Legislative Library Jan 17

THE CRESTON REVIEW

VOL. VIII. CRESTON, B. C., FRIDAY, JULY 7, 1916 No. 25

Canyon City

Mr. and Mrs. C. Blair left on Monday on a trip to Nelson.

J. J. Fingland, Kaslo constituency road boss, was through here last week.

Building permits for this week include a new hay shed for J. D. Crawford.

The old Goat River bridge has been repaired and is now available to all traffic.

Mr. Leclare, the new bush foreman here, spent Dominion Day at his home in Cranbrook.

Father Kennedy of Cranbrork was calling on his parishioners here and at Port Hill on Friday and Saturday.

Mr. Witherhead sr., of Calgary, Alta., who arrived here some days ago, will remain and look after his son's ranch.

Hygun & Vanackeran are the heaviest strawberry shippers here. Their best showing was 35 crates one day this week.

About the nearest-to-human image that has been erected here for the purpose of scaring robins away, now stands in Harry White's strawberry patch.

Bobie Smith, who has held the position of fireman at the saw mill here the past six years, left for Nelson, Sunday, where, we hear, he will apply for papers for third class engineer.

Miss G. Knott, who has been teaching the Glenlilly school for the past year, is home for the holidays. Mrs. Knott, who spent Dominion Day at the same point, with her daughter, is expected back to-day.

Mr. Witherhead left on Sunday for McGillivery, to resume his work as bush foreman for the McGillivery Lumber Co. John McRobb expects to take a position as blacksmith at the same place under Mr. Witherhead.

J. W. Wood, who has the contract of sawing the logs at the Deschamps mill at Nelson, spent a few days last week-end with his family here. The mill at Nelson was shut down owing to the high water, which was 21 feet above low water mark.

Notices calling the annual school meeting are now posted, for 10 a.m. Saturday. Attendance is likely to be small owing to the hour of meeting. In former years a postponement has usually been made to some evening the following week in order to draw a larger attendance of the ratepayers.

John Carfra, sr., of Trail, was a visitor at Creston last week, but the short time at his disposal for the trip made a visit to Canyon City, where he lived for three years, impossible. His son, John, who was wounded in the hand by shrapnel in the fighting in France, is still in the hospital but getting along well.

Cedar Valley ranch, the home of Mr. and Mrs. C. Hall, will this year do its bit towards maintaining the reputation of Creston Valley strawberries. They have a splendid showing of fruit that for uniformly good size, color, and flavor cannot be excelled by any of the strawberry kings, or anyone else, in these parts. (And we know wherof we speak—we've sampled the goods.—Ed.)

Death of Mr. Gilpin

Another of Creston's quite old-time citizens was removed by death this week, in the person of Thomas Woods Gilpin, who departed this life at an early hour Wednesday morning, aged 63 years. Deceased had been troubled with ulcerated stomach for almost a score of years back, though it had been only during the last eighteen months that he suffered more or less acutely, and then only at intervals, being up and about on his ranch a part of the time till two weeks ago. Deceased was a native of Ontario, though resident in B.C. for some years before coming here from Jaffray in 1907. The funeral took place yesterday to Creston cemetery, the burial service being conducted by Rev. J. S. Mahood, rector of Christ Church, with a large number in attendance at the last sad rites. He is survived by a widow and two daughters, Mrs. (Dr.) Winkler, Sandpoint, Idaho, and Miss Olive, at home. Although of a very retiring disposition he was a man of sterling character and in his unassuming way won the highest regard of all with whom he came in contact. Although his demise was not unexpected his passing is mourned by a wide circle of friends who extend to Mrs. Gilpin and family the truest sympathy in their great bereavement.

Kitchener

H. Rymell was a Yahk caller this week.

R. J. Long, Erickson, the Conservative nominee for this riding was a visitor here one day last week.

Mrs. G. A. Hunt and Miss Hamilton were Creston callers on Friday last.

J. J. Fingland, Kaslo, provincial road superintendent, gave this section an official call last Saturday.

Messrs. Dubie and Matthewson spent the week-end in Creston.

E. Beckman of Yahk spent the week-end with friends here.

On Sunday last the meadows were alive with the disciples of Isaak Walton. Every available craft was in use, and a motley crowd left on shore.

NEWS OF KOOTENAYS

24 pupils wrote on the Entrance examinations at Trail last week.

Excavation work on Nelson's new hospital commenced last week.

John Schmidt, a Rossland resident, is exhibiting some five-foot rhubarb stalks.

Trail council has given the city band $100 to buy some new instruments.

Principal Martin of Selkirk school, Revelstoke, has enlisted for overseas service.

All the Cranbrook hotels have renewed their licenses for another six months.

The News is urging Trail council to purchase and operate a street sprinkling cart.

The last three principals at Grand Forks high school have enlisted for overseas service.

81 members of the Nelson Presbyterian church have already enlisted for overseas service.

During the berry season there will be two market days at Nelson—Tuesdays and Saturday.

Kaslo's first-of-the- season strawberries, which appeared last week, retailed at $4.80 a crate.

At Kaslo 14 of the 15 candidates writing on the high school preliminary examinations were successful.

Fernie figures that the 225th Battalion recruits were worth $28,000 to the town for the month May.

The defunct Prospector newspaper plant at Cranbrook was last week sold for $250 at a sheriff's sale for rent.

Kaslo council will spend $3000 on improvements to the dam to provide more power for the city electric light plant

Trail smelter employees have been given a raise in pay of 40 cents a day—effective while copper is quoted at 28 cents a pound.

Ledge: Since Jim Wardner packed out the first ore in 1892 the Slocan has produced $30,000,000 worth of lead silver and zinc.

June, the month of brides, failed to live up to local expectations, there only being two weddings during the month in Kaslo.

Ledge: This week 43 carloads of coke will arrive in Greenwood. This will enable the smelter to blow in the furnace that has been idle for ten days owing to lack of coke.

A PAPER FAMINE

THE REVIEW appears this week in very abbreviated form—both as to size and reading matter. Our bundle of ready prints is hung up somewhere between Regina and Creston, and as our stock of ordinary white news is also a minus quantity two pages is the very best we can do this issue, for which we crave our readers' indulgence—for this once.

School Scholars Earn Promotion

DIVISION I.—High School—R. B. Masterton, Principal.

Number actually attending, 22.

Number daily present, 20.

Perfect attendance—Lionel Forrester, Harold Gobbett, Vida L. Gobbett, Harold Goodwin, Erma Hayden, Muriel Hobden, Mabel J. Huscroft, Jennie M. Nichols, Mary Parker, Bertha Pease, Margaret Webster, Lyda A. Johnson, Zalla M. Johnson, Trennie Long, Marion Tattersall.

Pupils winning Rolls of Honor: Deportment, Harold Gobbett.

Regularity and Punctuality, Margaret J. Webster.

Proficiency, Lyda A. Johnson.

The following pupils successfully passed the written examination for Preliminary Junior High School (names in order of standing):

Mabel J. Huscroft
Lyda A. Johnson,
Margaret J. Webster.
Jessie Cameron.
Vida L. Gobbett.
Erma Hayden,
Edna S. Holmes.
Bertha A. Pease.

These will receive certificates and also particulars of their marks from the Secretary to School Board.

DIVISION II.—W. de Macedo, Vice-Principal.

Number enrolled, 28.

Average actual daily attendance, 21.05.

Percentage of enrollment in attendance 75.18.

Junior 4th—Katherine Moore 80, Audrey Attridge 76, Clark Moore 75, Orin Hayden 73, Rose Cherrington 60.

Senior 3rd—Almeda Attridge 72, Ruth Compton 71, Vera Parker 70, Francis Pow 66. Arthur Gobbett 64.

Junior 3rd—Teresa Maione 51, Louise Bevan 47, Annie Maione 41, Ruth Lidgate 36, Joe Romano 33.

Promotions—To Entrance: Katherine Moore, Audrey Attridge, Clark Moore, Orin Hayden, Rose Cherrington, Myrtle Smith, Hazel Hobden, Dorothy Carpenter.

To Junior 4th—Almeda Attridge, Rute Compton, Arthur Gobbett, Lionel Moore, Vera Parker.

Perfect attendance—Audrey Attridge, Rose Cherrington, Agnes Hobden, Hazel Hobden, Annie Maione, Teresa Maione, Eunice Moore, Vera Parker, Kate Moore, Ruth Lidgate.

Roll of Honor: Proficiency, Clark Moore.

Attendance and Punctuality, Eunice Moore.

Good Behaviour and Deportment, Almeda Attridge.

DIVISION III.—Miss B. Hurry, Teacher.

Number of pupils attending, 29.

Average daily attendance, 27.

Perfect attendance—Alta Attridge, Harry Compton, Robert Hetherington, Robert Moore, Eva Holmes, Charlie Holmes, Elson Lidgate, Frank Maione, Frank Parker, Harry Pollitt, Cyrus Pow, Merle Reid, Beatrice Scott, Amey Walmsley, Donald Spiers, Irene Watcher, Eva Webster, Gladys Webster, Mildred Passmore, Edwin Staples.

Promotions (names given in order of merit).—From Second Primer to Junior First Reader: Amey Walmsley, Evelyn Bevan, Beatrice Scott, Elson Lidgate, Julius Moran, Charles Holmes, Freddy Payne Clara Little, Donald Spiers, Frank Parker.

From Junior First Reader to Senior First Reader: Louise Romano, Cyrus Pow, Frank Maione.

From Senior First Reader to Junior Second Reader: Robert Hetherington, Robert Moore, Merle Reid, Gladys Webster.

Senior Second Reader to Junior Third Reader: Harry Compton, Harry Pollitt, Marguerite Crawford, Alta Attridge, Eva Holmes, Eva Webster, Robert Crawford, Mildred Passmore Orazeo Celli.

Pupils winning Rolls of Honour: Proficiency, Harry Compton.

Deportment, Julius Moran.

Regularity and Punctuality, Robert Moore.

Wynndel

T. and E. S. Butterfield were visitors to Creston on Monday. Miss F. Bathie was at the metropolis on Tuesday

T. H. Kay of the Herald, Cranbrook, accompanied by Mr. and Mrs. C. F. Hayes of Creston, were Sunday visitors at Wynndel. Also Dave Dow of Creston and George Hood and Earl Pease of Alice Siding, were among the Sabbath callers here.

Miss Alice Carr of Alice Siding spent Wednesday at Wynndel, getting a little inside information as to our methods in preparing our strawberries for the export trade.

All previous shipping records for strawberries was broken on Tuesday when 568 crates of the big red berries were shipped east. Our previous high mark was 553.

The annual meeting of the Wynndel school district is called for Saturday, at 10 a.m., in the schoolhouse.

A big dance is announced for Saturday night in the schoolhouse. All the visitors at present staying here are invited. Ice cream and soft drinks will be on sale throughout the evening.

To date 2,093 crates of strawberries have been shipped from Wynndel this season. These figgures do not include the carload shipped on Thursday.

The 54th Kootenay Battalion left Bramshott camp for the fighting in France on June 19th, according to letters received by his parents from Pte. John Butterfield, who is with that corps.

AS OTHERS SPEAK OF US

Almost a Pioneer

Archie McL Fletcher, who was one of ye old time residents of Kaslo, was in town the latter part of last week in connection with his official duties as fruit inspector. Archie has not changed much in appearance since the days when he was head of the local fire department and one of the leading citizens of the town, except perhaps that he has grown a wee bit stouter. His house at Crow's Nest was destroyed by fire last February, and Mrs. Fletcher is now residing in Nelson, in which city his daughter Del is just completing her course of training as a nurse. His son Joe, who will be remembered as a curly headed kiddo in Kaslo boulevards in the early days, is now a mail clerk on the Crow line running into Calgary. Mr. Fletcher reports the local fruit crop outlook as decidedly good.—Kaslo Kootenaian.

Grand Forks now charges the dairymen a license fee of $1 per cow.

The Kootenay Central branch of the C.P.R. which the recent floods put out of business, will be re-opened for traffic by the middle of the month.

Kaslo trustees have given the assistant teacher at the high school a $5 a month raise in salary. They expect the teaching staff for next term will be exactly the same as the year just closed.

Ledge: Fernie has suffered from high water. This city of calamity has suffered from nearly everything, and its citizens have the sympathy of the world. There must be a few good people in Fernie, or it would have been destroyed before this time. Through the war of elements and its inhabitants, is has a closer resemblance to Dante's Inferno than any other town in Canada.

Erickson

Hay cutting has now fairly well started and by the end of the week a large percentage of the clover will be down. Some of it cut before the rain has suffered materially. Still with a week or ten days of fine weather a bumper crop is assured.

Henry Hrmilton started for his post on Goat Mountain lookout station on Saturday. The new building has been officially named Hendren Observatory.

C. O. Rodgers has a fine field of clover growing on his place next the Boffey ranch, most of which stands almost four feet high.

Mrs. Truscott returned the early part of the week from a few days visit with friends at Glenlilly.

Pte. John Harrison of the 225th Battalion, Nelson, was a week-end visitor at the H. Hamilton home.

Mr. Fraser again carries off the early cabbage honors for the Creston Valley. On Wednesday he shipped several crates to Nelson and Calgary. They were the Copenhagen Market variety, and most of the heads were over six pounders. We hear the price is 3 cents a pound net at Erickson.

Bob Long is making a clean sweep of the weeds in his orchard—a sort of preliminary workout for a similar performance on provincial election day which is fixed for Sept. 14th.

Stocks & Jackson commenced the thinning-out process on Mountain View ranch apple trees this week. Although the June drop was quite heavy they still find it necessary to remove much of the young fruit.

In these parts about the best showing of cherries is to be seen on the Boffey ranch. The yield of pears on this place will also be large from present appearance.

M. R. Palmer is again to the fore with early rye cutting. He harvested a few acres of it last Friday, most of it running close to six feet high. Mrs. Thurston has a field of fall wheat all headed out. Surely this is the grain belt as well as the apple area.

W. C. Adlard and wife, who spent the week-end at Nelson, returned on Monday. Considering he has a sore hand, and comes from Cranbrook, W. C. is making quite a name for himself in the strawberry patch, to which job he was conscripted so heavy in the 1916 yield.

Tomatoes are making quite satisfactory progrees, weather conditions considered. Many plants are out in blossoms, but so far have not set fruit. For early corn something extra choice is coming along fine on the Teddy Haskins place.

About forty crates daily is the average shipment of strawberries from Erickson at present. Dave Scott is in charge of the express business here for the Union.

Monday's casualty list shows the name of E. H. Kemp as missing. Residents here will remember him very well—a brother of W. H. Kemp He enlisted in Vancouver with the 48th Battalion which went overseas in June 1915.

Bishop Doull Here

His lordship Bishop Doull of the Diocese of Kootenay paid Creston an official visit on Tuesday when he held a confirmation service in Christ Church in the evening, administering the apostolic rite to two candidates, Misses Dorothy Stark and Phyllis Lyne. After the service a very informal reception was held in the Parish Hall at which an opportunity was given all to meet his lordship. A short musical programme and refreshments were features of this affair. The bishop was also the guest of the vestrymen at a lunch at the King George that day, which was followed by a motor trip both to the Canyon and Wynndel. Needless to say the bishop was delighted with these unexpected tokens of hospitality, as well as the large turnout at the confirmation service. He left the following day for Cranbrook.

A Deadly Peril Ignored

The indifference of people to the dangers which threaten them is in no way better shown than in the toleration with which the common house fly is endured. In view of the startling facts which have been proven by scientific investigation, it is important that everyone should take a hand in exterminating that dangerous insect.

The germs of typhoid fever, tuberculosis, infantile enteritis, cholera and infantile paralysis are carried from place to place by the house fly. It can carry a million or more germs on its feet. It breeds in filth, lives on filth and carries on its sticky legs and feet and mouth the germs from the filthiest places to our clean houses and clean food.

The female breeds over 500 million offspring in a season, and out of that number 8 million live to carry on the deadly work. 10 million dollars are spent every year in screens, and with a much less expenditure of money and energy the dangerous fly could be destroyed and the spread of so many diseases prevented.

It is a fact vouched for by authorities that more soldiers were killed during the Spanish-American war by flies than by Spanish bullets.

Relieves Asthma at Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

Mrs. Gramercy—When I married you I thought you'd sown your wild oats.

Gramercy—With all your money, my dear, it would have been a shame not to start another crop.

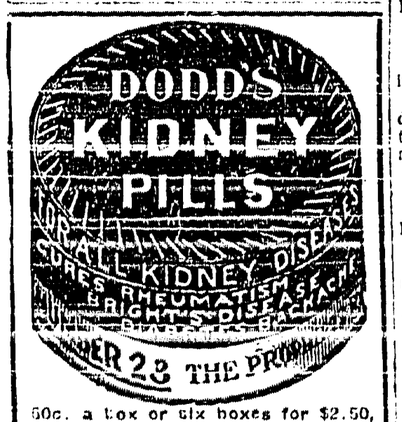
Let 'Em Go

First Trooper Imperial Yeomanry (discussing a new officer)—Swears a bit, don't 'e, sometimes?

Second Trooper—E's a masterpiece 'e is, just opens 'is mouth and lets it say wot it likes.

Grocer—Wouldn't you like some horseradish?

Mrs. Newlywed—Mercy no! We don't keep a horse!



50c. a box or six boxes for $2.50, at all dealers, or The Dodds Medicine Company, Limited, Toronto, Canada.

SNAKES OF LOUISIANA

Scientists Declare Them Harmless, Though to Negroes They are a Terror

Louisiana, and Avery's Island in particular, produces the largest water snakes found on the American continent, and is the home of the noted horn snake, the dread of the plantation darky and the theme of his most wonderful tales.

As a result of the 'find' by scientists, the New York Zoological Gardens have sent to E. A. McIlhenny for a number of the water snakes for exhibition in their snake department, and Mr. McIlhenny is going to send them, a slagniappe, a good sample of the horn snake, which he caught while projecting around for the water snakes.

Just why the water snakes should grow to the immense size that they do in this particular locality is a mystery, and grow they do, as specimens four feet and over in length and from three to four inches in diameter have been captured for the New York Zoo. They are non-venomous and subsist mostly on fish and the young birds which have fallen out of nests and into or near the water. Great sluggish things they appear while lying asleep in the sun on the mud banks near the water's edge, but let them get into the water and after the minnows and small fish which comprise their food and their sluggishness disappears immediately and their speed and agility are wonderful.

The horn snake has for years been the subject of legends galore among the members of the negro race, especially in the south, and by these people it is invested with an amount of wonderful and terrible qualities that make it feared above all other varieties. Imagination is necessary to furnish even the slightest foundation for many of these stories.

Growing to immense size, according to the folk lore, the horn snake carries destruction to man, beast or vegetation that it strikes with the horn it carries at the end of its tail, and according to the negroes will sometimes kill even grown trees when it becomes angered by stinging them. The tree stung is said to wither and die immediately after the deadly weapon has entered its bark.

It is presumed also that the horn snake has had a great deal to do with the fantastic tales of the hoop snake of the darkies, which is said to take its tail in its mouth and roll downhill or along the ground toward the object of its attack, and upon reaching it to unwind suddenly and strike with the sting at the end of its tail.

In reality the horn snake is a very ordinary looking reptile, the average being from 2 to 2 1-2 feet in length, of a dark brown or bronze color on the back, and with the underside striped with red, like that of the red-banded water snake. The head is rounded and lacks entirely the arrowhead shape possessed by nearly all of the venomous snakes. The body is rather slender, and its tail terminates in a sharply pointed sting or horn of dark color and very hard. It is this horn which has given rise to all of the stories concerning the species.

That the horn snake is harmless like the water snakes was proved by Mr. McIlhenny, who reached into the tank in which the horn snake and perhaps a dozen of the big water snakes were confined and lifted them out unceremoniously. Little care was taken to prevent a bite, though the big wriggling fellows twisted in his hands while several negroes standing nearby gave signs of readiness for instant flight should the terrible horner get away.

Minard's Liniment Cures Garget in Cows

At a railway station in a small town a solitary traveller was waiting for the day's only train. Train time came and went, but no train. He went over to the station master, an old darky: Say, when does today's train get here, anyway?

Oh, dat train won't be in for a long time yet.

In a few minutes, however, a train was seen crawling toward the station. There comes the train! exclaimed the traveller, exultantly, to the darkey. Seems to me you don't know your business, if I'm not mistaken.

Say, mister, replied the darky, I reckon you's a perfect stranger around here. Dat's yesterday's train, dat is. Today's train won't be in till to-morrow.

The Lawyer Scores

Lawyer—I say, doctor, why are you always running us lawyers down.

Doctor (drily)—Well, your profession doesn't make angels of men, does it?

Lawyer—Why, no; you certainly have the advantage of us there.

Frank E. Karelsen, former school inspector, tells this incident of a visit to a friend in a western city: I met on the street one day the little daughter of an acquaintance. I knew she was supposed to be in school and asked why she was not.

Oh, she said, they sent us home because our teacher is sick.

Hasn't she a substitute? I asked.

No, sir, she said very naively; she has a sick headache.

Worth Keeping, Anyhow

You have some remarkable paintings.

Yes, replied Mrs. Cumrox. The art dealer said they were old masters, but to my eye some of them look as good as new.

Hood's Bit of Fun

An English beer vendor wrote over his shop door:

Bear sold here.

Tom Hood who saw it, said it was spelled right.

The fluid the man sells, Hood explained, is his own brain.

What makes you think he is a foreign nobleman?

I overheard him say he owed everything to his wife.

Not Half Enough

Kitty—They say, you know, that love makes the world go round.

Marie—Maybe; but it cannot make the eligible young men go round.

The Wretchedness of Constipation

Can quickly be overcome by
CARTER'S LITTLE LIVER PILLS

Purely vegetable—act surely and gently on the liver. Cure Biliousness, Headache, Dizziness, and Indigestion. They do their duty.

Small Pill, Small Dose, Small Price.

Genuine must bear Signature
Brent Good

THE 'REDBEARDS'

Brigandage in Northern Manchuria

Commercial conditions in North Manchuria during the year 1912, have been far from satisfactory, says Mr. Mr. A. E. Bastes, the British Acting Consul at Harbin, in his report for 1912. Even at this great distance from the centres of the Chinese revolution which broke out in the autumn of 1911, he says, its effects have been manifested in lessening the already sufficiently vague and shadowy authority exercised by Chinese officialdom over the population.

A direct incentive was thus given to lawless acts of brigandage, and large numbers swelled the ranks of the redoubtable Hunghutzu or red beards who infested the countryside and made a prosperous livelihood by means of rapine and the holding for ransom of persons and property. Such terror did these men exercise that carriers refused to face the risk of the road unless very highly paid, and the prices commanded for the hire of their services and vehicles rose to one hundred and fifty per cent. in excess of the nominal figure.

The natural result was that far smaller quantities of cereals were obtainable than had been anticipated, and the local prices rose to an almost prohibitive scale—from $15 to $20 per ton; failures were not infrequent, and the more substantial merchants were in many cases only able to load the vessels chartered to fulfil their forward contracts at a serious loss. Instead of the anticipated large increase in the exports of soya beans during the year 1912, for the haulage of which the Chinese Eastern Railway had made elaborate preparations, the value of exports of this commodity was actually only some 77 per cent. of the figures reached in 1911.

Prior to the end of 1912 the Chinese took no steps to cope with the state of affairs; it is, however, satisfactory to be able to report that at the time of writing (April, 1913) efficient military measures of repression have been carried out, and in the chief producing centres within 100 miles radius of Harbin order and safety to life and property have been restored.

Maxims for the Married

Never both be angry at the same time.

Never taunt with past error.

Never allow a request to be repeated.

Never meet without a loving welcome.

Let self-denial be the daily practice of each.

Neglect everyone else, even the whole world, rather than each other.

Never let the sun go down upon thy grievance.

Never speak loudly to each other, unless the house is on fire.

Never make a remark at the other's expense—it is a meanness.

Never fuss over what might have been, but make the most of what is.

Never part for the day without a loving or gentle word to think of during absence.

Never mind fault unless it is perfectly certain a fault has been committed, and always speak lovingly.

How Disappointing

Captain Vivian Locket, at the dinner to the defeated English polo team last month, said in answer to a toast:

But after all, there's always something shameful and ridiculous about defeat. Gloss it over as we will, defeat is always absurd.

Defeat reminds me of the foreigner who said to the American girl:

Ah, dear young lady, dere iss only vun vort in de English languitch to describe your beauty.

Yes, yes, said the girl, with an expectant and encouraging smile.

And unfortunately, the foreigner concluded, I haf forgotten vat de vort iss.

Women and Public Welfare

When one sees the things actually done by American women for the public welfare, and the good things done by statesmen under inspiration of women, it is easy to see that the nation is greatly enriched by such co-operation in the people's business. It is not only in contrast with the record of half a million of property destroyed by suffragettes in the last six months in England, but it is highly admirable in itself, and forms one of the strongest arguments on the affirmative of the question of political equality for women.—Buffalo News.

Why Not Vivisect Him?

Is the young man all right who is going to marry your daughter?

I have every reason to believe so. He has been audited by the audit company, assayed by the local chemist, tested by the state bacteriologist, certified by the genealogist and appraised by the medical and surgical staff of the county hospital.

I removed the basket from an old baby buggy and nailed several boards or slats across the frame, writes a contributor to Good Housekeeping. On wash days I put my clothes basket on the buggy and wheel it along as I hang up the clothes or take them down. I can hang up clothes in about half the time it used to take me, and do not have to bend over the basket.

Casting Shadows Before

South Sea Islanders, in Captain Cook's day, believed that when they fed on an enemy his courage found its way into their hearts. We may smile at a notion so crude. Two hundred years ago, and more, South American Indians began relieving the pangs of indigestion by eating the stomachs of ostriches. We may imagine them removing from those organs any residum of nails, or doorknobs, which might remain there. For a long time this rude remedy was laughed at by Spaniards and Englishmen. Today, throughout the world, pepsin takes its place among the trustworthy resources of pharmacy and this pepsin is prepared from the stomachs, not of ostriches, but of swine—bravely competitive with ostriches in feats of digestion.

Nutrition, which follows upon digestion, seems to depend upon the thyroid gland, conspicuous in the human throat as Adam's apple. When one of the lower animals suffers the removal of its thyroid gland, nutrition is at once seriously disturbed. If the poor brute under experiment has pieces of fresh gland grafted beneath its skin, the derangement of nutrition is forthwith checked. An extract from such a gland serves just as well. A singular fact is that thyroid glands in healthy and mature animals contain more iodine than does any other tissue; and the activity of a gland as a remedy is in proportion to the iodine it contains. Why, nobody knows as yet. But knowledge, though incomplete, may have great value as far as it goes. In some parts of Europe, especially in Switzerland and Northern Italy, the deformity known as cretinism, afflicts wide districts. This and allied diseases of imperfect nutrition are accompanied by thyroid glands either withered or undeveloped. In such cases welcome relief follows upon the administration of thyroid extract; its particles seem to fly to the places where they find similar particles, much as iron filings speed to the magnet swayed above them.

Other glands, in elaborate tests, are proving to be equally helpful to physicians. Take, for example, those borne immediately above the kidney. They yield a preparation called adrenalin. This powerfully closes the smaller blood-vessels, so that it arrests bleeding, which unchecked, might threaten death. Its uses are golden in many severe surgical operations. Thus from a quarter unimagined twenty years ago disease confronts a new foe, and health finds a faithful defender.

Minard's Liniment Cures Distemper

How Rockefeller Got His Start

When I was ten years old I had succeeded in earning some money. It was $50. I loaned it to a neighbor at 7 per cent. interest. In a year the money earned me $3.50. From that time onward I determined to make money work for me.

So writes John Davison Rockefeller who began to make a living almost as soon as he could work. At 10 he was earning 37 cents a day hoeing a neighbor's potato fields. In 1853, when he was 14, he left his Tioga County, N.Y., birthplace for Cleveland. There he got a job as office boy. Later he became a clerk; then cashier and bookkeeper for a mercantile house. He and two friends managed to borrow enough money to take hold of a petroleum refinery. Rockfeller saw wonderful possibilities in oil and he reached out for one refinery after another, until in 1861 he was able to organize the Standard Oil Co. Six years later the Standard Oil Trust was formed and Rockefeller was on the way to fabulous fortune. He had a genius for borrowing. Indeed, his start was made on borrowed capital plus genius. He is said to have been worth less than $1,000 in his own right when he was 30. But the borrowed money worked for him until there was no further need to borrow.

Cheap Talk

That Mrs. Naybor dropped in this afternoon and got off a lot of cheap talk.

Cheap talk?

Yes, she used our telephone for a full half-hour.

ARROW AND NITRO CLUB SHOTSHELLS
Made in Canada

WHAT do you pay for in shotshells? Why, plainly for shooting quality which means accurate loads, uniformity, sure fire, care and experience in the making.

Then specify Remington-UMC—Canadian made, from our new factory at Windsor, Ontario. Arrow or Nitro Club smokeless loads. Slightly higher in cost—more reliable in the field.

We will be glad to send a booklet explaining simply many technical points of ammunition manufacture. Your name and address on a post-card brings it by return mail

Told Them How

A jolly group of travelling men had just got comfortably settled in the hotel lobby when another knight of the grip arrived.

Mighty glad to see you fellows, he exclaimed enthusiastically, shaking hands all round.

Sorry we can't say as much for you, was handed him by one of the group.

Oh, you could, all right, if you'd lie like I do, replied the newcomer.

Bobbie was in the habit of running errands for an old gentleman next door who never paid him except in effusive thanks. He had just returned from the third errand one morning and the old gentleman, patting him on the head, said:

Bobbie, I am very much obliged to you. You're a fine little fellow. Thank you, my boy, thank you.

Bobbie looked up in his face wistfully and apologetically replied:

Mr. Jones, you don't know how I wish I could thank you for something.

Made His Getaway

She—I wonder why they hung that picture?

He—Perhaps they couldn't catch the artist.

Panama's Largest Ship

The General Board of the United States Navy has calculated that the largest ship that could be built for transit through the Panama Canal would cost $20,000,000 and would be of these dimensions: length 750 feet, beam 100 feet, draught 28 feet 6 inches, displacement 38,000 tons, speed 23 knots. The largest battleship in the U.S. navy at present is 554 feet long, with a tonnage of 26,000.

Hope for the Chronic Dyspeptic.—Through lack of consideration of the body's needs many persons show disorders of the digestive apparatus to endure until they become chronic, filling days and nights with suffering. To these a course of Parmelee's Vegetable Pills is recommended as sure and speedy way to regain health. These pills are so specially compounded to combat dyspepsia and the many ills that follow in its train, and they are successful always.

A woman never admits that she was wrong.

I don't know about that, replied Mr. Meekton. A number of them seem anxious to prove that they showed pretty poor judgment in selecting husbands.

CANADA CEMENT COMPANY LIMITED
PORTLAND CANADA CEMENT MONTREAL

This label, on every bag, identifies Canada Portland Cement.

MAKE certain of complete success in your concrete work by always using
CANADA Portland CEMENT

We are supplying Canadian farmers with the highest quality of Portland Cement it is possible for human skill to make.
We have reduced the price of Canada Portland Cement until it is within your reach for practically every purpose. It is the only building material that is not increasing in cost.

Be sure to ask for *Canada* Cement, in bags.

Already Discounted

Matrimonial Agent—Just one thing more; how old are you?

Miss Singler—Twenty-seven years.

Agent—Oh, well, you can easily say you are five years younger.

Miss Singler—Oh, I've done that already.

Gentility

Just think of it, Mrs. Brown has got the telephone fixed. I wouldn't have one.

Why not?

You have to associate with everybody.

Happy Speech

A birthday gift was given to a wife by her husband and three children. The youngest, a little ten-year-old, was appointed to make the speech of presentation. She did it after much preparation for the occasion, and this was the form it took:

Dear mamma, this gift is presented to you by your three children and one husband.

CURED ECZEMA LIKE MAGIC

Suffered for Years—Tried all Kinds of Treatment—Surprised at Results From Dr. Chase's Ointment.

You can soon tell when people are enthusiastic about medical treatment by the language they use. After experimenting with all sorts of ointments in a vain effort to obtain relief and cure, the writer of this letter was astonished at the quick and satisfactory results obtained by the use of Dr. Chase's Ointment.

"It worked like magic," she writes. Indeed, it is surprising the healing that is often effected in a single night by this great ointment. The stinging and itching are relieved at once, and cure is only a matter of time and patient treatment.

Mrs. Clements, 12 Strange street, Toronto, Ont., writes: "I have suffered from eczema for years, and after using all kinds of ointments, at last tried Dr. Chase's Ointment. It worked like magic and proved a Godsend to me. I would advise anyone suffering from eczema to try one box and be convinced." 60 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

Mrs. Richquick—John, I want you to buy a new parlor suit.

Mr. Richquick—Maria, I have been agreeable enough so far to get different clothes for morning, noon and night, but I am consarned if I will change them every time I go into a different room.

She—There seems to be a strange affinity between a colored man and a chicken. I wonder why?

He—Naturally enough. One is descended from Ham and the other from eggs.

Young Poet—Ah! Do you know, darling, I can see myself on the pinnacle of fame!

Grace—Oh, George, don't let me wake you up.

An Oil That is Famous.— Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

Better Still

Her Father—Have you a family tree?

Her Lover—No; but I have 10,000 acres of pine timber in Wisconsin.

Her Father—Great! Have a drink, a good cigar and the girl!

Another Evil

Willis—I see a fellow in New York took out $250,000 insurance on $200 worth of goods.

Gillis—That's nothing. I know a lot of fellows who carry $25,000 life insurance on a 30 cent life.

The Gypsy and his Way of Living

Real Romanies or Gypsies, are very scarce in this country and most of the people who travel and pose as gypsies here are either tramps or hybrids, the result of intermarriage of the real gypsy with other races. Gypsies are very numerous in England, but it is necessary to have a guide if the visitors would like to see them in their favorite haunts. Of late years, law, order and sanitary conditions have driven the Romanies into secluded nooks and forest lingles. In such places can be seen the oval roofed caravan, quite unlike the palatial conveyance of would-be imitators or show people. Here also can be found the tents, which reminds one of that vast throng of people, the Israelites, who lived the gipsy life and were tent dwellers. In the camp the elder gypsies can be heard speaking in a strange tongue, for the real gypsy speaks the Romany language, and the parent's hearts are sad today because their offspring prefer speaking in English. Round the 'Zog' or fire over which hangs a blackened pot, which generally contains a stew of rabbits and vegetables culled from the neighboring fields, the 'chavvies' or children anxiously wait, while a dog of the greyhound specie also waits expectedly to be rewarded for bringing his contribution to the family larder. On the bushes hangs the family washing, while browsing on the coarse grass so familiar to English common land, a few horses and donkeys may be seen. All these things make an interesting picture of primitive life. Some people have rather peculiar ideas concerning gypsies. First of all let me say that all gypsies are not dark. As I visit the various camps during mission work I find hundreds of fair gypsies. Originally the gypsies were an eastern people but like other people they have turned their feet westward and climate with other causes may have altered them considerably. My father was a thorough gypsy, but quite fair. In the old days intermarriages with 'Gorgois house dwellers, meant expulsion for the offender from the tribe.

The Romany girl is betrothed at the age of fourteen, but at least two years must elapse ere marriage shall take place. This is not a time of courtship, the betrothed must treat each other as ordinary acquaintances or the match is broken off. The marriage would usually take place in a secluded forest glen. A long hazel branch is brought, the pair step over the branch, and are then acclaimed 'rawny' and 'rye,' which means man and wife. Superstition lies deep in the heart of the gypsies, and by the stars they forecast many happenings. When the head of the tribe dies the caravan, clothes, etc, are burned and the ashes scattered over the grave.

Minard's Liniment Co., Limited.

Dear Sirs,—This fall I got thrown on a fence and hurt my chest very bad, so I could not work and it hurt me to breathe. I tried all kinds of Liniments and they did me no good.

One bottle of MINARD'S LINIMENT, warmed on flannels and applied on my breast, cured me completely.

C. H. COSSABOOM.

Rossway, Digby Co., N.S.

Muffled Knocks

Bobby, you mustn't put your sticky fingers on Mrs. Kawler's nice dress; it's the only silk dress she has.

No, Mr. Smyler, I haven't the slightest objection to your smoking in my house; let me offer you a good cigar.

Old Scout, you always pitch a good game of ball—except when I am betting on you.

You live in Outsomehurst, do you, Mr. Blubbins? Has that suburb a respectable residence section?

You show good literary judgment, Mr. Lee; you are always stealing my stuff.

Won't you let your little boy come to our Sunday school, Mrs. Jordie? It can't make him any worse, and it may do him much good.

Poisoning by canned goods will not occur if care is exercised in their selection. Never purchase cans with two lumps of solder as this shows that the contents has worked and so had to be boiled over and re-sealed. If top of can bulges outward do not take the can as the contents are fermenting, and if finger is pressed on can and dent falls right back in place as soon as the finger is removed, the same is true, as it is gas which quickly pushes the tin back in place. If a can is bent or dented, one may be assured that the contents are in fine condition. Always empty the contents of can as soon as possible.

The Doctor—Mrs. Brown has sent for me to go and see her boy, and I must go at once.

His Wife—What is the matter with the boy?

The Doctor—I don't know, but Mrs. Brown has a book on 'What to do Before the Doctor Comes, and I must hurry up before she does it.

Niches often take wings when they are invested in flying machines.

SEASONABLE LIGHTNING ADVICE

Precautions for Safety Urged by a Lightning Rod Expert

The question of personal safety during a thunderstorm is perhaps the most interesting to the majority of people. If in a building which is isolated in the open country, or is higher than surrounding buildings in a group avoid chimneys or other flues, open windows or draughts, especially warm currents of air, directly below a high tower or flag pole, peak or angle of the structure. Keep away from overhead wires entering a building, although these are generally protected by lightning arresters, the current is not always arrested.

If in the open, avoid trees, wire fences or poles, and if you happen to be the most prominent object in the landscape, as in an open field or on a beach, do not raise a steel rod umbrella or in fact any umbrella, as you may become a living lightning rod without an approved ground connection. If you should happen to be caught in such an open space with lightning discharges coming very close as may be determined by the lessening intervals between flash and report, it is better to lie flat on the ground and risk a soaking than to offer a possible path for a discharge. The reason for this is that the body being warm, offers a better conductor than the surrounding air, and but a few feet rise is necessary to attract lightning on flat ground.

Questions as to the action of lightning in striking a building are frequently asked and are somewhat difficut to answer without going into a lengthy discussion of the various kinds of discharges and other matters of a more or less technical nature. Let us, however, take the most frequent case, that of the ordinary forked lightning, as seen at a distance which at close range becomes the blinding flash, with the accompanying instantaneous crash, often causing disastrous results to life and property. This discharge is caused by a difference of potential between earth and cloud. The one is heavily charged with positive electricity, the other with negative, with the air between acting as an insulator. If the air is sufficient to keep apart the two currents, no discharge will take place except from one cloud to another. Now, as the storm moves on it comes closer to the earth or meets some object in its path which offers less resistance than the air—maybe a tree, pole, building, etc. The electrical pressure is so great that the slight decrease in resistance offered by such object is sufficient to cause the current to jump the intervening space and we have the destructive charge. This explanation will be clearer to those who have seen the spark gap from coils used on automobiles.

Now let us assume that instead of the object before mentioned, such as a tree, pole, building, etc., we have a perfect conductor of electricity, as a steel building, steel tower or pole in electrical contact with the earth; the current passes through this into the earth silently, the pressure is relieved and in the great majority of cases there is no violent or explosive discharge.

Here is where the function of the lightning rod appears, similar to pipes tapping the tank and drawing off the water before dangerous pressure is brought to bear on the tank. A properly constructed lightning rod will, in the vast majority of cases, act in this manner by silently discharging the the current from cloud to earth, thus preventing the violent discharge which we call the thunderbolt.

Small Boy and the Motor Horn

What shall be said of the inhuman motor car manufacturer who has recently succeeded in concealing the button which sounds the motor car horn in such a way that it cannot be pressed by the small boy who hovers near? If this invention becomes universal, consider what an effect it is bound to have upon the character of this boy! And is not the American small boy the hope of the nation?

Time was when the activities of small boys went out in the direction of stealing apples and watermelons; but owing to the civilizing influence of the cities and for other reasons this source of joy—this perfectly proper moral vent to every small boy's nature—has been largely cut off. What might have happened to him? How far in the scale of human progress this boy would naturally have deteriorated, we cannot say.

But just in the nick of time the motor car was invented, giving him a chance to sound the horn; and thus the spirit of invention—that notable fount of wickedness and daring in every boy's make up—came to its expression, and he has been saved.

Motor cars stand everywhere, and if you—oh sober minded and dignified adult—have never in passing one felt within your heart the sudden impulse to jump into it and with fiendish exultation sound the horn, then look to yourself, for there is something morally the matter with you.

We sincerely hope, therefore, that this particular inventor will hold his invention so close that it may be confined only to one machine among the thousands in use.

Every boy, is entitled not only to life, liberty and the pursuit of happiness, but also to sound the horn of any machine upon which he may happen to stray.

As to the Immutability of the Liar

One of the most disconcerting and truly alarming characteristics of a liar is his essential immutability. Bedeck his utterances with gems of rhetoric; swathe his outgivings with the bindings of a respectable purpose; scent him with the spirit of public duty; the liar remains unchanged and unchangeable.

Traffic with a liar is thus brought down to the level of an extra hazardous occupation. No quality of innocence, no devotion to high ideals, no admirable display of enterprise, no one side, can overcome, or obscure for more than a moment, the idiopathy of the liar.

Got Those Jewels, Maybe

Has the count succeeded in getting into the exclusive set?

Yes, about ten thousand, I believe.

Free Indians

In proportion to the number of inhabitants there are very nearly as many pianos and automobiles in the towns of the old Cherokee nation in the present state of Oklahoma as there are in those of Vermont or Delaware. The only Indians who are in the old free, nomadic condition are about 200 Seminoles in the Florida everglades and the big cypress morass. These Indians are as independent of the white man and almost as isolated from him, as were their forefathers when Ponce de Leon and De Soto landed in their neighborhood, says the Atlantic. They are neither citizens nor wards of the United States, nor do they hold any relation to their old associates who were transferred by the government to the west side of the Mississippi two thirds of a century ago, and who became one of the five civilized tribes of the present state of Oklahoma.

Oh, Piffle!

Did you hear about Manleigh's narrow escape?

No. What happened?

It was a fire escape, and it was so narrow that the building inspector made him replace it with a wider one.

WOMEN NEED A SAFE TONIC

And There is Nothing Better Than Dr. Williams' Pink Pills for Toning Up the Blood

It is said that woman's work is never done, and it is a fact that whether in society or in the home her life is filled with more cares and more worries than falls to the lot of man. For this reason women are compelled regretfully to watch the growing pallor of their cheeks, the coming of wrinkles and the thinness that becomes more distressing every day. Every woman knows that ill health and worry is a fatal enemy to beauty, and that good health gives the plainest face an enduring attractiveness.

What women fail to realize is the fact that if the blood supply is kept rich and pure, the day of the coming of wrinkles, and pallor, dull eyes and sharp headaches is immeasurably postponed. Dr. Williams' Pink Pills are literally worth their weight in gold to growing girls and women of mature years. They fill the veins with the rich, red blood that brings brightness to the eye, the glow of health to sallow cheeks, and charms away the headaches and backache that render the lives of so many women constantly miserable.

Mrs. William Jones, Crow Lake, Ont., says: "I feel that Dr. Williams' Pink Pills saved my life. I was so badly run down that I could hardly drag myself around. I was so bloodless that I was as pale as a sheet, and you could almost see through my hands. In fact the doctor told me my blood had all turned to water. I was taking medicine constantly, but without benefit. My mother had so much faith in Dr. Williams' Pink Pills, that she bought me two boxes and urged me to take them. How thankful I am that I followed her advice. Before these were gone I began to feel better, and I continued using the Pills until I had taken five more boxes when I was again enjoying the blessing of perfect health, with a good color in my face, a good appetite, and I feel sure a new lease of life. I will always, you may be sure, be a warm friend of Dr. Williams' Pink Pills."

If you are weak or ailing begin to cure yourself to-day with the rich red blood Dr. Williams' Pink Pills actually make. If you do not find the Pills at your dealer's send 50 cents for a box or $2.50 for six boxes to the Dr. Williams' Medicine Co., Brockville, Ont., and they will be sent you by mail, post paid.

A Traitress

She was drummed out.

Expelled from the suffragettes?

Yes; they ascertained that she was merely hiking to take off weight and not through any real zeal for the cause.

Henry was very proud of the new kittens, and went for them to show them to visitors. His mother heard them coming along the hall, and alarmed at the noise of the procession, called out: Don't hurt the kittens, Henry.

No mother, came the reassuring answer, I am carrying them very carefully by the stems.

Pastor Ryder was a very prosy speaker, and one Sunday morning when the services were over and the congregation was dispersing, Deacon Bosworth, who was a great admirer of the pastor, met a friend at the door and said:

A fine sermon this morning. So well timed, too.

Yes, replied the other man, it was certainly well timed. Nearly half of the congregation had their watches out.

I have always admired that character, Rupert of Hentzau, remarked Mrs. Twickembury, he had such a debonair.

What About Sister?

Man wants but little here below.

It's different with a boy. He wants a mandolin, a pistol, a razor, a false moustache, a bull pup, a magic lantern, a detective's tin badge, a motor cycle, a mud turtle, a fiddle, a printing press, a stamp album, a toolchest, a goat, a telescope, a tame rat, a camera, a squirt gun, a baseball suit and a pair of roller skates.

Teacher (in grammar class)—What is a singular pronoun, Johnny?

Johnny—One that isn't married yet.

TETLEY'S TEA

"A Pound makes More Cups and the Flavour is Better"

The Boy Problem

The World's Work has been describing what has been done for the boy by the Scouts, the Y.M.C.A., the Salvation Army and other bodies. Always in school and elsewhere where boys congregate, we are told, there are gangs. Usually these gangs are a nuisance; very often they are a serious menace to the morals of the gang members and to the peace of the neighborhood. For usually the energy of the gang is directed against law and order. But a new time is coming, for so many people in the schools, in the Boy Scouts, and in many other activities have grasped the fundamental fact that if these gang activities are guided, most wonderful results can be achieved—results that will leave these boys far better able to handle themselves honestly and effectively in the world than were their predecessors.—Edmonton Journal.

Where Autos are Not

Prince Edward Island is not the only place where the automobile is under the ban. Mount Desert, Maine, recently reaffirmed its resolution that no automobiles shall be allowed within the corporate limits. Mr. John D. Rockefeller, Jr., one of the advocates of this measure, said that he took his family to Mount Desert to get away from automobiles.

Worth That Much, Anyway

Mrs. Exe—How could you lie so to Mr. Dauber about that absurd picture he has at the exhibition. You told him his picture was worth the price of admission alone.

Exe—Well, Great Scott! the frame is worth more than fifty cents, isn't it?

Hugh Hume, the Portland (Ore.) editor, tells a story of an Irishman named Mike Flannery, who found a valuable package belonging to a local capitalist. He took it around to the man's house and was rewarded. As he left he met a friend.

What's the matter, Mike? asked the friend; didn't he give you as much as you expected?

I thought he would give me more than I expected, replied Flannery sourly.

Even for Once

The man of whom we were told went into a downtown restaurant a noon or so ago and ordered a substantial luncheon. He ate it growlingly and when he had finished and received his check he marched up to the cashier's desk and slapped down a fine-looking bank note.

It was a Confederate bill and the cashier was not slow to detect it. She pushed it back to the customer.

This is no good, she said scornfully.

Neither was the lunch, answered the patron. Keep the change how over. And he went away.

Plenty of Time

Papa, I want an ice-cream sundae.

All right, dear, remind me of it again; this is only Tuesday.

No Claim to Distinction

My friends, exclaimed the fervid orator, I belong to the toiling masses! I started out as a milkman—

Gee! interrupted a rough looking person in the audience. So did every man here!

Appearances Deceptive

Aunt—I don't like to see you dangling about with mere boys all the time. What do you find so entertaining in that smooth-faced young Thorpe.

Niece—Why, aunt, his face isn't so smooth as it looks.

Miller's Worm Powders are not surpassed by any other preparation as a vermifuge or worm destroyer. Indeed, there are few preparations that have the merit that it has to recommend it. Mothers, aware of its excellence, seek its aid at the first indication of the presence of worms in their children, knowing that it is a perfectly trustworthy medicine that will give immediate and lasting relief.

Judge—Sambo, you are charged with being a vagrant; that is, with having no visible means of support.

Sambo—No visible means of support your honah? What yo' mean by visible means of support?

Judge — Visible means something that can be seen.

Sambo—Dat so? Why, lawdy, judge yo' jest send for mah wife, an' make her leave de washin' and come hyah. Visible? Huh! She weighs 300 pounds. I guess she's visible all right.

Mr. Ives has a mind that delights in facts. One evening he laid down the paper, was silent for a moment and then said:

That's odd.

What is it? inquired his wife.

Why, here is a man who says that it would take twelve millions years to pump the sea dry at the rate of a thousand gallons per second.

Mrs. Ives sat thinking the matter over. Finally she said:

Why, Henry, where would they put the water?

The Muff's Youngest

A little girl about two and a half years old gazed intently at her first caterpillar.

Muvver, muvver, she cried, at last, come an' see your muff's little girl taking a walk.

Dr. Morse's Indian Root Pills

are made according to a formula in use nearly a century ago among the Indians, and learned from them by Dr. Morse. Though repeated attempts have been made, by physicians and chemists, it has been found impossible to improve the formula or the pills. Dr. Morse's Indian Root Pills are a household remedy throughout the world for Constipation and all Kidney and Liver troubles. They act promptly and effectively, and

Creston Drug & Book Co.

PHONE 67 - CRESTON

Cream Shipping Depot Opened

Arrangements have been completed with Miss B. Doyle to take charge of the receiving, shipping and testing of all cream coming to the creamery from Creston.

This arrangement, we hope, will be found particularly satisfactory to the rancher who has but a limited quantity of cream to sell, as by this plan he can ship in small lots and thereby be under no necessity to hold cream waiting for even a gallon to accumulate, and thereby taking chances of shipping an inferior article.

We are anxious to secure cream of the man with a few cows. The labor we save you in buttermaking, plus the favorable price we pay for butterfat, will go a long way toward inducing you to secure a few more cows and thus take your place amoeg the big shippers

Cream is received at the C.P.R. depot. If you are not one of our patrons talk the matter over with our Creston representative. There's money in it.

Local and Personal

FOR SALE—A fresh milk cow.—J. Cook, Creston.

During his stay in Creston Bishop Doull was the guest of Mr. and Mrs. C. F. Hayes.

R. Boadway left on Saturday on a short trip to Sawyer, Idaho, where he will visit friends for a few days.

Bill Truscott, who has been working at Grand Forks for the past three months, arrived home on Sunday.

Angus Smith of Grand Forks, an old friend of the deceased's, was here this week for the funeral of the late T. W. Gilpin.

Tom Bundy, who is now permanently in charge of the C.P.R. station at Wardener, spent the week-end with friends at Creston.

Miss Louise Webster, who has been teaching school at Consort, Alberta, arrived on Saturday to spend the holidays with her parents, Mr. and Mrs. J. Webster.

Miss Hardman, teacher of primary room at the Creston school, left on Tuesday for her home at New Westminister, where she will spend the summer holidays.

Mrs. Briggs of Cranbrook is here on a visit to Mrs. G. M. Benney. At present they are rusticating at Wynndel, where the children are amassing small fortunes picking strawberries.

R. E. Beattie of the Beattie-Murphy Co., Cranbrook, was a visitor here on Monday. In his numerous trips through the Valley he states he never saw such magnificent prospects for a bumper apple crop.

The July meeting of the board of trade will be held on Tuesday evening. The committee in charge of the Bowser memorial will appreciate a full attendance to check up the contents of this all-important document.

Sergt. Frank Ebbutt, 225th Battalion, Fernie, arrived home on Tuesday, for a few days' visit before going on to camp at Vernon. He came overland on Capt. Mallandaine's charger, taking four days on the journey from Fernie here, via Fort Steele.

Mr. and Mrs. E. G. Sparkes, formerly on the Creston school staff, but who are now located at Silverton, passed through on Friday en route for their old home in Newfoundland, where they will spend their vacation. Mr. Sparkes has taken the Silverton school for another year.

Although the streams hereabouts are both too high and too muddy for successful fishing, some creditable catches are being made at Summit Creek these days. W. Embree came home on Monday with a fine string of rainbow and also three char each of which were over the six-pound mark.

The water on the flats began to recede the early part of the week and is disappearing several inches a day so far. The damage to the Wynndel berry crop is very much lighter than at first feared. Prospects are for haying to start toward the end of August, with assurance of a heavier crop than last year.

The Women's Institute picnic on Dominion Day attracted a considerable attendance, though not quite up to the usual picnic average, due, no doubt, to the busy berry season. A quiet sociable afternoon was spent, and as a result of the get-together two more members were secured for the organization.

T. H. Kay, editor of the Cranbrook Herald, spent the week-end in Creston, the guest of THE REVIEW editor. Tom always had a pretty fair respect for Creston's horticultural possibilities but when he saw the Wynndel strawberry crop he confided to Dick Bevan, "With all your boosting, the half has never been told."

The Ladies Guild dance in the Parish Hall on Friday evening last was a splendid success financially and socially, the large number in attendance enjoying one of the best hops of the season with a bounteous spread of refreshments, while the guild treasury will be enlarged to the extent of $30 after all expenses are paid. Splendid music was supplied by the Creston band and orchestra.

J. J. Fingland, returned to Kaslo on Saturday, after a special trip of inspection through the Valley to investigate the recent flood damages. The two bridges built between the Reclamation farm and Corn Creek have both suffered. The one over the small slough having shifted and by now possibly flooded out. The other is in more favorable shape and if the water continues to fall can readily be put in shape again.

I will buy calves two days old and older.—C. O. RODGERS.

Come to the City Bakery for good bread and biscuits, fancy dishes of ice cream, soft drinks, and afternoon tea. —Mrs. C. Smith.

Miss Marion Tattersall, who has been with Mr. and Mrs. F. H. Jackson for the past few weeks, returned to Rossland on Friday.

The vital statistics for June show three births, two marriages and one death. Alice Siding claims the two weddings and also two of the new arrivals.

Paddy Hope, one of the Creston old boys with the first Canadian Contingent, who was wounded in France, is expected to arrive at his home in Marysville any day now.

Henry Hamilton, who is in charge of the fire warden's lookout on Goat Mountain, went on duty for the season on Saturday. New and commodious quarters hove been erected this year for the watchman.

There was not much stir around Red Cross headquarters on Tuesday afternoon. The only goods turned in was 2 pairs of socks from Mrs. Whitehead. A donation of $1 from Mrs. Edmondson is also acknowledged.

James Anderson, mayor of Kaslo, was a visitor here on Friday on some reclamation farm business. Incidentally he had a litt'e time to discuss politics, and is confident that R. J. Long will come out of the Kaslo end of the riding with quite a substantial majority.

Mrs. Jackson was an afternoon tea hostess for Miss Fuller, who is leaving for home next week, on Thursday last. One of the features of the gathering was an authors' guessing competition at which Mrs. Stark and Mrs. Mallandaine tied for the first prize—the former winning on the draw

M. S. Middleton, assistant horticulturist, Nelson, was here on Tuesday, on an official visit. Although there is no definite announcement in the matter, he expeets the usual every-fiye-years census—human, horticultural and agricultural—will be taken this fall. The last stocktaking was in 1911.

The first carload shipment of strawberries reported this year went out on Saturday. It was billed to Winnipeg. As the berries were picked after quite a prolonged wet spell the long journey militated against their reaching the market in first-class shape. Another carload was shipped the same city yesterday.

The strawberry export is getting along toward mid-season proportions now. On Wednesday the eastbound express was real close to being an hour and three-quarters late. Owing to the high water submerging the wharves the loading at lake points is both a precarious and long drawn operation at present,

Word from Bramshott camp to hand Wednesday states that A. Biddulph and Teddy Malone are now in the fighting in France. No doubt when the Allies commander learned that these two Creston men were in the ranks he immediately gave the word for the big British offensive now on on the western front.

Mrs. Forrester is awarded the 1916 diploma for gathering the first boquet of outdoor-grown sweet peas this season, the blooms attracting attention at the Bishop Doull reception in the Parish Hall on Tuesday night. These are extremely early. In many gardens the stringing-up process has only been necessary within a very few days.

The annual school meeting is on the programme for to-morrow, at the schoolhouse, commencing at 10 o'clock. Mrs. Mallandaine's term as trustee, and also that of Dr. Henderson as auditor, has expired. These are the only two vacancies to be filled. The year's budget will likely produce considerable discussion as the meeting will be asked to vote $4,000 for the ensuing year as compared with $3,000 for the year closed.

As THE REVIEW predicted some weeks ago, the command of the 107th Kootenay Regiment, as well as the organization of the guards at the Morrissey internment camp, was this week transferred to Capt. Mallandaine. Speaking of the change the Nelson News says "Major Mallandaine is widely known throughout southeastern British Columbia, and is an seasoned vetern.

Land Registry Act

SECTION 24

In the matter of an application for duplicate certificate of title No. 7609F issued to Jakob Cycak covering the Southerly two-fifths of Lot Eight (8), Block B, Subdivision of District Lot Two Thousand and Thirty Seven (2037) Group One (1), Cariboo District Province of British Columbia, Plan 1166.

Notice is hereby given that it is my intention at the expiration of one month from the date of first publication hereof to issue a duplicate certificate of title covering the above lands to Jakob Cycak unless in the meantime I shall receive valid objection thereto in writing.

DATED at the Land Registry Office, Kamloops, B.C. this 27th. day of June, A.D. 1916.

C. H. DUNBAR,
District Registrar.
