Senate

Senate voted at its February meeting to refer to UBC's 12 faculties a proposed Calendar statement that seeks to implement a motion passed at the January meeting of Senate allowing students to view their marked, final exam papers with course instructors.

The January Senate motion charged department heads with ensuring that the policy is carried out, provided students submit a written request that they be allowed to view the marked paper with the course instructor.

In the intervening month, UBC Registrar Ken Young, "with the help of some other members of Senate," prepared a proposed Calendar statement to implement the January motion. Last week the Senate agenda committee proposed that it be referred to all faculties "for consideration of its administrative implications."

The statement, which faculties are asked to consider in time for Senate's April meeting, is as follows:

"A final examination becomes the property of the University and must remain in the possession of the University until destroyed or otherwise disposed of. Upon receipt of written application from the student, the Department Head, Director or Dean will make every effort to arrange for the student to view her or his marked final examination paper (or papers) with the course instructor. The purpose of this exercise is exclusively pedagogic, and distinct from an informal review of the marks and also from the Review of Assigned Standing."

Several student Senators, including Doug Watt, who sponsored the original motion in January, argued that referring it to the faculties would delay implementation.

An amendment to the agenda committee's motion, which would have required the faculties to report back to Senate in March, was defeated. Senate then went on to approve the motion from the agenda committee.

* * *

UBC's Faculty of Commerce and Business Administration is concerned about failure rates among first-year Commerce students who transfer from community colleges as compared to the rate for students entering the program after completing first-year Arts and Science at UBC.

Commerce Dean Peter Lusztig told Senate at its February meeting that last year 73 per cent of the students who entered his faculty from first-year Arts or Science passed all 15 units, while eight per cent failed or withdrew. Of the 100 college transfer students in the same year, 50 per cent passed 15 units and 28 per cent failed their year.

"It is clear," Dean Lusztig said, "that (Commerce) will have to exercise some judgment and discrimination in the handling of applicants from community colleges." Applicants from some colleges, like Okanagan College, he continued, have no difficulty and their performance is at least equal to those coming from Arts and Science.

"But there are transfer students from particular colleges that are causing some problems."

Dean Lusztig said he had drawn the problem to the attention of Senate's admissions committee and had shared the information on success-and-failure rates with community college teachers instructing in subjects required for entry into the Commerce faculty.

* * *

UBC's Senate approved in principle at its February meeting the goals and objectives as stated on pages 26 to 30 of *The Mission of the University*, a document prepared by President Douglas Kenny at the request of the Universities Council of B.C. and which was made public in December.

The motion to approve the goals and objectives was made by Convocation Senator J.F. McWilliams, who said the mission statement was an important document about the directions in which the University would be moving over the next decade. He said the four Convocation members on Senate felt the statement "should have the official recognition of Senate."

The motion was approved without debate.

* * *

Senate also:

- Approved a change of name for the Department of Metallurgy in the Faculty of Applied Science to the Department of Metallurgical Engineering; and
- Was informed by Dr. Jon Wisenthal, chairman of its curriculum committee, that a sub-committee chaired by Prof. Roy Nodwell, head of the Department of Physics, has been established to conduct an "on-going review of the situation regarding statistics courses on campus."

Vancouver Park Board workman was almost hidden last week in the underbrush on the edge of the Point Grey cliffs near the Museum of Anthropology as work began on erosion-control program. Root-damaged and dangerously located trees, which would strip away protective mantle of soil when they fell, were cut down to within one metre of ground level, ensuring their survival. Trees' root system will aid in stabilizing soil mantle along cliff edge. Tree-cutting was done under watchful eyes of members of the Wreck Beach Committee, which is urging that beaches at base of cliff remain in their natural state. UBC has approved spending $153,000 for first phase of erosion control plan, which also includes improvement of trails to beaches, continuation of a revegetation program on eroded areas of cliff face and reconstruction of storm drain at cliff base.

Park plan readied for Endowment Lands

A proposal for a major regional park of some 600 hectares (1,500 acres) on the University Endowment Lands is being prepared by the Greater Vancouver Regional District.

The boundary of the proposed park (see map at right) includes two large blocks of forested land south of 16th Avenue and north of Chancellor Boulevard, and a connecting corridor.

About 50 hectares or 130 acres of the UEL are classified as "reserve land" and are not included in the park proposal. The University Golf Course, residential areas in the UEL, and Marine Drive Foreshore Park, (the strip of land on the seaward side of Southwest and Northwest Marine Drive, controlled by the Vancouver Park Board), are also excluded from the park proposal.

The areas designated as reserve lands are located on 16th Avenue, Chancellor Boulevard and adjacent to University Hill secondary school. A GVRD information package on the park proposal says the GVRD has requested that the province "discuss future uses of the reserve lands co-operatively with the GVRD, UBC, the City of Vancouver and local residents."

The GVRD park proposal would establish a "nature park" to encourage public use of the forest for recreation and education, link the park with the UBC campus "by sharing use of assets and attractions," and foster a high level of co-ordination and collaboration with the public of the regional district, UBC, Vancouver and local residents in decisions on park development and management.

Under the heading of education, the proposal suggests development of a nature interpretation program with self-guiding nature trails and designation of a portion of the forest for use by UBC faculty and students for field trips, sampling and research.

The proposal also calls for the protection of special biological areas such as the Camosun Bog and an aspen grove south of 16th Avenue, and provision of adequate fire protection.

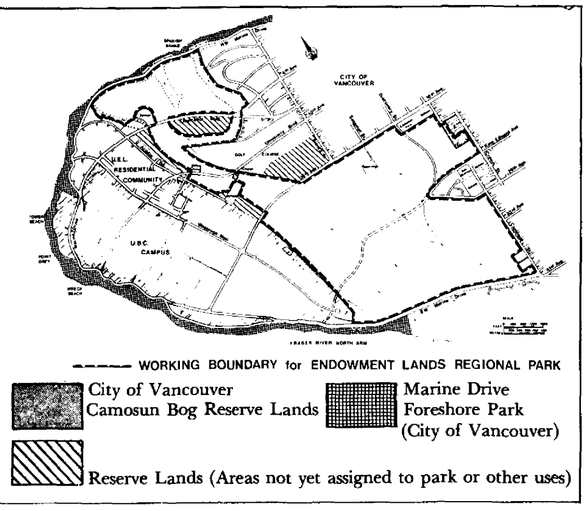
In terms of recreation, the proposal suggests facilities for a variety of activities including jogging, bicycling, picknicking, hiking, horseback riding and camping.

The GVRD is currently holding an open house at its offices at 2215 West 10th Ave. to provide information on the proposal. Hours of the event are 7 to 10 p.m. today (Wednesday, Feb. 27) and Thursday.

The GVRD proposal will be sent to James Chabot, minister of lands, parks and housing, after it has been discussed by the GVRD's park committee on March 12 and the board of directors on March 26.

The GVRD proposal largely follows the recommendations made by a UEL study team appointed by the provincial government in 1977. In its report the study team proposed that just under 2,000 acres, including the University Golf Course and Foreshore Park, "be designated as a natural park supporting integrated uses for recreation, education and forest ecology research."

The study team also recommended that the park be operated by a "representative advisory body" made up of the provincial government, UBC, the GVRD, the City of Vancouver, the Musqueam Indian Band and the public at large.



Survey set for March

The UBC library is planning to ask members of the University community for information and comments on its services.

A short questionnaire, which library officials say will take only a few minutes to complete, will make its appearance early in March in all branches of the campus library system.

The questionnaire will ask library users which branches they use, how frequently they visit them and their views on the various services that are available in campus libraries.

Users' comments will also be requested on such topics as library phone services, ease of access to library materials and the availability of assistance.

The results of the survey will be carefully analysed by a ten-member committee of librarians, which has been meeting since November of last year to devise the questionnaire. The results will affect services offered in the library, a member of the survey committee said.

The questionnaire will probably be handed out to users in larger libraries and will be available at information desks in smaller branches.

Funds sought

An 11-member committee of admirers of the late Prof. B.C. "Bert" Binning, the noted Canadian painter who was head of the fine arts department at UBC from 1955 to 1968, has launched an appeal aimed at endowing a fellowship in his memory.

The committee aims to raise a total of $50,000 to endow a fellowship to be awarded to a graduate student enrolled in the new Master of Fine Arts program, which began this year in the Department of Fine Arts.

Cheques should be made payable to the "University of B.C. - B.C. Binning Memorial Fellowship" and sent to the Department of Fine Arts. Contributions are income-tax deductible.

An exhibition of line drawings by Prof. Binning will be on display in UBC's Fine Arts Gallery in the basement of the north wing of the Main Library from March 5 to 29. The gallery is open Tuesday through Saturday from 10 a.m. to 5 p.m.

UBC institute embarks on trade study after completing 4-year ocean project

Canada and the world in general know a lot more about the international management of the oceans today than they did in the early part of the 1970s.

And one of the organizations which has made a significant contribution to improving knowledge about the oceans is UBC's Institute of International Relations.

The institute, which is headed by energetic political scientist Mark Zacher, has just completed a four-year project on Canada and the international management of the oceans and is about to embark on a similar endeavor which will focus on Canada and international trade relations.

MAJOR CHANGES

Dr. Zacher said the UBC institute decided to embark on the oceans study in the early 1970s when some major changes were in the offing internationally. "In retrospect," he said, "I'm sure we'll look back on the decade of the '70s as the period which saw the most important changes that have ever occurred in ocean management."

The changes referred to by Dr. Zacher include the extension of jurisdiction by states over all resources to a limit of 200 miles off their coastlines, regulation of the uses of the ocean to prevent pollution, implementation of new navigational restrictions and regulation of the uses of the seabed for mining and military purposes.

All these topics have been the subject of more than 50 books, articles and other publications which have flowed from the pens of 18 faculty members and seven research associates who were supported by a $170,000 grant from the Donner Canadian Foundation of Toronto and additional funding from the Department of National Defence, the U.S. Rockefeller Foundation and the Canada Council.

Dr. Zacher believes the major contribution of the UBC project has been to help fill a notable gap in knowledge about oceans issues by generating a great deal of analysis and discussion. And because many of the researchers concentrated on Canadian ocean interests and problems, the project has helped to overcome what Dr. Zacher describes as the "paucity of basic information in this area that existed in Canada at the beginning of the '70s."

DEFINITIVE WORK

He points to the book *Canadian Foreign Policy and the Law of the Sea*, which he edited with research associate Barbara Johnson, as a volume that will "probably stand for some time as a fairly definitive work on Canadian interests and policies in this field."

The book, published by the University of B.C. Press, contains eight essays by participants in the UBC project on issues related to the ocean seabed, fisheries, marine pollution and the UN's Law of the Sea Conference. Reviewers have praised the "superior quality" of the essays "written with the minimum technical and legal jargon."

It seems likely, too, that another major book resulting from the project, written by Dr. Zacher and lawyer Michael M'Gonigle, will have a significant impact on thinking about the control of oil pollution in the oceans through international agreement and regulation.

Pollution, Politics and International Law: Tankers at Sea, published in the fall of 1979 by the University of California Press, was seen in advance by some leading industry officials and political scientists and international law specialists who praised it as "an exciting path-breaking study...which combines the results of wide-ranging research, acute insight into the problems and practices of international industry and inter-governmental negotiations and a commendable degree of objectivity in evaluating the facts and information collected...."

Prof. Mark Zacher

Throughout the course of the project, the institute has disseminated the results of the studies through seminars, public lectures and a major conference entitled "Canada and the International Management of the Oceans," to which key industry and government officials were invited.

Several members of the research team have also been involved in studies for the federal government on fisheries arrangements with foreign governments with respect to the new 200-mile zone and with the provincial government on the B.C. position on maritime boundaries off the British Columbia coast.

Now the institute is embarking on another project – Canada and International Trade Relations – which will see 23 experts from three UBC faculties – Arts, Law, and Commerce and Business Administration – undertake 18 separate research studies to produce an estimated 50 publications.

The major support for the new project will again come from the Donner Canadian Foundation, which has approved grants totalling $275,000 over the next three years.

IMPORTANT ISSUES

Dr. Zacher said the research would focus on important issues of Canada's trade policy and some external economic developments which will have important implications for Canada's future.

"In designing the project," he said, "a major effort has been made to include studies of Canadian trade relations with Asia and the Soviet Union and Eastern Europe, two areas which are looming as increasingly important in international economic relations and in which UBC has considerable expertise."

Dr. Zacher said the economic character of most countries and international economic relations are undergoing fundamental changes which will profoundly affect both the welfare and security of Canada as well as other nations.

He said a number of factors, including the emergence of Japan and the EEC as economic superpowers, the dramatic rise of oil-exporting nations and the increase in Soviet international economic ties, the chronic balance-of-payments deficits of the U.S. and the growth in protectionism in many countries, have all combined to upset the post-World War II international economic order, which was built on the predominance of the North American and Western European states and close policy co-ordination between them.

"Canada's international economic relations and general well-being have felt and will feel the shock of these and other external developments," he said, "and the country may have to restructure its trade policies in some very marked ways to adjust to such changes."

He said a major aspect of the project would be the establishment of links with relevant sectors of government and industry so that results of the UBC studies will have impact in Canada and abroad.

PUBLIC LECTURES

In addition, the institute plans a series of public lectures and conferences with government and business leaders to disseminate research results.

UBC experts in economics and international law, some of them associated with UBC's Institute of Asian Research, will carry out studies on Canadian trade relations with Asia. Topics include the legal aspects of doing business with the People's Republic of China, Canadian-Indonesian economic relations and Japan's policies toward its trading partners.

Under the heading of Canadian trade relations with Russia and Eastern Europe, studies will be done on Canada's role in east-west trade and Soviet policies toward trade with western nations.

The other major research headings are Canada and the structure of international economic relations and Canadian trade policy issues. Study topics include reform of international trade organizations, economic structure and tariff policy, consumer law and Canadian and American trade in consumer goods, and the international transfer and diffusion of Canadian technology.

Quite apart from the value of published research, Dr. Zacher sees the activities of the institute having widespread impact both inside and outside the University.

"The whole point of having an institute," he said, "is that it is multi-disciplinary, drawing together expertise from a large number of UBC departments and faculties. It's very easy to become isolated in a large institution like UBC, and part of our function is to break down barriers and provide a forum for co-operation and the exchange of ideas."

LARGER BENEFITS

There are larger benefits as well. "The research done by faculty members," said Dr. Zacher, "increases their knowledge and is communicated to students through classroom lectures. The result is a better-informed pool of students. And some of them – those with an interest in international relations – are the next generation of scholars who will take their places in the academic world throughout Canada or will become key figures in government and industry where crucial decisions will have to be made in areas such as ocean management and international trade."

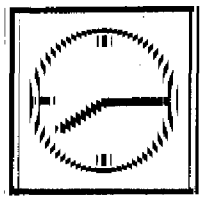
UBCalendar

[illegible]

Events in the week of:
March 19 to March 25 — Deadline is 5 p.m. Friday, March 18
March 26 to April 1 — Deadline is 5 p.m. Friday, March 18
General notices or information: Service, [illegible] Memorial Hall [illegible] Administration Building, Campus. Further information in available at [illegible].

THE WOODWARD INSTITUTE

SATURDAY, MARCH 1



5th Shimon Lecture, Prof. of Biology, Oxford, Kierkegaard, or Middlemarch's Genius — An Anthropologist's View.

SATURDAY, MARCH 31

Prof. Ibn Ghazali, Institute of Oriental Geography, Peking University, People's Republic of China, on Chinese Medicine: An Anthropologist's View.

SUNDAY, MARCH 5

1:30 p.m. — [illegible] THE [illegible] Woodward Chase Institute presents a program on the many multinational uses of the cockroach. This program is repeated at 2:30 p.m. Museum, [illegible] Woodward Marine Dr.

MONDAY, MARCH 6

[illegible] a.m. — [illegible] Dr. W. Schlichting, Division of Clinical Chemistry, [illegible] and Psychological Consultant of Energy Research in Russian Canada. Lecture Theatre, [illegible], Cancer Research Centre, 900 W. 10th Ave.

12:30 p.m. — [illegible] Schlepman, Dr. John Brown, Asian Studies, UBC, on Japanese Canadians. Upper Lounge, International House.

[illegible] Dr. Marvin Schooler on The Observatory in Kitchener Park. Room [illegible], Lassere.

[illegible] Dennis Miller, [illegible], performing Music of Bach, Schumann, Arnold Russell, and Wagner. Recital Hall, Music Building.

2:30 p.m. — [illegible] Prof. [illegible] Ebrig, Economics, UBC, on Operation Programming in Partially Debased Sets. Room [illegible], Angus Building.

[illegible] Prof. Hunter on Drying in an Arc: The Burnability of Mobile Bodies. Hill Room Lounge, Buchanan Tower.

[illegible] Prof. Peter K. Lawrence, Electrical Engineering, UBC, on Use of a Mycelium of Worse Model in Determining the Effect of Electrical Stimulation Waveform Parameters. Room [illegible], Mathematics Building.

[illegible] — Geography graduate student, UBC, on Distribution Based Transfer in Rural Dallas. Room [illegible], Civil and Mechanical Engineering Building.

[illegible] p.m. — Dr. Andrew Benson, Film Special, National Observatory, Tucson, Ariz., on Observational Studies of Mars Near Perihelion. Room [illegible], Henninger Building.

[illegible] Dr. Eric Schellenberg, Medicine, St. Paul's Hospital, on Abbreviation of Mass Cell Medium Release. Room [illegible] and [illegible], Family Clinic.

[illegible] Dr. K. [illegible], School of Public Health, UCLA, on Structure and Child Health. Lecture Hall [illegible], Woodward International Resource Centre.

TUESDAY, MARCH 7

12:30 p.m. — [illegible] Dr. Geoffrey [illegible], Economics, UBC, on Canadian Southern Asian Economic Relations. Upper Lounge, International House.

[illegible] Prof. Thomas K. Bhaumeyer, Classics and Comparative Literature, University of California at Berkeley, on Decision-Making in Classical Tragedy. Penthouse, Buchanan Building.

[illegible] Prof. Moses Gaus, Hungarian Professor of Hebrew, Harvard University, on Examining Civilizations and the Origins of the Middle Ages. Room [illegible], Buchanan Building.

[illegible] Prof. John H. Weiss, History, Cornell University, Ithaca, N.Y., on Revolutions and French History: The Film at Bonn and at Boomtown, Hollywood. Lecture and Film French film Revolution on The Wars Season. Room [illegible], Buchanan Building.

[illegible] Prof. Gerald Zanik, Research Fellow, University of Liverpool, on The Biological Psychiatric Problem of the Unusual Brain. Room [illegible], Buchanan.

[illegible] Dr. Richard Wach, Botany, Washington State University, on Ethnobotany: Appreciation History of the Chemical Psychic Problem of the United States. Room [illegible], Biological Sciences Building.

[illegible] series on Canoeing and Kayaking: The World's Film in Prize of the Public. Lecture Hall [illegible], Woodward International Resource Centre.

12:30 p.m. — [illegible] Chandrasekhar, Electrical Engineering Department, Mr. William Mobbs, on Photographic Education for Process Control. Electrical Engineering, Room [illegible], MacLeod Building.

3:30 p.m. — [illegible] open meeting. Persons interested in attending the open session of the Board's monthly meeting are asked to notify the Board's Secretary [illegible] Minutes Building, [illegible] the Board, [illegible] 2:30 p.m. on the meeting in the Board and Senate Room, [illegible] Administration Building.

[illegible] p.m. — [illegible] Dr. [illegible], School of Public Health, UCLA, on Human Healing Programs. Lecture Hall [illegible], Woodward International Resource Centre.

8:30 p.m. — [illegible] Dr. Jan Hollman, Institute of Oceanography, University of Hamburg, on Mobilizing Currents in the German Bight. Room [illegible], Fisheries and Forestry Building, Building on Fraser and Biological Sciences Building.

[illegible] p.m. — [illegible] Dr. Charles Clarke, Chemistry, Columbia University, New York, on Structure of [illegible] on the Ribosome. Lecture Hall [illegible].

[illegible] Dr. D. Hartley, Physics, Chemistry, University of California at Berkeley, on The Wonders of Nanometer with Laser. Room 200, Chemistry.

[illegible] Ballroom, Hotel Vancouver. Information [illegible], local [illegible].

[illegible] p.m. — [illegible] "Moonlight" on Film: The Visually Impaired. Approximately [illegible].

[illegible] — [illegible] Dr. [illegible], School of Public Health, UCLA, on Nutritional Assessment of Early Childhood in Childhood. Ballroom, Exhibition Centre.

[illegible] — The Politics of Art and Foreign Investment with resource person Dr. Jon Bar. Upper Lounge, International House.

WEDNESDAY, MARCH 8

[illegible] a.m. — [illegible] Prof. Robert E. Bailey, Economics, UBC, on A Conceptual Approach to Life Style Research. Penthouse, Angus Building.

[illegible] Occasional Lecture. Prof. Warne, Wilkinsby, Survey Research Centre, University of California, Berkeley, on Hidden in Sales. Room [illegible], Computer Sciences.

[illegible] Dr. John W. Collins, Zoology, UBC, on Biomechanics of Flight in Bat-Eared Foxes. Room [illegible], Biological Sciences Building.

[illegible] Dr. David R. Brooks, Ottawa Office, Energy Policy, on Energy and Jobs. Theatre, Robson Square Media Centre.

12:30 p.m. — [illegible] Dr. [illegible], School of Public Health, UCLA, on Cultural Factors in Prevention. Room [illegible], Architecture and Landscape Architecture.

[illegible] Dr. Ralph Zilmer, Japan, performing Music of Brahms. Recital Hall, Music.

[illegible] Prof. Robert Winter, Social Work, London School of Economics and Political Science, on The Contribution of the Social Sciences to Social Policy. Room [illegible], Development in Education. Room [illegible], Buchanan Building.

2:30 p.m. — [illegible] Prof. Gerald Zanik, Research Fellow, University of Liverpool, on The Medical Psychiatric Problem of the Unusual Brain. Room 2900, Wesbrooke Building.

[illegible] Prof. Gerald Zanik, Research Fellow, University of Liverpool, on The Medical Psychiatric Problem of the Unusual Brain. Penthouse, Buchanan.

[illegible] Dr. Michael Thomas, Chemistry, Columbia University, on The Chemistry of Carbon-Carbon Linkages: Conquest of Biochemical Complexity. Room [illegible], Chemistry Building.

12:30 p.m. — [illegible] Prof. John Baldwin, Statistics, University of Waterloo, on Computing Bias Models and Related Topics. Room 200, Angus Building.

[illegible] Dr. W.B. Xiong, Human Development Lab., on Computer Conjecture and Case Analysis. Room [illegible], Geography and Anthropology.

[illegible] Prof. Thomas K. Bhaumeyer, Classics, University of California at Berkeley, on Thoughts on Irony. Penthouse, Buchanan Building.

[illegible] Dr. Lee Klar, Animal Research Biology and Ecology, UBC, on Flowering Bird Economics: A Model Approach for Decision Making in Nature. Room [illegible], Biological Sciences Building.

THURSDAY, MARCH 9

[illegible] p.m. — [illegible] Dr. [illegible], School of Public Health, UCLA, on Aggression in Childhood. Room [illegible], Economics Building.

[illegible]

Albert Henning, [illegible] by Benjamin Britten, [illegible] on Wednesday, March 21, and continues until Saturday, March 24, at the Festival Wool Theatre at 8 p.m. Admission, [illegible], students, [illegible]. For tickets reservations, phone [illegible], or drop by Room [illegible] of the Festival Wool Theatre Building.

[illegible]

The [illegible] Women Section residence application are now available. Students wishing accommodation next fall in Room [illegible], Place Annex or Walter H. Kaye Residence should pick up their application as soon as possible at the Student Housing Office, [illegible] West Mall Boulevard Building.

[illegible]

Art exhibit of Chinese Children's Art: Selections from Hunan Province, Kiangsi Province, People's Republic of China, [illegible] at the museum until August 24, 1980. Museum, [illegible] Boulevard Annex Dr.

[illegible] THE [illegible]

Listed below are scheduled English examinations for the degree of Bachelor of Philosophy at the University. Unless otherwise noted, all examinations are held in the Faculty of Graduate Studies Examination Room, General Services Administration Building.

Friday, March 7, 2:30 p.m.: [illegible], English, A Professor of William Blake Within Williams: The Prophetic of Blake in Early Anti-Jacobinism.

10:00 a.m. — [illegible] Dr. Peter Bloom, Hebrew Union College, Jewish Institute of Religion, Hebrew University, on Archaeology and the History of Religion: The Excavation of Tel and the Ancient Near East. Penthouse, Buchanan Building.

12:30 p.m. — [illegible] Dr. W. Zeitz, Psychiatry, Community and Regional Planning, UBC, on South Asians in the Canadian Basin: Mental Health Issues Right in the Bound Field Upper Lounge.

[illegible] Interpolation in the Exploration, Conservation, Development, Protection Management of Land, Water, Air, Wildlife. Room [illegible], Angus Building.

[illegible] Prof. Thomas K. Bhaumeyer, Classics and Comparative Literature, University of California at Berkeley, on The Wonders of Campus and the Classics. Room [illegible], Buchanan Building.

[illegible] Dr. Lynda Birbeck, Women's Studies, on Women in Management — The MBA Program. Room [illegible], Recital Hall, Music.

[illegible] Dr. Donald Smiley, Toronto University, on Federalism in the [illegible]. Room [illegible], Buchanan Building.

[illegible] Prof. Ibn Ghazali, Institute of Oriental Geography, Peking University, People's Republic of China, on The City of Beijing (Peking): A Historical Perspective. Room [illegible], Angus Building.

[illegible] The Commission presents Films of Peking, in new Chinese film about the Imperial Palace. Room [illegible], Law Building.

[illegible] Dr. Donald W. Dickinson, The Upper Dr., Kalamazoo, Mich., on The Pharmacology of Alcoholism. Lecture Hall [illegible], Woodward International Resource Centre.

[illegible] Prof. William Wilkinsby, UCLA, on Towards Equilibrium of Mobility of Organizational Variables Management Purposefulness. Pen. Environmental Determinism. Room [illegible], Angus Building.

[illegible] Michael Jarvis, Israel, International Energy Group, Department of Energy, Mines and Resources Ottawa, on Canada and International Energy Problems. Room [illegible], Buchanan Building.

[illegible] Prof. Gerald Zanik, Research Fellow, University of Liverpool, on Modern Biological Psychiatric Problem of the Unusual Brain. Penthouse, Buchanan Building.

[illegible] p.m. — [illegible] Room [illegible], Mathematics Building.

12:30 p.m. — [illegible] Schwabitzer, UBC, on [illegible]. Room [illegible], Henninger Building.

[illegible] p.m. — [illegible] Prof. Roberto Hermann, History, UBC, on Pioneers and Politics in Imperial Brazil. Penthouse, Buchanan Building.

[illegible] Walter Elsey, UBC, on Atomic Hydrogen in Interstellar Space. Room [illegible], Henninger Building.

[illegible] p.m. — [illegible] Dr. Robert Knoch, Microbiology, UBC, on Why Does Antibiotic Resistance and Hydrogen Resistance of Bacteria Change? Lecture Hall [illegible], UBC.

[illegible]

2:00 a.m. — [illegible] Dr. [illegible], School of Public Health, UCLA, on Recent Advances in Nurse Training. Lecture Hall [illegible], Boston Pavilion, VGH.

[illegible] Dr. W.J. Thomas, Philosophy, Regional, on Culture and Hermeneutics: Ideas in Alternative Rationalization. Room [illegible], Centre for Developmental Medicine, 30 [illegible] Ave.

12:30 p.m. — [illegible] Prof. Lawrence Lau, Asian Studies, UBC, on The Hsiao-Hsueh of Chung-Tzu: Thoughts in Modern Day Canadian Living. Upper Lounge, International House.

[illegible] Prof. Thomas K. Bhaumeyer, Classics and Comparative Literature, University of California at Berkeley, on Thoughts on Irony. Room [illegible], Buchanan Building.

[illegible] Prof. William Wilkinsby, UCLA, on Children, Environments, and the Evolution of Organizational Form: The Ancient Mesopotamian Case. Penthouse, Angus Building.

1:00 p.m. — [illegible] with medical presentation by [illegible] Department, [illegible] Room [illegible].

[illegible] Dr. M. Hannan on Western Screening. Fourth Room [illegible], Health Centre for Children, VGH.

8:30 p.m. — [illegible] Prof. Robert J. Gregg, Linguistics, UBC, on The Effect of the Use of Language in the Times of King Arthur. Room [illegible], Buchanan Building.

[illegible] Teaching and Learning: Dr. John K. Gamble, McGill University, on Assessment of Knowledge and Application Skills for Teaching for Higher Education. Room [illegible], Scarfe Building.

[illegible] Dr. Stanley K. Epp, IBM Research Division, Cambridge, Mass., on An Optimal Administration of the Algebra of Behavioral Problem Solvers. Room [illegible], Computer Sciences Building.

[illegible] Dr. Louis Cheung, on Chemical Engineering in Hong Kong: Philosophy. Room [illegible], Chemical Engineering Building.

3:00 p.m. — [illegible] open meeting, UBC, on Transmission and Communication in the Queen Elizabeth Plaza and the United Nations Conference, Tokyo, [illegible], available on Campus Annex. Tickets Office, Board Room of the Ice Arena, [illegible] Office in [illegible], on from any UBC University or society.

SATURDAY, MARCH 31

9:30 a.m. — [illegible] Dr. Thomas Bhaumeyer, Classics and Comparative Literature, University of California at Berkeley, on Thoughts on Irony. Penthouse, Buchanan Building.

[illegible] Dr. Ibn Ghazali, Institute of Oriental Geography, Peking University, People's Republic of China, on The New City Plan of Beijing (Peking), in cooperation with Hilton, Beijing — An Anthropologist's Review. Lecture Hall 19, Woodward International Resource Centre.

[illegible] Prof. Thomas K. Bhaumeyer, Classics and Comparative Literature, University of California at Berkeley, on Thoughts on Irony. Room [illegible], Buchanan Building.

[illegible] Prof. William Wilkinsby, UCLA, on Children, Environments, and the Evolution of Organizational Form: The Ancient Mesopotamian Case. Penthouse, Angus Building.

[illegible] Prof. Robert J. Gregg, Linguistics, UBC, on The Effect of the Use of Language in the Times of King Arthur. Room [illegible], Buchanan Building.

[illegible] Teaching and Learning: Dr. John K. Gamble, McGill University, on Assessment of Knowledge and Application Skills for Teaching for Higher Education. Room [illegible], Scarfe Building.

[illegible] Dr. Stanley K. Epp, IBM Research Division, Cambridge, Mass., on An Optimal Administration of the Algebra of Behavioral Problem Solvers. Room [illegible], Computer Sciences Building.

[illegible] Dr. Louis Cheung, on Chemical Engineering in Hong Kong: Philosophy. Room [illegible], Chemical Engineering Building.

3:00 p.m. — [illegible] open meeting, UBC, on Transmission and Communication in the Queen Elizabeth Plaza and the United Nations Conference, Tokyo, [illegible], available on Campus Annex.
