THE CRESTON REVIEW

Vol. XVI. CRESTON, B.C., FRIDAY, OCTOBER 24, 1924 No. 37

Formally Protests Lake Level Raise

The October session of Creston Board of Trade was very largely given over to a discussion of Kootenay Flats drainage matters, this subject coming to the fore as a result of the executive having last month filed a formal protest with the provincial board of water commissioners against the granting of the proposed storage license to West Kootenay Power & Light Company, which, if conceded, will raise the low water mark of Kootenay Lake a matter of six feet and thereby jeopardize hay cutting on the flats. The protest sent to Victoria is as follows.

1. That a number of the residents of this District organized into the Creston Valley Stockbreeders Association have hay cutting previlages on the Kootenay Flats, and have no assurance from any authoritative source that such application will not effect the hay cuts, and in the absence of such assurance view with alarm any action which might prejudice the said hay cuts upon which is dependent the Live Stock and Dairying Industry of the Creston Valley.

2. That the project for the Reclamation of the Kootenay Flats might be jeopardised inasmuch as the applicants propose to erect a control dam at or near Granite which it is believed is the point at which a control dam would be erected under the plans for the said Reclamation—and further that the channel above the said proposed dam contains obstructions which would be required to be removed in order to effect the said Reclamation, that objection may be raised by the applicants to the removal of such obstructions and to other works proposed in aid of Reclamation on Kootenay Water—and that the City of Nelson under took hydro electric power development and further that the raising of the level of Kootenay Lake six feet as proposed by the applicants may, and in the opinion of the United States authorities, will interfere and make impossible the natural internal drainage of the better lands, especially after these lands have subsided as they undoubtedly will when Reclaimed, and further objects that competent engineering authority should consider the construction proposals of the Applicants to decide whether the same will affect the proposed works for the Reclamation of Kootenay Flats, and furthur objects that the best and true interests of the people cannot be determined by the Board of Investigation until the joint reports of Mr. Swenson and Mr. Cleveland referred to in the letter of the Comptroller of Water Rights to the Director of Reclamation Service at Ottawa bearing date February 9th, 1923, is available for consideration, and has been thoroughly considered by it, and the Board assured that the insurance of the licence will not result in irreparable and disastrous effects to the agricultural development and value of the Kootenay Flats.

While objection might be raised that these objections are not filed within the Statutory thirty days, it is submitted that they should receive recognition in view of the long standing international interstate importance of Kootenay Flats Reclamation as a factor when Kootenay Waterways Development is under consideration.

After the board had by resolution approved of the action of the executive in this matter a letter was read from the comptroller of water rights in which he acknowledged receiving the protest and stated that it would be considered at the next meeting of the commissioners at Victoria. To this the secretary was instructed to reply asking that the board sit at Creston so that the question could be gone into thoroughly, which would be only possible by a meeting of the commissioners with all interested at Creston.

The whole question of drainage will be gone into with Premier W. L. Mackenzie King who will be passing through Creston on Monday en route east from the coast. President Garland and Guy Constable will comprise a deputation who will go to Nelson to meet him and arrange for a conference on the subject on the boat trip and a from the train inspection of the area between Sirdar and Creston. L. W. Humphrey, M.P., has intimated that if it is desired he will also accompany the premier to Creston and give the delegation what assistance he can in addition to introducing them to the premier and his party.

Up to the present no reply is to hand to the board's September resolution that the telegraph and express companies should put on a free delivery within the village limits, and the village commissioners have notified that the matter of fire protection is having consideration.

Attention Men Folks!

We have just received the Fall Samples of the Tip Top Tailors.

Call in and see them.

You are under no obligation as it is a pleasure for us to show them to you, whether you buy or not.

One price only; $27 for either Suit or Overcoat.

MAWSON BROTHERS
Better Service Lower Prices

1923 Apples Displayed

Some of the Red Cheek Pippins from Creston, which were selected about a year ago for display at the British Empire Exposition at Wembley, England, by Mr. DeHart, have been brought back from the Old Country by him and along with some of the other varieties gathered from Okanagan points were on display in a Vernon store window early this month. The fruit was on display up till August 16th and again returned to cold storage to await the return to Canada in the ordinary way. After being off the trees a year and making the two ocean trips the fruit is said to have looked as good as when picked.

H.S. Lit. Officers

After having the matter under consideration since the opening of the term the high School students have decided to reorganize the Literary and Debating Society and at a meeting on Friday afternoon the following officers were elected for the ensuing term:

President—Gladys Wolstenholme.
Vice-President—Olaf Payne.
Secy. Treas—Edith Crawford.
Entertainment Committee—Jeanne Hall, Ted Staples, Herb Manuel.

Principal Fleming and Miss Cassie were elected honorary president and vice-president respectively. Only the teachers and students at the high school are eligible for membership and the fee is 25 cents.

According to the Herald there has been more bootlegging in fruit at Penticton this year than ever before.

Canyon City

The ladies of the Community Club are busy with the selling of about 100 tickets on a raffle of a gents handmade sweater, the proceeds to go to the building fund.

Mr. Garland is rushing construction work on a new barn and is hoping the fine weather will hold out until he has it completed.

Mr. Montgomery, a travelling photographer whose headquarters is at Chase, is here this week taking pictures at a number of the homes.

Mr. Wetherhead was down from Yahk for the weekend. At one of his camps on the higher levels eight inches of snow was experienced during the stormy weather earlier in the month.

Quite a number from here were at the whist drive at the home of Mrs. Byrne, on the Lyon ranch, on Saturday night. The affair was very much enjoyed, lunch being served in time for dispersal just before midnight.

Manford Samuelson got back on Wednesday last from Strome, Alberta, where he has been helping with harvest and threshing work for the past two months. In that section he states the grain threshed out about 22 bushels to the acre.

Mr. Robinson is busy at present with the erection of a garage and poultry house on his place here. We understand that he will specialize in turkeys, and will also have a very large flock of hens.

The Ladies' Community Club are expecting a large turnout at their usual hallowe'en whist which will be held at the schoolhouse on the 31st.

Mr. Samuelson is about there days recovering from the effects of his rather close call from serious injury when the Jersey bull turned on him a few days ago. The Review was in error last week in stating that the mishap befell Mrs. Samuelson.

The Ladies' Aid are already planning for their annual Thanksgiving dinner which will likely be held in the schoolhouse on the evening of November 10th.

Local and Personal

T. Lytle, jeweler, is spending a couple of weeks at his ranch at Crawford Bay.

C. B. Garland is the latest to install a radio in Creston, getting his set into operation at the end of the week, and readily picking up broadcasts as far east as Chicago. This makes the ninth radio installation in the Valley.

H. S. McCreath unloaded the first car of coal to reach Creston this season. It is from Medicine Hat, Alberta and due to the settling of the miners strike with a reduction in wages it is likely Creston will get its coal about a half dollar cheaper than last winter.

Village clerk Taylor is having quite a busy time of it this week issuing tax receipts to those who had paid their dues to Nelson before the end of June, the provincial treasury at Victoria now making the necessary refund to those who have sent back their tax receipts.

All exhibitors and others who purchased membership tickets for this year's fall fair are reminded of the annual meeting which will be held in Speers' Hall next Friday evening, October 31st. The financial statement will be presented and directors elected for next year.

At the board of trade meeting on Friday night President Garland and Guy Constable were named a special committee to wait on Premier King on his trip through here on Monday to present the case against issuing a license to the power company which will raise the lake level six feet. They will probably go to Nelson on Sunday night.

F. B. Turner has just disposed of his residential property on Hillside Road, near Holy Cross church rectory, to Albert Davies, hard surface road foreman who will get possession almost immediately, Mr. Turner planning to leave for the coast due to failing health. Since losing his home by fire in May, 1923, Mr. Davies and family have been living at Alice Siding.

Friday next is hallowe'en and now the village is incorporated the commissioners will swear in special police for that night for the protection of property within the corporation. Fun of the village variety of any sort is not objected to, but where sidewalks are ripped up and other property damaged or molested every effort will be made to apprehend and prosecute the guilty parties.

Alfred Nelson of Creston Valley Produce Company, is rushing shipping operations so as to clean up the carload shipping by the end of the month. At the weekend he loaded a car at Creston on Saturday, and a car each at Wynndel and Sirdar on Sunday, and was busy on another at Creston on Wednesday. He is the first to ship apples in carload lots out of Sirdar his shipping this year at that point being just over 8000 boxes.

Crestonites who were outdoors about 4.45 Monday afternoon had a good view of the second airship to fly over this section since the war. Monday's airman came from the direction of Kootenay Lake turning south at a point above the C.P.R. station, flying quite low. The only other aviator to navigate the Creston ozone was Lieut. Hall, whose plane was wrecked at Canyon City in 1919, when he attempted to hop off after being forced to alight for gas on his Vancouver-Calgary flight.

Thanksgiving DINNER

The Methodist Ladies' Aid announce their Thanksgiving Dinner in the

Methodist Church

on

Thurs., Oct. 30

6.00 to 8.00 p.m.

ROAST CHICKEN
PUMPKIN PIE
and all seasonable delicacies.

Adults 50c. Children 25c.

Kitchener

Miss Jessie McGregor, principal of Kitchener school, was a weekend visitor with her sister in Fernie.

Mr. Curran has gone to Tacoma, Wash., for a visit with his family. He is certainly missed here as Kitchener now has no Sunday school.

Jos. Lapplois was a business visitor at Creston on Monday.

Dan McDonald, who had his leg broken some time ago has returned home from the Cranbrook hospital, but is still quite lame.

Kitchener is the quietest it has been in recent years just at present, as neither Paulson-Mason or Sash & Door mills are operating.

M. J. Boyd, who is in charge of construction at the new bridge at Meadow Creek, was a weekend visitor at his home in Creston. The work is progressing favorably but will not be completed until at least the middle of November.

Pete Belanger of Bull River was a weekend visitor with Kitchener friends.

Erickson

Mrs. R. M. Reid of Macleod, Alberta, who is renewing acquaintances at Creston and Erickson, is a guest of Mrs. Bundy this week.

Mrs. Fred Klingensmith and children, who have been visiting in eastern Canada for almost the past four months, returned a few days ago, and for the present are making their home in Creston.

Apple picking will be completed in this section by the end of the week and in almost every case it looks as if the crop will be larger than the early-season estimates.

Alf. Palmer is the first in this section to acquire a new 1925 model car, having this week taking delivery of a 1925 Ford.

T. W. Bundy is a Cranbrook visitor this week, where he is consulting Dr. Green, and in his absence the depot is in charge of Henry Chester.

It is expected the rock crusher will be shifted back to its former location here this fall so that an early start can be made at getting out the crushed material for improvements on the road in this and the Canyon section next spring.

Frank Palmer was a visitor at Cranbrook a couple of days early this week, returning on Wednesday.

At both packing sheds work is being rushed at top speed, Growers, Limited, expecting to finish the years pack early next week, but the Exchange will not complete operations until the middle of the month at the earliest.

Bert Boffey and John Andrew were Cranbrook visitors the latter part of the week, the former delivering his fine roadster to a buyer in the city.

While on a duck hunt on the flats on Tuesday Dick Penson had the bad luck to lose the third and the fourth toes on his left foot when the shot gun he was operating with accidentally discharged. One toe was shot completely off and the other had to be removed by Dr. Henderson, who attended the injuries when Dick arrived home in a car.

In the absence of any tidings fro Kuskanook it would seem safe to predict that whatever Florida weather that is going this fall has shifted to Erickson where ripe strawberries were gathered in the Holder garden on Wednesday morning and an abundance of ripe tomatoes are still untouched by the frost, whilst at the Levesque ranch the harvest of cantaloupes is still in full swing.

Cranbrook teachers have purchased a Singer sewing machine for the needlework classes at the school. The purchase price was secured at a concert given by Mrs. Todd of Victoria a few nights ago.

NEVER FIRE FIRST

— BY —

JAMES FRENCH DORRANCE

Co-Author of "Get Your Man," "Glory Rides the Range," Etc.

(Serial Rights Arranged Through F. D. Goodchild, Publishers, Toronto)

(Continued)

"He came here shortly before noon," explained the sky-pilot. "Said the scarlet special had brought him a summons to Ottawa that could not be denied. He meant to ask you people to take charge until his relief arrived. His years of pioneer service in the North had been rewarded at last, he told us, and he was to be made a high official of the Arctic at the Ottawa headquarters. Naturally, we rejoiced with him."

"The nerve of the scamp!" exclaimed the sergeant. "The only word the special brought was a warrant for his arrest. He has been robbing the company for years and they've just found him out—got the proof. I came to arrest him He must have surmised that the coming of the special meant only one thing and decided to make his get-away. And howling sun-dogs, this warrant I hold is a secret one! No general alarm has been sent out. Can I see Miss O'Malley—perhaps he's told her something of his plans? In the interests of justice, after she's seen the warrant, I'm sure she'll not protect him, much as she dislikes me."

The missionary seemed stunned. He bent over in his chair and cupped his hands over his eyes in an attitude of prayer.

"Good Lord, forgive us for our sins of omission," Seymour heard him murmur. "We are but mortal and the flesh of all mortals is weak. How were we to know——"

"Here, here!" interrupted the sergeant impatiently, although he had respect enough for prayer. "It's not your fault that Karmack got away or that you let him use Mission House in his courtship. You good folks couldn't have known he had done anything wrong. Send for Miss O'Malley at once. I've no time to lose."

Luke Morrow forgot his supplications for pardon and sprang to his feet. "No time to lose. You're right. That scoundrel was persuasive and we were weak. Karmack took Moira with him, offering her safe conduct to her friends and home in British Columbia. We'll never forgive ourselves for——"

But Sergeant Scarlet was gone in too great a hurry to close the door behind him.

CHAPTER XII.

Living Targets

Like a Windigo boodie of the sub-Arctic on the trail of a craven Cree, Sergeant Seymour pushed through the white silence in pursuit of his fugitive. If the capture of Harry Karmack, embezzler, spurred him officially, the saving of Moira O'Malley from the fate that seemed in store for her lent wings to his snow-shoes. To himself he did not deny the fact that the personal interest was the most potent. There would be weeks and weeks, if required, to run down the dishonest trader. Didn't the Royal Mounted always get their man? But there were only hours, he sincerely believed, in which to spare the most beautiful feminine creature he had ever seen a lifetime of humiliation and grief.

This was no night for travel. All the rules of Northern trails forbade it. With the spirit thermometer down to sixty-five below, he should have been snugly in camp in some snow bank, wrapped in rabbit-skin robes or encased in a sleeping bag, with his malamutes snuggled around him. The spirit within that enabled him to defy the inexorable grip of the frost was the same that had not permitted him to delay pursuit's start an hour.

Frankly, he would not have gone out that night after Karmack had the rescal been escaping alone. Considering the factor's passenger, however, nothing could have kept him at the Armistice detachment post.

There action had been swift once he had the full news from Luke Morrow. At quarters, he had turned over the post to Corporal Le Blanc. He was to keep the Arctic company's trade-room and furs under seal; to do no trading except that which the welfare of visiting Indians and Eskimos demanded. Hardship might be worked if the trusting natives came in to exchange their furs for supplies and found no mart. The two Eskimo murderers were to remain under open arrest unless they displayed signs of wanderlust after his departure. La Marr was to take no chances with his injured leg, the corporal to make such patrols as were absolutely necessary. Thus, like a good commander, he prepared for the all-too many eventualities of winter travel.

Morrow had followed him to police quarters almost at once with an offer of the Mission House malamutes for the stern chase—stern in more than one sense of the word. Knowing that both the police teams were worn out—the one of the scarlet special and the other of mercy's errand—Seymour had accepted the mission's team, although he preferred always to drive his own dogs when they were in the least fit.

From Morrow, he had details of Karmack's morning visit which had resulted in Moira's unfortunate decision to attempt to go "Outside" under his escortage. Karmack had said he meant to take the shortest course to the Mackenzie on the frozen surface of which he expected to find a more or less traveled trail. He would be delighted to have Moira's company. She could drive her own team and would find it easy to follow his own huskies. They would have the Arctic's interpreter, a famous musher, to break trail and keep them on the right track. It would be an express trip, he had declared, and she would find herself with her friends before she knew it.

"Emma and I tried to dissuade her from taking the chance," the missionary had told Seymour with tears in his voice, "but the temptation was too much for the girl. We assured her she would be welcome to spend the rest of the winter, but she wanted to depart the scene of the tragedy."

At the moment, Seymour had wondered how much her ill-founded disappointment in him had affected her decision. And this thought kept recurring to him now as he followed the double sled trails. It clinched his determination to overtake them at the earliest possible moment.

Fortunately there was no wind tonight and he had nothing to contend against but the bitterness of the cold. He was travelling "light" with caribou pemmican, hardtack and tea as the major contents of his grub sack. The mission dogs were running as if out for an exercise jaunt; but the air was too frigid to permit much riding for their driver. Often he had to hold them back that he might not become absolutely winded.

Already he had proved one lie in Karmack's statement to the girl and the misisonary, as reported with undoubted truthfulness by the latter. The fugitive was not headed directly for the Mackenzie River, the natural highway "Outside." That would have taken him by the Wolf Lake trading and mission station. Even in the night, the sergeant recognized the ridge they were following and that there had been a sharp veering to the southwest. The course would bring them to the river far from any outpost and doubtless Karmack, if he got away, would continue to avoid all such on the way up river until certain he had out-distanced any pursuit.

The possibility that already the girl regretted her hasty decision to leave the Morrows occurred to him as a possible reason for Karmack's change of course. If she had threatened to give up the attempt upon reaching Wolf Lake, the factor, naturally, would give the other missionaries a wide berth. But cheering as was the idea, he soon dismissed it. Moira O'Malley was not the sort to turn back on an endeavor, and it was improbable that there had been any alarming overtures from Karmack so early in the wild project. He was clever, was Handsome Harry, and, by his own boast, experienced with women. He would wait until he had completely won her by the countless services that would crop up on a trip of this sort.

All the more reason, then, for Seymour to overtake and capture before they got beyond reach of return to Armistice. Again and again his goad of caribou hide snapped near the ears of his team. The panting animals flattened their bodies while he rode the sled in defiance of the frost.

Soon after break of day, belated in this latitude and season, came his reward. In the course of the night's sled run he had worked out of the bare tundra country of the foreshore into a region splotched here and there with brush. Now he saw rising from one of the clumps ahead a spiral of smoke marking someone's breakfast fire.

No difficulty was there in guessing whose fire—not in the Great Barrens! Evidently, from the distance covered, Karmack had driven far into the night, but, none the less, did not mean to be deprived of an early start on the second day of his dash for freedom.

Seymour dragged the mission dogs to a halt a mile away from the fugitive's camp. When rival teams meet on the snows, they dash at each others' throats with a chorus of yowls and all the strength of their respective masters is required to keep them apart. The sergeant expected to be engaged otherwise than clubbing malamutes when he got to that breakfast fire.

Accordingly, he untraced the team and chained them to the sled in such a way that any attempt to move that vehicle on the part of the animals leashed to one side would immediately meet with resistance of the dogs on the other side. Such an anchorage he had tried before and proved effective; in fact, it is about the only one possible in the open snow-fields.

Tossing each of the seven in the team a frozen fish, he removed his parkee, exposing to ready grasp the revolver at his hip. From its deerhide case, he unlimbered his rifle as a precaution against being "potted" in case his approach was discovered at too great a distance for small-arm accuracy. Then he moved swiftly forward, the tails of his "webs" leaving a wake of flying snow.

Evidently, the three of the flight party were at breakfast, for he bore down on the temporary camp without alarm. Soon he was near enough to hear the dogs of their two teams snarling over the morning meal. Noting that they were tethered between him and his objective, he circled for a safer approach.

Almost was he upon the camp when he saw Karmack departing in the direction of the dogs. Easily could he have picked off the accused embezzler with his rifle. But——

"Never fire first!"

With the real slogan of the Royal Mounted he admonished himself under his breath.

Nearer over the crunching snow he crept on that clumsy-looking but most effective footgear which man may have adopted from the snow-shoe rabbit. Now he could make out the front of a pup tent, doubtless thrown up for the protection of the beapty of the party. Koplock, the Aretic's interpreter, could be seen packing utensils for the start. The girl was not in sight.

Two minutes more would have brought him into camp and everyone under cover of his rifle. Then, from out of the tent, came Moira, facing him!

He heard her cry out; could not determine whether from surprise at the unexpected appearance of a human stalking out of the white solitude or as a warning to her companions.

Of these, Karmack whirled at first alarm, but the native did not look up from his task. Evidently the factor recognized the unwelcome visitor, for he started back with a rush, drawing his automatic as he ran.

"Never fire first!" the voice of training whispered as the sergeant hurled himself toward his foe.

Karmack's pistol barked. A bullet whizzed past the policeman's ear, a narrow miss but as good as a mile.

Now came the King's turn. Upward to his shoulder swung the gun with which Seymour had won many a target match. In a second, it seemed, Karmack must bite the snow.

But the gun never was fired. Into direct range between the two men, Moira O'Malley had flung herself, a tall, fur-clad figure. The human target of the scoundrel momentarily was blanketed. What mattered it that the school girl of Ottawa was pointing an automatic as steadily as she had held it upon him in the trade room that time back in Armistice. Sergeant Scarlet could not fire upon an innocent woman.

He barely saw a whiff of smoke leave the mouth of her pistol, scarcely heard what seemed a double report, when a burning sensation along one temple and across the side of his scalp threw him backward to a fall on his side.

Was it possible that, by some involuntary pressure on the trigger, he had fired at Moira O'Malley? In the paralytic clutch of the moment he could not answer the heart-burning question.

WOMEN FROM FORTY TO FIFTY

Will Be Interested in Mrs. Thompson's Recovery by Use of Lydia E. Pinkham's Vegetable Compound

Winnipeg, Man.—"Lydia E. Pinkham's Vegetable Compound has done me good in every way. I was very weak and run-down and had certain troubles that women of my age are likely to have. I did not like to go to the doctor so I took the Vegetable Compound and am still taking it right along. I recommend it to my friends and to any one I know who is not feeling well."—Mrs. THOMPSON, 303 Lizzie St., Winnipeg, Man.

When women who are between the ages of forty-five and fifty-five are beset with such annoying symptoms as nervousness, irritability, melancholia and heat flashes, which produce headaches, dizziness, or a sense of suffocation, they should take Lydia E. Pinkham's Vegetable Compound. It is especially adapted to help women through this crisis. It is prepared from roots and herbs and contains no harmful drugs or narcotics.

This famous remedy, the medicinal ingredients of which are derived from roots and herbs, has for forty years proved its value in such cases. Women everywhere bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women."

CANCER

GREAT SUCCESS OF CANTASSIUM TREATMENT

A well-known London Surgeon and recognized authority on Cancer has created worldwide interest in the discovery that Cancer is due to a deficiency of potassium "salts" in the body, which causes the cells to break down and become malignant.

In order that everyone may learn

The Real Cause of Cancer

a remarkable book has been specially written.

This book will be sent free to patients or anyone who is interested in the most successful method of fighting "THE CANCER SCOURGE."

The following is a list of the chapters:—

1. The Limitations of Surgery. 2. Some Doctors Oppose Operation. 3. What Cancer is. 4. Why the BODY CELLS BREAK DOWN. 5. Injurious Cooking Methods. 6. Common Errors in Diet. 7. Vital Elements of Food. 8. Medical Endorsements of Our Claim. 9. The Chief Minerals of the Body. 10. The Thymus Gland. 11. Age When Lime Begins to Accumulate. 12. Potassium Causes Lime Excretion. 13. Great Value of Potassium. 14. Parts of Body Liable to Cancer. 15. Parts Which Are Seldom Affected. 16. How a Doctor Can Help. 17. How to Avoid Cancer. 18. Death Rate From Cancer. 19. Arterial Sclerosis and Old Age. 20. Rheumatism, Gout and Kindred Complaints.

With this book are a number of interesting case-reports, proving the great value of "Cantassium Treatment" in various cases. The treatment is simple and inexpensive, and can be easily taken in one's own home. Apply for free book to Charles Walter, 51 Brunswick Ave., Toronto, Ontario, Canada.

Walter 51 Brunswick Avenue, Toronto, Canada.

Why Starve Yourself?

"Improved" Foods Do Not Contain Vitamines Essential To Health

If your food consists of white bread, meat, vegetables boiled into a smooth pap, cooked fruit, manufactured jams and other sweets, you are starving your body of the vitols, vitamines or living principles essential to your health, which have been refined out or otherwise scientifically removed from all of the above articles of your diet. You may go on living like this for a number of years, but, sooner or later, outraged Nature will impose the inevitable penalties.

Constipation is pronounced by many eminent authorities to be the universal complaint of the civilized world, and is caused by general vitamine starvation of the popular diet.

Apart from the facts that constipation is, without one exception, the forerunner of cancer and the colon is the breeding-ground of cancer, you should remember that ninety-five per centum of all the diseases of the civilized world originate with its present faulty diet that, by vitamine starvation day by day, steadily weakens your natural disease-resisting power.

All pills, purgatives and laxatives contain active irritants and are not only injurious and dangerous, but also, at best, only partially successful. Dr. Robert Bell, M.D., F.R.F.P.S., etc., the eminent English cancer authority, states the only safe remedy for constipation is the use of an enema, containing not less than one quart of plain water at blood heat, to insure the daily complete evacuation of the colon and prevent the blood absorption of poisons from the bowels. When your life is at stake, can you afford to neglect such a simple and inexpensive precaution?

The highly paid food chemists are responsible for more deaths than were exacted by the entire late war and, by their poisonous dyes, preservatives and scientific refinement of Nature's abundant provision continue to wage remorseless war upon helpless women and children who, besides their natural protectors, also become victims of the foodless food manufacturers.

For the preservation of your future health and that of your dear ones stop eating "improved" foods, tinned goods of any sort and the white bread and white flour products that kill 400,000 little children under ten years of age every year in the United States (McCann). Insist upon whole wheat bread, plenty of fresh uncooked fruit and vegetables. If you must cook your vegetables, steam them only and either drink the water or use is as foundation for vegetable soup. You are entitled to enjoy every minute of your life from the cradle to the final rest, and if you have any doubt about what to eat in order to keep you in perfect health the writer will gladly and freely mail you his dietary treatment if you will write for it to Charles Walter 51 Brunswick Avenue, Toronto, Canada.

Byron and the Abbey

Plea For Recognition of Genius of the Poet

We regret that the decision of the Dean of Westminster is against placing a memorial tablet to Byrom in the Abbey. It is true that Byron was a man of bad life, but so were Charles II., Mary Queen of Scots, and many other persons who are commemorated in the Abbey. The essential consideration of the case is: Was Byron a great poet? Without question he was; and that is a universal, not a national, verdict. Therefore he should be commemorated in the Abbey. Surely there is a statute of limitations to be pleaded in such cases. His misdeeds are dead. His verse lives. Imploret pacem. That is the password, and it should be repeated.—The Spectator (London).

BABY'S OWN TABLETS ALWAYS KEPT ON HAND

Mrs. David Gagne, St. Godfroy, Que., writes:—"I have used Baby's Own Tablets for my three little ones and have found them such an excellent medicine that I always keep them on hand and would strongly advise all other mothers to do the same thing." The Tablets are a mild but thorough laxative which quickly relieve constipation and indigestion; break up colds and simple fevers and promote that healthful refreshing sleep which makes the baby thrive. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For a period of 1489 years ending in 1905, Japan had 244 earthquakes, more or less disastrous in character.

During the 21 years ending 1905, Japan had an average of 1,461 earthquakes a year, most of them slight.

B. C. Apples

Expected That There Will Be a Sixty Per Cent. Crop This Year

(By J. Alex Aikin)

Kelowna, B.C.—There is a decided opinion here that the apple crop will be a 60 per cent. crop, due largely to unfavorable weather conditions. There is no getting away from the fact that fruit growing in this valley can only be assured from year to year by irrigation, just as is the case in the States to the south. The fruit farms which have water this season are promised a very good yield, but otherwise the outlook is not bright.

There remains plenty of land along the hills below the water line, and in the valleys waiting to be taken up and used. The Chinamen are working some of the least desirable land and raising a lot of vegetables. Up to the present time there have been 90 cars of vegetables shipped out of the valley this season, and most of that product is from the Orientals land.

The drought this season gave invitation to grasshoppers and they are in plenty on some land. The provincial fruit branch has ready for use to all who will take it to their own land a preparation of bran and sawdust, with arsenic flavored with molasses and vanilla which proves that the hopper likes the rum smell and the fatal jag. The stuff is effective and has saved many acres of tomatoes and small fruit and vegetables.

For sometime Jonathan growers were troubled with early decay in that variety. Careful inquiry and research on the part of the Federal Fruit Branch led to the sure knowledge that the trouble had been caused by late picking after the fruit had passed picking maturity. It was found beyond question that where the Jonathans were picked early they had the keeping quality desired and proved good right through September to December. Therefore, it will in future be safe for Jonathan lovers to buy their favorite apple.

The growers are seeing it is advisable to concentrate on a limited number of varieties in order that they may be able to supply demand in carlots as ordered. Formerly growers set out a wide number of varieties not foreseeing the situation as it has since developed. Along with this effort at concentration there will be attention paid to giving out information on the season for the ten varieties which have been adopted. And while there is the standing doctors assurance that it is always time to eat an apple, the apple men will tell you that it is just as much of a mistake to eat an apple at the wrong time or season as it is to try to masticate an unripe peach.

The ten varieties and the time when they are at their best follow: The Early Duchess, Wealthy, Sept. to Nov.; McIntosh, Oct. to Jan.; Jonathan, Sept. to Dec.; Delicious, Nov. to Jan.; Grimes Golden, Nov. to Jan.; Wagner, Nov. to Dec.; Spitzenburg Nov. to Jan.; Yellow Newtons, Jan. to April; Winesap, Jan. to April. The Canadian Pacific Railway gives exclusive service to the Okanagan Valley and is quite equal to all demands for traffic. During the past year, two important concessions have been made to shippers. The first, and an important one, is that of protection of fruit against frost. This form of insurance enables the shipper to go right on using freight cars, so long as the weather is reasonably moderate, after which shipments have to be made in refrigerator cars. The other concession, not less valuable, is that cars of fruit by express may be opened for delivery twice enroute to final destination point. The effect of these arrangements is to facilitate movement of the crop promptly and hold down the cost of transportation, which in turn affects the consumers price.

The average net price received by growers for apples last season was about 40 cents per box, or some varieties as high as 70 cents was paid the growers, but plenty of apples did not bring more than 30 cents. The average cost for picking and shipping is found to be 70 cents, which includes administration charges. This question is being made the subject of a special inquiry by Major Duncan for the Federal Department of Labor.

The most obstinate corns fail to resist Holloway's Corn Remover. Try it.

It is not generally known that flour, sugar, starch or grain dusts are capable of working greater havoc than a high explosive such as dynamite.

Minard's Liniment for Rheumatism

You need not hide skin defects—now

Millions know this simple way to avoid them—to keep skin lovely, youthful

Do not make the mistake of attempting to *cover* or *hide* skin defects. It can never succeed. And there is a better way—which millions know:

This simple method to *avoid* them—to *keep* the youthful radiance and clearness of schoolgirl complexion.

For a week do this

Cleanse the skin regularly, authorities say, to keep your complexion lovely, radiant, youthful. But beware of harsh cleansing methods. They injure skin.

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse — and repeat the washing. Then rinse again.

Then—if skin is dry—apply a little cold cream. That is all. Skin so cared for is not injured by cosmetics, by wind and sun, or by dirt.

The simple, correct way

You cannot find a more effective beauty treatment. Because Palmolive Soap is blended of rare palm and olive oils—famous for mild but thorough cleansing qualities since the days of Cleopatra. And it is inexpensive. Enjoy it for the bath also.

But be sure you get Palmolive—which is never sold unwrapped. All dealers have it. Get some and follow this simple method for one week. Results will delight you, even in that short time.

Made in Canada

Volume and efficiency produce 25c quality for

Britain Building Up Forests

British Forestry Committee Has Already Started Tree Planting

The British Forestry Committee is planning a forest station development in a huge area of East Anglia with the idea of creating the largest forest in Great Britain. Tree planting has already begun.

The area under development is a vast sandy wasteland. The plan includes the erection of workers holdings for one hundred families.

It is expected that the development will be profitable not only in the production of timber, but in the increased fertility of the surrounding land.

Corns, Warts, Bunions, Painlessly Removed

Don't limp any longer, don't suffer another hour from corns. The oldest remedy and the best, the one that for fifty years has proved a true success, will lift out your corns in a hurry. Putnam's Painless Corn and Wart Extractor is the one remedy, to use. Refuse a substitute, 25c everywhere.

Settlers Interested In Irrigated Lands

Irrigated farm lands at, Taber, in South Alberta, are attracting prospective settlers from the United States and Eastern Canada, and several land scouts have been sent to the vicinity by colonization organizations.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eclectric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Donates Plane to Japan

Captain Georges Pelletier D'Oisy, the French aviator who recently completed a flight from Paris to Tokio, has donated the aeroplane in which he made the last leg of his journey from Shanghai to the Japanese army.

FOR COLIC AND CRAMPS PAINS IN THE STOMACH THERE'S NOTHING TO EQUAL

It has been in use for the past 80 years; its action is pleasant, rapid, reliable and effectual, and relief comes promptly.

Be sure and get "Dr. Fowler's" when you ask for it. Don't experiment with some new and untried remedy.

White People Slaves To Kalahari Blacks

Descendants of Dutch Are Servants to African Chief

Out of the great African interior, by way of Capetown, comes a pathetic story of a group of white men and women who are living in a state of subjection to blacks, who exercise complete mastery over them. The tragic fate of these unfortunate whites has just been revealed in a report which officials of the South African Government's locust expedition, now in the interior of the great Kalahari desert, have sent to Capetown.

The expedition went into the interior to study the breeding ground of locusts.

When they arrived at Molopolole, a hundred miles in the interior of the desert, the officials were taken before Sebels, the paramount native chief. They found him well educated, able to speak English fluently, and both he and his wife wore European clothes.

The visitors discovered some 50 white men and women living near the chief's kraal, where they act as servants to the chief and his followers. They are thought to be the descendants of old Dutch pioneers, who, trekking into the interior, lost themselves in the desert. Their horses, overcome with the drought, died, and the pioneers flung themselves on the mercy of the natives. These unfortunates have no power to own land and no privileges of any kind. They are virtually serfs to the natives.

The natives are rich both in cattle and land. They carry rifles, but the whites are not permitted to possess firearms. Chief Sebels dispenses justice to all his tribe—the Bechuana—who are recognized as the aristocracy of the Kalahari.

The Kalahari desert forms the western part of British Bechuanaland, and is about 120,000 square miles in extent. It was first crossed by Dr. David Livinbstone in 1849.

Radio Set For Prince

Token of Appreciation From Radio Fans of America

When the Prince of Wales stepped aboard the Cunard liner Berengaria on August 23, for his trip overseas, he received the most magnificent radio set ever constructed in the United States. It was presented to him by W. Roy McCanne, President of the Stromberg Carlson Telephone Manufacturing Company, as a token of appreciation and goodwill from the radio fans of America. The set, which is a five-tube Neutrodyne, is mounted in a console of Adam Brown Mahogany with everything self-contained. All its metal parts are gold-plated. The set was delivered to the Berengaria and taken across the Atlantic aboard that ship on its eastward passage, so that presentation could be made immediately after the Prince boarded the liner in Southampton.

Minard's Liniment Heals Cuts

Helping the Starving Greek Refugees

Appeal Is Made To Western Canada To Lend Assistance To Worthy Cause

Western Canada is being appealed to, through The Save the Children Fund, of London, England, in aid of the half-million or more women and children who are among the Greek refugee army, driven out of Turkey under the Treaty of Lausanne. They constitute one of the greatest tragedies of the post-war period, as they are among the victims of war. They have poured into Greece, homeless, helpless and hungry, and they are dying like flies from starvation and disease.

Other parts of Canada are responding to this pathetic appeal, and the farmers of Western Canada are asked, through a grain campaign, to do their bit by contributing a few bushels of wheat when selling their crop at the elevator. The various grain, elevator and united farmer organizations are co-operating.

A strong western committee has been formed, with Mr. C. W. Rowley as Honorary Treasurer, with offices at 305 Scott Block, Winnipeg. The campaign is endorsed by Premier Bracken, Premier Greenfield, Hon. T. A. Crerar, and other leaders. It is confidently expected that the west, as always, will make as generous a response as the crop situation will permit. No Canadian will be the poorer for sharing a little of his substance with the starving kiddies in any part of the world.

Mr. Frank Yeigh, of Toronto, the well-known Canadian writer and lecturer, has arrived in the west to assist in the campaign, after having conducted a successful one in Ontario which brought in $25,000.

Those who prefer to make a cash contribution may remit to Mr. C. W. Rowley, 305 Scott Block, Winnipeg.

NOTICE

Notice is hereby given that an application will be made to the Legislative Assembly of Province of British Columbia at its next session on behalf of the Associated Growers of British Columbia, Limited, for an Act to be known as the "Associated Growers of British Columbia, Limited, Relief Act," for the purpose of curing all formal defects in, and all formal objections to the validity of all contracts entered into by the Associated Growers of British Columbia, Limited, with individual growers in any of the forms known as Series "A," Series "B," Series "C," or Series "D," and where such contract purports to be made between the Associated Growers of British Columbia, Limited, of the first part, a local association formed under the "Co-Operative Associations Act," of the second part, and the grower of the third part, or where such contract purports to be made between the Associated Growers of British Columbia, Limited, of the one part, and a grower of the other part, without the intervention of such local association, and also for the purpose of providing that where any such contract is produced to the Court proven to have been signed by a grower and it is further proved that the grower has delivered any fruits or vegetables otherwise than in accordance with such contract, the Court shall forthwith restrain by injunction any delivery of such grower's fruits or vegetables otherwise than in accordance with such contract and shall also make an order commanding the grower to deliver the fruits or vegetables in accordance with the provisions of such contract, notwithstanding any defect in the formation, execution or performance of such contract.

Dated at Vernon, B.C., this 8th day of October, 1924.

E. C. MAYERS,
Solicitor for the applicant, Associated Growers of British Columbia, Limited.

Local and Personal

ONIONS FOR SALE—$4 a sack. Fred Lewis, Creston.

RED ROSE ORANGE PEKOE T-3

A Better Day Dawns

After years of negotiations, and following the failure of one conference after another to make any substantial headway, an agreement has at last been reached with Germany regarding the payment of reparations which gives promise of putting an end to the impossible situation so long prevailing in Europe and which has brought economic distress throughout the world.

The agreement reached, based on the Dawes report, has received the unanimous approval of the British, French and German cabinets and is fully acceptable to Belgium. France and Belgium have undertaken to evacuate the Ruhr within one year, and in all probability the evacuation will be completed within a less space of time. Already certain towns in Baden have been evacuated.

At the conclusion of the conference in London at which the agreement was reached, the Premier of France and the Chancellor of Germany shook hands. This was the first post-war conference, says one of the German participants, in which the words "vanquished" and "victors" were dispensed with, and, he adds: "Throughout the negotiations we were never made to hear one disagreeable word." On his return to Berlin, the German Chancellor expressed his belief that the French Premier was sincerely desirous of promoting the peace of Europe, that he was actuated by the best intentions and could be trusted. It is further reported that France and Germany will shortly open negotiations concerning commercial treaties.

Not quite six years have elapsed since the signing of the Armistice which ended actual hostilities in the Great War, and while it seems a long period of time in which to bring about an agreement regarding a matter which was first covered by the Peace Treaty, it is not, after all, such a long time in which to allay the most bitter feelings and to quiet the deep-rooted suspicions of each other following more than four years of warfare and unprecedented loss of time and property.

People are apt to grow impatient with diplomatists and statesmen entrusted with the handling of delicate international questions, and to become very critical of them because more rapid progress is not made in the settlement of outstanding problems and disputes. But how often is some petty family quarrel or dispute among neighbors over a trifling matter allowed to continue from year to year, and even from generation to generation. And nations are only big families and neighbors, and all the faults, jealousies, suspicions of individuals are reflected in the nation. The chosen leader of the people in each country must pay attention to the opinions of his people, and those who complain of slowness in action should realize that public opinion in each and every country must first be educated, and suspicions allayed before progress can be made.

The fact that so much progress toward a better understanding in Europe has been achieved is a matter for profound congratulation, not to the peoples of Europe alone, but to the whole world. Before 1914 Canadians gave little heed to European quarrels, and regarded them as something which were no particular concern of residents on this side of the world. But the Great War brought a sudden and bitter awakening. We learned that not only our material progress, but the lives and liberties of our people were jeopardized through issues which were not of our making. And since the Armistice we have had daily reminders through depression in trade and economic losses of many kinds that no nation today can live unto itself, and that what adversely affects one part of the world affects all.

In Canada, therefore, we have reason to rejoice that an agreement has been reached paving the way for a better understanding in Europe, for a relaxation of the state of war which has to all intents and purposes existed through the French and Belgium occupation of the Ruhr, and for the replacing of old suspicions and fears by a mutual acceptance of a sincere intention by all to live up to their obligations the one to the other.

The London conference in its final results, gives promise of better days, and renewed prosperity throughout the world.

Trying Out New Scheme

Good Conduct Convicts From English Prison Given Holiday

More than 30 "star men," or good conduct convicts, from Maidstone Prison, have arrived at the "prison hotel" of English convict establishments, as the Camp Hill prison on the Isle of Wight is familiarly called.

This is stated to be the first trial of a new development in the humanizing of the penal system.

Living in what are more like cottages than prison cells, the selected men will work in the forest of Parkhurst, where each man is allowed to cultivate his own garden one day a week.

The convicts wear sailor caps, navy-blue jackets, with red arm stripes for good conduct, and breeches different from the ordinary prison clothing. They take their meals together and meet each evening in a smoking room, where newspapers, books, tobacco and cigarettes are allowed.

They can expend their earnings (awarded for good conduct) on luxuries purchasable at a canteen—a "dry" one, however.

The "holiday" will last about three weeks.

SUFFERED WITH ECZEMA 3 YEARS

Itched and Burned So Could Not Sleep. Cuticura Healed.

"I suffered for three years with eczema which broke out on my limbs, and soon spread to my neck and forehead. It itched and burned so that it was most impossible to sleep at night, and every time I scratched it, it would bleed. The breaking out caused disfigurement.

"I began using Cuticura Soap and Ointment and after the first week I got relief. I continued the treatment and in about six months I was completely healed." (Signed) Mrs. George Pottle, R. F. D. 1, Box 22, Freedom, Me., Aug. 15, 1923.

Use Cuticura for all toilet purposes.

Sample Each Free by Mail. Address Canadian Depot: Lymans, L. S. Ltd., Montreal. Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Try our new Shaving Stick.

The Power of Advertising

Found To Be An Economic Force Of The First Order

Our forefathers talked about supply and demand as if there was a natural and perfect adjustment between the two. The modern business man has discovered the demand must often be created, and that advertising is the one essential element in its creation. Advertising is thus not merely an adjunct or an equipment; it is an economic force of the first order, and the advertising expert occupies a place in the hierarchy of industry and commerce not less important than that of the elements which the older economists alone deigned to notice. Advertising is no longer a matter of private interest. It is one of national and international importance.—The London Evening Standard.

TOO MANY HOME CARES

One Reason Why So Many Women Are Weak and Run-Down

The work of the woman in the home makes greater demands on her vitality than men realize, and there is always something more to do. No wonder women's backs ache, and their nerves are worn out. No wonder why they get depressed and irritable, suffer from headaches, and always feel out of sorts. But of course all women are not like that. What is the difference?

A woman with plenty of healthy red blood in her veins finds work in the home easy; her vitality is at par. This points the way to health in women who feel run-down and depressed. Make new rich blood. You can do it with Dr. Williams' Pink Pills. These pills have the marvellous property of building up the blood and toning up the nerves. That is proved by the case of Mrs. E. Eppinger, Scott Street, Vancouver, B.C., who says:—"Dr. Williams' Pink Pills brought back my health and strength and restored my nerves to normal condition after other medicines had failed. It was after the birth of my second child that I became so anaemic and nervous that I thought I would lose my mind as well as my strength. I tried several medicines, but got no relief until I was advised to try Dr. Williams' Pink Pills. After using a few boxes of these I could see a change. I felt stronger; my appetite was better, I slept better, and my nerves were stronger. I continued the use of the pills for some time, and again found myself a well woman, and I can sincerely say that my health has since been the best. I can cheerfully recommend the pills to all weak, run-down women."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Discovering the Arctic

Great Mistake to Regard Data as Valueless Says J. D. Craig

The leader of an expedition sent to the islands in the Arctic by the Canadian Government, J. D. Craig, D.L.S., thinks that it is a great mistake to regard these as valueless. The data obtained warrants, he holds, the belief "that some day possibly in the not too far distant future, our little known far northern districts will prove to be more than merely a source of interest to the explorer, the big game hunter and the trader." The example of Alaska, with all the development that is going on there, is cited by Mr. Craig for the purpose of warning Canadians against too lightly assuming that the country lying towards the Arctic and the islands in that ocean are so much frozen waste.—From the Edmonton Bulletin.

Northern Ontario Exports Increase

Exports of the products of Northern Ontario to United States for the first six months of the year showed an increase of approximately 45 per cent. over those for the same period of last year, according to statistics of the American consul at North Bay. The total value of exports for the period was $21,937,570 in comparison with $17,292,808. Gold bullion exports show an increase of more than 100 per cent.; silver bullion of 30 per cent.; lath, 150 per cent.; and newsprint 40 per cent.

Relief from Asthma. Who can describe the complete relief from suffering which follows the use of Dr. J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes! It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists have sold it for years.

More than 200,000 houses have been built in Great Britain since 1919.

TANLAC MEETS TEST FOR OVER 3 YEARS

"The more I know about Tanlac the more I feel like praising it," says Mrs. Samuel Shelly, 56 Wood St., Toronto, Ont., Canada. "I always take Tanlac when I begin to feel run-down and it has met my health needs for the past three years.

"For years before I learned of Tanlac I was in such an awful run-down condition that at times I would get so weak and nervous I couldn't do my house work. I was down to almost a skeleton and still losing weight all the time. Headaches nearly drove me mad and I had a sickly, sallow complexion.

"Tanlac has increased my weight 14 pounds, and has given me a wonderful appetite. My nerves are steady. I sleep well and have health and strength that makes life a pleasure."

Tanlac is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.

Tanlac Vegetable Pills for Constipation; made and recommended by the manufacturers of Tanlac.

Thousands In Wembley Pageant

Twenty-Five Thousand Wheat Sheaves From Canada Used

The opening of the British Empire Pageant in the Stadium at the British Empire Exhibition at Wembley, fixed for July 21, was postponed for a few days owing to insufficient rehearsal.

The pageant told the story of the British Empire in a series of dramatic episodes.

Fifteen thousand people took part in the spectacle. Its magnitude may be gauged by the fact that the following were among the requirements:

5,000 wigs.

15,000 costumes, for which 25 miles of cloth were used.

10,000 square yards of canvas scenery.

Artificial lake containing 237,000 gallons of water.

Largest carpet in the world, covering half the Stadium.

Five miles of steel wire for alterations in the arena.

Two and a half tons of nails.

200 tons of timber.

Full-sized cathedral front.

Ships and houses, full sizes.

25,000 sheaves of wheat from Canada.

In one scene 1,000 white doves were employed.

For Sore Feet—Minard's Liniment

Zanzibar, an island off the east coast of Africa, was received by the British from Germany in exchange for Heligoland.

Attacked By Eagle

Fourteen-Year-Old Boy Lifted Five Feet By Huge Bird

To be attacked by a big bald-headed eagle, picked up and carried into the air five feet, then dropped when his clothing gave way, was the experience of Fred Cunningham, aged 14, weighing 97 pounds, on a golf course near Chatham, Ont. The bird, which was killed later, measured eight feet from tip to tip of wings. Young Cunningham was severely scratched and clawed while fighting the bird, which finally became enmeshed in a wire fence.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

To Maintain Empire Fair

The British Empire Exhibition will be open again next year at Wembley, according to the parliamentary correspondent of The Daily Telegraph, who states he has learned of this on the highest authority.

Try MURINE FOR YOUR EYES

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds and the various inflammatory pains its record is beyond reproach.

New Lumber Company In B.C.

The Skeena Lumber Company has been registered with capital of $500,000 to take over the Kleanza Company, Ltd., lumber and mining operators at Usk. The new company is financed by Minneapolis capital and has power to establish a pulp and paper mill.

All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

Jupiter is nearer the sun by more than 50,000,000,000 miles in one part of its orbit than in the opposite part.

Minard's Liniment Relieves Pain

Object Of Agricultural Research To Increase Yields Without Increasing Production Cost

The greae problem which today confronts agriculturists is not one of bumper crops, but of adaptation, and the main object of agriculture research is to enable the practical farmer to increase his yields without increasing his costs. These were the conclusions formulated by R. A. Fisher, of the Rothansted Agricultural Experimental Station in England, in presenting his paper to the agriculturists on "incidence of rainfall in relation to the wheat crop."

The problem of determining the actual effects of weather upon the crops is one of extreme complexity, according to Prof. Fisher. The crop is subjected to a long sequence of variable weather conditions and the meteorological measurements adequate to represent the weather must comprise at least rainfall, temperature, maximum and minimum, and dew, together with some measure of sunshine intensity. In consequence of the immense numbers of varieties needed to specify the weather history of a crop it would not be easy to obtain formulae from past records. Such formulae would be practically useless because even data wholly unrelated to the weather could equally easily be so expressed. In fact, a short series of crop statistics lend themselves to the evaluation of apparent effects of weather upon the crops. What was needed at the present time, he said, was a solid foundation of facts based upon reality, extensive data and quite simple meteorological factors.

In showing the action of rain as indicated in manurial conditions, upon the screen with the aid of slides, he stated that the data gave more than seventy years of wheat records from experimental plots covering a wide variety of manurial treatments.

For almost the whole of the series detailed rain data was available.

"The main object of agricultural research," said Prof. Fisher, "is to enable the practical farmer to increase his crop without increasing his cost. It is in fact not a problem of bumper crop production, but adaptation. The very variable weather of most districts is the greatest obstacle in the way of an accurate adaptation of farming methods to the local conditions.

"In the second place," he continued, "a knowledge of the different responses to weather and manurial conditions, and these differences are great, could enable the farmer to adapt his manurial treatment to the climatic and seasoning conditions under which his crop has to grow. It will, in fact, enable him to mitigate the losses of a bad season or to exploit the advantages of a good one.

"Finally, weather studies are intimately related to the improvement of varieties. The problem before the plant breeder is to obtain varieties susceptible to regions. Here it is again the differential response to weather of different varieties which must guide the agriculturist in assigning to the best existing varieties their approximate geographical provinces. We must find out not only which variety is best, but where it is best.

"The results obtained so far have depended upon the immensely long records of a single station. How can we obtain information bearing upon the practical problems of other districts without waiting for the accumulation of seventy years of new data? This is a problem in research organization. Parallel manurial or varietal trials carried out at a number of different stations with this adequate requirement by modern plot technique will provide data as abundant as that available at Rothansted, covering an equally wide range of weather conditions and with the additional advantage that the effects of the different soils can be adequately explored."

The Squire's wife was walking along the road when she saw one of the estate workers in the distance coming towards her. They came abreast, but the workman took no notice of the lady, so she stopped him and said: "Why did you fail to raise your hat, Giles?" "If you please, mum," said Giles slowly, "my wife died last Whitsun, and I ain't started lookin' at other wimmen yet."

Canada Has Immense Resources In Coal

Survey Indicates That Possibility Of Exhaustion of Supplies Is Remote

Attention was directed during recent scientific gatherings in England to the possibility that the coal resources of the British Empire may be exhausted within a few centuries. So far as Canada is concerned such a contingency seems to be remote. For many years the Canadian Geological Survey has been investigating the coal fields of the Dominion, and it has been estimated that the reserve of coal amounts to more than 1,000,000,000,000 tons largely lignite, but including over 250,000,000,000 tons of bituminous coals. Though the greater part of the various coal fields has been studied in a general way, yet their extent is so great that detailed investigations by the Geological Survey have been limited to a relatively small part of the whole. The great extent of the Canadian coal fields is apparent when it is realized that basins of coal-bearing strata extend almost continuously for a length of 700 miles within the eastern part of the Rocky Mountains and adjoining foothills. The coals of this region are largely bituminous or semi-anthracite and seams ten to fifteen feet in thickness are common. In addition, thousands of square miles of the prairie country of Alberta, Saskatchewan and Manitoba are underlain by strata holding workable seams of lignite and bituminous coals, and important coal fields occur in British Columbia both in the interior and on the Pacific coast, while highly developed coal fields occur in the east in Nova Scotia and New Brunswick, in some cases at tide water.

Mineral Matter For Hogs

Experiments Show Cheaper Gains Made Wher Mineral Matter Was Fed

An experiment in hog feeding has been carried on at the Experimental Farm at Agassiz, B.C., to determine the influence of feeding mineral matter to hogs. The mineral mixture consisted of ground bone meal 8 pounds, ground charcoal 5 pounds, ground rock phosphate 5 pounds and salt 3 pounds. This mixture was fed at the rate of 3 per cent. of the grain ration. The other foods consisted of a mixture of shorts, four parts, and one part each of corn meal, chopped oats and chopped barley. The results showed that. In every instance where the mineral was fed, greater and cheaper gains were made. Some of the lots received boiled potatoes in addition to the other feeds. It is reported by Mr. W. H. Hicks, the Superintendent, who conducted the experiment, that the potatoes apparently had a good effect, especially on the health of the pigs, more particularly in relation to rheumatism, as no stiffness was present in any of the pens where potatoes were fed. Some of the pigs were fed regularly at meal time, while other pens had access to self feeders. The pigs that had free access to the self feeders and receivd no mineral were the greatest sufferers from rheumatism.

Honey For Export

Dominion Apiarist Calculates 6,000,000 Pounds Will Be Available

"I am sure that this year's honey crop of Canada will admit of 6,000,000 pounds being available for export," stated C. B. Gooderham, Dominion apiarist, who has returned to Winnipeg following a tour of the west.

Mr. Gooderham said there would be a good crop of honey from the prairie provinces and British Columbia this year, but owing to drought in some sections, it would not exceed last year's crop in the aggregate. Prospects were particularly good in the Fraser Valley, B.C., and Southern Alberta.

The suitor had stated his case in a few halting sentences. "But have you achieved any success in life?" asked the adored one's father. "Oh, boy! Have I?" blurted the happy youth. "Why, didn't I make it clear to you that your daughter has promised to be my wife?"

Gave Interesting Address

PROF. R. M. McIVER

of the University of Toronto, who delivered an interesting address on civilization and population at the British Association convention.

U.S. and Europe

Americans Beginning to Realize That Well-Being of Nation Bound Up With Rest of the World

It is many years since an American Senator asked scornfully, "What have we to do with abroad?" That spirit may persist in a few of our countrymen, but the inexorable fact of international relations—the economic facts, if no other—are making it clear to all Americans, except those afflicted with judicial blindness, that our well-being is increasingly bound up with that of the rest of the world. The large and increasing stake which America has abroad is indicated by the extent of American investment in foreign securities. These are conveniently summarized, as drawn from successive reports of the Federal Reserve Board, in an article published in The Current History Magazine for August. The best estimate is that ten years ago American holdings of foreign securities did not exceed $400,000,000. But between August, 1914, and January, 1919, foreign bonds were floated in the United States to the extent of $3,500,000,000. During the period January, 1919, to January, 1924, the total of foreign bonds floated in the United States was $3,250,000,000. These latter transactions were doubtless in part refunding operations, but even so the outstanding total represents a great sum on which it is safe to say that the interest is larger than our entire foreign investment of 1914. Yet there are some blear-eyed Americans who cannot see what business American bankers and American public officers have in London trying to bring about industrial and financial stability in Europe!—The New York Times.

A special light ray which will penetrate 300 yards under water at any depth has been invented by an Italian.

Japan is exporting oak and other hard timber to China, Australia and New Zealand.

Britain Will Advance Money To Assist Emigration From United Kingdom To Canada

It is reported from Ottawa that Hon. J. A. Robb, acting Minister of Finance and Minister of Immigration, has concluded an agreement with the British Government whereby the home government will advance money for the settlement and equipment of emigrants from the United Kingdom to Canada. This is heralded as an epoch-making agreement and as ensuring for Canada a wave of settlement on a larger scale than any since the pre-war period.

The agreement, it is understood, calls for the investment of millions of dollars by the British Government in Canada. The immigrants to this country from the homeland are to be placed on land and equipped with machinery at the expense of the home government. The settlers will be handled by the Land Settlement Branch of the Department of Immigration, which is the same as the Soldiers' Settlement Board. The money is to be advanced through this agency, and the collections are to be made through the Soldiers' Settlement Board officials and staff throughout the Dominion, and remitted to England.

The exact terms of the agreement are not certain. It is learned that the total cash advances to settlers will be on a smaller scale than that of the Canadian Government to the Canadian soldier. Further, it is said, the agreement is only for one year, 1925, and then the home government will decide whether the results are sufficiently good to warrant a renewal for a further period.

The immigrants to be settled in this manner are to be selected, but whether by the British Government or the Canadian authorities, or by both, is still undetermined. Complete details, it is expected, will be forthcoming shortly.

Hitherto the assistance afforded settlers from the United Kingdom has been confined to reducing the cost of rail and ocean travel. In both cases the two Governments have assisted. The new agreement, however, will go all the way, and provide capital for the actual settlement of the immigrant.

Corn Silage Superior

Corn Silage Proven To Be Better Than Sunflower Silage

In a cow feeding experiment at the Agassiz, B.C., Experimental Farm, corn silage was compared with sunflower silage. In addition to all the ensilage the cows would eat, which amounted to 60 pounds of sunflower and 67 pounds of corn, each cow was fed twenty pounds of pulp mangels and five pounds clover hay. As a grain mixture each cow received twelve pounds a day, made up of three parts bran, three parts oat chop, two parts barley chop, and one part oil meal. There were nine cows in each lot. The cows that were fed corn ensilage produced two pounds milk per day more than those receivnig sunflowers, and the milk of the former was slightly richer. The total cost of feed consumed during the experiment was $29.10½ for the corn silage fed lot, and $27.92 for the others. The corn silage proved to produce both milk and fat cheaper than the sunflower silage, the difference being 3.196 cents per hundred pounds, and 2.142 cents per pound of butter, in favor of the corn silage.

The Coacoanut Harvest

One Tree Said To Yield As High As 300 Cocoanuts Each Year

South Sea Islands commerce centres around the production of copra. Copra is simply the dried kernel of the ripe cocoanut. From the time of planting cocoanuts until a crop is harvested is about seven years in the western Pacific groups. It is estimated in Tonga that one tree will produce annually 200 cocoanuts.

The "low" islands, that is, those of purely coral formation, are reputed to produce the best nuts, and the atols of Tonga and Marquesas are practically covered with trees which have grown from "self-grown" seed. These are the common property of the natives. Of copra producing areas, tiny little Nuifoon in the Tonga group has the reputation of producing the largest cocoanuts in the world.

Writers who drift through the Pacific are always enthusiastic on the smells of the islands. Actually, the perfume of the South Sea is the "perfume" of cocoanut oil.

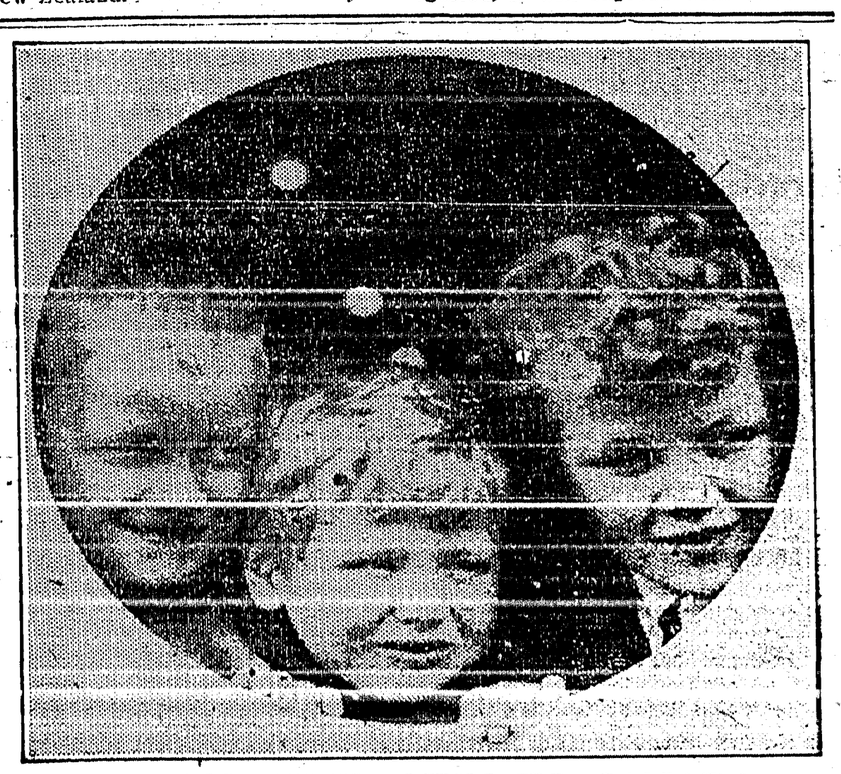
Harmless

Diner (angrily to waiter).—You've spilled that soup all over my coat.

Waiter.—It's all right, sir. I know the soup here; it never stains after six o'clock.

In building an aeroplane work as fine, accurate and delicate as that in making a watch is required.

If soap is distributed in powdered form throughout the air of a room, and ignited, it will explode with violence.



ALL ON THEIR OWN TO CANADA

These three little children, named George Reid (9), William Reid (7) and Nan Reid (5), travelled from Glasgow to Canada on their own on the Canadian Pacific liner "Marloch." They hailed from Greenock and joined their daddy in Quebec.

Planting Currants

Fall of the Year Best Time to Set Out Young Plants

The best time to plant currants is in the autumn, says the Dominion Horticulturist, Mr. W. T. Macoun, who continues: If planted in the spring they will probably have sprouted somewhat before planting, and on this account their growth in the first season will be checked. Where the soil is in good condition, currants, especially the black varieties, make strong growth, and the bushes reach a large size; hence it is better to give them plenty of space, as they will do better and are easier picked than if crowded. Five to six feet is a good distance to plant. If planted closer, especially in good soil, the bushes become very crowded before it is time to renew the plantation. Strong one-year-old plants are the best, but two-year-old plants are better than poorly rooted yearlings. It is better to err on the side of planting a little deeper than is necessary than to plant too shallow. A good rule to follow is to set the plants at least an inch deeper than they were in the nursery. The soil should be well tramped about the young plants to prevent its drying out. After planting, the soil should be levelled and the surface loosened to help retain moisture.

Destruction Of Weeds

An interesting experiment in the chemical destruction of weeds has been reported from near Chartres, France. A dilute solution of sulphuric acid in water was applied early this season to a field of young wheat, containing about an acre, and the result is stated to have been the practically complete killing of all weeds, while the wheat itself has not only escaped injury, but seems to have been stimulated to more vigorous growth.

Gift to Red Cross

The Saskatchewan Division Canadian Red Cross Society received a gift of $3,600 from the Overseas Nursing Association, to establish two nursing outposts.

Local and Personal

Mrs. Jessie Lewis, teacher of piano forte, Royal Academy of Music, London, Lamont Bldg., Creston.

Prices reduced on Victor gramaphone needles which were formerly 45 cents and now 35 cents. Thermufuge in one-pound tins now $1, formerly $1.15.

Mrs. Brousson, who left here in August with Mr. Brousson, to make their home in the vicinity of Victoria, is now on a visit at the old home in England.

The next big feature film at the Grand will be at the end of November when the year's biggest picture. "The Covered Wagon," will have a three-night's run.

The Presbyterian Ladies' Aid remind of their annual dinner which will this year be held in the Parish Hall on Friday, Nov. 7th, from 6 to 8 p.m. Adults 50 cents.

"Scaramouche," which was shown at the Grand on Friday and Saturday nights drew the biggest total attendance of any picture that has yet been shown in Creston.

Flowers artistically arranged for any occasion at moderate prices. Phone S. A. Speers, agent for Frache Bros., florists, Lethbridge, Alta., and Grand Forks, B.C.

Rev. J. A. James, who has been out of town the past two weeks, returned on Tuesday, and there will be the usual services in the Presbyterian Church on Sunday.

Basil Steuart of Vernon, general manager of the Associated Growers of B.C., was here on a visit of inspection of Valley fruit shipping, visiting the Exchange warehouses at Creston and Erickson.

Apple picking is now completed and from both packing houses comes the report that the quantity going out Fancy and Extra Fancy is the heaviest in the Valley's history.

The Valley's potato harvest is completed. Late sown spuds have made a good showing but at that the potato shipments this year will be about the lightest in recent years.

Former provincial police Geo. A. Carter was presented with a cigarette case prior to leaving Vernon to take up residence in Nelson, where he is going into life insurance work.

Mr. Renals of Laird, Sask., has arrived to occupy the Lantz ranch for the winter, and Mr. and Mrs. Lantz will be leaving in a few days to look after business interests in Sask tchewan.

Christ Church members and adherents had the first of a series of social evenings in the Parish Hall on Friday night, and it is planned to have them at least once a month through the winter.

Premier W. L. Mackenzie King and party, who are en route east from the coast, will go through Creston on Monday, with a stop at Cranbrook that night, where a big Liberal rally will be held.

Geo. Seymour, who left here a little over a year ago on a trip to Australia and the Old Country, returned to Creston a few days ago and will probably spend the winter on his ranch at West Creston.

1925 auto models are beginning to make their appearance in Creston, S. A. Speers having just taken delivery of a Studebaker Six, and Alf. Palmer is driving the newest in Fords from the Bevan garage.

Monday November 10th, has been officially proclaimed Thanksgiving Day, with Armistice Day coming the following day. So far there is no announcement as to Armistice Day observation in Creston.

COW FOR SALE—Young cow, part Jersey, part Shorthorn, good butter and milch cow, easy milker, price right. For further particulars apply Geo. Jacks, Camp Lister, or Jim Huscroft, where cow can be seen.

Women's Wool Hosiery

$1.15 to $1.60

This popular Wool Hosiery comes in fancy weaves, drop stitch, ribbed and plain weaves, made of fine pure wool yarn. Some Silk and Wool Hosiery included in the lot. Also very fine Cashmeres. Choose from plain colors and fancy heather mixtures in all colors. All first quality Hose.
