutes later you'll see him absently doing the same thing farther down the street. To prove the other fact you need only stand five minutes within sight of a cuspidor in one of the big railway stations and watch man after man absentmindedly expectorate in passing, merely in response to the suggestion of the cuspidor.

"These two masculine habits about equalize a woman's inveterate habit of glancing at every mirror she passes."—Philadelphia Bulletin.

Name Coincidences.

An English paper is collecting name coincidences. At Cambridge university are two Japanese students, M. Seda and M. Wisugi (pronounced whisky). Their names are side by side on the residence list. J. Hunter reports that he was once asked to fill a vacant village pulpit. The regular preacher bore the name of Fox. In Leeds Miss Orange married a Mr. Peel. There is fear that an offspring of this happy union will hyphenate the two surnames. Another matrimonial case is quoted by a correspondent from the published "Diary of John Epps, M. D." On page 605 the doctor notes: "Feb. 17. This morning a patient consulted me named Ann Devil. Finding she was a single woman, I suggested that some day she might become Ann Angel, which made her smile, though she was in great pain." A note made later states, "The curious thing is that she did marry a Mr. Angel."

December.

"Nobody is worried nowadays by the fact that the twelfth month of the year is called the tenth, December," says a writer, "and no doubt even the ancient Romans soon got used to the anomaly when the new year was shifted back from March to January, though the old names of the months were retained. But there was one of them who made ingenious use of it—Licinius, a rascally procurator at Lyons under Augustus. He insisted on having certain monthly payments made fourteen times a year, arguing, when December came round, that as it was the tenth month of the year and there ought to be twelve there must be two more to be accounted for."

Fed Them on Stale News.

In the British arctic expedition of 1875 one of the chaplains had a file of the London Times twenty years old, containing the Crimean war reports. One copy was given out to each ship daily. The officers had it first, then it went to the forecastle, and soon every one was as keen about the news as if the war had been proceeding. The clergyman in control of the press was besought to issue an evening edition, and when Sevastopol was about to be taken excitement ran so high that the newspaper office—a locker—was almost stormed. The editor, however, was firm and continued with his daily issue, the interest being kept up to the end of the expedition.

"In God We Trust."

The word "God" never appeared in any government act until the year 1864, when, at the suggestion of the director of the mint, former Governor Pollock of Pennsylvania, "In God We Trust" was stamped on the copper two cent piece. Before that time "E Pluribus Unum" had been the motto. Strange to relate, "E Pluribus Unum" on coins never was authorized by law.

LAND REGISTRY ACT.

Re Lot 9, 10, and 13 of Lot 16 of Suburban Block 10, Map 200, New Westminster City.

Synopsis of Canadian Homestead Regulations

Any available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situate.

The homesteader is required to perform the conditions connected therewith under one of the following plans.

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

W. W. CORY.
Deputy Minister of the Interior.

N. B.—Unauthorized publication of this advertisement will not be paid for.

SECRET SOCIETIES

LAMPS BURN AGAIN IN SAN FRANCISCO

Brighter Appearance of Things at Night Gives the People More Hope.

San Francisco, May 1.—For the first time since earthquake and fire laid this city in ruins, street lights last night gleamed through the black mantle which has enveloped the city after nightfall. For nearly two weeks everybody has stayed indoors after dark, and nearly all of San Francisco went to bed with the setting of the sun. For the first week after the fire lights in residences were not permitted.

Gleaming of arc lights in the Potrero district last night was seen from all over the city and did more to make people hopeful, restore confidence and good feeling than anything since the earthquake. Although lights were burning in only a small section of the city they were hailed with much satisfaction as a good omen. The lights were operated by the electric lighting company's Potrero plant, which was practically uninjured by the earthquake and was not in the fire zone.

More Lights Tonight.

General Manager Natthaly of the San Francisco Gas & Electric company has announced that there will be several hundred arc lamps in operation throughout the unburned section of the city tonight. Besides the three light routes for which permission was granted several days ago, it is intended to install lights along the principal roads where supplies are being hauled into the city. The company claims that it has enough power in the Potrero plant to illuminate the entire unburned sections of the city.

The street car service is rapidly being extended as fast as large gangs of men clear the streets of debris and replace the twisted and warped rails. The United Railroads operated cars last night until 10 o'clock. Seven o'clock was the hour set for the cessation of street car traffic when permission was granted to resume it, but late yesterday afternoon the railroad company was advised that it would be permitted to run cars until 10 o'clock at night, it having been demonstrated that there was more demand at night than in the day time.

Hospital in Park.

Golden Gate Hospital has been established in the park by Company A of the hospital corps, U. S. A., Capt. Gilchrist and 100 men. This is the biggest field hospital in the army. The camp is thoroughly up-to-date, having six medical wards and one surgical ward lighted by gas, a dispensary tent with six months' supplies, a full commissary outfit and everything necessary for maintenance.

The picture of "The Man With the Hoe" was saved. This fact will be welcome news to art lovers the world over. It was reported that the famous painting by Millet was burned with others in the Crocker mansion on Nob Hill, but it was learned yesterday that it was rescued from the flames. Other famous paintings in the same collection which were carried to safety are "The Oaks," by Rosseau, and the "Dance of the Nymphs."

Three thousand men found employment at their old tasks yesterday when the Union Iron Works reopened. The damage done to the plant by the earthquake has been repaired and the plant put in shape to perform the immense amount of work that will be imposed on it as a condition of the reconstruction work in San Francisco. The Risdon Iron Works has also put a large force of men to work.

Fifty Chinese owners of property in old Chinatown have decided to rebuild on the sites where their buildings were destroyed. Legal advisers of the Chinese, the Chinese consul-general and the vice-consul give it as their opinon that the owners or lessees of land in Chinatown cannot be deprived of the right to rebuild if they so desire.

Olympic Club Gets Home.

The Olympic club has decided to accept the offer of the Hobart mansion on Van Ness avenue for a temporary clubhouse.

The Santa Fe Railroad company and the Southern Pacific company have adopted the policy of carrying all employes through the present disturbance without any loss of pay caused by absence on account of the fire. The same plan has been followed by many of the larger business firms of San Francisco.

Superintendent Jayness announces that the Western Union Telegraph company is now in a position to handle all of its business as if there had not been an earthquake. All messages have been sent up to date, the great congestion incident to the catastrophe having been removed and a new general operating plant completed at West Oakland.

The fire underwriters' adjusting bureau has adopted a resolution to the effect that in the adjustment of losses preference will be given to policyholders who do not employ professional adjusters.

San Francisco had more than a score of institutions devoted to the housing and care of children. Not one of them passed through the earthquake without damage, but in the whole record of their crumbling walls and showers of plaster only one life was lost, that of an infant in the Alexander maternity cottage. The babe was less than forty-eight hours old.

The report given publicity several days ago that the earthquake shock was not felt on Alcatraz Island, in the Bay of San Francisco, proves to have been unfounded. It was experienced there, but owing probably to the solidity of the rock on which the buildings rest, little damage was done.

Supreme Court to Meet.

The supreme court of the State of California will meet next Monday, the regular law and motion day, in the Century Club building on Franklin street. All the records and filings of the highest tribunal of the state are kept in triplicate, copies being sent to Los Angeles and Sacramento from here and vice versa, as they are filed. As a result the supreme court lost only three records that were filed about ten days prior to the fire. Copies will be sent to this city at once.

San Francisco is to build a new city hall at once, a temporary structure, but one which will do away with the necessity of paying the highest rent rates which the owners of property available for municipal use are inclined to charge. A site which is looked upon favorably is the Lincoln school property, on the corner of Market and Fifth streets. It is proposed to erect the temporary buildings of corrugated iron on a steel frame and to house in it all the city officers, as it will be practically fireproof.

The Tenth Regiment of Pennsylvania Volunteers, which was camped in this city at the time of the Spanish war, has sent a donation of $10,000 to the relief committee. In a note the officers told how well they were treated by the people of San Francisco during their sojourn here and as a token of appreciation they made up this handsome purse to help out the big-hearted people of this city.

Twelve Red Cross nurses from Seattle entered the committee room of the finance committee during its session yesterday and announced that they had been sent by the chamber of commerce of the northern city to help here. They said they had been unable to secure accommodations, and the committee turned them over to the care of the board of health.

The most important development today was the resumption of banking business through the agency of the branch mint. By means of certified checks depositors were enable to secure money and business men were placed in a position to attend to some pressing wants. With the possession of money many little improvements are looked for in the next few days, among the small dealers and the medium merchants.

According to the figures of the general committee the grand total of food supplies received here since the day of the earthquake is 8,797 tons. The total amount of goods issued to the people to date is 6,596 tons, leaving the amount on hand 1,901 tons. The stock remaining consists chiefly of medical and food supplies.

Street Cars Inadequate.

The cars run so far have been utterly inadequate to handle the heavy traffic, and the owners of almost every kind of vehicle are making a lucrative business of hauling large numbers of people at the rate of 25 and 50 cents each to and from the ferry.

Last night was the warmest and balmiest since the thousands of people have been compelled to camp in the open. In nearly all the parks and squares the homeless are now well provided with warm bedding and comfortably housed in tents. This problem has been pretty well solved, but the food question is one that is causing the authorities much worry.

Money Brokers Hit.

The money brokers are confronted with a serious problem, especially those who month after month have been in the habit of advancing the salaries of municipal employes. Today is pay day in many of the departments, the day on which the brokers have been in the habit of presenting their demands and collecting the 2, 3 or 5 per cent commission which they exact. Between the fire and earthquake many assignments have been destroyed, and Auditor Horton is besieged by anxious brokers demanding that he accept a substitute for the missing powers of attorney. Horton refuses to give any satisfaction.

"The warrants will be given to the persons to whom they belong unless proper documents showing a bona fide assignment is filed," he declared. Sixty per cent of the city's servants draw their salaries through brokers. The profit in the business has become so great that the privilege of negotiating such loans has become a political plum. To secure it some brokers have advanced large campaign funds with the understanding that the business will be directed to them.

Prof. E. Knowlton has just returned from a thirty-mile walk to Bolimas Bay, where, he says, there is evidence that the recent earthquake had its center. Few, if any, houses in that vicinity escaped damage, but no fatalities occurred. There is now an island in Bolimas Bay, where formerly muddy shoals, and on either side of the island the water is ten feet deep.

Religious Mixture.

New York, May 1.—A Catholic priest, a Jewish rabbi and representatives of six Protestant denominations, united at a meeting last night to plead for a more thorough religious education of children. The movement had its inception at the Inter-Church conference last fall.

It is proposed that the public schools shall so arrange the schedule of studies that subjects of relative unimportance shall come on Wednesday afternoons and that such students as desire it, or whose parents desire it, shall then be free to go to the churches of their choice to receive their religious instruction without loss of public school standing.

Rev. Dr. Anson P. Atterbury, pastor of the Park Presbyterian church, presided, and Father McMillan of the Paulists, was the first speaker.

"It is our Catholic position that religion and morality are inseparably joined," said Father McMillan. "To us it is visionary that there can be morality without religion. The method suggested will help to get rid of that absurd idea that religion is for Sunday alone and has no place in the business day."

Rabbi H. P. Mendez said he spoke as an Oriental. He thought the three "Rs" are neglected in secular education, not the three "Rs" best known but the reverse, reverence, righteousness and responsibility.

Rev. Dr. Frank Mason North, Methodist; Rev. Dr. G. U. Weanner, Lutheran; Rev. Dr. H. A. Stillson, Congregationalist, and Dr. Henry M. Sanders, Baptist, also spoke.

A resolution was passed empowering the committee originally appointed, and under whose auspices the meeting had been called, to continue its work in a corroborative vein.

SOMETHING TASTY

Welch, Alton, Ill.

The G. T. P. Terminus.

A large number of men in charge of Chief Engineer Pillsbury will go north on the steamer Tees today to commence work on the wharves and other work for the Grand Trunk Pacific at Kai-en Island. The party will number 40 and the men will make their headquarters at Metlakatlah.

Several carpenters are in the party and they will at once commence work on the erection of bunk houses for the workmen. Three or four engineering crews will also go north on survey work.

Mr. C. B. Dodge of the Marine Department at Ottawa is in the city. He has been detailed on departmental work at Kai-en Island, the principal part of which will be the taking and charting of soundings of Lima harbor at the proposed terminus of the Grand Trunk Pacific.

Showers Promised.

Victoria, May 2.—The pressure continues high on the Washington and Vancouver Island coast, but a vast area of low pressure extends from the Yukon southward through Cassiar and Cariboo and is rapidly traversing the northwest provinces to the Great Lakes. Showers have fallen in upper British Columbia and generally throughout the northwest. These conditions will probably cause rainfall in this district within the next thirty-six hours.

Forecast for thirty-six hours ending at 5 p. m. Thursday on the lower mainland: Light winds, becoming cloudy with probable showers on Thursday.

Matsqui Municipality.

The election of school trustees, held Saturday, April 28, resulted as follows:

Coun. Wm. Merrifield, 41.
W. P. McCormick, 34.
R. Roble, 31.
Reeve W. Towlan, 23.
Coun. P. Jackman, 17.
K. W. Johnson, 13.
R. Peardon, 13.

Mr. Merrifield was elected.

Poundkeeper Gets Active.

A stray cow yesterday evening took a fancy to explore the business portion of the city and accordingly wandered unattended along Columbia street, trailing a length of rope after her. Officer Ross happened to be on duty and perceiving the bovine coming his way, he executed a strategic movement from the rear and possessed himself of the trailing rope. He took the cow to the C. P. N. wharf, where he secured her, and then proceeded to inform Poundkeeper Collins, who promptly arrived on the scene and impounded the animal. This morning the cow was claimed by Ed. Gowdey, who had the pleasure of paying out the first pound fees received by Mr. Murray.

MUSKEGON BELLE LOVES CHINAMAN

Miss Lucille Brocke Wants to Marry Lee Joy the Chop Suey Man.

Muskegon, Mich., May 1.—Determined to become the bride of a Chicago Chinaman of wealth and culture, whom she met while still wearing short dresses, Miss Lucille Brocke, one of the belles of Muskegon, is storming the paternal heart for its consent to the nuptials.

The Chicago Chinaman is Lee Joy, proprietor of a chop suey house, whose brother, Dun Joy, some time ago took for his bride Miss Erma Flynn of Chicago, a boon companion of Miss Brocke.

Is Belle of Society.

Miss Brocke is the daughter of Dr. Alfred Brocke of this city. She is a striking handsome blonde and is well known in Muskegon's best circles.

Lee Joy is thoroughly Americanized. His queue is gone. He wears the latest creations of America's best tailors, and his pockets are lined with American gold. He is lavishing costly gifts upon the girl in the hope of convincing the girl's parents that they should give their consent to the marriage.

Joy Forsakes Queue.

When the prospective bride was but a lass of 12 she visited Canton, China, and there was introduced to a wealthy tea merchant. He told her of his son in Chicago. She looked up the youth on arriving home, and love at 14 started. Slowly her heart went out to him. Hardly had his courtship started when Miss Brocke demanded that he renounce his queue. He complied. Since then her path has been constantly strewn with his devotion. The wedding is planned for June, at either Muskegon or the Auditorium Hotel, Chicago, with an Oriental trip as a honeymoon journey.

Artist at Work.

J. H. Vickery, an English artist of some repute, has been staying at the Colonial hotel for some time past, and is actively engaged in painting scenes of interest and beauty around New Westminster. While engaged in painting of Holy Trinity church yesterday afternoon, Mr. Vickery, who had taken up his position on the banks of the ravine that runs alongside the Guichon hotel, was startled by hearing a loud chash in the direction of the church, and looking up from his canvas, he noticed that a portion of his landscape had disappeared. This was the result of the removing of the old poles that are being replaced along this road at the present time, and it interfered to a certain extent with the beauty of the scene, as in falling the pole carried away with it quite a number of branches from the surrounding trees. Mr. Vickery, however, finished his painting, and was the recipient of many favorable comments from passers by.

Organizing Band.

Professor Judges is making rapid progress in his efforts towards organizing a city band and has already enrolled about eighteen members of the old band as well as a number of new musicians. He will hold a meeting in a short time, the date and place of which he will make known later. This afternoon the professor left on the Rithet for Ladner to direct the band of that town as they intend to give a large picnic at Boundary bay on May 24.

It's One Thing

To find real estate good enough to invest your money in, but quite another to find property that represents a real good value.

We have some property at present on our books which a wise investor will buy up as soon as he looks them over.

Limited.

Luck Money.

"Handsel" is the first money received for the day ("luck money"), that which is given back "for luck" by the seller to the buyer. Spitting upon it is the essence of the whole transaction, and it is practiced today, not only all over England, but all over the world. We know from many classical authors what virtue was believed by ancient Greeks and Romans (see Potter, "Archaeol, Graec.," i., 417) to lie in the act, and there is also abundant evidence of the belief all through the middle ages, and now in the twentieth century it remains as strong as ever. Otto Jahn says: "I have often seen the fishwives of Ellerbeck, when they had got handgeld from my mother, how they spat upon it. They say that it brings them besonderes gluck. They will not tell the reason. Certainly it is done to keep off witchcraft." The same thing is done by modern Egyptians and by Italians. At Posilippo I gave a penny to a deaf mute. He first spat on it, then put it to his forehead, and lastly devoutly crossed himself with it, precisely (except the crossing) as is done by modern Egyptians. Even in faroff Celebes the natives spit in the same way as a protective rite.—Notes and Queries.

When Watches Were New.

At first the watch was about the size of a dessert plate. It had weights and was used as a "pocket clock." The earliest known use of the modern name occurs in the record of 1552, which mentions that Edward VI. had "one larum or watch of iron, the case being likewise of iron gilt, with two plummets of lead." The first watches may readily be supposed to have been of rude execution. The first great improvement, the substitution of springs for weights, was in 1550. The earliest springs were not coiled, but only straight pieces of steel. Early watches had only one hand, and, being wound up twice a day, they could not be expected to keep time nearer than fifteen or twenty minutes in the twelve hours. The dials were of silver or brass. The cases had no crystals, but opened at the back and front and were four or five inches in diameter. A plain watch cost the equivalent of $1,600 in our currency, and after one was ordered it took a year to make it.

Trolling For Tarpon.

It is not easy to hook a tarpon while trolling, for his mouth is very hard, says Julian A. Dimock in Country Life In America, and much skill may doubtless here be shown. In the playing of the fish the work is about the same as in still fishing save that more care must be used, as the hook is probably not firmly imbedded. An old fisherman told me that he liked to be sure of his fish and so preferred still fishing, but to my mind it is one of the objections to that method. Another and stronger objection is the disturbance of my feelings in thinking that I am pulling against a fish's "in'ards." If the line does break the chance of the victim's being able to free himself from the hook is problematical, while in trolling it is the work of a minute after the strain is off the line until a sore mouth is the only symptom remaining.

The Greek Symposium.

The Greek symposium was literally "drinking together," but before the drinking fully began there was a banquet, more or less elaborate, as the wealth and taste of the host might dictate. The guests came in their best. Even old Socrates, Plato tells us in his "Dialogue" on the subject, was not above taking a little extra pains when he was invited out. Some one met him one day in the market place, "fresh from the bath and sandaled," and as the sight of the sandals was unusual, he asked him whither he was going that he was so fine. "To a banquet at Agathon's," he replied, "and I have put on my finery because he is a fine creature. What say you to going with me unbidden?"

Properly Boiled Meat.

To boil meat so as to retain the juices and soluble salts and yet cook it sufficiently it should be plunged into boiling water and boiled rapidly for about ten minutes. After this fast cooking the kettle must be pushed over to the back of the fire, where its contents will simmer gently. This tends to coagulate the outer rind of the meat so that the juices cannot escape. If meat is treated in this manner the inside will be found juicy and tender, but if the meat is allowed to boil it will be found hard and chippy, the goodness having all boiled out of it.

Contagion and Infection.

The terms contagion and infection are too often used promiscuously, though they are by no means synonymous. The dissemination of mycotic diseases takes place in different ways. There are those which cannot be communicated from person to person, but spread only by the microbic cause invading the individual. To this class belong malarial fevers produced by spasmodia. There are, secondly, those which are not communicable from person to person, but through external carriers only, such as soil, water, food, air, clothing and utensils. To that class belong yellow fever and Asiatic cholera. They are infectious. There are, finally, those which may be transmitted directly from a person or indirectly through carriers. To this class belong scarlet fever, measles, diphtheria, variola, influenza, erysipelas and varicella, perhaps also whooping cough. They are contagious and infectious.

Courting Customs of Siam.

In Siam the lighting of a cigar indicates a betrothal. In that country a person wishing to become engaged to the girl of his choice offers her a flower or takes a light from a cigar or cigarette if she happens to have one in her mouth, and thereupon, provided there is no impediment, steps are at once taken to arrange for the payment of the dowry. The families of the bride and bridegroom have each to provide a considerable sum. In Calabria, as in many parts of India, a lighted taper or a lighted pipe betokens the acceptance of the suitor for the hand of a lady in marriage. In Siberia it is the custom that when a suitor has been accepted by a girl she presents him with a box of cigars and a pair of slippers as a sign that he is to be master in the house.

Dangers of Cocaine.

Cocaine, an alkaloid of cocoa leaves, was discovered in 1859, but remained in comparative obscurity until 1884. In minute doses, whether taken internally or used as a spray on mucous surfaces, its effect is wonderfully exhilarating, producing for a time the fresh and buoyant sensations of youth and perfect health, that have apparently no unpleasant reaction, and therein lies the explanation of the subtle and irresistible power it quickly acquires over its victims, carrying them to the very brink of destruction before they have dreamed of danger. Being a cumulative poison, the first warning symptom does not appear until the fatal chains are riveted that shall drag them, horror stricken and powerless of resistance, over the precipice to complete mental, moral and physical ruin.

Foreign Flags In America.

The first flag to float over American soil was the royal standard of Isabella, emblazoned with the arms of Castile and Leon. A white flag with a green cross was its companion. Some years after Columbus landed at San Salvator the Cabots planted the banner of England and of St. Mark of Venice on the eastern shore of North America. In the centuries that have intervened since a variety of national flags have waved where now only the stars and stripes is the accepted emblem. Over Texas have floated the French, Spanish, English, American and Confederate; in Louisiana the lilies of France, the Spanish flag, the tricolor, the American and Confederate flags; in California the Spanish, Mexican, Russian and American.

The Cocoanut.

The cocoanut tree is the most useful of all plants in the tropical region. Its seed furnishes food and an intoxicating drink. The shell gives drinking cups and vessels and a hard material capable of a high polish, from which personal ornaments may be manufactured. The trunk furnishes wood for dwellings and boats. The leaves make clothing, cordage and ropes. The fibers of the bark and of the nut afford matting and carpets. The buds furnish a succulent vegetable, and from the trunk a palatable liquor is drawn by making an incision.

As Good as Married.

First Sailor—No, Bill, yer don't really know what life is till yer get spliced. Second Sailor—W'y, shiver me timbers, messmate! I've never been married, true, but I've had yeller fever and cholera, I've been frostbit, drowned, burned alive, eat by a shark, blowed up at sea and operated on for cancer. Wot more does a reasonable chap want?—London Answers.

The Real Thing.

Express Clerk—Value of this package, please? Fair Damsel—$25,000. Express Clerk—Huh? Fair Damsel—You heard what I said. Those are love letters from old Bagsocoyne, and I'm sending 'em to my lawyer.

Translating the Definition.

Johnny—Papa, what does precocious mean? Papa—It means—a—it is a term applied to children who know more than is usual at their age. Johnny—Oh, yes; it means a fresh kid.

Awfully Slow.

He—Darling, I have loved you ever since first we met. She—Well, why didn't you say so long ago? Did you think I was a mind reader?

A man should be upright, not be kept upright.—Marcus Aurelius.

Two Kinds of People.

There are two great promoters of social happiness—cheerful people and people who have some reticence. The latter are more secure benefits to society than the former. They are the nonconductors of all the heats and animosities around them.

Wonders of Baalbec.

Baalbec, or Baalbek, is the name given a ruined city lying in ancient Coele-Syria, forty-five miles northwest of Damascus. There is nothing particularly remarkable about a ruined city being found in the locality mentioned, but the size of the blocks of stone used by the ancient builders of this particular city is something that has puzzled the modern engineers since the day when Baalbec was first made the Mecca of the oriental traveler. There are immense stones on every side of the visitor to this ancient pile of ruins, but the three most remarkable blocks—said to be the largest ever used in the construction of a building—are in a wall back of the temple of Baal. These immense stones are respectively sixty-four, sixty-three and sixty-two feet in length and each is thirteen feet in thickness, but the most wonderful thing in connection with them is the fact that they are at a place in the wall twenty-five feet from the ground. How these immense blocks of granite were ever raised to such a height is a question that has never yet been answered.

Advertising.

Until business is successful without a proper store, proper employees and the right amount of capital, it must be assumed that these three conditions are essential to the conduct of profitable trade, and it is as obvious that so long as advertising accompanies the business of profit advertising is necessary for the upbuilding of business. The mere appearance of advertising indicates that business is being done or will be done, and so long as everybody prefers to buy of men of success rather than of men of failure just so long will the man who advertises be likely to do the largest business.

His Model.

Critic—That villain in your story is a perfect masterpiece. Where did you get the character? Novelist—I imagined a man possessed of all the forms of wickedness which my wife attributes to me when she is angry.—London Tit-Bits.

On and Off.

Mrs. Hightone—You are having trouble with your cooks? Mrs. Flashly—The first one carried on so. Mrs. Hightone—And how about the last? Mrs. Flashly—She carried off so. I lost two dresses and a hat.

W. S. COLLISTER & CO.

Japan's Pancake Women.

One of the familiar sights on the streets of a Japanese town is the pancake woman, who, with her little brazier of coals and her tiny frying pan, is usually found on a corner not far from a school. She has a bowl full of delicious batter, a ladle and a cake turner, and there is apt to be a hungry crowd around her little stand as soon as school is out, for not many of the children are able to resist the smell of the crisp pancakes, at least if they have any money. For a small coin worth only a fraction of one of our pennies a child may fry and turn his own cakes, and happy is the one who has a number of coins in his little kimono sleeve and can fry and eat to his heart's content.

Official Correspondence.

A fourth class postmaster—and he doesn't live in Billville—sent the following to headquarters in Washington:

"This wil make three times that I've told you I'm laid up with a bad leg, havin' shot myself in the left leg—the one that was wounded in the war—while I wuz tryin' to kill a squirrel for my breakfast, and I will not be besides, I don't git much holiday nohow!".
