REPORT *of the* MEDICAL SUPERINTENDENT
FOR THE TWELVE MONTHS ENDED MARCH 31st, 1942.

PART I.—MEDICAL.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., April 1st, 1942.

The Honourable the Provincial Secretary,
Parliament Buildings, Victoria, B.C.

SIR,—I have the honour to submit herewith for your consideration the Seventieth Annual Report of the Provincial Mental Hospitals at Essondale, New Westminster, and Saanich.

The following table gives a brief summary of the movements of the Hospital population during the year April 1st, 1941, to March 31st, 1942:—

Movement of Population.	Male.	Female.	Total.
In residence, April 1st, 1941	2,377	1,459	3,836
On probation, but remaining on registers	89	84	173
On escape, but remaining on registers	------	------	------
New admissions during current year	482	352	834
Total under treatment	2,948	1,895	4,843
Discharged in full during year	292	179	471
Continuing on probation at end of year	99	115	214
Died during year	170	86	256
Discharged during year	561	380	941
In residence, March 31st, 1942	2,387	1,515	3,902

(1.) Decrease in number of admissions this year as compared to last 30
(2.) Net increase in population at end of year 66
(3.) Rate of deaths to total treated (per cent.) 5.28
(4.) Rate of discharges to admissions (exclusive of deaths) (per cent.) 82.13

ADMISSIONS.

An analysis of the birth column shows that, of the number admitted, 430 (or 51.56 per cent.) were Canadian born; 208 (or 24.94 per cent.) were born in other parts of the British Empire; and 195 (or 23.74 per cent.) were of foreign extraction. There was one whose birthplace was unknown.

DISCHARGES.

The following table clearly shows that the shorter the duration of the mental illness before admission the greater are the chances of recovery through treatment:—

TABLE SHOWING ALLEGED DURATION OF INSANITY, PRIOR TO ADMISSION, IN THOSE DISCHARGED FROM THE THREE INSTITUTIONS DURING THE YEAR APRIL 1st, 1941, TO MARCH 31st, 1942.

Less than six months	261
Over six months	96
Not insane	10
Duration unknown	104
Total	471

During the past year 471 patients were discharged in full. Of this number 71 were discharged as recovered, 269 as improved, 121 as unimproved, and 10 were not insane.

TREATMENT.

This year there were 834 patients admitted as against 864 last year, showing a definite drop of thirty. Last year the drop was only five patients. The net increase of patients in population was only sixty-six patients. This is the smallest number in patient increase seen during the last ten years.

During the past year the metrazol shock treatment for schizophrenia has not been used as much as formerly, on account of the intense dislike patients have for it. Formerly it was used in very advanced cases as well as early ones, but this also was discontinued. Latterly, its use has been extended to include cases with acute maniacal and depressed symptoms, with considerable value.

The insulin shock service has been very active. Seventy-one cases were treated and at present it would appear from careful survey that there were: Recovered, 40.3 per cent.; improved, 38.8 per cent.; unimproved, 20.9 per cent.

Electrical shock treatment is gradually growing in vogue and it is now felt that this method will be of some value here and will be a good method of replacing metrazol, which is so disliked by the patients.

There are some 300 cases of tuberculosis in our population, 200 of which are active. In so far as is possible under the circumstances, these patients are isolated.

The weekly treatment clinic for venereal disease is now handling forty-eight cases.

The Physiotherapy Department has carried on, doing 6,019 treatments, but for a somewhat smaller number of patients than were treated last year.

The X-ray service has taken care of more patients and staff this year, 3,312 films being taken. The apparatus is very old now, but new equipment, more modern and less expensive to run, has been ordered. It has not been supplied to us yet.

The visiting Oculist, in addition to relieving many medical and surgical eye conditions, has done refractions and prescribed glasses.

The Beauty-parlour has a steady demand on its services. Hair-cuts, shampoos, waves, etc., numbering 13,903 have been done.

Services in the Dental Department are also in constant demand, not only for examinations but also for treatment, which covers a very wide field. The number of treatments and examinations was 4,587.

The Laboratory lost the services of Mr. T. A. Morris, who was promoted to the position of Supervisor of the Mental Home at Saanich. A large volume of work has been done during the year; in all, 17,162 examinations and analyses were made. Every effort is being made to sustain this work, as it is of such value to our clinical service.

The Psychologist has carried on with a large and varied number of tests for intelligence, attitudes, aptitudes, and personalities. Tutoring lessons for reading were also given. The total number of tests was 1,420.

The Occupational service has been very busy throughout the year. It is of great value to the patients and to the Hospital. It not only is an important adjunct to therapy in mental cases but aids the Hospital greatly in its actual housekeeping. Inactivity among patients is greatly to be avoided and fortunately occupational therapy is popular both among patients and staff.

During the year there have been great changes in the Nursing School. The difficulties of the Superintendent of Nurses have greatly increased. Naturally, our Superintendent has strived to maintain the usual standard of efficiency and personnel but, on account of global conditions, it is increasingly hard. A number of things have been brought to bear, all tending to cause a great change in staff. There are three students to one graduate, a positive reversal of conditions ordinarily existing when there were two registered nurses and one mental nurse to one student. Now we have introduced ward aides of various standards to assist in carrying on this service. On the male side, in addition to the great changes in personnel, the age-limit of those employed has been greatly raised. However, in spite of it all, those in charge are doing well indeed.

The Social Service Department has accomplished much during the year and was handicapped by losing one of its workers who left to take a better position. It not only is a bridge between the Hospital and the home, it aids in giving a better picture of the actual environment and prepares the home for the patient's return where possible. It also conducts the clinic in Vancouver and aids in the teaching programme of the Hospital and in the Social Service Public Health course.

A large amount of work has been covered in the Child Guidance Clinic. Here children are seen who are not making proper adjustment to life. They may adjust in many ways but show deviation in one or more points. After careful study of the whole picture, it is found where the deviation is taking place and, through conference with those concerned, a plan of therapy is laid down and a follow-up treatment established. The cases are referred and much time is consumed by appointments, yet 559 cases were examined, of which 396 were new and 163 were seen before. The sources of the cases are many and the services given by the clinic extend through many agencies. The number of interviews is increasing.

The Farm not only aids in the supply to the Hospital of some foods, but is a valuable outdoor and indoor method of furnishing occupational therapy for hospital patients. Pure-bred Holstein cattle supply good milk and proper male progeny are available to the dairying industry of the Province. The cannery at the Farm produces canned fruit, vegetables, and pickles, which help greatly with the hospital meals. The piggery is our source of pork and is especially appreciated during war-time.

COMMENTS.

Throughout the years it has been advocated that steps should be taken to lessen the overcrowding, which is dangerous to patients and staff, costly, and much to be avoided. There are three methods of doing this: (1) Building more accommodation; (2) remove those patients whose condition permits their accommodation elsewhere; (3) increase discharges. With reference to the second method, it has been proposed to take out 400 elderly patients to another service. During the last thirty years the average length of life has been extended from 48 to 64 and there will be an increasing number of elderly people to come. A man, healthy at 50, has a reasonable chance to live to 70, and for every year until 60 six months is added. In an institution they live longer. The third method may be accomplished by boarding-out patients. This has been done elsewhere for seventy-five years. It is not what it was thought to be and is especially difficult during a war period. Psychotic patients can be boarded out or subnormal cases can be placed in small colonies on abandoned farms, but the number of patients involved in either case is necessarily small.

The space in which to put more beds throughout the Institution is scant, such as basements, attics, and service rooms. There are only some of the day rooms left and they are being used. This not only increases the patients on the ward but it takes away from them the space occupied by them during the day-time.

At the Institution in New Westminster, the old dilapidated and unsightly high board fence is being removed and a suitable wire fence, skirted by cypress trees, is being erected. This will greatly improve the appearance of McBride Boulevard.

This year there was an epidemic of sixty-two cases of measles among the children. There was no opportunity for proper isolation.

Mr. Spooner, an experienced and trusted officer, Supervisor at the Mental Home in Saanich, applied for his superannuation, and Mr. T. A. Morris, a valuable and trusted employee of long experience, was appointed in his place.

There were many changes in staff. Dr. Vosburgh, who joined the Army, resigned from here and has now gone into private practice. Among those taking superannuation are our old and trusted employees: Attendant Jas. Minns; Wm. Findlay, one of our cooks; and Attendant G. Scott. We also lost, through superannuation, the services of Miss White from the occupational work with the children. She is missed greatly by the patients and staff alike.

OBITUARY.

It is with regret we record the passing of one of our valued employees during the past year. Mr. Thomas Pennington, Charge Attendant, was born in England in 1889. He was an Imperial Veteran, having first joined the British Army in 1905. He was a reservist and was called to the colours in September, 1914, with the Scots Guards, being one of the "Old Contemptibles." He was wounded and received his discharge in 1917. He entered the service of the Hospital at New Westminster on February 13th, 1918, and rose to the position of Charge Attendant. He passed away suddenly at his home on August 8th, 1941. He was loved by the patients and highly esteemed by all who came in contact with him.

ACKNOWLEDGMENTS.

Before closing my report, I wish to extend my sincere thanks to all those who have assisted in the work of the Hospital. We are ever grateful to the members of the Red Cross Visiting Committee for the entertainment they have provided for the patients.

Our special thanks are due to the Provincial Police for their willingness to help at all times and we can always rely on their co-operation and assistance.

I wish to acknowledge with grateful thanks the loyal co-operation and support I have received from the medical officers of the Hospital. Special mention must be made of Dr. E. J. Ryan, the Medical Superintendent, whose tasks are becoming increasingly difficult with the many changes due to war conditions. I also wish to commend to your favourable notice Mr. Macgowan, our Bursar; Dr. L. E. Sauriol, Medical Supervisor at New Westminster; Mr. T. A. Morris, Supervisor, Colquitz Mental Home; and Mr. H. Lonsdale, Foreman of Works.

Finally, to you, Sir, and to the Deputy Minister, and the officers of the Public Works Department, I wish to express my gratitude for your thoughtfulness and keen sympathy in dealing with the various problems of the Mental Hospital. Your courteous consideration has been most helpful in smoothing out the many difficulties with which we are faced and has greatly assisted in the progress of the Hospital.

I have the honour to be,
Sir,
Your obedient servant,

A. L. CREASE,
General Superintendent.

LABORATORY REPORT.

PROVINCIAL MENTAL HOSPITAL,
ESSONDALE, B.C., March 31st, 1942.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—The following is the report of the work performed in the laboratory at Essondale from April 1st, 1941, to March 31st, 1942:—

Blood—

Kahn, positive	56
Kahn, negative	748
Red-blood count and hæmoglobin	1,192
White-blood count and differential	1,605
Sedimentation rate (Cutler method)	805
Sedimentation rate (Westergren method)	5
Coagulation time	10
Bleeding time	8
Reticulocyte count	6

Blood—*Continued.*	
Clot retraction	1
Grouping	710
Cross-agglutination	10

I have, etc.,

ULTAN P. BYRNE,
Pathologist.

X-RAY REPORT.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—The following is the report of the work performed in the X-ray Department of the Hospital from April 1st, 1941, to March 31st, 1942:—

Number of films taken	3,302
Number of patients X-rayed	2,800

	Patients.	Films.
Chest	2,344	2,361
Extremities	155	328
Gastro-intestinal	40	93
Kidney urinary bladder	9	25
Shoulder	27	39
Pelvis	67	83

	Patients.	Films.
Sinus	19	45
Teeth	30	89
Jaw	10	16
Heads	34	67
Spine	39	81
Pregnancy	4	7
Gall-bladder	15	62
Nose	3	3
Ribs	2	5
Mastoid	2	8

I have, etc.,

A. M. GEE,
Physician and Roentgenologist.

OCULIST'S REPORT.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—The following is a list of the types of cases handled during the fiscal year 1941–42:—

Refractions	65
Perimeter tracings	30
Cycoplegic examinations	32
Lacerated conjunctivas	3
Corneal ulcers	7
Iridocyclitis	4
Conjunctivitis	10
Chalazion	1
Cysts	2
Dacryocystitis	1
Glaucoma	1
Cataracts (diagnosed)	5
Eyegrounds examined	50

I have, etc.,

BENJ. H. HARRY,
Visiting Oculist.

PHYSIOTHERAPY REPORT.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—Following is a report of the treatments which were given in the Physiotherapy Department at Essondale from April 1st, 1941, to March 31st, 1942:—

Infra-red lamp	448
Diathermy and inductothermy	535
Electric-light cabinet	199
Continuous-flow bath	1,329
Foam bath	205
Sitz bath	86
Tub bath	199

Cold wet packs	39
Ultra-violet lamp	1,260
Needle-sprays, rain-douche, etc.	420
Massage, active and passive movements	1,079
Miscellaneous	99
Alcohol rub	121
Total number of treatments	6,019
Total number of patients treated	339

I have, etc.,

ULTAN P. BYRNE,
Physician.

PSYCHOLOGIST'S REPORT.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—Following is a report of work performed for the fiscal year ended March 31st, 1942:—

DENTAL REPORT.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—Following is the annual report of the Dental Department:—

PROVINCIAL MENTAL HOSPITAL, ESSONDALE.

All patients admitted were examined and dental charts filed. All acute conditions were given precedence and all suffering relieved the same day as reported. Dentures were made for patients recommended by members of the medical staff. Restorations of carious teeth have been made as far as possible.

Clinical instruction was given to Mr. Sanford Fleming, a duly articled student, during the summer months previous to his graduation year.

Summary.

Examinations	852
Extractions	862
Peridental treatments	151
Fillings inserted	1,196

BEAUTY-PARLOUR REPORT.

E. J. Ryan, Esq., M.D.,
Medical Superintendent, Provincial Mental Hospital, Essondale, B.C.

SIR,—The following is a report of the appointments in the beauty-parlour from April 1st, 1941, to March 31st, 1942:—

Hair-cuts	8,214
Shampoos	3,229
Finger-waves	1,538
Marcels	139
Curls	783

I have, etc.,

ANNE WILL.

TRAINING-SCHOOL REPORT.

The Provincial Mental Hospital School of Nursing completed the fiscal year ended March 31st, 1942, with the following personnel: Registered nurses, 14; mental graduate nurses, 25; nurses-in-training, 137; and male attendants, 24—making a total staff of 200. This is an increase of 5 over last year—4 nurses and 1 male attendant. The nurses were required to staff an aged women's ward which was converted recently from a convalescent ward, and the male attendant is additional staff in the printer's shop, a branch of the Male Occupational Department.

Resignations for the year were as follows: Registered nurses, 9; mental graduate nurses, 32; nurses-in-training, 70; and male attendants, 6. Of these, 42 resigned for a change of occupation, 37 to be married, 27 at the termination of summer relief, 3 as undesirable in the training-school, 2 did not like the work, and 3 owing to illness. Of the 6 attendants who resigned, 3 left for a change of occupation and 3 to join His Majesty's Forces. Resignations of 41 fully trained personnel and 72 partially trained personnel result in 56.5 per cent. new staff devoid of any training in hospital work or psychiatric nursing.

Increase in the number of resignations of nursing staff could be attributed to the existent conditions of war, when there are many openings for young women in work carrying less danger of personal illness or injury. The shortage of registered nurses continues and mental graduates of this hospital are holding positions ordinarily held by registered nurses. This has taxed our medical and teaching staffs as well as senior nursing staff, as supreme efforts are undertaken in an attempt to keep our nursing service comparable to standards we have reached in past years.

This year 24 nurses and 1 male attendant received diplomas for the three-year course in psychiatric nursing. There were no registered nurses taking postgraduate work in psychiatry this year and there are no male attendants in our classes at the present time. Eleven students taking the Public Health Extension course at the University of British Columbia were assigned here for one week of observation and study. Forty-eight students from five of the general hospital training-schools in the Province completed the two months' affiliation course in psychiatric nursing.

In the past few years there have been requests from our graduates that consideration for their training here be afforded them on the three years required to complete training in a general hospital for the purpose of obtaining Registered Nurses' standing. The time allowed graduates of this school up to the present has been two months. In March the following resolution was approved by the Registered Nurses' Association of British Columbia:—

"That for the present, the allowance of time for those who hold a certificate in Psychiatric Nursing acceptable to the Council, and who wish to take a general nursing course, shall be six months, provided such application is made within five years following the completion of their Psychiatric Course. Such regulation shall be applicable to any student who has entered a general school of nursing since January 1st, 1942."

In the matter of affiliation between this hospital's school of nursing and general hospitals' schools of nursing, the Registered Nurses' Association has outlined a plan for a four-year course; two years at this hospital and two years at any one of the seven general hospital schools of nursing in this Province. It is questionable if the need at this time would warrant the expense involved in setting up this affiliation programme and the plan is therefore deferred.

LINEA BLOMBERG, R.N.,
Superintendent of Nurses.

SOCIAL SERVICE REPORT.

PROVINCIAL MENTAL HOSPITAL.

Throughout this last year no marked changes have been made in policy. This skeleton staff has been short one member since August and it has been impossible to obtain a trained psychiatric social worker anywhere in Canada. However, the case-work has not suffered too much, and we have tried to select the more promising type of case for intensive treatment. The enlarged clinic building in Vancouver has made it possible for the social workers to see more relatives and friends of the patients there, thus saving valuable time otherwise spent in transportation. There is a disadvantage in this as, unfortunately, we do not learn the environmental surroundings of the patients admitted, and in these days of overcrowding and lack of medical and nursing staff in the hospital, patients and relatives need maximum assistance and help to bridge the gap between hospital and home. It is a great advantage for the workers to have a town office where they can report a patient's condition to relatives by telephone. Here, too, other agencies are able to locate the hospital staff and receive help in psychiatric problems concerning those who have not as yet been committed. Such cases are very often tided over the critical period in this way, thus saving a bed in the hospital. There has been more co-operative case-work between agencies undertaken this year.

Since the transfer of D.P. and S. cases, the existing Welfare Field Workers throughout the Province have been able to devote more time to the probationary and discharged patients, as well as obtaining the pertinent facts of a social history so necessary for the treatment of hospital patients and to the families concerned. This has introduced more correspondence and supervision, and while recognized as helpful up to a point, the need for more personal supervision is acutely felt. It would be an advantage both to the individual worker and the supervisor if the latter could visit outside points.

The educational programme of lectures at the University of British Columbia and to the student nurses has been maintained, while the allotment of four Social Service students to the department has been an assistance in promoting psychiatric social work training.

STATISTICAL REPORT.

Initial interviews with family of newly admitted patients	340
Therapy interviews	468
Probation visits	198
Ward visits	594
Co-operative visits to other social agencies of Greater Vancouver	391
Conferences *re* hospital cases with other social agencies	200
Letters to other social agencies, including Welfare Field Service	853

CHILD GUIDANCE CLINIC.

The report for the year ended March, 1942, completes the tenth year in which the Child Guidance Clinic has been in operation, and looking back over this period it is indeed gratifying to notice the increased service that is now offered and the wide field in which assistance is now given since the establishment of the clinic. That we have been successful in our efforts to give aid to many citizens of this Province is seen in the fact that some of our first patients still return to us for advice. We have seen these people through all sorts of major difficulties, such as hospitalization, divorce, physical illness, financial stress, and disrupted family relationships. It is this sort of work which shows the test of time and acts as a disciplinary agent to a conscientious clinical staff.

It is difficult to show statistically the number of interviews that take place in connection with each case. The patient comes to the clinic by appointment, where he first is given a physical examination, followed by a psychometric test. After these have been completed he is interviewed by the psychiatrist who also talks individually with each of the parents in turn and the social worker or person who referred the case.

Following this, all findings—social, medical, psychiatric, and psychological—are pooled by case conference, and plans for the patient's future with recommendations for treatment are formulated. This treatment may be general, specific, or co-operative, or a combination of all three. It may mean further interviews with both the patient and parents, and in any case the "follow-up" work, with reports and future guidance from the clinic personnel, still goes on.

The times in which we are now living have provided most people with a much greater degree of financial security than they have previously enjoyed, and as a result we find ourselves being confronted with cases of a more difficult type. The business executive, the family physician, the lawyer, judge, or parent run against problems which baffle them and they subsequently call on us for expert help. These are not easy cases to adjust. They have already been dealt with by intelligent people and still have not improved. The people most interested in the patient are often argumentative and hard to convince, so that the usual methods of treatment are not practical. The psychiatrist, therefore, finds that he must employ all the scientific equipment at his disposal. These cases are time-consuming, but generally pay the larger dividends, as well as opening up untried avenues to further promote the programme of mental hygiene with its many facilities—psychiatric, social, and psychological.

With the shortage of social workers throughout the Province, there have been many staff changes within the different agencies, with the result that our clinic has been feeling the lack of adequate follow-up work with the patients. When this important part of the work is being neglected we feel that a clinic of this type is not fully functioning. For that reason we expect to make a change this year and allot one of our workers full time to the clinic. We regret that this is necessary, but the number of our patients has reached such proportions that to carry on consequent work with the cases is at present beyond a part-time social worker's ability or strength. This change will not affect co-operation within the mental hygiene field as a whole —i.e., the curative or hospital, and preventive or clinical—as the chosen worker has had experience in both fields. In addition, the constant change of personnel within the different agencies has created a need for interpretation of Child Guidance work by the Supervisor, both to new workers and to the experienced ones who have changed their field of endeavour and are now employed at another agency.

Fortunately, the travelling clinic has been able to continue contact with the five outside points, although it has been difficult to maintain this service on account of staff shortage. We have not been able to widen our scope this year, but we have had an increase of inquiries for assistance through correspondence with the Provincial Field Workers who have directed many private doctors to appeal to Dr. Crease for clinical service in Vancouver. Unfortunately, these inquiries frequently come from sources which do not understand the full appointment schedule of the clinic and patients arrive quite unexpectedly at most inconvenient times. The clinical staff, however, is most co-operative and does not hesitate to give extra time to the promotion of its work.

The staff at all times has been very ready to fulfil all educational opportunities, whether by addressing various groups or assisting students in allied fields.

This report would not be complete without expressing appreciation to all our members who have helped to complete the wheel, of which this clinic is only one spoke.

Detailed statistical reports are appended.

JOSEPHINE F. KILBURN,
Supervisor, Psychiatric Social Work.

PART II.—FINANCIAL.

BURSAR'S REPORT.

ESSONDALE, B.C., November 30th, 1942.

A. L. Crease, Esq., M.D., C.M.,
General Superintendent of Mental Hospitals, Essondale, B.C.

SIR,—I have the honour to submit herewith balance-sheets, profit and loss accounts, and statistical tables, together with other statements covering financial operations of the Provincial Mental Hospitals of British Columbia for the fiscal year ended March 31st, 1942.

The year in review has been a difficult one because of the seriously disturbed conditions of the market for commodities due to the war, and the matter of delivery of goods had become more serious than the previous years. We have, however, by ordering ahead, been successful in increasing our inventories of staple goods, which will be a great help in the coming year as commodities get scarcer.

The daily average population for the year was 3,870.42 as against 3,776.08 for 1940–41, an increase of 94 patients as against an increase of 105 in 1941 and 103 in 1939–40. This decrease is attributed to the hard work of your medical assistants in the discharging of patients and has been instrumental in helping us to keep fairly well within our appropriations.

Gross operating expenses of the three institutions—namely, Essondale, New Westminster, and Saanich—including expenditures of the Psychopathic Division (outside clinics), Colony Farm, and all expenditures made by the Public Works Department in connection with the hospitals, amounted to a total of $1,480,397.97, a decrease of $18,397.60 under the previous year.

Maintenance collections totalled $238,532.90, an increase of $9,487.45 over the year of 1940–41. The gross *per capita* expense was $382.49 for the year, or $1.048 per day per patient, as compared with $396.92 for the year and $1.087 per day for the previous year, while the net *per capita* cost was $320.86 for the year or 87.91 cents per day as against $336.26 and 92.13 cents for the previous year. This reduction in *per capita* cost is due to the fact that in 1940–41 there was expended some $48,560 for new plant and equipment which was assumed as a part of our operating expenditure, while this year the only large expenditure of such a nature has been the purchase of complete new X-ray equipment at a cost of $9,936.20 to replace our obsolete and condemned machine which has served for many years.

The total net Colony Farm expenditure which has been absorbed into our operating expenses was $125,137.51 as against that of the previous year of $135,485.86, or a reduction in expenses of the farm of $10,348.35. Against this operating cost of the farm, produce of meat, pork, milk, and fruit and vegetables to the value of $181,237.26 was supplied to the institution as follows: Essondale, $154,922.17; New Westminster, $25,565.09; and Saanich, $750.

Mention was made above of the increase in our inventories of staple goods. This increase amounts to $32,553.84 and covers such lines as bedding, clothing, dishes, etc., and foodstuffs of a long-keeping nature. These goods are especially valuable to the Institution as many lines are now either unobtainable or, at best, very difficult to secure.

The Farm cannery supplies, consisting of fruits, vegetables, jams, etc., have proven of great worth to our diet and this year amount to over 300 tons of canned goods. Pork products have been of a high order but milk-supply a little short.

For detailed information regarding the above remarks and figures, please refer to profit and loss accounts and cost sheets of various departments of the three institutions and Colony Farm.

I wish to take this opportunity of thanking you, Sir, and members of the various departments of the institution for the co-operation and assistance rendered this office during the year.

All of which is respectfully submitted.

GOWAN S. MACGOWAN,
Bursar.

TABLE D.—SUMMARY STATEMENT SHOWING THE GROSS AND NET PER CAPITA COST OF PATIENTS IN THE THREE INSTITUTIONS.

Provincial Mental Hospital, New Westminster—			
Total, maintenance vouchers		$230,394.12	
Proportion, Psychopathic Division vouchers		2,386.98	
Proportion, Headquarters vouchers		3,003.35	
Proportion, Colony Farm expenditure		21,083.68	
Maintenance and repairs (Public Works Department)		21,087.51	
Inventories, March 31st, 1941		32,855.38	
		$310,811.02	
Less Essondale Clothing Account	$7,475.10		
Less Saanich Clothing Account	2,525.00		
Less inventories, March 31st, 1942	35,703.77		
		45,703.87	
Total, Provincial Mental Hospital, New Westminster			$265,107.15
Provincial Mental Hospital, Essondale—			
Total, maintenance vouchers		$883,307.58	
Proportion, Psychopathic Division vouchers		11,691.63	
Proportion, Headquarters vouchers		14,710.65	
Proportion, Colony Farm expenditure		103,303.83	
Maintenance and repairs (Public Works Department)		86,360.96	
New Westminster Clothing Account		7,475.10	
Inventories, March 31st, 1941		120,371.98	
		$1,227,221.73	
Less inventories, March 31st, 1942		146,891.93	
Total, Provincial Mental Hospital, Essondale			1,080,329.80
Mental Home, Saanich—			
Total, maintenance vouchers		$122,389.04	
Proportion, Psychopathic Division vouchers		1,125.07	
Proportion, Headquarters vouchers		1,415.59	
Colony Farm Account		750.00	
Maintenance and repairs (Public Works Department)		9,941.82	
New Westminster Clothing Account		2,525.00	
Inventories, March 31st, 1941		13,988.97	
		$152,135.49	
Less inventories, March 31st, 1942		17,174.47	
Total, Mental Home, Saanich			134,961.02
Total operating expense for the three institutions			$1,480,397.97
Less collections remitted to Treasury—			
Mental Hospital, New Westminster		$14,140.44	
Mental Hospital, Essondale		208,522.71	
Mental Home, Colquitz		15,869.75	
			238,532.90
Total net expense for the three institutions			$1,241,865.07

Total average daily population for the three institutions, 3,870.42, showing a gross *per capita* cost of $382.49 per year or $1.048 per day, or a net *per capita* cost of $320.86 per year or 87.91 cents per day.

TABLE E.—EXPENSE AND REVENUE STATEMENT OF THE NEW WESTMINSTER HOSPITAL FOR TWELVE MONTHS ENDED MARCH 31ST, 1942.

Operating Expense Accounts.

Operating expenditure by voucher—		
Salaries	$136,749.45

PART III.—COLONY FARM.

FARM SUPERINTENDENT'S REPORT.

ESSONDALE, B.C., November 27th, 1942.

A. L. Crease, Esq., M.D., C.M.,
General Superintendent of Mental Hospitals, Essondale, B.C.

SIR,—Herewith is enclosed a financial statement of the operations of Colony Farm, as prepared by the Bursar's office, for the fiscal year ended March 31st, 1942.

It is many years since we have not been able to report substantial increase in most lines and improvement in all, but this year we are very happy to be able to report that we have almost maintained production and standards at the usual level. The average of all sections is about the same, and with redoubled efforts against the cost and quality of our ever-diminishing supply of labour and the rise in commodity prices the financial standing is about equal to the past few years. We are making every effort to meet the demands of your ever-increasing population and we are hardly keeping the pace.

Owing to the greatly changed conditions, we have had to adopt new methods and practices and increase some lines and decrease others, but in general we have been able to supply you with substantially the same quantities of fruit, vegetables, canned goods, pork products, and dairy products, and not at a loss to the farm or your institutions. Our herds have been maintained in the usual state of health and breeding, but during the last few months of the year milk production per cow per day has been decreased and not because of inferior cattle or feed. The hog herd is possibly a little better than ever before and quite profitable. There has been a very marked increase in the demand for all surplus stock and much breeding stock has been sold within the Province and some exported. Possibly the last time for a few years, we are able to report that we have kept the average production per cow well over 18,000 lb. of milk and 600 lb. of butter-fat. About 75 per cent. of the 1,400 hogs butchered have graded A type for bacon. Owing to the favourable comparative prices of grain and hog products, the section has been quite profitable.

We have harvested reasonably high quality crops in all lines, with an average yield but at a higher cost. This reflected somewhat on the cost of production of dairy products.

Our buildings and equipment, with the exception of the piggery, have been kept in reasonable and workable repair and we are especially stressing this on account of almost impossible replacement.

We are endeavouring to meet as best possible our changed conditions and we plan and hope to meet your institutional requirements for the coming year.

All of which is respectfully submitted.

P. H. MOORE,
Superintendent.

BURSAR'S REPORT ON COLONY FARM.

ESSONDALE, B.C., November 30th, 1942.

A. L. Crease, Esq., M.D., C.M.,
General Superintendent of Mental Hospitals, Essondale, B.C.

SIR,—I beg to again submit herewith for your information and consideration, balance-sheets, profit and loss statements, and other departmental reports covering operations of Colony Farm for the year ended March 31st, 1942.

Profits for the year as shown on the profit and loss statement amount to $38,289.43, but if allowance is made for patient-labour, estimated at $19,000, it would leave a net profit of $19,289.43 as compared with $17,128.82 of the previous year. The gross expenditure of the farm through the Provincial Secretary's Department, together with vouchers of maintenance and repairs paid through the Public Works Department, made gross expenditure of $157,813.90 as compared with $156,074.73 last year, or an increase of $1,739.17. The gross expenditure of $157,813.90, less sales of stock and produce amounting to $32,676.39, leaves a net cost of $125,137.51, which amount has been absorbed into Provincial Mental Hospital accounts as provision costs. This sum of $32,676.39 was remitted to the Treasury.

The farm supplied the Mental Hospitals with dairy produce, meat and pork products, fruits and vegetables, horse-labour, and miscellaneous services of which the Mental Hospital, Essondale, absorbed $154,922.17 and the Mental Hospital at New Westminster, $25,565.09, according to itemized statement herewith.

Milk production for the year totalled 2,932,030 lb., slightly under that of the previous year, at a cost of $62,155.32, or an average cost of production, pasteurizing, etc., of 21.2 cents per gallon, a slight increase over last year. We showed a loss on the mature cow department of $1,911.97, but a credit in the calves department of $3,837.50, also $700.67 profit in the yearling department. The horse-labour account showed a profit of $1,405.65. This department showed horse-labour performed at a cost of 31.6 cents per horse-hour. The hog department has shown a very substantial profit of $18,013.99 and the cannery, $7,228.65. Our orchard and truck-garden this year shows a profit of $11,569.24. Reference to the attached tables will give you full details of these various departments.

All of which is respectfully submitted.

GOWAN S. MACGOWAN,
Bursar.
