THE CRESTON REVIEW

Vol. XV. CRESTON, B. C., FRIDAY, OCTOBER 19, 1923 No. 37

Fruit Branch Head Inspects Orchards

"The finest Delicious apples I have seen on my trip." is the way Geo. E. McIntosh, Dominion fruit commissioner, Ottawa, expressed himself on Friday morning, after making an inspection of the orchard on the R. J. Long ranch at Erickson, in company with R. G. L. Clarke of Vancouver, the B.C. chief fruit inspector, and F. R. DeHart of Kelowna, who was here assembling the Creston fruit for the British Empire Exhibition.

Mr. McIntosh, in company with Mr. Clarke, had just completed a three-week tour of all the orchard districts of British Columbia, the former making his annual round of Canada keeping in personal touch with the industry in all its details here, his stop at Creston including a look over the Lister area.

This year, too, the fruit branch is experimenting with dehydration plants in Nova Scotia, Ontario and B.C., but unfortunately the plant at Penticton was destroyed by fire about a week before Mr. McIntosh reached that town. The experience at the other two plants, however, indicated that dehydration the better retains the natural flavor of the fruit than the evaporated product, and at present it looked as if the new process would very shortly displace the old method.

The Penticton plant will be rebuilt for next season's operations with the idea of determining the fruits most suitable for dehydration, as well as to see if the market cannot be supplied with Canadian vegetables.

Mr. Clarke expressed himsels as quite well satisfied with the way the new grades were being handled at the packing houses. He is strongly of the opinion that the most satisfactory commercial policy is to centralize the pack on the "fahcy" variety, except in the case of Delicious, and in the other varieties where the per centage of the higher grade is pronouncedly in evidence. By this method the "fancy" will become the standard for price quotations. If the "extra fancy" is gone after he expresses the opinion that such a policy will tend to give the impression that "fancy" is number two stock and the price on it will slump accordingly.

Mr. Clarke has found considerably more optimism prevalent in all the orchard districts of the province this year than last, but in the matter of crop movement, and payments already made the grower, certainly Creston Valley orchardists were quite the most fortunate of all he had visitod—and in the journey ended here had taken him all over the province.

Sirdar

Mrs. B. F. Whiteside left on Saturday for a few week's holiday visit with friends at Cranbrook and Lethbridge, Alberta.

The government dredge and tug Ondot arrived at the Landing on Saturday night and commenced dredging operations on Monday. The government engineer was here a few days earlier taking soundings.

Mr. and Mrs. Brou, who arrived here a short time ago from Manitoba, have taken up housekeeping in the Pascuzzo residence, lately vacated by C. M. Loasby.

Santo Pascuzzo and daughter Lucy, were visitors at Nelson over the weekend.

After a two week's vacation George Cam resumed work on the switch crew on Thursday night.

Mrs. and Miss McBurney of Cranbrook are spending a week here.

Mr. and Mrs. E. W. Ryckman of Creston are visitors this week with Mr. and Mrs. Jack Cameron, Ernie being busy installing a hot water system in the Cameron home.

Will Goodman spent the weekend in Cranbrook with his parents.

Mayor Daly is at Waldo, attending a meeting of the directors of the Baker Lumber Company, Limited, of which he is one of the board of directors.

Joe Lombardo was a Cranbrook visitor a few days last week, returning on Sunday.

"Red" Maxwell, who has been on the switch crew here for the past six weeks, returned to Cranbrook last week.

Dr. Henderson of Creston has made a couple of professional visits the past week, attending Mrs. Tuohey, who has been laid up with a severe cold, but who is improving nicely now.

B and B foreman Sid McCabe and crew will be busy for at least another month completing the installation of the steel apron at the slip at Kootenay Landing.

Alice Siding

Miss Alice Carr, who has been on a visit at her home here for a few days, returned to Fernie last week.

Mrs. R. Stewart is a Creston visitor this week with her daughter-in-law, Mrs. Albert Stewart, who is on the sick list.

Mr. Davies, the good roads foreman of Creston, is now a resident of Alice Siding, moving into the Mrs. Stace Smith house at the first of the week. Mrs. Smith is leaving shortly to spend the winter in the south, we hear.

Reports from Cranbrook are to the effect that Miss Marion Collis is making a satisfactory recovery after her appendicitus operation, and that she will be returning before the end of the month.

Apple picking is practically completed on all the ranches, and with the exception of the Spy the winters are a splendid crop.

Messrs. Hood and Spratt have both had cattle killed by careless hunters on the flats since the first of the month. The animal belonging to the former is reported to have been found standing dead in her tracks.

R. Stewart was rather badly shaken up in an accident last week in which a load of hay he was driving home on overturned burying him underneath and inflicting injuries that confined him to bed for a few days.

Erickson

Aubrey Kemp, who has been on a visit to his home here, returned to Wycliffe early last week.

Fred Klingensmith, who has been working at Birchbank for some time past, arrived back the latter part of the week.

L. Leveque and Melt Beam spent a couple of days duck hunting in the Sirdar section last week. At that time, however, the weather was too summery and the birds were not moving about as thick and as much as when climatic conditions are chilly.

Mr. and Mrs. Bundy are busy this week moving into the living quarters at the new Erickson depot, although regular depot business has been transacted in the new quarters since early in the month.

W. G. Littlejohn loaded out a straight car of Cox Orange Pippins this week. There were about 800 boxes in the car, which will go to Sheffield, England, via Montreal.

The Jonathans will all be cleaned up this week, and the way all varieties are moving it looks as if the early part of November will see the packing sheds closed again. The beneficial effect of careful thinning is seen in the Jonathans coming in from the Palfreyman ranch this season. It is doubtful if anything to equal them in so large a quantity has ever been shipped from Erickson.

Approximately one half of the apples arranged for by Mr. DeHart on his visit last week for display at the British Empire Exhibition, will come from this section. R. J. Long supplies the Delicious, W. G. Littlejohn the Jonathans, whilst Spitzenbergs and Rome Beauty will come from the Beam ranch. Messrs. K. Andrew and Wickstrom in the West Erickson area are also supplying some of the other varieties.

Leading Institute Worker Coming

There was quite a representative turnout of members of Creston Women's Institute at the October session on Friday afternoon with the president, Mrs. Lyne, in charge, and the meeting largely taken up with routine business.

Amongst the correspondence was a letter from Creston fall fair directors thanking the members of the Institute who had been exhibitors at this year's exhibition, and particularly those who had helped stage the exhibits on opening day. Mrs. Dunk of Nelson wrote stating that owing to unforseen circumstances her visit to the Institute to take charge of a class in dressmaking would have to be deferred for the present.

A pleasing announcement was that of the president who stated that at the November meeting of the Institute the ladies would have the pleasure of hearing Mrs. Todd of Toronto, Ontario who is at the head of the federated women's institutes of Canada.

The most important committee report was that of the better schools committee who urged that the institute provide a certain amount of first aid supplies for use at the public school in case of serious accidents to any of the scholars. The committee members are to visit the school this week to ascertain exactly what is required in this line.

For the Kootenay-Boundary Womens' Institutes annual conference in Nelson next month the delegates will be the president, Mrs. Lyne, and the secretary, Mrs. Cherrington. The meeting also named Mrs. Mallandaine to act as the local representative in connection with the work of the Oriental Research League.

This year the Institute will have its usual Armistice evening on Friday, November 16th, which will take the form of a whist drive and for the handling of which committees were named. The ladies also decided that in future the annual meeting will be held in January, rather than December, as in the past.

The tea hostesses were Mrs. M. Young and Mrs. Maxwell at which the usual collection was taken tor the crippled children's fund and to the freewill offering was added a $2 donation by Mrs. C. G. Bennett as well as the proceeds of an auction of some Norweigan pastry donated by Mrs. Nathorst. Proceedings were brightened up by a piano solo by Mrs. C. B. Garland.

Lister

Mr. and Mrs. Harold Langston arrived here on Sunday, and have taken up residence on Mr. Langston's ranch.

A. R. F. Bernhard left on Sunday for Invermere, where he will work in a mine for the winter.

H. Yerbury was a weekend visitor here at the ranch, coming in from Klockmann, Idaho, on Saturday.

Edward Langston, who has been visiting with his son, E. L., for the past week, returned to Kimberley on Sunday.

Public school inspector Manning made an official visit to the local school on Monday, and expressed himself as being well satisfied with the progress of the pupils.

St. James Methodist Church was the scene of an autumn wedding Saturday, September 22nd, at 4.30, when Miss Doris Burrows, eldest daughter of Mr. and Mrs. John Burrows, Inglewood Street, was united in marriage with Mr. Harold Langston, son of Edward Langston, Camp Lister, B.C., Rev. D. H. Telfer officiating. The church was decorated with flowers and autumn foliage, the central decoration being an arch of autumn tinted leaves. The bride was given away by her father, and was gowned in a suit of poiret twill with Paisley sand over-blouse and hat of sand crepe de chene. Her bridal boquet was of white chrysanthemums. The bride was attended by her sister, Miss Nora Burrows, who was attired in a Malay brown canton frock with gold French flowers, and picture hat to match and carried a boquet of golden 'mums. Robert Lowe was groonsman. Stanley Bligh presided at the organ playing the wedding march as the bride entered the church. The choir, of which the bride was a member, sang during the ceremony. A reception was held later at the home of the bride's parents. The table was decorated for the wedding dinner with flowers and white streamers, the wedding cake being the central decoration. After the reception Mr. and Mrs. Langston left for points in Saskatchewan on their honeymoon, after which they will proceed to their new home at Camp Lister, near Creston, B.C.—Winnipeg Daily Tribune.

Wynndel

Mrs. Owen Davidge left on Thursday last on a visit with her husband at Lumberton. They both returned on Sunday.

Mrs. Dunseth returned from Nelson last week. Mr. Dunseth is also here at present, attending to various ranch matters.

A nasty accident occurred on Wednesday last. Some of the boys were out duck hunting and while resting on a log the gun accidentally went off, the bullett striking Fred Hagen in the foot. We are glad to hear, however, that the damage is not as bad as was first thought, and that he is now doing fine.

Ed. Dewar arrived on Thursday, and is now busy weeding his brother's ranch here.

The fishermen of the district are still most enthusiastic over the black bass, and on most occasions they all return with two or three fine specimans of this family of the finny tribe.

Ashley Cooper & Sons loaded out a car of apples this week.

Mrs. J. B. Rudd returned on Thursday last from prairie points. She had a very successful trip, disposing of her apples at good prices both for domestic and fancy pack.

Canyon City

J. W. Wood has been home from Birchbank for a week, a shortage of water shutting down mill operations there. The rain this week will remedy matters and he will return at once.

Three teams and grader are making good headway on the road diversion to get around the steep grade at the school hill. From appearances the new route will be readily negotiated on high, even with a Ford.

Mr. Abbott is the first at Canyon to get a deer this season. He got one on Sunday near his own place in the Calgary Heights section.

Otto and John Johnson and L. Moberg have gone to Kitchener, where they have taken a pole contract that will keep them busy most all winter.

Apple picking is at least two thirds completed at Canyon. The rain at the first of the week halted operations otherwise the job would be completed this week.

From nearly all ranches in this section comes the report that potatoes are a light crop. Kifer and Adams have the only yields we have heard of that are even average.

Canyon City Lumber Company teams are busy hauling ties from the portable mill to the siding, and as the lumber cut at this plant will all be taken to Creston for finishing it looks as if local team owners will have no trouble getting work for their horses this winter.

Mrs. Abbott and Mrs. Burgess got quite a shaking up when thrown from their rig at Erickson one day last week the horse shying at a goat and cart driving along the road. Fortunately there was no runaway damage.

Creston Apples in Empire Exhibit

118 boxes of Creston apples—out of a total show of 550 boxes from this province—will be the local contribution to British Columbia's fruit display at the British Empire Exhibition that opens in London, England, on April 15th, remaining open until the middle of October.

F. R. DeHart of Kelowna, who is assembling the whole fruit exhibit for the federal department of trade and commerce, was here at the end of the week, making selection from the local orchards, most of which he visited in company with R. B. Staples manager Creston Growers, Limited.

The all round excellence of the Valley apples is best established in the fact that originally it was intended to take not more than sixty boxes from Creston, but after a look over the Valley—after visiting all the other orchard districts—it is quite safe to say Mr. DeHart would have gathered the whole 550 boxes at Creston had he not been otherwise instructed.

From Creston he takes 25 boxes of Spitzenberg, 25 boxes of Rome Beauty, 25 boxes of Cox Orange, 15 boxes of Delicious, with the remaining 28 boxes made up of Jonathans and other varieties. He has also taken ten boxes of pears from the Robert Stark orchard.

The apples will be shipped at the end of the week through Creston Growers, the fruit travelling in compartment boxes the same as eggs, 96 to the box, and each wrapped in oil paper to prevent scald. The whole shipment will be assembled at Kelowna from whence it goes in refrigerator to Vancouver, and cold storage ship transportation via the Panama canal, to London, where it again goes into cold storage until the fair opens, just a sufficient supply being taken out each week, or as often as necessary, to provide an always-attractive display at the big overseas exhibition.

The stuff taken is not show stuff in the ordinary sense of that term, but rather Mr. DeHart is assembling an array of average apples both as to size and color as in addition to being for a display the collecting of the fruit for this overseas effort is more particularly to ascertain the keeping qualities of the several varieties as it is just possible that next year the trade and commerce department will bonus a cold storage plant in London that will enable Canadian shippers to put their apples in storage when on arrival it is found the auction method of disposal is sure to bring a loss on immediate sale.

At the exhibition it is announced that the fruit from each province will be shown separately and placards will tell from which province each sectional display comes, but it is not at all likely each orchard district contributing to the show will be shown in any way.

Co-Operative Wheat Pools

With the abolition of the Wheat Board created under the stress of war conditions for the marketing of the wheat crop of Canada, and the unsettled state of world markets since then, the problem of marketing the wheat of this Dominion so as to bring an adequate return to the wheat growers has become more and more acute. Steps taken to revive the Wheat Board under peace conditions in 1922 and 1923 having ended in failure, despite all the efforts of the Western Provincial Governments, the farmers themselves are now engaged in the really formidable task of endeavoring to create co-operative pools to act as selling agents for all wheat consigned to them, the idea being that once these pools are successfully launched a joint selling organization will be set up to handle the export end of the business.

The first essential to the success of this new method of marketing is that at least one-half of all the wheat growers in each Province creating a pool shall by signed contract bind themselves to deliver all the wheat grown by them to the pool for a period of five years, and accept in payment therefor the average price realized in each selling season.

In a word, the proposal is that, instead of each farmer selling his wheat individually, fifty per cent. of them or more shall sell collectively. The small, pioneer farmer with only a few loads to sell, and the farmer having heavy liabilities to meet and who is therefore compelled to sell immdiately his wheat is threshed, is to be placed as nearly as possible on a basis of equality insofar as marketing is concerned with the large and well established farmer shipping wheat by the carload and who, by reason of his established position and credit, can choose the time of selling as prevailing market prices may dictate as being the most advantageous time to sell.

Under the plan proposed, instead of an enormous volume of wheat being thrown on the market under pressure by a large number of farmers early in the season, thus forcing down the price, the wheat will all pass through a co-operative pool and be handled by it so as not to "break" prices, and thus obtain the highest possible average price for all.

Whether this pooling arrangement will realize for the farmers all that is claimed for it is, of course, open to question. There are many who are skeptical, but unquestionably the vast majority of wheat growers, with the experience of the last few years fresh in their minds, are of the opinion that marketing conditions and price cannot be any worse than they have been, with the chances that they will be considerably improved under the pooling system.

There is, too, in some quarters objection to the binding nature of the contract stipulating that all wheat grown for a period of five years must be turned into the pool. However, those among the farmers most experienced in the business, and practically all the leaders in the farmers' movement and organizations are convinced after long study that a "contract" is an essential feature to success, and that a reasonable length of time is required to demonstrate the feasibility and success of the scheme. And inasmuch as those responsible for the management of the pool and the selling of the wheat must be in a position to make binding contracts with purchasers for given quantities of wheat, it stands to reason that, on their part, they must be protected by equally binding contracts for the delivery of wheat to them wherewith to fill such contracts. It is, therefore, a straight matter of business.

Under the proposed contract between the individual farmer and the pool, it is stipulated that the contract becomes binding and the pool becomes operative only in the event of at least fifty per cent. of the farmers signing up. And the signatures of this fifty per cent. must be obtained to contracts in the course of a few weeks if the pools in the various provinces are to become operative this year. There is, therefore, no time to be lost on the part of all farmers, business men, and others, who believe that this new method of marketing gives promise of success and a betterment to agricultural conditions throughout Western Canada.

Farmers are dissatisfied with present conditions, and no wonder. Business men are dissatisfied because if the farmers are not succeeding and prosperous, business in this country cannot succeed and prosper. All are in the same boat. Thousands believe the proposed pooling arrangement offers a solution, and they will not be satisfied until it has at least been given a fair trial. It would seem, therefore, to be the part of wisdom for everybody to get back of the pool, and put forth their best efforts, individually and collectively, to assist the Pool Committee to secure the necessary fifty per cent. signed contracts in good time to bring the pool into operation to handle the 1923 crop.

Airplanes Carry Supplies to Surveyors

The Air Board and the geological survey were working hand in hand this summer in connection with the delivery in of supplies to surveying parties in Northern Canada. In the past it has been necessary to bring in supplies by pack or canoe and portage from the end of the steel. Under the new arrangements, wherever possible, the airplanes of the board will take over the supplies.

Using Banff-Windermere Road

Since the opening of the Banff-Windermere road linking up the grand circle tour through the Canadian and American Rockies, there have been 1,089 cars over the road, according to a statement from the National Parks Department. Of this number nearly 500 were American. At the auto camp at Calgary 4,600 tourists have been accommodated since July 1st.

"My Hands Trembled and I Could Not Sleep"

Mr. Thomas Honey, Brantford, Ont., writes:—

"When I began taking Dr. Chase's Nerve Food, I was so nervous that when I picked up a cup of tea my hand would tremble like a leaf. I could not sleep well, could not remember things, and there were neuralgic pains through my body. After taking seven boxes of Dr. Chase's Nerve Food, however, I am in perfect health."

DR. CHASE'S NERVE FOOD

50 cents a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto

The Price of Progress

Problem of City Noises is Growing All the Time

Scientists have begun to enquire as to whether the concentration of electric wires in the cities has an influence upon the nervous system of the urban dweller. Certainly, the concentration of noises in the city has a big influence.

Every new development which brings something worth while into the lives of the people takes tribute of their peace of mind. The modern problem of city noises is a big one and is growing all the time. A crusade for more quiet is a pressing need of the times.

For Constipated Bowels Smoothest Regulator Is Dr. Hamilton's Pills

No Headache, Biliousness, Sour Stomach Where They Are Used

Fine for Constipation!

They cleanse the Liver and Move the Bowels While You Sleep

Don't stay sick or ailing! Use this grand family remedy at once. It will give you spirits, ambition, appetite, good blood, better nerves—in short, good health. You can get all this in a 25c box of Dr. Hamilton's Pills. Sold by all dealers in medicine.

B.C. Leads In Fisheries

Canada's sea fish catch in 1922 amounted in value to $20,963,234, an increase of about $1,500,000 over the previous year. British Columbia stands first among the provinces in the proportion of the value of its sea fish catch, with Nova Scotia a close second and New Brunswick, Quebec and Prince Edward Island following in order stated. The principal British Columbia catch last year was salmon, with a value of $5,045,302. The halibut catch amounted to $2,563,000.

DELICATE GIRLS NEED NEW BLOOD

Rich, Red Blood Means Health and Strength

The anaemia of young girls may be inherited, or it may be caused by bad air, unsuitable food, hasty and irregular eating, insufficient out-of-door exercise and not enough rest and sleep.

It comes on gradually, beginning with languor, indisposition to mental or bodily exertion, irritability and a feeling of fatigue. Later comes the palpitation of the heart, headaches, dizziness following a stooping position, frequent backaches and breathlessness. In a majority of cases constipation is present. There may be no great loss of flesh, but usually the complexion takes on a greenish-yellow pallor.

Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drug, are just the tonic needed to remedy this wretched state of health. Though it is not noticeable, improvement begins with the first dose. As the blood is made rich the pallor leaves the face, strength and activity gradually return and the danger of relapse is very slight.

If any symptom of anaemia appears, prudence suggests that Dr. Williams' Pink Pills should be taken at once, and the sooner they are taken the more speedily will their action improve the blood. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Plans World Trip

Portuguese Flyer Expects to Spent 280 Hours in Air

Col. Saccadura Cabral, one of the Portuguese aviators who flew from Lisbon to Rio de Janeiro, referring recently to his project of flying around the world, said his itinerary would be divded into three parts.

The first would be from Lisbon to Japan, 9,870 miles; second, Japan to Newfoundland, 7,850 miles; third Newfoundland to Lisbon by way of Fayal and Punta Delgada, 2,140 miles.

On the basis of an average speed of seventy miles an hour, the aviator would expect to spent 280 hours in the air.

"Seems to me," said the ladder, "I'm always up against it."

Whales suffer a great deal from rheumatism.

Minard's Liniment for Sprains

Gasoline From Coal

Henry Ford Conducting Interesting Experiment at Detroit

A method of burning coal twice, and thus materially reducing the cost of automobile manufacturing, has been perfected by a firm of New York chemists, and taken over by Henry Ford, according to Emil Piron, who, with his associate, V. Z. Caracristi, conducted the experiments. "The method is practicable and is a success beyond all doubt," said Piron. Mr. Ford is now engaged in constructing buildings at Detroit, where the new process will be put into operation.

One of the principal by-products will be gasoline, which can be produced at an estimated cost of six cents a gallon. Thus the joys of motoring are likely to be brought into easy reach of nearly everybody in the country, if the new process proves workable when it is actually put into operation on a commercial basis.

Each ton of coal burned by Ford under this process will produce coke—with which he can make his own steel instead of buying it as at present—motor gasoline, lubricating oil, fertilizer, creosote, gas and grease, Diron said.

In other words as each "flivver" goes through the factory, its gasoline, oil and grease will be manufactured as a side line at hitherto unheard of prices.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Show Animals Become Scarce

High Prices Are Being Obtained For Wild Beasts

Wild animals cost a good deal of money at the present time. A giraffe bring about $5,000; hippopotamuses from $2,500 to $5,000, and good lions are worth $1,250 each. The principal reason is scarcity. Post-war conditions have interfered with the pursuit of the industry of providing wild beasts, the European centre of which is at Hamburg.

John Hagenback has applied to the British authorities for permission to send a party of German animal catchers to India, and hopes to head the expedition personally. In India he will visit his old friend the Majarajah of Gwalior, from whose reserves Mr. Hagenback, in previous years, has obtained many tigers. It was the Indian dignatary's chief grief that he had no lions. Mr. Hagenback sent him eight of the kings of the animal world. The lions increased so rapidly in the thick forests that they became the terror of the entire country and caused the Majarajah much litigation and annoyance.

The most obstinate corns fail to resist Holloway's Corn Remover. Try it.

Appoint "Radio Cops"

"Radio Cops" have now been appointed by the radio telegraphic branch of the Department of Marine and Fisheries for some 22 districts throughout the Dominion, scattered all the way from North Sydney to Vancouver. It is hoped in the near future to make appointments at Sarnia, Sault Ste. Marie, Regina, Edmonton and Lethbridge.

What a grand old world this would be if opportunity knocked at a man's door as often as the bill collector!

Elementary education in England, it is estimated, will cost $165,000,000 during this year.

RED RASH ON HANDS AND BODY

Itching and Burning Terrible. Cuticura Heals.

"I was troubled with eczema on my hands and body. It broke out in a red rash and later formed sore eruptions containing water. The itching and burning were terrible. My hands had to be bandaged, and my clothing aggravated the breaking out on my body. The trouble lasted about three months.

"A friend advised me to try Cuticura Soap and Ointment. I did and found they helped me, and after using two cakes of Cuticura Soap and two boxes of Ointment I was healed." (Signed) Mrs. Russell Hendsbee, Sand Point, Nova Scotia.

Cuticura Soap, Ointment and Talcum are all you need for every-day toilet and nursery purposes.

Sample Each Free by Mail. Address: "Lymans, Limited, 344 St. Paul St., W., Montreal." Sold everywhere. Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Soap shaves without mug.

Senate Reform

Toronto Paper Would Like to See the West Put Forth a Definite Plan

The system we have is a poor one from every point of view, except that of the partizan who gets a senatorship conferred on him by the leader of his party. The man who gets the job is provided for, he has powers, privileges and perquisites, he has a nice salary for life. He can help make laws and help prevent the making of them, and the people of Canada have no control over him.

It has long been the contention of The Star that a second chamber is unnecessary, and that it should not be reformed, but abolished. Fault is found with the present chamber that it is useless at best and mischievious at worst. If you reform it, change it, strengthen it, you but take from the House of Commons some part of its effectiveness in order to put life into the second chamber. It has seemed to us that a senate that is useless is a senate at its very best. But so many people are wedded to the idea that a second chamber must be maintained or the sky would fall, and as the senate persists in its failure to rest content with merely being useless, we would like to see the west put forward a definite plan of senate reform. People throughout Canada would, we feel sure, be keen to discuss it.—From the Toronto Star.

Relief from Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes! It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

New Financial Record

A new financial record was established by Canadian houses in absorbing immediately a bond issue of $22,500,000 for additional equipment on the Canadian National Railways. The bonds carry 5 per cent. interest and run for fifteen years. None of the money was raised from outside sources.

Hundreds have found relief for Aches, Pains, Bruises and Cuts in Minard's.

MINARD'S "KING OF PAIN" LINIMENT

Always have Mustard on the table

It's not just custom that makes people take mustard with their meals. Mustard aids digestion and helps to assimilate the meats. It is a good habit to acquire. Mix it freshly for every meal.

but it must be Keen's 230

Canada's Inland Fisheries Are Shown To Be Of Considerable Importance

This summer the Dominion Government is undertaking a work of improvement and expansion of the inland fisheries of the Canadian Northwest by transferring vigorous but coarse species of fish from certain of the larger lakes to smaller prairie lakes, where there are at present no fish, in order to promote the increase of the more desirable varieties in the larger bodies of water. In the development of commercial fishing on these waters, suckers and other coarse fish have not proved sufficiently profitable to be fished, and attention has been directed to whitefish and other marketable varieties, with the result that the one has become seriously depleted and the other increased tremendously, with the situation aggravated by the fact that the suckers each year consume great quantities of whitefish eggs.

The Government is taking early precautions to safeguard the inland fishing industry of the Northwest. Fishing is only permitted in certain seasons of the year and each lake is allotted its quota of fish to be taken, and when the various companies engaged have depleted the waters to that extent, operations cease for the year. In this manner permanency is being given to an industry which has rapidly grown and has a promising future.

Though of comparatively recent origin, this fishing industry which is carried on on the lakes of Manitoba, Saskatchewan and Alberta has assumed substantial proportions. In the year 1922, Lake Winnipeg produced 1,500,000 pounds of whitefish in addition to large quantities of jackfish and tullibee. About $300,000 worth of fish is caught and marketed annually from the lakes of Saskatchewan, the species being mainly gold eyes, mullets, pike, sturgeon, trout and tullibee. Northern Alberta lakes, last year, yielded to commercial fishermen 1,750,000 pounds of whitefish, and 100,000 pounds of pickerel as well as other varieties, and exports from Edmonton amounted to 77 cars as against 69 cars in the previous year.

The fish of these northern lakes rapidly found markets in Eastern Canada and the United States and the demand is steadily increasing. Each month loads of fish packed from these inland lakes to the railhead by wagon or dog-team travel thousands of miles to New York or Chicago. Though there is no such feature as inexhaustibility about any lakes, and the number of fish in these waters is beyond computation at the present time, the Government is making wise provision to maintain them in their fertility.

Curing Hay In Damp Weather

Artificial Hay Drying Is Success In Great Britain

Making hay while the sun shines is out of date. Hay is now being grown in many parts of England by methods over which the weather clerk has no control.

In these advanced sections, the grass is gathered, perhaps in a damp state, as soon as cut and crammed into a rick in the stack yard.

An electric fan does the rest.

When the rick is built a metal cylinder is inserted so that an air cavity is formed. This cavity will serve a 30-ton rick to insure the safety of the curing and cooling process. A fan is placed in the cavity and dries out the grass and keeps it from rotting.

It is claimed that not only do the farmers save the possible loss of their crops through bad weather, but analysis shows that hay dried in the rick has a higher percentage of albuminoids and carbo-hydrates, and therefore increased feeding value.

The new method has been tried and approved by the Ministry of Agriculture and the ricks are appearing in all sections of England and Scotland.

Indignant Young Thing.—I've brought back this bathing suit. I never saw such a thing in my life. I was only in the water an hour and it had already shrunk five inches.

Modest Clerk (carefully considering the garment).—Lady, it's a good thing you came out when you did.

W. N. U. 1487

Turning to Dairying

Western Farmer Beginning to Realize That the Dairy Brings a Constant Revenue

That the west is fast turning to dairying was never more exemplified than at the recent summer fairs where inquiries for dairy cows were heard on all sides. Why is this? Because the dairy brings a constant and sure revenue. Although the price of butter fat was running lower than for some years, yet there was a reasonable return for the labor expended. Then, too, it is considered that dairying will bring greater prosperity and give more permanency to farming in the west and thus will a great country be built up on solid lines.

Many a farmer went to the west a few years ago firmly of the opinion that he could make more money growing grain than raising cattle. He had resolved never to milk cows again—at all events not for a living. It was, "good-bye dairy business" for ever—so he thought. But experience is a great teacher—not theorizer. The result is, as reported by W. F. Stephen, Secretary of the Canadian Ayrshire Breeders' Association, who has been attending the western exhibitions during July, that the prairie farmers' slogan now is, "we've got to milk cows."

Changing conditions have forced the farmer to this new policy. Wheat growing, he says, has become little less than a gamble—one good, paying crop in some localities in three to five years. "The low prices for wheat, horses, beef, wool and mutton," says Mr. Stephen, "have turned many of the producers of these to incorporate into their system of farming a few head of dairy cattle. This has created a phenomenal demand and in my many trips to Western Canada never did I find such a demand for good Ayrshire grades, as well as pure breds. Something that will give milk is wanted and of good size.

According to one naturalist who has studied the speed of bird flight, the fastest flying bird is the ganet, which can attain a speed of more than two miles a minute.

WESTERN EDITORS

C. McMurchy, Editor and Proprietor of The Herald, Saltcoats, Sask.

Making Money From Tourists

Over $200,000 Collected Yearly at Shakespeare's Birthplace

The municipality of Stratford-on-Avon, Shakespeare's home town, makes over $200,000 a year by way of small admission fees to his birthplace and other points of interest. In addition to that, much more money is made by the hotels, which are constantly filled with visitors, many of them being wealthy Americans and Canadians who spend very freely. All the tradesmen who sell souvenirs do an enormously profitable business. Then there are thousands of daily trippers who spend money.

Dairying Makes Headway

Alberta Operating Fifteen More Creameries Than Last Year

The dairy industry continues to make headway in the province of Alberta, 15 more creameries being in operation this year than in 1922. It is estimated the total creamery butter production will be about 18,000,000 pounds, 3,000,000 more than last year. There is a considerable increase in the acreage of fodder crops, particularly in corn.

The Barbary sheep is one of the thirst-resisting animals of Africa, and can exist for almost a week without drinking.

The Important Work Of Defining Boundaries Between United States And Canada

The prime importance of having the boundaries of an individual's real property accurately surveyed and defined both by marks on the ground and by description on paper, and a record of the same properly registered and acknowledged is everywhere recognized. As with the individual so, but in a correspondingly greater degree, with the nation. The duty of delimiting and marking the boundaries between Canada and the United States is now placed upon the International Boundary Commission composed of two commissioners, one representing each country.

This work is undertaken under the authority of certain treaties and conventions entered into by Great Britain and the United States. The defining of the Alaskan coast boundary was done under the Convention of 1903; the work on the 141st Meridian from the Arctic Ocean to Mount St. Elias, (the boundary between Alaska and the Yukon) under the Convention of 1906; and that on the boundary from the Atlantic Ocean to the Pacific Ocean under the Treaty of 1908.

The principal requirements of these treaties or conventions are that the land boundary shall be marked by durable monuments at frequent intervals; that the water boundary shall be referenced by monuments on the shore; that the boundary line shall be drawn by the commissioners on accurate, modern maps, and that a point report describing the boundary line, monuments, and operations shall be submitted at the close of the work.

As no maps were in existence of sufficient accuracy for the laying down of the International Boundary line, it was necessary to make them, involving the extension of a belt of triangulation along the boundary line to determine the geographic positions of the monuments and to control the topographic work. The work included the precise measurement of base lines. Levels had to be run to fix elevations and a belt was accurately mapped extending from half a mile to two miles on either side of the boundary line for its entire length. It was also necessary in places to make soundings in the water area traversed by the line.

From the Arctic Ocean, the boundary line between the United States and Canada extends south 645 miles along the 141st Meridian to Mount St. Elias, and parallels the Pacific Ocean a short distance inland and through the Portland Canal for a distance of 862 miles. Then from the entrance to the straits of Juan de Fuca, the boundary extends eastward 3,900 miles across the continent to the mouth of Passamaquoddy Bay on the Atlantic coast. The first stretch of this extends along the 49th Parallel from the Pacific Ocean to the Lake of the Woods and thence to Lake Superior, a distance of 1,668 miles, then through the Great Lakes and the St. Lawrence River for 1,250 miles and from the St. Lawrence to the Bay of Fundy, a distance of 775 miles. Of the 1,500 miles of the Alaskan boundary, 180 miles are water and so are 2,100 miles of the 3,900 miles from the Pacific to the Atlantic Ocean.

The surveys were executed throughout with a scientific accuracy befitting the boundary between sovereign states. The expense is divided equally between the two countries. The operations consist of reconnaisances, secondary, and tertiary schemes of triangulation to locate the monuments and to control the topography.

A twenty-foot sky-line was opened through the timber wherever encountered on the line, much of this work being very arduous owing to the rough, mountainous character of the country. The line proper has been marked by permanent cement and metal monuments and permanent marks have been set at triangulation points.

The work of this commission furnishes three long, accurately measured, and permanently marked bases which will serve to control future surveys and to co-ordinate existing surveys. The sections across the continent are tied to and controlled by the work of the Canadian and United States Geodetic Surveys. Part of the record of the work consists of 290 topographical maps, the preparation, engraving and printing of these being not the least formidable of the commission's tasks. The geographic positions of all monuments and triangulation stations are computed, and information is supplied on request to many federal and provincial government departments, as well as to many organizations outside of these.

Natural Resources Bulletin

Flax Seed Industry is Reaching Substantial Proportions

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa, says:

The prairie provinces during the past five years produced 5,730,000 bushels of flax seed, per year, a large proportion of which is used in the making of linseed oil. A report of production of this oil for 1920 shows that there are eight mills in Canada crushing flax seed, of which Manitoba has two, Alberta one, Ontario two, Quebec three. There were used 1,527,096 bushels of seed, from which were produced 2,627,265 gallons of linseed oil, 798,975 gallons of boiled linseed oil, and miscellaneous products, including oil cake and meal, to the value of $2,149,902. The capital invested in the industry was $2,911,634, and the number of employees 214. Last year imports amounted to but 1,173,454 pounds, whereas in 1921 there was 5,955,926 pounds imported.

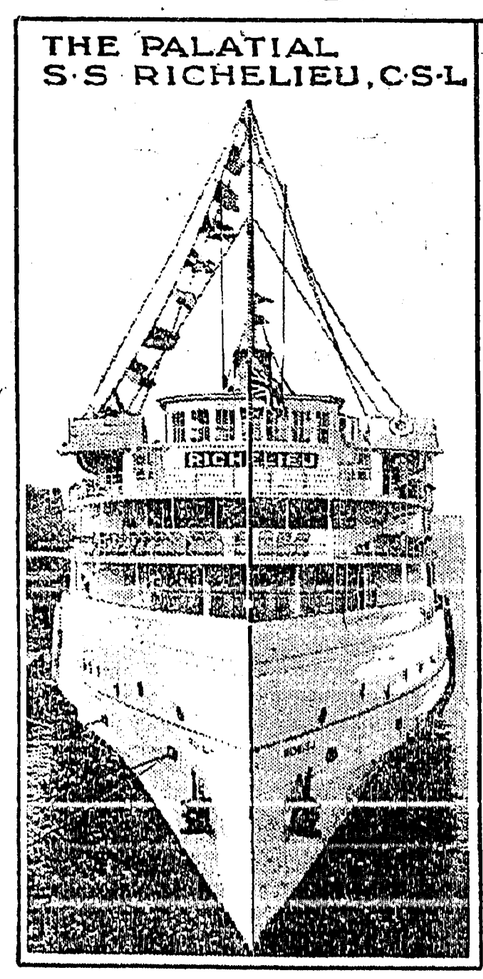
Nine Thousand More Farms

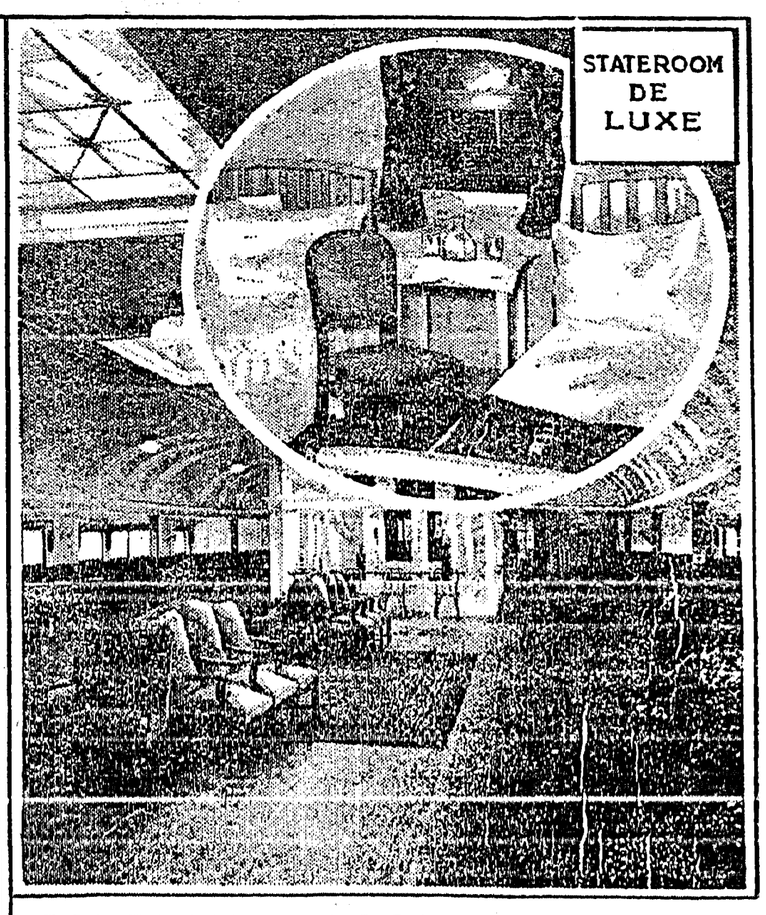
Over Fourteen Million Acres Now Occupied In Manitoba

The increase in the number of farms in Manitoba in the last decade has been about 9,000, according to census figures, or at a rate of nearly 1,000 a year. The province has now more than 53,000 occupied farms with an area of over 14,600,000 acres, the average size of the Manitoba farm being 274.2 acres. The value of all farm property in the provinces, based on the census of 1922, is placed at $656,500,961.

There are four thousand deaf and dumb people in London, and four hundred that are deaf, blind and dumb.

Floating Palace on the St. Lawrence





COMBINATION LOUNGE, DANCING & CONCERT SALOON

During the past the Canadian Steamship Lines have always been the pioneers in placing at the disposal of the public palatial river steamers, which have provided passengers with all the comforts that it was possible to obtain abroard ship. The introduction of the S.S. Richelieu into the service, however, has outclassed any previous effort on the part of the company in this direction. The S.S. Richelieu is well named. It was a great, honored and proud name in the history of France, and the company is merely perpetuating its greatness in the river steamer which bears Cardinal Richelieu's name. The vessel is not only great, but palatial, and its magnificence reflects credit on its builders, especially when considering that it is the work of Canadians. It is undoubtedly the last word in de luxe construction, and was built at Lauzon, by the Davie Shipbuilding Co.

The Richelieu is constructed along lines for the comfort of its passengers, inasmuch as the amusement and social rooms are entirely separate from the sleeping accommodation, so that the early retiring birds may secure rest without fear of being disturbed by the joviality of their fellow travellers.

Oil burner engines have been introduced, which is another step in the direction of advancement, and insures a maximum of cleanliness. Her dimensions are: Length over all, 332 feet; beam over guards, 56 feet; molded depth, 21 ft. 6 in.; steam is supplied by six Scotch cylinders triple expansion type and develop 4,500 horsepower.

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2.50 a year in advance. $3.00 to U.S. points.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, OCT. 19

Japanese Relief Coming

The sometime efficiency of Review editorials is worthily demonstrated in the announcement of a local church that it intends to give the collections of Sunday, November 28th, entirely to Japanese relief.

And to make sure that the offering will be a generous one it has also been decided that the 27th will be harvest thanksgiving Sunday, and for those who cannot attend in person facility is given for them to present their offering in advance or a day or two after the service to the church officials.

To those without the pale of this particular denomination the Review has no hesitation in certifying to the probity of the clergyman, wardens and treasurer. Contributions may be freely made them in full assurance that none of it will be nipped off for denominational use at this or the other end—or in transit. The money will go into the Red Cross fund for the purpose.

Cranbrook is another point that has been slow to do anything in this connection. At a public meeting called for the purpose a few days ago less than a dozen persons put in an appearance, and the matter was disposed of by turning the good work over to the Women's Institute, the Cranbrook ladies not having, apparently, developed as much dislike of the Oriental as the members of the Creston organization bearing the same name.

Notwithstanding, this is one of the worthiest causes Creston has been asked to help of late, and the freewill offering should be a generous one.

Redistribution Guesses

With announcement about a month ago that the first draft of the new provincial constituencies' redistribution had been completed it is but natural that considerable "inside" information should be reaching Creston as to what is to happen in this connection, more particularly in the Kootenay ridings and more especially as to where Creston Valley is likely to land in the shuffle.

The most persistent guess is that there will be no new constituency to bear the label Creston, or any similar title, in which this section would figure as electroral division headquarters.

Rossland and Trail are to be merged. To keep down the size of the combined ridings the outlying polls contiguous to Nelson will be tacked on to the latter constituency.

Kaslo town and surrounding voting centres will be merged with Slocan, and the Kaslo riding as now constituted will pass into history as Creston is foredoomed to be attached to Cranbrook.

The Review passes this out for what it is worth, with the observation that one who poses as an authority on the provincial voting assures that such an arrangement will greatly benefit the Liberal party.

The merging of these four constituencies into two ridings will eliminate two Tory members, whilst with the Kaslo vote added to Slocan Grit prospects are improved in that direction, and the polls added to Nelson are also said to be Grit for the most part, thereby strengthening the Liberal candidate in that riding.

After the Wallinger sweep in the Cranbrook bye election in August, 1922, the party managers may have decided that Cranbrook is hopelessly Tory and by giving them the normal Tory majority of Creston Valley the situation can be made none the worse.

If there is any satisfaction to be gleaned from the situation it would seem to be found in the fact that when the Dominion redistribution takes place this new order of things will place Creston Valley in East Kootenay, which just at present has cabinet representation at Ottawa.

Should the rearrangement of constituencies proceed along the lines predicted Col. Fred Lister is liable to find himself all dressed up and no place to run.

Slocan-Kaslo hardly looks likely with William Hunter threatening to develop eternal youth, whilst his only hope in Cranbrook would seem to lie in being a comprise candidate in case the prospective Wallinger-Caven-Cameron scramble for the nomination in our prospective new electoral home necessitates the bringing in of an "outside" man, for which purpose the colonel comes worthy and well qualified.

Fooling 'Em at Kaslo

"What is worth doing is worth doing well," appears to be the slogan of the local member, particularly in his platform efforts.

Everyone will recall the unexpected frankness he exhibited at the Bowser meeting here in June in telling of his inability to do anything for the riding, as well as in pointing out the much-worse conditions of local highways as compared with 1919, and even 1916, barring hard surface work.

In his opening address at Kaslo fair early in the month the colonel again shone at doing things right by assuring his hearers that the fruit display at Kaslo was even larger than the display of ths same product at Creston.

And the worst part of it is that his Kaslo hearers took him seriously, as is indicated in the following paragraph from the Kootenaian:

> Col. Lister, among his remarks at the fair last week stated that there was more fruit on display at Kaslo fair than at the Creston fair. If this is so Kaslo had a larger fruit exhibition than Creston and Nelson combined.

In looking over the list of winners at the Kaslo show we note that a grand total of twelve boxes of apples were on display. At Creston cup competitions alone brought out a total of fifty boxes, to say nothing of the single box lots.

The Review can quite believe Kaslo had a better show of fruit than Nelson, but when it comes to excelling Creston—well the colonel is carrying the joke too far and for the benefit of the Scotians in the country at the north end of the lake they might as well be told right now that the joke is on them so they will see the fun and have their laugh in the immediate future.

According to Mayor Anderson it is seemly to tell the Kaslo Scotch funny stories early in life if it is desired that the humor should become apparent to them by the time old age intervenes.

We fear the local member traded too industriously on this weakness of his hearers on this particular occasion, but outside of having swell cherries Kaslo must not be permitted to develop swelled head over its fruit production as compared with Creston Valley.

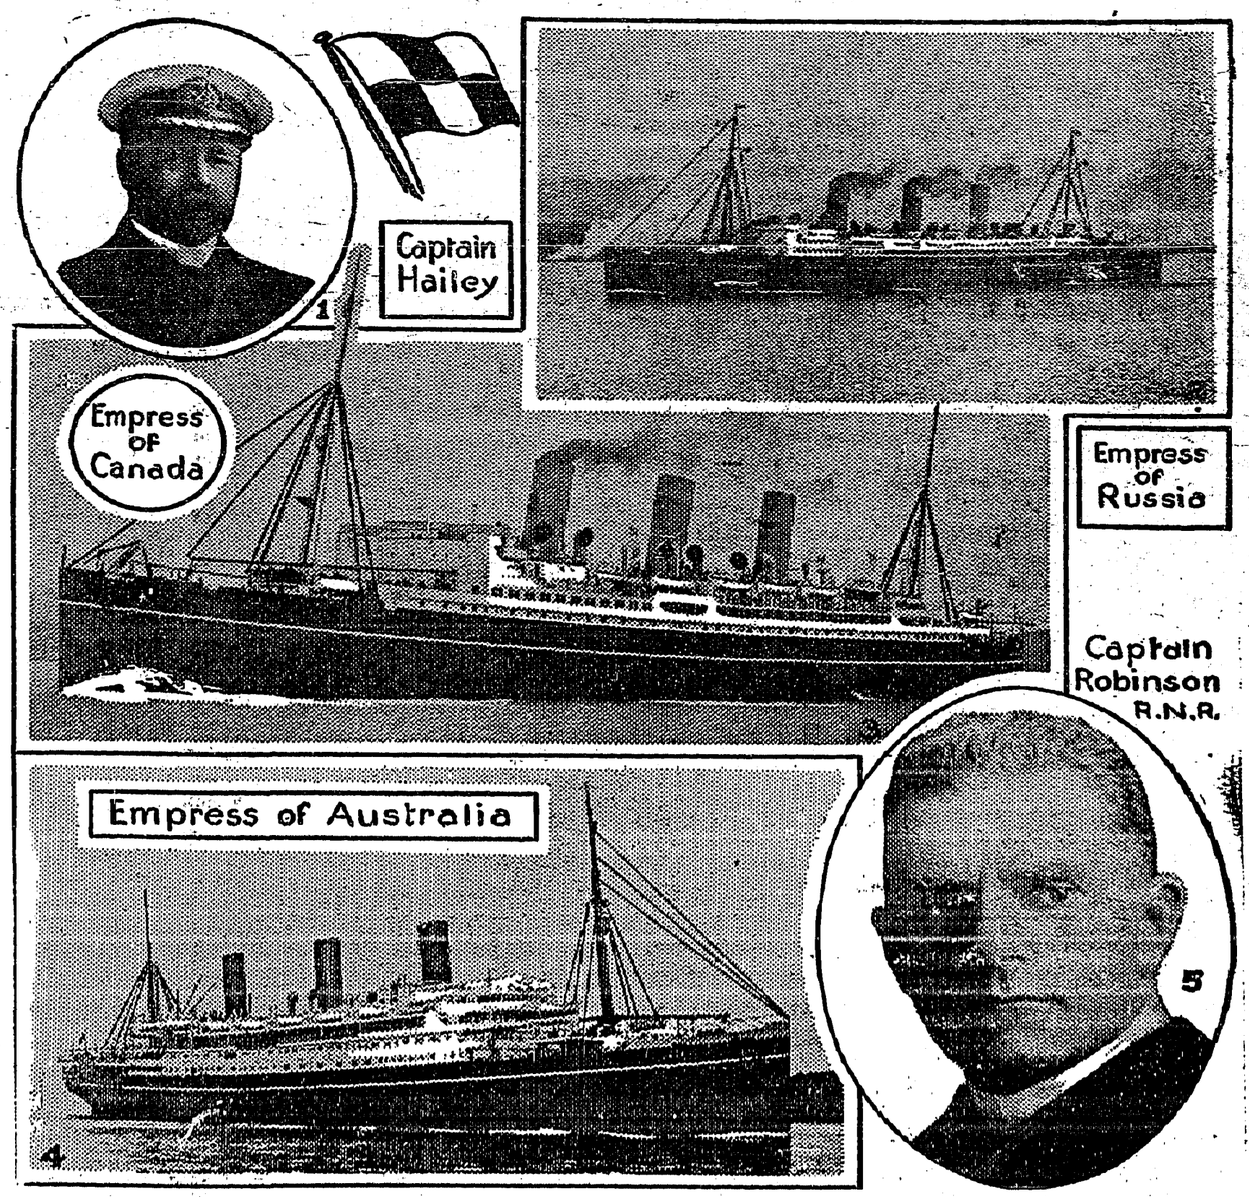
BUTTER WRAPS in any quantity at THE REVIEW



(1) Captain A. J. Hailey, R.N.R., commander of the "Empress of Canada," was born at Bradford in 1874. In 1900 he joined the Canadian Pacific and in 1910 received his first command. During the war he commanded hospital ships, notable the "Empress of India" and the "Manitoba." His appointment to the "Canada" dates back to the launching of the liner. His last accomplishment was the capturing of the Blue Ribbon of the Pacific for the fastest journey across.

(2) The "Empress of Russia" was built by the Fairfield Shipbuilding and Engineering Co., Ltd., of Glasgow, has quadruple screws and driven by steam turbines, which develop a speed of 20 knots per hour. She is a product of English best engineering and has the utmost in accommodation and luxury.

(3) The "Empress of Canada," 21,500 ton liner, was the second liner to give aid and shelter to destitutes of the Oriental turmoil. In addition to carrying about 800 passengers, she took 1,500 more on board where they received clothes and medical attention. She recently came to the limelight when she captured the Blue Ribbon of the Pacific, making the voyage from Yokohama and Vancouver in 8 days, 10 hours and 55 minutes. Her next winter program includes an elaborate cruise of the world, where she will take a limited number of globe trotters to no less than 18 foreign ports with many inland excursions included in the itinerary.

(4) The "Empress of Australia," often called the pride of the Pacific on account of her luxurious and comfortable reservations rides with a length of 588 feet and is an oil-burning vessel of a registered tonnage of 22,000 tons.

(5) Captain Robinson, R.N.R., of the "Empress of Australia," whose heroic feats on the scene of the Oriental disaster, has prompted the Spanish ambassador at Tokyo to cable the King, recommending the bestowal of a decoration. Captain Robinson is one of the most popular skippers on the Pacific and has served on Canadian Pacific ships since 1895.

GRAPHIC tales of the Oriental disaster are daily being received on this continent. Many of them contain harrowing experiences of surviving inhabitants of Tokyo, Yokohama and mountain resorts nearby, and make true the age-old adage, "Great disasters have produced great men."

Canada's participation in rescue work in the Far East was the first foreign aid to reach that stricken country and to-day the world has learned of unaccountable feats of bravery, deeds of generosity and self-sacrifice on the parts of several Canadians, who at the time of the turmoil were engaged in missionary or mercantile fields.

To Captain Robinson of the "Empress of Australia," and Captain Kent, river pilot, the country stands indebted for the rescue and care of 4,000 lives. The report goes on to state that the "Australia" was making ready to sail for Vancouver, when the city of Yokohama was seen crumbling and smothered under the tidal wave. The sea became so agitated that other ships broke loose and rammed the "Australia" injuring her propellers. In spite of such handicaps, Captain Robinson sailed his big liner to safety, where later it became the home of over 4,000 destitute survivors.

The "Empress of Canada," which happened to be one day out from Yokohama when the first despatches were flashed across the broad Pacific, wasted no time in rushing to the scene of destruction. The day was employed in providing accommodation, foodstuffs and clothes to those refugees whose need was most urgent. No less than 1,500 refugees found shelter on the "Empress of Australia" and were conveyed to Shanghai where medical attention and care are being provided by the authorities.

With every available inch of her cargo space crammed with foodstuffs for the earthquake stricken thousands of Japan, the "Empress of Russia" sailed from Vancouver on September 6th. Owing to her superior speed, the "Empress of Russia," included in a fleet of three relief ships now under way, is expected to be the first to reach Japan on September 17th.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $3.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Furthermore pre-emptions abandoned but parties may not move from four miles adjacent for adjacent pre-emption with prior residence, but each must make necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-empter is occupying not less than 5 years, and has made proportionate improvements, he may, because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvements to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less time 3 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-empter holding Crown Grant may record another pre-emption. If he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Material boy Meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchase price, is made.

PRE-EMPTORS' FREE GRANTS ACT.

The scope of this Act is enlarged to include all persons living and serving with His Majesty's Forces. The time within which the heirs or devisees of a deceased pre-emptor may apply for title under this Act is extended from for one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is also made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 30, 1918. Taxes are remitted for five years.

Provision for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31, 1920.

SUB-PURCHASERS OF CROWN LANDS.

Provision made for issuance of Crown grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfilment of conditions of purchase, interest and taxes. Where sub-purchasers do not obtain whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1923.

GRAZING.

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock-owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers, up to ten head.

Oathbound

"Oathbound," a picture produced by William Fox, with Dustin Farnum as the star, showing at the Grand, Saturday night for its first local showing, is a story of real interest and a romance of exceeding charm. Dustin Farnum, like his brother William, is an actor of peculiarly virile force and a pleasing personality. In "Oathbound" he has a role that displays these characteristics to great advantage. His success, like that of the photoplay, was instantaneous and emphatic.

The story is that of a ship owner who attempts to capture a band of smugglers and river pirates. He details his brother to assist him in running down the thieves. Much mystery surrounds the identity of the "dock rats" and scenes showing them making off with their plunder are more than exciting. A speed boat race between "Miss Los Angeles II," William Farnum's speed boat which won the Pacific coast trophy, and "Rip" one of the fastest motor boats in the world, is a real thriller. To add an additional touch of excitement a hydroplane takes part in the race. This race is one of the most sensational that has ever been shown here.

NEWS OF KOOTENAYS

Cranbrook Methodist Church was 24 years old on October 7th.

There is still a debt of $460 on Rossland's $1600 tourist park.

The Fifteen Hundred Club at Kaslo now has a membership of well over 1300.

The Elks lodge at Kelowna is presenting that town with a hospital auto ambulance.

The Graham evaporator at Vernon expects to handle almost 1000 tons of apples this season.

Ledge: One of the seven wonders of the world is how one Greenwood gossip remembers it all.

Grand Forks apple butter factory has resumed operations. Plum jam will also be made this year.

The scholars at Coal Creek school, near Fernie, last week raised a little over $20 for Japanese relief.

Foul brood is responsible for a considerable shortage in the honey output in the Okanagan this season.

Women's Institute members at New Denver are taking a course of instruction in basket making.

Penticton expects to have $40,000 of uncollected taxes, and irrigation service rates at the end of the year.

In order to attract visitors earlier in the season Penticton is talking about an apple blossom festival for next May.

R. W. Edmondson of Cranbrook has produced an 18-inch sunflower head that he estimates has 7000 seeds in it.

J. H. Owen of Trail has invented a hand soap that is equal to Snap for ridding one's hands of oily accumulations.

Cranbrook has amended its trades license by law and in future banks in that town will pay a license fee of $250 a year.

The Herald is demanding the erection of a new jail at Penticton. Two birds have flown the coop there inside a year.

Cranbrook council has been petitioned to spend $6000 on a new ice rink that the curling club will lease at $350 a year.

65 of the no speak English residents of Trail are taking two nights a week night school instruction in Canadian language.

To date not enough young ladies have enrolled to make it possible to start the night school classes in dressmaking at Trail.

A fish hatchery will be operated at Nelson this winter and the young stock planted in many of the streams in the Kaslo district.

A record at church going was made at Greenwood last Sunday when 70 adults were in attendance at a Presbyterian rally day service.

In Cranbrook's sunflower competition Joe Palmer deserves a place in the hall of fame with one that developed a leaf 21½ inches wide.

When the work near Elko is complete 6000 additional horsepower will be added to the capacity of the East Kootenay Power Company plants.

The Ledge complains that the childrrn of Greenwood are altogether too accurate when shying stones at electric light globes on the streets of that town.

Vernon News: It is doubtful if any country in the world could provide more glorious weather than that experienced in the Okanagan during September.

According to the Miner mining properties at Rossland are now in better shape to operate than at any previous time in the history of the industry there.

The hot summer brought good business to the Y.M.C.A. at Cranbrook. According to the annual report just issued there were 2016 baths taken at the swimming pool.

H. E. Baynes of Cranbrook has shown the Courier one of his potatoes that weighs two and a half pounds, and he has two others that go one and three-quarter pound each.

It may cost as high as $40,000 to complete repairs of the damage done at the Vernon electric station when a fly wheel on the big engine burst, wrecking things generally.

At Fernie the church pastors are being canvassed to have them cancel their morning service on Armistice Day so as to assure a large turnout at the soldiers memorial exercises.

Only six people turned out at Cranbrook at the meeting to organize for Japanese relief, and the half dozen kindly decided to allow the good work to be done by the Women's Institute.

The Okanagan branch of the B.C. Poultrymen's Co-Operative Exchange has gone out of business. Egg producers in the north part of the district absolutely refused to live up to their signed contracts.

Teamsters at Cranbrook are so careless that there is great complaint in that city that dead cats sometimes fall off loads of garbage causing an aroma that is complained of by passengers on trains entering that city.

By putting all users on meters Penticton hopes to be able to head off the present demand for a bigger water supply. Part of the system is now metered and in that area the consumption of wetness was much less than before meteres went in.

CHAPTER XXII.

Church-Going Clothes

After his few words to Dorothy the wounded man lapsed again into coma, in which condition he was found by the physician, who returned with Santry from Crawling Water. During the long intervening time the girl had not moved from the beside, though the strain of her own terrible experience with Moran was making itself felt in exhaustive fatigue.

"Go and rest yourself," Santry urged. "It's my turn now."

"I'm not tired," she declared, trying to smile into the keen eyes of the doctor, who had heard the facts from the old plainsman as they rode out from town.

Wade lay with his eyes closed, apparently in profound stupor, but gave signs of consciousness when Dr. Catlin gently shook him. Dorothy felt that he should not be disturbed, although she kept her own counsel, but Catlin wanted to see if he could arouse his patient at all, for the extent of the injury caused by the bullet, which had entered the back in the vicinity of the spinal cord, could be gauged largely by the amount of sensibility remaining. The wounded man was finally induced to answer monosyllabically the questions put to him, but he did so with surly impatience. The physician next made a thorough examination, for which he was better fitted than many a fashionable city practitioner, by reason of his familiarity with wounds of all kinds.

When he arose Santry, who had watched him as a cat watches a mouse, forced himself to speak, for his throat and mouth were dry as a bone.

"Well, Doc, how about it?"

"Oh, he won't die this time; but he may lie there for some weeks. So far as I can tell the bullet just grazed the spinal cord, and it's the shock of that which makes him so quiet now. A fraction of an inch closer and he would have died or been paralyzed, a cripple, probably for life. As it is, however, barring the possibility of infection, he should pull through. The bullet passed straight through the body without injury to any vital organ, and there is no indication of severe internal hemorrhage."

Santry moistened his lips with his tongue and shook his head heavily.

"What gets me," he burst out, "is that Gawd A'mighty could 'a' let a skunk like Moran do a thing like that! And then"—his voice swelled as though the words he was about to utter exceeded the first—"and then let the varmint get away from me!"

Dr. Catlin nodded sympathy with statement and turned to Dorothy. She had been anxiously searching his face to discover if he were encouraging them unduly, and when she felt that he was not stretching the facts a tremendous weight was lifted from her mind.

"You are going to stay here?" he asked.

"Yes; oh, yes!" she answered.

"That's good." He opened his medicine case and mixed a simple antipyretic. "I'll explain what you're to do then. After that you better lay down and try to sleep. Wade won't need much for some days, except good nursing."

"I'm not tired," she insisted, at which he smiled shrewdly.

"I'm not asking you if you're tired. I'm telling you that you are. Those nerves of yours are jumping now. You've got our patient to consider first, and you can't look after him unless you keep well yourself. I'm going to mix something up for you in a few minutes and then you're going to rest. A nurse must obey orders."

He explained to her what she was to do for the patient and then gave her something to offset the effects of her own nervous shock. Then counseling them not to worry too much, for there would be no fatal result if his directions were followed, the physician mounted his horse and rode back to town. Such journeys were all in the day's work to him, and poor pay they often brought him, except as love of his fellow-men rewarded his spirit.

During the long days and nights that followed, Dorothy scarcely left Wade's bedside, for to her mother now fell the burdens of the ranch household. From feeling that she never would be equal to the task of caring for so many people, Mrs. Purnell came to find her health greatly improved by her duties, which left her no opportunity for morbid introspection.

Santry, too, was in almost constant attendance upon the sick man, and was as tender and solicitous in his ministrations as Dorothy herself. He ate little and slept less, relieving his feelings by oaths whispered into his mustache. He made the ranch hands move about their various duties as quietly as mice. Dorothy grew to be genuinely fond of him, because of their common bond of sympathy with Wade. Frequently they sat together in the sickroom reading the newspapers, which came out from town each day. On one such occasion, when Santry had twisted his mouth awry in a determined effort to fold the paper he was reading without permitting a single crackle, she softly laughed at him.

"You needn't be so careful. I don't think it would disturb him."

The old fellow sagely shook his head.

"Just the same, I ain't takin' no chances," he said.

A moment afterward he tiptoed over to her, grinning from ear to ear, and with a clumsy finger pointed out the item he had been reading. An expression of pleased surprise flooded her face when she read it; they laughed softly together; and, finding that he was through with the paper, she put it away in a bureau drawer, meaning to show that item some day to Gordon.

Under the care of Dr. Catlin who rode out from Crawling Water each day, and even more because of Dorothy's careful nursing, the wounded man was at last brought beyond the danger point and started on the road to health. He was very weak and very pale, but the one danger that Catlin had feared and kept mostly to himself, the danger of blood-poisoning, was now definitely past, and the patient's physical condition slowly brought about a thorough and complete recovery.

"Some of it you owe to yourself, Wade, as the reward of decent living, and some of it you owe to the Lord," Catlin told him smilingly. "But most of it you owe to this little girl here." He patted Dorothy on the shoulder and would not permit her to shirk his praise. "She's been your nurse, and I can tell you it isn't a pleasant job for a woman, tending a wound like yours."

"Is that so?" said Dorothy, mischievously. "That's as much as you know about it. It's been one of the most delightful jobs I ever had."

"She's a wonderful girl," said Wade, with a tender look at her, after they had laughed at her outburst.

"Oh, you just think that because I'm the only girl around here," she blushingly declared, and the physician kept right on laughing.

"There was another girl here once," said Wade. "Or at least she acted somewhat differently from anything you've done lately."

He was well enough now to receive his friends on brief visits, and Trowbridge was the first to drop in. Dorothy did not mind having Lem, but she was not sure she enjoyed having the others, for she had found the close association with Gordon so very sweet; but she told herself that she must not be foolish, and she welcomed all who came. Naturally so pretty a girl doing the honors of the house so well, and so closely linked with the fortunes of the host, gave rise to the usual deductions. Many were the quiet jokes which the cattlemen passed among themselves over the approaching wedding, and the festival they would make of the occasion.

"Well, good-by, Miss Purnell," said Trowbridge one day, smiling and yet with a curiously pathetic droop to his mouth.

"Miss Purnell?" Dorothy exclaimed, in the act of shaking hands.

"That's what I said." He nodded wisely. "Good-by, Miss Purnell." Refusing to be envious of his friend's good fortune, he laughed cheerily and was gone before she saw through his little joke.

The next afternoon she was reading to Gordon when the far-away look in his eyes told her that he was not listening. She stopped, wondering what he could be dreaming about, and missing the sound of her voice, he looked toward her.

"You weren't even listtning," she chided, smilingly.

"I was thinking that I've never had a chance to get into those church-going clothes," he said, with a return of the old whimsical mood. "But I look pretty clean, don't I?"

"Yes," she answered, suddenly shy. "Hair brushed? Tie right? Boots clean?"

To each question she had nodded assent. Her heart was beating very fast and the rosy color was mounting to the roots of her hair, but she refused to lower her eyes in panic. She looked him straight in the face with a sweet, tender, cool gaze.

"Yes," she said again.

"Well, then, give me your hand." He hitched his rocker forward so as to get closer to her, and took both her hands in this. "Dorothy, I've got something to tell you. I guess you know what it is." Her eyes suddenly became a little moist as she playfully shook her head. "Oh, yes, you do, dear but I've got to say it, haven't I? I love you, Dorothy. It sort of chokes me to say it because my heart's so full."

"Mine is, too," she whispered, a queer catch in her voice. "But are you sure you love me?"

"Sure? Why, that other was only . . ."

Withdrawing her hands from his, she laid her fingers for an instant on his lips.

"I want to show you something," she said.

She went to the bureau, and taking out the paper which she had hidden there, brought it to him. It was a moment before she could find the item again, then she pointed it out. They read together, as she and Santry had done the first time she had seen it. The item was an announcement from the Rexhills of the engagement of their daughter Helen to Mr. Maxwell Frayne.

Dorothy watched Wade's face eagerly as he read, and she was entirely content when she saw there no trace of his former sentiment for Helen Rexhill. He expressed genuine pleasure that Helen was not to be carried down with her father's ruin, but the girl knew that otherwise the news had left him untouched. She had always thought that this would be so, but she was comforted to be assured of it.

"Why, that was only an infatuation," he explained. "Now I'm really in love. Thank Heaven, I . . ." When she looked at him there was a light in her glorious violet-shaded eyes that fairly took his breath away.

"Hush, dear," she said softly. "You've said enough. I understand, and I'm so . . ."

The rest was lost to the world as his arms went around her.

The End

WANTS TO HELP OTHER WOMEN

Grateful for Health Restored by Lydia E. Pinkham's Vegetable Compound

Toronto, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for backache and for weak and dreary feelings caused by my condition. Sometimes I felt so bad that I couldn't do my housework. My neighbor told me of your medicine and I read about it in the 'Toronto Telegram' and thought I would take it. I got very good results. It built me up and I have told several friends what it has done for me. You may use this testimonial as it may be of help to some one who has suffered as I have."—Mrs. J. LEE, 25 Harvie Ave., Toronto, Ont.

Mrs. Lee is willing to write to any girl or woman suffering from such troubles, and answer any questions they may like to ask.

Women suffering from female troubles causing backache, irregularities, pains, bearing-down feelings and weakness should take Lydia E. Pinkham's Vegetable Compound. Not only is the worth of this splendid medicine shown by such cases as this, but for nearly fifty years letters like this have been received from thousands of women.

You might be interested in reading Mrs. Pinkham's Private Text-Book upon the "Ailments of Women." You can get a copy free by writing the Lydia E. Pinkham Medicine Co., Cobourg, Ontario. G

Makers Of Violins

Bavarian Village Turns Out Bulk of World's Supply

In the village of Mittenwald, in the heart of the Bavarian highlands, live the men who manufacture the greater part of the world's supply of violins. Mittenwald has taken the place of Cremona. Of the 1,800 inhabitants of the village, over 800 are exclusively occupied with the manufacture of violins, and the output reaches 50,000 violins per annum. They are exported to all the countries of the world. Each family of violin makers has its own particular trade secret, a sort of trick of the trade, handed down from father to son, but for general instruction in violin making an interesting school is carried on in the village.

What He Wanted to Know

A Scottish farmer met his minister one day and said: "I see ye hae got back frae the Holy Land, sir." "Yes, John," was the reply; "back again, safe and sound, as you see." "Man, I've often thocht," said the farmer, "I wad like to hear o' that place frae ane who has 'seen the country." "Well," was the reply, "I saw Lebanon, Jerusalem, Jericho, and the Jordon, and was up Mount——" "Excuse me interrupting you," said the farmer; "but if it's a fair question, hoo were the turnips lookin' about the Jordan an' the Dead Sea?"

Keep it ready to serve at home

When it is ice-cold, nothing else is so sure to please—at home parties, when unexpected guests drop in and for just the family. And nothing is more convenient to serve—ordered by the case from your dealer like groceries, and a few bottles kept on ice in your refrigerator.

More and more a favorite every year for 22 years—since the first Canadian plant was established in Toronto in 1901.

Choicest products from nature make it wholesome. Our sanitary plant, with sterilized bottles, makes it pure.

Drink

THE COCA-COLA COMPANY
Toronto, Montreal, Winnipeg, Vancouver

Japs Object to Private Radio

Military Officials Fear Confidential Messages Would Be Deciphered

Efforts of a private wireless corporation to popularize radio in Japan are being met by the opposition of Japanese military authorities.

Officials of the military department fear that should a private wireless tower be erected official messages of a strictly confidential nature would be picked up and deciphered. The opposition has relaxed somewhat, however, following the undertaking of the company to instruct its operators to make no effort to tune in on the government radio and to dismantle its plant and voluntarily go out of business should this agreement be broken.

The promoters of the radio in Japan believe they can convince the authorities that such a project as they contemplate would bring immense benefits to the Japanese people in the form of entertainment, education and culture, and that for this reason their plans should be allowed to progress without interruption.

Gin takes its name from Geneva, where it was first distilled.

Great Soldier and Hero

Justice and Courage Were Qualities of Sir John Moore

A statue of General Sir John Moore was recently set up in the town of Shorncliffe, Kent, England. It will remind Britishers of a fine man and a hero, but it is an emblem of something more, of something that has made Britain great—goodness, justice and courage—qualities which met in the heart and soul of the great soldier. The story of his deeds at Corunna is forever set in our minds by the fine poem, "The Burial of Sir John Moore."

It is not alone for his war record however that he is enshrined in the hearts of his countrymen. He is remembered above all things as a reformer of the army, one who swept away wrongdoing, injustice and brutality from the regiment with which he had to deal, and one who, in his own life, was a model of the discipline he imposed.

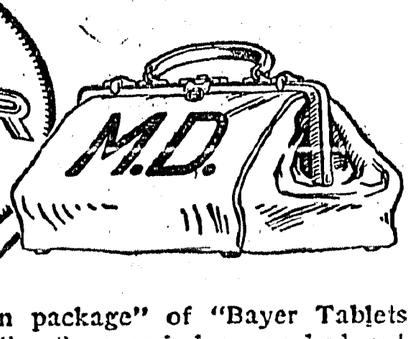
Don't wait until tomorrow to neglect today.

A bore is a man who has nothing to say and insists upon saying it.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

BAYER

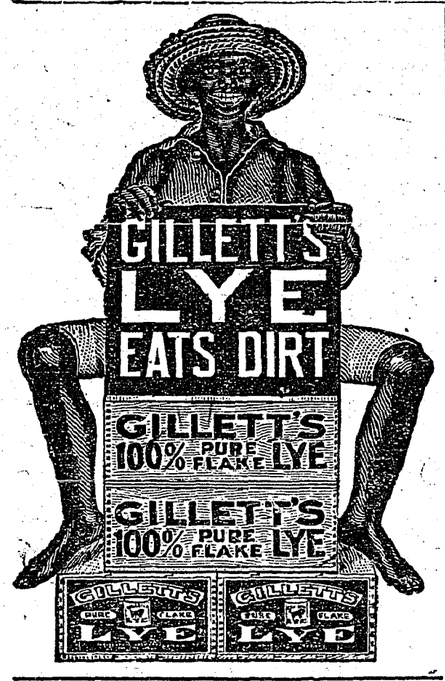


Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."



WORLD HAPPENINGS BRIEFLY TOLD

Wages of miners in the Ruhr pits are to be increased 245 per cent. The increases are to go into effect immediately and be retroactive from August 6.

Only five passengers of the 1,186,479,000 carried on English railways during 1922 were killed in accidents. This is one passenger in every 237,000,000.

More than 500 passengers on the Empress of Canada, which docked at Victoria, B.C., told of having to take shelter from two typhoons just before leaving Hong Kong.

More than one hundred persons were drowned, about one hundred persons killed and injured ashore, and about fifty junks and sampans capsized during a typhoon at Macao, China.

Food rationing similar to that of war days was inaugurated in Glenenkirchen by the German authorities owing to scarcity of meats, fats, potatoes, milk and other essentials.

In a battle with rum pirates on board his schooner, the J. Scott Hankansen, out of Nova Scotia, Captain Arthur Moore, of Weymouth, N.S., was shot and probably fatally injured.

Russia has exported 600,000 tons of grain so far this year, according to statistics compiled at Hamburg, whereof Germany has taken over two-thirds.

Commencing with the sailing of the Canadian Winner on October 29 from Vancouver, the Canadian Government Merchant Marine will inaugurate a new monthly service between Vancouver and Avonmouth, England.

Tom Moore, President of the Trades and Labor Congress of Canada, has been named by the Executive Council of that body to represent Canadian labor at the International Labor Conference in Geneva in October.

Ismet Pasha arrived in Constantinople from Lausanne, where for several months he had been engaged in the pourparlers which led to signing of the treaties with the Allied powers and the United States. He was acclaimed by the populace. The city was elaborately decorated and beflagged, and there was special illumination in his honor.

How British Bagged 13 German U-Boats

Vice-Admiral Keyes Has Revealed Another War Secret

A war secret involving the destruction of thirteen German submarines was revealed at Folkestone by Vice-Admiral Sir Roger Keyes, when he was presented with the freedom of the borough. Sir Roger said that in October, 1917, a German submarine which had been blown up in Waterford Harbor, was raised, when most valuable information was found on her. There were details as to how German submarines got under or over the mine barrage across the Straits of Dover. The Admiralty then established a long line of small craft, manned by 150 fishing crews. The result was that thirteen German submarines were soon lying at the bottom of the channel between Folkestone and Cape Griz Nez.

Previously the losses of English merchant vessels had amounted to 70,000 or 100,000 tons per week, but as a result of this operation that was reduced by five or six thousand tons per week.

For Aches, Pains
The Safe Home Remedy

NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats sore from coughing, quick results always follow a vigorous rubbing with good old Nerviline. If it's Cramps, Colic, Diarrhoea, Nerviline is a wonderful friend; it brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline."—35 cents at all dealers.

Celebrates Tenth Anniversary

The tenth anniversary of the establishment of the Ogilvy Flour Milling Company's plant at Medicine Hat, was recently celebrated. The plant now turns out 2,500 barrels of flour a day when running full time. Since the commencement of operations and up to the present time the company has shipped out over five million barrels of flour.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

Problems Of Moving Huge Grain Crop

Distribution of Grain Cars is Important to Every Shipper

The handling and distribution of grain cars plays an important part in the movement of the wheat crop of Western Canada both eastward and westward to the world's markets. Without the first provision and constant supply of necessary box cars, the farmers' wheat cannot be moved, and the methods by which movements of both loaded and empty cars are kept under constant surveillance by Canadian National Railways officials in Winnipeg are of general interest to the people interested in the growing or handling of grain.

The movement of the grain crop each year is perhaps the biggest problem which railway officials must face, and with the constantly increasing grain haulage business of the Canadian National Railways, new problems arise each year for which solutions must be found in order that there may be no delay in getting the grain to market. With slight variations from year to year, the grain crop of Western Canada begins to move toward the markets of the world about the first of September, but preparations for this movement are begun by the Canadian National Railways many months before this.

Engines and cars are mobilized and inspected and necessary repairs made to both motive power and rolling stock, which is later assembled and then distributed through the west according to the needs of the different areas to be served. This year the Canadian National Railways are in a better position to handle the flow of grain than ever before from the standpoint of cars and power available, and all preparations have been made so that the movement once begun, will continue without a hitch until all demands have been met.

Minard's Liniment for Headache

For the Motor Trip

This semi-sports tailleur presents the new set in sleeve, a full under arm line and beautifully embroidered pockets.

More Trees On Prairies

Will Make Great Difference to Welfare Of People

Remarkable progress is being made by the tree line in its natural advance upon the prairies is the cheering news to westerners contained in the statement of Mr. Arch Mitchell in charge of the Canadian Forestry car from Ottawa.

To the Edmonton Bulletin, Mr. Mitchell said: "The tree line of aspen park land has advanced from 60 to 100 miles in the last dozen years, and the general effect on the welfare of the people will be great." Following in the shelter of the aspens are the evergreens and today spruce may be found growing in bluffs on the prairies quite forty miles from any others of the species.

Change of Water
Change of Diet
Change of Climate
Cause DIARRHOEA

Mr. Fred Palmer, 217 Dalhousie St., Brantford, Ont., writes:—"When I first went out to the North-West the water played havoc with my bowels, and being in a remote spot I could not get anything to give me relief for any length of time.

I wrote and told my wife about the time I was having and she sent me a bottle of Dr. Fowler's Extract of Wild Strawberry, and I cannot speak too highly of it for what it did for me.

Whenever the children have any bowel trouble from eating fruit or drinking strange water, which they have done for the past five years, living in the country, the only remedy we use is 'Dr. Fowler's,' and nobody should be without it as it cannot be beat for instant relief."

Dr. Fowler's Extract of Wild Strawberry has been on the market for the past 78 years, you don't experiment with new and untried remedies when you buy it, but be sure and get 'Dr. Fowler's' when you ask for it as a substitute may be dangerous to your health.

Price 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Third Smokestack a Dummy

The aft smokestack of the Leviathan is really a 5,367-gallon water tank, said to be the largest afloat. Many admirers of the titanic liner have been puzzled by the fact that the rear stack never poured forth smoke.

Murine Eye Remedy Co., 9 East Ohio Street, Chicago

Britain's Ships Busiest

Small Percetnage of Idle Tonnage In British Ports

Mercantile ships "eat their heads off" when tied up at the dock, and British ships are the busiest in the world, according to Herbet N. Casson, who from London sent to the Boston News Bureau a review of the annual report of the British Chamber of Shipping. He says, in part:

"The one insignificant fact in the whole report is that British ships are the busiest in the world. They are six times busier than the ships of other nations. There are at the moment 12,000,000 idle tons in the world, and only 711,000 of these are in British ports. So, roughly speaking, England has one-third of the ships on the high seas, and only one-eighteenth of the idleness."—Toronto Globe.

A Divorce Granted

After many years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extractor. This wonderful old remedy acts in 24 hours and never fails. Refuse a substitute and remember "Putnam's" is the only Painless remedy. 25c everywhere.

Seed Grain Needed by Saskatchewan

Saskatchewan now requires 32,000,000 bushels of grain each year to sow an average cropped area of approximately 21,000,000 acres, according to M. P. Tullis, Field Crops Commissioner. Two-thirds of the seed needed, or 20,000,000 bushels, is wheat, while the balance is largely oats, amounting to 10,000,000 bushels. Rye comes third, with about 1,000,000 bushels; barley, 700,000; and flax, 300,000.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months, and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent all the dreaded summer complaints. They are an absolutely safe medicine, being guaranteed by a government analyist to contain no opiates or narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Arduous Climb Brings Party To Summit of Mt. Mary Vaux

Quartet From Jasper Reach Climax of Camping Trip When They Make Supposedly Impossible Ascent

Two men from Chicago and two women from Ohio, have just reached Jasper and report that after a six weeks' journey through almost trackless wilds they have been successful in reaching the peak of Mount Mary Vaux, hitherto considered invincible. The four who made the ascent were Douglas Sutherland, Secretary of the Civic Federation of Chicago; Ben Herzberg, Chicago Attorney; Dr. Emily J. Widdercomb, of Kent, Ohio; and Miss Mary Blakeslee, of Medina, Ohio.

When the party set out from Jasper early in July, accompanied by Bruce Otto, a well known guide here, they were told that they could never make it. "The summit of Mary Vaux is unreachable," old-timers told them. "The country for miles around is too rough." But all of the party had ridden on the elevator during the rush hours, besides being experienced in mountain climbing. So they were used to hardship.

They reached the top after six and a half hours of arduous climbing. The summit is 10,000 feet above sea level and affords a superb view of the Canadian National Rockies for miles around.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Indians' Valuable Fur Catch

A very valuable parcel of seal skins, the catch of the Indians of the west coast of Vancouver Island during the spring of this year was shipped to Vancouver for transhipment to London. The catch was valued at $30,000.

Minard's Liniment Relieves Colds

Make it an every morning habit to shine with 2 IN 1 Shoe Polishes

A New Street Cleaner

Winnipeg Is First City to Use Dustless Sweeper

Winnipeg is the first city to adopt the dry, dustless system of street cleaning. Equipment, of which Mr. Blaney, formerly a Winnipeg man, is the designer, has been purchased after the tests made before the city's representatives. It was proved conclusively that the application of water or sweeping after sprinkling with water, was not the proper solution of the dirt problem, for after the wet machine had swept a given area, and time had been allowed for the street to dry, the dustless sweeper passed over the same surface and left it polished.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eclectric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Asks For Incorporation

Big River, Sask., Will Be Furthest North Village

Application for incorporation as a village of Saskatchewan has been made to the provincial department of municipal affairs by settlers at Big River, Sask., north of Prince Albert.

The village, when incorporated, will be the furthest north of all the villages in the province. The settlement was started some years ago by lumbering interests, which were subsequently bought out locally and lumbering and fishing form the main activities of the settlers, who are too far from a railway to grow grain extensively.

Memorial to Columbus

It has been proposed that the largest lighthouse in the world be erected on Santo Domingo as a memorial to Christopher Columbus, to be paid for and supported by the twenty republics of the western hemisphere.

Minard's Liniment for Corns

An adult sea-lion has been known to eat forty-four salmon in a day.

The sun gives 800,000 times more light than the moon.

PILES

Do not suffer another day with Itching, Bleeding, or Protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edmanson, Bates & Co., Limited, Toronto. Another break in the exceptionally fine fall came on Monday and Tuesday when rain was very much in evidence throughout both days and accounting for a total rainfall of at least an inch. The Monday storm brought the first showing of snow on the higher peaks, and the white mantle looks to be here to stay.

A quiet wedding was solemnized by Rev. G. Knox at the Methodist parsonage on Friday night when he united in marriage Miss Bertha May Dishman and "Jock" Osborne. The ceremony was witnessed by the bride's mother and other members of the family. Mr. and Mrs. Osborne will make their home at Sirdar, where Jock has a job with the C.P.R. bridge crew.

Wm. Ramsay of Nelson, public works district engineer, was here for a couple days' inspection on Thursday and Friday last. He states that the new road at Kitchener will be completed before the end of the month, and that in addition to slashing the right of way of the Arrow Creek diversion all the surveys will also be made so that a start can be made on it first thing in the spring.

Armistice Day will be observed by a service at the monument on Sunday morning, November 11th, at which it is expected all the clergy of the town will take part. The veterans are asked to fall in at the Mallandaine block at 10.15 a.m., to assure a march off at 10.30 prompt, as it is desired to have the service under way so as to permit of the two minutes silence at 11. With the veterans uniforms are optional but the wearing of medals is requested.

Kitchener Man in Trouble

As we go to press today (Thursday) Magistrate Mallandaine is trying W. O. Davis of Kitchener, who is charged with "shooting with intent to do grevious bodily harm" to George Betti and Louie Gilmet, also of Kitchener. Although the affair took place on October 2nd, at a cabin about eighteen miles up Goat River, it was not until Friday last that Davis was taken into custody.

From what facts can be gathered in the case it would appear that when Betti and Gilmet took to the hills Oct. 2nd on a prospecting trip Davis followed them, overtaking them at the shack used by the Americans who fished at that point this summer, as the two men were sitting at supper. Davis is alleged to have at once warned Gilmet that he would "get him this time" and almost immediately discharged the contents of a shotgun he carried which, fortunately, missed the victim's feet. A scuffle followed in which Davis emerged still in possession of the gun but before he could fire again Betti grabbed him, and this time he was relieved of his weapon. The men then moved on and no more was heard of the affair until last week, when the provincial police was notified and on investigation it was decided to take Davis into custody.

Davis is a trapper who has lived at Kitchener the past two years, previous to which he was a resident at Creston for a time, occupying the old City Bakery premises prior to his moving to Kitchener.
