TWENTY-EIGHT CARLOADS OF COPPER SENT EAST

Mineral Development Shows This To Be Rich District

Five-Dory Fishing Boat Brought In 80,000 Pounds

Yukon Developing Many Lines Other Than Placer Diggings

The Yukon is changing very considerably in its development, and instead of producing nothing but placer gold it is now making a showing in other lines of the mining industry. Col. Thompson, the member for that district in the House of Commons, returned yesterday in company with Hon. Dr. Roche, Minister of the Interior, in the Canadian Government. He says that the gold production may this year vary a little below what it has been, but this is being made up for in the increased activity along other lines.

There is a steadily increasing production of copper at White Horse and there is also most promising indications in the working on Stewart River where silver is being mined.

Taken all round the district and its prospects look well. The supply of labor, in spite of the fact that there has been a draining through the war and the northern men answered the call nobly, is about normal. There is no over supply but there seems to be enough to take care of the needs of the district for the present.

Hon. Dr. Roche was well pleased with the trip. It was the first visit he had paid to the district and they had splendid weather all the way through. He is staying over here until Monday morning, when he leaves for the east over the G. T. P. Col. Thompson will go south this evening, having business in Victoria before leaving for the east. His family will remain in Prince Rupert, visiting Mr. and Mrs. J. H. Thompson for a time.

CANADIAN WORKMEN INTEREST ENGLISMEN

HOW THE WOODSMEN FROM THIS COUNTRY ARE ENGAGED IN OLD LAND

Active Work Undertaken By Them In Bringing Forests Into Use.

An article from the Canadian Forestry Journal, relative to the Canadian Foresters work in connection with war relations, will be of interest. The article reads as follows:

The timber problem supplies a very interesting sidelight on the war. It is being dealt with speedily and efficiently, and very shortly the expert Canadian lumbermen who are over here engaged in the scientific method of thinning out certain of our most famous woodlands and hewing and shaping the timber for immediate use will be working at full pressure. To get to work in earnest they are only waiting the arrival of their milling machinery.

At present they are marking down and surveying certain tracts of forest land, "blazing" the trees—mainly the soft wood trees of pine and fir—and so arranging their scheme of attack that the beauties of our rural scenes shall not be unnecessarily marred.

Yesterday afternoon, in the course of a long walk through the beautiful Forest of ——, certain parts of which have been earmarked for slaughter, a Daily Mail representative met a little party of pioneers surveying.

They were brown, lithe woodsmen—half-soldiers, half trapper, and wholly romantic. They were diagnosing the cases of certain tall, feathery-topped pines very much as a doctor deals with his patient, and jotting down their calculations in a charted case-book. Already behind them could be heard the battle-music of saw and axe, broken into now and again by the sudden scream of the steam-driven "circular." Sundry gaps appeared now and again in the dark line of foliage—each gap meant the fall of a giant, and no giant has ever been dismembered so speedily as he. Half an hour ago a king of the glade, he was now a neat pile of railway sleepers ready for the track.

"If we had all our tackle here," said one of the pioneers, "I guess we'd be able to turn you out a complete box of matches from the waste product of that tree—and do it while you wait!"

This soft-voiced, keen-eyed young man seemed to know everything there is to know about the trees and the forests of the inhabited globe, and how to make the best use of them. "You in Great Britain have over two and a-half million acres of forest," he said, "and as a wartime asset trees and their product are so much fine gold—properly handled.

"Apart from the timber proper, which is so much in demand for military purposes, the by-products are extremely valuable. In ordinary times the Austrian forests produce between four and five million hundredweights of tanning bark alone. Then there are very large quantities of turpentine and potash and gallnuts 'extracted' from the trees as well.

"In France the term of maturity

TWENTY-EIGHT CARS OF COPPER

VALUABLE CONSIGNMENTS OF METAL ARE NOW ON WAY ACROSS CONTINENT

Special Train Carries Part, While Remainder Is With Regular.

Early yesterday morning twenty cars of blister copper from Anyox started from here for the refinery in New Jersey. This copper is about 98 per cent. pure. The 2 per cent. other than copper is principally gold and silver which has to be taken out of the product as it leaves the smelter at Anyox. This is part of 28 cars that were brought here by the steamer Amur from Anyox.

Of the twenty-eight cars, the main part went by the freight train yesterday, while the remaining part of eight cars will go out Monday morning. The Amur discharged the copper here in about 24 hours, working all night at it.

Shipments of this kind, which was brought from the smelter town by the steamer Amur, will, it is expected, be made from here regularly. The output of the smelter at Anyox is said to be about double the tonnage of yesterday's shipment over the G. T. P. The shipment brought in from the smelter comprised 852 tons. Its value is put roughly at $400,000.

LAKELSE LAKE IS GREAT ATTRACTION

IT IS BECOMING ALREADY IMPORTANT PLACE FOR SUMMER OUTING

Many Prince Rupert People Are Spending Holidays At That Point.

Lakelse Lake bids fair to become one of the great attractions for tourists in the near future. This year many Prince Rupert people have been enjoying a holiday there, and these will all take advantage of the resort in future years. The advantages of the lake is only required to be known to make it a mecca as far as pleasure seekers are concerned.

W. H. Wright, who spent about a week there, returning early in the week is delighted with the place as a resort. He says that J. Bruce Johnston, in the hotel that he has there, has one of the most homelike places that can be found. To stay there is not to live the ordinary hotel life. It is a big home where guests are made welcome at once.

The hot springs have splendid medical qualities and any temperature desired can be got. Baths as hot as one can bear them are obtainable right from the springs. The water carries medicinal qualities and Mr. Wright testifies to the curative pro-

(Continued on Page Four.)

Skugaid Brought In Record Catch Of Fish For Four-Dory Boat

The Chief Skugaid, of the Canadian Fish & Cold Storage Company's fishing fleet, brought in a record-breaking catch of halibut yesterday. She had 80,000 pounds on board. The boat was operating light-handed with only four dories and Capt. Cando and his crew are receiving general congratulations.

There was a considerable amount of fish landed yesterday. In addition to the Skugaid, of the Cold Storage fleet, the Stirratt, Capt. Morrison, with two dories, brought in 28,000.

The Republic brought 56,000, which was sold to the San Juan Company at 7 1-4 cents. The Alliance with 12,000 sold to the New England Fish Company. The Dixie brought in 5,000; the Margalese, 9,000; and the Luladi, 18,000.

A. E. Player, of Hazelton, is in the city for a few days.

VICE-PRESIDENT DALRYMPLE EXPECTED HERE TONIGHT

In Company With G. A. McNicholl, G. T. P. Official Is Returning.

J. E. Dalrymple, Vice-President of the G. T. P., having charge of the Traffic Department, is expected here by this evening's train. He will be accompanied by G. A. McNicholl, Assistant General Freight and Passenger Manager. They have been at Lakelse Lake for a week. The Vice-President will look into some departmental matters here before leaving for the east. It is indifinite when he will leave.

W. T. Muse, who is engaged at Surf Inlet, is here on a visit to his family. He will return to the mining camp in a few days again.

Nearby Islands Are Proving Rich In Mineral Deposits

This district of the Province is ever showing more and more its right to claim to be the richest mining section of British Columbia. All parts are evidently highly mineralized in some way or another, and there are few minerals that are not included among the productions of this district of the Province.

Porcher Island, which lies within view of the City of Prince Rupert, is now producing quite an amount of ore. George Frizzell has a property that is being worked that is producing very rich looking ore. It is a question of development to some extent to prove what the extent of the body is. There are three men working at the cut and a shipment is now ready to be made to the smelter to ascertain the value of it. The ore assays high. It is a copper producer.

There are, in the near vicinity of this, other properties that are being developed along similar lines. One of these is being worked under A. C. Garde. There is every prospect now that the Porcher Island claims will be well worth development.

This is but one example of the riches that lie within easy reach of the place in a mineral way. Gibson Island, only a little farther away, is now being opened up by the Granby Company. It will supply a fluxing ore that is required in connection with the ore obtained from the main workings at the Hidden Creek mine. At the present time a similar ore is obtained near at hand at Anyox, but the values that are carired in the flux that is used now are very low. In the case of the Gibson Island ore, however, the copper values are quite high, so that there is an advantage in using this ore from near here.

"MIDDY" FORTIER WILL JOIN FORESTRY BATTALION

Well Known Auto Driver Offers His Services To The Country.

"Middy" Fortier is going to enlist in the Forestry Battalion and go to the Old Country to do his part. No one is better fitted for the work than he is, for in his younger days in his native province of Quebec, he followed the occupation of a lumberman, driving logs down the rivers in the spring of the year.

The old countries of Europe will not require his services in that way, but he knows the lumbering business throughout, and has also turned his hand to many other lines that will be useful in the work the Foresters will have to do.

If the authorities can make use of him as a driver on an auto truck he is ready and qualified to serve. He will even take his own car if they wish to make use of it.

JOHN LINDQUIST OF HAZELTON DROWNED

Was Crossing Bulkley River When He Met With Accident.

At New Hazelton on Tuesday morning John Lindquist was drowned in the Bulkley River while attempting to cross.

The deceased and H. L. Myers left town on horseback and rode to Twelve Mile where they were to cross. A raft was constructed and the crossing was made, but they missed the landing. The raft was carried down stream. John was in front and caught a tree that was hinging over the water and hung on while the raft and Myers continued down stream. Myers got mixed up in some sweeps and it is supposed that John tried to swim to his assisance. Myers says he got to within a few feet of the raft and went down.

As soon as he got to shore Myers gave the alarm. Search is being continued for the body.

Ald. Montgomery is in the city, He has returned from Anyox for a rest.

UNCONVENTIONAL WAY OF MEETING A GIRL

John Barrymore Will Be Seen In Humorous Drama At Majestic.

There are many ways of meeting a girl for the first time. One of them is to slide into her stateroom in the middle of the night, while arrayed in pajamas, seated securely, if not very comfortably, on your steamer trunk. There are only a very few young men who have attempted this extremely unconventional form of introduction, among them John Baryrmore, who thus wafts his way into the friendship of Helene, the Princess of Okam, in the Famous Players Film Company's presentation of "Nearly A King," in which the celebrated comedian is starred on the Paramount Programme at the Majestic Theatre, Monday and Tuesday.

Having thus been thrust into the presence of the lady by a terrific storm at sea, Barrymore attempts to cover his embarrassment and his pajamas by seizing a quilt. But, unfortunately, it is the same quilt with which Helene is attempting to cover her own embarrassment. This is not the only heart-rending predicament in which Jack finds himself in connection with the delightful Helene. After they have become very deeply interested in each other, Jack is rob-

STEAMER AMUR WILL TAKE ORE TO TACOMA

Rocher De Boule Production To Be Taken At Bunkers Here.

The steamer Amur which is engaged in carrying coke, etc. to Anyox smelter and the hauling of copper from the smelter to Prince Rupert for shipment east will take on a cargo of copper ore here for Tacoma.

This ore will be from the Rocher de Boule mine and will be taken on at the bunkers of the company here.

CANADIAN WORKMEN

(Continued from Page One.)

for cutting the forests is determined by a committee of skilled officers and divided up into so many years, with each series of years representing so many blocks of forest to be felled. The annual cutting is so arranged as to cover a certain extent of ground, so that when one block is felled another reaches maturity."

Our Canadian visitors are struck at the richness and the beauty of our own magnificent stretches of forest. The English Crown woods alone cover about 125,000 acres, with the standing timber valued at anything between two and three million pounds.

PRINCE RUPERT PEOPLE GET INSTANT ACTION

Those who have used it in Prince Rupert are astonished at the INSTANT action of simple buckthorn bark, glycerine, etc., as mixed in Adler-i-ka. Because it acts on BOTH lower and upper bowel, ONE SPOONFUL Adler-i-ka relieves almost ANY CASE constipation, sour stomach or gas. It removes such surprising foul matter that a few doses often relieve or prevent appendicitis. A short treatment helps chronic stomach trouble. C. H. Orme, Pioneer Druggist.

SYNOPSIS OF COAL MINING REGULATIONS.

Coal mining right of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 per acre. Not more than 2,560 acres will be leased to one applicant.

Applications for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5, which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only; but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10 per acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior

SCENE FROM "NEARLY A KING" WITH JOHN BARRYMORE IN THE LEADING PART, AT THE MAJESTIC MONDAY NIGHT.

bed in London and finds himself penniless. Rather than starve, he takes a job as a cabby. While munching his first meal—pigs' feet—he finds himself face to face with Helene, who believes him to be wealthy. He cannot escape and is forced to drive her about London, in mortal terror of her discovering his identity. After many a near-fatality, Jack finally gets rid of his fare without betraying himself.

But there is a later meeting of Jack and Helene, which is frought with entirely different circumstances. Jack bears a startling resemblance to the Prince of Bulwana, whose father is attempting to force him to marry Helene, despite the fact that he never saw the girl. But the Prince is in love with an actress whom he has arranged to marry in London.

Spies, having discovered this, drug the Prince when he arrives in London and, completely deceived by the resemblance between Jack and the Prince, seize the former by mistake. Blindfolded, he is led to Helene and threatened with instant death if he refuses to marry her at once. Little suspecting that it is the girl he really loves, Jack goes through many mental and physical contortions, but finally succumbs to the inevitable and says his little "I do."

However, on a later occasion, he shows himself to be made of sterner stuff, when, again mistaken for the Prince, he is attacked by a number of soldiers. Drawing his sword, Jack makes his stand at the head of a broad stairway and kills every man that braves the ascent. Then, cornered in a blind alley, he deals out death to the enemy until the sudden opening of the door behind him is the signal for a new and still more startling series of adventures.

This is the first time that Barrymore has played two roles in the same production, and those who have enjoyed his previous performances will be doubly delighted with this one. The occasional use of the double exposure brings the comedian on the screen in both characterizations at the same time. It is the most difficult and the most versatile performance which his distinguished actor has yet given the motion picture public.

Suggestions for Successful ADVERTISING

The Best Time To Use Advertising Space

While the successful advertiser makes all times his own, their must of necessity be occasions when there are special advantages in presenting live facts about your goods to the public.

Advantages In Strenuous Times

Did it ever occur to you that in times when money is specially "tight" that the average buyer, and especially the thrifty housewife makes it a point to buy where the best can be got for the money expended? Have you an advantage to offer? Your advertising it will give you far better results than when times are better.

Buying Values Are Investigated

The value of money is appreciated now. Values count and are investigated by the public. This is the time to get full results from those who have good values to offer the public in any line of consumption.

Advertise In The Journal.

THE METHODIST CHURCH

British Columbia Conference — Rev. J. F. Dimmick, Pastor.
Parsonage 632 Sixth Ave. W. — Church, Sixth Ave. & Musgrav Place

MR. HARRY HANSON, "The Reliable Plumber," Prince Rupert, B. C.

Prince Rupert, B. C., April 9, 1914.

I have great pleasure in certifying to the excellent hot water and heating system that you installed in our parsonage, and that after six months of operation through the winter months it has given every satisfaction.

The system heats a thirty gallon tank of water to boiling temperature in one hour after the fire has been started; it in no way interferes with the oven for baking purposes. In addition to this, the wall radiator which you placed in dining-room and connected with the range boiler has given us splendid satisfaction, supplying us with ample heating throughout the winter, saving us the cost of a stove and fuel.

I most heartily testify to the satisfaction and efficiency of your system and gladly recommend it.

Yours very truly,
(Signed) (Rev.) J. F. DIMMICK.

MINERAL ACT.

Certificate of Improvements.

NOTICE.

OTTAWA; IRON CAP; LAKE; MISSING LINK; PHYLLIS FRAC; MONKEY FRAC; DARWIN FRAC; and LOST CHORD FRAC, Mineral Claims, situate in the Skeena Mining Division of Cassiar District.

Where located: Between Hidden Creek and Carney Lake, Granby Bay, B. C.

TAKE NOTICE that I, J. Fred Ritchie, Free Miner's Certificate No. 3,-229C, acting as agent for the Granby Consolidated Mining, Smelting & Power Co. Ltd., Free Miner's Certificate No. 5,005C, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claims.

And further take notice that action, under section 85, must be commenced before the issue of such Certificate of Improvements.

Dated this 15th day of June, A. D., 1916. j21-a21.

J. FRED RITCHIE, Agent.

NAVIGABLE WATERS PROTECTION ACT.

R. S. C. Chapter 115.

Robert Cecil Gosse hereby gives notice that he has under Section 7 of the said Act deposited with the Minister of Public Works at Ottawa, and in the office of the District Registrar of Titles at the Land Registry office at Prince Rupert, British Columbia, a description of the site and the plans of a wharf proposed to be built in the North Skeena Passage, at the mouth of the Skeena River, British Columbia in front of Lot one hundred and seventeen (117), Range five (5) Coast District, British Columbia.

And take notice that, after the expiration of one month from the date of the first publication of this notice, Robert Cecil Gosse will, under Section 7 of the said Act, apply to the Minister of Public Works at his office in the City of Ottawa for approval of the said site and plans, and for leave to construct the said wharf.

Dated at Prince Rupert, B. C., this 27th day of May, 1916. m28-j28

ROBERT CECIEL GOSSE.

No Need To Send Away For Jewelry

If Prince Rupert people will deal at home they will find our price about the same as elsewhere for equal quality, as our freight bills are not heavy, and home dealers will be encouraged to keep proper stocks.

Let us compare, for instance, Eaton's price, $5.70 on a 7 Jeweled Waltham. Our Price is $6.00, but it is worth the 30c to see what you are getting when you want it, and have it guaranteed right here.

Take also the highest priced Waltham, a 23 Jeweled Vanguard at $44.60. Our Price is $45.00. Not very much difference.

Many articles, of course, are not so easily compared, and are made in many qualities and often look big for the money in the catalogue.

Production and Thrift

CANADA'S CALL FOR SERVICE AT HOME

Produce More and Save More — The Empire needs food. If you are not in the fighting line you may be in the producing line. Labour is limited—all the more reason to do more than ever before. Grow food for the men who are fighting for you. The Allies need all the food that you can produce. Every little helps. You are responsible for your own work. If you cannot produce as much as you would like, produce all you can. Work with the right spirit. Put fighting energy into your effort and produce now when it counts. The more you produce the more you can save. Producing and saving are war-service.

Make Your Labour Efficient — In war-time do not waste time and energy on unimportant and unprofitable work. Economize labour. Put off unproductive work till after the war, and, if possible, help in producing something needed now. Let us not waste labour. Canada needs it all. If possible help to feed the Allies. Make your backyard a productive garden. Cultivate it with a will. Make your labour count for as much as possible.

Do Not Waste Materials — There should be no waste in war-time. Canada could pay the annual interest on her war expenditure out of what we waste on our farms, in our factories, in our homes. Every pound of food saved from waste is as good as a pound of increased production. The way for a nation to save is for every individual to save. France is strong to-day because of thrift in time of peace. The men and women of Great Britain are not only "doing" but are learning to "do without."

Spend Your Money Wisely — Practise economy in the home by eliminating luxuries. Wasting our dollars here weakens our strength at the Front. Your savings will help Canada to finance the war. Save your money for the next Dominion War issue. There can be no better investment.
