JUL 15 1904
VICTORIA B. C.

THE SLOCAN DRILL.

Prov. Library. jan 1 03

VOL. V., No. 16. SLOCAN, B. C., JULY 15, 1904. $2.00 PER ANNUM.

Fruit, Confectionery, Tobacco

You can get anything in these lines that you require from us. Our stock in each is always kept fresh and well assorted. We handle the best the market affords. Prices are right.

A. C. SMITH, SLOCAN

ARLINGTON HOTEL,

J. W. Crow, Proprietor.

THIS Hotel is one of the best known and most popular houses in the country. It is located adjacent to the depot and the wharf, and commands a magnificent view of the beautiful Slocan lake. Good fishing is to be found close at hand, while every facility is offered for boating.

Tourists will find the Arlington and ideal resting place.

Commercial men have at their command new and commodious sample rooms.

The dining room is strictly up to date and the bar supplied with only the best brands of goods.

MAIN STREET, - SLOCAN, B. C.

Stock-taking Sale.

To clear before stocktaking, the following reductions have been made; they are bargains:

Pink and Blue Wrapperette, bordered, was 25 now 15
pieces Flannelette, was 12½ and 15 now 8
pieces figured Sateen, pink, blue and green, was 25, - - - now 15
pieces figured Dimity, pink, was 35, now 20
piece blue Batiste, was 20, - now 12½
piece champagne Batiste, was 30, now 20
piece Bar Muslin, was 15, - now 10

David Arnot, Slocan.

Agent for Slater's Shoes, the best in Canada.

Advertise your Business

in these days of progress and competition no man in business should neglect an opportunity to keep his goods before the people. Modern usages proclaim advertising the one road to success; neglect of it invariably ends in disaster. A merchant's standing in a community may be judged from the advertisement he carries in a local paper. To sell goods a man must advertise. All live men seek the aid of the printer

The Drill offers a reward to all persistent and liberal advertisers: it is read by everyone. It guarantees satisfaction to all who advertise

THE DRILL, $2 per year

DEAL ON BLACK PRINCE

PIONEER MINING CO. MAKE AN INVESTMENT.

Paid Cash for One Claim and Another Partially Acquired—Bond on the Balance of the Group—Large Force to be Employed During Winter.

A real bona fide deal has gone through, or partially so, in the camp. It is the first in many a long day. Others have been announced, but when it came to a showdown failed to deliver the goods. The deal in question is in connection with the Black Prince group, at the head of Springer creek, which has been acquired by the Pioneer Mining Co., who are operating the Bank of England alongside.

The company has bought the Black Prince fraction outright, paying $4000 cash therefor. They are now negotiating for the Slocan Prince adjoining, and have secured a part of the interests on a basis of $8000. J. C. Shook, of Peterborough, Ont., and R. Bradshaw, Toronto, own the other interests and they are being negotiated for. The two claims have had the bulk of the work for the group done on them, and in securing them the company bought out the existing lease, paying the holders wages to date and buying the ore on the dump. The owners are applying for a crown grant on the Slocan Prince, and upon the delivery of title the purchase money will be paid over. The Black Prince fraction is crown granted. The vendors in the claims are J. C. Shook, R. A. Bradshaw, D. Arnot, Leo Doiron, Con Murphy and John Elliot.

At the same time the company has partially acquired the other claims in the group on a bond, being the Four Friends, Doirest, Summerseith and Dundee, papers for some of the interests having been signed. All these claims will be worked in conjunction with the Bank of England, under the management of J. Moffat.

In purchasing the lease the company gain a strong foothold and can now work to advantage. They have in contemplation the building of a sleigh road to the property, and the employment of 35 or 40 men this winter, resulting in much ore being shipped. Five men have already been put on to work the Prince ground, and later on this number will be increased. Work is still being maintained on the Bank of England. If the Pioneer Co. is successful in securing all interests in the Prince group and the Two Friends, they will have a combination second to none in the camp and one of the best in Kootenay.

Important Works for Trail.

The Canadian Smelting Works at Trail will inaugurate a new industry in Canada by manufacturing the completed lead products. The machinery is now at the smelter to manufacture lead pipe and the smelter will be in the market with the pipe in 30 days. Plans are being prepared for sheet lead machinery, another important branch of the industry. Contracts are about to be closed for corroding works, to be located in Montreal, with the prospect of a small branch corroding plant at Trail, to supply the western market. The total estimated outlay for the manufactories is $100,000. The smelter is handling 600 tons of gold-copper ore daily and 100 tons of silver-lead ore and concentrates. The management is blowing in the No. 2 lead stack, doubling the capacity of the plant. The refinery is turning out 11 tons of lead daily, and that amount will be increased to 25 tons on the arrival of a carload of acid now in transit. The smelting plant is employing 350 men.

A Severe Storm.

A severe windstorm occurred here on Thursday afternoon, accompanied by rain. The tug Sandon was caught with the barge and forced on to the rocks in Bannock bay, below Silverton. She was pulled off by the Slocan, her damage consisting of a badly sprung and weakened bow, but the vessel was able to reach this port under her own steam. H. P. Christie's boathouse was knocked out of shape by the big waves, and that of Woodcock & Arnot had the end doors battered in. The railway wharf was sadly wrecked and the transfer slip jammed and put out of business for a day or two. Telegraph wires were prostrated in all directions.

Meat Market Changes Hands.

Once again the meat market in this town has changed hands. On Saturday night R. E. Allen disposed of his business to Harvey Aitchison, having been engaged in it for less than three months. The new proprietor takes possession at once.

Mill Company Heard From.

City Solicitor Jorand has received a reply from Mr. Lavallee, of the O. S. Lumbor Co., Orillia, Ont., re the intention of the company as to completing their plant here. Mr. Lavallee stated the company would hold a meeting in a few days, when a decision would be arrived at in the matter. The result will be promptly made known to the city authorities.

BOARD OF TRADE.

Re-organization Meeting Held Last Friday Evening.

Pursuant to call a public meeting was held in the city hall, Friday evening, under the auspices of the board of trade, H. R. Jorand being chairman and H. D. Curtis secretary. Owing to the fact of so many of the members and officers of the old board having removed from town, it was decided to re-organize the body, which was accordingly done, with these officers: President, A. C. Smith; vice president, John Anderson; sec.-treasurer, H. D. Curtis. These three with T. McNeish and D. Arnot will comprise the executive committee.

Mr. Jorand explained the reason of the meeting, which was, in brief, the increased freight rates imposed by the C.P.R. on freight consigned to interior Kootenay. It was necessary now to gather all the available data on the subject, and to back up the other towns in laying the proper complaint before the railroad commission. Short talks were also given by Messrs. Dick, Curtis, McVannel and McNeish, the latter stating that Kaslo and Sandon had appointed Mr. Giegerich to act for them before the commission.

On suggestion from Mr. Dick, the executive were empowered to appoint a delegate to act with the boards of trade in other towns. The executive was next instructed to draft bylaws for the re-organized board, membership to which was set at $1 per year. The secretary was ordered to gain the consent of the members of the old organization to turn their books and funds over to the new board. The meeting then adjourned till Friday, the 15th.

Had a Strenuous Time.

James Baker, the B.C. member of the executive of the Western Federation of Miners, got back home here on Friday, after a two or three months' sojourn in Colorado. Owing to the military rule in the Cripple creek district, resultant upon labor troubles, the officers of the Federation have been leading a strenuous life. The whole aim of authority in that state is to crush out unionism. Since arriving home Jim has learned that the Colorado people have a warrant out for his arrest. Wonder why they delayed so long, for he was easily come-at-able.

High School Exams.

Following are the results of the recent high school examinations, with the pupils writing at New Denver:

Nakusp—No. candidates, 3; passed, 1. Annie G. Morrison, 613.

New Denver—No. of candidates, 4; passed, 0.

Sandon—No. candidates, 1; passed, 0.

Silverton—No. candidates, 5; passed 4. Sarah A. Lawson, 675; Margaret Barclay, 662; Alice Martin, 653; Janette Barclay, 578.

Slocan—No. candidates, 3; passed, 1. Donald M. McGregor, 572.

Tax Sale is Near.

The time is drawing near for the holding of the tax sale for delinquent lands in the city, the sale being held at the city hall on Monday, the 25th. Several of the individual parcels have been redeemed, but nothing has yet been heard from the townsite people. There will be numerous buyers at the sale, many individuals seeking to buy desirable locations at a cheap figure. The sale offers a splendid investment to prospective buyers, as the interest assured is six per cent if the property is redeemed; failing that, a clear title.

Silver Quotations.

Following are the quotations for bar silver on the various days during the week since last issue:

Thursday	58⅝ cents
Friday	58¼ "
Saturday	57⅝ "
Monday	57⅝ "
Tuesday	58¼ "
Wednesday	59⅛ "

A Local Case.

At Nelson on Monday a local case came before Judge Forin in chambers. It was that of Branchette vs Provost and two other actions against Provost. Application made for payment of money out of court. Lennie for McNeish, assignee, asked for a reference. O'Shea for plaintiffs contra. Enlarged until Monday.

Local Silver to China.

Last week the Trail smelter made the heaviest shipment of silver in its history. The shipment consisted of 70,000 oz of metallic silver, worth 58 cents per oz, or $40,600 in the aggregate, and it all went to China. It assayed .989 pure, having been refined by the electrolytic process.

LABOR DAY CELEBRATION.

Citizens Decide on Holding Sports on 5th of September.

Slocan will celebrate Labor Day, Sept. 5, and all the towns in the country are invited to join in and make the event a huge success. Two years ago Labor Day was celebrated here and it was the best affair of the kind ever held in Kootenay, but this time the citizens are laying themselves out to go one better.

On Friday evening the idea of celebrating was mooted at the board of trade meeting, resulting in a public meeting being called for Tuesday afternoon. At that time an executive and canvassing committee was appointed, consisting of T. J. Baty, A. Stewart, H. A. Hicks, M. Lavell and A. Madden. In the evening a general meeting was held, when the committee reported subscriptions received of $346, which have later been increased to $600. T. McNeish was appointed permanent chairman and D.B.O'Neail secretary. Several talks were made on the celebration and much enthusiasm was evinced.

The programme of sports so far drafted out is an attractive one. A drilling contest for substantial prizes will be held, football tournament for $75 championship cup, baseball match for handsome challenge cup, rifle match between Slocan and New Denver, general Caledonian sports, foot races, bicycle races, and a ball in the evening. Each one of these events will carry good prizes, sufficient to attract outside talent.

Steps have been taken to have all the Labor bodies of Kootenay join in the celebration, with every prospect of success. The C.P.R. will assist the committee in arranging special train and boat services from all points, with corresponding low rates.

Almost a Drowning.

Nelson newsgatherers seemed to have slipped a cog last week, as no mention was made by them of what might have been a drowning accident a few miles from that town. The wife and children of a well-known citizen of the county town are summering on the lakeshore. One day last week two of the children, a boy aged about six and a girl aged two, were playing at the water's edge. The latter ventured out too far and the water swept her off her feet. Her screams hurriedly brought the mother to the rescue, but before she could reach the child, the little boy had rushed in and grabbed his sister as she went under. He dragged her to shore and, as she was choking, he pounded her on the back. Upon his mother asking him why he did that he replied: "Well, didn't I tell you she was choking, and when I pounded her lots of clear water came up out of her mouth." Undoubtedly the boy's prompt action saved the tot's life. Such forethought is remarkable in one so young.

Sunday School Picnic.

A meeting of those interested in the Sunday school was held in the Presbyterian church on Wednesday. It was decided to hold the annual picnic next Thursday afternoon, July 21, in the grove near the Y. All the children will meet at the church at 1.30, preparatory to marching to the grounds. Parents and friends are asked to prepare baskets for the occasion, and ice cream will also be provided. A pleasant outing is assured.

School Attendance for Year.

Following is a report of the attendance of both divisions of the public school for the year 1903-4: No. of pupils enrolled, 77; boys, 33; girls, 44; average for whole year, 47.73. Owing to the great falling off in pupils, the trustees will endeavor to run the school with one teacher. With the two the cost to the city is about $1000 a year over and above the government grant.

Arlington Arrivals.

Out-of-town visitors at the Arlington hotel during the week were: W. McIntosh, N. F. McNaught, Silverton; J. Davitt, Three Forks; E. Johnson, Revelstoke; J. C. Carruthers, W. Hill, Nelson.

Drowned Near Golden.

Alex. Fraser, watchman on the government dredge on the Columbia river near Golden, was upset from a canoe on Saturday and drowned. He came from Araprior, Ont., and was 65 years of age.

The mill people loaded their 14th car of shingles yesterday. It was billed to Newcastle, Ont.

Incendiaries caused a $100,000 fire at Port Moody on Friday.

OUR ORE SHIPMENTS

SUBSTANTIAL SHOWING MADE BY THIS DIVISION.

Last Year's Shipments Were 1339 Tons—A Healthy Evidence of the Life and Wealth of the Camp—Enterprise the Biggest Shipper.

A new property for the season appeared in the shipping list for the week, being the Alberta, which sent out 15 tons to the Nelson smelter. To the same place went also 5 tons from the Port Hope. The Ottawa added 66 tons to its total, making the total for the week 86 tons. Nothing was handled from Ten Mile this week, though both the Enterprise and Neepawa have shipments ready to go out. To date shipments total 964 tons.

For 1903 the ore shipments from the local division amounted to 1339 tons, made up from 17 properties. Following is a full list of the shipments this year to date:

MINE.	WEEK.	TOTAL
Enterprise		420
Ottawa	66	417
Neepawa		36
Port Hope	5	17
Republic		32
Black Prince		35
Sapphire		2
Argentite		5
Black Fel		2
Chapleau		3
Alberta	15	15
	86	964

MINES AND MINING.

Rossland mines last week handled 4789 tons.

Sandon's mines last week handled 121 tons of ore.

A 14 day cleanup of the Queen mill at Salmo, yielded $2900.

The furnaces of the Granby smelter have again been blown in.

The packers are busy removing ore from the Kilo to the Chapleau stamp mill.

In June the Nelson smelter handled 3,771,921 pounds of lead ores, or 1885 tons.

The record office did some business last week, 35 assessments being registered.

One man is employed on the Hampton running a short crosscut to meet the lead.

Several hundred feet of air pipe went up to the Ottawa and the Bank of England on Saturday.

Owing to the shutdown of the Granby smelter, Boundary ore shipments last week fell away to 6830 tons.

The lessees of the Alberta got their ore away to Nelson on Wednesday. The Port Hope consignment went with it.

Connection has been made at the Myrtle in the raise between the tunnel and the shaft. It took six hours for the water to drain out.

It is not hot air this year about the Rockland, on Eight Mile. Men have started to work on the property and everything points to steady operations.

Prof. Parks has reported favorably on the mineral resources of the south fork of Kaslo creek. It will now be in order for the Great Northern to build a branch line thereto.

D. Graham and J. Skinner have located two claims on a big ledge on the Twelve Mile-Ten Mile divide. It is 100 feet wide and carries stringers of galena, zinc and copper.

CULLINGS.

Phoenix will celebrate Labor Day.

Spokane is running out the vags; look out for them.

The jam of driftwood against the upper bridge over the river has been removed.

W. Koch shipped several cars of lumber this week to Creston for the Alice concentrator.

Mrs. S. Y. Brockman and young son departed Tuesday morning on a holiday jaunt to the coast.

Mrs. R. E. Allen and children and Mrs. McKay left on Saturday morning on a visit to New Westminster.

A division of Railroad Conductors has been formed at Nelson, with D. Mackay president, and J. Bradshaw, sec.-treasurer.

Mrs. Boland, who has been visiting her sister, Mrs. Wm. Hicks, for some time, left with her children on Saturday for Seattle.

The dominion government is paying the time checks issued by the defunct firm of Carlson & Peterson, on account of the construction of the Lardo railway. It loosens up several thousand dollars.

The Midwinter Knight Errant

By CLINTON DANGERFIELD

Copyright, 1904, by J. B. Mitchell.

"Yez will be after findin' 'em split into kindlin' wood some day," said Nora maliciously, regarding Hammish's treasured blocks with an evil eye. The position of general slavey in a cheap tenement does not improve one's temper. "Do yez think yez can be keepin' a mess of chips to play wid when we all do be sufferin' crool for coal?"

"Don't know nuffin' 'bout coal. Don't care," retorted Hammish sturdily. Five years old and gentleman unafraid was he.

Presently he bethought him to visit his special friend, the little seamstress on his own floor. Concealing the precious blocks, he trotted off to her room and, getting no answer to his knock, pushed open the door and went boldly in.

Why had Maida let her fire go out? He snuffed the biting air doubtfully, wondering where she was. Then he discovered her in a drawn heap on the bed. The thin blankets were huddled over her. On top were piled her threadbare jacket and the wrapper she had been making for a firm.

Hammish went to the bedside.

"Is you sick, Maida?" he asked petulantly. He did not like sick people.

The girl opened a pair of great violet eyes and regarded him.

"Not sick," she said slowly; "jest cold. I'm freezin' to death. It's taken so long I hope 'tis come at last!"

"Does freezin' to death mean you goin' to die?"

"Yes." The blue lips scarcely shaped the word, but he caught it. It distressed him greatly by virtue of knowledge newly learned from the resourceful Nora, who had been trying to frighten the child with stories of death's grim paraphernalia. He seized her shoulder in his baby hands and tried to shake her.

"Don't die!" he cried piercingly. "You said Jack was comin' home to marwy you! How can he marwy you if you is dead? Do you fink he would dig you up?"

"Oh, Hammish," said the girl very faintly, "please go away! It will be long, so long, before he comes. I cannot live till then. And they told me there was no more work after this. When Jack comes tell him I wasn't afraid of—the grave. It must be warmer down there."

Conscious that he was growing very cold himself, Hammish, fired with a sudden resolve, made for the battered coal scuttle. He would make a fire himself.

For if Jack came home and had to dig Maida up might he not hold him (Hammish) responsible? How often Maida had told him proudly of her big, warm hearted sailor who was coming across the great seas.

"And I was in no such place as this when he knew me and courted me," she would say more proudly still. "Mammy and I had a little house of our own." Then with a droop of her tired lids: "But when she died after being sick so long it was hard, so hard, to make bread. You don't know how hard, little Hammish, but it will be your turn some day."

"Don't care," Hammish was wont to reiterate scornfully. "Will take my turn all right. Shall be a man."

But now he felt vaguely that a man's responsibility rested on him long ere he had looked for it, for the battered scuttle was utterly empty. There was nothing in the pitifully bare room out of which the tiniest fire could be made. In his search he lifted the faded curtain which covered the box termed a pantry. Not a fragment of food was within. It dawned on Hammish that if there was no food as well as no coal Maida might be hungry. Again he attacked her imperatively.

"Has you eat you dinner?"

"Go away, Hammish," repeated the girl. "How could I eat? There—was—nothing."

Now, indeed, the puzzled knight errant faced a complex situation. His mother, the deus ex machina who always remedied all wrongs, would not return until sunset. How long did it take people to die? Would Maida really die before his mother's return just because she was cold? Of whom could he take counsel? He knew no one but his enemy, Nora.

He waylaid her in the corridor.

"Oh, wait!" he cried. "Please wait! How long does it take people to freeze?"

"No time at all," said Nora scornfully, "ye little fool, ye!"

"And then"—

"Then they dig a cellar of a hole an' slap 'em into it!"

She whisked on down the corridor, and Hammish went wearily to his own quarters and stood before the fire thinking.

For he was now facing the great problem of self sacrifice which all of us meet sooner or later. Either he must burn his beloved blocks or Maida must freeze. Either he must warm his milk for her by the block fire or Maida must go hungry. If he did these two deeds, he would lose his playthings and his supper.

The girl on the bed took no heed of passing time. She was in the last sleep before death, which the frost king fills with exquisite mirage.

Then something troubled her. A voice was calling, calling, insistently, angrily, and with the voice floated a smell of something burning. Then a shrill wail made her open her eyes in earnest. She sat up to discover Hammish dancing frantically around a fire of blocks in the grate, on which boiled a tin cup of milk, now running over the edge.

"Dweadful smell, isn't it?" he shrieked excitedly. "Come quick! Hurry!"

She stumbled out somehow—the child must be attended to—and presently found herself swallowing the hot milk Hammish manfully forced on her. It brought new life to her veins, and she understood the miracle of the fire and food.

"Oh, you darling!" she wept, clasping him closely.

Hammish tore himself loose.

"You are cwyin' all over me," he said, with masculine disapproval. "Was the milk too hot in you' stummick?"

As they crouched together by the fire they did not hear a knock at the door until it was twice repeated.

Then it was Hammish who shouted "Come in," Hammish who faced the stranger and Hammish who yelled shrilly with pleasure as he discovered the sailor uniform and saw the little gray parrot perched, falconwise, on the sailor's wrist.

The knight errant stood with feet apart, as though the deck heaved under him, and shouted triumphantly:

"He's done come—an' you won't have to be dug up neither."

A magical hour followed, for those foolish two under Hammish's eyes forgot everything but each other. He had the gray parrot and the stranger's pockets to himself, being given permission to explore them, while the fire, extravagantly replenished, shot up and crackled gayly.

To the strange things his investigations produced the brown haired seamstress paid no attention, for the golden dream of love was reality—the hoping, the faithful waiting, had not been in vain. And when love must put aside human despair in order to enter his own kingdom he becomes radiant with a beauty that those who have not endured much for his sake never see.

Next morning Hammish ate his breakfast with great gusto, for a big basket of various fruits was in the little pantry and he himself was allowed a huge yellow orange.

Nora helped clean off the table, coming in for a share of fruit, and then remarked crossly:

"Be after rememberin' to kape yer ould blocks out of my way or it's burnin' em I'll be."

Hammish swallowed hard. One solitary tear splashed on his pinafore.

They are burnt a'ready," he said with stern dignity, for he felt bitterly that this was Nora's triumph.

"It's lyin' you be," retorted Nora.

Here at least he could prove her wrong. He threw wide the play cupboard door, entering to confront her dramatically with its drear emptiness. But, oh, miracle! From the ashes of the burned blocks had arisen such cubes and squares as he had not deemed possible. He saw from his mother's smile that they were his—all his! With a shout he sprang at them, and Maida and Jack were forgotten as swarms of soldiers manned new forts or thronged to wild attack.

Breaking It Gently.

Danny O'Brien worked on the section and was as tender hearted a man as ever got drunk and cracked a pate with a shillalah. At the time of Pat Dumphy's great misfortune Danny was chosen by the section gang to break the news gently to Mrs. Dumphy.

"Good marnin', Mrs. Dumphy," said he. "Did ye hear about Pat?"

"I heard nothing about him since breakfast," she answered.

"Did he seem to be all right, then?"

"Sure he did."

"Ye noticed nothin' wrong wid his mind?"

"Nothin' at all. Phwhy de ye ask?"

"Well, I hear that his mind do be wanderin' a little."

"An' phwhat do ye mean be that?"

"I mean he have lost his reason, Mrs. Dumphy."

"Lost his reason, is it? An' how did he do that?"

"Well, Mrs. Dumphy," said Danny, scratching his head, "I don't know exactly. Ye see, I wasn't close by whin it happened. But I do be hearin' from the rest o' the b'ys that he fell across the track, an' a train cut his head off."—Brooklyn Eagle.

Scottish Trade In 1590.

Some idea of the miscellaneous trade carried on by a Scottish merchant in 1590 may be formed when it is stated that David Wedderburne exported wheat to Spain, herring to France, powder to Rouen and Bordeaux, salmon to Flanders, cloth to Norway and "woffin beddis cloth" to Sweden. In exchange for these he imported wines, "Clarit, Burdeaux, Alagant, Muskedallis and quhyt wine," from France and Spain, "apels and unzeons" from Flanders, lint from Norway and Sweden, silk, velvet, vinacre, "oly doly" (olive oil) from France, "pentit brods owergilt" (pictures) from Holland, silk "grew grain," confectionery and "sucher candee" from Flanders, "murmblade" from Spain and countless other commodities intended rather for the upper classes than for the craftsmen.—Scottish Review.

If You Would Live.

If your name is to live at all, it is so much more to have it live in people's hearts than only in their brains. I don't know that one's eyes fill with tears when he thinks of the famous inventor of logarithms, but a song of Burns' or a hymn of Charles Wesley's goes straight to your heart, and you can't help loving both of them, sinner as well as saint. The work of other men lives, but their personality dies out of their labors. The poet who reproduces himself in his creation as no other artist does or can goes down to posterity with all his personality blended with whatever is imperishable in song.—Oliver Wendell Holmes.

HUMOR

A PUZZLER FOR HIM.

An Episode In the Domestic Life of Mr. and Mrs. Mudley.

"I don't seek your confidence enough, Matilda," said Mr. Mudley, who was experiencing one of his periodical spasms of reform. "Hereafter I want you to consult me about all your little troubles and affairs. I wish to take an interest in everything that interests you. Come to me with your doubts. Confide in me."

"Oh, Henry, how sweet of you!" exclaimed Mrs. Mudley. "I have always wished that we were nearer together—that I could consult you and lean upon you, as it were."

"Well, hereafter always come to me," benignly enjoined Mr. Mudley as he opened the evening paper.

A few moments later Mrs. Mudley ventured, "Henry, dear."

"Yes, my love."

"May I ask your opinion about something?"

"Why, certainly, my dear," said Mr. Mudley, sitting up straight and assuming a judicial cast of countenance. "What is it, my love?"

"Would you make this waist of maize peau de cygne, with the bertha of point d'esprit, trimmed with ruches of taffeta, or would you have the yoke cut gules on the bias, with cuffs of cream venetian over white mousseline?"

"I believe I'd have it the first way, Matilda," gasped Mr. Mudley as he looked about for his hat. "Guess I'll go down to the club for awhile."—Philadelphia Bulletin.

Took It Calmly.

One Sunday recently a lady went into a church in a town to which she was a stranger and asked to be shown to a seat. The sidesman conducted her to a back seat in the gallery, the only other occupant at the time being an old gentleman, who rose to let her pass. It was somewhat dark, and the lady as she shook her skirts and settled down had a horrible suspicion that she was sitting on something besides the cushion. She put out her hand and drew forth the sad remains of a silk hat.

"Oh," she said to the old gentleman, "I beg your pardon. I'm so sorry."

The old gentleman looked at the melancholy ruin and replied that it could not be helped.

"Oh, it's truly generous of you to say so," said the lady, "but I'm afraid you're angry."

"Not in the least," said the old gentleman, straightening out the hat and placing it under the seat." You see, it's not my hat. It belongs to Mr. ——, who showed you in!"—Tit-Bits.

Important if True.

Miss Knox—I'm told your husband, under the influence of the wine at that dinner the other night, declared he had "married beauty and brains."

Mrs. Bridey—Well, well! How nice!

Miss Knox—Nice? Aren't you going to investigate? Evidently he's a bigamist.—Philadelphia Press.

As It Usually Happens.

Barnes—They say that Widow Oueeds' husband wasn't much of a man.

Howes—No, I don't think he was, but he'll get a splendid character from Mrs. Oueeds when she marries his successor.—Boston Transcript.

Considerate.

"I see that you have the villain hissing defiance every two or three pages," said the stage manager.

"Yes," answered the playwright wearily. "When it comes to hissing I want the villain to have a good start on the audience."—Washington Star.

Reflection on Him.

The author of the remark, "Time will tell," was confronted by Time himself.

"Look here," said the old gentleman, "don't you know you will get people all mixed up about me? I'm no woman."—Judge.

It Was Not His Fault.

"See here. Your teacher says you're at the foot of your class."

"But, ma, mebbe she counts from the wrong end."—San Francisco Examiner.

Successful In a Way.

Blinker—You say he is a successful business man, yet he doesn't support his wife.

Thinker—Of course, he makes her father do it.—Yonkers Herald.

A TIME SAVER FOR COMPOSITORS.

THE ROUSE JOB STICK

Dr. Giuseppe Lapponi

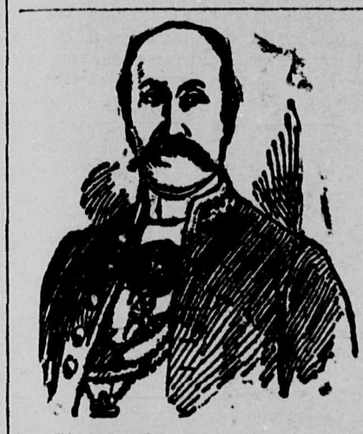
Physician to the Pope Praises Dr. Williams' Pink Pills.

In Four Cases of Anaemia Their Effects Were So Satisfactory That He Will Go On Using Them.

Dr. Lapponi, whose skill preserved the life of the late Pope Leo XIII to the great age of 92, and to whose care the health of the present Pope, His Holiness Pius X., is confided, has written the remarkable letter of which the following is a translation:

"I certify that I have tried Dr. Williams' Pink Pills in four cases of simple Anaemia of development. After a few weeks of treatment, the result came fully up to my expectations. For that reason I shall not fail in the future to extend the use of this laudable preparation not only in the treatment of other morbid forms of the category of Anaemia or Chlorosis, but also in cases of Neurasthenia and the like."

DR. GIUSEPPE LAPPONI.



Dr. Giuseppe Lapponi, Physician to the Pope, who has written a letter in praise of Dr. Williams' Pink Pills for Pale People

It would be impossible to exaggerrate the importance of this opinion. Dr. Lapponi's high official position places his professional competence above question, and it is certain that he did not write as above without weighing his words, or without a full sense of the effect his opinion would have.

The "simple anaemia of development" as referred to by Dr. Lapponi is of course that tired, languid condition of young girls whose development to womanhood is tardy, and whose health, at the period of that development, is so often imperilled. A girl, bright and merry enough in childhood, wil in her teens grow by degrees pale and languid. Frequent headaches, and a sense of uneasiness which she cannot understand, makes her miserable. Just when it is time for her to leave off being a girl and become a woman—a change which comes to different individuals at different ages—her development lingers—why? Because she has too little blood. That is what Dr. Lapponi means when he speaks in the scientific language natural to him, of "the anaemia of development." Dr. Williams' Pink Pills for Pale People have the power of making new blood They cure anaemia just as food cures hunger. That is how they help growing girls, who, for want of this new blood often drifts into chronic ill-health, or "go into a decline"—which means consumption—and die. Dr. Williams' Pink Pills could save them.

The value of Dr. Williams' Pink Pills as a nerve tonic, referred to by Dr. Lapponi, makes them valuable to men as well as women. They act on the nerves through the blood and thus cure diseases like St. Vitus dance, neuralgia, paralysis and locomoter ataxia. When buying these pills it is important to see that the full name Dr. Williams' Pink Pills for Pale People is printed on the wrapper around each box. Never take a substitute, as it is worse than waste of money—it is a menace to health. If you cannot get the genuine pills from your dealer write the Dr. Williams' Medicine Co., Brockville, Ont., and the pills will be sent you post paid at 50 cents a box or six boxes for $2.50.

Nelson's Mishap.

This is an entry from the journal of the surgeon of the British warship Theseus (the dates are from July and August, 1797): "July 24 and 25—Admiral Nelson. Compound fracture of the right arm by a musket ball passing through a little above the elbow, an artery divided, the arm was immediately amputated and the following given him: R Opi gr ij. ft. Pil. statim. s., etc. 26 July—Rested pretty well and quite easy. Tea, soup and sago. Lemonade and Tamarind Drink. 31 July—One of the ligatures came away; looks well. 1 August—Continued getting well very fast, stump looked well, no bad symptoms, sore reduced to the size of a shilling."

AN IDEAL FISH.

Mohawk Chubs Are Graceful, Slim and Elegant Creatures.

There are in some clear, cold streams of the north certain fish known locally as "Mohawk chubs." These fish are the ideal fish in shape and color—graceful, slim, elegant creatures, pure silver except on the dorsal ridge, which is the tint of oxidized silver. They are tender mouthed and remind me somewhat of the grayling, although they have not the great dorsal fin nor the fragile mouth of that fish. They often inhabit trout waters, and I have an idea that trout feed on the smaller ones, although I have no absolute proof that this is true. I know, however, that pickerel, muskellunge and black bass strike at them eagerly.

These fish rise to a fly and are often quite as gamy as grayling. Often and often I have struck them in trout waters and have found them interesting fighters when tackle is light and water cold and swift.

Animals and birds appear to be very fond of them, or at least are often seen eating them, perhaps because they may be easier to catch than trout. Where Mohawk chubs are, herons and kingfishers congregate. The only time I ever saw an osprey in that region was once when whipping that stream. The osprey dashed down within a rod of me and seized a Mohawk chub that must have weighed a pound at least, bearing him up out of the pool and away across acres of swamp toward the distant forest.—Robert W. Chambers in Harper's Weekly.

BUCHAREST.

The Capital of Roumania Is a Sort of Miniature Paradise.

Though all Bucharest is modern, we find the old eastern methods of mercantile construction—little open cupboards lining the road, dealers squatting among their wares, literally at the receipt of custom, for they make no effort to invite it, and the various trades huddle together, here an armory of rude pottery, richest green and richest red; there an arsenal of thick leathern sandals, a heavy patch of burnt umber; yonder an avenue of black sheepskin caps set out upon brass stands, in appearance like peasants' heads after a massacre. Out in the streets are high hillocks of golden grain, pyramids of pumpkins and blazing piles of scarlet chillies. At intervals little congregations wait with laughing philosophy until they shall be hired—builders with their hods, laborers with their spades, all with the emblems of their toil. Bucharest may be summed up as a city of pleasures and palaces, a metropolis of perpetual carnival, a temple of boisterous joviality. Her engaging people combine the color, the grace and the hospitable instincts of the east with the comfort and convenience of the west. Every instant spent among them yields a quintessence of life and joy and warmth and color. A small Paris indeed? Nay; 'tis a little paradise.—Herbert Vivian in Saturday Review.

Ant Colonies.

An ant nest or colony arises from eggs laid by one or more "queens." The developing young are tended by the sexless neuters, or "workers." The maggots, or larval ants, are fed by them, often nourished out of the nurses' mouths, and are as carefully watched in respect of the temperature and other conditions of the nurseries as are infantile human beings. When full development occurs the pupae change into ants, which are either winged or wingless. The latter are the "neuters," or workers. They may develop big jaws and appear as the "soldiers" of the colony. Those which are winged are the founders of new colonies. They are of both sexes and they produce the eggs whence the new generations will be evolved.

Purchase of Wives.

Wives are still obtained by purchase in some parts of Russia. In the district of Kamyshin, on the Volga, for example, this is practically the only way in which marriages are brought about. The price of a pretty girl from a well to do family ranges from $100 to $200, and in special cases a much higher sum is obtained. In the villages the lowest price is about $25. It is customary for the fathers of the intending bride and bridegroom to haggle for a long time over the price to be paid for the lady. A young farmer whose father cannot afford to pay for a wife for him need not think of getting married.

Unprotected.

The stage manager catches one of the actors smoking behind the scenes.

"Here! You can't smoke on the stage!" he says.

"What's the odds? The scenery is fireproof."

"But you're not."

As the actor discovered when he got his two weeks' notice.

Canada received 123,364 immigrants in 1903.

Canada has received 244,892 immigrants in the last three years.

Minard's Liniment Cures Diphtheria.

Canada's immigration for 1903 was nearly double that of 1902.

Sixty per cent. of the immigration of 1903 was agricultural in its character.

ITS POWER GROWS WITH AGE.—How many medicines loudly blazoned as panaceas for all human ills have come and gone since Dr. Thomas' Eclectric Oil was first put upon the market? Yet it remains, doing more good to humanity than many a preparation more highly vaunted and extending its virtues wider and wider and in a larger circle every year. It is the medicine of the masses.

Two-thirds of the immigrants of 1903 speak English.

Canada's centre of population is near Ottawa.

Nearly all infants are more or less subject to diarrhoea and such complaints while teething, and as this period of their lives is the most critical, mothers should not be without a bottle of Dr. J. D. Kellogg's Dysentery Cordial. This medicine is a specific for such complaints and is highly spoken of by those who have used it. The proprietors claim it will cure any case of cholera or summer complaint.

A COOL OFFICER.

He Faced an Angry London Mob and Got Fair Play.

During the reform riots in Hyde park, London, in 1866 the mob on a well remembered night began tearing down the fences of Hyde park for fire and barricades, Colonel Thomas Wentworth Higginson tells in the Atlantic Monthly of an English officer who was dining with a friend, all unconscious of the impending danger. Presently he received a summons from the war department, telling him that his regiment was ordered out to deal with the mob.

He hastened back to his own house but when he called for his horse he found that his servant had received permission to go out for the evening and had the key of the stable in his pocket. The officer hastily donned his uniform and then had to proceed on foot to the guards' armory, which lay on the other side of Hyde park. Walking hastily in that direction, he came out unexpectedly at the very headquarters of the mob, where they were already piling up the fences.

His uniform was recognized, and angry shouts arose. It must have seemed for the moment to the mob that the Lord had delivered their worst enemy into their hands.

There was but one thing to be done. He made his way straight toward the center of action and called to a man who was mounted on the pile and was evidently the leader of the tumult:

"I say, my good man, my regiment has been called out by her majesty's orders. Will you give me a hand over this pile?"

The man hesitated a minute and then said, with decision: "Boys, the gentleman is right. He is doing his duty and we have no quarrel with him. Lend a hand, and help him over."

This was promptly done, with entire respect, and the officer in brilliant uniform went hastily on his way amid three cheers from the mob. Then the mob returned to its work, to complete it if possible before he whom they aided should come back at the head of his regiment and perhaps order them to be shot down.

Not Too Blind.

Passerby—I thought you were blind. Mendicant—Well, sir, times is so hard and competition is so great that even a blind man has to keep his eyes open nowadays if he wants to do any business at all.

Lengthening Life.

The difference between rising every morning at 6 and 8 in the course of forty years amounts to 29,200 hours, or 3 years, 121 days and 16 hours, which are equal to eight hours a day for exactly ten years. So that rising at 8 will be the same as if ten years of life (a weighty consideration) were added, wherein we may command eight hours every day for the cultivation of our minds and the dispatch of business.

"Pure soap!" You've heard the words. In Sunlight Soap you have the fact.

THE DRILL

SLOCAN, B. C.

The C. P. R. has sold over 5,000,000 acres of its land grant of 25,000,000 acres.

SAVE BABY'S LIFE.

You cannot watch your little ones too carefully during the hot weather. At this time sickness comes swiftly and the sands of the little life are apt to glide away almost before you know it. Dysentry, diarrhoea, cholera infantum, and stomach troubles are alarmingly frequent during the hot weather. At the first sign of any of these troubles Baby's Own Tablets should be given—better still an occasional dose will prevent these troubles coming and the Tablets should therefore be kept in every home. Promptness may save your child's life. Mrs. J. R. Standon, Weyburn, N.W.T., says: "Baby's Own Tablets are valuable in cases of diarrhoea, constipation, hives, and when teething. I have never used a medicine that gave such good satisfaction." This is the experience of all mothers who have used the tablets. If you do not find the Tablets at your druggists send 25 cents to The Dr. Williams' Medicine Co., Brockville, Ont., and a box will be sent you by mail post paid.

The Doukhobors earned in 1903 $10,000 in railroad work.

The Doukhobors have 320,000 acres of free grant land. They bought $60,000 worth last year.

Canada has given 57,000,000 acres of land to railway companies in the Northwest—an area as large as Manitoba.

Canada paid $5.02 per head to bring in, care for and locate the 1903 immigrants.

Canada's population west of Lake Superior was, 50 years ago, 8,000.

Deafness Cannot Be Cured

By local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by all druggists, 75c.

Hall's Family Pills are the best.

Quebec province is the home of 1,322,115 of French descent.

Ontario has 150,000 of French descent.

St. Martins, Que., May 16, 1895.

T. C. RICHARDS & CO.

Gentlemen, — Last November my child stuck a nail in his knee, causing inflammation so severe that I was advised to take him to Montreal and have the limb amputated to save his life.

A neighbor advised us to try MINARD'S LINIMENT, which we did, and within three days my child was all right, and I feel so grateful that I send you this testimonial, that my experience may be of benefit to others.

LOUIS GAGNIER.

The maritime provinces have nearly 150,000 of French descent.

There are 16,000 of French descent in the Canadian west.

THEY ARE CAREFULLY PREPARED—Pills which dissipate themselves in the stomach cannot be expected to have much effect upon the intestines, and to overcome costiveness the medicine administered must influence the action of these canals. Parmelee's Vegetable Pills are so made, under the supervision of experts, that the substance in them intended to operate on the intestines are retarded in action until they pass through the stomach to the bowels.

Canada has 7,000 Latter Day Saints, or Mormons, 6,000 of whom are in Alberta.

Minard's Liniment Cures Distemper.

2,000 additional Mormons will move from Utah to Alberta this year.

Canada's wheat field is approximately 300 by 900 miles in extent.

Ayer's

Bald? Scalp shiny and thin? Then it's probably too late. You neglected dandruff. If you had only taken our advice, you would have cured

Hair Vigor

the dandruff, saved your hair, and added much to it. If not entirely bald, now is your opportunity. Improve it.

"I have used Ayer's Hair Vigor for over 40 years. I am now 91 years old and have a heavy growth of rich brown hair, due, I think, entirely to Ayer's Hair Vigor."
Mrs. M. A. KEITH, Belleville, Ill.

$1.00 a bottle. All druggists. J. C. AYER CO., Lowell, Mass.

WIRE ROPE FROM POMPEII.

Rope Tramways Were In Use Two Hundred and Sixty Years Ago.

It is not an uncommon thing in this age of advancement in industrial and engineering matters for the present day engineer to assume that he knows much more than his ancient brother, and while this is true in many things it frequently happens that an invention or appliance commonly believed to belong to modern times is found to have been known and used centuries ago.

Ropes made of various kinds of fiber and leather are of very ancient date. Ropes of palm have been found in Egypt in the tombs of Beni Hassan (about 3000 B. C.), and on the walls of these tombs is also shown the process of preparing hemp. In a tomb at Thebes of the time of Thotmes III. (about 1600 B. C.) is a group representing the process of twisting thongs of leather and the method of cutting leather into thongs. The Bible tells us that Samson was bound with ropes and that the spies sent by Joshua into Jericho were let down in a basket, presumably by means of a rope.

At Nimrud, Assyria, a carved slab showing the siege of a castle was found, on which a soldier was represented in the act of cutting a rope to which a bucket for drawing water from a well outside the castle walls was attached.

The wire rope is generally considered a modern invention, a product of modern skill, and it will surprise many to learn that its manufacture is really a rediscovered lost art.

Although the Assyrians practiced the art of wire beating, no evidence has been found to indicate that they used wire for making rope.

The excavations at Pompeii have, however, brought to light a piece of bronze wire rope nearly fifteen feet long and about one inch in circumference. This rope is now in the Museo Borbonico at Naples. It consists of three strands laid spirally together, each strand being made up of fifteen wires twisted together, and its construction does not therefore differ greatly from that of wire ropes made today. Pompeii was buried A. D. 79, 1,825 years ago, but how long wire ropes had been known it is impossible to tell, though, judging by the knowledge shown in the construction, it may be safely concluded that they had been known for a considerable time. The uses to which these ropes were put are not definitely known, but further excavations may shed some light on the subject.

As to the use of rope tramways, it is said that they were in use as early as 1644.

Marriage and Wage Earning.

Professor Simon N. Patten of the University of Pennsylvania advances a new solution of the social problem. This is that among the people earning small wages the wife shall continue a wage producer after as before marriage. He is reported as saying in a recent lecture: "The whole social problem would be solved were the wife to become an income producer. Of course I refer to the young married couples, where each before marriage is earning between $10 and $12 a week. I believe that each should continue a wage earner until the husband's income increases to at least $20, when the wife can add more to the utility of his money by withdrawing from the wage producing class."

Danger That Lurks In a Rabbit.

A correspondent of the Washington Post tells of a rabbit which killed a hound with one blow of its claws. A rabbit is more dangerous than is really thought. Last winter on Pocosin creek Mr. John Hobbs while hunting rabbits had his dog run one into a hollow log. As he stooped to peep into the log the rabbit leaped out full against Mr. Hobbs, breaking his nose and knocking him upon his dog with such force as to crush that animal to death. The rabbit escaped. We don't know as to the truth of the story in the Washington Post, but Mr. Hobbs is a living but disfigured witness of the tragedy on Pocosin creek. — Princeton (W. Va.) Journal.

Early Women Journalists.

Mrs. Ebenezer Watson of Hartford, Conn., who back in 1777 and 1778 was proprietor and editor of the Courant, has been claimed as the earliest woman journalist of the country. But now comes the Charleston News and Courier with a chronicle of the fact that as far back as 1738 a Mrs. Timothy of that town on the death of her husband continued the publication and editorial management of the South Carolina Gazette.

Denmark's King.

The king of Denmark is likely to live until a descendant of his has been a queen or king in almost every country of Europe. His face is familiar enough in old age as one of the gentlest, but somehow or other, despite his many years, he has missed the good luck of being painted into immortality, as all the portraits of him extant are photographs.

Up Twenty-three Thousand Feet.

The highest balloon ascension ever made was 28,000 feet. Santos-Dumont went up 23,000 feet. Beyond that height the rarefied air causes bleeding of the nose, mouth, ears and eyes. Frequently he ascended to 20,000 feet. Finally, however, he devoted himself to the development of the airship.—World's Work.

THE POSTMASTER GROWS EMPHATIC

Believes Dodd's Kidney Pills the Right Medicine for Kidney Trouble.

T. H. Belyea, Postmaster of Lower Windsor, N.B., Endorses an Opinion Popular in all parts of Canada.

Lower Windsor, Carlton Co., N.B., July 4.—(Special) — T. H. Belyea, postmaster here, has come out with an emphatic statement that is heartily endorsed by the great majority of people of this district.

"I believe," says the postmaster, "that Dodd's Kidney Pills are the right medicine for Kidney Trouble, and will do all that is claimed for them.

"I had been bothered with Kidney Trouble for years and tried several kinds of plasters and other medicines, but did not get much lasting benefit. Then I tried Dodd's Kidney Pills, and would say they seem to have made a complete cure, as I feel as well as ever I did."

There are numerous people prepared to make statements like that of Postmaster Belyea, but the case of Kidney Disease that Dodd's Kidney Pills will not cure has yet to be reported.

Canada's population west of Lake Superior is, to-day, 600,000.

Canada's population west of Lake Superior is 75 per cent. British and Canadian born; 25 per cent. foreign born.

Minard's Liniment Cures Garget in Cows.

In 1901, 121,451 Ontario born dwellers had moved west.

One out of every 3½ enrolled in the census is of French descent—649,371 out of 5,371,375 are of French descent.

THE MOST POPULAR PILL.—The pill is the most popular of all forms of medicine, and of pills the most popular are Parmelee's Vegetable Pills, because they do what it is asserted they can do, and are not put forward on any fictitious claims to excellence. They are compact and portable; they are easily taken, they do not nauseate or gripe, and they give relief in the most stubborn cases.

Canada has 45,000 Galicians and Bukowinians from Austria; of these 10,141 came in during 1903.

The Doukhobor migration of 8,000 from southern Russia in 1899 was the greatest modern exodus of a whole people.

Minard's Liniment Cures Colds, Etc.

Canada has 20,000 Mennonites in the west.

Canada has 20,000 Hungarians.

Canada has 20,000 Chinese.

Canada collected $500,000 in 1903 as fees from 5,245 Chinese.

Canada has 3,612 Japanese.

Canada has the largest continuous wheat field in the west.

The Northwest land companies and railways sold, in 1903, 4,000,000 acres of land for over $14,000,000.

Canada's wheat growing area in the west is, according to Prof. Saunders, 171,000,000 acres in extent.

Canada has only 5,000,000 acres under cultivation in the west, per estimate of Prof. Saunders.

Canada's northwest land areas are 50 per cent. larger than ten of the western states.

The Territories' wheat area, 1904, is 20 per cent. more than 1903.

Ten million acres of land in the Northwest were acquired for settlement by grant or purchase in 1903.

Thirty-one thousand, three hundred and eighty-three homestead entries were made in the Northwest in 1903; 64,000 homestead entries have been received in the Northwest in the last three years, equal to ten million acres. The entries for 1903 were double the number for 1902, and as many as for the three years previous. These 31,383 homestead entries mean an addition of 89,907 to the population.

The thousands of people who write to me, saying that

Shiloh's Consumption Cure The Lung Tonic

cured them of chronic coughs, cannot all be mistaken. There must be some truth in it.

Try a bottle for that cough of yours.

Prices: 25c. 50c. $1. S. C. WELLS & Co. LeRoy, N.Y., Toronto, Can. 310

SELECTIONS

TO COUNT BY EIGHTS.

Society For the Propagation of the Octimal System.

A society is about to be formed in England for the propagation of what is called the octimal system, or counting by eights.

The most natural to multiply and divide is to double or halve. It is simplicity itself to take one apple (or anything you please) and multiply it by placing another by its side; you multiply again by adding two more, and so you go on doubling. In the same way you divide by halving.

Now, in the decimal system it is not possible to do anything so neat as that. You must get to your unit, or base, of ten, and it is impossible to do that by the simple process of doubling the low figures. You can certainly halve one in the same way as in the new octimal system, but if you take ten you get down to two and a half very soon—a very broken figure—and it gets worse as you go lower.

Not so with the eight. It was contended by its opponents that the process of dividing or multiplying by simply shifting the point is not possible. In decimals, thirty means thirty, but 3.0 means three, which is an easy method of dividing by ten, but how would this be in the new enumeration?

To this the octimalists reply that the figure of ten is quite arbitrary, that the most natural figure is eight and that if we had been taught to count by eights we should have experienced no difficulty.

In that case thirty would be equal to twenty-four, while 3.0 would be three, as at present. Further—and this is where they think they score—.3 would be three-eighths, not three-tenths, which they stigmatize as a very difficult division to obtain naturally.

It is all very well when we have it marked out for us on a scale, but just think of the difficulty of splitting an apple into ten equal parts and then compare that with the simplicity of obtaining eight parts by merely halving!

Supporters of the decimal system say that the human hand was the basis of calculation, there being ten digits, but octimalists point out that there are only eight fingers; that the thumb is a special part of the hand.—Pearson's Weekly.

Artificial Snails.

As escargots, or snails, are not much eaten in this country, the discovery that artificial snails are made will not worry American epicures. In Paris it is different. Public knowledge of this enterprise came about through the suit of a Paris workman against his employer for injuries received in manipulating a machine for fabricating snails. It was explained that the employer bought empty snail shells from the dust men and ragpickers. Having cleaned out the shells, the defendant and his people filled them with "mou"—that is to say, lights, or cat's meat. This soft, spongy stuff before being crammed into the shells was cut into corkscrew shape by very improved machines. When the shell was filled some liquid fat or grease was poured into it, and the trick was done. The fabricated snails were sold usually at 20 centimes the dozen.

Balked on Their National Hymn.

King Edward, while visiting at the residence of one of his subjects recently, saw proof that not many Englishmen know the words of their national anthem. He was waiting at the station for his train when a few of the ultraloyal began to sing "God Save the King," but each in succession came to a sudden pause and lamentably broke down. A desperate final attempt failed most ignominiously, greatly to the amusement of his majesty, who vainly tried to conceal his smiles under cover of a parting chat with his noble and slightly embarrassed hostess.

Time to Smoke In Australia.

Builders and contractors in Australia have hit upon a successful plan to oblige their employees by allowing them to stop during working hours and have a smoke.

At 10:30 in the morning the whistle blows or the bell rings, and the foreman calls out, "Smoke!" Instantly all work is stopped, and the men take out their pipes and smoke for about five minutes. At 3:30 in the afternoon they are allowed to smoke again. The time so lost is made up by the extra energy with which the men work after they have had a smoke.

The Stingless Bee.

Apiculturists have been experimenting to determine whether a comparatively rare stingless bee that is a native to North and South America could be bred to replace the common honeybee. The former, according to the investigators, was found to use no wax in the construction of the nests, and the honey stored by them is greatly inferior to that of the common honeybee. The domestication of this species apparently does not look very promising.

A Big Cycling Contract.

The champion wager of the moment is possibly that upon which one Herr Schweigerhausen has entered to the amazement of less active and less imaginative Europeans. He is to cycle 70,000 miles in five years, he is to come in contact with three kings, to kill a wild animal in each country, to write a hundred articles, take a thousand photographs and deliver a hundred lectures.

Canada has 95 per cent. of British subjects, viz., 5,077,698.

Canada has only 5 per cent. of foreign born population, viz., 293,617.

Canada received in 1903, 41792 from Great Britain and 49,473 from the United States.

Canada's population is 73 per cent. rural and 26 per cent. urban.

Canada has 61 centres of 5,000 population and over.

The 123,000 Americans who came to the west during the past 5 years represented 25,000 heads of families.

BABY ECZEMA AND SKIN DISEASES

Which Torture Children are Soon Entirely Cured by the Use of

Dr. Chase's Ointment.

Especially during the teething period, children are subject to eczema, scald head and various forms of skin disease, which cause the keenest suffering to themselves, as well as anxiety to their parents.

There is no treatment so successful as Dr. Chase's Ointment, and as eczema always tends to become chronic and last for years, prompt cure is of the utmost importance.

Mr. C. Wiley, who is employed as cooper by the Kennedy & Davis Milling Company, Lindsay, Ont., states: eczema on my little girl some few "I used Dr. Chase's Ointment for years ago, and soon brought about a thorough and permanent cure. She had suffered for considerable time, and though we tried a great many remedies, Dr. Chase's Ointment was the only preparation to prove effective. I cannot speak too highly of Dr. Chase's Ointment, as it certainly effected a prompt and permanent cure.

Mr. Wm. Kirknoss, farmer, Mt. Forest, Ont., states: "I find that Dr. Chase's Ointment is the best thing I ever used for chafing, itching skin and burns and sores of all kinds. It heals them up very quickly, and I believe that there is no better ointment to be obtained than Dr. Chase's. We have found it invaluable and always keep it in the house.

Any mother who once becomes acquainted with the merits of Dr. Chase's Ointment would not think of being without it in the house. Where there is a baby or small children it is of daily value as a means of curing skin irritations and eruptions, chafing and all sorts of burns and sores.

Dr. Chase's Ointment, 60 cents a box, at all dealers, or Edmanson, Bates & Company, Toronto. To protect you against imitations, the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box.

Each immigrant is estimated to be worth $1,000 to Canada.

Canada is now receiving 1,000 immigrants a day.

It is only necessary to read the testimonials to be convinced that Holloway's Corn Cure is unequalled for the removal of corns, warts, etc. It is a complete extinguisher.

The American settlers brought into this country in cash and settlers' effects $43,000,000—an average of $350 per head.

The superiority of Mother Graves' Worm Exterminator is shown by its good effects on the children. Purchase a bottle and give it a trial.

Of the 123,000 Americans in Canada, 50,000 came in 1903.

Twenty-nine different countries and nationalities were represented in the Northwest land allotment of 1903.

Wash greasy dishes, pots or pans with Lever's Dry Soap (a powder). It will remove the grease with the greatest ease. 36

Action of the Earth Upon Bodies.

Years ago, when the bodies were removed from the Cimetiere des Innocents at Paris, the common pits in which great numbers of the bodies had been interred together were found to contain masses of a grayish white soapy substance. The matter was not very well understood at that time, but it is now known that the remains of the dead are under certain conditions transformed into such a material, either wholly or in part, which has been named "adipocere." It is a true ammoniacal soap, being a combination of fatty acids with ammonia.

Bodies that are exposed to the action of water percolating through the soil are most apt to undergo this species of transformation. Inasmuch as adipocere is not perishable under ordinary circumstances, corpses thus changed very often retain their form indefinitely. Now and then they are dug up, and ignorant writers in newspapers refer to them as wonderful instances of "petrifaction."

A Queer Ceylonese Grass.

Lemon grass, known to botanists as Andropogen schaenanthus and which is unknown outside of Ceylon, and there only in the Kandian district, is in several respects a most remarkable vegetable production. It grows to a height of six or seven feet and has the wonderful property of spontaneous ignition. On the slopes of Mount Ambulawe during the wet season the grand spectacle of these spontaneous conflagrations is frequently seen. At first a single curl of smoke or bright tongue of flame will be noticed. Soon, however, as the water runs down the stalks and mingles with the oil and acids contained in the pith of this curious herb fierce fires burst into view here, there and every place, soon covering the whole mountain in a sheet of flame. The botanists and chemists have not as yet explained why this paradoxical grass ignites when water falls upon its stalks.

Dangerous Chances.

Multimillionaire—I notice that Grafter has been arrested for stealing $500,000.

Billionaire—I have often warned him against petty larceny.—New York Life.

If Livers Go Wrong

set them right—it's simply and easily done. Without pain, without trouble, without nauseating, in fact it's only in the beneficial effects that you notice you have taken

Beechams Pills

Sold everywhere in Canada and U.S. America in boxes, 25 cents.

CELESTIAL REFRESHMENTS

Funny Little Restaurants In the Chinese Empire.

Places of rest and refreshment are commonly to be found in China at the halting stations on the highways in the interior or at the villages on the banks of the great rivers of China. They frequently take the form of a small mud hut, having a dark interior filled with smoke, tea tables, forms and an oven, where a cook is kept busy baking tea bread and frying puddings for the entertainment of the customers, whose favorite beverage is tea, although when times are good and the weather cold they indulge in something stronger, which often inebriates and that at a very cheap rate. In the darkest corner there are a row of glazed earthenware jars containing a kind of Chinese whisky, of which a thirsty carter may have a skin full for something considerably under a penny, when he will go quietly to sleep on the shaft of his cart, and his pony or mule, being used to it, will take him home.

In addition to these conveniences there is an ingenious little furnace in front, having a long flue, through which the flame is driven by an air pump, and a row of hot water kettles, gradually increasing in size to suit the heat of the tongue of flame that passes up the flue beneath, so that they may all be kept boiling. The hot water is sold to passersby, who usually carry with them their teapot and tea, so that they may have a cup at every station. This custom of carrying one's own tea is so common that it is difficult to procure a cup of tea in any of the restaurants, as they do not keep it and do not care to go out of their way to buy it for you. Although the plant may be growing all round and at one's very feet, it is next to impossible to get a cup that a foreigner would consider worth drinking, and as to using milk and sugar, the Chinese look upon the practice as a barbarous device of the "foreign devil."

Betrothed at Birth.

In some parts of west Africa the girls have long engagements. On the day of their birth they are betrothed to a baby boy a trifle older than themselves, and at the age of twenty they are married. The girls know of no other way of getting a husband, and so they are quite happy and satisfied. As wives they are patterns of obedience, and the marriages usually turn out a success.

Considerate.

A mother found her small daughter shut in a closet. "What are you doing in the dark, baby?"

"You said God was watching me all the time, so I thought I would come in here and give him a rest."—Lippincott's Magazine.

The Eye of a Pianist.

A pianist has to cultivate the eye so as to see 1,500 signs in one minute, the fingers to make 2,000 movements and the brain to understand all these signs as well as direct all these movements. In playing Weber's "Moto Perpetuo" a pianist has to read 4,541 notes in less than four minutes, or about nineteen a second, but the eye can receive only about ten consecutive impressions a second, so that in quick music it seems that a player does not see every note singly, but in groups, probably a bar or more at one view.

An Extraordinary Memory.

At the Giessen congress on psychology Professor Mueller of Goettingen told of a certain Dr. K. who within a few seconds was able to work out the square of any number of five figures given to him. He was also able to learn by heart and repeat a row of figures 204 in number within twelve and a half minutes. Professor Mueller asserted that no such memory for figures had ever been known, the record having been 204 figures in seventy-five minutes.

UNION LABEL

FRIDAY, JULY 15th, 1904.

EDITORIAL CROPPINGS.

Canada's surplus for the year ending June 30th was approximately $20,000,000. Less than that would redeem the townsite of Slocan from the appending tax sale and build the projected sawmill for the O. S. Lumber Company.

An evidence that the town is not dead is the decision of the citizens to celebrate Labor Day, for which a large sum of money has been collected for distribution in prizes. A cordial invitation is extended to other towns to join in the celebration,for a general good time is promised.

Profiting by experience with the Grand Trunk Pacific railway, the dominion goverament will pass a bill prohibiting the employment of aliens, professional men or otherwise, upon government works or works subsidized by the government. It is one thing for the Liberals to pass a bill,but they lack in courage to enforce it—the Alien Labor Act to wit.

Chief Justice Parker, of New York state, has been nominated by the Democrats to make the race for the presidency of the United States, in opposition to Theodore Roosevelt, the Republican nominee. The Democrats have juggled with their platform, in order to relegate the silver issue to the background. With both candidates supporting the gold standard, Roosevelt will win out hands down. Democracy has proven unfaithful to the interests of the common people.

The probabilities are that the dominion elections will be held this fall, nominations falling, it is believed, the latter end of October. Strength is given to the belief by the fact that the king's printer is distributing voters' lists to the members of parliament; also by the sudden activity in political circles. The time is opportune for the Liberals—anticipated bountiful harvest on the prairies, healthy financial surplus for the year just closed, and the closing of the Grand Trunk Pacific deal, all tending to give the party confidence. Conservatives will enter the contest better prepared than in the last contest. They have got to understand and know their leader, and the party has become united and cheerful. They will make government ownership their main issue, and upon that they take a determined stand, permitting no ambiguous declaration to weaken their cause. Ample protection to the manufacturing industries is also in their catalogue and, should they be elected, assuredly that issue will be put into effect. The manufacturing interests rely upon the policy of the Conservatives and will lend them their full influence. Recent bye-elections in the east have all gone against the Laurier government, either in the defeat of their candidates or in the cutting down of their majorities. It is unusual for bye-elections to go against a sitting government, and when they do it is a pretty clear indication the public have lost faith in their rulers. Such then is the basis of Conservative confidence and they will shape their affairs accordingly.

CARD OF THANKS.

The undersigned desire to express their gratitude and thanks to the numerous kind friends and citizens generally, for the numerous tokens of sympathy evinced towards them in their recent bereavement over the loss of their young son. The tender feeling shown is deeply appreciated, assisting as it does to soften the effect of the hard blow.

MR. AND MRS. W. E. BOIE
Slocan, July 11.

A concentrator is to be erected on the Cork property, on the south fork of Kaslo creek.

DRILL POINTS.

Pay up your subscription.

Grand Forks is having a street carnival on Aug. 24-27.

The tug Sandon finished her towing and tied up again Friday.

A number of important business changes are pending here.

W. E. Boie came in from the Boundary on Thursday, returning Monday.

Failing a quorum, no meeting of the city council was held on Monday night.

Express money orders are payable everywhere. They are cheapest and safest.

Today the city treasury will be fattened by the proceeds from liquor licenses.

Carload of shingles No. 13 was sent out by the local mill Saturday to Bradford, Ont.

In Knox church next Sunday night Rev. Mr. McCord will preach on: "The Lost Christ."

Shipments of ore, shingles and lumber of late have made things lively around the wharf.

Mrs. T. B. Linton and two children came over from Rossland Friday, on a visit with relatives.

Geo. Henderson is applying for a transfer of the Arlington license from himself to J. W. Crow.

W. T. Shatford & Co. are selling their entire stock of ladies' and children's boots and shoes at cost.

Tuesday was the Glorious Twelfth of Boyne Memory. The local Orangemen observed the day in a quiet manner.

Manager McPhee of the Ottawa got back from Spokane Friday, bringing his two sons with him to spend their vacation.

The license commissioners met on Friday and transferred the Arlington license from Larry Knowles to Geo. Henderson.

The body of George Yeoman was found in the lake above Nelson last week. He had been drowned from a canoe some time previous.

W. T. Shatford & Co. have just received a large shipment of American hams and bacon. It is of splendid quality and prices are right.

Timothy Eaton Co. have purchased a block of land in Winnipeg and will erect a large departmental store. The Robert Simpson Co. will do likewise.

The interment of the remains of the infant son of Mr. and Mrs. Boie took place on Thursday afternoon, Rev. Mr. Calvert, of New Denver, officiating.

Mrs. John Bourne and child, who have been visiting with Mr. and Mrs. Edwards for the past fortnight,returned to their home in Revelstoke Tuesday morning.

THE DRILL will print you, on short notice and in any amount, shipping tags, billheads, statements,letterheads, noteheads, memos, receipts, envelopes, visiting cards, business cards, bills of fare, dodgers, posters, etc., etc. Will meet any quality or price.

You can get some great snaps at W. T. Shatford & Co.'s in ready-to-wear suits. Here are a few of their prices: $8 suits for $6; $10 suits for $7.75; $11 suits for $8.50; $12 suits for $8.75; $13 suits for $9.75; $15 suits for $10.75; $17 suits for $12.75; $23.50 suits for $17.

Certificate of Improvements.

NOTICE.

Respecting Coal and Petroleum Lands in South-East Kootenay.

NOTICE is hereby given that licenses to prospect for coal and petroleum upon and under lands situated within Block 4,593, South-East Kootenay, will be issued forthwith to all persons who have made proper application, in pursuance of the provisions of the "Coal Mines Act" and amendments.

The fee for each license will be $100, and all applicants who have not deposited accepted bank cheques to cover that amount are hereby required to do so without further notice.

Licences will be issued in the following form, viz:—

"MINING LICENCE ISSUED UNDER THE COAL MINES ACT AND AMENDMENTS.

"In consideration of one hundred dollars now paid under the said Acts, and subject to the provisions thereof, I. W. S. Gore, Deputy Commissioner, acting for the Chief Commissioner of Lands and Works, licence to enter, prospect, search and work for coal and petroleum (but no other metal or mineral) upon, in and under all that piece or parcel of mineral land situate in and forming part of Block 4,593, East Kootenay District, and described as follows:—and not exceeding in the whole six hundred and forty statute acres.

"Owing to the number of applicants for licences to prospect for coal and petroleum, and the peculiar circumstances surrounding the application for and issuance of these licenses, and the well-known fact that the issuance has been unavoidably suspended for so many months,the Government of British Columbia finds it impossible to determine the equitable rights of the numerous applicants. Therefore, for the purpose of enabling all persons to go before the proper tribunal for the determination of their respective rights and priorities, this licence is issued and accepted subject to such prior rights of other persons as may exist by law, and the date of this licence is not to be taken or held as in any sense determining such priority, and further it shall not be taken or held to waive enquiry by the Courts into the proper performance of all conditions precedent as between adverse claimants; and further,on the understanding that the Government shall not be held responsible for, or in connection with,any conflict which may arise with other claimants of the same ground, and that under no circumstances will license fees be refunded.

"And the holder hereby waives any claim or demand against the Government, and expressly agrees not to take any steps or proceedings, or present any petition, to enforce any alleged claim or demand against the Government of the Province of British Columbia arising out of the issuance of this licence or of any other matter or thing appertaining thereto.

"The land being under reserve from pre-emption and sale this license does not include any right other than the right to prospect for coal and petroleum.

"The duration of this licence is for one year from the , 190 .

"Deputy Commissioner of Lands & Works.
"Lands and Works Department,
"Victoria, B.C., , 190 ."

R. F. GREEN,
Chief Commissioner of Lands & Works,
Lands and Works Department,
Victoria, B.C., 6th June, 1904.

Notice to Delinquent Co-owner

To Anna Farini, or to any person or persons to whom she may have transferred her interest in the Coronation and Memphis mineral claims, situated on Twelve Mile creek, and recorded in the Recorder's office for the Slocan City mining division.

You are hereby notified that we, James Smith, F.M.C. No. B59995, and Charles Brand, F.M.C No. B60037, have caused to be expended the sum of four hundred and ten dollars in labor and improvements on the above mentioned mineral claims, in order to hold said claims under the provisions of the Mineral Act; and if within 90 days from the date of this notice you fail, or refuse, to contribute your proportion of such expenditure,together with all costs of advertising, your interest in said claims will become the property of the subscribers, under section 4 of an Act entitled "An Act to amend the Mineral Act, 1900."
