THE CRESTON REVIEW

Vol. XV. CRESTON, B. C., FRIDAY, JULY 20, 1923 No. 25

Wyndel

Miss Vera Sadler arrived on Monday, and will spend the summer vacation with her mother.

Mr. and Mrs. Moon left on Monday for Nelson with their younger son, Clifford, who is suffering from an attack of appendicitis.

The berry season is practically at an end. The last straight car has been shipped, and most of the Doukhobors have left for their homes at Brilliant.

Miss Ella Topliss left for her home at Winlaw on Wednesday.

Tuesday's rain will materially help out the raspberry crop, which is just beginning to move.

Mrs. Hook arrived from Spokane on Monday, accompanied by her daughter, Annie, and is a guest at the Grady home.

The dance at the schoolhouse on Saturday night was well attended, with numerous visitors from Creston as well as a few from Sirdar. The music by the Andestad orchestra was good and caterer Norris of Creston supplied an excellent supper.

J. B. Rudd had the misfortune to lose a cow, which was run over by the noon train on Saturday last, the remains being salvaged later on by the Indians and helped materially in keeping down their high cost of living.

Mr. and Mrs. Victor Johnson were visitors at Nelson last week.

For the first time in the history of the berry industry the C.P.R. on Tuesday of last week attached an empty refrigerator car to their passenger train at Calgary, the empty going to Sirdar and hauled back here at 8.15 p.m. and iced, loaded and sealed ready for shipment east on Wednesday before 10.30 a.m.

At the school meeting on Saturday night Mrs. Dunseath was chosen as the new trustee, and along with Walter Cooper and John Wigen will comprise this year's board of education. H. F. Packman is the school district auditor.

Alice Siding

D. Moore of Vancouver is a visitor here at present, the guest of Mr. and Mrs. J. H. Webster.

Definite announcement is made that $6000 has been appropriated for rock surfacing the road west of Creston through to a point near the Constable ranch.

The cool and wet weather this week has held up raspberry shipping, the biggest export in this line at the Smith crossing being 40 crates on Tuesday.

Mrs. H. McDonald of Calgary, Alberta, who has spent the past month with her parents, Mr. and Mrs. Webster, left for home on Saturday.

Fred Ash was an early riser on Tuesday, a commotion in the hen yard at 4 a.m. disturbing his slumber and his visit to the poultry yard was in time to see the last of half a dozen hens stowed away by a skunk which he immediately disposed of by the shotgun route.

At the annual school meeting W. H. Mather was re-elected for the three-year trustee term, and with John Miller and Victor Carr will comprise this year's school board, with Guy Constable as auditor. The money voted this year was $350, as compared with $500 in 1922.

The superiority of Alice Siding strawberries has again been demonstrated, this time from Winnipeg, Man. Mr. A. C. McDonald of that city was a visitor at Sirdar at the end of June and before returning had J. H. Webster ship him two crates. The fruit was taken to Creston depot about 6 p.m. of a Tuesday evening, standing in the shed at least eighteen hours before shipment and after two more days on the road arrived in Winnipeg in almost perfect condition, Mrs. McDonald's letter stating that she used every berry on arrival for preserving. In a season when too much moisture is complained of this certainly demonstrates the shipping qualities of the Alice Siding strawberry.

Kitchener

Mrs. F. A. Paulson and children have arrived from Spokane and are occupying their cottage in Kitchener for the summer.

Miss Esther Erickson left a few days ago on a visit with friends in Seattle, Wash.

Mrs. G. A. Hunt and Clara were Creston visitors a couple of days last week.

DeWolf & Ham, who have the new road contract at Kitchener are making good headway with the work, but it will be at least September before the whole work is complete.

Mr. McKenna was a business visitor in Spokane this week.

John Dorman was a business visitor at Cranbrook, calling on Major Crowe, who has been a hospital patient there for almost the past year.

Mrs. Ernest Driffil was a visitor with her parents at Creston on Sunday.

Kitchener Timber Company, Limited, have quite a large crew of Swedes at work completing the extension of the mill flume.

G. A. Hunt presided at the annual school meeting on Saturday night, at which B. Johnson was re-elected trustee for another three years, and L. Howard reappointed auditor, the trustee board for this year being made up of Messrs. Johnson, McGonegal and Hunt. The meeting voted to raise $400 for school purposes this year, $200 of which will be used for levelling up the school grounds, putting in some new windows and for other improvements.

Cranbrook Courier: Friends of Major Crowe, who has been a patient in the St. Eugene hospital for nearly a year as the result of being struck by a tree when fighting a forest fire near Kitchener, will be delighted to learn that the Major is making remarkable strides towards recovery. He is now able to take the air in his wheel chair and has recovered sufficient strength to do many little things for himself.

Sirdar

Mayor Joe Daly was renewing acquaintances at Creston on Friday.

Mrs. B L. Moore and two children of Vancouver are holiday visitors with friends here.

John Lawrie of Cranbrook is here at present, relieving W. D. Touhey, who is taking his annual two weeks' vacation.

Mr. and Mrs. G. M. Perine, who came to Kuskanook intending to spend the summer with Mrs. Jones, were forced to return to their home Palo Alto, Calif., after only two weeks' stay. Due to the altitude being too high they were compelled to leave on Monday.

Mrs. Deines and son Dick, were Creston visitors, Monday.

The funeral of the infant daughter of Mr. and Mrs. Sid McCabe took place on Wednesday evening of last week to the Creston cemetery, a number from here going by auto to attend the burial. Mrs. McCabe is recovering nicely from her confinement.

At the annual school meeting on Saturday night T. Rogers was re-elected trustee for another three years, with Mrs. Jones of Kuskanook selected as auditor. The other trustees are Arthur North and S. Pascuzzo. The school was well financed last year and with a balance of $123 on hand but $200 had to be voted for this year's operations.

Cranbrook has a new general store in the Kootenay Trading Company, which opened for business last week.

Mosquitoes are so bad at Wasa that Cranbrook boy scouts have had to postpone their annual camp at the lake at that point until the middle of August.

Institute Enjoys Musical Evening

The July session of Creston Valley Women's Institute, which was largely given over to musical and literary enterainment features, attracted a large turnout of members and several visitors, and proved one of the most enjoyable of the year.

The gathering was presided over by Mrs. Lyne, who succeeds Mrs. C. B. Garland as president for the balance of the year, and in view of the talent secured to give the entertainment programme, the business of the conclave was confined strictly to routine affairs.

The members heard with great satisfaction that the whole of the class of twenty ladies who early this year had taken the course given by the St. John Ambulance Association, under the direction of Dr. Henderson, in first aid work, had successfully graduated, Mrs. J. W. Hamilton topping the class with a showing of 100 per cent.

The institute voted $10 for special prizes at the 1923 fall fair of Creston Valley Agricultural Association, with the suggestion that it be used in the ladies' sections of the premium list.

The retiring president, Mrs. C. B. Garland, was accorded a very hearty vote of thanks in appreciation of her work as president over a period of eighteen months.

In addition to a freewill offering in connection with the tea another $1.55 was raised on a raffle of a boquet of sweet peas donated by Mrs. James Cook. The two amounts will be forwarded the fund for crippled children at Vancouver, to which good cause all the tea collection money of the institute goes this year.

The programme submitted was nicely balanced in both the musical and literary numbers and was as follows:

Piano solo—Mrs. Crompton.
Recitation—Mrs. Mallandaine.
Vocal solo—Miss Frances Knott.
Violin and piano duett—Misses Louise and Evelyn Bevan.
Vocal solo—Capt. Crompton.
Recitation—Mrs. Mallandaine.
Solo—Miss Frances Knott.
Solo—Capt. Crompton.
Piano and violin duet—Misses Louise and Evelyn Bevan.
Piano solo—Mrs. Crompton.

At the close tea and lunch were served by a committee composed of Mrs. Thomas Goodwin, Mrs. J. W. Hamilton, Mrs. Hopwood and Mrs. (Dr.) Henderson.

West Creston

Vehicular traffic was restored with Creston at the first of the week, Jack Stephens being the first to get through with a team in the past six weeks.

The big new overhead cable for the ferry was hauled out on Monday afternoon and is being put in place this week. With the river in its present high state cable transport is almost as quick as by the engine.

W. Burling, who has been working at Yahk, was here during the week, and has just staked a water right on Burling Creek, from which he will get his water supply in future.

George Hendren and Dan Spiers of Creston spent a few days here last week making repairs on the bridges and clearing out the drift that pretty well choked the channel.

Deer and bear are very numerous in the Corn Creek section. Hay cutting operations were held up for a few minutes at the Stephens ranch last week due to a couple of bear invading the field and the haymakers having no shooting irons with them.

C. Olson, who frequents the streams in this section about as often as anyone from Creston, is claiming the big fish honors in both bass and trout. In the former his best showing is a four pound specimen, while at Summit Creek he has taken trout as heavy as one pound five ounces.

The trustees are planning to put in about two more days after haying at finish up work on the new school, which will complete the structure ready for use. Every effort is being made to secure a man teacher to take charge.

At the first annual school meeting on Saturday night, the permanent board of trustees was chosen as follows: Mr. Ferguson for three years, Geo. Thompson for two and R. Sinclair Smith for one year, with Fred Hurry elected auditor.

Canyon City

Mrs. Bateman returned to Calgary, Alberta on Saturday, after her usual summer visit at Canyon, with her son, Jim.

J. Cook left last week for Yahk, where he is at work in the lumber camp at that point supervised by Mr. Wetherhead.

Quite a few of the Canyon motor owners are making Kuskanook their Sunday outing point, the travelling in that direction being exceptionally fine this year.

Grover Kifer is reported leading the anglers who are trying for the fish basket offered by Mawson Brothers for the biggest trout caught this season, his one pound ten ounce sample taken below the old bridge being the heaviest brought in so far.

Ted Kemp has just purchased a lot from the Company located between the Nouguier and Martin Nelson places, and is busy with the erection of a house on it.

Canyon is very much interested in the move of Creston board of trade to secure a cutoff on the road to Bonners Ferry at the C. Huscroft place. The putting of a new customs office there will assure Canyon being on the permanent tourist north and south highway.

Everyone is admiring the improved appearance of things generally at Canyon Heights. Already the residences of Messrs. Messenger, Wetherhead and Otto Johnson have been repainted, while new homes have been erected by Messrs. Bateman and Alfred Nelson.

At the annual meeting on Saturday night some new blood was introduced into school affairs in the selection of Jim Bateman to replace G. E. VanAckeran on the trustee board, and the choice of A. Spencer to replace Wm. Searle as auditor. $1600 was voted for the carrying on of school affairs this term.

Lister

Fred Weston and Jack Burgess left on Wednesday last for Kellogg, Idaho, where they have secured positions at the smelter.

Fred Powers has returned to Lister from Klockmann, Idaho, and will be leaving this week on a trip to Spokane.

BIRTH—On July 15th, to Mr. and Mrs. W. K. Beard, a daughter.

E. L. Langston has finished the cutting and haul of hay on the Harold Langston and A. R. Webb ranches.

A. H. Rowbury and E. J. Malthouse were Sunday visitors by motor at Kuskanook.

Charles Frampton, treasurer of the Lister-Huscroft picnic association issued a balance sheet recently showing a credit balance of $12.55. It has been decided to have a chicken dinner on the picnic grounds at Huscroft on Sunday next when the male element will give a demonstation of their culinary art by taking charge of the whole affair.

The heavy hay crop and splendid showing of garden truck at Lister this year has created a distinct improvement in the morale of the residents. Almost every household had dined off new potatoes and green peas from its own garden. Egg plant, peppers and tomatoes are making a good showing, thus proving beyond doubt that, given moisture, Lister can grow anything and everything that the older sections of the Valley have produced.

The annual school meeting was held in the schoolhouse on Saturday evening. Twenty qualified voters were present, the small turnout being accounted for by the fact that the majority of the male residents are away working at present. John Bird occupied the chair. The auditor's report, which showed a credit balance of $19.05, was favorably received. The following trustees were elected: E. L. Langston, three years, replacing C. Frampton whose term has expired. E. J. Malthouse, one year, in place of Mrs. Jacks, resigned. Mrs. Yerbury, the third trustee, has two more years to serve. John Bird was elected auditor for the year. It was decided that an effort be made to secure a male principal owing to the difficulty of maintaining discipline in the senior room during the past year.

Erickson

Hugh Taylor had the bad luck to have one of the bones in his left leg broken whilst at work at rock handling in the hard surface road work here one day last week, and the injury will necessitate his taking a rest for at least a month.

Fred Klingensmith is now occupying the house on the G. P. Smith ranch, which he has leased for two years.

Erickson lost two good citizens on Sunday when Mr. and Mrs. G. P. Smith left here, the former going to the coast by way of Spokane, while Mrs. Smith will visit friends at Silverton the next six weeks, before going to Vancouver to again take up housekeeping, Mr. Smith having taken a school at the coast.

The last of the strawberries are moving this week, and as the cool weather is keeping back the raspberries express shipping has fallen off some. 60 crates of raspberries is the heaviest day's shipping so far.

Quite a number from here were motor visitors at Kuskanook for the Sabbath rest, though the gale that blew all afternoon made fishing impossible.

Mrs. Kriger, and her daughter, Mrs. Lee and Miss Almeda Attridge of Spokane, arrived on Sunday for a holiday visit with Mr. and Mrs. M. R. Palmer.

The earth excavated for the basement of the new C.P.R. depot is being used for a fill of the ravine which will be utilized for the new hard surface road into the station. The rough rock is now being put on it.

At the annual school meeting trustee R. M. Telford having given such high class satisfaction the past six years, was again favored with another three years as trustee, whilst E. J. C. Richardson again succeeded himself for the sixth term as auditor. The other trustees are Walter Hall and E. Cartwright. A levy of $1500 will be required to finance the local educational system this year.

Favors Proposed Change

Vice president Garland, and Messrs. Hayes and Johnson, a board of trade special committee, had a very satisfactory interview with H. C. Graham of Calgary, customs inspector for this district, who assured that should the American authorities build the new north and south road to enter British Columbia at the Chas. Huscroft ranch, undoubtedly the new customs house would be built at a location asked by the board. Up to the present there is nothing definite as to who will succeed Mr. Rykert on the job, though the appointment of a local man is expected any day.

Cranbrook council is justly peeved at the town band which receives a grant of $50 a month from the city but so far has not given a free open air concert.

Auto tourist campers are unexpectedly numerous at Cranbrook that the council finds it necessary to increase the accommodation and space allotted these transients.

Groceries for Less

We are once more open for business at our former store on Wilson Avenue and this is your invitation to drop in and look over our line of Groceries.

For the present we are confining our purchasing to staple lines, and by specializing can guanantee quality and freshness, with goods marked at prices others cannot possibly offer.

From past experience both in and out of retail business we believe we are particularly well qualified to know what and where to buy, and operating with a limited overhead expense and on a spot cash basis it will certainly pay you to inspect our lines.

Has a sparkling clearness and a smooth richness, for all the chaff and dust is removed by our special process. 1C

Peace Dawns In Ireland

After many long and bitter years of struggle, marked by horrors and atrocities of all kinds, it would at last appear as if a real peace was dawning in Ireland. With the passage of the Irish Free State constitution by the British Parliament it was felt that peace would almost immediately follow, inasmuch as by that constitution Ireland was granted a larger measure of home rule than was dreamed of by the Home Rulers of the past, and given as liberal and democratic a form of government as is enjoyed by any country today. Unfortunately, there were a few irreconcilables who would accept nothing less than absolute independence and complete severance of all ties with the British Empire, and so the warfare continued, confined, however, to the Irish people themselves, but terribly destructive of life and property.

However, on the anniversary of Queen Victoria's birth, Eamonn de Valera, the Irish republican leader, addressed a letter to all ranks in the republican army calling for discontinuance of the armed struggle, ordering the laying aside of all arms, and declaring that the "republic" can no longer be defended by arms. Further sacrifices on the part of the republican irregulars would, Valera declares, be in vain, and the continuance of the struggle be unwise in the national interests. At the same time the republican chief of staff, Frank Aiken, issued an order that all arms were to be dumped.

All friends of Ireland must rejoice at this decision. The cause of home rule for Ireland has been won, handsomely so, but the plan of setting up a republic in Ireland could never be anything but an idle dream, and the longer it was persisted in, the greater the suffering and loss forced on the Irish people; and the longer the period that must elapse before the Emerald Isle would launch on an assured future of happiness and prosperity.

For this happy culmination of the tragic events of the past few years, the Free State Government and its staunch friends and supporters are deserving of all praise and full credit. From the date of the creation of the Free States, the Government of Ireland have loyally fulfilled their treaty obligations with the British Government, have staunchly upheld the Free State constitution, and have energetically set to work to bring order out of chaos and establish all the institutions essential to the maintenance of law, order and good government. In the face of seemingly unsurmountable difficulties they have succeeded in, what is after all, an amazingly short space of time.

Irishmen have done some wonderful things for the British Empire throughout the centuries of the past. Britain owes much to them. Even in the recent Great War when Britain's enemies sought to induce Irishmen to take advantage of the Empire's life and death struggle to declare their absolute independence and join forces with Britain's enemies, the rank and file of the Irish people refused and remained steadfastly loyal, and tens of thousands of them laid down their lives that the Empire might be saved to do its great work in the world. And what would the world be today if it was not for the strong hand and steadying influence of the British Empire?

The ending of the unhappy struggle in Ireland will likewise serve to remove the greatest of all obstacles to the development of a still greater understanding and cordiality between the Empire and the United States. Home Rule for Ireland has for years been almost as great an issue in the United States as in Great Britain and Ireland. It has been used to create misunderstandings and cultivate hatred of Britain throughout the United States, and has led to many ill-advised statements against Great Britain, even by prominent men, in the heat and excitement of election campaigns in the big republic. United States money has very largely financed the armies of discontent and revolt in Ireland, but, with the granting of the Free State constitution, the vast majority of the American people were agreed that Ireland's aspirations had been met, and with but few exceptions support for Valera and his irreconcilables—was discontinued.

If Valera and his followers, having now recognized the inevitable insofar as armed resistance to the Free State Government is concerned, will throw their energy and influence to developing Ireland along the lines and arts of peace, Ireland may with confidence look forward to a bright future, moving steadily forward to her proper and rightful place as one of the outstanding nations in that great sisterhood of nations which go to make up the British Empire.

Prize Winning Stock for Britain

Three carloads of steers were shipped recently on direct billing to Montreal for delivery to the British markets. These animals were all winners at the recent fat stock show in Regina, and keen competition in bidding was staged before the cattle were bought off for the British market.

Glass is very old, but brass was unknown to the ancients.

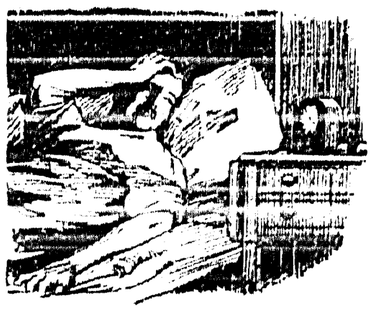
Demand For Homesteads

Since the beginning of 1923 a total area of 58,000 acres in homestead lands has been filed upon at the Dominion Land Office in Edmonton, Alberta, indicating a considerably greater movement into the province than has been the case for some time.

Many a man would be unable to paddle his own canoe if he couldn't borrow some other man's paddle.

"My Hands Trembled and I Could Not Sleep"

Mr. Thomas Honey, Brantford, Ont., writes:—



"When I began taking Dr. Chase's Nerve Food, I was so nervous that when I picked up a cup of tea my hand would tremble like a leaf. I could not sleep well, could not remember things, and there were neuralgic pains through my body. After taking seven boxes of Dr. Chase's Nerve Food, however, I am in perfect health."

DR. CHASE'S NERVE FOOD

50 cents a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto.

Natural Resources Bulletin

Production of Natural Gas Increasing In Alberta

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

In 1922 Canada produced 14,954,097 thousand cubic feet of natural gas. Of this quantity Ontario produced 7,800,000 thousand feet. Alberta was second with an output of 6,400,000 feet. Ontario, however, provided 622,774 thousand feet less than in 1921, while Alberta increased her 1921 production by 1,454,116 thousand cubic feet. With the intensive prospecting and drilling, and the number of new gas producing wells that are being brought in the present year should show a still further increase in production in Alberta.

Home Not Complete Without Nerviline

When your stomach is badly upset, when you are belching gas and suffering from nausea, the quickest relief will come from 20 drops of Nerviline. Take it in sweetened water and you get an immediate result. Nerviline has been used for nearly half a century and is considered a necessity in most houses, because of its usefulness in preventing many small ills that constantly arise. Sold everywhere in 35 cent bottles.

Paris Bread Highest Since 1870

The price of bread in Paris was raised on May 20th, the cost per kilo being one franc, twenty centimes. This is the highest price that bread has reached since the siege of Paris.

PAIN IN THE JOINTS

Is An Indication That the Blood is *Thin and Watery*

The first sign of rheumatism is frequently a pain and swelling of one of the joints. If this is not treated through the blood, which is the seat of the disease, the poison spreads, affecting other joints and tissues—sometimes rheumatism attacks the heart and is fatal.

A remedy that has corrected many cases of rheumatism is Dr. Williams' Pink Pills. These pills enrich and purify the blood so that the poisonous rheumatic matter is driven out of the system as nature intended. Miss Gertie Denne, Washago, Ont., was attacked with rheumatism and found relief through Dr. Williams' Pink Pills. She says:—"About a year ago I was attacked by rheumatism and for two weeks was confined to my bed. The trouble was so painful, affecting the joints of my limbs so that I could not stand alone. Mother had a box of Dr. Williams' Pink Pills in the house and thought they might help me. I began taking them, and when I had taken these pills got a further supply, with the result that the rheumatism vanished and I was a well girl. I may add that my mother and two of my sisters have also used the pills for various ailments with equal success, and now we are never without them in the house."

If you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how your strength and health will improve. You can get these pills through any dealer in medicine, or by mail, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Lonesome Place

Cholly.—Yes, I had a cold in my head, but it's gone now.

She.—How you must miss it.—Boston Transcript.

Cuts and Bruises Disappear.—When suffering from cuts, scratches, bruises, sprains, sore throat or chest and any similar ailment, use Dr. Thomas Eclectric Oil. Its healing power is well-known in every section of the community. A bottle of Dr. Thomas' Eclectric Oil should be in every medicine chest ready for the emergencies that may always be anticipated.

How to Address Her

When Lucy A. Goldsmith, export manager of the Aeolian Company, and one of the best known women in foreign trade, attends conventions and banquets she is very often the only woman present. The chairman at these functions have found difficulty in using the correct phrase to open the meeting. "Gentlemen" would be untrue; "Lady and Gentlemen" hardly seemed to fill the bill. Finally one chairman, more ingenuious than the others, evolved, "Miss Goldsmith and Gentlemen," and this form of address is now de rigeur in foreign trade circles.—New York Globe.

"Vernon," said the teacher of the juvenile class, "define 'ostentation.'"

"It's the way our neighbors show off," answered Vernon.

Minard's Liniment Relieves Neuralgia

Mustard is valuable in the diet

Did you know that mustard not only gives more zest and flavor to meats, but also stimulates your digestion? Because it aids assimilation it adds nourishment to foods.

but it must be Keen's 229

Lake Of Epsom Salt

Curious Lake Is Found In British Columbia

The wildest nightmares are no worse than some realities. Imagine a lake of Epsom salt. It exists at Basque in British Columbia. It is at least 41 feet deep and perhaps more. The miners who discovered the lake drilled to that depth and were then obliged to cease for lack of drilling facilities. The lake is said to cover an area of seven acres, and to have a hard crystal surface. When the snow melts from the mountains the surface is covered six inches deep with water, which quickly becomes brine. Then the sun evaporates it, and all that is necessary is to score and lift off the thick crust that has formed. Spring freshets prepare another seven-acre pan. It is, in this respect, like the lake asphalt in Trinidad.

Co-Operative Cattle Market

Many Western Farmers Take Advantage of Pooling Plan to Sell Stock

More than ten million pounds of cattle, live weight, have been sold by the farmers of Western Canada under the pooling plan since co-operative selling was first put into effect at the St. Boniface market on February 15th. Good markets have been found, especially in Ontario, where during March and April large numbers of feeder cattle were shipped.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonical in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

An Egg Laying Record

In an egg-laying competition at Christchurch, New Zealand, a Black Orpington has broken the world's record by laying 342 eggs in 365 days. The previous record was 339 eggs, laid also by a Black Orpington in Australia.

Corns disappear when treated with Holloway's Corn Remover without leaving a scar.

Soldiers Now Farmers

In a report recently issued by the Soldier Settlement Board of Canada, it is stated that 25,814 soldier settlers have settled about 3,000,000 acres of agricultural land, of which about 200,000 acres were under cultivation last season. About 3,000,000 bushels of grain were produced by the ex-soldiers last season.

Electric Smelter in Winnipeg

What is believed to be the first electric smelter plant in Winnipeg is being installed by the Vulcan Iron Works to manufacture certain products. The plant will commence operations at any early date.

HAD BAD PAINS IN HER HEART

Nerves Were Very Bad

Mrs. John Case, R. R. No. 4, St. Catharines, Ont., writes:—"I wish to say that I have been bothered very much with my heart and nerves. I doctored with two different doctors, but did not find much relief. I would have such bad pains in my heart, at times, I would be almost afraid to move or breathe, and at night I could not sleep. If the pains in my heart were gone, my nerves would be so bad I could not lie still and would only get a little sleep by being tired out. My stomach was also very bad and I could eat but very little, and then only certain things or I would have so much distress which always made my heart worse.

I had been suffering for nearly two years until one day I was talking to our druggist about the way I felt. He advised me to give Milburn's Heart and Nerve Pills a fair trial. I have now taken five boxes and am feeling so much better. I am able to do my own work, and can eat anything I wish. I cannot praise

MILBURN'S HEART AND NERVE PILLS

too highly."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Alberta Clay Products

A contract to supply a large quantity of sewer pipe to the City of Nelson, has been awarded to the Alberta Clay Products Company. This company also has in view an order from the City of Fernie, which if secured, will amount probably to twenty-five cars.

CATARRH

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic, taken internally, and acts through the blood upon the mucous surfaces of the system. HALL'S CATARRH MEDICINE assists Nature in restoring normal conditions.

All Druggists. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

Fifty Families From England For B.C.

One hundred and fifty families are to be brought into British Columbia and settled under private enterprise in the valleys east and southeast of Fort George, W. A. Lewthwaite announced, following his return from England.

Genuine

BAYER

ASPIRIN

SAY "BAYER" when you buy. Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-three years and proved safe by millions for headache, colds, toothache, earache, neuralgia, lumbago, rheumatism, neuritis, and for pain in general. Accept only "Bayer" package which contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottle of 24 and 100

108

Canada's Newsprint Industry Has Made Important Strides In The Past Few Years

In March last a new record was established by the newsprint industry of Canada, not only in manufacture but in exports. For the first time the monthly record exceeded in each case the 100,000-ton mark. Th output of the Canadian mills in March was 106,361 tons, while the exports were 113,450 tons, a portion of the latter being shipped from stock. In May last a previous record was made, when production reached the 90,000-ton mark; the increased output in the past eleven months, therefore, represents a substantial advance.

New paper-making machines are being installed in many mills, and in these also Canada is establishing records. Until about two years ago no paper-making machine had been built in Canada. The growth of the pulp and paper industry in this country was, however, assuming such proportions as to warrant the Dominion Engineering Company of Montreal, entering upon the construction of these mammoth machines. Their first unit, made for the Laurentide Pulp and Paper Company, produces a sheet of paper 166 inches in width. What is remarkable about the machine, however, apart from it being the first constructed in Canada, is the fact that it is also the fastest running newsprint machine yet built, producing up to 1,035 feet per minute of 166-inch paper.

Machines of record width have been installed by the Abitibi Pulp and Paper Company and a number of other companies are installing these mammoths. These have a paper width of 234 inches, and run at the rates of 800 feet per minute, producing from 80 to 100 tons of newsprint per day. This width visualized may be understood when it represents a strip of paper nineteen feet six inches wide, on which three automobiles could drive abreast. The output of this latter machine in one minute of running time would produce 3,757 sheets of paper equal in size to a four-page, eight-column newspaper.

Coincident with the development of the newsprint industry and the introduction of these enormous machines is the greatly augented demand upon the pulpwood supply of Canada. If our resources of pulpwood could be assured of depletion only by industry, with the greater attention being given to scientific forestry methods and replanting by the pulp and paper companies, the prospects are good for a continuous supply of this raw material, says the Natural Resources Intelligence Service of the Department of the Interior. Unfortunately this is not the case. Forest fires are taking a tremendous toll, not only of the tree which is of pulpwood size today, but of that which would produce the pulpwood supply of ten, twenty or more years hence—the young growth and seedlings are destroyed, and the ground left barren.

Many other industries benefit through the development of the pulp and paper industry. The engineering trades supply large quantities of machinery for the pulp and paper mills and for the water-power development so closely associated with the industry. Large supplies of materials other than the raw pulpwood are required, the manufacturers of wire screening and felts benefitting to a considerable extent.

Probably the railways are more directly concerned than any other interest in the growth of the pulp and paper industry. The freight created by the necessary transportation of supplies, such as coal, etc., and the delivery to consumers of the finished product or to the mills of the United States of pulpwood and woodpulp constitutes one of the large sources of revenue. During the year ending March 31 last the exports of pulpwood were 1,096,462 cords, while mechanical and chemical pulp amounted to 850,000 tons and newsprint of 1,006,522 tons.

The value of the pulp and paper industry to Canada, in export trade alone, for the same period, represented $122,554,889, $72,667,826 of this being accounted for by newsprint, $33,434,056 by other papers. What it represents in employment is shown by the 1921 report of the Dominion Bureau of Statistics of the industry, which gives the number of employees as 23,524, with wages and salaries as $34,199,090.

When it is realized that this is but one of the many industries dependent upon the forests for existence, Canada has good cause to be alarmed over the tremendous inroads which forest fires are making upon this natural resource.

Refreshes Weary Eyes
When Your Eyes feel Dull and Heavy, use Murine. It Instantly Relieves that Tired Feeling—Makes them Clear, Bright and Sparkling. Harmless. Sold and Recommended by All Druggists.
MURINE FOR YOUR EYES

Progress Of Cow Testing

Increasing Number of Farmers Taking Advantage of Systems

Year by year the number of farmers who take advantage of the cow-testing system conducted by the Dominion Dairy and Cold Storage Branch increases. In 1922 there were eight hundred and twenty-six more cows recorded in eight months or over than in the previous year, and the average production of milk and fat was greater, the test being 3.8 in per centage compared with 3.69 in 1921. Quebec stands ahead of all the provinces in number of herds and cows tested, the numbers being 3,469 herds and 33,267 cows. Ontario comes second with 783 herds and 10,347 cows. Nova Scotia is third with 360 herds and 2,520 cows. In the average test percentage, Nova Scotia ranks first with 4.32 and Quebec second with 3.9. New Brunswick's test in 1922 was 3.86, and Ontario's 3.49. The totals in 1922 for all the provinces, excluding Saskatchewan, which conducts its own testing were 5,128 herds and 50,304 cows compared with 5,194 herds and 47,895 cows in 1921. In Quebec there were 463 testing centres in 1922 and 92 in Ontario. Alberta has the best average for milk and fat, its 111 herds with 1,165 cows averaging 7,222 lbs. of milk and 290.6 of fat, the test being 3.66. Ontario's average milk production per cow under test in 1922 was 7,089 lbs. and fat 247.6.

Poultry Notes

Feeding Fowl With Grain Properly Treated For Smut

Experiments have been carried out by the Animal Pathologist at Ottawa, Mr. A. B. Wickware, to ascertain if there is any danger of feeding to fowl wheat, oats, or other grains that have been treated with formaldehyde solution for the prevention of smut. The result proves that there is little or no danger in so feeding fowls when the grain has been treated according to the standard method advocated by the Dominion Department of Agriculture. The usual method of treating seed grain is to immerse it in a 1 in 400 solution of formaldehyde for a period of five minutes, after which the grain is allowed to drain for thirty minutes and then spread out in a thin layer to dry. No ill-effects with the dry grain were noted in the experiments either with cockerels three months old or fourteen weeks old, although the latter had the scratch fed soaked for two hours in a double strength of 1 in 200 solution of formaldehyde before it was allowed to drain and spread out to dry. In the third experiment, cockerels four months old, although previously starved for 18 hours, showed little taste for the grain fed to them moist, but when a change was made to dried grain they ate a fair amount at each feeding with no bad effects.

Saskatchewan Clay

Extension of Pottery Industry is Looked For

Investigations are now being made by British interests which are likely to lead to further important development of the well-known clay of Saskatchewan. On behalf of these interests the Saskatchewan Government is supervising extensive drilling at one of the principal deposits, with a view to obtaining comprehensive samples, and if possible, blocking out a quantity of not less than 50 thousand tons. Satisfactory results will probably lead to a considerable extension of the pottery industry in Western Canada.

The Wireworm

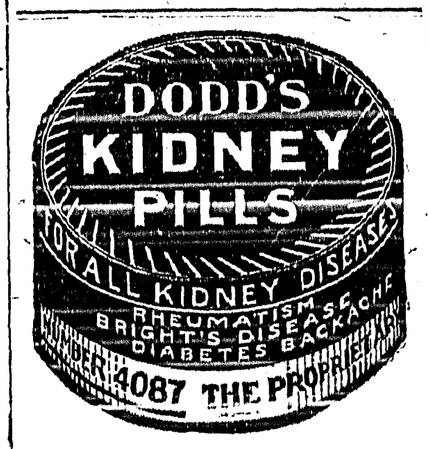
A Serious Pest of the Farm and Garden

The wireworm is a slender yellowish-brown worm about an inch in length when full grown. The insects live entirely below ground, where they feed, thrive and multiply on decaying vegetable matter and on the roots of growing plants, their smooth, wiry, cylindrical bodies allowing them to move freely through the soil. Potatoes, onions, beets and other garden vegetables are commonly attacked, and the losses caused are sometimes very great. Decaying vegetation, produced by the ploughing down of sod land in the spring or autumn, provides ample food for the young wireworms for a year or more. When fully grown, the wireworm transform into a pupa. This is the resting stage of the insect, and takes place in a small earthen cell a few inches below the surface of the ground. Later, and usually in the autumn of the year, the pupa transforms into an adult beetle, which emerges during the following spring. These beetles are about half an inch in length, and brown or black in color. They are usually spoken of as "click" beetles or "snapping" beetles, from their peculiar habit of flipping themselves into the air, with an audible click when placed on their backs. They live above ground and feed voraciously on plant growth. These facts are supplied by the Chief of the Division of Field Crop and Garden Insects of the Dominion Entomological Branch, Mr. R. C. Treherne, in his recently published pamphlet on "Wireworm Control." Methods of control are fully discussed. In the wheat growing districts of the prairie provinces, says the writer, relief from wireworm will be obtained by intensive summerfallowing, commencing in early June. Insectivorous birds at this season of the year also play an important part in destroying the pest.

What are known as False Wireworms have caused material damage in sections of British Columbia and the prairie provinces. The adult is a large clumsy black beetle, which is capable of running actively over the surface of the soil, and may be recognized by the strange habit it possesses of standing still, on their heads, as it were, when disturbed.

If there were no such word as fail some unscrupulous man would soon invent one.

Even if you are reasonably sure of going to heaven, you should take out insurance against going elsewhere.



Western Canada Produces Some Of The Best Light Horses Raised On The Continent

The trend of the times all over the continent in recent years has been towards the gradual disappearance of the light horse, and this tendency has been as noticeable in Canada as elsewhere. The general adoption of the automobile, newer modes of travel, the craze for speed, have all contributed to the relegation of this splendid animal to an era that is past, and the popularity of the rider and driver is now largely confined to a limited coterie of lovers and enthusiasts. In Canada the gradual absorption of the ranges and the increase in farming settlement has resulted in a demand for a larger and heavier type of animal. The utilitarian value of the saddle horse and driver has largely been supplanted by mechanical devices, and the light horse is only desired now by a limited number of reactionaries whose love for horseflesh persists in spite of the progressive methods of the times.

There is every indication, however, that Canada is one of the few remaining strongholds of the light horse, a country breeding excellent animals which, from the superiority of their qualities, are in constant demand elsewhere. It may be remembered that at the horse show at the first Royal Winter Fair held in Toronto in December last, a greater number of animals were exhibited than at the famed Madison Square Garden show, indicative of what Canada has to offer and how the Dominion has come to be regarded in this phase of husbandry. Just previous to this Peter Welch, a Calgary, Alberta, breeder, took some of his ponies to horse shows in the Eastern United States, and, ridden by his daughter and sons, they secured a total of eighty-four prizes at Springfield and Brockton, Mass. In the previous year, with ten horses entered at the Spokane Inter-States Fair, Calgary exhibitors brought away thirty-nine prizes and two championships. Both championships were secured by Alberta horses, which took ribbons in practically every event in which they were entered.

In January last a polo pony expert from New York purchased thirty-seven ponies from D. B. Jenkinson, a Cochrane, Alberta, rancher, who paid $18,000 for them. The ponies were all raised in Alberta from thoroughbred sires, and were fully trained for their purpose. The purchaser, who shipped them through to Virginia, stated that they constituted the finest lot of ponies he had ever seen raised on one farm. They went direct from the open ranges of Southern Alberta to the polo fields of the Eastern States.

This may be, to many people, a new phase of Western Canadian traffic, but it is one which has been in existence for many years. Though the movement is one of relatively small volume it is a constant one, and periodically numbers of them are going from Alberta's ranges to the Eastern States and elsewhere. In the days when the ranches flourished in Southern Alberta, there were six polo teams in that territory made up solely by ranchers, and these utilized exclusively native-bred ponies.

The foundation of the polo pony and light horse of Western Canada has been the native Cayuse, the same animal which constituted the first friend of the rancher and cowboy—the cow pony. The natural qualities which made him invaluable on the ranges, his lightness, stamina, and rapidity in turning, were exactly what was required for polo playing. The introduction of thoroughbred sires imparted greater speed and blood and produced from the wild ponies of the ranges, some of the continents best polo ponies, animals highly prized and valued and in great demand. Similarly some of the finest hunters and riding horses have been produced from these little Western Canadian horses.

Western Canada is one of the areas where the era of the light horse has not yet passed, where he still has a place in the economic life of the territory. The popularity of mechanical transport has not yet put an end to his utilitarian value, and even should this come to pass, which is, doubtful, he will always be there to supply the needs of horse-lovers of the continent. There is a constant importation of fine sires to raise the standard of these animals, and a direct stimulus to the breeding of these light animals was given by the Prince of Wales when he introduced into Southern Alberta some of the finest thoroughbred horses it has ever seen as well as his hardy little Dartmoor ponies, which the west had never before known.

Alberta Coal In Toronto

Easterners Find That It Will Really Burn and Produce Heat Too

The committee appointed by the Ontario Government to try out Alberta coal reported that the best grades of Alberta coal would be a satisfactory substitute for United States hard coal. The committee was J. A. Ellis, fuel controller; C. H. Mitchell, of the University of Toronto; and R. P. Fairburn, deputy minister of public works. The committee states that it would be desirable, if there were importation, that only the best grades be brought in.

Importation, in the minds of the committee, would not be satisfactory unless Alberta coal could be delivered in Toronto at $12.50 a ton, as compared with $15.50 for United States anthracite. A ton of Alberta coal will not last as long as anthracite and it takes 1¼ to 1½ tons to equal a ton of the hard coal. The tests in private houses showed that there was little smoke and that no good coal was found in the ashes, and with a few exceptions there were no clinkers or slate. It was agreed by all who tested it that the coal gave immense heat and responded quickly to draft. It must be remembered, however, that the coal was used in comparatively mild weather. About the only difficulty reported was that some had trouble in keeping the fire low until the draft was properly regulated.

Reads Home Town Paper

A Marion, Ohio, man returning from a visit to the President, states that the President doesn't have time to read the newspapers, he is so busy. The President confessed to the caller, according to this report, that he takes the Marion Star to his room at night and looks it all over from top to bottom and from the first page to the last. Then he takes a rule and measures up the advertising.

Spending Large Sums on Highways

The sum of $2,500,000 will be expended on roads and bridges this year by the British Columbia Government, it was announced by Hon. W. H. Sutherland, Minister of Public Works. Of the total appropriation $1,396,000 will be spent on highway construction, $7,000,000 for bridges and about $200,000 on the construction of settlers' trails in the newer sections of the province.

Hog Grading In Practice

The hog raiser who lives sufficiently close to a packing house to market his own hogs direct is making the most rapid advance in the quality of his stock. He is able to watch the grading and to learn precisely the type of hog that is classed as select. The ten per cent. premium the farmer receives for selects gives special point to his interest.

Considering what most people are willing to do for money, it is a wonder there are not more millionaires.

CRESTON, B.C., FRIDAY, JULY 20

Fertility Proven

That the fertility of the land in the Kootenay flats area fully equals the claims that are made concerning it has again been strikingly evidenced in the farming operations on some 4000 acres embraced in Drainage District No 1, which is situated just north of Bonners Ferry, the cultivation of which is made possible due to the dyking of the Kootenay River as well as Deep Creek.

One day last week Editor King of the Bonners Ferry Herald had a look over the crops in the drainage district, and among other things has this to say after completing his inspection:

Timothy grass seed sowed last winter on the ice around the edges of Mirror lake, in Drainage District No. 1, is now producing a yield of four tons to the acre. The novel manner of seeding the ground was the work of Simon McDonald, owner of about 1200 acres of land in the district, who is the man largely responsible for the reclamation work already done there.

Mr. McDonald resides at Edwall, Wash., where he has about 1000 acres of wheat land. He came here a fews years ago and bought about 1500 acres of unreclaimed land in the district, some of which he has since sold. Associated with him was his brother, J. H. McDonald, who owns about 190 acres.

The McDonald brothers came here and shattered many of the farming traditions of this section, but found a sufficient following to create a drainage district and put over, in the record time of less than 2 years, the first of the Kootenay Valley reclamation projects. Today Simon has 500 acres seeded to oats, about 150 acres in wheat, 275 acres in timothy hay, and 10 or 15 acres barley. J. H. McDonald has about 170 acres in oats, 10 acres in timothy and five in potatoes.

The stand of grain and hay throughout the district is quite uniform and it is expected that wheat will yield from 40 to 60 bushels to the acre. Oats are expected to run about 100 bushels, and timothy hay at from three to four tons per acre. Haying commenced on many of the tracts this week.

E. B. Moore has leased about 20 acres from Simon McDonald and is growing navy beans, of which he has every prospect of getting a big crop.

A number of the farmers in the district are experimenting with alfalfa but as they only started last year the showing made up to this time doesn't warrant a prediction on the final outcome. Some of the alfalfa looks encouraging, while other tracts do not show up so well. Wheat, oats and timothy hay are the principal crops of the district.

Only the new ground, brought under cultivation this year for the first time, was plowed for this season's crops. The sod plowed under last year was undisturbed and seeding was done after thoroughly disking the ground. Next season's crop, for which the soil will be plowed, should beat the remarkable showing of this year.

Another feature to the reclaiming of this 4000 acres that strengthens and confirms the faith of those who are pressing for the reclamation of the whole flats area in both Idaho and this province is the fact that the total cost of the drainage job at Bonners Ferry was paid for by a bond issue, the whole of which was bought by the contractor who did the work, who accepted them at par in full payment for the work.

Truxton King

Film producers are keen to grasp opportunities in discovering the public's desires. A popular book becomes even more popular on the screen and then the book is read more than before. This fact led to the filming of "Truxton King." George Barr McCutcheon's dramatic tale concerning the kingdom of Graustark and the adventures of an American who saves a throne. The Fox star, John Gilbert, is said to have equalled his best previous screen effort in this production, which will be shown at the Grand on Saturday night.

There is a plot to overthrow the young Prince, a battle to save the castle, the rescue of an exceptionally attractive girl, portrayed by Ruth Clifford, and finally, a love interest that wraps itself around all the other details of the story. John Gilbert has not neglected his sword work and, for good measure, he uncovers a corking high dive from the top of a castle wall into the moat below. The director has given the novel an added perspective, with the lights and shadows deftly contrasted.

There are many neat bits of comedy, in which little Mickey Moore has a share. Then, too, there is Otis Harlan, whose grotesque drollery gets full play in the character of a Cook's Tour Guide. If you want to laugh see "Truxton King"—if you want excitement, see it—if you like entertainment don't miss it.

The first sweet peas to bloom in Cranbrook was on July 5th. By dint of great perseverance Joe Jackson managed to get a few to bloom about two weeks later than the Creston bloom opened.

As proof of the fact that Penticton's population has not seriously decreased in the past year the Herald states that the term-end school report shows that the attendance for the year closed had only fallen off a matter of eight pupils as compared with the year previous.

GOOD MONEY IN GOOD FARMING

"Let's Get to Work and Pay Off the Mortgage"

NINE years ago Canada's national debt was about one-third of a billion. It is more than two and one-third billions today

Our debts have greatly increased—our revenues must also go up. The farmer has to bear his share of the increased burden. That means he must increase his revenue.

Complaint has been heard that farmers under present conditions in Canada cannot make farming pay. And yet many thousands of Canadian farmers do make it pay.

How Is It Done?

Patient and industrious "carry on" will do wonders, but something more is needed. Too often "patient industry" is coupled with "dull persistance" in poorly thought out methods.

Farmers today more than ever, must plan ahead, as well as "plug along"; indeed they have no option, if they wish to succeed.

Co-ordination of head and hand will mean real success. Farming in Canada has paid and pays now on many farms It can be made to pay on almost every farm. Canadian agriculture has passed through low profit-making eras successfully in the past and can do so again.

Crop Returns Should be Increased

On the Central Experimental Farm at Ottawa some crop costs and crop profits in 1922 as contrasted with all-Ontario average crop costs and crop profits are given below. The all-Ontario figures are in brackets:

	Cost per acre	*Profit per acre*
Hay	$21.13 ($13.50)	$11.21 ($5.09)
Corn for Forage	$47.50 ($33.75)	$10.38 ($2.86)
Oats	$26.47 ($19.32)	$ 7.33 (.04)

Similar results can be shown from the Dominion Experimental Farms in every province.

Experimental Farm crops are sometimes claimed to be produced at too great cost. Thousands of experiments, however, show that increased cropping costs wisely applied up to a reasonable point always increase crop profits. This is true on the Experimental Farm—and on any and every farm.

With the increased cost of production, the higher standards of living now prevailing cannot be maintained by poor farm management, "boarder" milkers, scrub beeves, poor quality hogs or non-profitable hens.

That even under present conditions profits may be made is testified by many skilful, conservant and non-plunging farmers, who believe more in the policy of "slow but sure" and "pay as you go" rather than speed, with excessive borrowing and the often consequent disaster.

The results on our Experimental Farms also bear testimony to the value of thorough, skilful work.

The Farmer Must Manufacture

But crops alone are not enough. The farmer must change his crops into less bulky and more high-priced products—milk, pork, beef, mutton, poultry, etc.

With fair yielding cows dairying shows good profits in Canada. The average cow has increased her yield 25% in the last ten years. She can quite readily go up another 25% and more, and there's where the profit lies. Better feeding, better selection and better breeding will do the job—feed, weed, breed.

To do better feeding means better pastures and more generous supplies of palatable roughage. Short rations including clover and ensilage crops (corn, sunflower, pea and oat, etc.) will provide feed in abundance for both summer and winter. The experiments and investigations which the Dominion Department of Agriculture have carried on prove that farming scientifically and systematically undertaken will pay profits. The records and particulars of such work in every province are available to the Canadian farmer.

Are you growing grain, or producing seed or interested in fruit? We can give you information that will help you. Do you breed live stock? Are you keeping dairy cattle? Are you interested in poultry or bees? Ask us for information. We have some that will help you.

We have published and have for free distribution 300 different reports, bulletins and circulars dealing with matters of interest to you. Ask for what you want, or for a list of our publications.

We shall have something more to say later. Meantime write the Department of Agriculture, Ottawa, about your problems.

Have Faith in Canada

WATER NOTICE

[USE AND STORAGE]

Take notice that William Burling, whose address is Creston, B.C., will apply for a license to take and use 250 gallons per day of water out of Burling Creek, which flows easterly and drains into Corn Creek, about the east end of Lot Number 214. The wate will be diverted from the stream about 150 feet off Corn Creek road, and will be used for domestic and irrigation purposes upon the land described as Lots 214 and 215. This notice was posted on the ground on the 15th day of July, 1923. A copy of this notice, and an application pursuant thereto, and to the Water Act, 1914, will be filed at Nelson. Objections to the application may be filed with the said Water Recorder, or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is July 20th, 1923.

WILLIAM BURLING, applicant.

LAND REGISTRY ACT

[Section 160]

In the matter of Lots 4 and 5, Block 2, Town of Kitchener, Plan 688, Kootenay District.

Proof having been filed in my office of the loss of Certificate of Title No. 2080 A to the above mentioned lands in the names of Charles Faas and William Henry Crawford, and bearing date the 15th January, 1903, I HEREBY GIVE NOTICE of my intention at the expiration of one calendar month from the first publication hereof to issue to the said Charles Faas and William Henry Crawford a provisional Certificate of Title in lieu of such lost Certificate. Any person having any information with reference to such lost Certificate of Title is requested to communicate with the undersigned.

DATED at the Land Registry Office, Nelson, B.C., this 4th day of July, A.D., 1923.

A. W. IDIENS, Registrar.

Date of first publication July 13, 1923.

PILES

No one but the sufferer knows the terrible agony or the itching nature of Piles and how hopeless it seems to try for relief in ointments, injections and dilators.

Genius produces

"PAX"

Internal Pile Remedy

Pax is the prescription of a well known physician and has proved successful in hundreds of cases. Pax is internal distinct from any other treatment. Applications from the outside are futile. No ointments, injections or dilators are necessary. Pax is complete and is a vegetable remedy, contains no drugs or alcohol.

If you have not hitherto found relief do not despair, place your faith in Pax.

Except in unusually stubborn cases one box is usually sufficient.

Get "PAX" from your Druggist or if he cannot supply you send One Dollar and "PAX" will be sent you in a plain package.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 2 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Trustees Must Finance on $7320

There was quite a large turnout of ratepayers for the annual meeting of Creston School District, which was held in the schoolhouse on Saturday night, the gathering, on motion, being presided over by Capt. J. A. P. Crompton, with the board secretary, S. A. Speers, taking the minutes.

The financial statement, certified correct by auditor Dr. Henderson, was presented by the treasurer, and adopted with very little discussion. It showed that out of a levy of $8200, along with the surplus carried forward from last year, the board had closed the books at July 1st with a balance of $784.

There was considerable discussion of the estimates for 1923 24, which has been cut from last year's total of $8200 to $7500 for the ensuing term. With the exception of a request for $180 to take care of raises in teachers' salaries the estimates were agreed to, but the prevailing spirit of economy manifested itself so strongly that the meeting decided to eliminate this $180, and on motion the new board of trustees were voted but $7320 to conduct school affairs the coming year.

There were two vacancies in the trustee board to fill due to the resignation of R. B. Staples, who has been chairman of the board for the last two years, and S. A. Speers' three year term having expired. Both of these gentlemen declined to seek re-election and their places will be taken by Capt. J A P. Crompton who was chosen over George Nickel for the three year term, though Mr. Nickel subsequently triumphed over John Blinco as trustee to serve out the term of Mr. Staples. For the tenth successive term Dr. Henderson was the unanimous choice for school district auditor.

Before the meeting adjourned votes of appreciation of the splendid services rendered by Messrs. Staples and Speers were adopted, Capt. Crompton speaking in very high praise of the practical and unselfish effort of the retiring trustees to bring Creston school up to its present high state of efficiency.

The inaugural meeting of the new trustee board was held at the schoolhouse on Monday night at which F. H. Jackson was chosen chaiaman of the board for this year, with Capt. Crompton named secretary treasurer.

Tenders are being called for the supply of fuel for the school this term, and bids are being asked for the position of janitor. Advertisement will also be placed in the Vancouver Daily Province for teachers to fill the vacancies on the staff caused by the resignations of Principal Smith Miss Katherine Moore, and Miss Creighton.

Five-sixths of the timbered area in B.C. belongs to the People.

Each year, it is increasing in value as the more accessible timber is cut.

In 1922 there was received from the sale of such timber the sum of $620,000.

This helped to keep your taxes down, and to build up the Province.

Green Timber is British Columbia's assurance of Perpetual Prosperity.

Why Burn It?

NEWS OF KOOTENAYS

90 per cent. of the 1923 taxes were paid at Fernie by the end of June.

For the six months ended March 31st Kaslo's share of the B.C. liquor profits was $992. Cranbrook got $2846, Fernie $4536 and Nelson $5463.

An unusually large number of Cranbrook people are spending the summer at Kaslo this year. Last week Barrister Nesbitt purchased a summer cottage at Mirror Lake, in the Kaslo area.

The greater part of the McIntosh Red apple yield will be placed in storage in the U.S. by the Associated Growers, and by so doing it is expected to greatly increase the demand for Jonathans at prairie points.

Penticton council announces that in future in the construction of cement walks the city will bear two-thirds of the cost of putting them down, and the work will be undertaken when 51 per cent. of the assessed value of any street petitions for a six-foot walk.

These are Ford Times

When a large saving can be made in the purchase and upkeep of a car, why not make it?

The money you save in buying your Ford in preference to higher priced cars will run your Ford some considerable time. There are millions of Fords in daily use, not because it is the lowest in price by a considerable margin, but because it gives that dependable, economical service anywhere and everywhere.

(Continued)

"I could see by the tracks that there was a number of 'em; as many as five or six," the old man summed up. "I followed their sign as far as I could, but I lost it at the creek. Then I went back to the house and sent some of the boys out to scout around before I come down here after you."

"Where do you suppose they could have taken him?" Trowbridge asked. "They'd never dare bring him to town."

"Gawd knows, Lem! There's more pockets and drifts up in them hills than there is jack-rabbits. 'Tain't likely the boys'll find any new sign, leastways not in time; not before that —— of a Moran—it was him did it, damn him! I know it was. Lem, for Gawd's sake, what are we goin' to do?"

"The first thing to do, Bill, is to get you out of this town, before Thomas shows up and jumps you."

"I don't keer for myself. I'll shoot the . . ."

"Luckily, he's away just now," Trowbridge went on, ignoring the interruption. "Come with me!" He led the way into the hotel. "Frank," he said to the red-headed proprietor, "is Moran in town to-day?"

"Nope." The Irishman regarded Santry with interest. "He went out this morning with four or five men."

"Rexhill's here, ain't he?" Trowbridge asked then. "Tell him there's two gentlemen here to see him. Needn't mention any names. He doesn't know me."

When Santry, with the instinct of his breed, hitched his revolver to a more convenient position on his hip, Trowbridge reached out and took it away from him. He dared not trust the old man in his present mood. He intended to question the Senator, to probe him, perhaps to threaten him; but the time had not come to shoot him.

"I'll keep this for you, Bill," he said soothingly, and dropped the weapon into his coat pocket. "I'm going to take you up with me, for the sake of the effect of that face of yours, looking the way it does right now. But I'll do the talking, mind! It won't take long. We're going to act some, too."

Their visit had no visible effect upon Rexhill, however, who was too much master of himself to be caught off his guard in a game which had reached the point of constant surprise. His manner was not conciliatory, for the meeting was frankly hostile, but he did not appear to be perturbed by it. He had not supposed that the extremes he had sanctioned could be carried through without difficulty, and he was prepared to meet any attack that might be offered by the enemy.

"Senator Rexhill," Trowbridge introduced himself, "you've never met me. I'm from the Piah Creek country. My name is Trowbridge."

"Yes," the Senator nodded. "I've heard of you. I know your friend there by sight." He lingered slightly over the word "friend" as he glanced toward Santry. "There's a warrant out for him, I believe."

"Yes. There's a warrant out for one of your—friends, too, Tug Bailey," Trowbridge retorted dryly, hoping that something would eventuate from his repartee; but nothing did. If the news surprised Rexhill, as it must have, he did not show it. "I've just sworn it out," the rancher continued, "but that's not why I'm here. I'm here to tell you that Gordon Wade, whom you know, has been kidnaped."

Santry stifled an exclamation of rage in answer to a quick look from his friend.

"Kidnaped from his own range in broad daylight," the latter went on: "I represent his friends, who mean to find him right away, and it has occurred to me that you may be able to assist us in our search."

"Just why has that idea occurred to you?" Rexhill asked calmly, as though out of mere curiosity. "I'd like to know."

A bit baffled by this attitude of composure, Trowbridge hesitated, for it was not at all what he had expected to combat. If the Senator had flown into a passion, the cattleman would have responded with equal heat; now he was less sure of himself and his ground. It was barely possible, after all, that Tug Bailey had shot Jensen out of personal spite; or, at the worst, had been the tool of Moran alone. One could hardly associate the thought of murder with the very prosperous looking gentleman, who so calmly faced them and twirled his eyeglasses between his fingers.

"Why should that idea have occurred to you?" the Senator asked again. "So far as I am informed, Wade is also liable to arrest for complicity in the Jensen murder; in addition to which he has effected a jail delivery and burglarized my office. It seems to me, if he has been kidnaped as you say, that I am the last person to have any interest in his welfare, or his whereabouts. Why do you come to me?"

This was too much for Santry's self-restraint.

"What's the use of talkin' to him?" he demanded. "If he ain't done it himself, don't we know that Moran done it for him? To hell with talkin'!" He shook a gnarled fist at Rexhill, who paid no attention whatever to him, but deliberately looked in another direction.

"That is why we are here," said Trowbridge, when he had quieted Santry once more. "Because we have good reason to believe that, if these acts do not proceed from you, they do proceed from your agent, and you're responsible for what he does, if I know anything about law. This man Moran has carried things with a high hand in this community, but now he's come to the end of his rope, and he's going to be punished. That means that you'll get yours, too, if he's acted under your orders." The cattleman was getting into his stride now that the first moments of his embarrassment were passed. His voice rang with authority, which the Senator was quick to recognize, although he gave no evidence that he was impressed. "Has Moran been acting for you, that's what we want to know?"

"My dear fellow,"—Rexhill laughed rumblingly, "if you'll only stop for an instant to think, you'll see how absurd this is."

"A frank answer to a frank question," Trowbridge persisted. "Has he been acting for you? Do you, at this moment, know what has become of Wade, or where he is?"

"That's the stuff!" growled Santry, whose temples were throbbing under the effort he put forth to hold himself within bounds.

"I do not," the Senator said, bluntly. "And I'll say, freely that I would not tell you if I did."

Santry's hands opened and shut convulsively. He was in the act of springing upon Rexhill when Trowbridge seized him.

"You're a liar," he roared, struggling in his friend's grasp. "Let me at him. By the great horned toad, I'll make him tell!"

"Put that man out of this room!" Rexhill had arisen in all of his ponderous majesty, roused to wrath at last. His pudgy finger shook as he pointed to the door, and his fat face was congested. "I'm not here to be insulted by a jail-bird. Put him out!"

Trowbridge's eyes gleamed exultantly, although he still kept hold on Santry, for this was the sort of thing he had expected to meet. He had not thought that Rexhill would confess complicity in the kidnaping thus early in the game; but he had looked for an outburst of anger which would give him the chance he wanted to free his own mind of the hate that was in it. He had wanted the chance to make Rexhill feel that his hour of atonement was close at hand, and getting nearer every minute.

"Easy, now!" he admonished. "We're going, both of us, but we won't be put out. You've said just what I looked for you to say. You've denied knowledge of this thing. I think with Santry here that you're a liar, a God-forsaken liar." He drew closer to the Senator, who seemed about to burst with passion, and held him with a gaze his fury could not daunt. "May Heaven help you, Senator, when we're ready to prove all this against you. If you're in Crawling Water then, we'll ride you to hell on a rail."

"Now," Trowbridge said to Santry, when they were downstairs again, "you get out of town hot-foot. Ride to my place. Take this!" He scribbled a few lines on the back of an envelope. "Give it to my foreman. Tell him to meet me with the boys where the trial divides. We'll find Wade, if we have to trade our beds for lanterns and kill every horse in the valley."

The two men shook hands, and Santry's eyes were fired with a new hope. The old man was grateful for one thing, at least: the time for action had arrived. He had spent his youth on the plains in the days when every man was a law unto himself, and the years had not lessened his spirit.

"I'll be right after you, Bill," Trowbridge concluded. "I'm going first to break the news to Miss Purnell. She'd hear it anyway and be anxious. She'd better get it straight from me."

Lem Trowbridge had seen only one woman faint, but the recollection was indelibly impressed upon his mind. It had happened in his boyhood, at the ranch where he still lived, when a messenger had arrived with word of the death of the elder Trowbridge, whose horse had stepped into a prairie-dog hole and fallen with his rider. The picture of his mother's collapse he could not forget, or his own horrible thought that she, too, had passed away, leaving him parentless. For months afterwards he had awakened at night, crying out that she was dead.

The whole scene recurred to him when he told Dorothy of Wade's disappearance, and saw her face flush and then pale, as his mother's had done. The girl did not actually faint, for she was young and wonderfully strong, but she came so near to it that he was obliged to support her with his arm to keep her on her feet. That was cruel, too, for he loved her. But presently she recovered, and swept from his mind all thought of himself by her piteous appeal to him to go instantly in search of Wade.

"We'll find him, Dorothy, don't you worry," he declared, an appearance of confidence he was far from feeling. "I came around to tell you myself because I wanted you to know that we are right on the job."

"But how can you find him in all those mountains, Lem? You don't even know which side of the range they've hidden him on."

He reminded her that he had been born in Crawling Water Valley, and that he knew every draw and canyon in the mountains; but in his heart he realized that to search all these places would take half a lifetime. He could only hope that chance, or good fortune, might lead them promptly to the spot they sought.

"Do you think that Senator Rexhill knows where Gordon is?" she asked. "Is he in this, too?"

"I don't know for sure," he answered. "I believe Moran is acting under Rexhill's orders, but I don't know how much Rexhill knows of the details. If I knew that, it would be fairly easy. I'd . . ." His strong hands gripped the back of a chair until his knuckles showed white under their tan. "I'd choke it out of him!"

"Oh, if there was only something I could do!" Dorothy wailed helplessly. "A woman never can do anything in a crisis but wait!" Her distress was so pitiable to witness that Trowbridge averted his gaze.

"We'll do all that can be done, Dorothy," he assured her. "Trust me for that. Besides—" A thought had just flashed into his head which might relieve her sense of helplessness. "Besides, we're going to need you here in town to keep us informed of what goes on."

"If I learn anything, how can I get word to you?" she asked, her face brightening somewhat. "You'll be up in the hills."

"I'll try to keep a man at the big pine all the time. If you find out anything send word to him."

"Oh, yes, I will, I will. That'll be something anyhow." Her eyes sparkling with tears, she gave him both her hands. "Good-by, Lem!"

"Good-by, Dorothy," he said solemnly, wringing her hands. "I know just how it is. We'll find him for you!"

ITCHING BURNING ECZEMA ON SCALP

In Pimples. Formed Hard Crust. Hair Fell Out. Cuticura Healed.

"I had eczema on my scalp. It broke out in little pimples which formed a hard crust. My scalp itched and burned so badly I was up half the night. My hair fell out terribly and I could not comb it.

"This trouble lasted about three months before I sent for a free sample of Cuticura Soap and Ointment. I bought more and I used two boxes of Cuticura Ointment with the Cuticura Soap when I was healed." (Signed) Miss Gertrude Harrington, 1010 Delaware Ave., Butte, Mont.

Cuticura Soap to cleanse and purify, Cuticura Ointment to soothe and heal and Cuticura Talcum to powder and perfume are ideal for daily toilet purposes.

Sample Each Free by Mail. Address: "Cuticura, Limited, 344 St. Paul St., W., Montreal." Sold everywhere. Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Soap shaves without mug.

"YOUR TEETH"

EXPRESSION

By Rea Proctor McGee, M.D., D.D.S., Pittsburgh, Pa.

When you look at other people, your impression of them is governed very largely by the expression that you find upon their faces.

We commonly speak of "the expression of the eyes," and we have so long continued the use of that phrase that we really think the eyes have expression. The eye proper has no expression, but the movement of the eyeball and the opening and closing of the lids, is what make the so-called expression of the eye. The upper lid has only an up-and-down motion, so that it could not be very expressive; but the lower lid can be moved upward and downward and can be pushed about by the muscles of the face so as to make a series of pleasant-looking wrinkles about the corner of the eye.

More than seventy-five per cent. of facial expression is due to the muscles of mastication. These are supported upon the teeth and the bones surrounding the teeth that depend for their shape upon the stability of the teeth. We are safe therefore in saying that the great majority of all facial expression, either pleasant or otherwise, is due to the region that is dependent for its support, and, consequently, its appearance, upon the teeth.

In addition to the movement of the muscles of the face, the appearance of the teeth themselves is a very large element of expression. If you look at a mouth full of clean, pearly, well-shaped, healthy teeth surrounded by natural pink gums, you get immediately a pleasing effect that is out of all proportion to the general beauty of the face. In fact, many faces that are most unprepossessing when in repose, are extremely attractive when they smile, because of a splendid dental equipment. If a most beautiful woman shows, when she smiles, either an irregular, or a decayed, or a stained set of teeth, she had better not smile, because her reputation for beauty disappears at the first glance.

If a man who wished to talk business with you was well-groomed and generally pleasing in appearance, and yet, when he opened his mouth, showed a collection of dental wrecks, he would immediately lose the psychological advantage that he had gained by his first appearance.

In order to be charitable to other people, and to create a good impression upon other people, it is necessary for us all to look the best we can at all times. And if you are going to look your best, your teeth must be in good order.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Advertising By Radio

Winnipeg Board of Trade Has Novel Plan to Spread Information

The radio is being used to advertise Western Canada. The Winnipeg Board of Trade recently launched an advertising scheme of 52 radio lectures from the Government Station at that point, each to be given by a different speaker. The scheme originated in the wide interest evinced in Winnipeg history and progress which has been increased substantially by the increasing use of the radio.

Minard's Liniment relieves Burns, etc.

Sir John's Wisdom

Letters of Sir John Macdonald, edited by Joseph Pope, show that Sir John in the sixties of last century formulated a plan for the conservation of the forest wealth of Canada, and suggested stringent action to prevent forest fires. What a much richer heritage Canada would have had today if the statesmanlike advice had been followed? Sir John suggested replanting as carried out in Northern Europe. What he said before Confederation has equal force today.—St. Catharines Standard.

Blessed are the innocent, for they have a lot to learn.

MRS. ANDERSON TELLS WOMEN

How Backache and Periodic Pains Yield to Lydia E. Pinkham's Vegetable Compound

Leslie, Sask.—"For about a year I was troubled with a distressing down-bearing pain before and during the periods, and from terrible headaches and backache. I hated to go to a doctor, and as I knew several women who had taken Lydia E. Pinkham's Vegetable Compound with good results, I finally bought some and took four bottles of it. I certainly do recommend it to every woman with troubles like mine. I feel fine now and hope to be able to keep your medicine on hand at all times, as no woman ought to be without it in the house."—Mrs. Oscar A. Anderson, Box 15, Leslie, Sask.

Mrs. Kelsey Adds Her Testimony

Copenhagen, N. Y.—"I read your advertisement in the papers and my husband induced me to take Lydia E. Pinkham's Vegetable Compound to get relief from pains and weakness. I was so weak that I could not walk at times. Now I can do my housework and help my husband out doors, too. I am willing for you to publish this letter if you think it will help others."—Mrs. Herbert Kelsey, R.F.D., Copenhagen, N. Y.

Sick and ailing women everywhere in the Dominion should try Lydia E. Pinkham's Vegetable Compound before they give up hope of recovery.

PRICE OF A HOME SPENT IN VAIN

Mrs. Logue States Money Failed to Buy Health, But Tanlac Restored It

"I bless the day I started on the Tanlac treatment, for it completely ended my troubles, which had kept me in misery ever since I came here from Scotland eleven years ago," is the grateful statement of Mrs. Emily Logue, 129 N. Park St., Hamilton, Ontario.

"At times indigestion, gas bloating and heart palpitation tortured me till I thought it would drive me frantic. My appetite was so poor I scarcely ate enough to keep going, and I grew so weak and worn out I had to let my housework go. My head ached till I thought it would split, I had fearful dizzy spells, and couldn't get a good night's sleep.

"I spent enough money on medicine to buy a home, but nothing helped me until I started on Tanlac. I now have a splendid appetite, my digestion is perfect, and I always feel strong and well, for Tanlac has built me up to robust health and I will always praise it."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For sale everywhere.

WORLD HAPPENINGS BRIEFLY TOLD

The National Cotton Spinning Association at Tokio has decided voluntarily to reduce the hours of female workers from 12 to 10 hours daily, effective in July.

Thirty-five thousand of the poorest Glasgow children were given a dinner from the fund of £500 presented for that purpose by the Duke of York in celebration of his wedding day.

Sheriff J. D. Tweed, of Orange County, N.Y., has appointed four women as deputy sheriffs and supplied them with badges. One of the women is his wife.

After 30 years on the staff of University College, Toronto, in the department of Greek, Professor Adam Carruthers is retiring. He graduated from the college in 1880.

Caught in a squall on Lake Dufault, near Ericksdale, Man., about 50 miles north of Winnipeg, Walter Greenwood, 12, was drowned when his small boat capsized.

The Azore Islands are threatened with famine due to failure of the Tidewater Trading Company to deliver $10,000 worth of corn, according to the Portuguese Consul-General.

George H. Middlemiss died recently at his home in Vancouver. He came to Canada from England in 1882, and during the second Riel rebellion did special transport work with General Middleton. He was in his 79th year.

MRS. A. A. FOULGER

This Nurse Sends a Message to Every Woman in Canada

Brantford, Ont.—"During twenty-one years of experience at nursing, I not only took Dr. Pierce's Favorite Prescription myself to keep up my health and strength, but I have also recommended it to many a patient, especially to prospective mothers, and think it is by far the best tonic and nervine that a woman can take, and for that reason I give it my highest endorsement."—Mrs. A. A. Foulger, 41 Sheridan Street.

Health is most important to every woman. You cannot afford to neglect it when your neighborhood druggist can supply you with Favorite Prescription, in tablets or liquid. This Prescription is made in Dr. Pierce's Laboratory in Bridgeburg, Ont. Send 10 cents there if you wish a trial package.

Curious Laws

Laws In Great Britain Were Very Exacting In Days Of Long Ago

Funny laws have been tried out sometimes. In Edward III.'s time a law was passed which forbade more than two courses being served at dinner, except on certain specified holidays! It sounds like the wartime law against treating, and other food regulations. "To do, or exercise, any worldly labor, business, or work of your ordinary calling on Sunday" is another little misdemeanor for which in the old days people were fined five shillings or put in the stock for two hours. Other things still punishable by law are eating meat on a Wednesday and driving on a Sunday. A short time ago a man was summoned for selling lavender without a pedlar's license. Apparently he sold the lavender done up in bags, for had he sold it loose he would not have been looked upon as a pedlar. The summons was dismissed.

First Woman Graduate

Miss Marryatt Receives Degree In Agriculture From Alberta College

The first woman graduate in agriculture from the University of Alberta was given her degree recently. She is Miss Sheila Marryat, sister of Hon. Mrs. Parlby, Minister without Portfolio in the Alberta Government, and lives at Alix, Alberta. For two years Miss Marryat was a student at Olds Agricultural School, and previously had taken a short course at Guelph. She has pust completed a three-year course at Alberta University.

Girls! Women! Improve Your Looks!

HOW TO MAKE THE GLOW OF HEALTH SHINE IN YOUR CHEEKS

News of a Simple Treatment That Thousands Find Beneficial

Alas—your bloodless face indicates trouble. Your watery blood menaces your health. What you need is the toning, cleansing assistance of Dr. Hamilton's Pills. They will clean out the overplus of bile that makes your skin so murky—they will put new life into the stomach, brace up digestion and make you eat sufficient food to get a blood supply ahead. For Settlers' Wives

Instruction for Wives of Soldier Settlers Arranged by University of Alberta

Short courses of helpful instruction for wives of soldier settlers are being arranged on a comprehensive scale by the Department of Extension at the University of Alberta, in co-operation with various other official organizations. These courses are being planned by the department, along with the Soldier Settlement Board, Home Branch, and in co-operation with the Provincial Department of Public Health and the Provincial and Dominion Departments of Agriculture.

Minard's Liniment for Distemper

Like Western Butter

Britain Makes Heavy Importations of Butter From Western Provinces

A dispatch from London, England, states that the present season has witnessed an unusually heavy importation of Canadian butter. The product of the provinces of Manitoba, Saskatchewan and Alberta, exported overseas for the first time, made a favorable impression and usually brought higher prices than that from the eastern provinces. This is attributable to the better system of grading prevailing in the west and to the methods of co-operative marketing.

Test Bullet Proof Autos

Equipped with bullet proof windshields, four-wheel hydraulic brakes, and radio receiving sets, tests have been made on nearly a dozen high-priced motor cars by police department officials of Detroit to decide upon a standard type of machine to be used as police flyers. The tests were all of the most drastic character, likely to be met in extreme police work.

"How old are you, Edna?" asked a visitor.

"I'm only five," replied Edna with a deep sigh. "I should like to be six, but I suppose somebody has to be five."

NOSE COLDS QUICKLY STOPPED

A neglected cold is the open gateway to Consumption.

To quickly stop a cold, the best way is to clear the air passages of the nose and throat; free them of germs, and let the healing vapor of CATARRHOZONE do the rest.

One breath of CATARRHOZONE brings instant relief. Your suffering stops. Hoarseness is relieved, throat and nose are cleared, inflamed bronchial tubes are healed, all danger of Catarrh is prevented.

Carry CATARRHOZONE Inhaler in your purse, in your vest pocket, and use it when the first shiver or sneeze comes. Complete outfit, One Dollar, small size 50c. At all druggists. Refuse a substitute. By mail from The Catarrhozone Co., Montreal.

Household Hints

Valuable Recipes For the Busy Housewife

Chocolate Dates

Remove the seeds from fresh, clean dates; stuff some of them with pieces of marshmallow, others with Sun-Maid seeded raisins, candied cherries and walnuts. Melt sweet chocolate and into this dip the prepared dates.

Harvey Cranberry Pudding

1 cup cranberries, 1½ cups flour.

2 tablespoons shortening, 1 cup sugar.

2 teaspoons baking powder, ½ cup water.

2 tablespoons water, ½ cup Sun-Maid seeded raisins.

¼ teaspoon salt.

Sift flour, baking powder and salt, rub in shortening and mix with ½ cup cold water. Roll out on a floured board to ¼ inch thickness.

Wash cranberries and raisins. Boil sugar and 2 tablespoons water two minutes. Let cool. Put in centre of paste, bring up corners, lap over to keep juice from coming out. Put pudding in a well buttered bowl. Tie in a cloth, leaving plenty of room to swell. Place in a pot of boiling water, having enough water to cover. Boil 40 minutes. Serve hot with hard sauce.

BABY'S OWN TABLETS AN EXCELLENT REMEDY

When the baby is ill—when he is constipated, has indigestion; colds; colic or simple fever or any of the other many minor ills of little ones—the mother will find Baby's Own Tablets an excellent remedy. They regulate the stomach and bowels, thus banishing the cause of most of the ills of childhood. Concerning them Mrs. E. D. Duguay, Thunder River, Que., says:—"My baby was a great sufferer from colic and cried continually. I began giving him Baby's Own Tablets and the relief was wonderful. I now always keep a supply of the Tablets in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Would Need Sympathy

Suitor.—Willie, will you be sorry when I marry your sister?

Willie.—Yes, I'll be sorry for you.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

Must Be On Strike

"We have a cuckoo clock in our room."

"Ours doesn't work very well, either."

CORNS BUNIONS

Minard's takes the "hurt out of them.

Also a soothing bath for sore, tired feet.

MINARD'S "KING OF PAIN" LINIMENT

Older Than King Tut

Cypress Tree That Has Attained to a Remarkable Age

Louisiana has an immense cypress tree which contains about 23,000 feet of lumber. It belongs to William Edenborn who will not have it felled. Scientists say that this tree is 2,500 years old! It was alive when Jerusalem was entered by Nebuchadnezzar; was 600 years old at the birth of Christ; and more than 2,000 years old when Columbus discovered America. Other wonderful trees of immense age are the Baobab tree in Senegal, which is 4,000 years old; the redwood tree in California and a Dragon tree in Teneriffe about the same age; and a cypress in Mexico which is supposed to have reached the remarkable age of 6,000 years.

Even if a man doesn't attempt to flirt with a pretty girl on a street car she suspects that he'd like to.

His Flesh Horribly Burnt

His druggist sold him a cheap Acid corn remedy, instead of giving him good old reliable Putnam's Corn Extractor which has been for fifty years the Standard remover of corns and warts. "Putnam's" never fails, it is always a success. 25c everywhere. Refuse a substitute.

CIRCLE TOURS OF UNRIVALLED SPLENDOR

ENDLESS SCENIC PANORAMA AWAITING TOURISTS OVER C.P.R. LINES

Picture the quiet beauty of England's Lakeland, the grandeur of the Adirondacks and the towering splendor of Swiss mountains and you will be able to form some idea of the endless scenic panorama which awaits the vacationists taking THE CIRCLE TOURS OF THE CANADIAN PACIFIC.

These delightful tours may be made through Calgary, entering the Rockies at the Gap, through beautiful Banff, lovely Lake Louise and Glacier, leaving the main line for a cruise down the Arrow Lakes, Kootenay Lake and back via The Crow's Nest Line. The second tour takes in the same resorts, but extends further through Sicamous and down the picturesque Okanagan Lake to Penticton, returning through the Crow's Nest Line. (Both tours apply in the reverse direction if desired.)

These wonderful tours are moderately priced, and offer (as well as a princely feast of scenic beauty of mountain, lake and woodland) unrivalled comfort of travel. From the moment of starting until the hour of returning the vacationist is assured of a holiday long to be remembered, for the comprehensive nature of the holiday entertainment and the de luxe travelling arrangements which enable the fullest possible enjoyment to be had from start to finish.

Excursion fares for these tours are on sale daily to September 30th, allowing stopovers at any of the delightful resorts. The return limit is October 31st. 15-23

Peevish, pale, restless and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Forty Millions In a Spoon

Forty Million Living Organisms In a Gramme of Soil

Soil is usually considered lifeless, but Sir John Russell has taken a census, and finds that in one single gramme of soil, about enough to fill a teaspoon, there are more than forty million organisms. A method of counting them was worked out, and the census was made every day for 365 consecutive days. No fewer than seventeen different organisms were enumerated. One of the most interesting results was the proof that the soil population is not steady in number, as had always been assumed, but is in a violent state of flux. Daily variations were shown independent of external conditions. The whole soil population is depressed in winter and in summer, and is uplifted in spring and autumn.

How this comes about is not known. The apparently lifeless soil must be considered as really throbbing with life, changing daily and hourly in obedience to some great laws which we have not yet discovered.

Numerals, as used today, are only about 1,000 years old.

2 IN 1 BROWN Shoe Polish

For Value

Detroit's Dependence

Workmen Of Detroit Are Mostly In Automobile Industry

Half the industrial employees in Detroit in 1914 were employed in the automobile or allied industries. Today approximately two-thirds of Detroit's industrial employees work in either automobile or closely allied industries. In 1914 about 56,000 people worked in automobile or accessory plants. Today the city has approximately 320,000 industrial workers, and of these about 205,000 are employed in motor car plants or in establishments where parts or accessories are manufactured.

Some men think they are doing a great deal toward righting the world's wrongs by fussing with their neighbors.

PILES Do not suffer another day with Itching, Bleeding, or Protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. FOR SALE—Four room dwelling house on Park Road, cash or terms Enquire Review Office.

Jack Ryckman, who has been working at Kimberley for the past couple of months, is home for a holiday.

Vehicular traffic between West Ceeston and town was re-established on Monday—four days earlier than in 1922.

AUTO FOR SALE—Used Dodge car in fair condition, two extra tires and other accessories. W. M. Archibald, Rossland, B.C.

Miss Churchill, who has been a visitor with her sister, Mrs. Gobbett, for a few weeks, left on the return trip east on Monday.

Mrs. Cameron of Lethbridge, Alberta, is spending a few weeks' vacation in Creston at present, and is the guest of Mrs. Frank Jackson.

Albert Davies, jr., who has been attending high school at Fernie the past term, arrived home at the end of the week for the summer vacation.

FOR SALE—Horses, harness and wagon, also one saddle horse and saddle, or will exchange for car or light truck. Enquire Review Office.

Miss Goodwin of Toronto, Ontario, arrived yesterday for a holiday visit with her sister, Mrs. J. W. Dow, and is accompanied by Miss Wilcox of the same city.

Miss Margaret Newton of Pincher Creek, Alberta, has just arrived to spend part of the summer vacation with Miss Florence MacDonald at Glencoe Ranch.

Garden party at the residence of Mrs. Lyne, under the auspices of Christ Church Ladies' Guild, Friday evening, July 27th, 7.30 p.m. Ice cream, tea, etc., dancing.

FOR SALE—One truck, one single wagon, one single horse mower, one horse, one pony, also parlor suite consisting of setee, rocker, chair and stand. J. Attwood, Creston.

Hon. Dr. King, federal minister of public works, Ottawa, was shaking hands with Creston friends during the train stop at Saturday noon. He was en route to Cranbrook from a trip to the coast.

Miss Barrigan of the Speers' store sales staff, was called to Wenatchee, Wash., on Saturday, owing to the death of a nephew. She will be staying for a couple of weeks vacation while away.

Misses Florence and Mildred McDonald, who have been teaching school near Granum and Irricana, Alberta, respectively, are spending the vacation with their parents, Mr. and Mrs. H. W. McDonald here.

Business has been resumed in the Jackson store on Wilson Avenue, under the firm name of Jacksons, with F. H. Jackson in charge. Groceries only are being carried at present, and a spot cash trade done.

The cool weather that has prevailed so far this week has kept down the raspberry shipping, but picking will be under way in all the fields next week and there is promise of a Valley export of at least 7000 crates.

The worst thunder and lighting storm the Valley has experienced this year prevasled at an early hour on Tuesday. The downpour on this occasion along with the other showers gives July a total rainfal of at least an inch.

Master Harry Miller, eldest son of the late Mr. and Mrs. Andy Miller, who has been staying with relatives in England for the past three years, arrived back in Creston on Friday and is with his grandmother, Mrs. M. Young.

The Elliott family concert company of some eight members, gave a musical concert in the Grand on Monday which attracted a very small crowd. The troupe is travelling across country by auto and were camped at the park while here.

Capt. Crompton and George Nickel are the new trustees chosen at the annual school meeting on Saturday night, and at a meeting of the board on Monday F. H. Jackson was named chairman, with the former selected as secretary-treasurer.

Mrs. Ryckman was a visitor at Cranbrook this week, and on Tuesday attended the wedding at Fort Steele of her son, Fred, who was united in marriage with Miss Doris Kershaw on Tuesday, and are spending their honeymoon at Spokane.

Hugh Taylor, is missing from the hard surface road crew these days, due to the fact that while at work on Saturday on the rock pile a boulder crashed into his left leg breaking one of the bones and doing other damage that will keep him off work for probably six weeks.

Geo. Gunn, who up till about twelve years ago was provincial police at Creston, and since then located at New Denver, has been transferred to Vancouver, and with Miss Ida Gunn left for their new home this week.

H. Johnson of Cranbrook, C.P.R. tie contracting agent, was here on a business visit Tuesday. While it is as yet too early to make any announcement he is quite confident there will be the usual demand for ties again this winter at satisfactory prices.

J. W. Rutledge, V.S., Cranbrook, was here on a business visit at the end of the week, and states that if the new roadmaking is complete at Kitchener before the end of September, Creston may look for many Cranbrook motor parties at the fall fair this year.

Edgar Benney is confined to the house with an injured leg that is so badly swollen that as yet it is impossible to discover whether any bones are broken or not. The injury was sustained when he was thrown heavily from the horse on which he was riding.

With the Creston orchestra officiating on Thursday evening, July 26th, the baseball club will have excellent music for their dance in the Parish Hall. The supper will be of the same high class, so a good time is assured all. The admission is $1 per couple, which includes supper.

W. B. Martin is back in charge of the C.P.R. depot after a holiday of almost six weeks, part of which he spent in the hospital at Cranbrook recuperating from injury sustained by an overlift. Mr. McLean, who had charge in Mr. Martin's absence, was a most obliging agent and made friends with everybody. He left for Michel on Monday.

Creston said goodby to Principal G. P. Smith and Mrs. Smith at the first of the week, the former going to Victoria to attend summer school, while Mrs. Smith will visit for a few weeks with old friends at Silverton. Mr. Smith has had charge of the public school for the last four years and both as teacher and citizen he and Mrs. Smith have made a wide circle of friends who are sorry at their departure. He has leased his five-acre ranch at Erickson to Fred Klingensmith for two years.

TENDERS FOR STOVE WOOD

Sealed tenders will be received up till Tuesday, August 7th, for 40 cords of four-foot stove wood; fir and tamarac cut green, 20 cords to be delivered before November 1st, 1923, and the balance by June 1st 1924. Lowest or any tender not necessarily accepted. Address tenders to J. A. P. CROMPTON, Secretary-Treasurer, Creston Board of School Trustees.

TENDERS FOR JANITOR WORK

Sealed tenders so marked will be received by the undersigned up till Tuesday, August 7, 1923, for the position of janitor for the ensuing year of the seven room public and high school at Creston, duties to commence September 1st, 1923. Lowest tender not necessarily accepted. J. A. P. CROMPTON, Secretary-Treasurer Creston Board of School Trustees.
