THE CRESTON REVIEW

Vol. XVI. CRESTON, B. C., FRIDAY, JULY 4, 1924 No. 21

Canyon City

Raspberry shipping commenced at the first of the week with a considerable quantity moving, and if seasonable weather is experienced from now on the export of these will be heavier than a year ago.

Miss Muriel Knott, who has had charge of the school at Sirdar since the first of the year, is at her home here for the summer vacation.

Mrs. A. Bond left at the end of the week on a visit with friends at Kamloops.

Posters are up announcing the annual school meeting, which will be held on Saturday evening, July 12th.

Fred Bond has gone to Kitchener, where he has secured a job and will be remaining for the next few months.

Miss Annie McRobb has taken a position at Yahk, and will be a resident of that town for the next couple of months.

Fred Browell was a visitor with friends at Fort Steele over the weekend, making the trip by motor.

Mr. Boyce and Miss Taplin of Calgary were visitors here last week with the latter's parents, leaving for home on Monday.

The autos driven by Ted Strong and Jeff Knott were rather badly battered up as a result of a collision at the rock pile one night last week but fortunately neither of the drivers suffered injuries.

School closed for the two months of midsummer vacation on Friday, and there was quite a good turnout of parents for the closing exercises which took the form of the old time examinations of the pupils.

The community picnic on Dominion Day attracted an unusually large turnout of growns— —d children alike and every minute of the afternoon and evening's proceedings were very thoroughly enjoyed. There was a fine list of races and other events for the children, who were also supplied with free drinks, ice cream, etc., during the day, whilst the supper was noted for both quantity and quality. The committee largely responsible for the affair was made up of Mesdames Hickey, Browell, Messenger and Cook, and Messrs. Kolthammer Young and Mawson.

Campion-Dow Wedding

A wedding of great interest to the people of Creston was solemnized at St. Saviour's Church, Nelson, on Saturday evening, when Miss Flora Campion of that city, and a former teacher at Lister school, was united in marriage with David W. Dow, youngest son of Mr. and Mrs. J. W. Dow of Creston, with Rev. Fred H. Graham officiating. The bride was attended by her sister, Miss Edna Campion, whilst the best man was Nelson Ball of Nelson. The groom's gift to the bride was a pearl necklace; to the bridesmaid, an onyx ring, and to the groomsman, a pair of gold cuff links. Mr. and Mrs. Dow passed through Creston on Sunday on their wedding trip, which will be spent at Calgary, Banff, and coast cities, and on their return they will reside at Cranbrook, where Dave is employed with the C.P.R. The groom is a native son of Creston and with the bride also quite well known locally, heartiest good wishes are extended from a host of friends for a long and happy wedded life.

THE FAMOUS STORY BY
Richard Harding Davis

An Adventurous Romance
of Two Souls Adrift

Wynndel

The Co-Operative Fruit Growers shipped their twelfth straight car of strawberries on July 3rd, and if the weather moistens up a little there will be another car to go out.

The terriffic heat of this week has shortened up the berry season, and the last of the red berries will be shipped by the end of next week.

J. P. Johnston of Creston has been here for some days building some necessary bridges on the road into the Winlaw limit up Duck Creek, where pole making will be active this winter, we hear.

Creston orchestra will be here on Saturday night for a dance in the old schoolhouse.

The annual school meeting will be held at the schoolhouse on Saturday night, July 12th.

Misses Snow and Walsh, who have had charge of the Wynndel school for the past year, left on Saturday, the former going to the coast to attend summer school, and the latter to her home at Nelson.

The most disastrous fire Wynndel has ever witnessed was that of Friday morning last when about three million feet of lumber in the Winlaw mill yard went up in smoke. Just how the fire started is a mystery, but as the burning piles were too far away from the mill to work at with the mill hose little could done but let the fire burn itself out. Much of the lumber was last year's cut, and the blaze consumed almost threequarters of the lumber in the yard.

Kitchener

Miss Willoughby, principal of the Kitchener school, has issued the following list of promotions at the close of the June term:

Passed into Grade VII.—Ellen Andeen, Mildred Andeen, Laura Andeen, Clara Hunt, Ledwig Anderson.

Passed into Grade V.—Beatrice Molander, Dennis Bush, Robert Dunn

Passed into Grade IV.—Dorothy Dunn, Richard Molander, Wesley Blair, Myrtle Strong.

Passed into Grade III.—Vivian Langlois, Margeory Strong, Selmer Anderson, Vera McGonegal, Willard Blair, Alice Cameron, Clifford Dorey.

Passed into Grade II.—Grace Strong, Clara Layston, Wilbert Dorey, Clara Bush, Allan Cameron.

Beginners—Marie Arb.

The honor roll winners for the year were: Deportment—Vera McGonegal. Regularity and Punctuality—Clara Hunt, who just missed half a day in the whole term. Proficiency—Vivian Langlois.

A very pleasant social function was that of Saturday night in Hunt's Hall, when a shower and dance was given in honor of Miss Willoughby, who has resigned her position as teacher of the Kitchener school, and whose marriage takes place in July. The hall was very prettily decorated with flowers and about midnight little Misses Hazel McGonegal and Kathleen Cavanaugh were ushered into the hall pulling an appropriately decorated wagon laden with presents for their teache, in addition to which Miss Willoughby also received a number of cheques. Although completely surprised by the tangible expression of appreciation of her efforts Miss Willoughby in appriate terms thanked all for their kindness, and assured that Kitchener would never be forgotten by her. And, in turn, it is equally certain that she will long be remembered here by parents and children alike.

Sirdar

Little Miss Betty Walther, who has been a hospital patient at Cranbrook, is home again, along with her mother, who accompanied her to the hospital.

Dorothy Cam, who is a pupil at the Nelson convent, is home for the holidays with her parents, Mr. and Mrs. G. Cam.

C. H. Brown of Cranbrook was a weekend visitor at Sirdar with his family.

Mr. and Mrs. Mike Marco of Auburn, Wash., were motor visitors here on Friday. Mike was section foreman here about ten years ago.

Mr. and Mrs. Turkey and son, along with Mrs. Rogers, were motor callers at Kitchener on Sunday.

Victor and Jack Grundy, who have been attending school at Creston the past six months, are home for the summer holidays with their mother here.

During the vacation of Yardmaster Loasby Jack Cameron is in charge of the switch crew. Mr. and Mrs. Cameron were at Cranbrook for a weekend stay with friends.

Ben Whitesides with ticket 16 was the winner of the piece of silk embroidery that was raffled by the Ladies' Guild in connection with the recent tea, the drawing taking place a few days ago.

Mr. and Mrs. C. M. Loasby left on Monday for the prairie, and will be away for about ten days attending the jubilee celebration at Macleod this week, and later going on to Banff and the stampede in connection with the Calgary exhibition next week.

Mrs. Jones of Kuskanook, who was here on Friday after a business visit at Creston, states that the season there is much earlier than a year ago. On June 16th the —— garden provided enough new potatoes and green peas to feed a family of nine. She also states that the second crop of garden turnips will be in use within a week.

School closed on Friday afternoon with a nice programme provided by the scholars. Three rolls of honors and two prizes were awarded and hand painted souvenir cards with photo of school children were also distributed, these being the work of the teacher, Miss Knott, who is at her home at Canyon for the vacation, and who will again be in charge of the school next term.

Alice Siding

School closed for the midsummer holiday period on Friday, and Principal Lallamand will spend the vacation with friends in the Nicola Valley at Merritt.

Mrs. Pope left on Friday for a three months' visit with friends in the Old Country, and will also be a visitor at the British Empire Exhibition at Wembley while overseas. We hear Miss Foxall is returning to England with her.

Mrs. Seaver and two children of Pine Creek, Idaho, is a visitor here at present with her parents, Mr. and Mrs. R. Stewart, and is accompanied by her friend, Mrs. Gibson, of the same town.

The biggest crowd of the season was out on Friday night for the Social Club dance which was held in the house on the Pendry ranch, with good music by Gordon Smith on the violin, and Hector Stewart, accordeon. The weinie feed for supper was a decided innovation, with each guest having to do his or her own cooking.

Considerable excitement prevailed here on Sunday morning when it became known that Master Henry Vance, who with his brother, Will, had gone on a fishing trip up Corn Creek the day previous, had failed to return home. While fishing along the stream the two boys became separated and when Will, after a few hours search, had failed to locate his brother he immediately drove across to Creston and enlisted the services of the R.C.M.P. and quite a number of citizens who spent all night in the woods in quest of the lost boy. It would appear as if in his effort to find his way down stream the boy became so tired out that when he sat down beside a log he went off to sleep and did not awake until daylight when he again resumed walking and about ten o'clock came out near the Corn Creek school in which locality some of the searchers were on patrol.

Erickson

Wednesday was the hottest day encountered here so far this year, some of the thermometers registering as high as 99 in the shade.

Tuesday, July 1st, holds the record for the years's express shipments, the total outgoing being 182 crates, of which 122 were strawberries. So far the raspberries have not come in as fast as expected, the big day's shipping only having 22 crates of these.

School closed for the summer holidays on Friday, the windup taking the form of a picnic at Glengariff Grove, Creston, at which there was a full turnout of children and a most enjoyable day spent by all.

The Putnam, Palmer & Staples sawmill closed down for the summer on Friday, and a number of Erickson people who were working there are home for a couple of months.

Miss Brander and sister left on Saturday for their home at Fort Steele and, we understand, will not be on the teaching staff next term.

L. T. Leveque got back at the end of the week from a business visit to Calgary, Alta.

Posters are up for the annual school meeting which will be held at the schoolhouse on Saturday evening, July 12th.

Miss McCaslin, who has had charge of the Erickson school the past term, left on Saturday to spend the holidays at her home at Salmo.

Mr. and Mrs. Fred Waylett were motor visitors to Bonners Ferry, where they spent Dominion Day with friends.

The Clements & Young ranch lead them all for early cabbage, having some three-pound heads to offer customers of Creston stores on June 25th.

The Girls Guild of Christ Church, Creston, under the direction of Mrs. Thurston, scored a decided success at their afternoon tea and sale of work, as well as evening at-home, at the spacious residence and grounds of W. H. Kemp, on Tuesday. The afternoon turnout was fine, and at night the local crowd of young people was augmented by quite a large delegation from Canyon City who much enjoyed the dancing. The day's intake was in the neighborhood of $50.

Dies After Short Illness

A gloom was cast over the village the fore part of the week when it was learned that James Ralph, the nine-year old son of Mr. and Mrs. James P. Johnston, had died, after but a few days illness. Although only taken sick on Thursday evening, despite the best of nursing and medical attention, the little fellow breathed his last shortly before noon on Monday. The funeral took place on Tuesday evening to Creston cemetery, with Rev. J. A. James conducting the last sad rites, and Lloyd Couling, Harold Beninger, Perley Putnam, Norman Bentley, Arthur Couling, and John Blimco, school chums of the deceased, acting as pallbearers. Amongst the juvenile population of the town few boys were more popular than the dead lad, and this popularity, and the esteem in which the parents are held, was shown in the many floral tributes and the large turnout of friends to pay their last tribute of respect. Very genuine is the sympathy extended the parents in the loss of an eldest and promising son.

The spring frosts do not appear to have done much damage to the Okanagan apricots. Penticton is expecting even a larger crop of these than last year.

Flower Show is Well Patronized

The 1924 flower show under the direction of Creston Valley Women's Institute, which was staged in the Parish Hall on Friday afternoon last, was a decided success in the point of entries and floral display, the showing of cut flowers being about the best ever seen here, and Robert Stark, who did the judging, had quite a difficult task with some of the sections in placing the prize wining cards. The list of winners follows:

Roses—Mrs. Bennett, Mrs. Edmondson.

Pinks—Mrs. Edmondson 1st and 2nd.

Sweet William—Mrs. F. B. Pearce, Mrs. Mallandaine.

Sweet Peas—Mrs. Jas. Cook, Mrs. Twigg.

California Poppy—Mrs. Bennett, Mrs. Mallandaine.

Snap Dragon—Mrs. M. Young, Mrs. M. J. Boyd.

Canterbury Bells—Mrs. Geo. Cartwright, Mrs. J. Cook.

Fox Glove—Mrs. Geo. Cartwright, Mrs. Percy Watson.

Shasta Daisy—Mrs. Percy Watson, Mrs. J. Cook.

Corn Flower—Mrs. Bennett, Mrs. Hayes.

Pansy—Mrs. M. Young, Mrs. Cook.

Primula—Mrs. G. Cartwright.

Columbine—Mrs. Twigg, Mrs. Percy Watson.

Cape Forget-Me-Nots—Mrs. Percy Watson, Mrs. Edmondson.

Begonias—Mrs. Mallandaine.

Petunias—Mrs. M. Young.

Boquet Wild Flowers—Mrs. Mallandaine 1st and 2nd.

Collection Garden Flowers—Mrs. Mallandaine, Mrs. G. Cartwright.

Delphenium—Mrs. Edmondson, Mrs. Lyne.

Any other variety—Mrs. Edmondson, Mrs. Mallandaine.

The ladies had a sale of cooking, as well as serving refreshments, and the cash intake from these sources, along with the sale of some of the flowers, netted the Institute in the neighborhood of $25.

Lister

Principal and Mrs. Pearce and family are spending the summer holidays at their ranch at Creston, on which they have a considerable quantity of berries to ship.

T. M. Rickerts, who has been working at the Thompson mill near Copeland, is a visitor here at present with Mr. Niblow.

Walter Edwards has gone back to work at Klockmann, leaving here on Tuesday.

Haying operations are in full swing and the cut of both clover and alfalfa is fully up to the standard of other parts of the Valley. Messrs. Malthouse and Wright are cutting considerable of the hay crop on the unoccupied places.

Percy Lye is the latest auto owner in the Lister area. He made the purchase of a used Ford at the Bevan garage, Creston, last week.

At their meeting on Friday the ladies decided to make the purchase of an organ for use in church and Sunday School, and have written the seller at Grand Forks to send the instrument at once. A canvass will be made of the homes here to pay for the organ.

The annual Sunday school picnic was held on Dominion Day, Tuesday, at the Jorgenson ranch, and was largely attended by both children and grownups. Rev. Mr. Knox was here to help things along and a great afternoon of sports was provided for the youngsters with an abundance of free ice cream and cold drinks. The array of good things to eat that were spread for supper certainly indicated that Lister has many good cooks who combine generosity along with their splendid culinary accomplishments.

A Daughter Of The Ranch

A Story of Romance and Adventure of Western Pioneer Days

— BY —

ALEXANDER D. McLEOD

(Published by Special Arrangement with the Author)

(Continued)

CHAPTER V.

One of the strangest features of western pioneer life on the prairies was the rapidity with which news of striking significance travelled from one sparsely settled community to another, and was disseminated among the homesteaders and ranchers in remote sections of the lonely prairies. With no more rapid means of communication than the rider of a sturdy broncho or Indian pony, ridden by a chance passerby, the news was left here and there along the trail as he passed on his way. From him the news was passed on among the scattered neighbors with an efficiency that was almost uncanny and weirdly suggestive of telepathy.

Remote as the Fraser ranch was from homesteader or rancher neighbor—the nearest in any direction aside from the Indian reserve, being twenty miles away—the homesteader on the prairie, the rancher on the hills, north, south and east of the mountains, some of them forty miles away, were generally informed, within twenty-four hours of the abduction of Mary Fraser by "horse rustlers." Those possessing the luxury of horses, only lacking leadership, were willing and anxious to start off in a well-armed posse in pursuit of the bandits. At gathering points here and there throughout the communities, they assembled in groups to discuss the situation. Through lack of leadership, definite action was deferred, especially since the cooler heads trusted to the efficiency of the North West Mounted Police in dealing with the administration of law and order.

Accordingly when the news was brought to one of these gatherings by the two visitors from the Fraser ranch on their return home, that the girl was rescued by the stranger, MacRae, and her father, and, when it was learned that they had not only succeeded in recovering the stolen horses, but had also taken away in the night time, while they were asleep, the horses of the outlaws themselves, their enthusiasm broke all bounds. So elated were they that they decided there and then to go the next night in a body, women and all, and celebrate the event at the Fraser home. The chief mode of transportation possessed by most of the people were the patient and slow plodding ox teams. To overcome these disadvantages it was arranged that all who had horses would take their wagons, and place at the disposal of their less favoured neighbors this more effective means of travelling. Thus it was arranged so that all who could might be enabled to enjoy the event.

At the Fraser home, while they knew that the news of the kidnapping and the timely rescue of their daughter had spread among the distant neighbors, they were not aware of the personal interest the people had taken in the event. Still less were they aware of the extensive preparations that were being made by them for the jubilation of the coming evening. While they anticipated that they might have some visitors, as vaguely hinted by the young men who had been their guests the previous evening, they did not concern themselves with preparations for the reception of a large crowd, the size of which they had not anticipated. Mrs. Fraser, however, always a good provider, had early that morning a large baking well under way to have her larder replenished with many delicacies long before the weary worn members of the family and guest were called to a late breakfast. With the help of Winona she had performed all the morning household duties, as well as having done the outside chores, without disturbing those, who, owing to their nerve-racking experiences, were greatly in need of this long morning rest.

Refreshed after a long sleep with all signs of weariness gone, Mary, Ronald and Mr. Fraser arose late, partook of a hearty breakfast of bacon and eggs and delicious toast, made from Mrs. Fraser's own light and flaky home-made bread. This fare was particularly relished by Ronald as an enjoyable change from the rations of hard tack which had practically been the only bread he had fared on since he had enlisted four years before. His jokes about "pork, beans and hard tack" amused both the father and daughter as the breakfast proceeded. His reminiscences of the rebellion campaign interested them and the humor of them afforded considerable amusement. Before breakfast was over Mary extracted a promise from him that on some other occasion, when they had more time and leisure, he would give her a more detailed account of the interesting events of the campaign. After breakfast, acting on a proposal from Mr. Fraser, Ronald accompanied him to the corral to look after the horses and let them out to graze, while Mary went to assist her mother in the house work.

It was late afternoon when Ronald, returning from accompanying Mr. Fraser on a round of his ranch, led his horse to the stable and discovered Sergt. Melvin's horse in one of the stalls and his saddle hanging on a peg nearby. Ronald thought that, obviously and with intent, he made a hasty return from his pursuit of the outlaws. From Ronald's standpoint he was not a welcome visitor to the Fraser ranch at the present time. He looked upon his arrival with a certain sense of resentment in view of the intimate friendship already existing between these two people. While as yet he regarded his own chances of winning Miss Fraser's special favor with only a slight degree of assurance, he resented the dominating personality of the sergeant thus stepping in between them to monopolize her chief attention. It appeared to him that his attentions to Miss Fraser were of a serious nature, but he was by no means satisfied as to whether those feelings were reciprocated by her. Until he was fully assured that such was the case he was not in the mood to leave an open field to his accomplished rival. Thus assuming an air of self-assurance he accompanied his host into the house, and diplomatically extended a cordial greeting to the sergeant. With veiled irony he complimented him on his rapid work in running down the outlaws.

The nimble-witted sergeant sensing the note of irony in the compliment, replied: "The same ill-luck followed us in the pursuit of the outlaws as pursued us when we failed to have the honor of rescuing Miss Fraser from their clutches. We were too late. Four of the men were detained by the men patrolling the International boundary while endeavouring to make their escape across on foot. The fifth, their leader, known as "Dutch Pete," a dangerous outlaw, with some murders and several gun fights to his credit, and who is wanted by the American authorities, escaped, at least for the present. By outwitting his companions and leaving them in the lurch, he made good his escape with the only horse left after your raid. A little more weight applied to that 'billy' of yours would have done good service to Uncle Sam as well as to the Canadian authorities."

"What was done to the captured men?" asked Ronald.

"They were summarily tried before the Police Inspector at Portal last night, and, pleading guilty to the charge of horse stealing, they were each given three years penal servitude.

"That is quick work," replied Ronald; "it reflects considerable credit on the efficiency of the Mounted Police."

The sergeant, mollified by this compliment to the force of which he, himself, was an efficient sub-officer, replied: "Yes, in so wide a territory as we have to cover it is sometimes difficult to capture offenders. There is one satisfaction, however, in the fact that, when offenders are captured, justice is administered with dispatch. The guilty have small chance of escaping due punishment, and, on the other hand, the innocent have equal chances of acquital."

"It is unfortunate that 'Dutch Pete' as he is called, was not captured with the rest of the gang. The horse that was left must have been in the brush, as I took a good look around to see that none was left when I cut them loose. But, as the saying goes: 'The Devil looks after his own.'"

While this passage of words was going on between the two men, Mary quietly took in the situation, and for the first time it dawned upon her that the motives behind their rapier thrusts might be due to their sentiments regarding herself. Her intuitive foresight prompted her to, in future, use her feminine tact in handling these men while together in her company. To prevent all possible chances of a clash that might prove embarrassing, she suggested that, if they wish, they might go to their rooms and have a wash before dinner, while she went to the kitchen to help her mother.

Ronald at once acted on this suggestion, but as he reached the foot of the stairs he turned round and saw that the sergeant was following Mary into the kitchen. This act on his part proved to be slightly disconcerting to his equanimity. It was an act that to him indicated unusual familiarity in the domestic affairs of the family, and tended to heighten his suspicion of a relationship somewhat closer than mere friendship. So it was with a heavy heart he ascended to his room.

At the dinner hour Mary took her former place beside him at the table. In the rivalry of gallantry he had the advantage over the sergeant, who, sitting on the other side of the table, could not monopolize her chief attention, as he evidently desired. This rivalry developed into a contest of polished repartee and wit, mixed with marked attentions to the lady in the case. In this respect the men were accomplished antagonists. Both had been brought up and trained in surroundings of educational and social advantages, and had accordingly absorbed their fair share of the polish and suavity of such circles. Yet their rivalry was carried on with an ease and naturalness of manner that eliminated all suggestions of ostentation or bitterness. Both were playing for a prize, and both enjoyed playing the game.

While pleasantly engaged in conversation some time after the dinner hour, they were startled by loud whoops and yells from the direction of the lake road. Hastening to the door they saw four men dressed in full cowboy regalia in the act of dismounting at the lake shore just in front of the house. They had evidently taken this unique method of announcing their arrival. The three went down to where the cowboys had taken their stand, and as they approached the sergeant asked: "What is the idea, boys?"

One of them replied: "'Lo sergeant; we heard there is goin' t' be shindag t'night, and we are here t' take it in. I guess me an' the boys are the f'rst t' git here."

A smile from the group greeted this announcement of the cowboys, and Miss Fraser asked in a kindly way if there were more people coming.

Awkwardly touching his hat, the spokesman said: "Yes, ma'm; they are all coming. Me an' the boys passed three wagons full of homesteaders with their missis, and gels, and bachelors, too, comin'. They are comin' to celebrate ter you ma'm."

"That is certainly nice of them. All right boys tie up your horses and make yourselves at home. Have you had your suppers?"

"Yes, ma'm, we allu's have our grub with us."

As stated by the cowboys there were others. They proved to be only a small advance guard of a like numerous company that straggled on in groups from time to time, to be followed before the dusk of evening, by wagon loads of mixed companies. They came thus for many miles to pay their respects and express from the kindliness of their hearts their joyful thankfulness for the rescue of the girl, though a stranger, to them from the dangers that had encompassed her. They came under great difficulties for many miles to rejoice with this family in their good fortune. The large number that had gathered by dusk was a surprise to them all. One wondered where they all could have come from in a land so sparsely settled. Some were ranchers who had made their homes among the hills like themselves; others were homesteaders from the open prairies. Some, only a few, were married men with their wives and families, mere children; others married men with their families still in the east, and some unmarried men. Most of them had made, or were making, their homes on the lonely prairies, where, with the optimism of all western pioneers, they ploughed deep furrows in the virgin soil, from which in time they were to reap rich harvests upon which their hopes were building their happy and prosperous homes of the future. Thus, this self-invited crowd, besides desiring to do honor to their brother rancher in their joyful reunion, enjoyed the anticipation of the inestimable pleasure that would be afforded them of passing a few fleeting hours in social intercourse with their human kind. Inured to hardships as they were, they heeded not the shocks of their unyielding seats, as on their tedious journey they had covered, on rough trail, the many miles that separated their lonely homesteads from this present gathering place. Uppermost in their minds was the thought of the pleasure that this unusual occasion meant to them; a bright day in the monotony of their lives on the lonely homesteads. Remote from social advantages, their natures craved relaxation, even though temporary, from the ennui of the daily routine of a life largely denied the pleasures of free social intercourse and association with their fellow beings. Such events marked milestones in the lives of the early settlers.

Cuticura Beautifies Skin Hair and Hands

Make Cuticura Soap, Ointment and Talcum your every-day toilet preparations and watch your skin, hair and hands improve. The Soap to cleanse and purify, the Ointment to soothe and heal and the Talcum to powder and perfume.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Lymans, Limited, 344 St. Paul St., W., Montreal.

Cuticura Soap shaves without mug.

Luminous Mountain

In the Pacific wilds of New Britain, in the Bismarck Archipelago, is a mountain of which the crest and sides shine with a strange light, and mariners report that those who go near suffer from a painful rash of the skin.

The glow can be seen for miles, and it is certainly not caused by any volcanic phenomenon. Scientists believe that the light is due to radium or some radio-active mineral in the rock, and an expedition is to be sent out by the Australian Government to investigate.

Spread of Sleeping Sickness

The rapid spread of the sleeping sickness in Great Britain is causing considerable alarm. In January last there were 75 cases, in February 217, in March 468 and in the first three weeks of April 649 cases were reported. The proportion of the deaths has not been large but the after effects of the disease very often are serious.

Buffalo Thrive In Yukon

Small Herd Imported From Wainwright Park, Alberta

Veterans from the Yukon territory who mushed into the Ketchikan district recently were optimistic about the importation of 24 buffaloes from Wainwright Park, Alberta, to a game preserve in Central Yukon. They predicted that within a few years the raising of these buffaloes would be as profitable to the Yukon as the reindeer industry has become to Northern Alaska.

Tells Just Why She Is So Thankful

Ontario Lady Found Relief in Dodd's Kidney Pills

She had suffered with bladder trouble for years, but Dodd's Kidney Pills quickly relieved her.

Bright, Ont.—(Special).—"I received your Dodd's Almanac and have been going to write to you ever since. I am the mother of four children and have had very bad bladder trouble. I took different medicines and all the time it kept getting worse. At last my mother told me to try Dodd's Kidney Pills. I got two boxes and they have completely relieved me. I have never been so thankful for anything in my life, as I was for those pills." This statement is made by Mrs. Henry D. Christensen, well known resident of this place.

Women's troubles, or nearly all of them, come from sick kidneys. Dodd's Kidney Pills will relieve kidney troubles, no matter where or in what form it is.

Sound kidneys mean pure blood. Pure blood means good health.

Ask your neighbor if Dodd's Kidney Pills are not the best remedy for sick kidneys.

Gratitude

A South End domestic servant found a pocketbook containing $150 and returned it to its owner.

"Thank you," said the loser. "Would you call at the police station and tell them it's found!"

TO EXPECTANT MOTHERS

A Letter from Mrs. Smith Tells How Lydia E. Pinkham's Vegetable Compound Helped Her

Trenton, Ont.—"I am writing to you in regard to Lydia E. Pinkham's Vegetable Compound. I would not be without it. I have taken it before each of my children was born and afterwards, and find it a great help. Before my first baby was born I had shortness of breath and ringing in my ears. I felt as if I would never pull through. One day a friend of my husband told him what the Vegetable Compound had done for his wife and advised him to take a bottle home for me. After the fourth bottle I was a different woman. I have four children now, and I always find the Vegetable Compound a great help as it seems to make confinement easier. I recommend it to my friends."—MRS. FRED H. SMITH, John St., Trenton, Ont.

Lydia E. Pinkham's Vegetable Compound is an excellent medicine for expectant mothers, and should be taken during the entire period. It has a general effect to strengthen and tone up the entire system, so that it may work in every respect effectually as nature intended. Thousands of women testify to this fact.

Late Spring Curtails Crop

Some Reduction in Wheat Acreage in Saskatchewan Is Expected

The lateness of the season is responsible for an estimated reduction of 10 per cent. in the acreage that will be seeded to wheat in the province this year, according to a crop report issued by the bureau of statistics of the Saskatchewan Department of Agriculture.

On the other hand, an increase of 10 per cent. in the area sown to flax is anticipated. The reports indicate that fall rye has wintered well in most places.

A shortage of farm help is reported in some places, but in others the demand has been fairly well satisfied.

Corns, Warts, Bunions, Painlessly Removed

Don't limp any longer, don't suffer another hour from corns. The oldest remedy and the best, the one that for fifty years has proved a true success, will lift out your corns in a hurry. Putnam's Painless Corn and Wart Extractor is the one remedy to use. Refuse a substitute, 25c everywhere.

Some charity begins at home, but the best brand is directed toward the homeless.

Minard's Liniment for Distemper

Why, Certainly!

"Your daughter has promised to marry me. Will you forgive me for taking her away from you?"

"Forgive you! Why, that's what the party was for."

Say "Bayer Aspirin"

Market For Store Cattle

Possibilities for Canada in Great Britain Are Unlimited

The market possibilities for Canadian store cattle in Great Britain are almost unlimited, J. H. Grisdale, deputy minister of agriculture, told the agriculture committee of the House of Commons, Ottawa. With Ireland shipping as many as one million head per year to England and Scotland, the market is there for Canadian store cattle. Up to the present Canada has only shipped a small number owing to the cost of marketing, he said. The market for chilled beef in the United Kingdom might be made very profitable if the position of the Canadian production could be made secure.

A SPLENDID LAXATIVE FOR THE BABY

Mothers should constantly be on guard to keep baby's bowels working freely and his stomach sweet, for nine-tenths of the ailments from which little ones suffer are caused by derangements of the stomach and bowels. Baby's Own Tablets are a splendid laxative for the baby. They are mild but thorough; contain neither opiates nor narcotics, and are absolutely guaranteed to be safe and efficient for either the newborn babe or the growing child. By their action on the bowels and stomach they drive out constipation and indigestion; break up colds and simple fevers and make the dreaded teething period easy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Chinese Phone Girls Quick

China's telephone system is the most up-to-date in the world. So declares Norman W. Anderson, a telephone engineer of the Shanghai Mutual Telephone Company, who arrived at Liverpool on the Canadian Pacific liner Montlaurier.

Statistics, he states, show that Chinese operators can secure a connection in three and a half seconds, whereas in London the average call takes six seconds to connect.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Doing Away With Sleep

English Scientist Claims Discovery of Substitute for Real Thing

It is with mixed feelings that one learns of the discovery by an English scientist of a process which will do away with the need of sleep. During sleep the weary brain-cells are recharged with vital force, which is electro-chemical in character. Dr. David Fraser Harris has devised an apparatus for recharging the brain-cells with the vital force of the requisite quantity and quality. So it may be that, in the near future, we shall be able to dispense with sleep, and obtain in a few minutes all the recuperative benefit which mankind has heretofore gained by "drinking deep of all the blessedness of sleep."

Time can thus be saved—but how much would be lost! For sleep is not desirable and desired only because it recharges the brain-cells. It brings merciful oblivion to the woes and troubles of life. It stays hasty and ill-considered action, and prepares the way for the wise second thought. Not alone in a physical sense is it "tired Nature's sweet restorer." For many other reasons do most of us feel like echoing the sentiment of Sancho Panza, "God bless the man who first invented sleep."

Somehow we are compelled to doubt if the scientific substitute for sleep will ever displace the real thing, even if it were to prove as effective as its discoverer hopes. It may be used in emergencies, to enable people to keep going when they are fagged out and have no time to sleep. But Nature's ways are best.—Hamilton Herald.

Clark's Beans With Pork

For the amount of food value which they contain Clark's Beans and Pork are a most economical as well as a most excellent food.

"Let the Clark Kitchens help you."

Great Britain in 1922 had 22,041,520 gross tons of shipping, 5,000,000 more than its nearest rival, the United States.

Minard's Liniment, the Athlete's Remedy

WORLD HAPPENINGS BRIEFLY TOLD

King George has signed the Anglo-American treaty providing a 12-mile limit for search and seizure of rum runners off the American coast.

The Bavarian Landtag has been dissolved, says a message from Munich. The cabinet, headed by Dr. Von Knilling, has resigned.

Six Italian emigrants who were about to embark for Canada were taken into custody at Cherbourg, France, on an allegation that the passports they held were forged. The passports were printed in the French language.

A serious epidemic of cholera has swept over the Behar division of Bengal, India, where more than 10,000 deaths have occurred this year. In the worst affected district 1,000 died last week. The epidemic is still spreading.

The first Hebrideans to arrive in Canada via the St. Lawrence River route this season were disembarked at Quebec, May 5, from the Canadian Pacific steamer Marloch, from Glasgow and Stornoway. There were upwards of 200 in the party.

Eighteen grain boats on April 24 took out of Fort William 3,617,000 bushels of wheat, oats and flax, the Canadian taking a small cargo of flax alone to Superior. The Keekatin, of the Canadian Pacific lake fleet, and the Huronic, of the Northern Navigation Company, both cleared with passengers and freight.

Women's Ailments Caused by Neglect

Proper Treatment Will Quickly Bring Back Robust Health and Good Spirits

Women are on the whole more sickly than men. One reason is that their system is more complicated; another and more important reason is, they put off measures of relief too long. At the beginning, constipation is the cause of nine-tenths of women's ailments. The blood becomes weakened and polluted—the nerves suffer, and a run-down condition takes root.

Because of their mildness of action as a system regulator, no medicine for women can compare with Dr. Hamilton's Pills. The kidneys quickly respond to the remedial action of Dr. Hamilton's Pills, and the result is as you would expect—pain in the back and side, shortness of breath, and bad color disappear—the functions of the body then operate naturally, congestion and pain are prevented, and perfect health returns.

Thousands of happy women say Dr. Hamilton's Pills are the greatest and best blood purifier, the finest complexion renewer, the most certain regulating medicine known. Sold by all druggists and storekeepers, 25c per box, five for $1.00 postpaid, from The Catarrhozone Co., Montreal.

Settlers' Effects Movement

Settlers' effects exported during the last fiscal year were $10,795,941 compared with $7,971,002 in the previous year. Settlers' effects imported were $6,114,702 as against $6,205,085.

MRS. JOHN SIMPSON

Do You Need Help? This Advice is Well Worth Reading!

Kirkton, Ont.—"I have found Doctor Pierce's Anuric Tablets to be an excellent medicine. I have been troubled with inflammation in the neck of my bladder for about eight years. I doctored but failed to get cured, so I decided to try Doctor Pierce's Anuric (anti-uric-acid) Tablets and they have relieved me greatly.

"I also can recommend Dr. Pierce's Favorite Prescription for expectant mothers. I have a fine, big baby boy. My nurse asked me what I ate to make him so strong. He looked like a child four or five months old when only three. I certainly would advise every prospective mother to use Dr. Pierce's Favorite Prescription."—Mrs. John Simpson, R.R. 1.

Send 10 cents to Dr. Pierce's Laboratory in Bridgeburg, Ont., for trial pkg. of any of Doctor Pierce's remedies and write Doctor Pierce, President Invalids Hotel, Buffalo, N. Y., for free, confidential medical advice.

France's African Empire

Administration Compares Favorably With That Of Other Countries

France is building an African empire far surpassing the ancient domains of Rome and Carthage, according to David Barrows, former president of the University of California, who is returning to the United States after a study of the French colonial administration, which he said compares most favorably with the colonial achievements of any country.

Dr. Barrows said that the French plan to make Dakar one of the world's greatest seaports, because of its proximity to North and South America. Dr. Barrows said he was agreeably surprised to find that the French colonial administration was not as militaristic as had been generally reported, and that, in his opinion, the natives were being educated and civilized without being brutalized.

Promise Aid To Scientists

Saskatchewan and Alberta Will Give Financial Assistance

It developed at a meeting of the local organizing committee of the British Association at Toronto, that of the western provinces, only Alberta and Saskatchewan have promised financial assistance toward the projected western tour of eminent British scientists in August. While the trip through to the coast will be made in any event, it was felt that it might be necessary to eliminate certain stops which had, hitherto, been planned, owing to lack of funds.

Cargo Worth Millions

C.P.R. Liner Carried Shipment of Silk and Siberian Skins

With several million dollars worth of silk, the largest cargo of Siberian skins ever brought across the Atlantic Ocean, and a passenger list of over 700, the Canadian Pacific steamship Empress of Russia docked at Vancouver recently. Within a few minutes from the time the big liner was tied up, the silk was being emptied from her holds into the specially fitted box cars which awaited it. Less than three hours later the entire shipment pulled out of the railway yards for its destination in the eastern markets.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence, who is infested with worms can take this preparation without a qualm of the stomach, and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

Alberta's Good Record

Alberta's average wheat yield for twenty-five years ending with 1923 was 18 bushels per acre, as compared with 10.9 in North Dakota, 11.4 in South Dakota, 15.1 in Manitoba, and 13.5 Kansas.

Minard's Liniment for Falling Out of Hair

Will Film Mt. Everest Climb

Elaborate preparations have been made to take motion pictures of the third expedition to climb Mount Everest, which is soon leaving England. The film camera is to be concentrated in one box and carried by a mule. A camera operated by clockwork will be used.

Praises this Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

Alberta Gets Settlers

New settlers are arriving in Alberta in large numbers, many of them from Oregon and Minnesota. During March sixty homesteads were filed in the Dominion Land Office at Edmonton.

ECZEMA You are not experimenting when you use Dr. Chase's Ointment for Eczema and Skin Irritations. It relieves at once and gradually heals the skin. THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2.50 a year in advance, $3.00 to U.S. points.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, JULY 4

The Real Paymaster

Forests are jobs, according to Robson Black of the Dominion Forestry Association. Trees mean trade. Logs are the raw material not of lumber or paper, but of pay cheques. It is an incidental matter that the forest gives us telegraph poles. It is a very important matter that the forest gives us 120 000 workmen, supporting a half million of Canadian dependents, and distributing 500 million dollars to maintain Canadian prosperity. Conservation would never bother itself with trees if trees were not the substance of human employment. The Forest Protectionist would not sweat a drop for a square mile of Spruce if he did not know that some vast industry, a thriving town and a thousand contented homes are tied to Spruce trees by an inseparable bond.

We Canadians set 6,000 forest fires a year and nine-tenths of them through human recklessness, but those beacon lights of prodigality mean nothing if they do not tell us that we have put the torch to the livelihood of thousands of men; we have signed an unrenewable note for our children and our grandchildren to pay. Let it be laid down as an ugly and undisturbable fact that in the present situation with forest demand jammed hard against dwindling forest supply, every forest fire must be paid for. Every mile of Spruce or Pine or Fir given to the annual bonfire will have to be bought back by the next generation in higher costs of lumber and paper, in forfeited industries in dwindling public revenues, and a sacrifice of population.

Board of Trade Reclamation Resolution

WHEREAS the West Kootenay Power & Light Co. has applied for Licence to use 50,000 ins. of water from the Kootenay River, and further has made application to construct such works as may be necessary to utilise the storage capacity of Kootenay Lake at low water periods in the further development of hydro-electric power to keep pace with the increased demands for the same in the industries of Kootenay and southern Interior;

AND WHEREAS this Board has for many years drawn to the attention of the respective Governments in divers ways and means, its belief in the economic feasibility of Kootenay Flats Reclamation, and as a result much investigation has been carried out by engineers of the Provincial Government and the State of Idaho, jointly and severally, and by the Federal Government of the United States;

NOW THEREFORE this Board resolves that the Provincial and Dominion Governments be petitioned, that in view of the said applications of the West Kootenay Power & Light Co. and of the lengthy engineering investigations aforementioned, it be now determined without further unnecessary delay by the respective governments in conjunction where necessary with a consultant of undoubted ability and experience in reclamation work;

1. The Economic Feasibility of the Reclamation of Kootenay Flats.

2. If economically feasible to determine if there is any conflict in carrying out the reclamation work, with the use and development of Kootenay Waterways for navigation and power.

3. If in conflict with each or either to determine the true interests of Canada, and Kootenay in particular

4. If the reclamation of the Flats is found to be not in conflict with the other interests mentioned, then inasmuch as the State of Idaho is interested in this work in proportion to the benefits received, and as the Sumas Reclamation project has now been successfully completed, the Government be urged to take into its consideration at an early date the ways and means to commence the work of reclamation and carry the same through to completion in conjunction with the State of Idaho and the West Kootenay Power and Light Co. and the Dominion Government as to such works as may be determined to be beneficial to all.

WHAT OTHER PAPERS SAY

Looks for Good Year

Speaking to The Herald on the situation in the fruit industry here this year, W. M. Vance, who left on Sunday to take up his duties as manager of the Creston sub-agency, for the Associated, said, "The main thing is for all of us growers to do a little real boosting and we have something worth while to talk about."

"I am convinced," he stated, "that the Associated is going to put it over' and 'putting it over' means making a better return to its growers than the independent shippers can do.

"We have everything in our favor," he continued. 'It worked out just as I thought it would early this spring. The embargo against California fruit owing to the foot and mouth disease has kept the California fruit off the Oregon and Washington markets. Then the frost hit the fruit in Washington and Oregon so much harder than it did us, with the result that those two states will hardly raise enough for their own markets and their fruit will not be a competitive feature on the prairie markets. Further, our crop may be 70 per cent. of last year, so the Associated will not be compelled to use the export market to any extent. That was the thing which hit it so hard last year."

He then spoke of the feeling of confidence among all members of the staff of the Associated and their heart felt determination to make a showing this year which would establish the co operative movement for all time. "They recognise," he said, "that they are up against their supreme test and if that test fails there are only two things to do—change the personnel of the Associated 'from soup to nuts' or give up co-operative marketing. If it comes to this last mentioned it will be a good time for us to be packing up our little trunks and moving elsewhere."—Penticton Herald.

$25,000,000 Per Annum

LUMBERING PROVIDES RAILWAYS WITH HALF FREIGHT TRAFFIC

81,000 Cars Needed to Handle Britiah Columbia's Rail Shipments of Wood Products

Imagine the effect on our rail transportation systems if half their outward freight traffic were withdrawn.

Figures issued by the Dominion Bureau of Statistics show that one half of the rail freight traffic originating in British Columbia is made up of forest pronucts.

Last year the railways carried well over 2,000,000 tons of lumber, shingles and other wood products out of British Columbia.

At a low estimate the amount paid in freight exceeded $25,000,000.

It took 81,000 cars to handle the lumber shipped to our rail markets last year. These cars would make up a train 600 miles long that would reach from Vancouver to Banff, Alta.

The above figures do not include the millions of feet of logs moved on public railways from camps to mills.

The railways benefit enormously by the heavy freights paid on camp and mill machinery, equipment and supplies, entering the Province.

The forest products group buys more material and employs more persons than the three or four next biggest industries put together.

Both coming and going, it is logging and lumbering that keeps the railway tracks from rusting.

FOR SALE—Baby's pram, English make, in good shape. Also a refrigerator, cheap, Apply Mrs. Varley.

Miss Vickers, vice-principal of the public school, is spending the summer holidays at her home at Salmon Arm.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free permits are available for settlers, campers and travellers, up to ten head.

PIANO FOR SALE—Player piano, in good condition, price right either for cash or terms. Enquire Review Office.

Mrs. R. B. McLeod and daughter, Margeory, are away on a month's visit with her parents at Kellogg, Idaho.

$375 cash buys McLaughlin Four, recently overhauled, new battery. Apply W. B. Martin, C.P.R. depot.

The vital statistics for June show two births—a boy and a girl. There were two weddings and but one death.

Charles ("Sailor") Smith of Kimberley is a Creston visitor this week, the guest of his brother, Corp. Smith of the R.C.M.P.

Mrs. Burrows of Silton, Sask., who has been the guest of Mrs. Cherrington for the past monthh, left for home on Friday last.

Mrs. Manders and daughter, Lorna, of Medicine Hat, Alta., are Creston visitors this week guests of Mr. and Mrs. A. L. Cameron.

Mrs. Hayes left on Monday for a three-months' holiday visit with friends, at Toronto, Markham, and other Ontario points.

Mrs. Hare and Mr. and Mrs. C. H. Hare and daughter, Ruth, were motor visitors to Bonners Ferry for the Dominion Day holiday.

FOR SALE—Team, wagon and harness, weight about 3000lbs., 7 years old, black Percherons, price complete $350. Enquire Review Office.

School closed for the summer vacation at noon on Friday, and is scheduled to re-open for the fall term on Tuesday, September 2nd.

Miss Grace Comfort, who has been teaching at Johnston's Landing, north of Kaslo, the past year, is home for the midsummer holidays.

Dominion Day passed off very quietly. A number of the anglers were at Summit Creek on which stream trout fishing opened on July 1st.

According to the returning officer's report 14 ballots to be counted in the absentee vote in the Creston riding were cast in Vancouver on June 20th.

FOR SALE—Six rebuilt Ford cars in A1 condition, with truck back; also one Ford touring car. These cars will be sold at the right price. Apply Cranbrook Garage, Box 72, Cranbrook B.C.

Creston baseball team was at Copeland for a match on Sunday afternoon, and for the second time put over a win on the Idahoans, this time by a 9—8 score.

Dean Peairs, who was second assistant at the C.P.R. depot last year, and has since been working in Spokane, is here on a visit with friends this week.

The official weather statement shows the Valley to have been favored with quite an oldtime June, the rainfall totalling almost two inches—1.91 to be exact. The hottest day was the 30th, when 95 in the shade was recorded, and the coolest day was the 7th, when the mercury went down to 33.

Oldtime summer weather has been in evidence this week, with the hottest touch of the year on Wednesday, when the official thermometer registered 98 in the shade, and was followed by a thunderstorm on Thursday morning during which .03 of rain was measured. Monday was quite a scorcher, too, the mercury going as high as 95 that afternoon.

Cards of Thanks

Mr. and Mrs. Jas. P. Johnston take this means of expressing their very deep appreciation of the sympathy and kindnesses shown them in their recent bereavement.

It being quite impossible to thank everyone personally Mr. and Mrs. Vaness hope all those who so willingly lent a hand in the search for their son, Henry, who was lost up Corn Creek on Saturday night, will accept this as a very genuine expression of their appreciation of the good work so cheerfully and successfully done.

NEWS OF KOOTENAYS

At Bonners Ferry gasoline is now retailing at 27 cents a gallon.

Rossland fire brigade has just purchased 500 feet of fire hose at a cost of $1.70 per foot.

An Elks lodge has just been organized at Kimberley, by members of the order from Fernie.

The Leaser is greatly disappointed because all four teachers on the New Denver school staff are quitting.

After being without it for at least two years Bonners Ferry is having the six-day Chautauqua again this year.

In the Okanagan the plum and prune crop is reported patchy, and will be little more than half of the 1924 yield.

B. W. Harding, the Greenwood chiropractor, has closed his office in that town and intends to locate in the Okanagan.

Messrs. Sprague and Manning canoed the Kootenay River from Wasa to Waldo, a distance 75 miles in less than eleven hours.

Rossland council has decided to notify citizens that it is illegal to tether their cows on the town streets in order to secure free pasture for the animals.

BLUE RIBBON TEA

Rich! Strong! Delicious!

It stimulates a man for his work in the morning and helps him to forget his troubles at night. Ask for it.

Bovril makes your food nourishing!

The Tide Has Turned

The feeling of discouragement, amounting in some instances almost to despondency and pessimism, that has prevailed in Canada during recent years is passing away. Evidences of this are seen everywhere, and while there are still some croakers and prophets of blue ruin their number is steadily and more and more rapidly declining, while the ranks are filling up with Canadians who are openly giving proof of their confidence in the Dominion and its future.

A study of the Canadian situation, viewed from all angles, provides ample support for this more hopeful feeling, and goes to show that it is based on a solid foundation of facts. If this country suffers from one great national fault it is that, as a people, we take too short a view and are too impatient for results. We are a young country and are too apt to fall into the errors of youth. In an old country like England they do not expect to achieve great reforms over night, or in a year, or a decade. They realize that it has taken generations to effect reforms and advancements from which they now benefit. But too many people in Canada "want what they want when they want it," and become discouraged and discontented if it is not immediately forthcoming.

Having for some time past been engaged in discussing our difficulties and handicaps, let us, for a change, take a look at the brighter, truer side of the picture.

During the twelve months ended March last, Canada's trade was almost two billion dollars, and represented an increase of two hundred millions of dollars over the previous year. And whereas in 1922 our imports exceeded exports by over seven million dollars, in the year ended March last our exports exceeded imports by over $150,000,000.

During this last fiscal year Canada manufactured and exported 15,396 motor trucks as compared with only 3,720 the previous year, and passenger automobiles exported increased by over 9,000.

Canada's flour mills in this last year sold 11,175,000 barrels of flour abroad, or 1,500,000 more barrels than a year ago. In pulp and paper Canada exported $142,000,000, or $20,000,000 more than a year ago. In lumbering and mining, the same story of progress is recorded.

Wheat production in Canada last year totalled 474,000,000 bushels as compared with 161,000,000 bushels ten years ago, and the manner in which Canada is outdistancing the United States as an exporter of wheat is revealed in the fact that during the nine months ended March last the United States exported only $74,000,000 of wheat as compared with $161,000,000 in the corresponding months of the previous year, whereas Canada's wheat exports jumped from $111,000,000 to $158,000,000. In other words, where the United States exported $50,000,000 more than Canada in 1922-23, Canada exported $84,000,000 more than the United States in 1923-24.

These things are having their effect. Employment is much better today than a year ago, and very much better than two years ago. Railway earnings are decidedly better, with a consequent very gratifying drop in the deficit on the Canadian National Railways. For the first time since the war, Canada's national budget has been balanced, and the Government has been enabled to make a start in the reduction of taxation imposed, which, in turn, will have a beneficial effect on all industry.

But it is not in wheat production alone that a marked improvement is being recorded in the industry of agriculture. The growth in the dairy industry of the prairie provinces in recent years has been nothing short of marvellous, and while the livestock industry is still depressed, it is felt that rock bottom has been reached and that the tendency must now be upward towards larger markets and better prices.

Recently the manager of the only existing bank in one of our Western municipalities informed the writer that he did not know of a single farmer in the municipality who had lost money on his operations during 1923, and that he did know of scores of them who had made money and been able to substantially reduce their liabilities, while those fortunate ones without old debts had increased their holdings or their balances in the bank.

Following the depression and ebb of prosperity in the years after the war, the tide is again flowing in favor of Canada. Immigration is increasing, and both people and Government are at last awake to the necessity of acting energetically to secure large numbers of the right type of settlers for this country. Immigration assisted in bringing prosperity and development to Canada in the years prior to the war; it will have the same effect again.

There is, therefore, good reason why the feeling of depression should be fading away. There is no ground for pessimism. The country itself is all right. Mistakes have been made in the past which must be overcome, but they are not insurmountable. Faith and hard work will correct them. These are the main things Canada needs today. We believe Canadians, taken as a whole, are prepared to supply these two requisites.

CHILDREN CRY FOR "CASTORIA"

A Harmless Substitute for Castor Oil, Paregoric, Drops and Soothing Syrups — No Narcotics!

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates. The genuine bears signature of

Chas. H. Fletcher.

Strong Arm Of Labor Party

Philip Snowden, Chancellor of the Exchequer, whose Budget Speech has drawn cross fires of the Opposition.

Entirely in Favor

"Did you favor the honor system at the recent election?"

"I sure did; I voted for it five times."

Women! Dye Faded Things New Again

Dye or Tint any Worn, Shabby Garment or Drapery

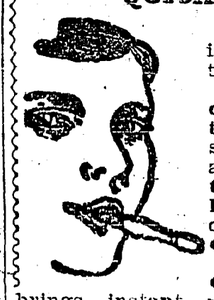
Diamond Dyes

Each 15-cent package of "Diamond Dyes" contains directions so simple that any woman can dye or tint any old, worn, faded thing new, even if she has never dyed before. Choose any color at drug store.

Mineral Production Increase

Official statistics issued by Hon. Wm. Sloan, minister of mines for British Columbia, place the value of the mineral production of the province for 1923 at $41,304,320. This is $6,145,477 greater than the monetary value of the output during 1922, an increase of 17.5 per cent.

NOSE COLDS QUICKLY STOPPED



A neglected cold is the open gateway to Consumption.

To quickly stop a cold, the best way is to clear the air passages of the nose and throat; free them of germs, and let the healing vapor of CATARRHOZONE do the rest. One breath of CATARRHOZONE brings instant relief. Your suffering stops. Hoarseness is relieved, throat and nose are cleared, inflamed bronchial tubes are healed, all danger of Catarrh is prevented.

Carry CATARRHOZONE Inhaler in your purse, in your vest pocket, and use it when the first shiver or sneeze comes. Complete outfit, One Dollar, small size 50c. At all druggists. Refuse a substitute. By mail from The Catarrhozone Co., Montreal.

Dependent Children in Ontario

Approximately 15,000 children under sixteen years of age are dependent upon public charity in Ontario, according to the annual report of the administration of the Mothers' Allowance Act. Homes last year were found for 1,500 children, 2,250 were placed in orphanages, 225 in infants' homes and 436 in shelters.

Requisite on the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

A Timely Melody

An Arkansas man has divorced his wife because she bobbed her hair. Will the orchestra please play that touching melody, "He loved her for her locks of gold and when she lost them love grew cold?"—Chicago Evening Post.

Minard's Liniment for Aches and Pains

Summer Excursions

Canadian Pacific Railway Arrange Attractive Tours to East and West

Preparations for summer excursions, one of the popular features of the Canadian Pacific Railway, are well under way, and give promise of another successful year of passenger traffic.

The mountain resort hotels and bungalow camps operated by the Canadian Pacific are making ready to open their doors on May 15th and June 1st, and in conjunction with the holiday season the passenger department of the railway has ararnged interesting circular trips for both Eastern and Western Canada.

Some attractive round trip excursions have been mapped out and not the least so is the excursion to the Pacific Coast on May 15th, and available all summer until September 30th. Tickets for the Pacific Coast will be on sale from points in Ontario west of Port Arthur, in Manitoba, Saskatchewan and Alberta, bearing the final return limit of October 30th. Stopover privileges are a feature of this trip, giving passengers an opportunity of seeing some of Canada's finest scenery and visiting noted mountain resorts. Circular tour fares which include a trip on the main lines of the Canadian Pacific to Reverstoke and Sicamous, returning through the Arrow or Okanagan Lakes, are always in popular demand for those who love the natural beauty that one finds in British Columbia. These tickets are one sale May 15th with a return limit of October 31st, and are available from points in Manitoba, Saskatchewan and Alberta.

Covering the same time limit the Canadian Pacific will again place before the public summer excursion rates to Eastern Canada from points in Manitoba, Alberta and Saskatchewan. An additional feature for eastbound travellers is the fact that these tickets are honored on the Company's lake boats upon a small extra charge to cover berth and meals.

An Oil that is Famous.—Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

Sapling Sent From Russia

Tree Growing in White House Grounds Has History

There is a young tree with a history in the White House grounds in Washington. As a young man Charles Sumner (who was born in 1811) sent the Czar of Russia some acorns, which that monarch planted in the park of the Imperial Palace as symbolizing Russo-American friendship. From this tree, years later, the American Ambassador to Russia had gathered and planted some acorns; eventually he sent a sapling of the new generation to President Roosevelt, who, April 4, 1904, planted it in the White House grounds. This date was "exactly thirteen years before the day on which the United States joined hands with Russia and other European countries in the greatest conflict the world has ever known."

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

She.—How is it that widows generally manage to marry again? **He.**—Because dead men tell no tales.

MADE IN CANADA

SOLD AND RECOMMENDED BY GROCERS EVERYWHERE

He Was Game

"No, darling, you mustn't have any more pudding; you would be ill."

"Well, give me another piece and send for the doctor."

GIRLHOOD DANGERS

Can Be Avoided by Keeping the Blood Rich and Pure

The anaemia of young girls may be inherited, or it may be caused by bad air, unsuitable food, hasty and irregular eating, insufficient out-door exercise and not enough rest and sleep. It comes on gradually, beginning with languor, indisposition to exertion and a feeling of fatigue. Later comes palpitation of the heart and headaches. In the majority of cases constipation is present, and the complexion takes on a greenish-yellow pallor. The treatment is quite easy and simple. Dr. Williams' Pink Pills are just the tonic to remedy this wretched state of health. They act directly upon the blood, and as it becomes rich and pure, strength and activity returns, the glow of health comes to the cheeks, and soon the trouble will disappear and good health follow. Miss Pearl Parks, R.R. No. 1, Reaboro, Ont., has proved the value of this medicine, and her statement will point the way to health to all other weak girls. She says:—"I was very ill with anaemia. I could not sleep at night; my appetite was poor, my face and lips were very pale and my eyes dull. I got so weak that I could not go upstairs without resting. I took dizzy and fainting spells, had no ambition whatever, and did not care to go about. I was in this condition for nearly a year. I had treatment from two doctors; but did not regain my strength, so my mother, who was very uneasy about me, decided I should try Dr. Williams' Pink Pills. After using the pills for a while I felt somewhat better, and continued taking them until I had used about a dozen boxes, when I was again well and strong. I can strongly recommend Dr. Williams' Pink Pills, for the treatment of any suffering from anaemia."

You can get these Pills from any medicine dealer or by mail at 50 cts. a box from the Dr. Williams' Medicine Co., Brockville, Ont.

In 1919 the Bureau of Mines found 465,000 men in American mines from non-English-speaking races, many of whom were illiterate.

"Child's Eyelids Inflamed Stuck Together and Bled"

Mr. E. P. Kimball, Entwhistle, Alta., writes:

"Our little girl from birth was troubled with inflamed eyelids and in spite of several remedies, grew worse until at the age of sixteen months her eyes could not be opened after sleep without bleeding, a waxy discharge sticking the lids together and adhering with great tenacity. The child's grandmothers were consulted by mail, and both responded with a little sample box of Dr. Chase's Ointment. These were used as directed, and lasted until we could obtain a further supply from Edmonton. Improvement was very marked from the first application. The waxy discharge was easier removed and did not reappear. Inflammation subsided and has not returned."

Dr. Chase's Ointment

60 cts. a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto

Prest Air Ice Is Expected To Revolutionize The Entire Science Of Refrigeration

—Prest air ice—one of the wonderful discoveries of the age—is destined beyond all pre-adventure to revolutionize the entire science of refrigeration. And what a tremendous force in our national life refrigeration has become. When this continent was first peopled, the settlements were largely scattered along the more important waterways and these unpolluted streams returned an annual harvest of natural ice adequate to the limited demands of the times. But as the country has developed, as region upon region has opened up and peopled, as the problem of food distribution have become more and more complicated, and as the uses of ice and refrigeration have become infinitely more numerous, the waterways and the streams of the country have become for the most part too polluted for their ice to be used for human consumption, and we have had to resort increasingly to the artificial product, so that last year out of a total consumption for the United States and Canada, of seventy million tons, more than half of the total was artificially produced. And to produce this forty million tons the combined activities of six thousand ice plants of varying capacity were necessary.

First successfully demonstrated more than a century ago, artificial refrigeration did not come into general use until approximately forty years ago, while mechanical refrigeration is only about thirty years old. Since that time, however, the production of ice by artificial means has become universal, especially on this continent where it is an indespensable necessity of the national life.

Prest air ice, which, as we have stated, is destined to revolutionize the refrigerating industry, is the joint discovery of two eminent scientists, Walter S. Josephson and Thomas B. Slate, and is the culmination on the part of these two men of many years of patient and diligent research, during which time a veritable fortune has been expended. But at last it can be said without fear of contradiction that the scientists have demonstrated conclusively that this new form of refrigeration is a real commercial success.

Prest air ice is the ultimate result of a myriad of experiments that have been made by its inventors and the utilization of liquid carbon dioxide in the realm of power. Messrs. Josephson and Slate found that carbon dioxide, thoroughly prepared and properly treated, when compressed to liquid form, would accomplish such work as jacking up automobiles and many other useful functions where power is portable and compact form was required, and from this knowledge they evolved an industry—the Prest Air Corporation—that is said to be one of the fastest growing developments in the land.

In their experiments, the inventors encountered so much difficulty from the freezing of their apparatus that they determined to work intensively in this new suggested field, and finally succeeded in developing a basic method of freezing the gas into snow and pressing it into a substance closely resembling ice, hence its name—Prest Air Ice. This new ice has a critical temperature of 114 degrees below zero Fahrenheit, as compared with a critical temperature of 32 degrees Fahrenheit for practically all natural and manufactured ice.

Prest air ice is absolutely moistureless, reverting to gas upon evaporation. It is the only absolutely sterile atmosphere yet discovered to science, and as no bacteria or other germ life can exist under its influence it constitutes beyond question the most efficient preservative of foodstuffs yet evolved. Scientists of the Mellon Institute, indeed, have declared, after elaborate experimentation, that this gas is competent to destroy even the germ of typhoid, and that it possesses unquestioned powers for the correction of infection.

One of the advantages of prest air refrigeration lies in the fact that with its employment it will be possible to fix and maintain any desired temperature from 114 degrees below zero Fahrenheit to 78 degrees above, and this wholly irrespective of outside temperature. Thus, it will be possible to ship a carload of fish from seaboard to an interior point with a predetermined temperature in absolute assurance that there will be no deviation of temperature throughout the journey.

One of the chief fields for this revolutionary discovery in refrigeration will lie in the sphere of transportation. Last year the railroads of the United States and Canada consumed nearly fifteen million tons of ice in refrigerating their cars, which at a basic price of four dollars a ton at a plant would mean the primary refrigerating charge of at least sixty million dollars annually. So serious, indeed, as this problem become to the common carriers that many of them have deemed it advisable to build their own refrigerating plants, and many more are contemplating similar action.

Let us visualize for a moment what the application of prest air refrigeration will mean to the railroads of this continent. Under the existing conditions, 20 per cent. of the entire car space is required for bunkering of the ice, while every refrigerated car must be re-iced once every twenty-four to forty-eight hours, thus a transcontinental fruit train from California to New York reqrires six distinct reicings, and a similar car containing frozen products such as fish, would have to be re-iced at least twelve times.

The Prest air system, however, would eliminate entirely the need of bunker space, as the entire car will be cooled from four containers placed in the corners and occupying none of the cargo space, while the lasting qualities of the ice itself are so much greater that it will be possible for a car to cross the continent without having to be re-iced at all; in fact, it has been demonstrated that a car under this system can be kept in perfect condition without re-icing for fourteen days.

Prest air refrigeration will mean a saving of millions of dollars in the annual ice bill of the railroads, but that saving will be small indeed in comparison with the untold millions of dollars that should be conserved to the railroads through the great increase cargo capacity and the elimination of the huge transportation charges on the millions of tons of water ice that have to be carried under existing conditions. Nor can one exaggerate the tremendous benefits that will accrue to the railroads and to the country through the bringing of the market nearer to the source of supply by so effectively reducing the running time of the average refrigerator trains.

Bright Future For the West

D. B. Hanna Predicts Renewed Prosperity For Prairie Provinces

D. B. Hanna, of Toronto, is still, as ever, a firm believer in the future of the west. Interviewed by the Manitoba Free Press, Mr. Hanna said that farmers generally were once more seeing things from a right perspective and he considered that this made the future of the great west assured.

"There was a time," said Mr. Hanna, "when the farmers had got slightly out of line with regard to their perspective and were cultivating large areas, seemingly under the idea that wheat would always remain at a $2 level. Now, however, they are getting down to being real farmers, paying strict attention to the raising of cattle and hogs, and it is from this chiefly that I prophesy renewed prosperity for the west."

COULDN'T SLEEP HEART WAS BAD NERVES A WRECK

Mr. H. A. Reid, Upper Musquodoboit, N.S., writes:—"I am very thankful for the benefit I have received by using Milburn's Heart and Nerve Pills.

When I came home from overseas, in 1920, my heart was very badly affected by concussion, and my nerves were a dreadful wreck. I was very short winded, and could not possibly sleep at night, in fact, I was in such a condition I felt as if I did not wish anyone to speak to me. I thought I would try Milburn's Heart and Nerve Pills, and before I had taken two boxes I could enjoy a good night's rest as well as anyone.

There are lots of returned men who are suffering the same as I did, and I feel sure if they would only try Milburn's Heart and Nerve Pills they will receive the same relief that I have."

Price 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Record Handling of Fish

A record for loading and handling of fish was established by the Canadian National Railways when thirteen cars of fish were unloaded off trawlers at Prince Rupert at 7.25 p.m., April 23, and arrived in Winnipeg at 9 a.m., April 26. The fish were consigned to Winnipeg, Duluth and Chicago, the time occupied in the run from Prince Rupert to Duluth being 86 hours and from the seaboard to Chicago 101 hours and 5 minutes. This time is 21 hours ahead of the fastest time ever made previously, according to Canadian National Express officials.

Loafer.—There ain't no flies on me. Coster.—I believe yer. Even the blinkin' flies must draw the line somewhere.

The Post-War Wealth Of Leading Nations Is Shown To Be Appreciably Lower

World-Wide Butter Prices

No Other Article, Except Precious Metal, So Uniform in Price

Butter, like gold, has a world-wide standard of value, it is pointed out in a review of the 1923 market by the California Diary Council. The review says:

"Milk may be produced, manufactured into butter and sold to a housewife within a radius of ten miles, but the price of that butter is determined by conditions in the four corners of the world.

"No other article of commerce, except the precious metal, is so uniform the world around as the product of the dairy cow, of which butterfat is the foundation. Whether it comes from New Zealand or Nova Scotia, Denmark, Wisconsin or California, it is simply butter when it reaches the markets of New York, Chicago and San Francisco, and the price in all cities, with due allowance for slight freight rate differentials, are practically the same.

"During 1923 average prices of dairy products throughout the country increased—butter 17 per cent., cheese 13 per cent., condensed milk 30 per cent., and marketed milk 13 per cent."

The dairy council said butter increased in almost the same proportion everywhere, from an average of 40 cents a pound to an average of 46.7 cents, but in California the increase was slightly less, being from 42.7 to 47.6 cents.

Consumption of dairy products in this country increases faster than the supply, according to the review.

Prevent Spread of Cattle Epidemic

Vancouver Board of Trade Take Steps to Curb Disease in British Columbia

Preliminary steps were taken by the Vancouver Board of Trade to arrange for a conference of medical health officers of the provincial government, civic corporations, livestock authorities and others interested in combatting any spread of the California cattle epidemic northward.

The idea is to hold a conference and formulate definite plans for the protection of the cattle of British Columbia from any form of contagious contact with animals which have been exposed to the foot and mouth epidemic in the south.

The dairying industry is one of the most important phases of farming in the province, while the beef cattle ranges in the interior add greatly to the total of productive enterprises. It is to safeguard these that the conference is being arranged.

Chinese Coal For Canada

Lo Chong, the new Chinese consul-general, who arrived at Ottawa recently, announces that he is intending to take up the question of the establishment of a market here for Chinese coal. There is sufficient surplus coal in his country, he says, to supply Canada for the next hundred years. Chong is an Oxford University graduate.

The aggregate pre-war wealth of the 20 odd nations actively engaged in the great war, according to an estimate just completed by the research department of the Bankers' Trust Company of New York, amounted to $630,000,000,000. The wealth of these nations today is estimated to be about $619,000,000,000. The pre-war wealth of the British Empire, that is of Great Britain, the Dominions, India and the Crown Colonies, was approximately $140,000,000,000, while today the wealth of the same group of nations is estimated by the Bankers' Trust Company to be around $149,000,000,000. The wealth of France before the war is placed at just under $60,000,000,000, and is estimated to be approximately the same today. The pre-war wealth of the United States is placed at $200,000,000,000 and the wealth today at $230,000,000,00, while the pre-war wealth of Germany is estimated to have been upwards of $8,000,000,000 and today to be about $55,000,000,000. These figures are all on the gold pre-war basis of values, having been adjusted for inflation.

The per capita wealth of Great Britain today is placed at $1,489 and of the different nations composing the British Empire at $418 including the wealth and population of India, or $1,046 excluding the wealth and population of India. The wealth of France is estimated in 1913 to be $1,484 per capita and of the United States $2,090 per capita. The wealth of Germany is placed at $901 per capita. The Bankers' Trust Company points out that the total wealth of the former belligerents has not materially changed as a result of the war, but that there has been a marked redistribution of such wealth, this redistribution having taken place not only as between nations but also as between peoples within the boundaries of each nation.

Swollen Joints, Quickly Limbered Up

Rub On Nerviline

You would be surprised at the wonderful action of "Nerviline" in just such cases. Being thin and not an oil preparation, it is able to penetrate quickly, and down it sinks into the tissues, carrying its healing, soothing action wherever it goes. For stopping mucular or nerve pain, for easing a stiff joint, Nerviline is a complete success. Pain, soreness, stiffness all vanish before the magic power of this wonderful liniment. Nearly fifty years of success proves the merit of Nerviline, which is sold everywhere in large 35 cent bottles.

Banting Honored Again.

Dr. F. G. Banting, of Toronto, was awarded the John Scott medal by the Philadelphia Board of City Trustees for his work in the discovery of the insulin treatment for diabetes.

Local and Personal

BIRTH—At Cloverdale, B.C., on June 20th, to Mr. and Mrs. J. D. Siddons, a son.

W. Jones, principal of Creston public school got away on Friday to Victoria, where he is attending summer school during the vacation period.

Mrs. W. B. Martin and children left on Friday last for Nelson, where they are spending a few weeks' holidays with her brother, who is now a resi dent of that city.

Dr. Lillie, dentist, is remaining in Toronto for the Dominion Dental Convention which meets this month, and will not be coming to Creston until his August dates.

The Women's Institute flower show on Friday afternoon last was quite a financial success, the receipts from the tea and sale of cooking being in the neighborhood of $25.

Bathing Suits!

94 in the shade on Monday forcibly reminds that summer is here, and one of the big troubles of the day is to keep cool.

Why not go bathing often. Nothing like it to cool you off, and keep you fit for the day's work.

Our stock of Bathing Suits is complete and includes

Men's Cotton Bathing Suits

Men's Wool Bathing Suits a good assortment to pick from.

Boys' Cotton Bathing Suits

Ladies' Wool Bathing Suits

Latest patterns. Prices 95c to $4.25.

MAWSON BROTHERS

Better Service — Lower Prices

FOR SALE—Jersey cow, six years old, freshened June 15th, first class milk and butter cow. Price $100. Mrs. O. Davidge, Wynndel.

FOR SALE—One open back buggy with pole and shafts; single harness, with collar; double driving harness; all in good condition. Price $110. C. S. Parker, Cranbrook.

Miss M. L Wade, who has had charge of Division III. of the Creston school for the past two years, left on Friday to spend the summer vacation at her home at Cloverdale.

Mr. and Mrs. C. G. Bennett were motor visitors to Cranbrook on Sunday, going that far with the children who are to spend the summer with their grandparents at Invermere.

Members are reminded of the July session of Creston Board of Trade on Tuesday night. Both reclamation and municipal matters are sure to be to the fore and a full turnout is desired.

A number from here are planning to spend today—July 4th—at Bonners Ferry, where there is a big celebration planned. Jimmy Lockhead is taking his two running horses down for the races.

Monday was the last day for adding names to the voters list that will be used at the first Creston village election which is scheduled for July 28th. The first list shows a total of about 115 names.

A petition has been in circulation the past few days asking the public works department to proceed with the road diversion which will eliminate the present heavy grade at the Crawford hill.

Miss Henderson, who has been here for a couple of weeks' visit with her sister, Mrs. Corp. Smith, left for her home at Cardston, Alberta, where she is on the nursing staff in the hospital in that town.

Mrs. O. P. Wisler of California is a Creston visitor at present, the guest of Mrs. T. Goodwin. Mr. and Mrs. Wisler were former residents of Creston, leaving here for the south about twelve years ago.

Miss Laxton, teacher of the primary room of Creston school, is at her home at Mission City for the summer vacation. She has turned in her resignation to the local trustees and will not be on the staff next term.

Miss Brett of the public school staff, left on Friday to spend the summer vacation at her home at Armstrong, and will not be returning to Creston, as she has taken a position on the teaching staff of the Powell River school.

The raspberry crop is beginning to move in quantity this week, and if seasonable rains are experienced from now on the crop promises to be even larger than a year ago, when over 6000 crates were shipped out of the Valley.

The official count of the ballots cast in the Creston riding on June 20th, takes place at the office of returning officer Russell Leamy, next Friday. The absentee vote is not heavy but will most likely increase the majority of Col. Lister.

Mrs. Hopwood and children are visiting with Macleod, Alberta, friends this week, taking in the jubilee celebration in that town which runs for three days, starting Tuesday.

Ratepayers are reminded of the annual meeting of Creston school district which is announced for Saturday night, July 12th, at the schoolhouse. F. H. Jackson is the retiring trustee, and Dr. Henderson's term as auditor has also expired.

Growers report that robins are unusually hungry this year, and due to the light cherry crop are doing heavy damage in most orchards. The American flicker, which made its appearance last year is back again in larger numbers than ever.

Plenty of moisture may be looked for this month according to Foster, whose July forecast is for plenty of rain in those localities that were dry in March, April and May. For those three months the Valley's total rainfall was less than an inch.

Creston Women's Institute July meeting will be held in the Parish Hall on Friday evening, July 11th, at 7.30. After the business session there will be a short entertainment assisted by the band and to this the public is invited. A silver collection will be taken.

The Vancouver Province of June 25rd contained the names of the Vancouver General Hospital 1924 graduate nurses who had successfully passed the medical council examinations for the registered nurse diploma. The name of Miss Muriel Hobden stood well up in the list.

Const. J. S. Clark, R.C.M.P., who was stationed at Creston up till about a year ago, and had since been at Regina, Sask., has been ordered north and left last week for Fort Rae, which is on the Great Slave Lake. He goes north with the judge and party from Edmonton, who are to conduct an Eskimo murder trial at Aklavik, and it will take just twenty-eight days to make the trip.

The Mission Band of the Presbyterian Church had their annual picnic at Glengariff Park on Saturday afternoon, the boys of the Standfast Club being also present as guests. The park is an acre tract across the K.V. at the Dow ranch, which was turned over to the Standfast boys by Mr. Dow as a playground at the club outing on Queen's Birthday.

A. Comfort, on the former Hurry ranch, has just completed the installation of a pump irrigation system that is giving great satisfaction. He is getting water from what is known as Mallandaine slough, and with a 5 h.p. engine is putting it through about 500 feet of pipe up an elevation of 85 feet, and putting water on the ground at the rate of 1800 gallons an hour. He is using it on the vegetable field, and in the extreme heat that prevails the slough water produces remarkable growth.

Did YOUR Statement Satisfy You?

By now you will have had a statement telling you what the first of your Strawberries got you. After waiting almost a month for some money we venture the prediction that you are not exactly satisfied.

Your statement probably shows prices lower than you were led to believe they would be, and after the month's wait you will have less money than you expected.

Why continue this hide-and seek way of doing business when we can handle all of your Raspberries, Cherries, Currants; yes, and even Gooseberries, on the Cash-on-Delivery plan.

We are taking on new customers every day, and would be glad to take on the selling of your entire crop.
