DEPARTMENT OF PROVINCIAL SECRETARY

ANNUAL REPORT

OF THE

MENTAL HOSPITALS

OF THE

PROVINCE OF BRITISH COLUMBIA

FOR 12 MONTHS ENDED MARCH 31ST

1936

PRINTED BY
AUTHORITY OF THE LEGISLATIVE ASSEMBLY.

VICTORIA, B.C.:
Printed by CHARLES F. BANFIELD, Printer to the King's Most Excellent Majesty.
1936.

To His Honour ERIC W. HAMBER,

Lieutenant-Governor of the Province of British Columbia.

MAY IT PLEASE YOUR HONOUR:

The undersigned respectfully submits herewith the Annual Report of the Medical Superintendent of the Mental Hospitals for the fiscal year ended March 31st, 1936.

GEORGE M. WEIR,

Provincial Secretary.

Provincial Secretary's Office.

TABLE OF CONTENTS.

PART I.—MEDICAL.

	PAGE.
Officers and Staff, List of	7
Report—General Medical Superintendent	9
Report, Laboratory—Director of Laboratory	12
Report—X-ray Department	13
Report—Oculist	13
Report—Ultra-violet Lamp	14
Report—Visiting Dentist	14
Report—Training-school	14
Report—Social Service	15
Report—Child Guidance Clinic	16
Statistical Tables—	
1. Movement of Population during Year	18
2. Summary of Operations of Hospitals since Inception	20
3. Admissions, Discharges, and Deaths	21
4. Civil State of Patients admitted	21
5. Religious Denominations of Patients	21
6. Educational Status of Patients	22
7. Nationality of Patients	22
8. Districts from which Patients were admitted	23
9. Occupation of Patients prior to Admission	25
10. Age of Patients on Admission	26
11. Number of Attacks at Time of Admission	26
12. Alleged Duration of Attacks prior to Admission	26
13. Table of Heredity	27
14. Alleged Cause of Insanity in Patients admitted	27
15. State of Bodily Health of Patients admitted	27
16. Form of Mental Disorder in Patients admitted	28
17. Probation, Number allowed out on	28
18. Discharges, showing Alleged Duration of Insanity	28
19. Discharges, showing Length of Residence in Hospital and Condition at Time of Discharge	29
20. Deaths, Cause of, and Length of Time in Hospital, Essondale, New Westminster, and Saanich	29
21. Deportations, New Westminster, Essondale, and Saanich	34

PART II.—FINANCIAL.

Report—Bursar	35
Balance-sheet and Profit and Loss Account, New Westminster	36
Balance-sheet and Profit and Loss Account, Essondale	37
Balance-sheet and Profit and Loss Account, Saanich	38
A. Average Residence, Maintenance, and *Per Capita* Cost since Inception	39
B. B 1. Analysis of Gross *Per Capita* Cost	41, 42
C. C 1. Yearly Gross Expenditure, Analysis of, since Inception	44, 45
D. Summary of Gross and Net *Per Capita* Cost in all Hospitals	47
E. Expense and Revenue Statement, New Westminster	48
F. Expense and Revenue Statement, Essondale	49
G. Expense and Revenue Statement, Saanich	51

PAGE.

Revenue, Table of, since Inception 53
Report, Financial—Tailor's Department 54
Report, Financial—Shoemaker's Department 56
Production Tables—
Articles made by Female Patients, Public Hospital for Insane 57
Mending done by Female Patients for New Westminster 57
Work done by Patients at New Westminster 57
Supplies produced at New Westminster 58
Supplies produced at Colquitz 58
Occupational Therapy—
Wood-working Department 59
Upholstering Department 59
Weaving and Basketry Department 59
Annual Report of Occupational Therapy, Essondale, for Year ended March 31st, 1936 60

PART III.—COLONY FARM.

Report—Farm Superintendent 61
Report—Financial, General—Bursar 62
Balance-sheet 63
Profit and Loss Account 64
Dairy and Herds Department—
Profit and Loss Account 65
Production and Costs Account 65
Milk Production and Cost 65
Mature Cow Department—Profit and Loss Account 66
Calves Department—Profit and Loss Account 66
Yearling Department—Profit and Loss Account 66
Bull Department—Profit and Loss Account 66
Work-horse Department—
Sales and Deaths Account 67
Horse-labour Account 67
Horse-labour performed 67
Hog Department—Profit and Loss Account 67
Cannery—Profit and Loss Account 68

REPORT OF THE MEDICAL SUPERINTENDENT

For the Twelve Months ended March 31st, 1936.

PART I.—MEDICAL.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., April 1st, 1936.

The Honourable the Provincial Secretary,
Parliament Buildings, Victoria, B.C.

SIR,—I have the honour to submit herewith for your consideration the Sixty-fourth Annual Report of the Provincial Mental Hospitals at Essondale, New Westminster, and Saanich.

The following table is a brief summary of the movements of the Hospital population during the year April 1st, 1935, to March 31st, 1936:—

Movement of Population.	Male.	Female.	Total.
In residence, April 1st, 1935	1,986	1,094	3,080
On probation, but remaining on registers	34	41	75
On escape, but remaining on registers	4	.....	4
New admissions during current year	394	285	679
Total under treatment	2,418	1,420	3,838
Discharged in full during year	151	112	263
Continuing on probation at end of year	48	56	104
Died during year	191	100	291
Total discharged	390	268	658
In residence, March 31st, 1936	2,028	1,152	3,180

(1.) Increase in number of patients this year as compared to last 26
(2.) Net increase in population in residence at end of year 100
(3.) Rate of deaths to total treated (per cent.) 7.58
(4.) Rate of discharged to admissions (exclusive of deaths) (per cent.) 54.05

ADMISSIONS.

An analysis of the birth column shows that, of the number admitted, 321 (or 47.27 per cent.) were Canadian born, 192 (or 28.27 per cent.) were born in other parts of the British Empire, 161 (or 23.71 per cent.) were of foreign extraction, and 5 were of unknown birth.

DISCHARGES.

From continued experience and statistics generally, it is now an accepted fact that the earlier the cases are brought in the far better opportunity there is for improvement and recovery than if they delay coming for treatment. This truth is clearly indicated in the following table:—

TABLE SHOWING THE ALLEGED DURATION OF INSANITY, PRIOR TO ADMISSION, IN THOSE DISCHARGED FROM THE THREE INSTITUTIONS DURING THE YEAR APRIL 1ST, 1935, TO MARCH 31ST, 1936.

Less than six months	150
Over six months	43
Duration not known	67
Not insane	3
Total	263

During the past fiscal year 263 patients were discharged in full. Of this number, 63 were discharged as recovered, 151 as improved, 46 as unimproved, and 3 were not insane. Included in these discharges are 11 who were deported to their native countries and 17 who were repatriated through the kindness of relatives or friends.

I would like to take this opportunity of tendering our grateful thanks to the Dominion Immigration Department for their very close co-operation with our Department and their unfailing courtesy at all times. On account of the lessening number of immigrants, there is naturally a decrease in our deportations; nevertheless, some of the cases have been most difficult, but one can always rely on the utmost assistance being given by the officers of the Immigration Department.

TREATMENT.

Patients are admitted first to our Psychopathic Wards, but, unfortunately, they are only able to stay here a short while before they have to be transferred to other wards to make room for our ever-increasing number of admissions. The purpose of the Psychopathic Ward is for close observation and study of each case, and to determine the correct category of each patient, so that when transfer is made he is placed with others of the same classification. One can readily see that such a purpose must prove of infinitely greater benefit to the patient than if he were domiciled anywhere without regard to his proper classification. However, as stated above, we are unable to carry out this plan to its fullest extent, due to our very limited space and our overcrowded conditions.

In addition to their ward duties, many of the medical staff have undertaken special work in connection with the treatment of our patients. Dr. Davidson has charge of the electro-cardiograph work, which assists in the diagnosis of the cardiac cases, thus facilitating treatment.

Dr. Gee continues to do splendid work in our X-ray Department. This branch is used very extensively and is of inestimable benefit to the patients. A separate report of the work done will be found elsewhere, and it is seen how much of his time is devoted to this particular branch.

During the past year the Laboratory-work has again been under the direction of Dr. Byrne. From the attached report it will be seen how very active this Department is. It is one of our most important branches and is of the utmost assistance in aiding diagnoses and guiding treatment. It is used by our training-school, and, in addition, we are able to help the Provincial Police in their analytical work, thus affording close co-operation with other branches of the service.

The eye, ear, nose, and throat work has been ably carried on by Dr. B. H. Harry, who is a specialist in this field, and the patients have been greatly benefited by his careful attention. Many of the neurological cases have also been treated by him.

While the Occupational Department is quite active with both male and female patients, yet it has not been established to the extent which we would like to see. Occupation, as we all know, is essential to the normal, and it is even more essential to those who, unfortunately, suffer from a psychotic condition. An increased staff is necessary to carry out this department more fully, so that naturally we have not been able to expand as we should, and therefore progress has undoubtedly been retarded. However, even under these adverse circumstances, a great deal has been accomplished, and an immense amount of benefit to the patients and the Hospital has been the result. Different types of occupation are engaged in, so that as nearly as possible the varied interests and inclinations of the patients may be met.

The Training School for Nurses has been of great advantage to the institution, and as time goes on one notices how gratifying are the results and that the Hospital is able to keep up with the advancement in treatment in mental institutions elsewhere. The course provided for the nurses is very intensive, yet, as the years go by, we feel that the enlargement of the school is amply justified and that the efforts made to sustain it are well worth while. It has been regretted that up until now we have not been able to have affiliation with the general hospitals actually in practice, but on account of the smallness of the Nurses' Home it has not been possible. The British Columbia Nursing Association has been patiently waiting to really commence affiliation, and we are gradually arranging for the proper instruction of the affiliate nurses. We sincerely trust that in the near future there will be sufficient accommodation to make a definite start.

The Child Guidance Clinic in Vancouver has been working to capacity with the existent staff, and there is an ever-increasing demand to extend this service. It is very important that early abnormalities of personality receive preventive treatment to avoid future unhappiness and mental illness. These clinics are being held more and more throughout different countries in the world, the idea being that, in this department of medicine as elsewhere, it is far better to attempt prevention rather than attempt treatment.

COMMENTS.

Each year there is an increase in the number of patients suffering from psychoses and additional accommodation is required. Our present accommodation is already greatly overtaxed, and the time has arrived when it is absolutely necessary to take definite steps. There are not sufficient beds available and we are fast approaching the hour when we will not be able to look after those admitted, so that, in spite of the fact that we are passing through a period of depression, further building will have to be considered. Overcrowding is not only expensive but dangerous, and means limiting to a considerable degree the proper segregation of the patients, thereby mixing together the different types, which greatly retards the time of recovery. The plan of separating the psychotic patients from the under-privileged mentally should be forwarded to the fullest extent, and we are constantly being met with the demand for this. Generally speaking, the mentally retarded are domiciled in New Westminster, but there, too, accommodation is taxed to capacity and further provision should be made in the near future for a suitable institution set apart on proper grounds. With psychotic patients there is an increased susceptibility to tuberculosis, and patients suffering from this malady should have a separate unit for their care and treatment. It is not proper that they should be confined to the same ward with others who are not so afflicted.

The new unit erected for the returned soldiers has filled a long-felt need. The cafeteria dining-room system has proved to be admirably suited for this service. We were pleased to read in a veterans' publication that this building compared very favourably with the accommodation provided for the returned soldiers in other Provinces of the Dominion. The soldiers' organizations are ever ready to assist those members who unfortunately have developed a mental condition, and they have always been more than willing to render us all the help possible when it has been required of them.

There is increased stress being placed on prevention, and it was found necessary to establish a preventive service in conjunction with the active hospital treatment of mental diseases. The Medical Superintendent was made General Superintendent and was placed in charge of both branches. The Assistant Superintendent was made Medical Superintendent in charge of the Hospital division, and assistant to the General Superintendent.

ACTIVITIES.

The farm has supplied the institution with agricultural products which are most essential in a large Hospital, and has also provided occupation for a great number of patients. It has continued to maintain the high standard of the animals reared, and farmers throughout the Province are able to purchase sires of merit, thus increasing both the production and standard of their herds. It will be a great advantage to us, when the time arrives, if there is another institution in a different location in the Province which can supply us with other produce which we are not able to raise here. The cannery has continued its important work, which means so much in helping to vary the meals and provide the patients with foods which are otherwise out of season. The piggery supplies pork and pork products to the institution, but there is a great need for increased cold-storage accommodation, and it is hoped that something can be done in this connection this coming year.

ACKNOWLEDGMENTS.

Before closing, I wish to tender grateful thanks to all those who have aided the work of the Hospital during the past year. In this connection I would mention Mrs. Ellis, Convener of the Red Cross Visiting Committee, who has been responsible for the many enjoyable concerts and entertainments held for the benefit of the patients.

I also desire to express my sincere appreciation of the close co-operation rendered us by the members of the Provincial Police. They are always ready and willing to render us their courteous assistance, and have aided us on many occasions with some of our difficult problems.

I wish to make special mention of the loyal support and co-operation which I have received at all times from the medical officers and staff of the Hospital. I wish especially to draw to your favourable attention the unfailing help granted me on every occasion by Dr. E. J. Ryan, Medical Superintendent. I would also like the following to be remembered: Dr. L. E. Sauriol, Medical Supervisor of our New Westminster Branch, and Mr. Spooner, Supervisor of the Mental Home at Saanich. All other departments are entitled to my sincere thanks for their faithful service.

Finally, to you, Sir, to the Deputy Minister, and to the Public Works Department, I owe grateful acknowledgment for your support and sympathetic understanding of the many difficult problems which are continually coming before us, and without your kind interest and assistance it would be impossible for the work of the Hospital to be carried on.

I have the honour to be,
Sir,
Your obedient servant,
A. L. CREASE,
General Superintendent.

LABORATORY REPORT.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., March 31st, 1936.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—Following is a report of the work performed in the Laboratory at Essondale from April 1st, 1935, to March 31st, 1936:—

Urinalysis routine	1,216
Quantitative albumen	59
Quantitative sugar	1
Two-hour test	6
Ascheim Zondeck	6
Blood—	
Kahn positive	48
Kahn negative	508
Red-blood count	28
White-blood count	31
Hæmoglobin	29
Differential	29
Sugar, Folin Wu	3
Calcium	2
Widals	168
Coagulation	2
Groupings	26
Spinal fluid—	
Kahn positive	22
Kahn negative	21
Globulin	43
Cell-count	2
Colloidal gold	8
Sputa for tuberculosis	76
Autopsies	38
Sections	106
Cultures	96
Exudates	1
Gastric analysis	1
Milk	17
Water—Bacterial	1
Fæces examination	3
Smears—	
Eye	11
Nose, throat	21
Urethral	19
Vaginal	29
Vincent's angina	10
Malaria	2
Miscellaneous	51

Metabolism	29
Guinea-pig inoculation	2
B.C. Police cases	9
Vaccines	51

I have, etc.,

ULTAN P. BYRNE,
Pathologist.

X-RAY REPORT.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., March 31st, 1936.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—Following is a report of the work performed in the X-ray Department of the Hospital from April 1st, 1935, to March 31st, 1936:—

Extremities	176
Head	73
Encephalograms	9
Sinuses	19
Chest	164
Pelvis	14
Vertebræ	7
Shoulder	21
Gastro-intestinal	18
Total exposures	501

I have, etc.,

ARTHUR M. GEE,
Physician and Roentgenologist.

OCULIST'S REPORT.

FROM APRIL 1ST, 1935, TO MARCH 31ST, 1936.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospitals, Essondale, B.C.

SIR,—The following is a report of the ocular-work performed for the Hospitals during the past fiscal year:—

Total number of patients examined	179
Eye-grounds	60
Perimeter fields	5
Refractions—	
(*a.*) Cycloplegic	40
(*b.*) Non-cycloplegic	38
Cysts	2
Conjunctivitis	20
Acute iritis	5
Iridocyclitis	6
Corneal ulcers	3

I have, etc.,

BENJ. H. HARRY,
Oculist.

ULTRA-VIOLET LAMP.

FROM APRIL 1ST, 1935, TO MARCH 31ST, 1936.

Total number of treatments for the year, 2,050; total time required for treatments, 457 hours and 53 minutes.

ULTAN P. BYRNE.

DENTAL REPORT.

The following is the report of dental services rendered at the Provincial Mental Hospital, Essondale, and the Public Hospital for the Insane, New Westminster, during the year ended March 31st, 1936:—

PROVINCIAL MENTAL HOSPITAL, ESSONDALE.

Number of patients treated	505
196 patients had hopelessly diseased teeth extracted	355
Local anæsthetic used to reduce pain in operating	196
Fillings inserted	27
Patients treated for pyorrhœa	18
Post operative treatments	11
Cementing inlays and crowns	6
Repairing fillings	12
Removing bridges	7
Altering dentures	19
Repairing dentures	62
Making new dentures and fitting same to mouth	10

PUBLIC HOSPITAL FOR THE INSANE, NEW WESTMINSTER.

Number of patients treated	205
102 patients had hopelessly diseased teeth extracted	146
Local anæsthetic used to reduce pain	102
Number of fillings inserted	6
Number of dentures repaired	5
Patients treated for pyorrhœa	18
Silver-nitrate treatment to prevent decay	3
Fillings repaired	12
Patients treated for Vincent's infection	2

EMERY JONES, D.D.S.

TRAINING-SCHOOL REPORT.

The Essondale Mental Hospital School of Nursing completed the fiscal year ended March 31st, 1936, with a total staff of 146, consisting of 31 registered nurses, 40 mental graduates, 57 student-nurses, and 18 male attendants. Through the University of British Columbia 16 Public Health Nurses were assigned for two weeks' time each.

Number of student-nurses admitted during the year, 26; number of graduate nurses, 10; also 1 dietitian, 1 seamstress, and 2 male attendants.

Resignations for the year were as follows: Seven students, 14 mental graduates, 9 registered nurses, 1 dietitian, and 2 attendants. Of these, 14 resigned to be married, 8 for a change of occupation, 7 due to termination of vacation relief, 1 did not like the work, and 3 were unsatisfactory in the training-school.

Total number of days lost through illness from March 31st, 1935, to March 31st, 1936, were 1,314, as compared to 784 the previous year. This increase was due to an epidemic of scarlet fever and one of measles.

The opening of a Nurses' Infirmary consisting of eight beds made it possible to give proper and adequate nursing service. Medical attention was given by members of the Essondale staff. During the year there were thirty-four chest X-rays and complete physical examinations.

The Essondale Alumni Association and student-body united to organize a sick benefit fund. This has proved very satisfactory and has even in its initial year given assistance to sick nurses who were not receiving salary.

Extra-curricular activities have been well attended, and through the production of plays and musical entertainment sufficient money was realized to add twenty books to the nurses' library.

This year fifteen nurses received diplomas for a three-year course in psychiatric nursing and eight registered nurses completed the six months' postgraduate course.

The training-school is ever indebted to the medical and nursing staff, who have given so much of their time and made possible our present teaching programme.

C. A. HICKS, R.N.,
Superintendent of Nurses.

SOCIAL SERVICE REPORT.

ESSONDALE MENTAL HOSPITAL.

The Hospital Social Service work of the Hospital would appear to have been on a sounder basis during this last year. With the additional help of another worker, the service has been able to adopt more routine. Miss Barbara Robertson, M.A., joined the staff in August, 1935. She is a Social Service graduate of the University of British Columbia and obtained her M.A. degree from McGill University, majoring in Psychology. She is well trained and capable of contributing much to the Hospital and the community in which she works. With this additional staff we were able to divide the work in Vancouver and surrounding districts into two parts, so that each worker is held responsible for her own district.

The relatives of each patient coming into the Hospital are now called upon within three weeks of their admission, and case-work is done with the family wherever practical. Thus the link between the home and the Hospital has become noticeably shorter. The probation cases have the advantage of a much better " follow-up " system, and it has been shown that the more work done in the home, the longer the patient remains from the Hospital. This fact can be demonstrated by definite case-histories. Of course, the case-work done in the homes of the admittals is of a preventive nature, inasmuch as it helps the family to return to normality and to prepare the home for the patient's release from Hospital. Consequently there is not the same opportunity for definite statistics, but we know from actual results that prevention should be the key-work of our work.

The Child Guidance Clinic building is used a very great deal for Hospital Social Service conferences, and with the opportunities of having a doctor see the relatives and the probation cases, it has helped considerably to link up the whole service.

The Welfare Field Service gives us valuable assistance and we in turn reciprocate with help for cases which are causing them concern in the districts in which they work.

The educational programme is still carried on with the postgraduate nurses, who are given lectures and practical experience in the visiting field. This also applies to the Social Service students of the University and the nurses of the University Public Health Course. Lectures at the University are also given to the Social Service students and the Public Health Nurses during their academic year.

The following is the statistical report of the work done:—

Visits to homes of admission cases	507
Individual probation cases carried	28
Conferences with other agencies *re* Hospital cases	104
Psychometrics in Hospital	26
Total new cases referred	306
Cases carried as treatment cases	98

As the same employees are working in the Child Guidance Clinic, only part of their time is devoted to the Hospital service. As far as is possible, the time is equally divided between the two activities.

Respectfully submitted.

J. F. KILBURN,
Psychiatric Social Worker.

CHILD GUIDANCE CLINIC.

The present report deals very briefly with the activities of the Psychiatric Clinic in the Child Guidance Clinic during 1935–36.

The reader is referred to last year's report for a descriptive statement of the organization and programme of the clinic. This year there has been considerable expansion in the activities with some increase of staff, and it has been possible to undertake a greater volume of work during the year. The community as a whole has become more conscious of mental health and its implications. Despite the expansion of staff and services offered to the public, the work is taxed to its capacity, but it has been possible to meet the major needs. There has been little deviation from the programme as outlined in our former reports. In the main the methods of study and treatment previously described have been followed; but with the opening of the clinic to nearly full time, together with the clinics held in the outside centres, many more cases have been treated.

Victoria now has a clinical service for children and adults of two full days a month.

Nanaimo held its first clinic on November 6th, 1935, and the appointments there are always up to capacity. This clinic serves the upper part of Vancouver Island.

The Chilliwack Clinic, which first opened on November 28th, 1935, serves the Fraser Valley District.

With the increase of workers in the Field Welfare Service, there are constant demands for guidance and advice, with reference to the cases which they meet in their respective districts.

It is noted that the greatest use of the clinic is made by the social agencies, both public and private, but there has been an increase in the referals made by the physicians, and by the parents of the children. This shows that the public at large are appreciating the clinical services, as well as becoming more familiar with the advantages of preventive work in the psychiatric field. The case-work on the clients and families has increased, and this also is a healthy sign, as a service of this kind is not for diagnosis only, but for treatment. In addition there is far greater interest now shown by the general public, inasmuch as more and more people come to clinic to find out what it is all about, and following their visits there are many more requests on the public educational programme. These requests are met with, the staff participating in the giving of talks on child-guidance work and general preventive psychiatry.

Space does not permit a detailed report and statistics are never a full statement of the work done. However, the following table is submitted to endeavour to show the number of cases treated and the type of cases seen during the months of April, 1935, to March, 1936:—

Sources of New Cases.	Vancouver.	Nanaimo.	Victoria.	Chilliwack.
Children's Aid Society	51	------	13	------
Family Welfare Bureau	33	------	------	------
Juvenile Court	29	------	------	------
Private parents	49	4	------	------

The following are the reasons given when examination was requested at the Vancouver Clinic. This table, however, does not show what was found when the patients were examined.

PROBLEMS AS REFERRED.

Behaviour—		
Unspecified		16
Specified		18
Enuresis	8	
Temper	7	
Imitating	3	
Retarded development		1
Standardization		30
Delinquent tendencies—		
Unspecified		4
Specified		50
Runaway	4	
Sex problem	6	
Incorrigible	17	
Theft	21	
Arson	1	
Vagrancy	1	
Moody		1
Physical		6
Unspecified	1	
Seizures	5	
School problem		2
Nervous tendency		15
No idea of play		1
Adoptability of child		18
Mental defective		16
Family study		14
Unmarried mother		7
Plans for future		3
Vocational guidance		1
Parent in P.M.H.		1
Relative in P.M.H.		4
Family problem		6
Reading difficulty		2
Question of mental illness		8
Unable to adjust		2
Retarded development		2
Broken home		1
Difficult to handle		1
Phantasy life		1
Mentally retarded		1

Respectfully submitted.

J. F. KILBURN,
Psychiatric Social Worker.

PART II.—FINANCIAL.

BURSAR'S REPORT.

ESSONDALE, B.C., October 9th, 1936.

A. L. Crease, Esq., M.D., C.M.,
General Superintendent of Mental Hospitals,
Essondale, B.C.

SIR,—I beg to submit herewith for your consideration the financial statement of the Provincial Mental Hospitals of British Columbia for the year ended March 31st, 1936, including balance-sheets, profit and loss accounts, and various other financial and statistical reports.

The total gross operating expenditure for the three institutions, as detailed in Table D, shows an expenditure of $1,061,415.97, an increase of $70,089.31 over the preceding year, and, while to some extent accounted for by the increase in our population, is a clear reflection of the increased cost of provisions and other commodities and the cost of living in general. This is shown in detail in the analysis of the gross *per capita* cost, Table B 1, where a decided increase in the provision and clothing accounts is to be noted.

Our average daily population for the year under review was 3,126.06, as against 3,069.50 for the previous year, and the gross *per capita* cost $339.53 per year or 92.77 cents per day, as against $322.96 per year and 88.48 cents per day during the preceding year.

Produce to a value of $144,424.08 was supplied by the Colony Farm to the three Hospitals, as follows: To Essondale Hospital, $125,048.90; to the Public Hospital for Insane, New Westminster, $19,350.18; and to Saanich Mental Home, $25.

Colony Farm expenditures of $119,706.05 have been included in our statements in compiling the *per capita* maintenance cost.

Slightly improved conditions are also evident in collections. Revenue remitted to the Treasury from the three institutions totalled $166,367.83, as compared with $152,239.56 in the year 1934–35, and bills collectable under the "Public Institutions Indemnification (Municipalities) Act" total $339,471, bringing our revenue to $505,838.83, an increase of $24,030.27 over the preceding year.

In closing, I would express my appreciation of the many courtesies and the close co-operation that has marked our relations with all other departments of the institution and the Government at all times.

All of which is respectfully submitted.

GOWAN MACGOWAN,
Bursar.

PUBLIC HOSPITAL FOR INSANE, NEW WESTMINSTER.

PART III.—COLONY FARM.

FARM SUPERINTENDENT'S REPORT.

ESSONDALE, B.C., September 25th, 1936.

A. L. Crease, Esq., M.D., C.M.,
General Superintendent of Mental Hospitals, Essondale, B.C.

SIR,—Herewith I beg to submit for your approval the annual statement of farm operations for the fiscal year ended March 31st, 1936.

Operations have followed fairly closely those of the preceding year, and as our herd capacity has just about been reached, very little change in that direction can be anticipated. Fortunately, better marketing conditions have tended to stabilize prices and a better demand for stock has resulted, which assists to some extent in caring for our surplus. This was quite marked in our sales of calves, especially in the latter months of the year.

Our dairy herd is in excellent condition and enviable records have and are being made. Production during the year averaged 3⅔ tons of milk per day, and despite the serious loss of our root-crops in the October freeze-up, this was delivered to the institution after all production expenses, pasteurization, etc., at a cost of 19.01 cents per gallon.

The force of work-horses received during the year a thorough culling, when nine of the older, worn-out animals were disposed of to make way for younger stock raised on the farm.

Our herd of approximately 800 pure-bred Yorkshire hogs has been maintained in good health, and production has been both very satisfactory and profitable.

Field crops were fairly good and potatoes an exceptionally heavy crop, yielding 15.93 tons per acre. In common with other producers, we unfortunately lost practically our entire root-crop except potatoes in the severe October freeze-up.

The cannery had a busy season and $25,000 worth of fruit and vegetables, approximating 200 tons of food material, were canned. This work, starting in a small way, has now become a very important part of our operations, and should prove even more profitable when our young orchard comes into full bearing.

Field and general working equipment has been maintained in good repair, and necessary repairs have been made as far as possible to buildings, roads, and fences.

It is a pleasure to report that I have received every help and assistance possible from the staff and institution officials. The resignation at the end of the year, owing to ill-health, of James Lobban, Assistant Superintendent, and a member of the staff for twenty-five years, is a decided loss to our organization. Throughout his long period of service, wonderful co-operation, enthusiastic and constructive work, and happy relations marked his every day's effort and his retirement is regretted by one and all.

All of which is respectfully submitted.

P. H. MOORE,
Farm Superintendent.

BURSAR'S REPORT ON COLONY FARM.

ESSONDALE, B.C., October 9th, 1936.

A. L. Crease, Esq., M.D., C.M.,
General Superintendent of Mental Hospitals, Essondale, B.C.

SIR,—I beg to submit herewith balance-sheet, profit and loss statements, and various other reports covering the operations of the several departments of the Colony Farm for the fiscal year ended March 31st, 1936.

Operating profits of $11,657.80 are shown for the year, an increase of $7,792.54 over the year ended March 31st, 1935. This was due largely to the exceedingly heavy potato-crop and to the increased and profitable cannery pack.

Dairy produce, meat, fruit, and vegetables to a value of $144,424.08 was supplied the three institutions. Of this amount, Essondale Hospital received produce to a value of $125,048.90; Public Hospital for the Insane, New Westminster, $19,350.18; and Saanich Mental Home, $25. In addition, the sum of $6,758.47 was remitted to the Treasury during the year from the sale of produce and live stock.

Milk production for the year totalled 2,489,510 lb. at a cost of $47,337.50, bringing the average cost of production, pasteurization, etc., to 19.01 cents per gallon. It is impossible to visualize all the difficulties, troubles, and expense that would lie in our way in securing such a quantity of fresh milk for the Essondale and New Westminster institutions were it not for this immediate supply.

Other operations showing substantial profits were the Hog Department, with profits of $17,402.48; Orchard and Truck-gardens, $4,286.71; and the Cannery, $6,763.95. This last department has steadily increased its operations until it now supplies a great proportion of our canned fruit and vegetable requirements.

A complete and interesting account of the working of each department of the farm can be gained by perusal of the attached cost sheets and statements.

All of which is respectfully submitted.

GOWAN MACGOWAN,
Bursar.
