Figures for total debenture debt continue to show an upward trend, but the ratio of increase to the rise in values taxable, from the standpoint of borrowing-power, is more favourable at the end of 1947 than at the end of 1946.

At the end of the year under review, reserve funds amounted to $1,839,606, being an increase over the previous year of $225,127.

Municipalities are still experiencing difficulty with works projects, due to shortages and increasing costs. It has been found, in some instances, impossible to proceed, owing to revised estimates indicating that projects could not be completed for the funds provided.

The sinking fund situation is such that only the City of Vancouver reported a shortage.

The note on Schedule VII relative to sinking fund valuations and computations remains unchanged.

No additional schedules have been inserted, nor any omitted. A change has occurred respecting school costs. Figures shown for these are the result of school receipts being deducted from disbursements. Such change was found necessary owing to the creation of large school districts. There now remain only seven municipal school districts.

Changes in Schedule V reflect the requirements of the 1947 amendments to the "Municipal Act" relevant to borrowing-powers. A three-year average of taxable assessments is now the base for computing borrowing-power, instead of the last revised assessment roll for the then current year.

Figures for the City of Vancouver, when comparable, have been shown separately, the required information either having been supplied by the Comptroller, upon request, or taken from the 1947 annual report of that city and sources noted.

The source for the Condensed Statement of Assets and Liabilities was the audited annual balance-sheet of the respective municipalities. In preparing figures for comparative purposes from the returns submitted by the municipalities, it was found necessary to make various adjustments.

During the year The Corporation of the District of North Vancouver completed the issuance of refunding debentures in an amount of $1,285,981.20, for which authority, based upon consent in writing of the owners of a majority in value of its outstand-

ing debentures, had been obtained through the passing of the "District of North Vancouver Debt Refunding Act" at the 1947 Session of the Legislature.

Only two municipalities, the City of Merritt and the District of North Vancouver, continue to be administered by a Commissioner.

Two communities, in the year 1947, were incorporated as villages—those of Campbell River and Fort St. John.

By Order in Council, passed in the month of August, 1947, those activities of the former Bureau of Reconstruction allied to municipal affairs were, along with personnel, transferred to the Department of Municipal Affairs. Thus there came into being the Regional Planning Division of this Department, with the former Supervisor, A. G. Graham, P.Eng., M.E.I.C., in charge as Director.

The policy of holding an annual conference of municipal officials will be continued, as such gatherings have proved beneficial to all concerned and of particular value to the participants.

For the maintaining of the steady, general improvement in the municipal financial situation in this Province the Councils and officials responsible are deserving of commendation.

This Department has continued to receive the support and co-operation of the various Councils, Commissioners, and staffs.

B. C. BRACEWELL,
Deputy Minister.

NOTE.—Some municipalities have written up to par the value of their own debentures, purchased for the sinking funds, while other municipalities carry corresponding purchases at cost. This makes it impossible to compare the condition of the funds accurately.

Showing, at the end of the year, the difference between par and cost of the above-referred-to purchases creates an excess in the sinking fund account. This difference should be spread over the unexpired term of the purchased debenture.

Sinking fund computations are not always reflected with exactness. In many cases the requirements are calculated only up to the time of the last tax levy, several months before the end of the year, and allowance is not always made for the accrued interest.
