THE CRESTON REVIEW

VOL. XV. CRESTON, B. C., FRIDAY, JULY 13, 1923 No. 24

Board of Trade Urges New Roads

Creston board of trade was favored with a representative turnout of members at the July meeting on Tuesday night, with President C. G. Bennett occupying the chair, and the session largeiv given over to a discussion of road matters and a move to ascertain the exact status of Kootenay Flats drainage, both on the B.C. and Idaho sides of the iine.

The big drainage situation appears to be much the same in Idaho as it is here. During the past two seasons much engineering work has been done jointly by both Idaho and British Columbia and on the strength of pre ious reports given out by the reclamation authorities it would seem as if the necessary data has now been assembled upon which a pronouncement can be made as to the feasibility of the project and the probable cost.

Secretary C. W. Allan will immediately take up with the officials of the Commercial Club at Bonners Ferry, Idaho, the matter of having two international get-togethers similar to those of 1917, the first to be held at Bonners Ferry and to which the Idaho reclamation heads will be invited to be present and state the U.S. side of the matter so far as it has developed and this will be followed by a similar session at Creston to which the premier, minister of lands and the reclamation engineers will be invited. Early in January Hon. T. D. Pattullo assured Creston board of trade that a more conclusive report on the undertaking than was then available would be issued during 1923 and it is expected this pronouncement will be made at the Creston gathering if the minister finds it possible to attend.

There are three features to the board's discussion of the local road situation. Now that it seems assured that J. C. Rykert, customs officer at Rykerts, opposite Porthill, Idaho, will very shortly be retired on superannuation, the board will ask the minister of customs to establish the new customs official in premises to be built at a site in the neighborhood of the Charles Huscro t ranch, and the provincial public works department will be asked to construct a new road that will cut off at that point and head direct south to the Idaho line, and thus avoid the roundabout route and heavy grade encountered at Porthill when an autoist has to go to the present Canadian customs in order to report his going into the United States. Customs inspector Graham will probably be here on an official visit this week, and the new situation will be discussed with him by a committee composed of C. E. Garland, C. F. Hayes and George Johnson.

The secretary will also communicate with engineer William Ramsay at Nelson asking that he urge the minister of public works to make the necessary appropriation to complete the Arrow Creek road diversion this fall. With the well-known firm of DeWolf & Ham now busy on the Kitchener road it is felt that while they have their equipment in that locality it would be far cheaper to have them go on with the Arrow Creek road improvement at this time than to have the work done later and another contractor put to the expense of bringing in an outfit and setting up camps.

Major Maliandaine and C. F. Hayes who, along with President Bennett, represented Creston board at the opening of the Banff-Windermere road on June 30th, reported on the affair and strongly urged that a much larger representation be in evidence at the opening of the Ymir road, which will probably take place at the middle of August.

The enforcement of the pound law will be taken up with the minister of agriculture. Since the resignation of H. S. McCreath as poundkeeper several years ago cattle, horses, etc., have been pasturing on the town streets without hindrance, and the nuisance has developed to such an extent that at present the roaming animals are breaking sidewalks almost as fast as they are repaired. A new poundkeeper, and a corral for his use has been promised, and his immediate appointment will be urged. Enquiry will also be made as to whether the treasury department levies a tax on dogs in unorganized districts, and if so that the provincial police be instructed to proceed with the collection of same, failing payment of which all canines be destroyed.

Cranbrook, Wirdermere, Golden, and other sections of Kootenay having been utilized of late for the making of motion pictures, Messrs. Hayes, Allan and S. A. Speers of the board's publicity committee were asked to investigate the matter and if advisable notify producing companies of the advantages of Creston Valley for the making of pictures for which the Valley appears to be equally well adapted as other places that have been chosen for this purpose.

REGULAR PRICES

Canyon City

BIRTH—On June 30th, to Mr. and Mrs. J. Garland, a son.

Geo. Hewitt is a visitor with Spokane friends a few days this week.

Miss Muriel Krott left last week for Shuswap Lake, where she will spend a month visiting friends at that point where she taught school a couple of years ago.

Alfred Speaker and Bobby Burns, who left for Calgary, Alberta, have secured work near the city, and intend remaining for some time.

Elmer Chambers of Spokane was visiting with former Canyon City friends this week. His father and sister are now conducting a restaurant in that city, and doing comparatively well.

The peak of the strawberry season is now past and the last of them will be shipped within the next ten days. The crop has been the biggest ever, with Mrs. Wickholm claiming record production with Tuesday's gathering of just a little better than twelve quarts from two plants.

Raspberries and cherries will feature the fruit shipping next week, although the export of the former will be lighter than usual due to a considerable winter kill of the bushes the last two years.

The school meeting on Saturday night will attract a large attendance. With the cessation of operations by Canyon City Lumber Company, Limited, and consequent reduction in their assessment financing the local school will come considerably heavier on the property owners with next year's assessment.

At the July meeting of the United Farmers on Saturday night it was decided to omit the usual fortnightly social sessions until at least the late fall. The secretary is again taking up with the postmaster general the matter of opening the postoffice at Canyon for the carrying of mail to which tenders closed at the end of May. The matter of making a donation to Creston's fall fair will be decided at the August session.

By way of showing appreciation of the good work of his pickers and friends Charles Burgess is to be host at a strawberry social and dance in the schoolhouse tonight. His berry crop is the biggest ever harvested in Canyon City.

R. Turner met with a nasty accident whilst driving to the Siding with his berries on Wednesday. It would appear as if the shafts of the rig were on the short side and on going down the grade at the Browell corner the single tree aggrevated the animal to such an extent that it made a bolt to free itself and in sodoing upset the rig throwing the driver out breaking one of his ribs and giving him a nasty cut on the head. Assistance was promptly forthcoming and the injured man taken to his home where he received necessary attention.

Sirdar

Mr. and Mrs. Perine of Palo Alta, Calif., arrived at the end of the week for their usual summer vacation in these parts, and are guests of Mrs. Jones at Kuskanook.

C. Proctor of Cranbrook, district manager for the Canada Life Assurance Company, was a weekend visitor at Sirdar.

Jim Pascuzzo was a Sunday visitor with friends in Cranbrook.

Wili Goodman is now telegraph operator at the C.P.R. depot, succeeding Gus Kay, who has been transferred to Cranbrook.

The private car of the Dominion Railway Commissioners came over on the barge Sunday morning in time to be attached to the eastbound the same day, going through to Fernie.

Annual school meeting is announced for the schoolhouse on Saturday night.

Miss Hazel Hopwood of Creston is a holiday visitor at Sirdar, stopping with her aunt, Mrs. Whitesides.

Sirdar has experienced a marked easing off of the mosquito nuisance this year as compared with many previous seasons, and the pest is about at an end for 1923.

Mrs. McLean of Calgary, Alberta, wife of dinning car conductor McLean, was a weekend visitor at Sirdar.

Rev. H. Varley will be here on Sunday for the usual Church of England evening service at the schoolhouse.

Erickson

Express shipments at the Erickson depot are averaging better than 225 crates a day at present, with July 4th the biggest so far with a showing of 272, in which were 48 crates of gooseberries.

Mrs. Alf. Palmer has moved back from Kitchener. Due to the very wet season Alf. is working at trail and camp site building at various points in East Kootenay with only Sunday to spend at home.

The trustees are looking for a teacher to succeed Miss Green, who has been in charge of Erickson school this year, and who will be on the Nelson school staff after the summer vacation.

The 1923 raspberry season opened very early this year, George Leadbeater having the first crate for export on July 2nd. The Littlejohn ranch were the first cherry shippers, opening the season on June 28th.

Chris Aul, an oldtime resident in this section when he logged off the Craigie and H. Gobbett places, now located at Estevan, Sask., was calling on Erickson friends a few days last week.

Word reached here on Friday of the marriage of Gerald Timmons and Miss Katherine Moore of Creston, the happy event taking place at Bonners Ferry the day previous. Their honey moon trip is by motor to Los Angeles, Calif., where they expect to make their home.

The annual school meeting will be held at the schoolhouse on Saturday night and ratepayers will be glad to know that the trustees are hopeful of being able to cut the current year's financial needs below the $2000 asked for a year ago. R. M. Telford's term as trustee has expired, as well as the term of auditor E. J. C. Richardson.

Sam Fraser has started the cabbage shipping season already with quite a brisk demand for his well known product at eastern points. The first of the 1923 cabbage, however, was marketed locally from the Clements & Young ranch, which had some five-pound heads ready for use June 28th.

Builders are at work this week putting up the new C.P.R. depot which arrived in knockdown fashion from Hosmer at the end of the week, some seven cars being utilized for its transport here. The new depot is both roomy and modern throughout, a hot water heating system being part of the equipment.

The honor rolls in connection with Erickson school for the term just closed awarded as follows: Division I. Proficiency—Jack Hall. Deportment—Madeline Putnam. Perfect attendance—Margaret Fraser and Richard Hall. Division II. Proficiency—Ruth Cartwright. Deportment—Billy Wood Perfect Attendance—Lloyd Cartwright.

$5.00 REWARD

The above reward will be paid for information leading to the recovery of a bay mare with yearling colt with white blaze down face, that strayed from my premises early this month. Write or phone SAM MOON, Wynndel

Lister

Harry Brown left for Spokane the latter part of the week, after a ten day visit to his ranch at Huscroft.

Jack Burgess, who has been working in the United States the last few months is a Lister visitor at present.

Wilfrid Langston, who is a visitor with his brother, E. L., left for a visit to Spokane on Thursday, returning on Sunday.

J. W. Head has returned to Klockmann, Idaho, after an extended stay on his ranch all spring and summer.

Some of the Huscroft ranchers have been particularly fortunate in securing swarms of wild bees lately. Bees were observed coming from a number of hollow trees in the bush, so Charles Huscroft and Thedford brothers got busy with a crosscut saw and cut down the dead trees and captured the bees.

Ernest Stephens is helping with apple thinning operations on the James Adlaid ranch at West Erickson.

The annual school meeting is announced for Saturday night when a new board of trustees will be elected.

The father and a brother of John Johnston, who is at present taking medical treatment at Vancouver, arrived from Scotland at the first of the week, and will probably be making their permanent home here.

Col. Lister got back on Friday from a ten day speaking tour through east Kootenay in company with Hon. W. J. Bowser and the other Conservative members.

Alice Siding

Raspberry shipping started on July 10th, and this fruit is quite prominent in the export at the Smith crossing now. Mr. Ash states that the heaviest day's business was on July 2nd when 182 crates of soft fruit went east.

R. Alderson spent a few days at Hosmer at the middle of the week getting home on Sunday.

John Miller, who has been on the sick list for almost a month past, is able to be back at work and on Monday began looking after soft fruit shipments from the ranch.

Mr. and Mrs. Seever and family of Butte, Montana, arrived at the end of the week by motor on a visit to her parents, Mr. and Mrs. R. Stewart.

A shortage of pails this week has been responsible for considerable waste of strawberries that were available for shipping.

The annual school meeting will be held at the schoolhouse on Saturday night. W. H. Mather is the retiring trustee while Guy Constable' term as auditor has also expired.

Any spare time there is from berry operations is being spent at apple thinning. In this section both the Wealthy and Wagner are inclined to be light this year.

Raspberries are not likely to be as heavy a crop here as was at first estimed. For some reason much of the bloom has dropped off. This will also be an "off" year for pears, and cherries are light also.

The flood waters are disappearing quite rapidly off the flats, but at present the area will hardly be clear of water on the 19th, as was the case last year.

School Trusteees Ask for $7,500

Announcement about a month ago that possibly $10,000 would be required for school purposes in the Creston school district for the 1923-24 term has had the desired effect of awaking unusually keen interest in educational affairs, and so numerous and urgent have been the individual representations to the trustees that the coming year should be one of retrenchment rather than possibly needed expansion, that the board have gone the limit in meeting the demands for rigid ecomomy, and by a careful pruning of the estimates the ratepayers will this year be asked for only $7500—$700 less than the vote of the 1922 annual session, which was $8200. The sum that will be asked for at the annual session on Saturday night is made up as follows:

Teachers' salaries	$5,820.00
Janitor	650.00
Secretary	50.00
Miscellaneous	228.70
Supplies	457.98
Fuel	291.90
Grants	10.00
Water	85.00
Insurance	345.00
	$7,938.58
Cash on hand	784.87
Amount required basis 1922-23 budget	$7,153.71
Increased teachers' salaries	180.00
Kalsomining	145.00
Total	$7,538.71

The only increase that will be noted in the above figures as compared with a year ago is a matter of $180 for increases in teachers' salaries. A substantial balance on hand at the close of this term will provide the cost of kalsomining the old school as well as the additional sum required for salary increases.

Some difference will be made in the school assessment for the ensuing year due to the fact that a new school area has been created on which to levy for the upkeep of the new school to be opened at West Creston in September. Formerly this land was taxable for the benefit of the local school.

By omitting the building of an additional room this summer it is certain the capacity of the school will be taxed to the limit. A canvass of the population shows that there will be at least 25 beginners to take care of, whilst the number leaving will not be large and for the term just closed each of the teachers averaged at least 35 pupils in the public school.

The meeting will most likely be called upon to elect two trustees. S. A. Speers has completed his three-year term and will not seek re-election, while R. B. Staples, for the past two years chairman of the board, will probably be tendering his resignation as trustee. The meeting starts at 7 o'clock and the board hopes to see a very large turnout of ratepayers present.

Bees and Honey For Sale

Apiary of 26 hives Bees with equipment, including Honey crop of 3000 pounds. Would take car of Apples and Potatoes in payment. Help given this year taking crop and fixing for winter if desired. Apply T. GOODWIN, Creston.

Comment On Current Events

The announcement by President Beatty on behalf of the C.P.R. that Canada's greatest Company is prepared to voluntarily cancel existing land agreements between itself and some 30,000 Western farmers and rewrite the same on more favorable terms of payment by the farmers is most gratifying. The announcement points out that during the war years in response to the universal demand for greater production, and the then prevailing high prices, many farmers purchased more land and more equipment. Grain prices have fallen, but the high costs of production have been maintained. There have also been successive seasons of crop failure in various sections. As a result farmers have fallen behind in their payments, both as to principal and interest, and no small number of them have become somewhat discouraged.

Rather than have these farmers give up their farming operations, and possibly leave the country, the C.P.R. offers to all farmers in arrears of payments to the Company to cancel existing agreements and to give them new ones providing payments for lands covering a period of thirty-four years, at the end of which time they will be given title to the land, these payments covering both principal and interest, and the annual payment guaranteed to exceed in no one year more than 7½ per cent. of the purchase price of the land, thus assuring the farmer a reasonable amount for himself out of the year's operations.

In announcing this policy, President Beatty emphasized a view repeatedly expressed in this column, namely, that any successful immigration policy must be first of all based upon contented settlers already in the country; that nothing is to be gained by bringing in new settlers if those already here become so dissatisfied with conditions that they move out. The new policy announced by the C.P.R. has been received with favor in all quarters, and it is a policy which might well be adopted by other companies having large interests in Western lands.

The co-operative marketing of selected livestock for shipment to the British Isles, now that the embargo has been lifted, and which was recently demonstrated in the fine consignment of 1,000 head inspected at Winnipeg by the Premiers of the three Prairie Provinces, is worthy of every encouragement and support. The development of such co-operative marketing holds great promise of profit to Western Canadian farmers, and energetically prosecuted should prove an important factor in offsetting the disastrous effects on the livestock industry of the West resulting from the present prohibitive United States tariff. If the United States does not want our cattle, Great Britain does, and all that is necessary to secure a large and profitable market overseas is the exercise of care in shipping the right type, well selected and uniformly graded. Co-operative markting, too, will assure to the Western breeder the receipt of maximum profits, instead of those profits going into the pockets of middlemen.

However opinions may differ in regard to the budget introduced by Finance Minister Fielding at Ottawa, there will be but one view entertained by the people of Western Canada regarding the renewal offer of Reciprocity with the United States. Reciprocity may be a contraversial political question in the East, but not so in the West. With but a few isolated exceptions here and there, Liberals, Conservatives and Progressives throughout the West are supporters of Reciprocity with our neighbors to the south. This is not a partizan political issue in the West; it is accepted as an economic question, pure and simple, and everybody will be pleased to see it again made a live question.

This is the season of immigration from Europe to Canada, and every week witnesses the arrival of hundreds, ofttimes thousands, of incoming settlers at our Atlantic ports. But the number of arrivals is not as great as it should be, nor at all up to the number which it has been officially stated Canada can easily assimilate. The number could and would be substantially increased if the Government would but say the word. It has been alleged over and over again—and the charge is true—that it is the uncompromising and ill-considered attitude of organized labor which deters the Ottawa Government from encouraging a larger immigration. Labor urges that it would mean an increase in unemployment, although all past experiences goes to prove the reverse to be true. If Labor is correct in saying that Canada with less than nine million people, and boundless natural resources as yet undeveloped, cannot provide work for more people, how does Labor account for the present stream of people going into the United States with its 110,000,000 people and nowhere near the same resources calling for development? It is because the big population in the United States creates such an enormous demand that there is work. If Canada had more people there would be more work for all, and, until we abandon the present pussy-footing policy, our Dominion will continue to grow and develop only at a snail's pace.

Sending a Sample

As an example of what Western Canada can produce in the way of cattle, Col. H. A. Mullins, of Winnipeg, has purchased a young shorthorn which he will send overseas to be shown at all the principal livestock centres in Great Britain. It is a two-year-old steer weighing 1,110 pounds, well over 250 pounds heavier than the average three-year-old.

Grain Shipments West

More than 5,000,000 bushels of grain have been shipped from Edmonton over the westward route to Vancouver so far this season, according to the Dominion Grain Inspector. This is 2,225,000 bushels in excess of shipments for the preceding year.

Replacing Church Bells

Germany's republican government has decided to show material appreciation to the churches which permitted their bells to be turned into bullets in furtherance of the late war waged by its monarchical predecessor. Freight charges will be waived on shipments of all new bells procured to replace those given up during the war.

Not Used To It

"Here," said a lady to a beggar, "is a glass of water—pure, cold and delicious water. What? You refuse it?"

He shook his head and sighed. "I have to, ma'am," he said. "You see, I've got an iron constitution, and water would rust it."

"I Now Feel Fine"

Mrs. P. G. Murdoch, Box 433, Portage la Prairie, Man., writes:

"I was troubled for years with biliousness, constipation, kidney and liver troubles. I tried many different kinds of medicine, but nothing did me much good until I tried Dr. Chase's Kidney-Liver Pills. I now feel fine, but am never without these pills in the house. Dr. Chase's Ointment has relieved my husband of piles, from which he used to suffer badly."

DR. CHASE'S KIDNEY-LIVER PILLS

One pill a dose, 25 Cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Joint Stiffness Goes, Swellings Disappear Pain Is Subdued

No Liniment Gives Such Universal Satisfaction As

NERVILINE

It is the great penetrating power of Nerviline that makes it so efficient in overcoming swelling, stiffness and inflammation. It rubs into the very core of the pain, penetrates quickly through the tissues, and brings a warm, comforting relief at once. No liniment compares in pain relieving power with Nerviline. For the minor pains and ills that arise in every family, Nerviline should always be kept handy on the shelf. Use it for Rheumatism, Lumbago, Neuralgia, and Colds. 35 cents at all dealers.

Proposed Alpine Resort

Work Has Commenced On Ambitious Undertaking at North Vancouver

Work is commencing on the proposed Alpine resort on the plateau of Grouse Mountain, North Vancouver. The sum of $250,000 is to be expended on providing a chalet, wagon road, motor road and hotel. According to the agreement with the city $100,000 must be spent on the property within two years. The hotel will be within easy reach of the city and will provide opportunity for tobogganning, snow-shoeing, skiing and all winter sports, whilst a large area will be put aside for parking cars.

Manitoba Dairy Production

A larger increase in the production of dairy products than any previous year in Manitoba's history was recorded during the past year, according to the annual report of the Dairy Commissioner of Manitoba. The total value of dairy products, in 1922, was approximately $12,434,223. The production of creamery butter, reported by the 44 creameries, amounted to 10,559,601 lbs., which was 2,009,496 pounds more than in 1921, and the selling price at the creameries was $3,695,860.

HAVE YOU ANY OF THESE SYMPTOMS?

If You Have, You Are in Need of a Tonic Medicine

Are you pale and weak, easily tired and out of breath on slight exertion? Are you nervous? Is your sleep disturbed? Do you wake up in the morning feeling as tired as when you went to bed? Is your appetite poor, your digestion weak, and do you have pains after eating?

If you have any of these symptoms you need a tonic, and in the realm of medicine there is no better tonic than Dr. Williams' Pink Pills, which enrich the blood, restore shattered nerves and bring the glow of health to pale cheeks. The value of Dr. Williams' Pink Pills is shown by the case of Mr. Horace Cuphill, Woodward's Cove, N.B., who says:—"The first indication that my general health was not good was a shortness of breath after the least exertion. Then my appetite began to fail, and after eating it seemed as if there was a lump in my stomach. I grew so weak that I could not walk a hundred yards without resting. Then I was taken with a numbness all over my body and was in a sad plight. I was under a doctor's care, but as I was not getting better, I decided to try Dr. Williams' Pink Pills. The first few boxes did not seem to help me, but my wife urged me to continue their use and I got four boxes more. Before these were gone I could eat a fair meal, the numbness was leaving me and I was feeling much better in every way. I took the pills for a while longer, and felt that I was again a well man. I still take the pills occasionally, but have had no return of the old trouble."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Russia's Income Tax

High Rate Aimed at Get-Rich-Quick Speculators

Under the new income tax law just proclaimed in Russia monthly incomes below 1,350,000,000 rubles — which amounts to about twenty-seven dollars —are not taxed. Above that the tax begins at six per cent. and rises rapidly. Anyone who has an income that amounts to more than one hundred dollars a month in Canadian money must pay the government eighty per cent. of the excess. The tax is aimed at the merchants and speculators who are taking advantage of the scarcity of every kind of article in Russia to make quick fortunes. It is said that there are a great many such men whose income is now expressed in trillions of rubles a month.

Minard's Liniment for sale everywhere

Household Hints

Valuable Recipes For the Busy Housewife

Cocoanut-Ginger Gems

½ cup butter, 1 level teaspoon ginger.

½ cup molasses, 1 level teaspoon soda.

⅓ teaspoon salt, ½ cup chopped Sun-Maid seeded raisins.

1 cup sugar.

2 cups flour, 1 teaspoon cinnamon.

½ cup milk, 2 eggs.

Cream butter and sugar, add molasses and beaten egg yolks; then add milk in which soda has been dissolved. Combine salt, flour and ginger and gradually stir into first mixture, then add raisins and stiffly beaten egg whites. Fill well greased gem pans half full. Remove some of the centres when baked and fill with preserves or jelly and chopped nuts. Frost with a thick cocoanut frosting.

Bradley Molasses Cookies

¼ cup shortening or lard, 1 teaspoon ginger.

1 teaspoon cinnamon.

¼ cup boiling water, ¼ teaspoon cloves.

¼ cup sugar, 2¼ cups flour.

¼ cup molasses, ¾ teaspoon soda.

1 teaspoon salt, ½ cup Sun-Maid seedless raisins.

Melt shortening in the hot water, add sugar and molasses and the dry ingredients, which have been sifted together. Add plumped raisins. Chill, add more flour if required, roll thin and cut into fancy shapes. Bake in a moderate oven 15 minutes. Decorate with frosting forced through a small pointed paper pastry tube.

Manslaughter In 2nd Degree

Using a razor—bad stuff—but many people do it for their corns. The only remedy that is painless and sure is Putnam's Corn Extractor, which does remove warts and corns, cleans them right off. Refuse a substitute for "Putnam's," 25c everywhere.

Increase In Game

Sanctuaries in Canadian Rockies Provide Feeding Grounds for Deer

Indications of a continued rapid increase in the number of big game animals as a result of sanctuary conditions in Jasper National Park in the Canadian Rockies in the province of Alberta, are contained in recent reports from the superintendents. Guides grazing their pack-horses in the Buffalo Prairie region of the park are finding difficulty in securing sufficient feed for their animals owing to the exceptionally large numbers of elk, deer and caribou, grazing in that section. As many as one hundred elk have been seen feeding there at one time, while sheep and goats are also reported numerous.

Could Hardly Live for Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

CANADIAN PACIFIC EXCURSIONS TO PACIFIC COAST

A change of scene and air will help you to retain your good health, make you more fit mentally, give you a knowledge of the beauty and vastness of your country, which possibly you never realized before, and add to the joy of living. A trip to the Pacific Coast through the magnificent Canadian Pacific Rockies, with a stop-over at Banff, Lake Louise and Glacier, where beautiful Resort Hotels are maintained, or a visit to the delightful moderate priced Bungalow Camps, will give you this change. Summer Excursion Tickets are on sale daily, May 15th to September 30th, to Vancouver, Victoria and other Pacific Coast points, which will allow stop-over and bear return limit until October 31st.

Spend this Summer's Vacation in a trip to the Pacific Coast, and when you go travel Canadian Pacific.

11-23

Eight popes have been named Urban, the first of them holding that position from 222 to 230.

Minard's Liniment Relieves Neuralgia

Cuticura Talcum Soothes And Cools

After a warm bath with Cuticura Soap there is nothing more refreshing for baby's tender skin than Cuticura Talcum. If his skin is red, rough or irritated, anoint with Cuticura Ointment to soothe and heal. They are ideal for all toilet uses.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Lymans, Limited, 344 St. Paul St., W., Montreal. Cuticura Soap shaves without mug.

Comfort For Campers

A Handy Folding Camp Stove is Just the Thing

If you are going camping this year, nothing will add more enjoyment and comfort to your outing than a good reliable camp stove. The Troy Foundry and Machine Co. supply a compact, durable, handy camp stove that folds up like a suitcase. It will burn any kind of fuel, and is a most dependable stove. This stove has been used extensively by campers, motorists, prospectors, canoeists, trappers and others who live for a season in the great outdoors. If you are contemplating an outing this year it will pay you to drop a postcard to the Troy Foundry and Machine Co., Bank of Hamilton Building, Toronto, and they will send you full information and particulars.

Agricultural Training

The fifth annual university week for farm young people of Alberta will be held this month. There will be accommodation for 200 boys and 150 girls, between the ages of 16 and 25, from the farm. The programme for the six days will include instruction in various lines, including agriculture.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Making Use of the Cactus

Some day the cactus may prove to be one of our most useful plants. Its value as a water reservoir has long been appreciated; lately it was found suitable for ensilage. Now come two other uses. In South Africa a man has found a way of converting the juice of the prickly pear into industrial alcohol, and an experimenter in Cuba asserts that he can make a superior quality of rubber from the juice of a certain kind of cactus.

HER HEART SKIPPED EVERY THIRD BEAT

Mrs. James Burleigh, 248 King St. E., Chatham, Ont., writes:—"I think it my duty to let you know what Milburn's Heart and Nerve Pills have done for me.

I suffered for years with palpitation of the heart, my nerves were very bad, and I could not be left alone at any time. I doctored for over a year, and the doctor said my heart was very bad as it skipped every third beat.

I gave up, just at this time, and then my mother advised me to try Milburn's Heart and Nerve Pills, saying my eldest brother had been relieved by using them when he was very bad with his heart and nerves. I got a box and started to take them, and when I had used it I felt a lot better; could sleep a little and felt stronger. I continued taking them for about three months, and felt better than I had for years.

When I think of the misery and suffering I went through before I started Milburn's Heart and Nerve Pills, I feel like letting everyone know what they did for me."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Vast Tracts Of Northland May Become Heritage Of Which Canada Will Be Proud

Some new sidelights on the possibility of Arctic stock raising and grain culture are supplied by Harry A. Warner, engineer of this city, who has just returned from the Arctic coast, says the Edmonton Bulletin. Mr. Warner is a strong believer in the theory that the Arctic will in years to come prove habitable for the white agriculturist, and he draws parallels with settlements here in Alberta which some years since were considered to be fit for nothing but raising muskrats; where in the muskeg ice could be found at a depth of a few feet below the moss all summer, and where though this condition exists at the present day, but half a mile distant farmers are raising crops of all kinds—and good ones.

Many theories have been advanced regarding cattle raising and agriculture in the Arctic, and it is significant to note that the Hudson's Bay Company, their vast and ancient knowledge of the country were apparently satisfied that this was feasible, and actually did "run" forty head of oxen within the circle.

This episode dates back to the years prior to the advent of the C.P.R., when arrangements were made by the Gentlemen Adventurers to ship in all their trade goods via Alaska. Plans were perfected for operating steamers from the sea, commencing at St. Michael's in Alaska, up the Yukon River to the limit of navigation. Then York boats on the Porcupine and the Peel River to the height of land, where a wagon road would take the trade goods over to the Mackenzie side, where they would again be placed on steamers and taken to all the company's posts as far south as Lake Athabasca, and perhaps further.

The H. B. C. shipped in forty head of oxen via the Athabasca and the Mackenzie, and these were delivered safely on the proposed portage road eastward of Fort McPherson. It was planned by the company to construct a road of between thirty and thirty-five miles; this was cut out, bridge timbers were hewn, meadows burned off and fenced, and other preparations made for extensive freight shipping operations on the Rat River portage. Then came word that the C.P.R. had commenced building the steel westward, and the Arctic route which might have changed the whole outlook of Western Canada was abandoned. The oxen were driven over the mountains to Fort Yukon and slaughtered for beef, and the entire episode was forgotten, except in the memories of some of the real northern old-timers.

What is significant is that the H. B. C. recognized that cattle could themselves obtain a living in the Arctic, and that they were prepared to hinge their entire transportation system on this theory.

Further concrete examples of what is possible are furnished by other travellers. In 1908 a prospecting party took north with them two horses for packing purposes, and ranged and fed these animals at a point fifteen miles north of the present settlement of Aklavik, and within a short distanc of the Arctic coast. The horses were used in the Arctic for a year, but finally they wandered away and were lost or destroyed by the wolves.

Fifty per cent. of the area of the Mackenzie delta is grass covered, says Mr. Warner, and following the examples of others, large bands of both horses and cattle could be fed here with no more difficulty than would be experienced in Northern Alberta.

Again, to get away from theories and illustrate actualities, it is noteworthy that the Northern Trading Company's fur post manager at Aklavik (well within the Arctic circle), has grown cabbage and lettuce, while a few grains of wheat which were planted, headed out but did not ripen. Root crops cannot be grown, due to the fact that the ice is so close to the surface, but the northman is of the opinion that plants which produce their crop above the surface can speedily be brought to bear. Though these may not become immediately successful, they undoubtedly would in time as drainage and clearing opened up, the land as it did in the prairie northwest, and Mr. Warner thinks that as the ground warms barley and oats will be cultivated successfully south of an isotherm passing through Fort McPherson.

The frost of a previous geological age is passing slowly; the present age is a warmer one, and if the top moss and other overburden is stripped from the ground the perpetual frost will recede, says Mr. Warner, and the non-cultivatible area will gradually diminish. As a case in point, the engineer mentions the home of husbandry—Scotland—where some centuries since the people had to depend mainly on oat food because no other grain would withstand the rigors of the climate. Nowadays Scotland will grow any of the temperate zone vegetables and grain, and what is true of Scotia, will have a parallel in the soils of the far north.

From the stock raising and grain growing standpoint the far north has a distinct potential value, says Mr. Warner, though, of course, it will be many years before it is largely utilized. There are areas though, within the three line limit, which can be made to produce growth sufficient to sustain a settled population, and in general the northern traveller ridicules the idea that the far north is a howling wilderness, which never will do more than provide feeding grounds for semi-domesticated herds of the reindeer family.

Throughout the winter Mr. Warner lived in a tent in his Arctic home and felt no hardships thereby, Aklovik is no cooler than Edmonton, he says, though on the coast proper the winds blowing off the open leads in the ice make for more arduous conditions. The mysterious and dreaded Barren Lands, he compares to the prairies fifty years ago, while he avers that the wilderness is a very different thing to the desert, and that the first-named can be made normal by the use of commonsense methods of life and travel.

Just as surely as the prairies were subdued and brought to serve men's needs, so will the far north, says the engineer, and it is by no means impossible but that the North-West Territories will later be regarded as a heritage of which Canadians will be justly proud.

Export Cattle Trade

Showing for the First Quarter of the Year Compared with Last Year

The markets intelligence report of the Dominion Live Stock Branch for the first quarter of 1923 is particularly full and interesting and should be well studied by everyone concerned in the livestock and meat trade of the country. Following are some of the facts to be gleaned:

That the marketings of cattle at Canadian stockyards during the quarter were approximately 149,000 compared with 129,000 in the same period last year.

That cattle prices during March were on the average about 25 per cent. lower in the west and about even in the east compared with prices in the previous month, and that at the close they were 50c up in the west and $1 in the east.

That the store cattle movement this year for the quarter totalled 18,937 compared with 14,804 for the same period last year.

That the increase is largely due to good prospects for trade in the autumn feeder markets in Great Britain. That prices in March were about a dollar higher than in February. That a feature of the store cattle market was the general high standard of the purchases.

That the hog movement was 31 per cent. greater up to March 31, this year than last year, that slaughterings were 20 per cent. more this year than last, and that prices on the average were about three dollars down.

That the sheep and lamb movement is about 5,000 head this year more than last year, and that prices for good lambs in March were 50c to $1 better than in March, 1922.

That the export trade in cattle and calves showed up in the first three months of this year almost 200 per cent. better than last year, that the export of beef was approximately 62 per cent. better, that bacon was 12 per cent. better, and pork 186 per cent. better. Exports of sheep and mutton were lighter.

That all Canadian stores offered in Great Britain have sold at high prices, the average being well in line with the prices ruling for domestic stock.

Taking Stock of Yourself

People Should Know How They Appear to Others

It's quite worth while to look at yourself occasionally. Many people are so busy in the hurry of everyday life that they really forget what they are like and how they appear to other folk. It's not lost time by any means when we sit down quietly and sort of take stock of ourselves.

Passing a shop window where plate glass reflects more or less clearly the individual on the street, most of us take a glance to see how we look, and if the hair is rumpled, the tie awry or any part of the attire out of place we hastily try and adjust them.

But its much more important to take a good look at our real selves. How our words, actions and character are appearing to other people and what influence they are exerting on those around us—a little introspection may show us that adjustments are necessary—and we should at least care as much about these and make necessary changes to improve matters as we would in our personal attire.

When lovers walk beneath the moon they forget they are of the earth earthy.

Sleeping rooms built in the tree tops are one of the novel features of a California mountain resort.

Butter From Western Canada Gaining High Prominence In Markets Of Europe And U. S.

That the farmers of the prairie provinces now realize the necessity of branching out and freeing themselves from dependence on one of agriculture only, is shown conclusively in a recent issue of the C.P.R. monthly publication, "Agricultural and Industrial Progress in Canada." The facts disclosed will come with all the force of a revelation to many in the east who continue to labor under the belief that the west is still largely a one-crop country. They show a truly remarkable expansion in the practice of mixed farming and that the three provinces which, immediately before the war, were in the habit of importing the butter they consumed, are now not only able to supply their own needs but have a considerable exportable margin. What is still more satisfactory from every point of view is the further assurance that the prairie product has already obtained favor in many markets. That the dairy industry is not only established but is developing rapidly, is substantiated by the returns for last year. Saskatchewan increased its output of dairy butter over 1921 by thirty-five per cent.; Manitoba by 23.5 per cent., and Alberta by nearly 20 per cent. The total value of Alberta's dairy products in 1922 was $22,950,000; of Saskatchewan, $18,805,276; and of Manitoba, $12,434,223, a total for the three provinces of $54,189,439.

Encouraging and remarkable as these figures are, they do not tell the whole story of the transformation that is passing over the historic grain growing west. When this process began, it is evident that it was not entered upon without a well-considered plan and aim. In dairying, success is dependent on the class and character of the stock in the first place, and, next, on adoption of the best and most efficient methods of production. These essential requirements were evidntly supplied by western farmers, as well as the skillful handling needed to turn out a high-class article. The excellence of Western Canadian butter is certified by its not only taking high rank in Canada, but competing on favorable terms in the markets of the United States and Europe. In proof of this, the statement is made that last year Alberta butter was shown at eleven exhibitions, where it came into competition with butter from all parts of the Dominion, and out of a possible total of 380 awards the province secured 211, including 54 firsts. Saskatchewan won the place of premier province in the previous year, securing the first five prizes in Canada for the highest average scores. In the same year Manitoba was awarded the silver medal in Chicago, having the year before won three Canadian provincial championships and twenty first prizes.

The Livestock Market

Favorable Tone to Market Makes Outlook Encouraging

Dominion Livestock Branch market reports for the week ending April 26, make mention of a shipment from the Toronto market of seven loads of Holstein cows and four loads of butcher bulls to France and of 45 store cattle from Calgary direct to Fakenham, Norfolk, England, and of 81 head to Ireland via Glasgow. On the whole, spring seems to have opened up rather favorably for the livestock industry. Top prices for the week ending April 26 for cattle were rather lower than at the same date last year, but were up for calves at Toronto and Montreal and fairly steady elsewhere. Lambs were also up at Toronto and steady at Montreal. Hogs were lower than last year at all the principal markets except Edmonton, where there was a slight rise. However, prices were nearly all better than during the previous week. There was the usual wide difference between the good and the poor animals. Sales for this year up to April 26, compared with the same period last year were: Cattle, 198,412 to 159,285; calves, 60,155 to 66,862; hogs, 339,313 to 257,401; sheep, 67,908 to 59,804. Cattle billed through this year, to April 26, compared with last year, were 38,930 to 23,007; hogs, 59,944 to 20,272; and sheep 16,570 to 18,550.

Telephone Statistics

Nearly 40,000 Miles of Long Distance Circuit Mileage in Alberta

There are nearly 40,000 miles of long distance circuit mileage in the province of Alberta, according to the annual report of the Telephone Department of the Government, now in print. There are 968 places in the province having Government phone connection, and there are 217 places outside the province with which the Alberta system connects. Of these, 78 are in the States, 33 in British Columbia, and 106 in Saskatchewan. There is a total of 26,334 exchange subscribers' lines, and 20,617 rural subscribers' lines in the province.

The Metropolitan Water Board, which supplies London with water, obtains 60 per cent. of its supplies from the Thames.

Three Prairie Premiers Endorse Co-Operative Cattle Selling

Premier Greenfield of Alberta, Premier Dunning of Saskatchewan, and Premier Bracken of Manitoba, visited the Union Stockyards, St. Boniface, Man., in order to inspect a thousand head of export steers gathered for shipment to British markets under the co-operative pooling plan inaugurated by United Grain Growers Ltd. In three different consignments these are on the way to Glasgow, to Dundee and to Manchester. The Premiers also watched the process by which mixed cars of cattle as received by the pool from the country are sorted up into even car lots before being offered for sale, shipped to markets east or south, or exported.

"It is a wonderful advance in cattle marketing," said Premier Greenfield, speaking of the co-operative pool method. "It means getting for farmers the full value of their cattle on the final market."

"We have been preaching co-operative marketing of cattle for years in Saskatchewan," said Premier Dunning, and were delighted when the former method of co-operative shipping to western markets was broadened out by the pool method to cover the final marketing of cattle. We are watching with great interest the extension of the co-operative plan to cover the exporting of cattle to Great Britain."

"What appeals to me most," said Premier Bracken, "is the system by which cattle are sorted up before they are offered for sale. I am sure this plan of selling is going to bring more money to farmers, especially those who are raising the better grades of cattle. It means developing our cattle industry by encouraging the men who are breeding and feeding the right kind of cattle."

From left to right in the group above are: C. C. Chipman, Editor Grain Growers' Guide; Premier Bracken of Manitoba; Mr. C. Rice-Jones, General Manager United Grain Growers, Ltd.; Premier Dunning of Saskatchewan; Hon. F. M. Black, Provincial Treasurer of Manitoba; and Premier Greenfield of Alberta.

Burned Forests

Destruction of Forests Has Detrimental Effect on Trade

Living forests provide us with wood material of all kinds for our homes and industries, but burned forests provide no lumber, no work for the workingman, no business for the merchant and no freight for the railway or steamship. Most of the land on which our Canadian forests now stand is not fit for agriculture, but it is fit to grow fine crops of trees, to keep our sawmills, our wagon factories, our furniture factories and our paper mills running at full force forever. Let us all take part in protecting our valuable forests.

Seed Wheat Goes South

Wheat grown in Western Canada has for several years been in demand from all parts of the United States and the Old World. That the reputation of this high grade wheat is increasing is evident from the act that a Winnipeg seed company recently received an order for 500,000 bushels of seed wheat from the Argentine Republic.

The Eskimos have been described as the happiest, most contented folk in the world.

Many a successful man got his start by having a woman push him along in a go-cart.

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2.50 a year in advance. $3.00 to U.S. points.

CRESTON, B.C., FRIDAY, JULY 13

The New Grades

The following are extracts from the Fruit Act, an Act to regulate the sale and inspection of fruit and fruit containers as passed by the House of Commons on the 24th day of April, 1923. The Inspection and Sales Act Part 9, which previously regulated the sale and inspection of fruit and fruit containers in Canada has been repealed and is replaced by the above Act.

3. (2) The following shall be the grades for apples, crab-apples and pears grown in Canada when packed in boxes, intended for sale:—

(a) "Extra Fancy" which shall include only firm, mature, clean, smooth, handpicked, well-formed fruit of one variety, of good colour for the variety, free from all insect pests, disease, bruises, spray burns, limb rub, visible water core, skin punctures or skin broken at the stem, russeting, except that russeting at the basin of the stem shall be permitted and properly packed;

(b) "Fancy" which shall include only firm, mature, clean, smooth, handpicked, well-formed fruit, of one variety, of fair colour for the variety and free from all insect pests, diseases, bruises, spray burns, visible water core, skin punctures or skin broken at the stem, provided that limb rub not exceeding one-half inch in diameter, and leaf rub and russeting up to ten per cent of the surface shall be permitted, and properly packed;

(c) "C" which shall include only fruit free from infection, soft bruises and broken skin, provided that this grade may include healed over stings and scab spots not to exceed one-half square inch in the aggregate, and properly packed;

(d) "Combination Extra Fancy and Fancy" which shall consist of not less than twenty-five per cent of fruit of the quality of Extra Fancy, the remainder to be of a quality not lower than that required by the Fancy grade, and properly packed;

(e) "Combination Fancy and "C" Grade" which shall consist of not less than twenty-five per cent of fruit of the quality of Fancy, the remainder to be of a quality not lower than that required by the "C" grade, and properly packed.

In order to allow for variations incident to commercial grading; handling and packing in each of the grades mentioned in paragraphs (a), (b), (c), (d) and (e) of this subsection, ten per centum of any lot may be under the requirements of these grades.

Section 4. (5) Every person who, by himself or through the agency of another person, packs immature peaches, plums, pears, prunes or grapes intended for sale, shall cause such package to be marked, in a plain and indelible manner, in letters not less than three quarters of an inch in length, with the words "immature fruit," before it is taken from the premises where it is packed.

6. No person shall sell or offer for sale any fruit in any package in which the faced or shown surface gives a false representation of the contents of such package; and it shall be considered a false representation when more than ten per cent of such fruit is smaller in size than, or inferior in grade to, or different in variety form, the faced or shown surface of such package.

8 (1) No person shall sell or offer for sale, at original point of shipment, any fruit in any package unless such package is well and properly filled.

(2) No person shall sell or offer for sale any fruit in any package that has been repacked, unless such package is well and properly filled.

NEWS OF KOOTENAYS

Knox Presbyterian Church at Cranbrook celebrated its twenty-fith birthday on July 1st.

At Grand Forks the United Church Sunday school is taking holidays during July and August.

The new creamery to serve the dairymen of the north Okanagan will be erected at Armstrong.

A new $3000 school will be erected at Balfour, to be ready for use after the midsummer vacation.

H. Jackson, a Vernon rancher, has shown the News some fall rye that shows a growth of over seven feet.

In the Okanagan the canneries are this year paying six cents a pound for cherries, and five cents for apricots.

The Ledge claims that an unusually large number of young turkeys are being raised in the Greenwood section this year.

Fernie's city tax collections up till July 1st were $72,000, or $10,000 in excess of the payments made up till June 30, 1922.

Kaslo Women's Institute raised $90 at a recent cookery sale and entertainment and in addition received another $29 in cash donations.

Provincial constable Bella of Golden has been transferred to Greenwood, where he will work as assistant to chief constable Fraser.

James Plester, Trail's feed merchant, is putting an addition to his hay barn that will give him increased storage for five cars of hay.

Vernon is severely troubled with cattle running at large in the city and the council is raising the pound charges to $2.50 per head on all stock impounded.

Work is under way clearing the golf course at Kaslo. By the end of the month it is hoped to have a five hole course ready, and the area for the other four holes will be cleared later.

Cranbrook collected $50,000 in city taxes previous to the end of June.

At Penticton the ladies' organizations of the town are operating a rest room which is very largely utilized by women from the country whilst in town shopping.

Cranbrook has been forced to withdraw its team from the East Kootenay baseball league. Scarcity of jobs to give the imported players is the reason assigned.

400 Vancouver girls have already booked up for apple picking work in the Okanagan this season. They will get five cents a box for picking, and their board will cost them $6 a week.

July Brides

A quiet wedding took place on Saturday morning, July 7th, at Christ Church, Creston, when Miss Amy Frances Ebbutt, only daughter of Percy G. Ebbutt and Mrs. Ebbutt of Creston, was married to Percival Harold Watson, fourth son of W. S. Watson, J.P., and Mrs. Watson, also of Creston, by Rev. H. Varley, rector. The bride wore a neat sand colored suit, and after a quiet luncheon at the bride's home they left for a camping trip. The presents were very numerous and beautiful, and much appreciated by the recipients.

A July wedding of interest to Creston people was consummated at Bonners Ferry, Idaho, on Thursday morning last, when Miss Katherine Moore, who has taught Division IV. of the local school the past term, was united in marriage with Gerald Timmons, son of Mr. and Mrs. D. S. Timmons, Rev. Father Hagoy officiating. The happy couple are motoring to Los Angeles, Calif., where they will reside.

LAND REGISTRY ACT

[Section 160]

In the matter of Lots 4 and 5, Block 2, Town of Kitchener, Plan 688, Kootenay District.

Proof having been filed in my office of the loss of Certificate of Title No 2080 A to the above mentioned lands in the names of Charles Faas and William Henry Crawford, and bearing date the 15th January, 1903, I HEREBY GIVE NOTICE of my intention at the expiration of one calendar month from the first publication hereof to issue to the said Charles Faas and William Henry Crawford a provisional Certificate of Title in lieu of such lost Certificate. Any person having any information with reference to such lost Certificate of Title is requested to communicate with the undersigned.

DATED at the Land Registry Office, Nelson, B.C., this 4th day of July, A.D., 1923

A. W. IDIENS, Registrar.

Date of first publication July 13, 1923.

PILES

No one but the sufferer knows the terrible agony or the itching nature of Piles and how hopeless it seems to try for relief in ointments, injections and dilators.

Genius produces

"PAX"

Internal Pile Remedy

Pax is the prescription of a well known physician and has proved successful in hundreds of cases. Pax is internal distinct from any other treatment. Applications from the outside are futile. No ointments, injections or dilators are necessary. Pax is complete and is a vegetable remedy, contains no drugs or alcohol.

If you have not hitherto found relief do not despair, place your faith in Pax.

Except in unusually stubborn cases one box is usually sufficient.

Get "PAX" from your Druggist or if he cannot supply you send One Dollar and "PAX" will be sent you in a plain package.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished, but parties of not more than four may arrange for adjacent pre-emptions with joint residence, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 2 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptor holding Crown grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 16, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependants, acquired direct or indirect, remitted from enlistment to March 31, 1920.

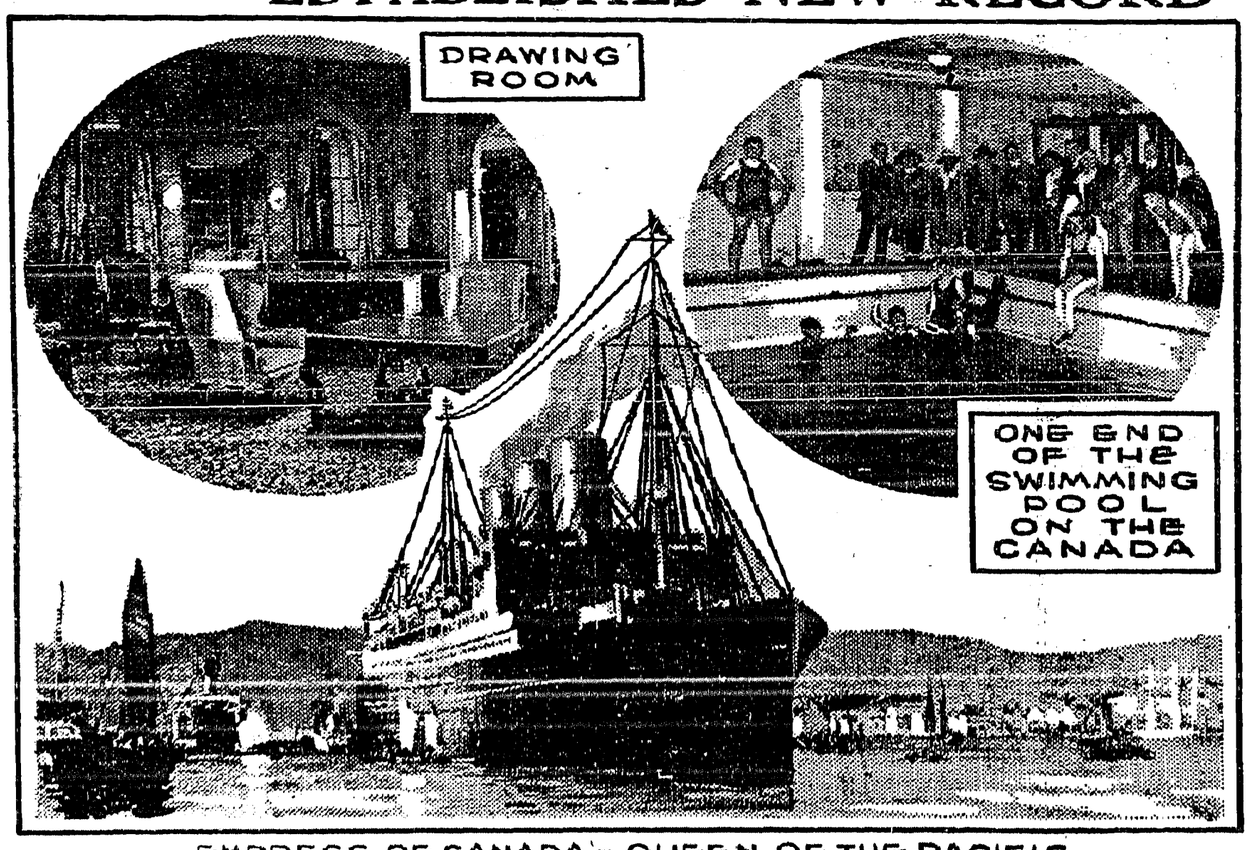
SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

EMPRESS OF CANADA ESTABLISHES NEW RECORD



EMPRESS OF CANADA - QUEEN OF THE PACIFIC

FOLLOWING the announcement that the Canadian Pacific liner "Empress of Canada" has been chosen to show the world to 500 tourists in a 30,000 mile Round the World cruise, leaving New York in January next, comes the news that this majestic vessel has added to her laurels by establishing a new trans-Pacific record. On her last eastward voyage, the "Empress of Canada" made the run from Yokohama to Vancouver in 8 days, 10 hours and 55 minutes, nearly eight hours less than the previous record which was established in 1914, and held since by the "Empress of Russia," a sister ship. The average speed of the "Canada" on her record trip was 20.6 knots per hour.

As with all Canadian Pacific liners the speed attained was no more than was compatible with safety in the opinion of the Commander of the vessel, and comfort for the passengers.

The "Empress of Canada" with a gross tonnage of 22,000 tons has accommodation for 1,765 passengers of all classes and a crew of 547. Of her cargo space a large portion has been fitted for the carriage of milk and refrigerated cargo.

The first class accommodation is indeed of the premiere classe, including luxurious suites with private bathrooms in addition to the single, double and family rooms. The staterooms are of the most modern type, a telephone system between all rooms and offices affording an additional attraction to travellers.

There is even a well appointed swimming pool on board with a gymnasium adjoining. The large lounge provides ample room for concerts and the moving pictures which are a special feature of the Canadian Pacific service. It was remembered when designing the interior of the Empress of Canada that she was for semi-tropical service and the rooms are large and airy, and the last word in marine architecture.

Captain Hailey, R.N.R., the ship's Captain is well known on both the Atlantic and Pacific, having joined the Canadian Pacific as junior officer on the "Empress of Japan" in 1900, and he is the recipient of many congratulatory messages on his distinction as Commander of the fastest and best appointed ship on the Pacific.

Creston School's Term-End Report

DIVISION I.—G. P. Smith, Principal. Rolls of Honor: Proficiency—Edward Bush. Attendance—Elmer Olsen. Deportment—Annie Smith.

Promotions to Grade VIII.—Edward Bush, Eileen Hendy, Charles Cotterill, Elmer Olsen, Alister Ross, Edith Couling, Lloyd Couling, Lily Lewis, Annie Smith, Mabel West.

DIVISION II.—Miss Vickers, Teacher. Rolls of Honor: Proficiency—William Bush. Deportment—Dorothy Ryckman and Marion McDonald. Attendance—Arthur Couling.

Promotions to Grade VII.—William Bush, Ervin Olsen, William Manuel, Clarence Staples, Marion MacDonald, Harold Speers, Dorothy Ryckman, Alex. Henderson, Lily Wilson, Louise Nickel.

Promotions to Grade VI.—Eric Martin, Arthur Couling, Verne Olsen, Norman Finlayson, Edith Wilson, Dick Randall, Mary Collis, Rophina Androsow, Fred Christie, Margaret Walker, George Phillips, Jessie Learmonth, Ena Christie, Charles Moore

Winners of MacLean Muscular Writing Certificates—William Bush, Dorothy Ryckman, Harold Speers, Louise Nickel, Alex. Henderson, Lily Wilson. As there were only ten pupils in the highest class in this room (Grade VII.) these were all who tried. Six were successful. The junior class (Grade V.) did not send in any samples of their work to Mr. McLean as they will be able to do so next term when in Grade VI.

DIVISION III.—Miss Wade, Teacher. Rolls of Honor: Proficiency—Laura Holmes. Deportment—Hirell Miller. Perfect attendance—Betty Speers, Dorothea Spratt, Aileen Spratt.

Highest standing for June: Senior Second Reader A—Laura Holmes, Jean McCreath, Ethel Lewis. Senior Third Reader B—Gwen Webster, Norma Peairs, Frank Crawford.

Promotions to Grade V., Second Term—Laura Holmes, Jean McCreath, Ethel Lewis, Aileen Spratt, Dorothea Spratt, Hirell Miller, John Blinco, Randall Payne, Lionel Downes, Arleigh Bird, Alice Ryckman, Mary Goodwin, Ada Lewis, Madeline Moore, Arthur Webster, Letty Couling, Lila Ryckman, Betty Speers, Freda Dishman, Mabel Dishman, Leah Whitman.

Promotions to Grade V., First Term—Gwen Webster, Norma Peairs, Frank Crawford Mary Small, Hazel Hopwood, Beryl Nicholls, Fritz Johnson, Jean Henderson, Euphemia Fisher, Marion Embree, Walter Nickel.

KENDALL'S SPAVIN TREATMENT

HIDDEN GOLD

— BY —

WILDER ANTHONY

Canadian Rights Arranged With Publishers, F. D. Goodchild Co., 266 King St. West, Toronto.

(Continued)

"Close call! Thanks!" Trowbridge slid his weapon back into its resting place and smiled up at her.

So close, indeed, had the call been that, coming upon the dreadful associations of the spot, Dorothy was unnerved. Her skin turned a sickly white and her lips were trembling, but not more so than were the flanks of the horses, which seemed to be in an agony of fear. When the girl saw Trowbridge pick up a withered stick and coolly explore the recesses of a small hole near which the snake had been coiled, she rebelled.

"I'm not going to stay here another minute," she declared hotly.

"Just a second. There may be another one. . . . Oh, all right, go on, then," he called out, as she whirled her pony and started off. "I'll catch you. Ride slow!"

He looked after her with a smile of amusement, before renewing his efforts with the stick, holding his bridle reins with one hand so that his horse could not follow hers. To his disappointment there seemed to be nothing in the hole, but his prodding suddenly developed an amazing fact. He was on the point of dropping the stick and mounting his horse, when he noticed a small piece of metal in the leaves and grass at the mouth of the hole. It was an empty cartridge shell.

"By Glory!" he exclaimed, as he examined it. "A clew, or I'm a sinner!"

Swinging into his saddle, he raced after Dorothy, shouting to her as he rode. In her pique, she would not answer his hail, or turn in her saddle; but he was too exultant to care. He was concerned only with overtaking her that he might tell her what he had found.

"For the love of Mike!" he said, when by a liberal use of his spurs he caught up with her. "What do you think this is, a circus?"

"You can keep up, can't you?" she retorted banteringly.

"Sure. I can keep up, all right." He reached out and caught her bridle rein, pulling her pony down to a walk in spite of her protests. "I want to show you something. You can't see it riding like a jockey. Look here!" He handed her the shell. "You see, if I had come when you wanted me to, I wouldn't have found it. That's what's called the detective instinct, I reckon," he added, with a grin. "Guess I'm some little Sherlock, after all."

"Whose is it?" She turned the shell over in her palm a little gingerly.

"Look!" He took it from her and pointed out where it had been dented by the firing pin. "I reckon you wouldn't know, not being up in fire arms. The hammer that struck this shell didn't hit true; not so far off as to miss fire, you understand, but it ain't in line exactly. That tells me a lot."

"What does it tell you?" She looked up at him quickly.

"Well," he spoke slowly, "there ain't but one gun in Crawling Water that has that peculiarity, that I know of, and that one belongs, or did belong, to Tug Bailey."

She caught at his arm impulsively so that both horses were brought to a standstill.

"Then he shot Jensen, Lem?"

Her voice was tremulous with eagerness, for although she had never doubted Wade or Santry; had never thought for a moment that either man could have committed the crime, or have planned it, she wanted them cleared of the doubt in the eyes of the world. Her disappointment was acute when she saw that Trowbridge did not deem the shell to be convincing proof of Bailey's guilt.

"Don't go too fast now, Dorothy," he cautioned. "This shell proves that Bailey's gun was fired, but it doesn't prove that Bailey's finger pulled the trigger, or that the gun was aimed at Jensen. Bailey might have loaned the rifle to somebody, or he might have fired at a snake, like I did a few minutes ago."

"Oh, he might have done anything, of course. But the shell is some evidence, isn't it? It casts the doubt on Tug Bailey, doesn't it?"

"Yes, it does that, all right. It casts it further than him." The cattleman spoke positively. "It's a clew, that's what it is. We've got a clew and we've got a motive, and we didn't have either of them yesterday."

"How do you suppose that shell got where you found it?" she asked, her voice full of hope.

"Bailey must have levered it out of his rifle, after the shooting, and it fell into that hole. You see"—he could not resist making the triumphant point once more,—"if I hadn't stopped to look for another rattler,' I never would have found it. Just that chance—just a little chance like that—throws the biggest criminals. Funny, ain't it?" But she was too preoccupied with the importance of the discovery to dwell on his gifts as a sleuth.

"What can we do about it, Lem?" She gave her pony her head and they began to move slowly. "What ought we to do?"

"I'll find this fellow, Bailey, and wring the truth out of him," he answered grimly; and her eyes sparkled. "If I'm not greatly mistaken, though, he was only the tool."

"Meaning that Moran . . ."

"And Rexhill," Trowbridge snapped. "They are the men higher up, and the game we're really gunning for. They hired Bailey to shoot Jensen so that the crime might be fastened on to Gordon. I believe that as fully as I'm alive this minute; the point is to prove it."

"Then we've no time to waste," she said, touching her pony with the quirt. "We mustn't loiter here. Suppose Bailey has been sent away?"

The thought of this caused them to urge their tired horses along at speed. Many times during the ride which followed Trowbridge looked admiringly at his companion as she rode on, untiringly, side by side with him. A single man himself, he had come to feel very tenderly toward her, but he had no hope of winning her. She had never been more than good friends with him, and he realized her feeling for Wade, but this knowledge did not make him less keen in his admiration of her.

"Good luck to you, Lem," she said, giving him her hand, as they paused at the head of Crawling Water's main street. "Let me know what you do as soon as you can. I'll be anxious."

He nodded.

"I know about where to find him, if he's in town. Oh, we're slowly getting it on them, Dorothy. We'll be ready to 'call' them pretty soon. Good-by!"

Tug Bailey, however, was not in town, as the cattleman learned at Monte Joe's dance-hall, piled high with tables and chairs and reeking with the stench, left over from the previous night, of whiskey fumes and stale tobacco smoke. Monte Joe professed not to know where the puncher had gone, but as Trowbridge pressed him for information the voice of a woman, as shrill as the squawk of a parrot, floated down from the floor above.

"Wait a minute."

Trowbridge waited and the woman came down to him. He knew her by ill-repute, as did every man in the town, for she was Pansy Madder, one of the dance-hall habitues, good-looking enough by night to the inflamed fancy, but repulsive by day, with her sodden skin and hard eyes.

"You want to know where Tug is?" she demanded.

"Yes, where is he?"

"He's headed for Sheridan, I reckon. If he ain't headed there, he'll strike the railroad at some other point; him and that—Nellie Lewis, that he's skipped with." Her lusterless eyes were fired by the only thing that could fire them: her bitter jealousy.

"You're sure?" Trowbridge persisted, a little doubtfully.

"Sure? Of course, I'm sure. Say," she clutched at his arm as he turned away,—"if he's wanted for anything, bring him back here, will you? Promise me that! Let me"—her pale lips were twisted by an ugly smile—"get my hands on him!"

From the dance-hall, Trowbridge hastened to the jail to swear out a warrant for Bailey's arrest and to demand that Sheriff Thomas telegraph to Sheridan and to the two points above and below, Ranchester and Clearmont, to head off the fugitive pair. Not knowing how far the Sheriff might be under the dominance of the Rexhill faction, the cattleman was not sure that he could count upon assistance from the official. He meant, if he saw signs of indecision, to do the telegraphing himself and to sign at the bottom of the message the name of every ranch owner in the district. That should be enough to awaken the law along the railroad without help from Thomas, and Trowbridge knew that such action would be backed up by his associates.

He had no trouble on this score, however, for Sheriff Thomas was away on the trail of a horse-thief, and the deputy in charge of the jail was of sturdier character than his chief.

"Will I help you, Lem?" he exclaimed. "Say, will a cat drink milk? You bet I'll help you. Between you and me, I've been so damned ashamed of what's been doing in this here office lately that I'm aching for a chance to square myself. I'll send them wires off immediate."

"I reckon you're due to be the next Sheriff in this county, Steve," Trowbridge responded gratefully. "There's going to be a change here before long."

"That so? Well, I ain't sayin' that I'd refuse, but I ain't doin' this as no favor, either, you understand. I'm doin' it because it's the law, the good old-fashioned, honest to Gawd, s'help me die, law!"

"That's the kind we want here—that, or no kind. So long, Steve!"

With a nod of relief, Trowbridge left the jail, well-satisfied that he had done a good turn for Wade, and pleased with himself for having lived so well up to the standards set by the detectives of popular fiction. Since Bailey had not had time to reach the railroad, his arrest was now almost a certainty, and once he was back in Crawling Water, a bucket of hot tar and a bundle of feathers, with a promise of immunity for himself, would doubtless be sufficient to extract a confession from him which would implicate Rexhill and Moran.

Feeling that he had earned the refreshment of a drink, the cattleman was about to enter the hotel when, to his consternation, he saw tearing madly down the street toward him Bill Santry, on a horse that had evidently been ridden to the very last spurt of endurance. He ran forward at once, for the appearance of the old man in Crawling Water, with a warrant for murder hanging over his head, could only mean that some tragedy had happened at the ranch.

"Hello, Lem!" Santry greeted him. "You're just the man I'm lookin' for."

"What's the trouble?" Trowbridge demanded.

"The boy!" The old plainsman slid from his horse, which could hardly keep its feet, but was scarcely more spent in body than its rider was in nerve. His face was twitching in a way that might have been ludicrous but for its significance. "They've ambushed him, I reckon. I come straight in after you, knowin' that you'd have a cooler head for this here thing than—than I have."

"My God!" The exclamation shot from Trowbridge like the crack of a gun. "How did it happen?"

Santry explained the details, in so far as he knew them, in a few breathless sentences. The old man was clearly almost beside himself with grief and rage, and past the capacity to act intelligently upon his own initiative. He had not been satisfied, he said, to remain behind at the ranch and let Wade go to the timber tract alone, and so after a period of indecision he had followed him. Near the edge of the timber he had come upon Wade's riderless horse, trailing broken bridle reins. He had followed the animal's tracks back to the point of the assault, but there was no sign of Wade, which fact indicated that he had been carried away by those who had overcome him.

FACE SORE FROM SHAVING ?

Dilute Minard's one-half with sweet oil or cream and apply once a day; heals pimples, blotches and chapped skin

MINARD'S "KING OF PAIN" LINIMENT

Pine Air is Good For Catarrh, Colds

Dwellers in pine forests never have colds, never know the meaning of Catarrh. Upon this fact is based "CATARRHOZONE," which sends into the lungs and nostrils the healing balsams and soothing antiseptic of the pine forest.

The health-laden vapor of "CATARRHOZONE" subdues the worst of coughs, colds and catarrh.

The tiniest corner of the lungs are treated, the uttermost parts of the bronchial tubes are reached, every cell in the nose and throat is bathed in the antiseptic balsam of CATARRHOZONE. Simply invaluable is CATARRHOZONE because so safe, so effective, so sure to stop huskiness, whooping cough, catarrh, nose colds or bronchitis—try it yourself.

Complete two months' treatment guaranteed, price $1.00; small (trial) size 50c. At all druggists. Refuse a substitute for CATARRHOZONE. By mail from The Catarrhozone Co., Montreal.

MRS. GERTRUDE WHITE

IF YOU ARE NOT WELL HERE IS YOUR KEY TO HEALTH!

Huttonford, Alta.—"Being run-down after the 'flu' I was in a weakened condition, had dizzy spells and shortness of breath, followed by faintness. The middle age period made things seem as though I'd never feel well again, but I was determined not to give up. Hearing of Dr. Pierce's famous Golden Medical Discovery I sent for a bottle, followed the directions, and soon felt less tired and faint, and finally I got back to my normal state. I have thanked God many times for the restoration of my health so I could remain with my family, and I gladly recommend this Discovery of Dr. Pierce's, for it is so pure, and worth a trial to any one who is run-down."—Mrs. Gertrude White, Crystal Springs Farm.

Golden Medical Discovery is put up in Dr. Pierce's Laboratory in Bridgeburg, Ont., and sold by all druggists in both tablets and liquid. Send Dr. Pierce 10c for trial package of tablets.

Write Dr. Pierce, Prest. Invalids Hotel, Buffalo, N. Y., for free medical advice.

New Land Colonizing Policy Of C. P. R.

Company Has a Meritorious Plan of Real Benefit to Western Farmers

In a statement of a new land colonizing policy of the Canadian Pacific Railway, made public recently by E. W. Beatty, K.C., President of the Company, the indebtedness of farmers who now have contracts with the company will be taken over by the Canadian Pacific Railway and their contracts will be rewritten and the indebtedness spread over a period of 34 years, the farmer to receive title to his land upon completion of the 34th payment. No annual payment of interest and principal combined shall exceed seven per cent. of the cost of the farm. Thirty thousand farmers in Canada are effected by this proposal.

President Beatty's announcement is in part as follows:

"The Canadian Pacific Railway is at all times accurately apprised of the tenor of the national mind because it is in itself one of the largest landowners in the west; because as a national organization it is vitally interested in preserving prosperity throughout the Dominion; and because it knows from past experience that its acts have constituted precedent. It unfortunately knows that in the western provinces increasing farm costs, together with low prices obtainable for farm products, have seriously affected those farmers not definitely and firmly established in their operations.

"The present position is due to several causes. During the war the high prices realized for farm produce, and bountiful crops obtaining in 1915-16, induced expenditures by farmers for extra equipment and increased land holdings, which since the decrease in value of farm produce without a similar decrease in wages or cost of living, together with crop failures in some districts, has resulted in a rapidly increasing burden of debt, and in the case of some 30,000 farmers holding land under contract for purchase from the company—through no fault of their own—they find themselves behind in their payments, and a certain amount of discouragement and depression has resulted, which, if unchecked and unremedied, must inevitably spread wider, breeding a spirit of pessimism with its many attendant evils.

"The Canadian Pacific has always been the pioneer in providing favorable terms for the colonization of its lands in the west, particularly in connection with the terms under which their lands have been sold, in the preparation of ready-made farms, the advance of livestock to settlers, loans made to them, and the aid granted through its agricultural and development departments. It is clear that the new plan will do much to re-establish confidence in the west, retain settlers who are now proposing to leave, and stimulate immensely the immigration of desirable agricultural colonists."

Production of Newsprint

The remarkable manner in which Canada is overtaking the United States in the production of newsprint is illustrated in a comparison of the figures of production since 1917. In the five-year period whilst the production of the Republic has increased from 1,359,000 tons per annum to 1,448,000 tons, that of the Dominion has increased from 690,000 tons to 1,082,000 tons.

If love would only make a man's income go round he wouldn't care anything about gyrations of the world.

Nothing so dwarfs the mind as a constant dwelling upon trivial things. —Anon.

Machine-Made Beauty

Articles Now as Artistic as Those Made by Hand

Many people share the conviction that articles made by machinery cannot be beautiful in the same sense as is enjoyed by an article which is handmade. If this conviction were correct it would mean that practically everything that we used today would be ugly. As a matter of fact, however, there is no reason why a machine-made article should not be so well designed as to appeal to the eye. The ugliness of many machine-made articles is due to the lack of attention to correct proportions and often to indifference regarding that fitness for purpose which is the real foundation of beauty. Some time ago a number of British manufacturers and artists interested in this phase of production formed a Design and Industries Association with the object of encouraging a close connection between the aesthetic and the useful in British manufactures. This association recently issued a Year Book containing a large number of examples, drawn from all sorts of industries, of designs which were not only excellent from the utility point of view, but thoroughly satisfactory in appearance. Pottery, metalware, windows, door accessories, fireplaces, motor cars, shop fronts and many other articles are illustrated, revealing an extraordinary high standard of artistic merit in British things made for everyday use.

Population of Japan

The population of Japan proper is estimated by the national census board to be 57,658,000, as compared with 55,961,140 in 1920. This shows that the population increased at the rate of 730,000 yearly, 2,000 daily, or one in every 43 seconds.

MRS. MISENER'S ACHES AND PAINS

Vanished After Using Lydia E. Pinkham's Vegetable Compound

"Branchton, Ont.—"When I wrote to you for help my action was mostly prompted by curiosity. I wondered if I, too, would benefit by your medicine. It was the most profitable action I have ever taken, I heartily assure you, for through its results I am relieved of most of my sufferings. I have taken six boxes of Lydia E. Pinkham's Vegetable Compound Tablets and a bottle of Lydia E. Pinkham's Blood Medicine, and I can honestly say I have never been so well before. I had suffered from pains and other troubles since I was fifteen years old, and during the 'Great War' period I worked on munitions for two years, and, in the heavy lifting which my work called for, I strained myself, causing pelvic inflammation from which I have suffered untold agony, and I often had to give up and go to bed. I had doctored for several years without getting permanent relief, when I started to take your medicines."—Mrs. Goldwin Misener, Branchton, Ont.

Write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments of Women." G

WORLD HAPPENINGS BRIEFLY TOLD

David Duncan, 73, famous as an educator and biographer of Herbert Spencer, is dead at Aberdeen.

The trial of the Most Rev. Dr. Tikhon, former patriarch of All Russia, has now been set for July, says a Moscow dispatch to the Daily Express.

The Saxon textile industry has decided to boycott Australian wool, owing to the discrimination against German imports into Australia.

A wireless message apparently from a vessel has been picked up at Melbourne, stating that Easter Island has disappeared.

The captain and crew of the British trawler, James Johnson, which was captured by the Soviests, has arrived at Newcastle, Eng. The captain said the Russians had imprisoned him aboard his ship for one month.

The Earl and Countess of Minto and their baby daughter, Lady Bridgett Elliott, arrived from England recently. Lady Minto was Miss Cooke, of Montreal, and she is returning to Canada to visit her parents.

The British territorial army has now reached the total strength of nearly 140,000. Northumberland contributes the largest quota with Wales, the Highlands and East Lancashire close behind.

A cable received by the Department of Agriculture from the International Institute of Agriculture states that the area sown to wheat in France is 13,660,000 acres, against 12,700,000 acres, the final estimate for 1922.

Lights Under Water

Electric Lights and Telephones to be Used in Attempt to Raise Lusitania Wreck

The divers who are attempting to raise the Lusitania will be equipped with electric lights and telephones with which to facilitate their operation in 285 feet of water. The electric lamps provided are 1000 watt incandescents and they are encased in pyrex glass which is capable of withstanding 2,000 pounds of pressure per square inch. According to nautical scientists this is equivalent to a depth of water of nearly a mile.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

Alberta Cattle Shipped to Scotland

The first cattle shipments from the Edmonton district to leave since the removal of the British embargo consisted of five carloads, which have just left direct for Scotland. The majority of the animals were fattened at the University of Alberta and the price paid for them is said to constitute a record for the season.

You should take a course in the manly art of self-defence before starting to show people the error of their ways.

Use MURINE FOR YOUR EYES Night and Morning. *Have Clean, Healthy Eyes.* If they Tire, Itch, Smart or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Soothes, Refreshes. Safe for Infant or Adult. At all Druggists. Write for Free Eye Book. Murine Eye Remedy Co., Chicago

Transforming Amsterdam

Holland's Architects Are Building Houses at Lowest Cost

Confronted with a housing shortage after the war, Holland undertook to remedy the situation with three fundamental ideas in mind, efficiency, economy and beauty.

The government gave subsidies. At first these were $1,000.00 a house; today with building material cheaper the rate is $125.00. No people are able to make money go as far as are the Dutch, even when it is public money. Jobbery seems to be practically unknown. But although the work has been done economically, Amsterdam has been transformed.

The old Amsterdam with its picturesque and narrow streets and lanes, its narrow canals in the city and its larger surrounding canals, is spreading out into new suburbs with wide roads and fine avenues and parks. Holland's best architects are co-operating with the town council to build the best houses at the lowest possible cost.

The architects concerned have taken pride in obtaining the most delightful effects with the cheapest material. It is not what housing has cost the city that they talk about, but how much it has saved the city. That is the Dutch brand of civic pride.

Old Folks Need A Mild Bowel Tonic

Constipation Best Overcome By the Occasional Use of Dr. Hamilton's Pills

DR. HAMILTON'S PILLS

Because Active, Yet Very Mild, Old Folks Prefer Dr. Hamilton's Pills

Thousand of people, young and old, stop habitual constipation by using Dr. Hamilton's Pills. This mild, yet active medicine, is noted for its promptness in restoring the bowels to a condition where they will perform their needful function at a certain time each day.

You'll improve your health, you'll eat well, digest well and look better if you regulate your system with Dr. Hamilton's Pills. 25c at all dealers.

Good Price For Cattle

At the Calgary spring show 236 Shorthorn bulls were sold for an average, price of $106; 24 Herefords brought an average of $131.73; and 23 Aberdeen Angus, $135 each.

THANKFUL MOTHERS

Thousands of mothers throughout Canada—many of them your neighbors—speak with thankfulness concerning the use of Baby's Own Tablets. Once they have used the Tablets for their little ones they would use nothing else. The Tablets are an absolutely safe medicine for even the youngest baby, being guaranteed by a government analyst to contain neither opiates nor narcotics or other harmful drugs. Concerning them Mrs. David McRobb, Divide, Sask., says:—"I have used Baby's Own Tablets and have found them so satisfactory I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Famine Coming

Russia plans to export 170,000,000 bushels of wheat next fall in order to stabilize the ruble. And the rest of the world will be called on to feed the starving Russians. — Louisville Courier-Journal.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Mining In B.C.

In its history as the mining province of Western Canada, British Columbia has produced minerals to the extent of $754,259,619. Whilst in the five-year period 1896 to 1900 the province's production was $94,547,241, in the period 1916-1920 it was $189,922,725. Production during the last ten years amounted to $336,562,897.

A Problem

Squire's Daughter (after reading letter from cottager's son).—And what will you do with the striped kimono your son says he's sending home?

Rustic Mother.—You may well ask, missie. I suppose I'll have to put it in one of pig-sties; but what I'm going to feed it on, goodness only knows.—London Punch.

Minard's Liniment relieves Burns, etc.

Keep Stomach and Bowels Right

By giving baby the harmless, purely vegetable, infants' and children's regulator.

MRS. WINSLOW'S SYRUP

brings astonishing, gratifying results in making baby's stomach digest food and bowels move as they should at teething time. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. Safe and satisfactory.

At All Druggists

A "Hundred Per Cent." School Frock From Paris

Charming, simple and in good taste, warm enough to be comfortable on chill days of early spring, yet loose enough to allow free circulation of air, and designed to be donned in a minimum of time—what more could be desired in a dress for a school girl? Such is this little frock of marine blue wool, embroidered with white "snowflakes."

Medicine Hat Keeps on the Map

Brisk industrial activity prevails at Medicine Hat. The Alberta Clay Products have received orders from two British Columbia points, which it is expected will run to about fifty cars. It is understood that the Canadian Farm Implement Company intends erecting a plant in the city during the summer.

Cheapest of all Oils.—Considering the qualities of Dr. Thomas' Eclectric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Grain Elevators In Western Canada

There are three thousand seven hundred licensed grain elevators in the three prairie provinces, with a total storage capacity of more than 100,000,000 bushels.

Repairs to Atlantic telegraph cables have often been carried out up to a depth of 3,000 fathoms.

Constipation Is Relieved

Prompt—Permanent—Relief

CARTER'S LITTLE LIVER PILLS rarely fail. Purely vegetable — act surely but gently on the liver.

Relieve after dinner distress — relieve indigestion; improve the complexion—brighten the eyes.

CARTER'S LITTLE LIVER PILLS

Small Pill—Small Dose—Small Price

Forest Preservation

Canada's Premier In An Open Air Address

Rt. Hon. W. L. M. King

"Is it reasonable that, year by year, we should permit 4,000 forest conflagrations, due for the most part to our own carelessness?"

"I appeal to every loyal citizen to play fair with the forest this year. Let us regard every acre of timber land as a source of national wealth, in the ownership of which unborn generations stand as equal partners with ourselves."

The Duty of the Hour

Swat one now and save 137,981,417,699 by midsummer.—Ottawa Journal.

She Was Sick For Over Two Years

MRS. GOODWIN GIVES HER EXPERIENCE WITH DODD'S KIDNEY PILLS

Nova Scotia Lady After Suffering With a Weak Heart and Nervousness for Nearly Three Years, Turns to Dodd's Kidney Pills.

Mulgrave, N.S.—(Special).—"I cannot recommend Dodd's Kidney Pills enough." This enthusiastic statement is made by Mrs. Alex Goodwin, a well known resident of this place.

"For nearly three years I was run down, had a very weak heart and was so nervous that at times I would almost faint away. Many people recommended Dodd's Kidney Pills for my trouble. I found, after I had taken two boxes, that they were doing me good and after using six boxes I was completely relieved. I can now do a good day's work and scarcely ever feel tired."

Mrs. Goodwin's troubles were caused by the kidneys. That's why she got such prompt and complete relief from Dodd's Kidney Pills, for they act only on the kidneys.

Ask your neighbors if Dodd's Kidney Pills do not help all forms of kidney disease.

Counting Dust Particles

It requires more than 6,000,000 tiny dust particles to cover a glass plate one inch square, according to investigators at the Structural Materials Research Laboratory of the Lewis Institute in Chicago. Although it would seem a hopeless task to count these millions of dust particles and measure their exact size, these Lekis Institute investigators have carried out a series of tests in which these operations were performed.

CATARRH

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic, taken internally, and acts through the blood upon the mucous surfaces of the system. HALL'S CATARRH MEDICINE assists Nature in restoring normal conditions.

All Druggists. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

Sanitation Prevents Typhoid

Typhoid fever as a cause of death has almost disappeared in cities, where the water supply and the sanitation can be controlled. Last year in the larger cities the death rate from typhoid fell to 3.15 to the 100,000, less than a sixth of what it was twelve years ago. Back in 1882 it was about 60 to the 100,000. The improvement has not been so rapid in rural districts, but the situation was never so bad there as it used to be in the cities.

He Had It

The Sunday school teacher had been reading about Canaan, the land flowing with milk and honey.

"Now," she said to the class, "what do you think a land flowing with milk and honey would be like?"

"Please, teacher," was the instant reply, "ottekey."

Minard's Liniment for Distemper

MRS. YOUNG GAINS THIRTY-FOUR LBS.

Declares Tanlac Restored Her When Stomach Trouble Had Almost Wrecked Health

"I weighed only a hundred and fourteen pounds, my face was sallow and sunken and I was thin as a rail. But since taking Tanlac I weigh one hundred and forty-eight, have the rosy cheeks of a school girl, and enjoy good health for the first time in fifteen years." This remarkable statement was made recently by Mrs. Bella Young, 98 Cathcart St., Hamilton, Ontario.

"The last year of my sickness I was near a nervous breakdown, and my appetite was so poor even the odor of food sometimes nauseated me. Headaches, pains in my stomach and back nearly set me wild and I would walk the floor for hours. I got so weak I could hardly stoop over to lace my shoes, and my housework was a burden.

"The Tanlac treatment gave me a wonderful appetite, built me up till friends wondered at my great change, and I always feel strong and well. I will never cease to praise Tanlac."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.

Doubles Weight in Year

Experiments With Salmon Family Disclose Interesting Information

Experiments made in England furnish interesting information regarding the rapidity of growth of fish of the salmon family during their stay in the sea.

A sea trout weighing three pounds when captured and marked, July 8, 1921, weighed six pounds when taken in July, 1922, having thus doubled in weight in one year. A thirteen-pound salmon taken and marked in January, 1921, weighed twenty-one pounds in July, 1922; and another salmon weighing sixteen pounds in August, 1921, reached the weight of twenty-two pounds when retaken in July, 1922.

An example of still more extraordinary growth has been reported. A male salmon caught at Castle Connell on February 24, 1921, weighed nineteen pounds. It was marked by one of the tags used by the Board of Agriculture, bearing the number 1,502, and replaced in the water. On March the 26th following, the same fish was retaken at O'-Brien's Bridge, five miles from Castle Connell, and it then weighed thirty-three pounds. Its weight had increased by fourteen pounds in one month and two days. The fact may seem incredible, but it is indubitable, having been established by a naval certificate.

Simple and Sure.—Dr. Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Canada Exports Sugar

One of the most important features which has occurred in the sugar industry of Canada for many years is the development of large shipments to foreign markets. During the past year the total shipments from Canadian refineries amounted to 316,651,937 pounds of refined sugar. Nearly 27 countries in all parts of the world imported Canadian refined sugar last year.

ECZEMA You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. Sample box Dr. Chase's Ointment free if you mention this paper and send 2c. stamp for postage. 60c. a box; all dealers or Edmanson, Bates & Co., Limited, Toronto.

Better Service — Lower Prices

Manager Rodgers has another of those always-favorite pictures of the northland for Saturday night in the Curwood film, "Flower of the North."

D. W. Briggs of Portland, Ore., president of Canyon City Lumber Company, Ltd., was here on his annual business visit a couple of days at the end of the week.

T. H. Crawford is a visitor at Calgary, this week where he is attending the summer fair and stampede, accompanied by his nephew Master Ben Crawford.

Mrs. C. B. Garland left on Tuesday on a six weeks' holiday visit with her parents at the coast, and to attend the wedding of her brother which takes place in that city this week.

The Valley had another rainstorm on Friday night and Saturday morning which accounted for almost a half-inch of rainfall and held up haying for a couple of days.

FOR SALE—One truck, one single wagon, one single horse mower, one horse, one pony, also parlor suite consisting of settee, rocker, chair and stand. J. Attwood, Creston.

The contract for kalsomining the interior of the four rooms of the old public school building has been let to James Adlard at $148, the work to be completed by the middle of August.

Mrs. Archibald and children arrived from Rossland on Saturday to look after the raspberry harvest on their ranch. Mr. Archibald accompanied them and remained over the weekend.

S. A. Speers is combining business with pleasure on a trip to Calgary this week, in which city the annual exhibition with stampede is under way this week. He is accompanied by Master Harold.

Rev. H. Varley had quite a busy day at his Sunday afternoon service at Christ Church for the Anglicans of the outstations, the feature of the service being no less than three christenings.

The July meeting of Creston Women's Institute tonight in the Parish Hall at eight o'clock, will be largely musical, the meeting being in charge of Mesdames Ebbutt and Staples, the institute's musical committee.

The vital statistices for June show a net gain in the Valley's population of four—two boys and as many girls. There were four weddings and no deaths. In the way of marriages this constitutes a record for Creston.

Const. J. S. Clark, R.C.M.P., who was stationed here until early this spring, and since located at Lethbridge, Alberta, is spending a short vacation with Corp. Smith, prior to going to Newgate, where he will be located in future.

W. B. Martin, Creston's C.P.R agent, is a patient in Cranbrook hospital at present. On resuming work a few days ago, after a three weeks vacation, he suffered injury from overlifting and promptly left for hospital care.

The 1923 raspberry crop commenced moving at the end of the week, Erickson growers being the first to ship these this year. The rain at the end of the week will help keep the strawberries coming for possibly another two weeks.

Revenues collected by provincial police H. McLaren for June are the lightest of the year, the total being under $300. Motor licenses were good for $109, and amusement tax collected in connection with Chautauqua accounts for another $129.

H. Gammon of Nelson, who is in charge of the provincial police in West Kootenay, spent a few days here at the end of the week, in an effort to locate the men who blew the Union safe on Thursday morning of last week, but so far no trace whatever has been obtained of the yeggs.

R. R. Piper of Cranbrook, accountant with DeWolf & Ham, the contractors on the new Kitchener road, was a business visitor in Creston on Saturday. Good headway is now being made on the new highway, but he expects it will be almost the middle of September before the job is entirely completed.

Friends of A. B. S. Stanley, who charge of the Review for a couple of years prior to midsummer, 1914, will hear with satisfaction that he has just been ordained into the ministry of the Baptist Church and will have full charge of the Trail Baptist church, and is moving Mrs. Stanley and the family to that town to reside permanently.

Official intimation has just been made that the fire equipment stored at Hosmer, and which the board of trade fire protection committee have been trying to borrow, lease or buy, is not in the custody of the department of public works and in order to secure it will be necessary to purchase or lease it from the private citizens formerly resident at Hosmer, to whom it belongs.

Dr. Henderson, the local meteorological recorder, states that the rainfall for June was 2.61 inches, which with a showing of 2.69 for May gives the Valley a midsummer moisture showing that has seldom been equalled in at least eight years. The coolest touch in June was on the 15th when the mercury got down to 38, whilst the 9th and 29th were the warmest days of the month with a heat record of 84 in the shade.

Creston is having a visit this week from J. M. Gardner, an itinerant penman and show card writer. Although well qualified to hold a position as commercial teacher in this line he prefers to see life and make his living at his trade whilst travelling across country. He has been kept very busy at all the Crow line towns he has stopped at, having been in the Cranbrook district for the past four weeks.

According to the fruit and vegetable crop report issued by the Dominion fruit commissioner covering the month of June, in the Creston district the total apple crop will be slightly less than that of last year, but more attention is being paid to the orchards and undoubtedly less "C" grade apples will be shipped. Spy, Baldwin Wealthy and King will be lighter, Cox Orange, Wagner equal; and Jonathan, McIntosh, Delicious, Gravenstein and Rome Beauty will be heavier, than 1922.

Creston had a visit on Monday afternoon from former state senator W. S. Walker of Bonners Ferry, Idaho, who motored up in company with J. B. Horner, dean of the faculty of agriculture at the state agriculture college of Oregon, which is located at Corvallis, Mrs. Horner and two daughters accompanying them. Mr. Walker is an oldtime backer of the Kootenay Flats drainage scheme and was showing Mr. Horner over the to-be drained area in both Idaho and British Columbia.

To women everywhere Spring brings all the many problems embraced in the word "hats." Not the least of these is the natural question, "Shall I wear last season's straw which only needs a different color and new trimming to suit me exactly, or shall I experiment with a new straw which may not look well on me at all?"

Why not let Elkay's Straw Hat Dye settle the question? With this inexpensive dye you can make last season's straw look new and different so quickly and easily you will wonder why you didn't try it long ago.

The results will delight you and you will save considerable toward other Spring apparel.

Elkay's Straw Hat Dye is permanent and waterproof, dries quickly to a lasting, lustrous color and actually restores life to the straw. Directions and brush with each bottle.

Select your favorite color from the following: Dull Black, Liberty Blue, Burnt Straw, Old Rose, Violet, Natural, Gloss Black, Navy Blue, Gray, Cerise, Sage Green, Cardinal Red, Yellow, Cadet Blue, Brown, Lavender.
