DRILL OFFICE

**ARLINGTON HOTEL,**

J. W. Crow, Proprietor.

THIS Hotel is one of the best known and most popular houses in the country. It is located adjacent to the depot and the wharf, and commands a magnificent view of the beautiful Slocan lake. Good fishing is to be found close at hand, while every facility is offered for boating.

Tourists will find the Arlington and ideal resting place.

Commercial men have at their command new and commodious sample rooms.

The dining room is strictly up to date and the bar supplied with only the best brands of goods.

MAIN STREET, - SLOCAN, B. C.

**SUGAR**

For the next week only we will sell Sugar at

**$6.25 a Sack**

**David Arnot, Slocan.**

**A Spring Pointer**

Nothing delights the eye more than a fine fitting, up-to-date, stylish suit of clothes

A new selection of fine Grey & Black Worsteds

of the latest designs just been received.

Cleaning, Pressing and Repairing

done on the shortest notice. All our work is guaranteed, or money refunded. We can meet any purse.

**H. A. CLEVE,**

Main Street, Slocan, B.C.,

Store: Next door to Postoffice.

## FOR A LOCAL SMELTER

### DR. SUSSMAN INSPECTING THE SLOCAN MINES.

**Would Pay New York Quotations for Silver and Lead, With no Zinc Penalties—Charges of $5 per Ton Treatment.**

Much talk has from time to time agitated Slocan mining circles respecting works to be erected near at hand, to treat the ores of the camp on an economical and profitable basis. Concentrators were first installed, being from time to time remodelled or abandoned. Then came schemes for the treatment of zinc ores, plants being successfully established in connection with the Payne, Ivanhoe and Slocan Star mills. Still later came the announcement of a more ambitious zinc enrichment project for Rosebery by the Monitor people, who are to commence construction this month. It is believed this may eventuate in zinc and lead smelting works of large proportions. On top of these schemes came the intimation that the Sullivan people would complete their smelter at Marysville, and enter the Slocan market for wet and dry ores.

But, of still greater import to the camp is the fact that a German syndicate purpose erecting a smelting plant in one of the Slocan towns, yet to be announced, for the treatment of the ores of the various sections of both mining divisions. Phil Hickey, manager of the Ivanhoe, was here last week, and to THE DRILL man stated he had had Dr. Sussman, the well known metallurgist, up at his mine for two days making a careful examination of the ore bodies and taking samples. The doctor is similarly examining all the mines of the camp.

Mr. Hickey stated the doctor's visit was for the purpose of sizing up the camp's tonnage, with a view to establishing the works mentioned. The men backing the venture are engaged in the metallurgical business in Europe, but have not as yet established themselves in this country. They aim to take the zinc-lead ores direct from the mines and treat them at their own smelter, paying the mineowner New York quotations for silver and lead and inflicting no penalty for zinc. The company, however, would retain all zinc values as their own, to dispose of for themselves. As New York quotations have never been obtained here for lead, the advantage to the camp would be simply immense. In addition to all this, Dr. Sussman informed Mr. Hickey that the freight and treatment charges on the ores would be in the neighborhood of $5 per ton—another huge benefit.

Of course, it remains to be seen whether or not this new project materializes, but at any rate it would seem that the day of small things, so far as the local smelters are concerned, is about over. Spirited competition by numerous smelters and enhanced prices should assist that lead bounty to stir up things in the Slocan.

### Check on Hospitals.

Last week's Gazette contained a lengthy notice respecting the payment of provincial monies to hospitals. In addition to any register kept by the hospitals, it shall be the duty of the matron, or the nurse in charge, to keep a register of all patients admitted to and staying in the hospital from day to day; and such register, which shall show the name, date of admission, and disease for which each patient is treated, shall be certified to by the matron or nurse, at the end of each month. Hospitals are required to admit and care for all cases of contagious disease, other than smallpox.

### Improving the Telegraph.

On Friday a construction gang of 15 men, accompanied by a Chinese cook, arrived over from the Arrow lakes and pitched their tents at the foot of Arthur street. They are here for the purpose of improving the C.P.R. telegraph system along Slocan lake by placing the wires on poles instead of trees. From the depot the poles follow Lake avenue to the bluffs and thence skirt the lake shore. The first few miles is very rough work, owing to the big bluffs. The task will take about a month.

### Making Money Fast.

J. Tinling and J. Wafer are making money fast on the Club and are highly elated in consequence. They have been working on ore since commencing development, the chute being drifted on from the surface, and the ore broken is being daily sorted and sacked. A large and beautiful piece of the ore was brought down by the boys on Saturday evening and it made the old-timers talk a bit.

### The McKinnon Strike.

Jack McKinnon and M. Gillis have a prospective shipper in their fraction near the Arlington sawmill camp, and upon which an encouraging strike was made last week. They have a substantial six inches of ore, which gives paying returns. The ledge is 20 feet wide and runs straight up the hill, not cutting across the formation as others do in the vicinity. More work will be done on the find.

## CITY COUNCIL.

**Short and Unimportant Meeting Held on Monday Evening.**

After a week's holiday the city council gathered again for business Monday night, those present being Mayor McNeish, Ald. Smith, Madden, Teeter and Henderson.

Communications read: From Chief Allen of the fire brigade, stating that the ladders of the fire brigade were in an unserviceable condition. Filed and the chief instructed to make the necessary repairs.

Bills presented: H. D. Curtis, services as assessor, $75; Land Registry Office, Nelson, for searching records for tax sale, $5. Latter ordered paid, and also $25 on former account, balance to stand over for a while.

Council adjourned.

### A Twelve Mile Bonanza.

The strike made by Ralph Gillette and his partner on the Colorado, on Twelve Mile, is turning out every bit as good as expected, and is by long odds the best thing on the creek. They have drifted in 30 feet on the ore body, which runs from 16 to 30 inches in width. One small streak is mostly gray copper and assays 1300 oz in silver. No ore is being broken other than that in drifting, yet the owners hope soon to ship a carload, from which it is expected the smelter returns will be above 400 oz. When the carload is completed, another drift will be started lower down the hill, giving plenty of room for stoping. The workings are running into a steep side hill and the ore met with is not a mere surface blowout.

### Better News From Le Roi.

During the month of May there was shipped from the Le Roi mine to the Northport smelter 6226 tons of mixed ore, to mix up with silicious ores already at Northport smelter. It contained 2612 oz of gold, 3600 oz of silver, and 172,300 pounds of copper. Estimated profit on this ore, after deducting all expenses, $7750. Expended on development during the month $4500.

### Big Strike on the St. Eugene.

An imposing and important strike of ore was made at the St. Eugene, at Moyie, last week, the body carrying higher value in silver than anything yet struck in the mine. This was first encountered in making an upraise from the No. 1 tunnel, the lowest tunnel on the St. Eugene, 1600 feet in and 1000 feet below the surface. The ore body is 14 feet wide, of solid shipping galena.

### Lease on the Edison.

C. B. Taylor, Chas. Barber and Joe Law this week secured a lease on the Edison, adjoining the Neepawa, on Ten Mile. It is owned by Messrs. Shannon, McGillivray and Jacobson, of New Denver, who will now have two leases working on their Neepawa group. The ore of the Edison is high grade and requires but little sorting. The new lessees commence their labors next week.

### Rifle Club Scores.

On Saturday last the local club held their regular practice shoot, making the following scores:

| | 200 | 500 | 600 | Total |
|---|---|---|---|---|
| G. Nichol..... | 23 | 27 | 23 | 73 |
| D. McVannel..... | 21 | 29 | 20 | 70 |
| F. Dick..... | 26 | 24 | 19 | 69 |
| Dr. Cade..... | 27 | 23 | 19 | 69 |
| H. D. Curtis..... | 17 | 16 | 10 | 43 |
| C. Lindow..... | 15 | 13 | 13 | 41 |

### Silver Quotations.

Following are the quotations for bar silver on the various days during the week since last issue:

| | |
|---|---|
| Thursday ..... | 55⅞ cents |
| Friday..... | 55⅞ " |
| Saturday..... | 55⅞ " |
| Monday ..... | 56⅛ " |
| Tuesday ..... | 56⅝ " |
| Wednesday ..... | 56⅝ " |

### Basketball Matches.

Two basketball matches were held in the rink Friday evening, before a large crowd, and judging by the noise the tournament was a success. In the ladies' game, the Blacks defeated the Whites by a score of 6 to 4. The married men then walloped the aspiring bachelors 4 to 2. The doctor was not needed.

### New Shuffle at the Chapleau.

A new shuffle has taken place at the Chapleau and the property will resume operations probably next week with a full force. F. Stock, holder of the lease, has turned it over to Nelson parties, with the consent of the creditors. Returns from the ore milled will go to pay running expenses, while the profits will apply on the liabilities.

## CLOSING CEREMONIES.

**Public School Entertainment Friday a Pleasant Affair.**

On Friday afternoon were held the closing ceremonies at the public school, previous to adjourning for the midsummer vacation. The exercises took place in Principal Hindle's room, which had been charmingly decorated with flowers, plants, and shrubbery for the occasion. More citizens attended than at any similar function in the history of the school, while the exercises themselves were uniformly successful.

Illustrations of class work were given, revealing to the parents the systematic manner of the staff in imparting knowledge to the children. A pleasing programme of singing, readings, recitations and dialogues followed, those participating being: Wesley Gething, Nellie Terry, Daisy McCallum, Wesley Baty, Effie McVicar, C. Tipping, Harris Ross, Wonetta Tipping, E. Graham, F. Tutcher, C. McCallum, Alma Baty, Lizzie Rae, E. Tipping, Josephine Mason.

The average attendance during the past term increased to about 55, and the record of the various classes in the school was also better.

## TIMELY WORDS.

EDITOR DRILL:

Sir,—The inspector's annual report re Slocan public school, published some time ago in THE DRILL, was one of which any school might be proud—few schools in B.C. received as good a one. The trustee board and the general public have shown a firm resolution to support and encourage the principal in the performance of his duties. The closing exercises of the school have been the most successful and largely attended in its history. Yet, I close the year's work with feelings bordering on despair, with a conviction that under all this apparent success there lies hopeless and irretrievable failure, unless something can be done to offset the evil influences that have, to a large extent, nullified my work during the past six months.

Night after night, as I sat correcting exercises, or planning how best to present the lessons of the coming day, there have come to my ears, through closed doors, the unearthly screams of the future men and women whom I was preparing myself to instruct on the morrow—this, too, at hours when the children in any well regulated home are, or should be, in bed. Day after day I have found many times a majority of the school pupils unable to do justice to their school work, for the simple reason that their physical and mental powers had been exhausted in the exciting, and, in some cases, unseemly, scenes of the previous night. The children are not only destroying their health in this way, but are contracting habits that will forever debar them from holding positions of trust and responsibility.

It is universally admitted that children must be allowed time for play and occasionally, say once a week, a night out; but it is also recognized by all persons of judgment that a limit should be set, and that even in play conduct should be somewhat becoming.

There is a time when female pupils are school girls, and when their chief concern should be to advance in their studies. Later, they become young ladies, whose whole time and attention are devoted to the choosing of, or of being chosen by, a life-partner. Now, when a young lady has arrived at this stage, her parents make a mistake in sending her to the public school. Books to be mastered require all her time; beaux require not only her time but her heart and soul. In a case of books vs beaux, beaux win out every time.

GEO. HINDLE, B.A.

Slocan, June 25.

### Will not be Disallowed.

The dominion government has decided not to disallow the act, passed by the B. C. legislature last session, securing certain settlers within the Island railway belt surface and under the surface rights. The Esquimalt & Nanaimo railway applied for disallowance, on the ground that the act interfered with the company's rights in the lands conveyed to it by the dominion government. In the opinion of the minister of justice, it was within the power of the province to pass the act. The legislature has undertaken to assert the claims of settlers by paying the cost of litigation.

Fully 1000 men are now employed on railway construction in the Boundary.

## OUR ORE SHIPMENTS

**SUBSTANTIAL SHOWING MADE BY THIS DIVISION.**

**Last Year's Shipments Were 1339 Tons—A Healthy Evidence of the Life and Wealth of the Camp—Enterprise the Biggest Shipper.**

It seemed like the good old days that have been this week in shipping circles, ore shipments having taken a big jump. No less than 126 tons of ore was sent out, three cars each from the Enterprise and Ottawa. Ore from the former was consigned to Trail, part of it coming from the new surface strike on the property. The Ottawa ore all went to Nelson, two of the cars being in bulk, in which shape future shipments will be made. In the future the output of the mine will be heavy and continuous. Next week the Alberta and Port Hope people expect to move their shipments. To date the output of the division is 834 tons, being one third greater than last year's figures for the same time.

For 1903 the ore shipments from the local division amounted to 1339 tons, made up from 17 properties. Following is a full list of the shipments this year to date:

| MINE. | WEEK. | TOTAL |
|---|---|---|
| Enterprise..... | 60 | 400 |
| Ottawa ..... | 66 | 307 |
| Neepawa ..... | | 36 |
| Port Hope..... | | 12 |
| Republic..... | | 32 |
| Black Prince..... | | 35 |
| Sapphire..... | | 2 |
| Argentite..... | | 5 |
| Black Fel..... | | 2 |
| Chapleau..... | | 3 |
| | 126 | 834 |

### MINES AND MINING.

Sandon mines last week handled 181 tons of ore.

Seventy men are on the payroll of the Slocan Star.

The L H, on Eight Mile, will be developed this summer.

Mining men are expecting silver to rise to the 60 cent figure.

Slocan mines have this year shipped upwards of 7500 tons of ore.

Rossland mines have shipped 177,528 tons of ore so far this year.

For the year to date Boundary mines have shipped 396,461 tons of ore.

Net receipts of ore shipped from the Le Roi No. 2 amounted to $44,990 in May.

Mike Kerlin has bonded the Mascot claim, at Sandon, to a local syndicate for $25,000.

Operations have been resumed on the Mollie Hughes and the Capella, at New Denver.

The contract for the lumber for the Rosebery zinc works is in the hands of the O. S. Co.

Kaslo has a new excitement. Gold and galena have been found on True Blue mountain.

Operations have been resumed at the Velvet, Rossland, after being closed down a year.

A packtrain went out Tuesday to bring down the ore from the Alberta. There is 15 tons of it to ship.

The Greenwood smelter has met with success with its new plant for converting its matte into blister copper.

Bad air is impeding the work at the Myrtle. Eighteen feet yet remains to be driven on the raise to connect with the shaft.

After being idle for a number of years the Great Western, in McGuigan basin, has started up. It is owned by Vancouver parties.

The Chapleau mill is running two short shifts a week, cleaning up the ore being mined. The three men are making their wages.

Pennsylvania parties have met the last payment on the bond of the Lucky Boy group, near Trout Lake, paying $23,000 in all.

### Yankee Surveyors Not Wanted.

Judge Winchester, under the provision of the alien labor act, has recommended to the Ottawa government the deportation of certain employees engaged on the surveys of the Grand Trunk Pacific. These surveyors are now returning to the United States.

### Absorb Canadian Northern.

In railway circles the report is current that the Canadian Northern railway has been purchased by the Grand Trunk Pacific. Wm. Mackenzie, of the former road, is in the Old Country and he is credited with having arranged the transfer.

# Her Name

By LILIAN C. PASCHAL

...Copyright, 1903, by T. C. McClure...

"Oh, I beg your pardon!" she gasped as the car, jerking over new sinuosities of track perpetrated by the repairs, threw her bodily like a luscious windfallen peach into the lap of a young man who was buried in the day's newspaper.

He looked up amusedly as she gathered herself from his saving embrace and the total wreck of his paper; then he arose hastily.

"Take my seat," he said courteously, with hat alift and the faintest twinkle in his eyes. "You will find it more comfortable—if I don't."

The ambiguous words sounded ungracious to the girl's first confused thought, and s' e hesitated. But one glance into the frankly admiring eyes and another repair serpentine decided her. She sank with more haste than grace into the proffered seat, while her preserver stooped to recover her dropped purse, handkerchief and other scattered properties.

She rewarded him with smiling thanks, then turned her anxious attention to the moving panorama of rain deluged streets outside. The problem in economics as to how she should reach her home, two long cross town blocks from the car line, innocent as she was of umbrella or rubbers, began to absorb her mind.

She only vouchsafed one brilliant, perplexed glance upward at the fellow passenger who for her sweet sake was submitting himself to the modern inquisition of "hanging by a strap till dead."

But in that instant of wireless telegraphy he perceived her thought and resolved accordingly. So he rode on past his club block after block till his fair vis-a-vis, having made up her mind to run if not for her own life for that of her new lace hat, signaled the conductor and got off the car.

Grasping the voluminous fluffery of her silken skirts in both hands, she poised for flight, when a deep voice addressed her in an extremely respectful tone:

"We seem to be going the same way, and you have no umbrella. Won't you share mine?"

Fragments of Maria's elder sisterly counsels regarding strict propriety floated through her mind as she hesitated. But the man was evidently a gentleman, and besides there was the pouring rain, and her new hat would be ruined, not to mention this her very first long gown.

She put her little hand on his offered arm as trustingly as the child she was, and they set forth.

In that short walk he made himself deferentially agreeable, and she, who had been shut in from all contaminating male society by a careful sister of forty, her only guardian, entered into this highly improper escapade with all the guilty joy of a young filly just broken out of its stall into forbidden pastures.

She was so naive, yet daringly winsome, her soft, long lashed gray eyes were so innocent, yet so mischievous, that it was small wonder that staid Mr. Harry Bewley, secretary to a highly respectable millionaire downtown, promptly lost his big, impulsive, Irish-American heart and, what was worse, his handsome head.

For as they ascended the brownstone steps of the old mansion and he realized that he might never see her again in this great wilderness of New York he rashly begged her to let him call and call some time soon.

The girl was frightened at what she had drawn upon herself. His brown eyes were desperately pleading as he closed the umbrella and stood beside her under the columned shelter of the entrance way.

"Oh, please go away," she implored him, glancing apprehensively about and hurriedly fitting her key to the lock. "Some one, perhaps Sister Maria, might see you."

"Not till you tell me when I may see you again. I must. Life will never be the same again. Here," he hastily thrust a card into her hand and held it there, "I am with Bronson & Co., Canal street. Any one there can tell you that I am not an adventurer nor"—

"Very well," she interrupted in terror, hearing steps inside. "Come next Wednesday evening. Ask for Miss Anoline Dwight."

She opened the door and was gone from his eager sight.

During the next week Mr. Harry Bewley's days and nights were a ferment of flitting, gray eyed visions in blue flounces and adorable lace hats. Anoline! What a beautiful name it was!

When Wednesday evening came at last he made a dart for the door of the office promptly at 6, something he had never done before and which astonished his employer beyond measure. That wealthy gentleman had laid the foundation of his millions by walking to save car fare and added to them by underpaying and overworking all the men in his employ.

B... tonight his secretary slipped out and away from the usual hour's work overtime and hurried to his club, where he spent fifteen hasty minutes at his dinner and an hour and three-quarters at his toilet.

Appareled at last to suit his fastidious taste, he sallied forth to a Madison avenue car. Arriving at the house whose fair dweller had haunted his dreams, he rang the bell and waited, with his heart thumping so loud under his stiff dress shirt that he wondered if she could hear it in that second floor front room she had told him was hers and which he had watched every evening for a week in hope of seeing even her shadow.

The door was opened by a trim maid.

"Is—is Miss Anoline Dwight at home?" he stammered in his excitement, fumbling in his cardcase.

The maid stared and then giggled, but in a moment straightened her deportment to its usual dignity.

"Yes, sir; I guess she's downstairs," she remarked; then glancing doubtfully at the bit of pastboard, "Shall I take this to 'er?" And the giggle threatened to break bounds again.

"Certainly," responded Mr. Bewley in his most lofty manner, though he reddened visibly. What the deuce ailed the girl? he wondered. Probably Miss Dwight was at dinner. He hoped he had not come too early. He anxiously consulted his watch. Nine o'clock was not so late. A burst of laughter from below, whither the servant had repaired, startled his embarrassment anew, and the words "Plug hat, too," floated up to him.

When she came back she was at no pains to conceal her mirth. "Jes' step this way, sir," she giggled. And he followed her, much perturbed, to the basement.

"Gen'l'man to see Miss Dwight," she announced loudly, opening the kitchen door with a flourish and abruptly withdrew to a back room, whence muffled explosions of mirth issued at intervals.

"Yo' wan' see me, suh?" A huge black bulk in turban and white apron waddled toward him. "I's Miss Anerline Dwight—de cook ob dis yer 'stablishment."

On confronting the African apparition Mr. Bewley stared, opened his mouth to speak, then fled. When he emerged, wrathful, wretched, disappointed and humiliated, he went back to the club and called himself all the unpleasant names he could think of. He arose next morning with the lark—or what corresponds to it in the city, the milk wagons—and delighted his employer by being first at the office; also for several mornings thereafter. But a reward other than official approval—cold comfort though it was—awaited him a few days later, in the form of a dainty blue note sealed with white wax. It was from Sister Maria, as follows:

My Dear Mr. Bewley—Through a chance remark of one of the servants today I was led to question my sister Nell concerning a hoax she very unjustly played upon you the other evening.

Nell is very young and inexperienced, and I have tried to be father and mother both to the orphan child. So I write now to ask your pardon for her impropriety and later rudeness to you.

Your desire for further acquaintance, if you still cherish such, may possibly be furthered if you can find a mutual friend through whom to receive the usual formalities of an introduction. I beg to remain yours very truly,

MARIA L. BROSTER.

Harry groaned in despair as he read. How could he ever hope among the several millions who inhabited the island of Manhattan to find one who knew Miss Nell Broster. The proverbial needle in the haystack was an easy search as compared to this.

But a tiny penciled word at the bottom of the page caught his eye:

"Over."

He turned the page and with it turned a new and joyful leaf in his life, for it held all the sweetness of love's young dream. This is what he read:

P. S.—Sister gave me this to mail. She has probably forgotten to say that I was a roommate at boarding school of your Mr. Bronson's niece and ward Mabel. You go there every Saturday to audit his household accounts, don't you?

NELL BROSTER.

P. S. No. 2.—Mabel has asked me to lunch with her next Saturday. N. B.

### How Jerry Kept His Promise.

In a year of bad crops and great distress some of the tenants of my great-grandfather, Gumbleton, like many of their neighbors, took to running away with stock and crops, leaving empty lands for their landlords.

Gumbleton begged one of his tenants, in whom he had some, though perhaps not much, confidence, not to follow such an evil example. "You will solemnly promise me, Jerry," said he, "that at any rate you will not go without giving me warning." Jerry solemnly promised.

One bleak and stormy winter night Gumbleton, while retiring to bed about midnight, was startled by the noise of gravel flung at his windows. He looked out into the darkness and called, "Who is there?"

"It's Jerry Hagarty, yer honor," shouted a voice through the storm.

"Oh, Jerry, is that yourself? What business have you on such a night, man?"

"Just to keep my promise of giving warning to your honor. I said, you know, I wouldn't run away without letting your honor know of it. I am running away now. Good night to your honor and goodby."

So Jerry ran away, stock, crops and all being also en route.—Gael.

### Not a Canary Comedian.

There had been a business transaction between Mr. Finch and a friend regarding a canary.

When Mr. Finch became the proud possessor of the little yellow creature he had not unreasonably expected it to burst into song at intervals.

But nature has not been so kind to feminine canaries as to the sterner sex, and, in spite of every encouragement, birdie refused to carol.

Therefore Mr. Finch was angry with his bird fancying friend.

"That's a nice sort of canary you sold me!" he said.

"Why, what's wrong with it?"

"It won't sing."

"What does it do, then?"

"It does nothing but hop about the cage from morning till night."

"Well, old chap, be reasonable. You surely didn't expect a bird that would sing and dance too?"

# HUMOR

## HE LOST A CUSTOMER.

**But It Was Not of the Kind That He Need Worry About.**

She walked into the general postoffice and, stepping up to the stamp window with a number of addressed envelopes in her hand, said to the clerk inside:

"Give me 50 cents' worth of two cent stamps, please."

The clerk passed out the stamps, which she received in one hand, while the other was engaged in a search for coin in a handbag. At length, when a long line of people were waiting to get at the window, she found a nickel and three coppers.

"Why, good gracious!" she exclaimed, with a startled look. "I must have spent all my money. But never mind, I'm coming down town tomorrow, and—well, I'll drop in and pay you then."

"Very sorry, madam," the clerk said mildly and firmly, "you will either have to pay for the stamps now or return them."

"Do you mean to tell me that you will not trust me for a few miserable postage stamps? And with my sister in Chicago anxiously waiting to hear from me about the parlor curtains? It's the most outrageous thing I ever knew. Why, I could get credit this minute in any store in the city."

"This is not a store, madam, and we don't keep running accounts. This is the general postoffice."

"Well, I shall write to the postmaster and"—

"There are people behind you, madam, waiting. I shall have to trouble you for the stamps," said the clerk.

"Very well. There they are," said she, handing them back. "But you will be sorry for this. I shall never enter these doors again or buy another stamp from you as long as I live." And, glaring majestically about her, she swept out of the building.

### Getting Their Money's Worth.

Some years ago, says Tit-Bits, a railway was being made in the neighborhood of Galashiels, and it was arranged that each of the numerous navvies employed should pay a penny a week to a medical practitioner, so that they might have his services in the event of accident or medicine in the case of illness.

During the summer and autumn neither illness nor accident occurred.

But when a severe winter followed all at once the "navigators" began to call on the doctor for castor oil.

Each brought his bottle, into which an ounce was poured, until the oil was exhausted, and the doctor was forced to send to Edinburgh for a further supply.

When that, too, was getting done, the doctor one day quietly asked a decent looking fellow what was wrong with the men that they required so much castor oil.

"Nothing wrong at all, doctor," he replied, "but we grease our boots with it."

### Affording Another Chance at Him.

The fair plaintiff had sued the elderly capitalist for breach of promise, and her lawyer was trying to persuade her to compromise.

"He offers," said the lawyer, "to give you one-third of the sum you are trying to recover if you will withdraw the suit."

"I won't do it," she replied. "I want the full amount."

"Failing in that," pursued her attorney, "he offers to marry you."

"What do I want to marry him for?"

The lawyer shrugged his shoulders.

"Well," he said, "think of the possibilities of a divorce suit, with a fat claim for alimony."

### Why They Look Severe.

Bella—I have no sympathy for the Russians, they're such a cruel looking set. The face of a Russian is enough to set you against him.

Billy—That's where you do them wrong. The Russians are not so cruel as you think. I'll admit that their countenances are not pleasant to look upon, but that is only because of the difficulty they have to pronounce their language.—Boston Transcript.

### Surprised.

"I see that the Gilderbys gave a dejeuner last Thursday."

"That's strange. We were at their dinner the same day and didn't hear anything about it."—Brooklyn Life.

### A Sure Cure.

"Cured your insomnia yet?"

"Yes, indeed."

"What cured you?"

"Sleep."

### No Chance.

The Billionaire — Sometimes, doctor, I'm haunted by the fear that I'll die rich.

The M. D.—Don't worry about that, sir. We will send in our bills at once to you.—New York Evening Journal.

## BANISH THE WRINKLES.

**In Many Cases They Are Merely Signs of the Ailments of Women.**

A woman's face plainly indicates the state of her health. Wrinkles, which every woman dreads, are not necessarily a sign of age. Pallor of face, wrinkles and a permaturely aged appearance are the outward indication of those ailments that afflict womankind alone, and from which she too often suffers in uncomplaining silence, rather than consult a doctor. In this condition Dr. Williams' Pink Pills are woman's best friend. They actually make new, rich, red blood, and this blood acting upon the nerves and all the organs of the body brings new health and happiness to weak, weary and despondent women. Mrs. John McKerr, Chickney, N.W.T., tells for the benefit of other suffering women how she found new health through the use of Dr. Williams' Pink Pills. "For some years," says Mrs. McKerr, "I was greatly afflicted with the ailments that make the lives of so many of my sex miserable. The suffering I endured can only be understood by those who are similarly afflicted. I tried many medicines but found none that helped me until I began the use of Dr. Williams' Pink Pills. These have actually made me feel like a new person, and the suffering I had endured almost continuously has passed away and life is no longer the burden it once seemed. I think these pills worth their weight in gold to all who suffer from female complaints and general prostration."

We ask every suffering woman to give Dr. Williams' Pink Pills a fair trial. They will not disappoint you, and the benefit they will give is not for an hour or a day—it is permanent. You can get these pills from any dealer in medicine or by mail from the Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box or six bbxes for $2.50. See that the full name: "Dr. Williams' Pink Pills for Pale People," is on the wrapper around every box.

## ENDURANCE.

How much the heart may bear, and yet not break!
How much the flesh may suffer, and not die!
I question much if any pain or ache
Of soul or body brings our end more nigh;
Death chooses his own time; till that is sworn,
All evils may be borne.

We shrink and shudder at the surgeon's knife,
Each nerve recoiling from the cruel steel
Whose edge seems searching for the quivering life,
Yet to our sense the bitter pangs reveal,
That still, although the trembling flesh be torn,
This also can be borne.

We see a sorrow rising in our way,
And try to flee from the approaching ill;
We seek some small escape; we weep and pray:
But when the blow falls, then our hearts are still;
Not that the pain is of its sharpness shorn,
But that it can be borne.

We wind our life about another life:
We hold it closer, dearer than our own;
Anon it faints and falls in deathly strife,
Leaving us stunned, and stricken, and alone;
But ah! we do not die with those we mourn,—
This also can be borne.

Behold we live through all things,—famine, thirst,
Bereavement, pain; all grief and misery,
All woe and sorrow; life inflicts its worst
On soul and body,—but we cannot die.
Though we be sick, and tired, and faint and worn,—
Lo, all things can be borne!

—Elizabeth Akers Allen.

For Strenuous Life

it is necessary to have your system in good working order—to have an energy born of perfect health and strength—it is imperative that each organ be kept in free action, and BEECHAM'S PILLS are foremost of the few things that will do it.

For Active Brains

your liver must be right, your stomach in a healthy condition and your kidneys properly performing their peculiar functions, or your body won't stand the strain and your brain won't be active. If you would have a clear head and keen perception, get a box of BEECHAM'S PILLS, use them and see how much more alive you will be.

For Perfect Health

there is no greater promoter than these famous Pills. You will find it so all over the world, and, mark you, the most perfect specimens of manhood, womanhood and childhood are the users of

BEECHAM'S PILLS

Prepared only by Thomas Beecham, St. Helens, England.
Sold everywhere in Canada and U. S. America. In boxes, 25 cents.

### The Siberian Cossack.

Tobolsk, where the Siberian Cossack is reared, is a well watered region, with 1,600 lakes, many of them of considerable size. Many of the inhabitants had their origin in the utilization of the territory as a penal colony for European Russia. The people are still very primitive, sheep being the unit of exchange in their barter system. Cattle breeding is extensively adopted, and it is from this source that the Russian army draws most of its horses for service in the far east. These animals are small and hardy, not particular about food and capable of enduring extreme heat and cold, but the load they can take even on a level road is only about 900 pounds. The preparatory class of the Cossacks comprises lads from the age of eighteen, who undergo three years' training. The Cossacks of the first ranks are enrolled from the age of twenty-one for a period of twelve years, and all serve for a further period of five years in the reserves, the age of discharge being, therefore, thirty eight.

### The Calendar Calculation.

Caesar's reformed calendar made the year about eleven minutes too long—that is, the solar year began eleven minutes earlier each twelvemonth than the calendar year. In 1582 Pope Gregory XIII. found that the solar year had gained ten days on the calendar year. He corrected this and to keep the two years more nearly together ordered that thereafter only centurial years divisible by 400 should be leap years. This calculation is this: By adding eleven minutes regularly to the year, at the end of a century the legal calendar has had one more day than the solar calendar. By giving up the additional day of leap year in three centurial years the legal calendar has at the end of three centuries nearly one day less than the solar calendar. This difference is corrected by having an extra day in the fourth centurial year. The arrangement is so nearly exact that the two years differ by only one day in 3,323 years.

### Opium Smoking In China.

It is generally understood that a large percentage of the Chinese are addicted to the use of opium. This is a misconception. The belief that the Chinese of rank and culture use the drug is due to the prominence given to the cultivation of the plant and the manufacture of opium in the Celestial empire. As a matter of fact, a native who uses opium is looked upon by his superiors as we discuss and classify our drunkards.

The idea that a pill will produce an exhilarating effect on the beginner is also erroneous. One must be accustomed to the use of the drug to get the pleasant effect. The first pipe to an American produces nausea. Two or three will make him sick. If he can stand eight or nine of these "pills" he is apt to dream, but the awakening is always an unpleasant reality.

### The Blue Lakes.

About twelve miles northwest from the town of Upper Lake, Cal., is a series of waters known as Blue lakes—three in all—surrounded by spurs of the coast range that tower 1,000 feet over them. These lakes are steel blue in color and never freeze. The upper lake is nearly two miles in length and half a mile in width in the widest place, the middle lake is about half a mile long and half that distance in width, and the lower one is less than half the size of the nearest neighbor. The upper lake is nearly 500 feet deep in places, and all of them abound in trout.

### Much More Than That.

"That milk looks as if it were half water," protested the woman at the kitchen door.

"It is much more than that, ma'am," replied the milkman, a college graduate in reduced circumstances. "I guarantee it to be 86 per cent water, 4 per cent. butter, 3½ per cent casein and 6½ per cent sugar and various salts, the combination resulting in the liquid commonly known as milk. Chemical analysis of the same cheerfully furnished whenever desired. Good morning, ma'am."

Emotion turning back on itself and not leading on to thought or action is the element of madness.

### Age and Respect.

A writer in the Ladies' Field states vigorously that she is not a believer in "respect due to age." "Why respect should be considered the sole prerogative of age is a thing I have never been able to understand. When people have displayed consistent foolishness or vacuity throughout their youth and middle age why should a younger and perhaps wiser generation be expected to look up to them with reverence simply because seventy years have passed over their heads? Respect, surely, should be a question of character and not of age."

## EAGLE AND STURGEON.

**The King of Birds and King of Fish In a Death Clinch.**

We had been camped for a few days at a point on the upper reaches of the Pic river, waiting for a few of the party who were running a side line. A source of amusement was watching the descent of a large baldheaded eagle in the eddy back of the point.

He would strike the water with great force, coming down from an immense height. At times he would dive under the surface to reappear a moment or two later generally with a fish clutched in his claws, when he would fly (freighted with his fish) to a very high mountain, on the overhanging crest of which the nest with his mate and young were quite visible to us with our field glass.

I had noticed his success and journeys to the nest for two mornings. On the third morning a shadow coming across the sun's rays caused me to look up and there was the great bird at his usual hunt to supply the young eagles with breakfast. With his keen eye piercing the river depths he poised over a particular spot for a few moments and then shot down with the velocity of a cannon ball.

The waters parted and the eagle was lost to view. I watched and waited to see him emerge with his prey, but moments lengthened into minutes, and minutes into a quarter of an hour, but the surface of the water remained undisturbed.

What could it mean? Even if he had struck himself against some hidden rock and been killed the body would have floated to the surface. It passed my reasoning powers to solve the result of that plunge. Then far down, fully a quarter of a mile off, I saw the great bird struggling, either to carry off a heavy burden or to free himself from one. The waters were lashed into foam and the bird again disappeared, and all was still.

This lashing of the water and disappearing were repeated again and again, each time farther downstream. A bend in the river prevented my seeing the final result. Calling one of our men from the tent, we embarked in a canoe and started down the river to view the strange proceeding closer. When we had doubled the point below I saw lodged against the beach in a small bay something that did not look natural to the place. We paddled down and found it was my eagle fast fixed to a sturgeon fully six feet long. Both were motionless. The king of fish and the king of birds had met death.—Forest and Stream.

### A Cold In the Head.

A hydropathic treatment of a cold in the head is more reliable than any other. It is as follows: In the morning after rising and at night before retiring wash the feet and legs as high up as the knees in cold water, then rub them with a rough towel and massage them till the skin is red and glowing. In addition to this cautiously snuff tepid water up the nose frequently during the day and sip with a teaspoon a glassful as hot as can be borne an hour before each meal and at bedtime. A few days is often quite sufficient for simple cases and obstinate ones yield if the treatment is prolonged. No medicines are required. If taken in the first stages of the disease a cold is broken up which might otherwise become a severe case of bronchitis, lasting many days or weeks.

### Quite True.

She (as the crowd surges around her)—Oh, dear, I'm really afraid to get into this awful jam!

He—well, just stick close to me, and we may possibly be preserved.—Harvard Lampoon.

THE DRILL

SLOCAN, B. C.

When a box or vase is filled for all ummer the plants should have a lit- e room to grow or they will suffer r the lack of it; but as a rule the eople want them filled so tightly hat you could not find room for an- ther plant.

## NATURE'S WARNING SIGNAL.

The cry of a baby is nature's warn- ng signal that there is something rong. If a little one is fretful, nerv- us, or sleepless, the safe thing to do s to adminster a dose of Baby-s own Tablets. They speedily cure all he little ills of childhood, and give ound, natural sleep, because they re- move the cause of the wakefulness nd crossness. Mrs. T. L. McCor- hick, Pelee Island, Ont., says: "I m never worried about baby's ealth when I have the Tablets in he house; they always give prompt elief for all little ailments." The Tablets are good for children of all ges, and are guaranteed to contain o opiate. If you do not find the Tablets at your medicine dealers end 25 cents to the Dr. Williams Medicine Co., Brockville, Ont., and a ox will be sent you by mail post aid.

Bulbs forced during the winter hould never be planted out till late the summer or during the earl ll; they will then make their root rowth during the cooler weather nd come up all safe the following pring.

Dear Sir,—Within the past year know of three fatty tumors on e head having been removed by e application of MINARD'S LINI- ENT without any surgical opera- on and there is no indication of a turn.

CAPT. W. A. PITT.

Clifton, N. B. Gondola Ferry.

Tuberous rooted begonias are fine ants to set in large or small beds d on the cemetary plot. These ford a remarkable variety of color white, yellow, orange, rose, scarlet d crimson in numerous shades.

**Deafness Cannot Be Cured**

y local applications as they cannot reach the eased portion of the ear. There is only one y to cure deafness, and that is by constitu- onal remedies. Deafness is caused by an in- amed condition of the mucous lining of the ustachian Tube. When this tube is inflamed u have a rumbling sound or imperfect hear- g, and when it is entirely closed, Deafness is e result, and unless the inflammation can be ken out and this tube restored to its normal ndition, hearing will be destroyed forever; ne cases out of ten are caused by Catarrh, hich is nothing but an inflamed condition of e mucous surfaces.

We will give One Hundred Dollars for any se of Deafness (caused by catarrh) that can- t be cured by Hall's Catarrh Cure. Send for rculars, free.

F. J. CHENEY & CO., Toledo, O.

Sold by all druggists, 75c.

Hall's Family Pills are the best.

Cayenne pepper is the best remedy know of for ridding roses and chry- anthemums of all insects. Sprinkle e bushes with water first, then st on the pepper from a pepper ox.

**ep MINARD'S LINIMENT in the House.**

For a hanging basket or a window ox in summer, or for the window arden in winter, one should include e trailing lantana, if a free bloom- and something showy if desired

BE THERE A WILL WISDOM POINTS HE WAY.—The sick man pines for re- f but he dislikes sending for the doc- r, which means bottles of drugs never nsumed. He has not the resolution to ad his stomach with compounds which ell villainously and tasts worst. But if have the will to deal himself with his lment, wisdom will direct his attention Parmelee's Vegetable Pills, which, as specific for indigestion and disorders the digestive organs, have no equal.

A desirable addition to any ward- obe is a simple blouse worked in a etty cross-stitch. In fact to be up- -date some of this old-fashoned mbroidery must adorn at least one your shirtwaists, or a tub dress.

Cross-stich is very dainty for the coration of children's clothing. A ale blue linen frock with a design of pple blossoms in pink, lemon aad hite floss on the collar, cuffs, yoke nd belt, and a band encircling the ntire skirt was a perfect beauty.

A great deal of interest at present centered in a revival of the old alian stiletto, or cut work, on fine r course weaves of linen. Both the ussian and Bulgarian linens are us- d for it.

Dainty little napkin holders are ade of linen scrim with a cross- tich design of yellow daisies through he centre. The hem is turned up on ach edge with a single row of titches.

No garden is complete without a ood variety of hardy perennials. une first to July tenth is the best ime to sow the seed for next year's looming.

La grippe, pneumonia, and influenza often leave a nasty cough when they're gone.
It is a dangerous thing to neglect. Cure it with

**Shiloh's Consumption Cure** The Lung Tonic

The cure that is guaranteed by your druggist.

## GOOSE STUFFING.

**A Town Whose Industry Is the Development of Goose Liver.**

The raising, stuffing and shipping of geese have become quite a large industry in the vicinity of Watertown, Wis., and about 90,000 pounds of stuffed geese and about 325,000 pounds of stuffed fed geese are shipped annually from there to all parts of this country. The demand for stuffed geese is increasing all the time, and the shippers of this class of poultry claim it is not possible to fill all their orders unless these are placed early in the fall. The geese have to undergo the stuffing process to produce abnormally large livers.

In stuffing the goose the feeder holds it between his knees and forces the noodles down into its throat, but each noodle must first be dipped into warm water to make it more slippery. During the first week eight noodles are thus given three times a day, and during the second week the same number are given four times every day. From then on the stuffing has to be done every three or four hours, night and day, and each time six or seven noodles are forced down. The geese have by this time accumulated so much fat and the liver has expanded to such proportions that they have to be watched continuously, as some are liable to choke and thus prove a total loss. The entire household is called upon, and every man, woman and child has to take turns and sit up and attend to the geese.

At last, when ready for market, the geese are killed, and the feathers on the breast and belly must be picked immediately, while the bodies are warm; otherwise the very tender skin would be torn or damaged, and this would allow the thick layer of the precious goose fat to ooze out. The wings and back parts of the fowl can be picked more easily and are first dipped into hot water to facilitate the process. After they are thoroughly picked the heads, wings and legs are tied together on the back and the birds hung up in a cool place and allowed to freeze solid.

Prepared in this way they are very appetizing looking. Their size is enormous. In weight they range from twenty to twenty-eight pounds each, some extra large ones weighing from thirty-four to thirty-six pounds. The livers are generally very large, covering an ordinary soup plate, and some weigh over three and one-half pounds. —Leslie's Weekly.

**The Fire Curtain Stuck.**

Since the Chicago theater fire the life of the theater manager in Berlin has not been a happy one. The police decree was promptly issued, under which ever since at every theater in the city the iron fire curtain has had to be lowered after every act, and, as this curtain weighs about five tons, the constant repetition of the operation is not without its inconveniences. The other night it brought about a queer deadlock at the Metropol theater, where, as the fire curtain stuck at the end of the last act but one, the performance was stopped for the night despite the protests of the public, who did not even get their money back. The only solace offered by the management was to fix the lapsed act for the afternoon next but one, for which tickets were issued free as the audience left the theater.

**Relative Danger of Machinery.**

Statistics collected in Germany have shown that 28 per cent of the accidents caused by machinery used for industrial purposes, such as manufacturing, were due to defects in the machines and to lack of proper safeguards. On the other hand, over 40 per cent of the accidents occurring with agricultural machinery were traceable to those causes. Accordingly there is a call for the use of improved safety devices upon all machines used on the farm. Feed cutting machinery is found to be particularly liable to cause accidents. A considerable majority of those injured by agricultural machines are children and youths.

**Danger Signals.**

Red skirts and red neckerchiefs worn by women picking up coal on railroad tracks have caused so many nervous thrills to engineers on locomotives rushing at high speed around curves that one of the principal transportation companies in the country is doing everything in its power to check the wearing of this danger signal color wherever its trains run, a proper precaution against the premature breaking down of men of long experience at the throttle.

**When the Tree Falls.**

Close to the old palace of the emperor of Korea, now deserted, is the hill of Pouk Han, about which there is a curious superstition. It is believed that when the last tree is gone from Pouk Han the end of Korea is at hand, and it is death for any one to cut wood on the mountain. At present there is but one tree on the summit, whose solitary and rugged appearance gives the impression that the prophecy is not far from fulfillment.

**Public Lands.**

More than 22,824,299 acres of the public lands were turned over to private individuals last year. This means that an area almost equal to that of the state of Indiana has within that time been added to the productive regions of the United States. Most of these newly opened lands were homesteaded by farmers.

## RAINY RIVER MAN HAD TROUBLES.

**Till Dodd's Kidney Pills Cured his Kidneys.**

**Then his Rheumatism and other Pains Vanished once and for all—His Case only one of many.**

Berwick, Ont., June 20. (Special) —That Dodd's Kidney Pills will cure Rheumatism, or any other disease resulting from disordered Kidneys is the experience of many of the settlers in this Rainy River country. The case of Wm. John Dixon of this place is a fair sample of the work the great Canadian Kidney Remedy is doing.

"I had Rheumatism so bad that I had to use a stick to walk. I had pains in my back and right hip and I had no comfort in sleeping.

"I could no more than dress or undress myself for nearly two months and I was for nearly three weeks I could not lace my right shoe.

"My brother advised me to try Dodd's Kidney Pills and I did so. After taking three boxes I could walk around and lace up my shoes and do my work. Six boxes cured me completely."

Dodd's Kidney Pills are the one sure cure for sick Kidneys. Sick Kidneys are the cause of nine-tenths of the ills the human family suffers from.

If the summer proves to be hot and dry nothing will feel it more than your sweet peas, and for this reason you must give them an abundance of water, for they drink like fish.

Hardy carnations are as large, as sweet and in as great variety as the greenhouse carnations. Plant any time until June, as they do not bloom until the second season manure highly cover in cold weather.

PREVENT DISORDER—At the first symptoms of internal disorder, Parmelee's Vegetable Pills should be resorted to immedfately. Two or three of these salutary pellets, taken before going to bed, followed by doses of one or two pills for two or three nights in succession will serve as a preventive of attack of dyspepsia and all the discomforts which follow in the train of that fell disorder. The means are simple when the way is known.

The cypress and balloon vine are ery little beauties, suitable for planting where gracefullness and daintiness are desired, rather than vines with thick foliage for the purpose of covering unsightly backgrounds.

Use Lever's Dry Soap (a powder) to wash woolens and flannels,—you'll like it. 32.

It is claimed that the castor oil plants when cultivated as pot plants and brought into the house several hours each day will effectually drive out the mosquitoes,

Worms derange the whole system. Mother Graves' Worm Exterminator deranges worms, and gives rest to the sufferer. It only costs 25 cents to try it and be convinced.

Early June is the time to set out chrysanthemum vines for fall display. Old plants should be divided so that one good shoot is left to each root.

**Ask for Minard's and take no other.**

If portulaca has been sown leave it till it begins to blossom, then put the colors where you want them.

Hard and soft corns cannot withstand Holloway's Corn Cure; it is effectual every time. Get a bottle and be happy.

**Explanation of a Sword Trick.**

A trick in which a sword is apparently passed through a person's abdomen is explained as follows: The sword employed is a thin, flexible, dull blade. The prestidigitator, whose body the sword will simply pass around, but not pierce, carries concealed beneath his vest a sheath that consists of a hollow tube, semicircular in shape, the two extremities of which are bent in contrary directions in such a way that they are situated in the same straight line, the two orifices opening in front and behind at right angles with the abdomen. This tube runs around the farther side of the man, who, appearing instinctively to grasp the point of the sword as if to protect himself, directs it into the metallic tube. The flexible sword makes its exit between the tails of the coat. It is necessary to operate rapidly, so that the spectators shall not have time to see that the length of the sword has diminished, the curved line that follows not being the shortest passage from one point to another.

What shrunk your woolens? Why did holes wear so soon? You used common soap.

**SUNLIGHT SOAP** REDUCES EXPENSE

Ask for the Octagon Bar.

**Dizzy?** Appetite poor? Bowels constipated? Tongue coated? Head ache? It's your liver! Ayer's Pills are liver pills, all vegetable. Sold for sixty years. J. C. Ayer Co., Lowell, Mass.

Want your moustache or beard a beautiful brown or rich black? Use **BUCKINGHAM'S DYE**

FOTT & T. S. P. HALL & CO., NASHUA, N. H.

# SELECTIONS

## ANTIQUITY OF CIVILIZATION.

**The March of Time From Flint Implements to Ivory Statuettes.**

So far as the question of time is concerned it deserves notice that not merely geology, but almost every form of inquiry into the past, throws further back the limits usually assigned.

Egypt, for instance, is continually furnishing fresh proofs of the antiquity of civilization. Professor Flinders Petrie expounded at Owens college, Manchester, England, a few days ago the results of recent explorations at Abydos, in upper Egypt, from which it appears that the ruins at that one spot tell a continuous story that carries us back to 5000 B. C. Abydos was the first capital of Egypt and remained for forty-five centuries the religious center, the Canterbury of the land, and there the Egyptian Exploration fund has unearthed the remains of "ten successive temples, one over the other." From the age of the first temple a group of about 200 objects has been found, which throws surprising light on the civilization of the first dynasty. A part of a large glazed pottery vase of Mena, the first king of the first dynasty, about 4700 B. C., showed "that even then they were making glaze on a considerable scale, and also inlaying it with a second color. The ivory carving was astonishingly fine, a figure of a king showing a subtlety and power of expression as good as any work of later ages."

At about 4000 B. C. an ivory statuette of Cheops, the builder of the great pyramid, was found, the only known portrait of him. Making every possible allowance for the marvelous rapidity of art development, must not many thousands of years have rolled over between the pristine dwellers in the Nile valley and the men who carved ivory statuettes and manufactured glazed work inlaid with second colors? It is a long, long march from flint implements to the solemn temple ivory statuettes and human portraits.—London Telegraph.

**Diamonds.**

The diamond, despite its high price, is not the most fashionable stone. The emerald enjoys that distinction, but the colored stone must have a few diamonds "to throw it up." "When I was a youngster," says a famous jeweler, "emeralds were $20 a carat. Today a fine stone is worth $2,000. A twenty grain pearl I used to sell at $400. Today it would be worth $3,000. Rubies and sapphires have gone up also, but not so much in proportion. During my long experience some stones have come in and gone out of favor, the cat's eye, for example. Settings are lighter than they used to be. The fashion is to set precious stones in platinum, as platinum never tarnishes. I don't think with platinum we get as much brilliancy out of the stone as with silver, but silver in foggy weather goes black. Never buy a diamond set in gold. If you see one in a gold mount, you may be suspicious. A yellow stone painted with black ink looks white, and it is then set in gold. That is the way in which many pawnbrokers have been taken in.

**When an Oil Lamp Was a Curiosity.**

C. M. Shackelford, a Shelby county pioneer, was the first man to introduce oil in the county. Some time in the fifties he visited St. Louis and brought to Shelbyville two lamps and a couple of gallons of oil.

When the citizens of the village learned of it, there was considerable excitement—much more than when the electric lights were turned on a few years ago. About 400 people gathered at the store to watch Mr. Shackelford take his life in his hands. He loaded up the lamp, turned the wick and prepared for illumination by fastening a paper lighted on the end of a stick. The crowd looked uneasy, but didn't run, and the new lighting works were an entire success. Oil cost $3 per gallon. Mr. Shackelford bought some to introduce the improvement among his fellow citizens, but he only disposed of a gallon the following year. — Clarence (Mo.) Courier.

**New Jersey Penny of 1787.**

Mr. J. P. Leib claims to have the oldest coin in Baltimore. It is a penny made in 1787 by the state of New Jersey. This was one year before Washington was made president of the country and five years before the United States penny was made. One side of the coin contains a shield and the motto "E Pluribus Unum," and on the other is a horse's head and a plow and the words "Nova Caesarea." Mr. Leib found the penny on the property of his grandfather, the late Christian Leib, who was a soldier in the Revolutionary war. The farm was in York county, Pa., and the coin was found near a still, together with a penny of 1800, which Mr. Leib also has in his possession.—Baltimore Sun.

**An Unresponsive Mayor.**

Already Mayor McClellan's fame has reached beyond the Alps where lies Italy. His honor some time ago received from a subject of King Victor Emmanuel a letter in which the writer explains that he is an adept at thought transference. He says that a thought has been wafted across the ocean informing him that the mayor would lend him 1,000 lire for a short time. Since then two more letters have arrived from the same correspondent. Colonel McClellan has figured it out that 1,000 lire is about $195, so he has done his best to transfer this thought to Italy, "Nothin' doin'."

Put cyclamen out of doors in a cool place during summer, and give only enough water to keep the bulb from shiveling. Repot in September.

Verbenas will bloom the first season if seed is sown in the open in May.

The pattern is made small or large by the mesh of the canvass. The larger the mesh the wider your embroidery will be.

For chiffon, silk, muslin or sheer fine materials the delicate Persian shades of blue, pink, green or yellow are mostly suitable for the work.

# I Am Strong Now And Do My Own Work.

**Nervous System Was Exhausted and Pains Were Almost Unbearable—Health Restored by**

## Dr. Chase's Nerve Food

As a convalescent food there is nothing to be compared to Dr. Chase's Nerve Food. Gradually and certainly this treatment enriches the weak watery blood, restores vitality to the wasted nervous system and builds up the body generally.

If you are pale, weak, nervous, irritable and unable to sleep or rest there is health and strength awaiting you in the use of Dr. Chase's Nerve Food.

Mrs. J. Hatcher, 224 Sherbrooke street, Peterboro', Ont., and whose husband is a moulder at the Hamilton Foundry, states: "I had an attack of inflammatory rheumatism, which left me in a very run-down state of health, and in fact my whole nervous system seemed exhausted and worn out. I could not sleep, and at worn out. I could not sleep, and at times the pains in my head were almost unbearablei As a result of these symptoms I was unable to attend to my housework, and felt miserable most of the time.

On the advice of a friend, I began using Dr. Chase's Nerve Food, and can say that it has proved of very great benefit to me. I am able to do my own work now, and feel stronger and healther than I have for years. I can truthfully state that this is due to the use of Dr. Chase's Nerve Food, which I consider a great health builder."

Dr. Chase's Nerve Food 50 cents a box, six boxes for $2.50, at all dealers, or Edmanson, Bates & Co., Toronto. To protect you against imitations, the poetrait and signature of Dr. A. W. Chase, the famous receipt book aothor are on every box.

**GRAIN** As the western representative of Jas. Richardson & Sons, Kingston and Toronto, I am always in the market for car lots of grain of every variety, wheat, oats, barley and flax. I will be pleased to write or wire you quotations at any time on whatever you have to offer. Correspondence solicited in either English or German. Requests for information re shipping etc., given immediate attention. Reference:—Merchants Bank of Canada.

EDWARD O'REILLY, WINNIPEG.

Keep your fuchsias shaded from the direct rays of the sun. Keep them in a shaded situation about all of the time, when the extreme weather comes.

If attacked with cholera or summer complaint of any kind send at once for a bottle of Dr. Kellogg's Dysentery Cordial and use it according to directions. It acts with wonderful rapidity in subduing that dreadful disease that weakens the strongest man and destroys the young and delicate. Those who have used this cholera medicine say it acted this cholera medicine say it acts thorough cure.

Garden paths can be kept free from weeds and grass by pouring over them boiling hot suds on wash day, putting a handful of salt in each bucket of suds.

**MINARD'S LINIMENT Lumberman's Friend.**

The last of the gladiolus bulbs and the tuberoses that have been reserved for late planting should now be started into growth, before the dry hot weather.

NO ALCOHOL IN IT—Alcohol or other volatile matter which would impair strength by evaporation, does not in any shape enter into the manufacture of Dr. Thomas' Eclectric Oil. Nor do climatic changes affect it. It is as servicable in the Arctic Circle as in the Torrid Zone, perhaps more useful in the higher latitudes, where man is more subject to colds from exposure to the elements.

The adjustment of the canvass on plain goods should receive careful attention. It must be firmly basted to the right side of the material upon which the embroidery is to be executed, or the work will be hopelessly crooked.

**MINARD'S LINIMENT is used by Physicians.**

Quite a fashionable novelty this season are the hand decorated buttons for shirt-waists with a cross-stitch design. From the pattern given a small figure may be designed which can be used for these.

**New York's Harbor Eagle.**

Above the pier—close to it and together, as if for comfort—huddled a cluster of tugs, those curious, powerful, persistent little steam craft that ply back and forth and up and down, saucily and busily important, their rows of fenders trailing in the water, their black smoke bannering out behind. Often I had watched them nosing in and out among the heavier craft, nudging a great ocean liner into midstream and singly or together pushing or pulling some huge helpless bulk, as an ant or as two might seize and trundle a great dead bumblebee. Their power and their impudence had filled me with wonder. Viewing them now in repose, I was impressed by the fact, hitherto unconsidered, that upon almost every pilot house was a golden eagle with extended wings—a symbol of power and swiftness—and it was borne in upon me that the tug in truth is the harbor eagle, with all other craft for its prey.

**Trees and Rainfall.**

Some persons ask if trees affect rainfall. That question is one on which foresters differ, but the large majority are satisfied they do induce rainfall. Vonmulere, Schenck and many others are emphatic in the claim that forests induce rainfall. It is certain they retain humidity to a great extent, and that alone would affect the rainfall; but the point on which all agree is the value of forests for the conservation of water, preventing floods or drought, distributing the water evenly the whole year. It is a matter of history in foreign countries that when forests have been destroyed the rainfall has been greatly lessened and more spasmodic.—T. P. Lukens in Maxwell's Talisman.

**A Unique Tennessee County.**

"The county of Franklin, in my state," said a Tennessee man, "has the unique distinction of being the only county that ever undertook to secede from the state to which it belonged. A great many people have doubtless forgotten that the people of Tennessee voted twice on the proposition to secede from the Union. At the first election in February there was an enormous majority—about 100,000—against disunion. A few months later, when the attack on Fort Sumter stirred the passions of men, another vote was had, and the earlier verdict was reversed by about the same decisive figures.

"But in Franklin county, where state rights and secession claimed the allegiance of the entire population, there was such intense disgust over the result of the first election that, led by the Hon. Pete Turney, afterward supreme court judge and twice governor, the citizens held a mass meeting and solemnly passed an ordinance of secession from Tennessee. Of course, when the state reconsidered in June, Franklin county was mollified and renewed its allegiance."

**Units of Measure.**

The editor was taught by his governess that three barleycorns measured one inch, and at the mature age of six years he determined to test the accuracy of this statement. He had no difficulty in finding the barleycorns, but somehow no three grains that he picked up in the chickens' yard agreed with the formula. He never attempted the more scientific test which is thus described: "The length of a pendulum oscillating in a second in vacuo at sea level in the latitude of London is 39.13929 inches, and from the knowledge of this fact the standard of the inch, foot and yard can easily be obtained should the official standards at any time be lost or mislaid." When in 1834 the "standard" measure was destroyed by fire at the house of parliament an attempt was made to restore it by the pendulum test, but pendulums, like barleycorns, were found not to agree.—London Chronicle.

**Did He Get Off?**

The famous Liddell, who, with Scott, compiled Liddell and Scott's lexicon, was dean of Christchurch college, Oxford. It was whispered in regard to the lexicon that Liddell provided the money and Scott the brains. A young undergraduate was haled before the dean for some misdemeanor. "I hear, Mr. ——, that you have a pretty wit for impromptu verse," said the dean. "If you will write one on the lexicon I will let you off." The young man thought a moment and then said:

"There's a Lexicon written by Liddell and Scott;
Some of it's good, and some of it's not.
The part that is good was written by Scott,
The part that was written by Liddell is rot."

—London News.

**The Silk Spinning Oyster.**

A mollusk that might take an important place in textile industries if it existed in sufficient numbers is found in warm seas, especially on the coast of Sicily. It is the pinna, a genus of wing shelled bivalves, of which one species attains a length of two feet. To attach itself to the rocks it spins a cable of strong filaments, called collectively the byssus. These threads are wonderfully strong, silken in texture and have been woven into various delicate fabrics. A pair of gloves from this material may be seen in the British museum, and fine mummy cloths made from it by the ancients are still preserved.

# THE SLOCAN DRILL

C. E. SMITHERINGALE, Editor and Prop.

IS PUBLISHED EVERY FRIDAY AT

SLOCAN, - - - - B. C.

Legal Advertising 10 cents a line for the first insertion and 5 cents a line each subsequent insertion.

Certificates of Improvement, $7 each.

Transient advertisements at same rates as legal advertising.

Locals will be charged 10 cents a line for each insertion.

Commercial Rates made known upon application.

The Subscription is $2 per year, strictly in advance; $2.50 a year if not so paid.

Address all letters to—

THE SLOCAN DRILL,
Slocan, B. C.

UNION LABEL

FRIDAY, JULY 1st, 1904.

## DRILL POINTS.

Today is the last day to obtain the rebate on city taxes.

Born.—On June 24th, the wife of Peter Swan, of a son.

Mrs. D. St. Denis and children are visiting friends in Nakusp.

Nels Holgren left on Tuesday to take up his residence in Hope.

D. S. McVannel, the new postmaster, takes over the postoffice today.

J. Docksteader, of Nelson, was here Monday, rustling life insurance victims.

Capt. McKinnon is now in charge of the helm on the str. Slocan, vice Capt. Reid.

Express money orders are payable everywhere. They are cheapest and safest.

In common with other towns, insurance companies have raised their rates in Slocan.

Kitimaat Harbor is spoken of as the assured Pacific terminus of the Grand Trunk road.

Nakusp is celebrating Dominion day in royal shape. This place sent a few visitors.

The heavy frost of last week destroyed much garden truck in the valley ranches.

The sacrament of the Lord's supper will be dispensed in Knox church on Sunday evening.

Sandon and New Denver school children held a joint picnic on the lake shore Wednesday.

Hard times will lessen the Slocan crowd that usually takes in the Nelson sports on Dominion day.

A bargeload of lumber came down from the Ten Mile mill Monday, for shipment to the Northwest.

The O. S. Lumber Co. have all their logs run out of Wilson creek, and almost all out of Bonanza creek.

Next Friday the license commissioners meet, to arrange the transfer of the license of the Arlington.

T. H. Twigg, one of the best known labor leaders in the west, died in Victoria Friday of consumption, aged 35.

W. Boie came in on Saturday from the Boundary and passed through to New Denver, to see his wife and young son.

Overtures have at various times been made by several outfits to purchase the entire assets of the local lumber concern.

Miss Few has resigned her position on the public school staff. She left for her home near Victoria on Saturday morning.

A special train leaves Sandon early this morning, connecting here for the Nelson celebration. It will return tomorrow night.

Boie Bros. have a grading contract of a mile and a half on the Great Northern extension to Phoenix. They employ 100 men.

Insurance companies are informing various B.C. towns to improve their fire fighting apparatus or they will retire from business.

J. A. Faulds arrived in from Victoria on Tuesday evening, to take a clerkship at the depot, vice Mr. Hinton transferred to Nelson.

In justice to local advertisers, THE DRILL this week declined a large advertising contract from an eastern departmental store. 'Nuff sed.

Next week Capt. Reid will assume command of the tug Sandon, and will tow down from the head of the lake a big boom of logs for the local mill.

Messrs. McNeish and Arnot went up to Sandon on Wednesday, to attend a meeting of the retail business men of the country. It's all up with the Nelson wholesalers.

An order in council has been passed by the dominion government authorizing the payment of the labor time checks of Carlson & Porter, for the Lardo railway construction.

W. T. Shatford & Co. have decided to clear out their entire line of ladies' shirt waists, and have put a price on them that is bound to make them go. Call early and get first choice.

THE DRILL will print you, on short notice and in any amount, shipping tags, billheads, statements, letterheads, noteheads, memos, receipts, envelopes, visiting cards, business cards, bills of fare, dodgers, posters, etc. etc. Will meet any quality or price.

Pay up your subscription.

Con Murphy returned Wednesday from a trip to Vernon.

Rowland Machin, Bennet's fuse man, was here Tuesday.

Mrs. W. H. Brandon, Silverton, is spending a few days here.

The Black Prince owners will crown grant their principal claim.

Nick McKian was in town Monday renewing oid acquaintances.

There will be good chances for speculators here on the 25th.

Wilson Bros., Victoria, are establishing a wholesale grocery at Nelson.

Half of Ten Mile's population went to Nelson Monday, to take in the circus.

W. Koch has a contract for building a two mile flume at the Alice mine, at Creston.

Mrs. John Bourne, Nakusp, is visiting with Mr. and Mrs. Edwards, at the station.

Born.—In New Denver, on June 24, the wife of Wm. Thomlinson, of a son. Here's ta thee, lad.

Warm weather has prevailed this week, the thermometer registering 110 in the sun on Wednesday.

Hon. Messrs. McBride and Green are touring the Boundary and Kootenay towns, looking after government affairs.

If you need anything in the boot and shoe line, call at W. T. Shatford & Co.'s. They have the most complete stock in town.

A carload of shingles was sent out on Wednesday by the local mill company, to Elmira, Ont. It was No. 11 for the season.

If a class of sufficient numbers can be obtained, high school studies will be undertaken at the school next term, running two hours after the regular lessons each day. Those desirous of joining will consult with Principal Hindle.

A friend has written from the coast that a spiritualist medium has proclaimed that THE DRILL man is to really and truly expire on October 18 next; cause, a mine explosion. All enemies will kindly prepare to chortle: all friends will please prepare their crepe bands and attend the funeral. Delinquent subscribers will be among the chief mourners.

### School Report.

Last month the average daily attendance in the first division of the public school was 27.38; pupils attending during the month 30; tardiness of pupils 14; visits by trustees 3; visits by other persons 44. For the year just closed the first division reported: No. of days school was in session, 213; average attendance 27.57; cases of corporal punishment 5; tardiness of pupils 141; visits by trustees 10; visits by inspector 1; visits by other persons 79; total number on roll 45; total boys 19; total girls 26.

### Strike on the Combination.

Geo. Stoll was wearing a happy smile on Wednesday evening, having made a satisfactory strike during the day on the Combination claim, situated near the old bridge on Springer creek. He has been working single-handed for some days, confining his labors to the upper tunnel. His strike consists of a foot of white quartz, which is plentifully sprinkled with galena and iron. George is working away, expecting any time to run on to a bunch of the shipping article.

### Arlington Arrivals.

Out-of-town visitors at the Arlington hotel during the week were: N. F. McNaught, J. W. Callard, Silverton; A. G. Gainer, Strathcona; F. Long, Sandon; J. M. Martin, D. Berg, Nelson; S. Bieden, Spokane; T. McCrossin, Miles, Wash.

### MINING RECORDS.

Appended is a complete list of the various records registered at the local registry office, H. P. Christie being mining recorder:

LOCATIONS.

June 20—Lakeview, south from town, H A Hicks.

ASSESSMENTS.

June 20—Fir.

22—Constance, Zillah.

24—Reliance, Sheffield.

25—Anchor, X L C R, Porcupine, Sevile, Maple Leaf, Sunbeam, Fallen Leaf.

TRANSFERS.

June 24—Lone Dutchman ½, T Henderson to J A Kirkpatrick.

## NOTICE.

**Respecting Coal and Petroleum Lands in South-East Kootenay.**

NOTICE is hereby given that licenses to prospect for coal and petroleum upon and under lands situated within Block 4,593, South-East Kootenay, will be issued forthwith to all persons who have made proper application, in pursuance of the provisions of the "Coal Mines Act" and amendments.

The fee for each license will be $100, and all applicants who have not deposited accepted bank cheques to cover that amount are hereby required to do so without further notice.

Licences will be issued in the following form, viz:—

"MINING LICENCE ISSUED UNDER THE COAL MINES ACT AND AMENDMENTS.

"In consideration of one hundred dollars now paid under the said Acts, and subject to the provisions thereof, I, W. S. Gore, Deputy Commissioner, acting for the Chief Commissioner of Lands and Works, licence to enter, prospect, search and work for coal and petroleum (but no other metal or mineral) upon, in and under all that piece or parcel of mineral land situate in and forming part of Block 4,593, East Kootenay District, and described as follows:— and not exceeding in the whole six hundred and forty statute acres.

"Owing to the number of applicants for licences to prospect for coal and petroleum, and the peculiar circumstances surrounding the application for and issuance of these licenses, and the well-known fact that the issuance has been unavoidably suspended for so many months, the Government of British Columbia finds it impossible to determine the equitable rights of the numerous applicants. Therefore, for the purpose of enabling all persons to go before the proper tribunal for the determination of their respective rights and priorities, this licence is issued and accepted subject to such prior rights of other persons as may exist by law, and the date of this licence is not to be taken or held as in any sense determining such priority, and further it shall not be taken or held to waive enquiry by the Courts into the proper performance of all conditions precedent as between adverse claimants; and further, on the understanding that the Government shall not be held responsible for, or in connection with, any conflict which may arise with other claimants of the same ground, and that under no circumstances will license fees be refunded.

"And the holder hereby waives any claim or demand against the Government, and expressly agrees not to take any steps or proceedings, or present any petition, to enforce any alleged claim or demand against the Government of the Province of British Columbia arising out of the issuance of this licence or of any other matter or thing appertaining thereto.

"The land being under reserve from pre-emption and sale this license does not include any right other than the right to prospect for coal and petroleum.

"The duration of this licence is for one year from the , 190 .

.....

"Deputy Commissioner of Lands & Works.
"Lands and Works Department,
"Victoria, B.C., , 190 ."

R. F. GREEN,
Chief Commissioner of Lands & Works.

## Notice to Delinquent Co-owner

To Anna Farini, or to any person or persons to whom she may have transferred her interest in the Coronation and Memphis mineral claims, situated on Twelve Mile creek, and recorded in the Recorder's office for the Slocan City mining division.

You are hereby notified that we, James Smith, F.M.C. No. B59995, and Charles Brand, F.M.C. No. B60037, have caused to be expended the sum of four hundred and ten dollars in labor and improvements on the above mentioned mineral claims, in order to hold said claims under the provisions of the Mineral Act; and if within 90 days from the date of this notice you fail, or refuse, to contribute your proportion of such expenditure, together with all costs of advertising, your interest in said claims will become the property of the subscribers, under section 4 of an Act entitled "An Act to amend the Mineral Act, 1900."

Dated at Slocan, B.C., this 14th day of May, A.D. 1904. JAMES SMITH

## Notice.

NOTICE is hereby given that at the expiration of 30 days from date, I intend to apply, at a special sitting of the board of license commissioners of the city of Slocan, for a transfer of the retail liquor license held by me for the Arlington Hotel, situated on lots 1 and 2, Block A, Slocan, to Geo. Henderson.

L. M. KNOWLES

Dated, June 7. 1904.

## Timber Notice.

NOTICE is hereby given that thirty days after date I intend to apply to the Chief Commissioner of Lands & Works, at Victoria, for a special license to cut and carry away timber from the following described lands, situated on Robertson creek, West Kootenay district: Commencing at a post planted about ten chains south of the south-east corner of Geo. Larcher's pre-emption, running thence 80 chains north; thence 80 chains east; thence 80 chains south; thence 80 chains west, to point of commencement.

FRANK PURVIANCE

Dated May 14th, 1904.

## Timber Notice.

NOTICE is hereby given that thirty days after date I intend to apply to the Chief Commissioner of Lands & Works, at Victoria, for two special licenses to cut and carry away timber from the following described lands, situated on Robertson creek, West Kootenay district:—

**First Location.**

Commencing at a post, about one mile north of George Larcher's pre-emption, thence 80 chains west; thence 80 chains south; thence 80 chains east; thence 80 chains north, to point of commencement.

**Second Location.**

Commencing at a post, about two miles north of Geo. Larcher's pre-emption, thence 80 chains west; thence 80 chains south; thence 80 chains east; thence 80 chains north, to point of commencement.

CHAS. RIEDLINGER

Dated May 14th, 1904.

# Advertise your Business

in these days of progress and competition no man in business should neglect an opportunity to keep his goods before the people. Modern usages proclaim advertising the one road to success; neglect of it invariably ends in disaster. A merchant's standing in a community may be judged from the advertisement he carries in a local paper. To sell goods a man must advertise. All live men seek the aid of the printer

The Drill offers a reward to all who advertise

to all persistent and liberal advertisers: it is read by everyone. It guarantees satisfaction
