*To His Honour* J. W. FORDHAM JOHNSON,

*Lieutenant-Governor of the Province of British Columbia.*

MAY IT PLEASE YOUR HONOUR:

The undersigned respectfully submits herewith the Annual Report of the Medical Superintendent of the Mental Hospitals for the fiscal year ended March 31st, 1935.

GEORGE M. WEIR,

*Provincial Secretary.*

*Provincial Secretary's Office.*

# TABLE OF CONTENTS.

PART I.—MEDICAL. PAGE.

Officers and Staff, List of ... 7
Report—General Medical Superintendent ... 9
Report, Laboratory—Director of Laboratory ... 12
Report—X-ray Department ... 13
Report—Ultra-violet Lamp ... 13
Report—Visiting Dentist ... 13
Report—Social Service ... 14
Statistical Tables—
1. Movement of Population during Year ... 20
2. Summary of Operations of Hospitals since Inception ... 22
3. Admissions, Discharges, and Deaths ... 23
4. Civil State of Patients admitted ... 23
5. Religious Denominations of Patients ... 23
6. Educational Status of Patients ... 24
7. Nationality of Patients ... 24
8. Districts from which Patients were admitted ... 25
9. Occupation of Patients prior to Admission ... 27
10. Age of Patients on Admission ... 28
11. Number of Attacks at Time of Admission ... 28
12. Alleged Duration of Attacks prior to Admission ... 28
13. Table of Heredity ... 29
14. Alleged Cause of Insanity in Patients admitted ... 29
15. State of Bodily Health of Patients admitted ... 29
16. Form of Mental Disorder in Patients admitted ... 30
17. Probation, Number allowed out on ... 30
18. Discharges, showing Alleged Duration of Insanity ... 30
19. Discharges, showing Length of Residence in Hospital and Condition at Time of Discharge ... 31
20. Deaths, Cause of, and Length of Time in Hospital, Essondale, New Westminster, and Saanich ... 31
21. Deportations, New Westminster, Essondale, and Saanich ... 36

PART II.—FINANCIAL.

Report—Bursar ... 37
Balance-sheet and Profit and Loss Account, New Westminster ... 39
Balance-sheet and Profit and Loss Account, Essondale ... 40
Balance-sheet and Profit and Loss Account, Saanich ... 41
A. Average Residence, Maintenance, and *Per Capita* Cost since Inception ... 42
B. / B 1. Analysis of Gross *Per Capita* Cost ... 44, 45
C. / C 1. Yearly Gross Expenditure, Analysis of, since Inception ... 47, 48
D. Summary of Gross and Net *Per Capita* Cost in all Hospitals ... 50
E. Expense and Revenue Statement, New Westminster ... 51
F. Expense and Revenue Statement, Essondale ... 52
G. Expense and Revenue Statement, Saanich ... 54
Revenue, Table of, since Inception ... 56
Report, Financial—Tailor's Department ... 57
Report, Financial—Shoemaker's Department ... 59

Production Tables— PAGE.
Articles made by Female Patients, Public Hospital for Insane 59
Mending done by Female Patients for New Westminster 60
Work done by Patients at New Westminster 60
Supplies produced at New Westminster 60
Supplies produced at Colquitz 61
Occupational Therapy—
Wood-working Department 61
Upholstering Department 62
Weaving and Basketry Department 62
Annual Report of Occupational Therapy, Essondale, for Year ended March 31st, 1935 62

PART III.—COLONY FARM.

Report—Farm Superintendent 64
Report—Financial, General—Bursar 65
Balance-sheet 66
Profit and Loss Account 67
Dairy and Herds Department—
Profit and Loss Account 68
Production and Costs Account 68
Milk Production and Cost 68
Mature Cow Department—Profit and Loss Account 69
Calves Department—Profit and Loss Account 70
Yearling Department—Profit and Loss Account 72
Bull Department—Profit and Loss Account 73
Work-horse Department—
Sales and Deaths Account 73
Horse-labour Account 74
Horse-labour performed 74
Hog Department—Profit and Loss Account 74
Cannery—Profit and Loss Account 75
Truck-garden and Orchard—Profit and Loss Account 75
Crop Department—Profit and Loss Account, etc. 76
Tractor Account 78

# REPORT OF THE MEDICAL SUPERINTENDENT

## For the Twelve Months ended March 31st, 1935.

## PART I.—MEDICAL.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., April 1st, 1935.

*The Honourable the Provincial Secretary,*
*Parliament Buildings, Victoria, B.C.*

SIR,—I have the honour to submit herewith for your consideration the Sixty-third Annual Report of the Provincial Mental Hospitals at Essondale, New Westminster, and Saanich.

The following table is a brief summary of the movements of the Hospital population during the year April 1st, 1934, to March 31st, 1935:—

| Movement of Population. | Male. | Female. | Total. |
|---|---|---|---|
| In residence, April 1st, 1934 | 1,940 | 1,020 | 2,960 |
| On probation, but remaining on registers | 49 | 55 | 104 |
| On escape, but remaining on registers | 4 | ..... | 4 |
| New admissions during current year | 403 | 250 | 653 |
| Total under treatment | 2,396 | 1,325 | 3,721 |
| Discharged in full during year | 220 | 121 | 341 |
| Continuing on probation at end of year | 38 | 41 | 79 |
| Died during year | 152 | 69 | 221 |
| Total discharged | 410 | 231 | 641 |
| In residence, March 31st, 1935 | 1,986 | 1,094 | 3,080 |

(1.) Increase in number of admissions this year as compared to last ..... 43
(2.) Net increase in population in residence at end of year ..... 120
(3.) Rate of deaths to total treated (per cent.) ..... 5.93
(4.) Rate of discharges to admission (exclusive of deaths) (per cent.) .. 64.31

### ADMISSIONS.

An analysis of the birth column shows that, of the number admitted, 260 (or 39.81 per cent.) were Canadian born, 220 (or 33.68 per cent.) were born in other parts of the British Empire, 171 (or 26.18 per cent.) were of foreign extraction, and 2 were of unknown birth.

### DISCHARGES.

It is a generally accepted fact that the mental cases which are admitted to the Hospital for treatment in their early stages have a very much better opportunity of recovering from their mental trouble than those who delay treatment until the disease is well advanced. This is indicated in the following table:—

TABLE SHOWING THE ALLEGED DURATION OF INSANITY, PRIOR TO ADMISSION, IN THOSE DISCHARGED FROM THE THREE INSTITUTIONS DURING THE YEAR APRIL 1ST, 1934, TO MARCH 31ST, 1935.

| | |
|---|---|
| Less than six months | 190 |
| Over six months | 60 |
| Duration not known | 88 |
| Not insane | 3 |
| Total | 341 |

During the past fiscal year 341 patients were discharged in full. Of this number, 71 were discharged as recovered, 188 as improved, 79 as unimproved, and 3 as not insane. Of the number discharged in full, 12 were deported and 28 were repatriated through the kindness of relatives or friends.

Once again I wish to draw to your favourable attention the very close co-operation which exists between this Department and that of the Dominion Immigration Department. Although, on account of the lessening of the number of immigrants to this country, our deportable cases are decreasing, nevertheless some of those cases which were returned necessitated a great deal of close and untiring effort on the part of the Immigration Department before deportation could be effected. Their unfailing courtesy and assistance are of great encouragement to us in our work.

## TREATMENT.

Dr. Davidson has continued to look after the electro-cardiograph work, which is in addition to his general duties. The splendid work done by him aids not only in the diagnosis of the cardiac cases, but also is of value in facilitating treatment.

Dr. Gee has done excellently in the X-ray Department. The pictures taken by him are very clear and assist greatly in the diagnosis of cases coming within this field.

The Laboratory, under Dr. Byrne, is one of our most important departments. Its scope is gradually being extended; it is of material benefit in guiding treatment, and is also essential to our training-school. It also serves the Provincial Police in their analytical work.

The eye, ear, nose, and throat work, together with neurological cases, have been ably treated by Dr. Harry, who has made a special study of these cases.

The Occupational Department, with both the male and female patients, continues to ever increase in its activity, but, even so, we have been hampered in this regard by such a skeleton staff. There are those patients who, we feel, would be better occupied, but yet we are not able to carry this out to the extent that we desire. In occupational work there is a force of great importance which aids treatment and provides a healthful output for the energies of those under care.

Our Training School for Nurses has proven even more successful than we had anticipated. It was always considered essential, but the results have greatly exceeded our expectations. Not only is our third-year intensive course provided by the school, but there is established in a small way a postgraduate course for graduate nurses. It has now been requested by the Nursing Association of British Columbia that we take some general nurses in training who would like voluntarily to take up this work under affiliation. While we feel and fully appreciate the necessity of this and are looking forward with a keen interest to their coming to study, yet at the present time we cannot proceed with this step until further housing is provided to accommodate these students. Even with our own nurses on the staff we are in need of at least thirty more beds.

The Child Guidance Clinic in Vancouver has increased its service, and has done some work in the preventive field, yet we have not accomplished as much in this direction as is desired on account of limited time and so many children requiring attention. The appointments are booked up many months ahead.

## COMMENTS.

During the past year the steady yearly increase of patients has been in evidence, and, in spite of the fact that 65 Chinese patients were repatriated to their own country, our annual increase was 120. These patients had to be admitted in spite of the overcrowding which exists, a fact which is greatly to be discouraged in the treatment of those mentally ill. Some provision has been made for extra beds, but these are so limited in number that the question of overcrowding has not necessarily been lessened. Overcrowding results in an increasing time of treatment, and in the unfortunate mixing of the acute and less acute cases serious accidents are becoming more and more difficult to avoid. The fact that our administration units have never been completed has greatly hampered the Hospital in every way, and tends to augment the cost of caring for the patients. Some of the services have not as yet been provided.

At Essondale the buildings are much more fire-proof than in the New Westminster unit, although even there much consideration and much work has been done to help the present

situation, but the older buildings still constitute a fire-hazard. Although the New Westminster Fire Department co-operates in every way and much has been done to alleviate the condition, yet there is still a great risk.

As in any large unit the question of tuberculosis arises, the same also applies to the accommodation of those mental patients suffering from this disease, and this point should receive consideration when circumstances permit.

During the past year a new unit for the returned soldiers was opened. This unit consists of three stories used for living-quarters and a lower floor is utilized for amusement and occupation. There is a separate dining-room provided where a cafeteria exists, which feature has been a definite improvement as far as the meals are concerned. The wards provide excellent and modern accommodation, so that here we may say we have a rather splendid unit and one which has received very favourable comment from the returned-soldier organizations, who are ready to, and do, assist in every way in which they are able, and nothing is too much trouble for them. Their co-operation has been most commendable. It has been a moot question for many years regarding the segregation of the returned men into their own unit, and with the securing of this building a long-felt need was realized.

It is with genuine regret that I report the passing of one of our old employees of the institution in the person of Edward Bolas Jones, who entered the service on May 1st, 1899, as an attendant and was promoted to the position of Laundryman at the Public Hospital for Insane on the transfer of Mr. Hargie to the Essondale laundry. Mr. Jones was a sincere and conscientious worker and was highly esteemed both by staff and patients of the institution.

## ACTIVITIES.

The farm has always served a twofold purpose, both to supply the needs of the Hospital and to give healthy and desirable occupation to those patients who are suited for this type of work. Now that the institution has grown to such a large one, the need of the farm is even more emphasized. In addition to serving the Hospital and its needs, the farm is raising a very desirable herd. Take the dairy herd alone, which supplies wonderful well-bred stock: the young bulls are sold to the different farmers throughout the country, thus materially increasing the value of the herds.

The establishment of the cannery at the farm has indeed been a splendid experiment. It produces very fine canned foods which makes the meals more attractive and varied. The pork products, too, are thoroughly enjoyed by every one, but there is a very definite need of further cold storage, and we do feel the necessity of the re-establishment of our poultry plant.

## ACKNOWLEDGMENTS.

I wish to voice our appreciation of the continued valued work of Mrs. J. Ellis, Convener of the Red Cross Visiting Committee, who is responsible for the concerts and entertainments for the benefit of our patients.

I also wish to tender our very grateful thanks to the members of the British Columbia Police, who are always ready to assist us in every way, and we have many proofs of their courteous co-operation.

I wish to make special mention of the loyal support accorded to me at all times by the medical officers of the Hospital, and with a Hospital of this size you can readily understand just what this loyalty means. I wish to especially call to your attention the faithful services of the Assistant Medical Superintendent, Dr. E. J. Ryan, who is always ready to aid in the work of the Hospital and to further its needs. I would remember also Mr. Macgowan, our Bursar; Dr. L. E. Sauriol, Medical Supervisor, New Westminster; Mr. F. M. Spooner, Supervisor, Colquitz Mental Home; and Mr. H. Lonsdale, Foreman of Public Works.

Lastly, to you, Sir, to the Deputy Minister, and to the Department of Public Works, I wish to record my thanks. At all times you have been ready and willing to give me your invaluable counsel and assistance. Your ready understanding and encouragement have helped to smooth many difficulties and made it a great deal easier for the Hospital to progress.

I have the honour to be,
Sir,
Your obedient servant,

A. L. CREASE,
*Medical Superintendent.*

## LABORATORY REPORT.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., March 31st, 1935.

*A. L. Crease, Esq., M.D., C.M.,*
*Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.*

SIR,—Following is a report of the work performed in the Laboratory at Essondale from April 1st, 1934, to March 31st, 1935:—

| | |
|---|---|
| Urinalysis routine | 1,101 |
| Quantitative albumen | 67 |
| Two-hour test | 7 |
| Ascheim-Zondek | 11 |
| Blood— | |
| Kahn positive | 57 |
| Kahn negative | 552 |
| Red-blood count | 33 |
| White-blood count | 20 |
| Hæmoglobin | 30 |
| Differential | 19 |
| Sedimentation | 2 |
| Coagulation test | 1 |
| Blood groupings | 30 |
| Urea | 27 |
| Icterus index | 1 |
| Spinal fluid— | |
| Kahn positive | 31 |
| Kahn negative | 26 |
| Globulin | 57 |
| Cell-count | 5 |
| Colloidal gold | 6 |
| Colloidal paraffin | 10 |
| Sputa for tuberculosis | 145 |
| Autopsies | 36 |
| Sections | 56 |
| Cultures | 36 |
| Agglutination— | |
| Typhoid | 3 |
| Para A and B | 1 |
| Shiga | 1 |
| Hiss-Russel | 1 |
| Exudates | 1 |
| Fæces examination | 2 |
| Smears— | |
| Eye | 5 |
| Nose, throat | 9 |
| Urethral | 24 |
| Cervical | 22 |
| Vincent's angina | 3 |
| Malaria | 6 |
| Miscellaneous | 31 |
| Abscess | 9 |

| | |
|---|---|
| Tuberculin test | 2 |
| Basal metabolism | 22 |
| Animal inoculation | 87 |
| Examination tapeworm | 1 |
| Vaccines prepared | 36 |
| Analyses for Provincial Police (cases) | 2 |

I have, etc.,

ULTAN P. BYRNE,
*Pathologist.*

## X-RAY REPORT.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., March 31st, 1935.

*A. L. Crease, Esq., M.D., C.M.,*
*Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.*

SIR,—Following is a report of the work performed in the X-ray Department of the Hospital from April 1st, 1934, to March 31st, 1935:—

| | |
|---|---|
| Heads and sinuses | 100 |
| Chests | 190 |
| Pelvis and vertebræ | 48 |
| Extremities | 254 |
| Total exposures | 592 |

I have, etc.,

ARTHUR M. GEE,
*Physician and Roentgenologist.*

## ULTRA-VIOLET LAMP.

FROM APRIL 1ST, 1934, TO MARCH 31ST, 1935.

Total number of treatments for the year, 901; total time required for treatments, 243 hours and 42 minutes.

ULTAN P. BYRNE.

## DENTAL REPORT.

MEDICAL DENTAL BUILDING,
NEW WESTMINSTER, B.C., May 7th, 1935.

*A. L. Crease, Esq., M.D., C.M.,*
*Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.*

SIR,—The following is the report of the dental services rendered at the Provincial Mental Hospital, Essondale, and the Public Hospital for the Insane, New Westminster, during the year ended March 31st, 1934:—

PROVINCIAL MENTAL HOSPITAL, ESSONDALE.

| | |
|---|---|
| Number of patients treated | 480 |
| 231 patients had hopelessly diseased teeth extracted | 380 |
| Amalgam fillings inserted | 32 |
| Cement fillings inserted | 28 |
| Porcelain enamel fillings inserted | 3 |
| Pyorrhœa treatments | 23 |
| Post operative treatments | 8 |
| Cementing crowns, inlays, or facings | 2 |

PROVINCIAL MENTAL HOSPITAL, ESSONDALE—*Continued.*

| | |
|---|---|
| Repairing fillings | 8 |
| Removing bridge | 1 |
| Altering dentures | 9 |
| Repairing dentures | 56 |
| Making and inserting dentures | 2 |

PUBLIC HOSPITAL FOR THE INSANE, NEW WESTMINSTER.

| | |
|---|---|
| Number of patients examined | 232 |
| 89 patients had hopelessly diseased teeth extracted | 144 |
| Local anæsthetic used to reduce pain | 89 |
| Amalgam fillings inserted | 10 |
| Cement fillings inserted | 6 |
| Porcelain enamel fillings inserted | 2 |
| Pyorrhœa treatments | 23 |
| Counter-irritant treatments | 16 |
| Repairing fillings | 2 |
| Repairing dentures | 8 |
| Special emergency calls | 10 |

Respectfully submitted.

EMERY JONES, D.D.S.

## SOCIAL SERVICE REPORT.

The Hospital Social Service has had an active year, and while the first part of the year showed how this branch of the work had grown and how inadequate the staff was to meet the situation, we were fortunate enough in October to obtain the services of Miss Winifred Wiggins, M.S.S., a graduate in Social Science of our own University of British Columbia and having obtained her Master's degree at Smith College, Mass. She is well trained in this work and her coming enables us to do a more finished piece of work and to take on more extensive case-work.

All new cases from Vancouver have been visited, where possible, within two weeks of their admission. With the time at our disposal, we were unable to keep up with the admissions from North and West Vancouver, Burnaby, and New Westminster, or to contact the outside resources, such as the field-workers in the other parts of the Province. The work that was done showed us the necessity of more intense work with families immediately following committal. With the limited staff, we only picked the most outstanding problem cases and endeavoured to do our best with them, always bringing in the other social agencies whenever possible. On all cases contacted we endeavoured to compile a history to aid in diagnosis and treatment.

Psychometric examinations were done on all cases referred to us for standardization by the staff doctors. The Bureau of Measurements of the Vancouver School Board has co-operated with us in giving any data they have obtained during the school-life of the patients.

Ward visits and the follow-up work naturally ensue, such as visiting children of parents in the Hospital and in some cases going into the matter of placement of these children and guidance in mental-health problems. Several of the patients have had children placed in homes and institutions near by, and as we do not consider it good therapy for children to come to the Hospital, we have tried to arrange for the patients to see the children in their present environment, knowing this is good case-work for both patients and their children. There are of necessity few of these cases.

It is evident that the Social Service Department cannot function adequately alone, and, realizing this, the department makes every effort to dovetail its work with other members of the staff, such as the medical, nursing, and occupational departments.

The case-work outside of the Hospital buildings entails work with the prospective patients, especially in the case of a mental deficient, where help in the home will ward off commitment for some time or where commitment is explained or advised on the strength of mental-health teachings with the family. It is often necessary to visit these homes periodically to carry out

this preventive work, or to refer it to some other agency who can supervise more readily. In these cases a full record is kept so that the case is known when they are committed.

In all cases of venereal disease the contacts are visited and arrangements made for examination and treatment. We have experienced great difficulty in making these arrangements when the patients come from rural districts and are unable to attend the Provincial Government Clinic. The local doctors dislike this class of work and are inclined to feel it an imposition and a problem which should be met in the preventive social hygiene programme.

We visit as many of the probation cases as possible, but this work has had to be slighted this year. We are hoping to concentrate on it more in the future as it is one of the most valuable branches of preventive work.

Since the opening of the Victoria Child Guidance Clinic, we find we have utilized some of our time while there making contacts with agencies and relatives of the indoor patients, and have succeeded in giving direct therapy to a few probation and discharged patients.

The educational work of the division has progressed. There have been two University of British Columbia students of the Social Science Course taking their field-work. The post-graduate nurses of the nursing-school were also given an insight into this work, by being given two weeks' observation period in the Social Service Department. Lectures were also given to the postgraduate and undergraduate students, as well as to the Public Health Nurses during their visit to the Hospital.

This year's lectures were given in two courses at the University of British Columbia—namely, Public Health Nurses and students of the Social Science Course.

| | |
|---|---|
| Home visits for new patients | 310 |
| Home visits for probation cases | 320 |
| Visits to other agencies *re* Hospital cases | 252 |
| Conferences with other agencies *re* Hospital cases | 74 |
| Ward visits | 230 |
| Psychometrics done on in-patients | 20 |
| Conferences at clinic on Mental Hospital cases | 124 |
| New cases carried on in which some slight time service was done | 125 |
| Specialized work on cases | 15 |
| Total new cases referred | 316 |

## VICTORIA CHILD GUIDANCE CLINIC.

(Superior Street Annex, Victoria.)

On September 12th, 1934, the Victoria Child Guidance Clinic was opened at the Superior Street Annex and appears to be filling a need there. We have held the clinic one full day a month and have had 33 new patients in that time. While a number of these cases come from rural communities, where there was little understanding of mental-health programme and where the resources were limited, we feel that even in this short time there is already a better understanding. We have made arrangements for several conferences and talks with interested leaders, who we hope will be of assistance to us in the future in giving a more adequate service.

It will be noticed by the figures shown below that we have seen many problems where mental deficiency plays a part. This is typical of a new clinic of this kind, and we hope that the problem cases of normal intelligence will gradually increase, when there is better local understanding of child-guidance work.

We have received the most earnest support from the Provincial Department of Welfare and Health, the Family Help and Welfare Association, the Victoria Children's Aid Society, and other welfare agencies.

### Agencies referring Cases.

| Borderline | 2 |
| Moron | 6 |
| Imbecile | 4 |
| Total | 33 |

## PROVINCIAL CHILD GUIDANCE CLINIC.

(771 HORNBY STREET, VANCOUVER.)

In this, our third annual report, we hope to show the place the Provincial Child Guidance Clinic is taking in the social-service work of the Province and in the community as a whole. The clinic has been working to capacity two days a week and has shown the necessity of fuller operation. For the last six months we have been fortunate enough to have one additional social worker for the two days a week that the clinic is open. The case load has continued to increase and this has necessitated double the activity on the psychiatrist's part, which has been met with the drawing on the junior members of the staff of the Hospital for help in the physical examinations, giving at the same time opportunity for practical participation and study in this type of preventive psychiatry.

Three social-service students of the University of British Columbia's Social Science Course have had the opportunity of practical experience while taking their field-work. The Public Health Nurses were also given an individual chance of observation and training in reference to child-guidance. The postgraduate nurses of the Mental Hospital Training School had this branch of the work included in their two weeks' observation period with the Social Service Department.

A mental-hygiene programme has been carried on in conference work with all interested agencies. The education of the community has been encouraged by the staff speaking to such organizations as the Parent-Teachers' Association and groups interested in the parent-child relationship.

This clinic has progressed under the traditional lines of studying the individual—namely, the fourfold examination, the social, physical, psychological, and psychiatric. It is the policy, before any child is considered for study, that a social history of the family be submitted. If it is a co-operative case, the co-operating agency assumes the responsibility for this part of the work, and if referred through private sources—that is, physicians or parents—the Social Service staff at the clinic is responsible for this data, as well as the follow-up work.

The study of any behaviour problem begins by an understanding of the child. The physical examination, which is the second and a fundamental procedure, may reveal John's truancy to be due to deafness, malnutrition, or poor motor co-ordination; any of these physical handicaps creating a barrier to successful school-work and ultimately a desire to escape through truancy.

An evaluation of the intellectual equipment of the child is the third step towards determining the material with which we are dealing. Obviously, there is nothing to be expected in the way of success if we require a child with an 8-year-old mind to achieve that which requires the intelligence of a 10-year-old child. In problems dealing with such failure and social behaviour the determination of the intellectual equipment is imperative. This, also, is applicable to the understanding of the social life of the child. We cannot expect a parent, or two parents, with a low mental age to cope with the training of a child with a higher intelligence.

It is interesting to note that out of the 242 new cases seen, only 27 were considered without a psychological examination. Ten of this number were not examined because it was not considered good mental hygiene to submit them to the ordeal. In five cases the examinations were deferred until some physical or social defect was corrected, and in two of these cases they were tested within the next six months. In eight cases the examination was proceeded with, but no definite rating was given as the patients were under 6 years of age. In three cases the

patient was studied as an auxiliary to another individual, such as a parent to a child, or a child to a parent, and only in one case was the test attempted and the patient refused to respond.

However, we are aware that a sound body and a good intelligence are not sufficient unto themselves to assure to the child a well-adjusted life. The psychiatrist is concerned with the organism as a whole and the efficiency of its total responses to the environment in which it has to operate. Thus, besides the physical and intellectual aspects of the child, he directs his attention to the investigation of the child's emotions and propensities. After all these phases have been considered, this clinic tries to interpret the child and his behaviour to the parents or guardian. This part of the work is of the greatest importance and the part which is most time-consuming in the opinion of this staff.

Tables 2 and 3 show the differences in the problems as seen by the layman or person untrained in psychiatry, as compared with those who are trained to observe and interpret the problems as seen by the clinic. The staff wish to point out that, considering every case individually, they have indicated what appeared to be not the most obvious, but the underlying problem. Experience has taught that a child of limited mental capacity can make an adequate adjustment and not become a community problem. In some cases low mentality has not been treated as the real problem, as we are unable to change the native ability, but environment can be changed and physical care can be given. Those having bodily defects are remedied as far as possible.

In the next year we hope to attempt one or two particular pieces of work, and in this a definite start was made with the diagnosing and tutoring of reading disabilities. Another place in which we feel that we can congratulate the community and our staff is the request made by the Juvenile Court for our services. These services were granted. The examination of the Industrial Schools for both boys and girls will show, as the Juvenile Court has demonstrated, that there is a considerable group of juvenile offenders who present a psychiatric problem, such as feeble-mindedness, psychosis, psychopathic personality or neurosis, and who are obviously unsuited for the reformatory type of institution. An extension of the law to provide for examination of all children brought into Juvenile Court might well be considered.

Our statistics show that the agencies making use of the clinic have been re-educated to the point where they are bringing the children in younger, and when mentally deficient children are referred it is done so with the idea of guidance in the community social supervision of them.

We wish to thank all those who co-operated with us, especially the private physicians who have been ever ready to help us.

### Case Load.

| | | |
|---|---|---|
| Active-treatment cases from previous year | | 59 |

# PART II.—FINANCIAL.

## BURSAR'S REPORT.

ESSONDALE, B.C., November 5th, 1935.

*A. L. Crease, Esq., M.D., C.M.,*
*General Superintendent of Mental Hospitals,*
*Essondale, B.C.*

SIR,—In submitting the financial report of the Mental Hospitals for the fiscal year ended March 31st, 1935, attached hereto, I beg to submit balance-sheets and profit and loss accounts, together with other statistical statements covering the operations for that year.

Our total gross operating expenditures for the three mental institutions of the Province, as shown in detail by Table D, amounted to $991,326.66, as compared with $912,435.81 for last year, an increase of $78,890.85. This large increase is in a measure accounted for by some unusual expenditures during the year and includes the purchase of talking-picture equipment for both New Westminster and Saanich institutions, new laundry tumbler for Saanich, together with new blankets, and the large outlay of $18,522.96 for the repatriation of Chinese patients to China. This latter expense is hardly justifiable as a charge against the one year and might reasonably be written off over a period of time. In addition to the above, we include the purchase of a new delivery-truck for Essondale and the restoring of full-time employment to those of our mechanical staff who had been on three-quarter time for some years.

For the last few years, during the depression, we have reduced our maintenance and repairs expenditures down to some 8 per cent. of our total expenditures of the institution, but in the year under review we have advanced our expenditures to 10 per cent. at New Westminster and 11½ per cent. at Essondale, while at Saanich three times as much money was spent, raising it from 2.1 to 8.7 per cent.

At the Public Hospital for Insane, New Westminster, we had an increase in provision account, due to better menus for both staff and patients, while at Essondale we are up in practically every heading, with the exception of fuel, light, and water, where we see a $5,000 reduction.

Our daily average population of the three institutions was 3,069.50, which, based on the expenditure of $991,326.66, gives us a gross *per capita* cost of $322.96 per year or 88.48 cents per day, which, compared with last year, shows an increase of $6.66 per year or 1.82 cents per day.

The value of farm produce to the Public Hospital for Insane at New Westminster amounted to $16,656.05, while that supplied to Essondale Hospital amounted to $113,402.08, or a total of $130,058.13, itemized statements of which will be seen in Colony Farm report.

*Revenue.*—Revenue remitted to the Treasury from our three institutions totalled $152,239.56, while the sum of $329,569 was collected under the "Public Institutions Indemnification (Municipalities) Act," making a total remitted to the Treasury on account of Mental Hospitals of $481,808.56, as compared with $462,582.60 last year.

In our statements making up our *per capita* cost is included the sum of $102,330.08, which was the sum expended by voucher for Colony Farm.

In summing up, I might say that the past year we have somewhat raised the standard of our Hospital, both in diet, social-service work, and occupational therapy, which has increased our expenditures. Whereas we had one clinic in Vancouver per week, there are now two, and in September, 1934, the Victoria Child Guidance Clinic was opened, which necessitated additional expense.

I am happy to report that we had a most satisfactory and thorough audit made of the institution books, and the Bursar's department has worked with the various departments of

the Government in a most harmonious way, and I wish to take this opportunity of thanking yourself and medical staff for the many courtesies and co-operation to my department for the year under review.

All of which is respectfully submitted.

GOWAN MACGOWAN,
*Bursar.*

# PART III.—COLONY FARM.

## FARM SUPERINTENDENT'S REPORT.

ESSONDALE, B.C., October 31st, 1935.

*A. L. Crease, Esq., M.D., C.M.,*
*Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.*

SIR,—I wish to submit for your perusal and approval the annual statement of farm operations for the year ended March 31st, 1935.

There has been very little change in agricultural conditions from the preceding year, except a slightly noticeable trend for higher prices. This has increased the demand for some of our surplus stock; the one very marked increase being in the demand for breeding hogs, due solely to the general higher level of pork prices during the year. Almost to the detriment of our own pork-supply, we have tried to meet this demand of people wanting to get started in the hog industry.

Generally our operations have been on about the same scale as last year. The whole equipment and plant has been kept up to standard and all live stock shows improvement.

The largest investment is in dairy cattle and the herd is now in better form, from an individual, health, and production point of view, than at any time in its history. It is now considered one of the leading institution herds on the Continent. With the exception of two herd bulls, all animals have been bred on the farm. The milk production is slightly increased over last year and the cost reduced by 1.2 cents per gallon.

The force of work-horses, which are all our own breeding, has been kept up to standard and by breeding three or four mares each year we are keeping up with replacements. One exceptionally good gelding was sold this year.

For the proper utilization of garbage we have kept our usual herd of pure-bred Yorkshire hogs, numbering around the 800 mark all the time. I must admit that it has been difficult, as previously mentioned, to keep from selling our herd short. Our standard of bacon-hog has been well maintained and the health and production has been excellent.

All of the field-work has been as usual and with good returns. Potatoes were the exception, reduction in yield being due to a late blight which attacked the whole valley, and we suffered in common with all other potato-growers. In spite of this the price was low.

Production of all other vegetables was about equal to demand and the cannery had a very successful pack.

Our staff has remained the same in number and almost the same in personnel.

I wish to express to you the very great satisfaction that it is to me to be able to report that, to a man, we have received willing and loyal service.

All of which is respectfully submitted.

P. H. MOORE,
*Farm Superintendent.*

## BURSAR'S REPORT ON COLONY FARM.

ESSONDALE, B.C., November 5th, 1935.

*A. L. Crease, Esq., M.D., C.M.,*
*General Superintendent of Mental Hospitals, Essondale, B.C.*

SIR,—I beg to submit herewith balance-sheet, profit and loss statement, and departmental cost sheets, together with inventories, etc., covering the several departments of Colony Farm for the fiscal year ended March 31st, 1935.

The year under review shows a profit of $3,865.26, whereas last year it was some $11,737.87, a decrease in profits of $7,872.61, which is practically all accounted for as the result of marking down on the prices of the various commodities.

The farm supplied our mental institutions at New Westminster and Essondale to the value of $130,058.13, as follows:—

| | |
|---|---|
| Public Hospital for Insane, New Westminster—Dairy, meat, fruit, and vegetables | $16,656.05 |
| Mental Hospital, Essondale—Dairy, meat, fruit, and vegetables | 113,402.08 |
| Total | $130,058.13 |

Milk production for the year was 2,459,218 lb. at a cost of $45,933.88, or an average cost of production, pasteurizing, etc., of 18.69 cents per gallon, as compared with 19.89 cents per gallon last year. Details of this can be seen under the Dairy and Herds Department.

Our Hog Department shows a profit of $14,925.72, which is less than that shown last year.

Cannery profits only show $747.81 on account of prices of commodities written down.

Reference to the various cost sheets of departments will furnish you with some very interesting figures.

We collected on account of live stock and produce sold the sum of $5,901.74, which was remitted to the Treasury.

In closing, I might say that practically all field and garden produce supplied the institutions by Colony Farm last year was of a higher order and delivered in a more attractive state.

All of which is respectfully submitted.

GOWAN MACGOWAN,
*Bursar.*

## BALANCE-SHEET, COLONY FARM.
