INFANT MORTALITY.

Deaths of children under 1 year of age numbered 439—males 250, females 189—giving a rate per 1,000 living births of 45.8, as compared with 46.7 the previous year. British Columbia has the lowest infant-mortality rate in the Dominion, and it is interesting to note that a gradual decrease has taken place from 68.1 in 1922 to 45.8 in the year 1933.

The following table gives the principal causes of deaths of children under 1 year of age for the five-year period 1929–33:—

REPORT OF INSPECTOR OF VITAL STATISTICS.

VICTORIA, B.C., December 1st, 1934.

H. E. Young, Esq., M.D., C.M., LL.D.,
Registrar, Births, Deaths, and Marriages, Victoria, B.C.

SIR,—I have the honour to submit the fifth report of the Inspector appointed pursuant to section 27 of the "Vital Statistics Act" for the period January 1st to December 31st, 1933.

REGISTRATION DISTRICTS.

POUCE COUPE.

Constituting a vital statistics registration district under the Act is somewhat costly, although vitally necessary. In order to extend registration facilities where needed, we made an experiment this year. To meet the demands from people in the vicinity of Dawson Creek, in the Registration District of Pouce Coupe, a sub-registration office was established at Dawson Creek on June 1st, 1933. This office was in charge of the Provincial policeman, who was appointed a Deputy District Registrar of Births, Deaths, and Marriages pursuant to subsection (2) of section 25 of the "Vital Statistics Act," and makes his reports direct to the District Registrar at Pouce Coupe, as if he were in the Pouce Coupe Office. This arrangement did away with the necessity of supplying office equipment at Dawson Creek, as well as saving the cost of defining and constituting a new district, and, seeing that this experiment has proven very satisfactory, I would recommend that, wherever possible, this course be followed in future extensions of registration services in this Province.

There was no other change in the constitution of the registration districts.

FRAUDULENT REGISTRATIONS.

During 1933 the Department made an effort to clear up all the known fraudulent registrations of birth. As previously reported, the work of investigation into these cases is tediously slow; however, during the twelve months we have disposed of 221 cases under section 13 of the "Vital Statistics Act." The following table shows the number of hearings at which you presided during the year:—

	Hearings.		Hearings.

THE "VITAL STATISTICS ACT" OF 1933.

The new "Vital Statistics Act" for British Columbia, prepared by your direction last year (*see* my report for 1932), was presented at the 1933 session of the Legislative Assembly, and received assent on the 7th day of April.

It is not the intention to present here any full report on the advancements and improvements afforded by the new Act, but one or two items are worthy of note.

LEGITIMATION OF BIRTH BY SUBSEQUENT MARRIAGE.

Many persons have taken advantage of the provision that where proof has been submitted to you establishing the fact that the natural parents have contracted marriage subsequent to the birth of the child a new registration of birth may be substituted for the one upon which the stigma of illegitimacy appears.

REPORTS BY THE SCHOOL-TEACHERS.

The provision whereby the teachers in charge of the schools of British Columbia shall make a report, giving the names, dates of birth, places of birth, and the present addresses of the parents or guardians of the children attending school, to the Vital Statistics Branch has met with the very finest co-operation on the part of the principals and individual school-teachers.

For the first year it was thought advisable to ask for a report on every child attending school —elementary, junior high, high, etc.—and taking into consideration the fact that there were in 1932–33 116,816 attending school in this Province, some idea of the magnitude of this undertaking can be gathered, as this means that in searching alone in the neighbourhood of 200,000 separate searches will have to be made.

From the work that has been done already it is very evident that the object in view—that of making a check upon the birth record of every child entering school from now on—will be more than realized. The undertaking is in the very early stages, and while a detailed report is not presentable at this time, it is hoped that the full results of the first year will be ready for the next report.

RECORDS OF ADOPTION.

Particulars of birth relating to ninety-seven children adopted pursuant to the "Adoption Act" were received, filed, and notations made upon the birth registrations.

Commencing with the new year, it is, I believe, the intention of the Deputy Provincial Secretary that all adoption records now filed in his office shall be filed with the Vital Statistics Branch, at which time it is hoped a full check will be made of the whole situation, with a view to submitting legislation remedying some of the vital problems affecting both the Superintendent of Neglected Children and this Branch.

CHURCH RECORDS.

Section 20 of the "Vital Statistics Act" of 1933 provides that you may secure from the various religious denominations of the Province true copies of their records relating to the rites of baptism, burial, and marriage,* such copies to become part of the records of your office.

The religious denominations were communicated with, and practically all have consented to loan their registers to the Government. The Department stands the cost of transportation of the registers to and from Victoria, the cost of transcribing, and has undertaken to supply the churches with copies of the records so filed (should anything happen to their registers after the copying, such as destruction by fire, etc.), which will be beneficial to the churches themselves in replacing missing records.

During 1933, 108 registers were received, from which were obtained 20,507 baptisms, 7,303 burials, and 930 marriages.

In the following table is shown in detail the churches, with their denominations, whose registers were transcribed during the year:—

OLD ORIGINAL REGISTRATIONS.

The work of transferring the original registrations of births, deaths, and marriages, filed in the district offices during the period 1899 to March 31st, 1913, to Victoria continues, and many valuable records of which your office has no knowledge are being brought to light.

Owing to pressure of other work we are at the present time dealing with the birth registrations only, and some years will pass before all the original registrations are finally transferred, unless a special staff is appointed to take care of this work.

THE MONTHLY BULLETIN.

Volume 3 of the Monthly Bulletin of the Provincial Board of Health has been completed, and it would appear that a great many people are interested in this publication. During the year we have again received many fine articles, notably those entitled: "Bacteriological Study of Milk in British Columbia," "Data *re* Proportions and Length of Stay in Tuberculosis Sanatoria of Three Classes of Inmates," and "Public Health Principles in Tuberculosis Sanatoria," by Dr. H. W. Hill; "Tick Paralysis in British Columbia," "Scarlet Fever, Diagnosis and Control," and others, by Dr. A. M. Menzies; and a "Report upon the Epidemic of Encephalitis at St. Louis, Mo.," by Dr. N. McL. Harris. In March a supplement entitled "Public Health Services in British Columbia" was published and many others. I should again like to express my appreciation of the assistance rendered in the publication of this bulletin by the whole staff of the Board.

REGISTRATION OF MINISTERS AND CLERGYMEN.

Registration of ministers and clergymen by authority of the "Marriage Act" of 1930 is still carried on, and although it entails an enormous amount of work, I would here strongly stress the fact that such registration should never be abandoned, as it gives the Department a firm hold over the problem of registration of marriage, and is enabling us to find church records of marriages of which registration under the "Vital Statistics Act" has been neglected, and to complete the registration.

In the following table is shown a recapitulation of the number of ministers and clergymen whose registration has been authorized and cancelled for the period September 1st, 1930, to December 31st, 1933:—

	Permanent.	Temporary.	Total.
Total authorized during 1930	852	6	858
Total authorized during 1931	80	6	86
Total authorized during 1932	90	6	96

To yourself, Dr. Young, and Mr. French, may I express my heartfelt appreciation for kindly counsel and advice at all times. I should also like to thank the District Registrars of Births, Deaths, and Marriages and officers of the Provincial Police for the assistance in carrying on work in the outlying districts, which has been a material saving in the matter of travelling expenses.

I have, etc.,

J. T. MARSHALL,
Inspector of Vital Statistics.
