DEPARTMENT OF PROVINCIAL SECRETARY

ANNUAL REPORT

OF THE

MENTAL HOSPITALS

OF THE

PROVINCE OF BRITISH COLUMBIA

FOR 12 MONTHS ENDED MARCH 31ST

1932

PRINTED BY
AUTHORITY OF THE LEGISLATIVE ASSEMBLY.

VICTORIA, B.C.:
Printed by CHARLES F. BANFIELD, Printer to the King's Most Excellent Majesty.
1932.

To His Honour J. W. FORDHAM JOHNSON,

Lieutenant-Governor of the Province of British Columbia.

MAY IT PLEASE YOUR HONOUR:

The undersigned respectfully submits herewith the Annual Report of the Medical Superintendent of the Mental Hospitals for the fiscal year ended March 31st, 1932.

S. L. HOWE,

Provincial Secretary.

Provincial Secretary's Office.

TABLE OF CONTENTS.

PART I.—MEDICAL.

	Page.
Officers and Staff, List of	7
Report—General Medical Superintendent	9
Report, Laboratory—Director of Laboratory	12
Report—X-ray Department	13
Report—Ultra-violet Lamp	13
Report—Visiting Dentist	13
Statistical Tables—	
1. Movement of Population during Year	14
2. Summary of Operations of Hospitals since Inception	16
3. Admissions, Discharges, and Deaths	17
4. Civil State of Patients admitted	17
5. Religious Denominations of Patients	17
6. Educational Status of Patients	18
7. Nationality of Patients	18
8. Districts from which Patients were admitted	19
9. Occupation of Patients prior to Admission	20
10. Age of Patients on Admission	21
11. Number of Attacks at Time of Admission	21
12. Alleged Duration of Attacks prior to Admission	21
13. Table of Heredity	22
14. Alleged Cause of Insanity in Patients admitted	22
15. State of Bodily Health of Patients admitted	22
16. Form of Mental Disorder in Patients admitted	23
17. Probation, Number allowed out on	23
18. Discharges, showing Alleged Duration of Insanity	23
19. Discharges, showing Length of Residence in Hospital and Condition at Time of Discharge	24
20. Deaths, Cause of, and Length of Time in Hospital, Essondale, New Westminster, and Saanich	24
21. Deportations, New Westminster, Essondale, and Saanich	28

PART II.—FINANCIAL.

Report—Bursar	29
Balance-sheet and Profit and Loss Account, New Westminster	31
Balance-sheet and Profit and Loss Account, Essondale	32
Balance-sheet and Profit and Loss Account, Saanich	33
A. Average Residence, Maintenance, and *Per Capita* Cost since Inception	34
B. / B 1. Analysis of Gross *Per Capita* Cost	36, 37
C. / C 1. Yearly Gross Expenditure, Analysis of, since Inception	38, 39
D. Summary of Gross and Net *Per Capita* Cost in all Hospitals	40
E. Expense and Revenue Statement, New Westminster	41
F. Expense and Revenue Statement, Essondale	42

NEW FEMALE UNIT.

REPORT OF THE MEDICAL SUPERINTENDENT

For the Twelve Months ended March 31st, 1932.

PART I.—MEDICAL.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., April 1st, 1932.

The Honourable the Provincial Secretary,
Parliament Buildings, Victoria, B.C.

SIR,—I have the honour to submit herewith for your consideration the Sixtieth Annual Report of the Provincial Mental Hospitals at Essondale, New Westminster, and Saanich.

The following table is a brief summary of the movements of the Hospital population during the year April 1st, 1931, to March 31st, 1932:—

Movement of Population.	*Male.*	*Female.*	*Total.*
In residence, April 1st, 1931	1,722	828	2,550
On probation, but remaining on registers	64	33	97
On escape, but remaining on registers	5	.....	5
New admissions during the current year	376	186	562
Total under treatment	2,167	1,047	3,214
Discharged in full during year	187	91	278
Continuing on probation at end of year	49	30	79
Died during year	129	52	181
Total discharged during year	365	173	538
In residence, March 31st, 1932	1,802	874	2,676

(1.) Decrease in the number of admissions this year as compared to last.. 70
(2.) Net increase in population in residence at end of the year.. 126
(3.) Rate of deaths to total treated (per cent.) 5.63
(4.) Rate of discharges to admissions (exclusive of deaths) (per cent.).. 63.52

ADMISSIONS.

An analysis of the birth column shows that, of the number admitted, 232 (or 41.28 per cent.) were Canadian born, 210 (or 37.36 per cent.) were born in different parts of the British Empire, and 118 (or 20.99 per cent.) were of foreign extraction. There is a slight increase in the admission of Canadian born and from the British Empire, but the foreign born shows no change.

DISCHARGES.

It is a generally accepted fact that cases which are admitted to the Mental Hospital in their very early stages have a far better chance of recovery than those who are not admitted until the mental disease is well advanced. The following table is proof of this:—

TABLE SHOWING THE ALLEGED DURATION OF INSANITY, PRIOR TO ADMISSION, IN THOSE DISCHARGED FROM THE THREE INSTITUTIONS DURING THE YEAR APRIL 1ST, 1931, TO MARCH 31ST, 1932.

Less than six months	132
Over six months	58
Duration not known	88
Not insane	....
Total	278

During the year 278 were discharged. Of these, 58 were discharged as recovered, 173 as improved, 47 as unimproved, and none as not insane. I would like to draw your attention to the fact that, of the number discharged in full, 51 were deported and 24 were repatriated through the kindness of friends or relatives.

In noting the deportations and the very considerable amount of money which is saved the Province by returning these persons to their native countries, I would like to make special mention of the wonderful work being done by the Immigration Department. As may be expected, the information which we obtain is often very meagre and not always reliable, as the patients, on account of their mental condition, cannot furnish very complete histories, but the Immigration Department is untiring in its efforts and goes to endless trouble to establish the true facts, thus enabling deportations to take place. Not only is the Province saved thousands of dollars annually, but our bed accommodation is increased, which in our overcrowded condition is of immense importance; therefore I cannot speak too highly of their courteous co-operation.

TREATMENT.

In the Mental Hospital the majority of patients who are admitted suffer from well-developed adult psychoses and have not had the benefit of extramural effort; yet it is pleasing to note that this year 242 of those admitted showed the psychosis to have existed less than six months, and proof of this is found in the fact that the rate of discharges to admissions is 63.5 per cent.

Our Psychopathic Wards are small and, owing to the large number treated, patients do not remain in these departments as long as is desirable.

The inauguration of the Social Service Department has been of inestimable benefit to the work of the Hospital. This department enables us to obtain truer histories of the home-life and conditions than we were ever able to formerly. It is most important to know the precipitating cause of the mental upset, so that, when the patient is ready to return home, that cause may be eradicated if at all possible, as otherwise treatment is of little avail. It is also most essential that follow-up treatment be done to further the interests of the patient and assist in their re-establishment.

The treatment of our patients has been greatly facilitated by our Laboratory, which is in charge of Dr. Byrne. Various tests are made and by these means a far truer clinical picture of the case is given, which greatly aids the doctors in their work. A more detailed statement of the work done during the year in this department will be found in Dr. Byrne's own report. Dr. Gee has had charge of the X-ray Department, where a large number of pictures have been carefully and well taken, and this has also greatly assisted in the diagnosis and treatment of cases covering a large field of medicine. The opthalmic nose and throat work has been done by Dr. Harry, and has resulted in much comfort to the patients as well as improvement to their general health. Dr. Minorgan, who is in charge of the electrocardiograph, has given the doctors splendid cardiograms showing clearly the finer pathological picture of the heart cases under treatment, and the great value of this branch of hospital work can hardly be overestimated.

The occupational departments have been of great benefit to the patients in their treatment. The patients enjoy it, and the Hospital has also benefited by the articles which have been manufactured at a greatly reduced cost to the institution. In addition, the mending, repairing, and laundrying have been carefully carried out.

ACTIVITIES.

The work around the large new building has been progressing steadily. The high bank in the rear of the building and extending over to the laundry has been properly sloped, and some 700 yards of the excess soil put on the dykes. The ground around the building has been levelled, ready for the top soil and grass, and a sprinkling system has also been installed. All the roads have been resurfaced and put in good condition for the heavy traffic. On the west grade very considerable work over a large area has been carried on to prepare that part for the continuation of the already existing lawns.

The dykes around the farm were brought to a reasonable height to withstand the high water, except that portion between the Farm Bridge and the base of the hill, where only minor work was done due to the stringent money situation. It is better in the long run to do yearly repairing to keep the dykes up to a proper standard, and money should be set aside each year for this purpose.

The farm, under the superintendency of Mr. P. H. Moore, as well as producing and supplying the Hospital with splendid fresh milk with low bacterial count, also furnishes all the commodities of a farm, such as root vegetables, greens, pork products, etc. A very pleasing and substantially good grade of canned fruit, vegetables, jams, and pickles are put up by the farm each year in large quantities. We are thus able to give more of these fruits to the patients, and their diet is more varied than would otherwise be the case owing to the lessened cost, as the work of preparing, canning, etc., is done by our farm.

The farm was originally established here for the main purpose of supplying an occupational department for the treatment of the mentally ill. Unfortunately, on account of the overcrowding, it has been absolutely essential to have some patients domiciled there who are not able to reap the benefit, but there are a great many others doing actual farm-work, enjoying it, and are much better off as a result of the steady employment.

FINANCES.

The actual state of the finances are set out in detail by the report of the Bursar, Mr. G. S. Macgowan, and which will be found elsewhere. It may, however, be noted here that, during the trying depression, this department has done extraordinarily well in effecting reductions in spite of the ever-increasing number of patients.

ACKNOWLEDGMENTS.

Before closing my report I would like to express my sincere appreciation of all those who have aided in the work of the Hospital. Our grateful thanks are due to Mrs. Ellis, Convener of the Red Cross Visiting Committee, who has worked very hard on behalf of the patients and has been the means of their enjoying many splendid concerts. She has been unceasing in her efforts and has always co-operated with the Hospital to the fullest extent.

I also desire to extend to the members of both the Dominion and Provincial Police our sincere thanks and appreciation of their splendid co-operation. At all times they are willing to help us and we can always be assured of their courteous assistance.

I wish also to acknowledge to the fullest extent the splendid co-operation and assistance given me by the Assistant Medical Superintendent, the Medical Officers, and the heads of the various departments. Without their loyal support it would be quite impossible to carry on the work with any degree of efficiency.

Lastly, to you, Sir, and to the Deputy Minister, and to the officers of the Public Works Department, I owe grateful thanks for your ready understanding of our many problems, and for your sympathetic understanding and assistance in their solution. Your courteous consideration has been most helpful and has greatly aided in forwarding the work of the Hospital.

I have the honour to be,
Sir,
Your obedient servant,

A. L. CREASE,
Medical Superintendent.

LABORATORY REPORT.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., March 31st, 1932.

A. L. Crease, Esq., M.D., C.M.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—Following is a report of the work performed in the Laboratory at Essondale from April 1st, 1931, to March 31st, 1932:—

Urinalysis routine	943
Quantitative sugar	1
Quantitative albumin	35
Two-hour test	15
Blood—	
Kahn positive	44
Kahn negative	390
Blood-counts—	
Red	25
White	16
Hæmoglobin	24
Differential	30
Spinal fluid—	
Kahn positive	14
Kahn negative	20
Globulin	34
Cell-count	22
Colloidal gold	10
Sputa for tuberculosis	173
Smears for malaria	6
Autopsies	27
Sections	75
Cultures	21
Agglutination—	
Typhoid	1
Para A and B	1
Exudates	6
Gastric analysis	1
Milk-fat—Bacterial	12
Fæces—Examination	7
Smears—	
Eye	18
Nose	13
Throat	17
Urethral	5
Vincent's angina	2
Smears for abscess	10
Tuberculin test	1
Basal metabolism	22
Guinea-pig inoculation	2

I have, etc.,

ULTAN P. BYRNE,
Pathologist.

X-RAY REPORT.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., March 31st, 1932.

A. L. Crease, Esq., M.D., C.M.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—Following is a report of the work performed in the X-ray Department of the Hospital from April 1st, 1931, to March 31st, 1932:—

Head and sinuses	64
Pelvis and vertebræ	24
Chests	92
Extremities	126
Gastro-intestinal	33
Total exposures	339

I have, etc.,

ARTHUR M. GEE,
Physician and Roentgenologist.

ULTRA-VIOLET LAMP.

FROM APRIL 1ST, 1931, TO MARCH 31ST, 1932.

Total number of treatments for the year, 1,519; total time required for treatments, 258 hours 12½ minutes.

ULTAN P. BYRNE.

DENTAL REPORT.

NEW WESTMINSTER, B.C., May 6th, 1932.

Dr. A. L. Crease,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—I beg to submit herewith report of dental work performed during the year ended March 31st, 1932, at the Provincial Mental Hospital, Essondale:—

Number of patients examined	648
Teeth extracted with local anæsthetic	381
Amalgam fillings inserted	14
Synthetic porcelain fillings inserted	18
Extracting under general anæsthetic	1
Bridges repaired	3
Bridges recemented	5
Pyorrhœa treatments	17
Other treatments	15
Removing deposits and cleaning teeth	11
Dentures constructed and inserted	5
Dentures adjusted	13
Dentures repaired	49
Vincent's infection treated	2

PUBLIC HOSPITAL FOR THE INSANE, NEW WESTMINSTER.

Number of patients examined	457
Teeth extracted with local anæsthetic	215
Amalgam fillings inserted	3
Pyorrhœa treatments	16
Removing deposits and polishing teeth	13
Dentures repaired	1
Dentures adjusted	13
Other treatments	37

I have, etc.,

EMERY JONES,
Dental Surgeon.

PART II.—FINANCIAL.

BURSAR'S REPORT.

ESSONDALE, B.C., November 3rd, 1932.

A. L. Crease, Esq., M.D., C.M.,
General Medical Superintendent of Mental Hospitals,
Essondale, B.C.

SIR,—I have the honour to submit herewith balance-sheets, profit and loss accounts, and various other statements covering the financial operations of the Provincial Mental Hospitals of British Columbia for the fiscal year ended March 31st, 1932.

Due to the economy programme instituted by the Government throughout the whole Province, this department from the commencement of the year observed the strictest supervision over all departments coming under this office. Particular attention was paid to the Commissary Department and Ward Supplies, together with a closer co-operation with the farm, which has justified all our efforts, and I am happy to call your attention to the reduction in the gross *per capita* cost of some 9 cents a day less than last year, which represents a saving of $85,000.

A perusal of Statement D will show a total operating expense for the three Mental Hospitals coming under the year charged, which totals $987,089.93, made up as follows:—

Public Hospital for Insane, New Westminster	$178,146.40
Provincial Mental Hospital, Essondale	706,772.16
Provincial Mental Home, Saanich	102,171.37
Total	$987,089.93

In the analysis of the gross *per capita* cost I would call your attention to Table B 1, wherein you will note the New Westminster Institution, formerly showing our lowest *per capita*, is now our highest. This is accounted for by the excess of personnel carried for the small residence population. For instance, the mechanical staff is required to be the same, practically, with a population of 361.88 as that of 1930–31 with a daily average population of 547.98. Although our expenses for fuel were less in the year under review, the *per capita* has gone up owing to this smaller population.

In the total gross *per capita* cost a large saving is reflected from the recommendation we made to the Department to eliminate the matter of profit on products from Colony Farm. As an example, with the increased patient population, the produce supplied the Public Hospital for Insane in 1930–31 was $23,607, whereas in 1931–32 it was $15,276; while Essondale with a larger population and staff only charged $94,582 in 1931–32 as compared with $136,645 in 1930–31. Under the new arrangement the entire cost of operating the farm has been included in our *per capita* expenditure of the institution, and we have taken all production at what it cost us to produce with patient-labour. The saving for the year, of course, was materially helped by the lower commodity prices.

A review of the operating accounts of the three institutions will be of interest to you. It will be noticed that salaries at Saanich have increased, which is due to the extra staff on both day and night, together with a chief attendant and assistant.

I might draw your attention to the fact that included in this gross *per capita* charge of $1.03 is included $84,500 spent by the Public Works Department on repairs, renewals, and other public works. This is some $20,000 less than the previous year, part of which saving is made by the placing of employees on three-quarter time.

In comparison with figures over the past ten years, I note that in 1922, with a resident population of 1,606.45, we had a gross *per capita* cost of 95 cents, which steadily rose until the peak year of 1931 was reached with a gross daily *per capita* cost of $1.12 and a daily average population of 2,481.72. In 1932, the year under review, we have dropped the cost to $1.03 with a daily average population of 2,607.35, or over 1,000 patients more than ten years previously.

In a comparison of revenue received for the current year with that of 1930–31, a reduction of $13,000 is noted in New Westminster, due to the reduced population and the fact that they are mostly children, as the adult females have been transferred to Essondale. While Essondale's revenue has increased practically $11,000 for the year; Saanich remaining practically the same. Considering the depression and financial condition of the average person, the collections have been fairly satisfactory for this year, with slightly over $1,668 less than last year's total of $127,738.14.

Our occupational departments, consisting of the upholstering-shop, shoe-shop, wood-working shop, and tailor-shop, have been carried on with advantage to the institution in general and the *per capita* cost in particular, with the exception of the tailor-shop, which shows a loss of some $2,000. This matter is having my careful consideration with a view to improvement.

Your inspection of the various attached Tables D, E, F, and G should be of interest.

In closing, I wish to particularly thank all our departments of the institution for their hearty co-operation in assisting and economizing in every possible way. This has been accomplished from all departments of the farm, through our Commissary Department, our cooks, and our ward supervisors. The gradual tightening-up of patients' beds in the quarters already available and staff have assisted us in living on practically the same amount as that of last year even with our natural yearly increase of population, which is about 126 patients.

All of which is respectfully submitted.

GOWAN S. MACGOWAN,
Bursar.

PUBLIC HOSPITAL FOR INSANE, NEW WESTMINSTER.

PART III.—COLONY FARM.

FARM SUPERINTENDENT'S REPORT.

A. L. Crease, Esq., M.D., C.M.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—I herewith offer for your approval the annual statement concerning the operations of Colony Farm for the year ended March 31st, 1932.

General conditions for growing crops were not quite so favourable as last year. Late spring rains spoilt some of the small fruits, and again early fall rains did considerable damage at harvest-time, all of which reflected on the quality and cost of production. It was anticipated that this year would not be a very prosperous one, in common with all farmers and producers in general; consequently every effort was made to cut down on the cost of production. This object was obtained in most branches of the farm, but in some cases weather conditions made it impossible.

The inventories of all live stock and equipment were greatly reduced to meet the adverse conditions. Under these conditions the policy of the farm has been somewhat changed from that of an extensive grain and hay growing to a more intensive production of fruit, vegetables, pastures, silage, and root-crops. We have now practically reached the stage of being a large food-manufacturing plant producing chiefly milk, pork products, canned goods, fruit, and vegetables.

During the year 2,020,779 lb. of milk, or 808,312 quarts, were produced on the farm, the cost being 5½ cents per quart, a 1.10-cent reduction under the preceding year, and consequently is the cheapest milk which has ever been produced on this farm. We are pleased to state that the lowering of the cost has not interfered with the quality, as the per cent. of fat has been raised to 3.50 per cent. and the usual high standard of cleanliness has been maintained throughout.

This year we harvested 567 tons of edible potatoes, which was a decrease from the previous year, due solely to inferior seed. Certified seed brought in for a change yielded approximately 16 tons per acre, where our total average was only 9.86 tons per acre. Preparations are going forward to plant our whole crop with certified seed in 1932. Despite the fact that our whole crop kept good, it was necessary to buy a few tons in the early spring.

A total of 719 tons of roots were harvested, from which the institution drew its full supply of turnips, the rest going to the cattle and hogs. This was a considerable increase in tonnage over any previous year and produced at the extreme low cost of $2.32 per ton.

The six silos on the farm were all filled; the quantity being 881 tons, which consisted of peas, oats and vetches, clover and grass, and green corn. This was also an increase of 100 tons over the preceding year. The cost to produce this crop was $2.30 per ton.

There was a decided increase in production of all the various vegetables grown on the farm and gardens for use in the institution, at a nominal cost of production.

We had a good year in the cannery, and were successful in putting up 94 tons of various fruits, vegetables, and pickles; the total pack being consumed by the institution.

The production of the herd having reached the milk requirements of the institution, no marked increase in the number of milk cows has been made. However, a greater number of heifers will have to be housed this winter. Continuing our policy of rigid culling of older and worn cows, for the improvement of the herd in general, replacements are therefore greater, but can be amply taken care of by our natural increase. There were 131 calves born in 1931—75 heifers and 56 bulls. Bull calves were vealed to the extent of 43. The average milk yield for 121 cows milked in 1931, based on Canadian Record of Performance test, was 16,023 lb. and 560.80 lb. of fat, an increase yield per cow of 985 lb. of milk and 53.42 lb. of fat.

This year the heifer "Colony Flood Colantha 194433" brought distinct honour to the herd. She was selected by an all-American Committee as the best 2-year-old Holstein-Friesian heifer bred, developed, and shown from any herd in America in 1931. This is a premium highly prized and sought after by all Holstein-breeders.

The horse department continues well up to the standard with a 1931 increase of four filly foals successfully raised. We were very fortunate in being able to make an even exchange of stallions which will enable us to carry on with a good breeding programme for several years to

come. The main part of all farm-work is being done with horse-labour. Four young ones have been broken in to take the place of worn teams and seven more will be ready to work by next spring. We are now in a position to supply our own needs with the quality and kind of horse we require.

The hog department shows a small increase over last year of pork and pork products supplied to the institutions. This commodity cannot be materially increased until better killing and curing facilities are provided for. The only change made in this department was in bringing the brood sows into colony houses on the farm, where bigger litters and healthier pigs can be raised.

Finally, I wish to acknowledge my sincere appreciation of the loyal support and co-operation tendered me at all times by the farm staff as a whole. Their conscientious effort while performing their many duties is greatly instrumental in aiding me to forward the above report.

Respectfully submitted.

P. H. Moore, B.S.A.,
Farm Superintendent.

BURSAR'S REPORT ON COLONY FARM.

Essondale, B.C., November 10th, 1932.

A. L. Crease, Esq., M.D., C.M.,
General Medical Superintendent of Mental Hospitals, Essondale, B.C.

Sir,—I have the honour to submit herewith balance-sheet and profit and loss statement, together with various cost sheets covering all departments of Colony Farm, for the fiscal year ended March 31st, 1932.

It is to be noted that the profit and loss statement shows a yearly profit of $795.36, after deducting all losses from death of stock, totalling $2,076, and the writing-down of values on inventories of live stock of some $15,500, together with an adjustment in price of equipment of $1,874. This profit is inclusive of patient-labour.

The values of produce supplied to the institutions were based on the New Westminster market quotations issued weekly and total as follows:—

Mental Hospital, Essondale	$121,125.03
Public Hospital for Insane, New Westminster	18,264.29
Total	$139,389.32

In former years all sales from farm to institution were paid for by cheque from the Hospital vote, which represented the revenue of the farm. In the year under review this practice has been changed and the institution now assumes the entire vote of the farm as part of its maintenance and takes all products at actual cost of production.

This year we paid from our Farm vote the sum of $109,858.37, and for maintenance and replacements through the Public Works Department vote, $8,956.70, making a total expenditure in connection with the farm for all purposes of $118,815.07.

Milk was produced at 22¼ cents a gallon, the lowest cost of production in the history of the farm. This compares with 26.65 cents a gallon last year, but in our cost sheets, for sake of comparison with other years, this product was set up in the books at 35 cents per gallon as market price.

Revenue was collected on sales of calves, young boars, sows, and products amounting to $4,321.20, and this sum was remitted to the Treasury.

Please refer to cost sheets for production costs and yield per acre of all crops.

The hog department this year showed a splendid profit of $13,447.93, as compared with $9,833.10 last year, but our cannery production was less, only amounting to $4,947.93 profit this year, against $10,618.53 last year.

All of which is respectfully submitted.

Gowan S. Macgowan,
Bursar.
