THE CRESTON REVIEW

Vol. XVII. CRESTON, B. C., FRIDAY, OCTOBER 2, 1925 No. 33

Kitchener Laborer Has Tragic End

Dr. Henderson, coroner, and provincial police H. McLaren got back Wednesday from Kitchener, to which point they had been called due to a tragic accident on Tuesday in which Peter Hansen lost his life by having his head cut off just above the ears.

The evidence given at the inquest went to show that the unfortunate man was employed on the C.P.R. steam shovel crew, which is at work a couple of miles west of Kitchener, widening out the right of way. His job was to shovel earth out of dump cars which are adjusted so that the bottom drops down about two feet in order to expedite unloading. Hansen had shovelled out possibly half of the car load and whilst peering up through the bottom to see what part of the load remained the weight of the wet earth on the opposite side caused the bottom to spring back to place crushing the unfortunate man's head in its grip.

The jury empanelled to enquire into the fatality was composed of John McRobb, foreman; Harry Spence, Geo. Hendren, John McDonald, N. Devlin and B. Johnson, and after hearing the evidence of those who were at work with deceased they brrought in a verdict of accidental death.

So far as could be learned the dead man was almost 30 years of age and had resided at Kitchener for the past three years, but as he had nothing in his possession to give a clue to relatives in Canada permission was given to inter the remains, the funeral taking place Wednesday to the cemetery at Goat River Crossing, Rev. J. Herdman and F. Harback, United Church pastors, officiating.

Wyndel

BIRTH—On September 22nd, to Mr. and Mrs. Douglas Butterfield, a son.

Rally day exercises were held in the new United Church on Sunday afternoon, Rev. J. Herdman of Creston taking charge.

Pete Cherbo of Sirdar is here at present helping Gus Bennedetti with his haul of hay.

Co-Operative Fruit Growers Association loaded out a mixed car of apples, tomatoes and cucumbers on Tuesday.

J. Waddell left on Saturday on a visit with friends at Boswell.

The school children, assisted by the teachers, Misses Cherrington and Walsh, had a fine display in the school districts' display at Creston fair this week. It included fruits, vegetables and, in fact, a specimen of everything produced in this section. The teachers were assisted in staging the display by Messrs. John Wigen and W. J. Cooper, and it certainly did great credit to the school.

M. Wigen and C. O. Ogilvie left last week for the Lardeau district, where the former is looking over some timber that is for sale in that section.

A. Spencer of Canyon, who has been accountant with the Co-Operative Fruit Growers, left last week for his home at Canyon, having completed the season's work with the association.

Mr. and Mrs. E. Butterfield, who have spent the past month on a visit with their sons and daughter in Vancouver, will return on Saturday, making the return via Victoria, Seattle and Spokane.

All the local hunters are putting in their spare time on the flats after the ducks. Some very fair bags have been reported. J. Wigen, R. Uri and L. Benedetti are the luckiest so far, having a bag of 19 between them to show for one day's operations. There are lots of ducks but are reported as wild and flying high most of the time.

F. H. Jackson and D. T. Scrimgeour of Creston were visitors here on Wednesday last making arrangements for the school children to make a display in the school districts' section at the Creston fair. They were assured of an entry from Wyndel school, which was sent up on Tuesday evening.

Quite a large audience filled the old schoolhouse on Friday night to hear Miss Siegel's recital, which was presented under the auspices of the United Church. The programme was helped by selections on the violin by Mr. C. Lussiaan's pupils. Everyone reported it a very enjoyable evening, were agreed that Miss Siegel is a first-class entertainer.

Lister

The school children are having a half holiday today in order to take in the fall fair at Creston. Lister will have at least a few entries in the championship school races.

Mrs. Jory returned on Sunday from a week's stay with Mr. and Mrs. Craigie at Erickson, and will have Mrs. Dolf Weir of Creston as her guest for a couple of weeks.

The Rally Day exercises will be observed at the United Church on Sunday afternoon. The attendance at service on Sunday last was the biggest in months, despite the none too favorable weather.

After spending about ten days fixing up things for the winter at his ranch here, Jos. Bell pulled out at the end of the week for Kimberley.

Miss Thompson of Nelson, who has been on a visit here with her brother, Fred, left for home on Saturday last.

Sheriff Doyle of Nelson, who is the returning officer in this election for West Kootenay, was here on Thursday last, arranging for the taking of the vote. John Bird has been named registrar of voters for Camp Lister poll.

Mr. and Mrs. Harry Baker of Broadview, Sask., have been here for a few days' stay with Mrs. Dalbridge at the F. Baker ranch, returning east on Monday.

The deer shooting season has opened auspiciously here. Col. Lister and Bill Demchuk have already got a buck each.

Harold Langston left on Monday for Spokane, and will probably pull up at Kellogg, Idaho, for a few month's stay.

Coyotes are unusually noisy and numerous in the area this fall and are making off with considerable poultry at the F. Baker ranch.

The boys are taking a great interest in the preliminary work of organizing the Boy Scout work, and at present it looks as if a troop of about twelve will shortly be fully organized.

Conservatives!

You are cordially invited to attend a

WHIST DRIVE
Short Entertainment and
DANCE

to be held in the

Parish Hall - Creston

Wed'y., Oct. 7

at EIGHT p.m.

Under the auspices of Creston and District Women's Conservative Club.

Two First Prizes Awarded and Refreshments served!

COME AND HAVE A GOOD TIME!

Contribute Cash Fall Fair Support

The finance committee of the fall fair were on the rounds at the end of the week and report this year's response by the citizens of the Valley to be fully equal to that of 1924. Below will be found a complete list of those who gave cash contributions:

Village of Creston	$75.00
Gault Bros., Vancouver	5.00
L. W. Humphrey	10.00
Christ Church Guild	5.00
Presbyterian Ladies' Aid	5.00
Women's Institute	20.00
Canyon School Board	5.00
W. K. Esling	10.00
Creston School Board	25.00
A. MacDonald Co., Nelson	7.50
C. O. Rodgers	25.00
P. Burns and Co.	25.00
S. A. Speers	25.00
Creston Mercantile	25.00
C. F. Hayes	15.00
R. S. Bevan	10.00
Lidgate Bros.	10.00
R. M. Telford	10.00
Erickson School Board	10 00
Creston Growers, Ltd.	25.00
H S. McCreath	10.00
Co-operative Fruit Exchange	25.00
Elias Uri	5.00
V. Mawson	5.00
M. J. Beninger	10.00
D. S. Timmons	1.00
Creston Telephone Co.	5.00
Mrs. J. W. Dow	5.00
Jas. Cook	3.00
E. C. F. Murrell	2.50
P. G. Ebbutt	5.00
C. W. Allan	10.00
D. T. Scrimegeour	10.00
Senator R. F. Green	20.00
Alberta Pacific Grain Co.	5.00
Vancouver Daily Province	5.00
W. S. McAlpine	3.00

In addition to these the donations of merchandise have been well maintained, those giving in this fashion being shown in the prize list.

Name Valley's Vote Registrars

Sheriff J. H. Doyle of Nelson, who is the returning officer for West Kootenay in the federal election, spent Thursday in Creston Valley, and during his stay appointed the men who are to act as registrars of voters as well as deputy returning officers on election day in the eight polling places in this district. Those who have consented to act in this capacity are:

Kitchener—Ernest V. McFarlane.
Camp Lister—John Bird.
Canyon City—A. D. Pochin.
Erickson—E. E. Cartwright.
Creston—W. K. Brown and J. A. Lidgate.
Reclamation Farm—C. C. French.
Wyndel—Geo. Taylor.
Sirdar—Mrs. E. Martin.

In order to simplify registration at Creston the work of making up the list will be taken care of entirely by Mr. Brown, but on election day it will be needful to have two D.R.O.'s and Mr. Brown will handle the votere from A to L inclusive, and Mr. Lidgate will hand out the ballots to those whose names run between M and Z.

In order that no one can complain that he or she did not know what is requisite and necessary in connection with registration we publish below the rules governing registrars:

"He must complete, date at his place of residence, and certify 3 copies of his list on the 15th day before polling day. He does not require an office.

"In making up his list the Rural Registrar has absolute power. He can omit or add names at his discretion within the spirit of the Act.

"Until the 15th day before polling day, no elector can tell with certainty whether his name is on the list or not. On this day the Registrar posts up 2 copies in conspicuous places in the polling division, and he retains one for revision. On those posted up he gives notice of a place within the division where and when, between 2 and 6 p.m. of each of the 5 following days, he can be found.

"Revision of his list by Rural Registrar takes place between 2 and 6 o'clock in the afternoon of every day, except Sunday, of the 5 days next following the 15th day before polling day. This revision is ended, therefore, on the 9th day before polling day, when the Rural Registrar closes his list."

Any male or female who is a British subject, 21 years of age, and who has ordinarily resided in Canada for 12 months, and in the electoral district two months before the issue of the writs, is qualified to vote.

A person whose name is omitted may have his or her name added upon satisfying the Registrar by "representations made to him by any creditable person under oath."

Remember that in a Rural Poll anyone claiming the right to vote, male or female, may be allowed to vote and have his or her name added to the list on the day of polling.

Alice Siding

Mrs. Gilletz, who has been a visitor at Banff for some weeks, returned a few days ago, and is a visitor with her mother, Mrs. Stace Smith.

Victor Carr was a business visitor at Cranbrook a few days at the end of the week.

School will be closed on Friday afternoon in order to give the scholars opportunity to attend the fair and take a hand in the school sports.

The gale on Friday night last was almost as severe as the big blizzard on December 15th, and what apples were still on the trees were blown off in liberal quantities.

Douglas Crooks of Kimberley was an Alice Siding visitor for a few days last week, the guest of Mr. and Mrs. John Kelly.

According to the Fernie Free Press Bill Barraclough, who has just installed an electric meat slicer in his butcher shop, has now one of the most uptodate meat markets in that town.

Miss Mary McKenzie of Kimberley, who has been here on a visit with Mrs. Alderson, left for home on Monday.

Blackleg or some similar trouble is taking a heavy toll of cattle on the flats this year. About ten animals have died already, Reed & Mather, R. Stewart and M. Churchill being amongst the losers.

There was a hot time in the old town on Friday night and for a few hours early Saturday morning when the old concentrator adjoining the Constable ranch went up in flames. With the heavy wind that was blowing some trouble was experienced in saving the residence of John Marshall and the barns on the Carr place, the sparks being carried in quantities in the latter direction.

Erickson

Notices are up at Erickson in connection with the registration of voters for the coming election. E. Cartwright will be in charge of the work here.

Bill Wilson arrived in from Oakland Calif., in his Chevrolet car at the end of the week, and is looking after business interests here.

Alf Palmer, who was rather severely damaged in the auto mishap on the 18th, is making a slow but sure recovery.

Mrs. G. Cartwright got back on Thursday from judging at a string of fairs at West Kootenay points, her last work being at Nakusp.

M. R. Palmer and son, Frank, were business visitors at Spokane a few days at the first of the week.

Mr. and Mrs. Hugh Gunn and two children of New Denver, were visitors here for a few days last week, guests of Mr. and Mrs. Angus Cameron.

The Whirlwind Club has been reorganized for the 1925-26 campaign with Miss Trembath again in charge, and Miss Beth Putnam, secretary-treasurer. The girls have about $200 in hand and are buying a piano for the club use. On its arrival the social season will open.

Mrs. R. M. Whimster and daughter of Nelson arrived on Wednesday last on a visit with her parents, Mr. and Mrs. M. R. Palmer.

Several of the members of Whirlwind Club were at the station on Thursday last to greet Mr. and Mrs. Moll (nee Richter) who went through to Kimberley from their wedding trip to coast points. They were married at Midway on the 16th.

1925 Fall Fair Opens Favorably

With the Review going to press Thursday noon and the judging uncompleted it is impossible for us to attempt a story in this issue dealing with Creston's 1925 fall fair, which will be thrown open to the public at 2 p.m. (Thursday), L. W. Humphrey, ex-M.P., arriving on Wednesday to officiate at the opening, and with considerable promise of the last two days of the exhibition being favored with the real Mackenzie King weather

Wednesday morning was a very busy five hours at the main building receiving and setting up of the exhibits in all classes except livestock and poultry. Secretary Allan had everything well lined up and with the assistance of a corps of lady assistants and a few of the directors everything was staged and ready for the judges who commenced work at 2 p.m., and will finish their labors by at least noon on Thursday.

This year's fair is hardly up to the standard of 1924 in some of the departments, but on the whole the exhibit is creditable in most every department, particularly the needlework and cooking, as well as in the field roots section of the vegetable class. The school districts display has attracted entries from Canyon, Erickson, Creston and Wyndel schools, and this section of the fair is bound to attract a lot of attention.

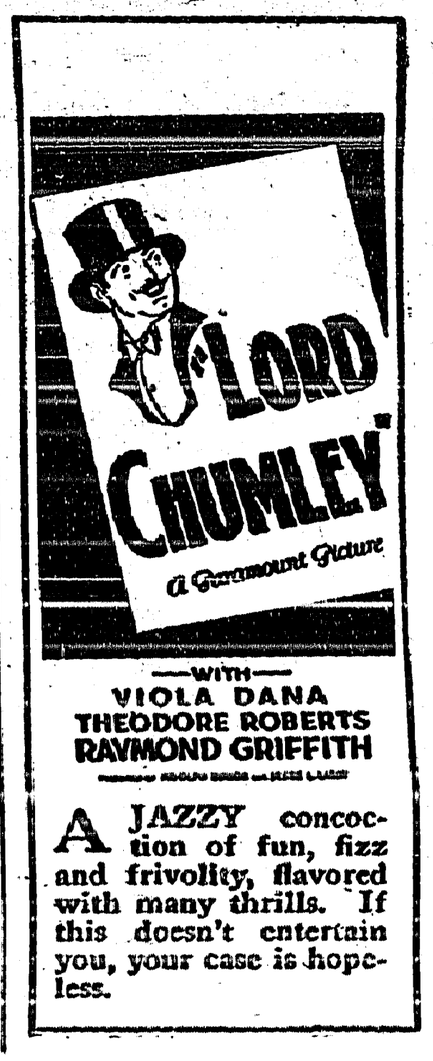
The Ladies' Aid of the United Church had charge of the hall decorating this year and have made a splendid job of it, while warehouseman R. Walters of the Co Operative Fruit Exchange has a commercial display of apples and other products at the end of the building that will command more than passing attention.

Thursday afternoon the Creston school is having a field day of athletic events, and on Friday afternoon all the Valley schools will compete in the championship events, and the crowd is bound to be well entertained both afternoons.

Bonner's Ferry tax rate is 73 mills this year. It was 68 in 1924.

GRAND THEATRE

FRIDAY and SATURDAY Oct. 2-3



—WITH—
VIOLA DANA
THEODORE ROBERTS
RAYMOND GRIFFITH

A JAZZY concoction of fun, fizz and frivolity, flavored with many thrills. If this doesn't entertain you, your case is hopeless.

WORLD HAPPENINGS BRIEFLY TOLD

Three American military regiments have accepted invitations to visit Great Britain and France next May.

The former German Crown Prince recently journeyed from Berlin to Breslau in an aeroplane.

One thousand horses are estimated to be ill with or convalescing from influenza in Montreal.

The most powerful lighthouse in the world has been erected at Dijon, France, to enable aeroplanes to check their direction and location.

Etchings done by Queen Victoria are being exhibited in London for the first time, the Queen having been a pupil of Landseer.

The French and Belgian forces of occupation are rapidly evacuating the rich territory of the Ruhr region in Westphalia.

William Galbraith, a pioneer of northern Saskatchewan and for many years manager of the Hudson's Bay store at Prince Albert, died recently after a long illness.

An Okanagan apple crop of 1,883,800 boxes, compared with last year's yield of 2,160,509 boxes, is the latest estimate by the horticultural department of British Columbia.

The epidemic of influenza in Fort Yukon, Alaska, has reached serious proportions, according to the Pacific branch office of the American Red Cross.

A rumor persists in Ottawa that Rt. Hon. Ramsay MacDonald, leader of the British Labor party, is to visit Canada this year. His visit, as planned, it is understood, would be of a private nature.

Due to the great decrease in the number of partridge, the Ontario department of game and fisheries has declared a closed season for partridge, prairie fowl, wild turkeys, quail or pheasants in the Port Arthur-Fort William district.

The lavish furnishings of the Czar's famous personal dining room will go to the United States, according to a Morning Post dispatch from Leningrad, which says an unnamed American bid $500,000 for the outfit and got it.

The Bonne Entente

Two Races That Can Each Contribute to the Greatness of Canada

Little by little the number of people who see things as they really are grows greater, who recognize the advantage to Canada in having two great races destined to live alongside one another, and to bring to the profit of their country the precious qualities which are the peculiar heritage of each. The "Bonne Entente" is not being established as rapidly as one could wish, but it is making progress. Years are required, perhaps centuries, to cement such unions; but that they are cemented in time is an undoubted fact.—L'Action Catholique (Quebec).

Received Canadian Flowers

Queen Mary Presented With Basket of Peonies From Montreal

Beautiful bouquets of Canadian peonies have been presented to Queen Mary, Princess Mary and Dame Margaret Lloyd George. The peonies are part of a shipment of three thousand peony blossoms sent to Wembley exhibition from Montreal by the grower, Mr. W. Ormiston Roy, of Montreal, whose aim it is to make Canada famous as the home of the peony.

A special basket of the same flowers was escorted to Buckingham Palace by Mr. J. Roy, for presentation to the Queen.

The King of Optimists

The crown for ability to be an optimist in the face of disaster should go to a colored individual named Sam, who recently was thrown into jail.

His friend Mose had already preceded him to prison for stealing chickens.

"How long you in jail for, Sam?" inquired Mose.

"Two weeks," answered Sam.

"What am de charge?"

"No charge, everything am free."

"Ah mean, what has you did?"

"Done shot my wife."

"You all killed yo' wife and only in jail fo' two weeks?"

"Dats all—den I gits hung."

New Zealand Exhibition

Canada Hopes to Derive Considerable Benefit From Taking Part

Canada's participation in the New Zealand and South Seas exhibition which is to be held at Dunedin, New Zealand, on November 1, 1925, to April 30, 1926, will show to advantage the productions of this country's resources and industries. The Canadian Government exhibition commission has contracted to take 24,800 square feet of space in the best location on the exhibition ground, and will erect a very representative exhibit showing the natural resources and products of the Dominion and the attractiveness of this country as a place for tourists.

Plans for the design and lay-out of the Canadian exhibit have been prepared and will be carried out by J. O. Turcotte, architect of the Canadian Government exhibition commission, who will leave Ottawa for New Zealand about the end of the month. He is now returning from the British Empire exhibition, where he supervised the erection of the Canadian Pavilion and the elaborate designs and displays connected with the different exhibits in the pavilion.

Canada stands to derive considerable benefit from taking part in this exhibition. When the International exhibition was held at Christchurch, New Zealand, in 1907, Canada took a prominent part and as a result trade with New Zealand was rapidly developed and a tariff was negotiated with the New Zealand Government which granted preferential rates on certain Canadian goods.

The tariff was negotiated in 1908 and has been in force ever since; last year the exports of Canadian goods to New Zealand totalled $12,735,620, imports from New Zealand were $2,181,028.

Accommodation will be available in the Canadian exhibit for between 80 and 90 Canadian manufacturers. As the space is strictly limited, interested persons or firms are advised to make their application at once to the Canadian Government Exhibition Commission at Ottawa.

Income From Candle Ends

Perquisite Stops Now That Buckingham Palace is Equipped With Electricity

Burnt candle ends have provided a noble woman in London, and her family, a comfortable income. Over a century ago her grandfather acted as assistant to the lord steward of Buckingham Palace, and as the particular perquisite of his position he was granted all the candle ends from the state apartments. As candles were the only form of illumination used in those days, thousands of them were needed for every royal function. The half burnt candles and candle ends were resold to a fashionable tallow chandler where all the dwellers in big houses bought their candles. Sometimes when the function had been a short one, the profit to the lord steward's assistant was very great, for it was a rigid rule that no candle in the royal apartments should be relighted after being put out. Though electric light has been used in Buckingham Palace for many years, the candlesticks were religiously filled afresh for every ceremony. But now, in the recent redecorations of Buckingham Palace, the candlesticks in the state apartments have been removed. And with them will disappear the royally granted perquisite of the candle ends.

Visioning the Future

Adverse Conditions Magnified and Favorable Facts Ignored

There has been too much loose talk about bad conditions in Canada. The "inferiority complex" has been the favorite malady of too many men for several decades. Sometimes it is the result of party feeling, and sometimes the fruit of the old condition that "far-away fields look green." In recent months the adverse conditions have been magnified and the favorable facts ignored by too many people. Something of the same condition exists in Great Britain, leading to the protest of an outsider like Ernest Marshall, as published in a recent London cable to The Globe. John Bull's troubles are real enough, but they are exaggerated by the constant complaint of some observers.—The Toronto Globe.

Lake Titicaca, on the top of the Andes Mountains, is 12,500 feet above sea level and is the highest navigable body of water in the world.

ECLIPSE FASHIONS

Exclusive Patterns by Cecil Bayne

The Vogue For Flare

Skirts complete circles and waists are nipped in, and both are considered smart in wardrobes designed for wearing at the country club, and for innumerable outings afterward. This attractive overblouse has a jabot held in place by a flat band buttoning to the neck and topped by a youthful collar. The sleeves are long and gathered to a turn-back cuff that is fastened with links. A deep band buttons on the hips and holds the fullness firmly in place. Sizes 34, 36, 38, 40, 42 and 44 inches bust. Size 38 inches bust requires 2⅝ yards of 36-inch or 40-inch material. Soft front and back flares make an appeal of smartness in this two-piece skirt, with side-front closing, fitting smoothly on to an inner band. Sizes 26, 28, 30, 32 and 34 inches waist. Size 28 waist requires 3¼ yards of 36-inch, or 2¼ yards of 54-inch material. Each pattern 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Each copy includes one coupon good for five cents in the purchase of any pattern.

Immigration From Britain

Increased Movement of British Families for Dominion in 1926

W. R. Little, Canadian immigration commissioner in Great Britain, who has arrived in Ottawa, predicts a much increased movement of British families to Canada next year. The process that has been worked out this year, he says, will make next year's problem much simpler. Meanwhile, as the result of recent conferences, the duplication of effort by the government and the two railway systems is, in large measure, being removed with beneficial results.

Tribute To Canadians

France to Honor Memory of Two Former Residents of Quebec

Dr. Victor Morin, president of the Montreal Historical Society, has left for France to represent Canada in honoring the memory of two former Canadians. He will officiate at the unveiling of a monument at Brest to Louis Hemaon, author of "Marie Chapdelaine" and other novels on French-Canadian life. At Neuville-sur-Vaune, in the Champagne district, Dr. Morin will arrange for the stationing of a memorial tablet in the village church to commemorate the birth of Paul Chomedey, Sieur de Maisonneuve, founder of Montreal.

Coffee is believed to have been grown first in Abyssinia. It was not a native of Brazil, which now furnishes two-thirds of the world's coffee supply.

Future of the Far North

Arctic Will Some Day Be Under Profitable Cultivation

Mr. Michael N. Mason, F.R.S., F.G.S., F.Z.S., has travelled extensively in the far northern region of Canada, and in his new book, "The Arctic Forests," he discusses the future of the white man in the Arctic region.

He denies "the fallacy" of supposing that the farther one goes north the less favorable do the conditions of life become, asserting that "the difficulties are not caused so much by the latitude as by the remoteness from civilization and the consequent labor of transport."

Point is made of the fact that many of the north Canadian territories once treated as "back of beyond" are now occupied and under profitable cultivation.

Mr. Mason says: "The world of today is scrambling in the muck like rats in a sewage bed, while the newest country in all the globe holds out her arms to take in manhood, offering success for exploitation. Is manhood deaf or dead? Surely not, but how are they to know of these wonders in store for them? How gladly they would go if they only knew!"

Noble Game of Golf

Toronto Claims to be Premier Golfing City in Canada

Toronto lays claim to being the premier golfing city in Canada. Enormous jumps in popularity for the ancient and royal game are recorded every year. It has reached a stage where it is one of the city's most thriving industries—no longer is it a game. Today there are 22 large clubs in the city. In 1913 there were approximately 3,000 golfers, but today there are nearly 14,000 active participants. It is said on authority that Toronto's annual golf bill now passes three million dollars.

While Toronto is the leader, the rest of Ontario is quite in the golf line, there being 104 clubs in the province. The nearest rival to this city is Winnipeg with 14 clubs and Montreal with 13. Winnipeg boasts more golfers per capita than any other city in the Dominion, although Calgary runs a close second.

Unique Advertising Idea

Reason Why Jokes Are Made About Aberdeen Stinginess

Aberdonians are spenders and not tight-wads as so often reported. One of the stock in trade jokes at Aberdeen's expense has pictured it as a city with only one Jew inhabitant, and the Jew remained there because he couldn't get enough money together to buy a ticket to some other place. A London investigator found that the barbers would take no tips, that a picture postcard of Aberdeen, valued at four cents, was given away, and that many shops in Aberdeen had signs in the windows, "A joke a day keeps the doctor away." It is now asserted that there is a band of jokesmiths at work in Aberdeen—for purposes of advertising—thinking up snappy stories about the stinginess of Aberdonians which are disseminated at regular intervals.

Ancient Gates Returned

Taken From Chinese Village By British In 1899

Kamtin's ancient gates which had been removed by the British in 1899 were recently formally placed back in their original positions. The ceremony was performed by the governor, in the presence of government officials and leading Chinese and European residents at the village of Kamtin, in the New Territories. The whole proceedings, and the speeches of this governor and of the Chinese, were marked by a wonderful cordiality and enthusiasm, and paid eloquent testimony to Anglo-Chinese friendship and the goodwill of the villagers.

Alligator Scares Kansas Bathers

Swimmers in the Elk River went scurrying for the shore when a big alligator suddenly poked his head out of the water. When a circus disbanded in a neighboring town two years ago, two alligators were thrown into the river.

More Widows On Coast

California now claims more widows according to her population than any other state. About 13 per cent. of the women over 15 are widows, according to the census bureau. North Dakota has the lowest percentage.

The Population Of England

Has Increased From Twelve Millions To Nearly Thirty-eight Millions In Hundred Years

In a hundred years the population of England and Wales has increased from twelve millions to nearly thirty-eight millions, and accompanying that increase there has been a general excess in the number of females. This is one of many interesting conclusions arrived at by the registrar-general, who has published his final volume on the census for 1921.

Some curious facts emerge from the comparisons available as to the marriage stage of the population. For every 1,000 unmarried men in the country there are 1,153 unmarried women. In Lancashire the proportion of unmarried women is even higher (1,179), and in the West Riding of Yorkshire it is 1,141.

Nevertheless, the chances of marriage in Yorkshire, and, indeed, in the northeastern counties generally, are comparatively high. In the west riding the proportion of married women is 398 in every thousand, in Derbyshire it is 403, in Durham 384, Lancashire 378, Northumberland 374, in London it is only 364, and in Hampstead falls as low as 304. The expectation of marriage, therefore, appears to be much higher in the north than in the south.

Disarmament Question

Director of Military Operations For Great Britain During War Voices Opinion

"The tendency among nations to limit armaments is growing very slowly," said General Sir Frederick Maurice, director of military operations for Great Britain in the war, here in an interview in New York.

"Before nations limit their military establishments," he said, "they will have to feel secure and free from sudden attack. There is growing, however, a sense of disarmament, but I do not expect that the time will come when nations will completely disarm."

Training For Ocean Trip

Canadian Canoeist Proposes to Cross Atlantic in Small Craft

Lieut. Smith, the Canadian canoeist, who proposes to cross the Atlantic in an 18-foot canoe, has began a 2,000-mile training trip along the River Roder to Bergen. Smith recently was in Italy, where his daring ventures in his frail craft aroused great interest. Before visiting Italy he passed through Paris and showed the Parisians how he could jump off a bridge with his canoe without injury and then paddled up the Seine. Five thousand persons lined the river bank at Pless, Prussiaa, when Smith started for Bergen, to cheer him along.

Valuable Shipment From Russia

Platinum Worth £950,000 Sent By Soviets to London Bank

Filled with platinum, two great chests, weighing together three tons, stood on a wharf near London Bridge recently under close guard awaiting removal to one of the London banks. They had been landed from a Russian steamer, the Lieutenant Schmidt. The chests contained platinum and were reported to be worth £950,000, and that they had been sent to a London bank by the Russian Soviet Government. The chests were really great safes cased over with wood.

Quebec Safeguarding Public

Some fifty motorists have lost their driving licenses in Quebec since the opening of the motoring season, and the department of roads is determined that violations of the motor laws of the province will cease or be so diminished as to no longer constitute a menace to the travelling public.

"BAREE, SON OF KAZAN," a Vitagraph Picture, With Wolf, the War Dog, is an Adaptation of This Story

CHAPTER I.

To Baree, for many days after he was born, the world was a vast gloomy cavern.

During these first days of his life his home was in the heart of a great windfall where Gray Wolf, his blind mother, had found a safe nest for his babyhood, and to which Kazan, her mate, came only now and then, his eyes gleaming like strange balls of greenish fire in the darkness.

Baree, of course, would never know their story. He would never know that Gray Wolf, his mother, was a full-blooded wolf, and that Kazan, his father, was a dog. In him nature was already beginning its wonderful work, but it would never go beyond certain limitations. It would tell him, in time, that his beautiful wolf-mother was blind, but he would never know of that terrible battle between Gray Wolf and the lynx in which his mother's sight had been destroyed. Nature could tell him nothing of Kazan's merciless vengeance, of the wonderful years of their matehood, of their loyalty, their strange adventures in the great Canadian wilderness—it could make him only a son of Kazan.

And then came that wonderful day when the greenish balls of fire that were Kazan's eyes came nearer and nearer, a little at a time, and very cautiously. Heretofore Gray Wolf had warned him back. To be alone was the first law of her wild breed during mothering-time. A low snarl from her throat, and Kazan had always stopped. But on this day the snarl did not come. In Gray Wolf's throat it died away in a low, whimpering sound. A note of loneliness, of gladness, of a great yearning. "It is all right now," she was saying to Kazan; and Kazan—pausing for a moment to make sure—replied with an answering note deep in his throat.

Still slowly, as if not quite sure of what he would find, Kazan came to them, and Baree snuggled closer to his mother. He heard Kazan as he dropped down heavily on his belly close to Gray Wolf. He was unafraid—and mightily curious. And Kazan, too, was curious. He sniffed. In the gloom his ears were alert. After a little Baree began to move. An inch at a time he dragged himself away from Gray Wolf's side. Every muscle in her little body tensed. Again her wolf blood was warning her. There was danger for Baree. Her lips drew back, baring her fangs. Her throat trembled, but the note in it never came. Out of the darkness two yards away came a soft, puppyish whine, and the caressing sound of Kazan's tongue.

"He would have slunk back into the friendly gloom of the windfall, but at this moment Gray Wolf came around the end of a great log, followed by Kazan."

Baree had felt the thrill of his first great adventure. He had discovered his father.

This all happened in the third week of Baree's life. He was just eighteen days old when Gray Wolf allowed Kazan to make the acquaintance of his son. If it had not been for Gray Wolf's blindness and the memory of that day on the Sun Rock when the lynx had destroyed her eyes, she would have given birth to Baree in the open, and his legs would have been quite strong. He would have known the sun and the moon and the stars; he would have realized who the thunder meant, and would have seen the lightning flashing in the sky. But as it was, there had been nothing for him to do in that black cavern under the windfall but stumble about a little in the darkness, and lick with his tiny red tongue the raw bones that were strewn about them.

The sun was straight above the forest when, an hour or two after Kazan's visit, Gray Wolf slipped away. Between Baree's nest and the top of the windfall were forty feet of jammed and broken timber through which not a ray of light could break. This blackness did not frighten him, for he had yet to learn the meaning of light. Day, and not night, was to fill him with his first great terror. So quite fearlessly, with a yelp for his mother to wait for him, he began to follow. If Gray Waalf heard him, she paid no attention to his call, and the scrape of her claws on the dead timber died swiftly away.

This time Baree did not stop at the eight-inch log which had always shut in his world in that particular direction. He clambered to the top of it and rolled over on the other side. Beyond this was vast adventure, and he plunged into it courageously.

It took him a long time to make the first twenty yards. Then he came to a log worn smooth by the feet of Gray Wolf and Kozan, and stopping every few feet to send out a whimpering call for his mother, he made his way farther and farther along it. As he went, there grew slowly a curious change in this world of his. He had known nothing but blackness. And now this blackness seemed breaking itself up into strange shapes and shadows. Once he caught the flash of a fiery streak above him—a gleam of sunshine—and it startled him so that he flattened himself down upon the log and did not move for half a minute. Then he went on. An ermine squeaked under him. He heard the swift rustling of a squirrel's feet, and a curious whut-whut-whut that was not at all like any sound his mother had ever made. He was off the trail.

A new terror held Baree rooted there. In an instant the whole world had changed. It was a flood of sunlight. Everywhere he looked he could see strange things. But it was the sun that frightened him most. It was his first impression of fire, and it made his eyes smart. He would have slunk back into the friendly gloom of the windfall, but at this moment Gray Wolf came around the end of a great log, followed by Kazan. She muzzled Baree joyously, and Kazan in a most doglike fashion wagged his tail. This mark of the dog was to be a part of Baree. Half wolf, he would always wag his tail. He tried to wag it now. Perhaps Kazan saw the effort, for he emitted a muffled yelp of approbation as he sat back on his haunches.

For Baree it had been a great day. He had discovered his father—and the world.

CHAPTER II.

And it was a wonderful world—a world of vast silence, empty of everything but the creatures of the wild. The nearest Hudson's Bay post was a hundred miles away, and the first town of civilization was a straight three hundred to the south. Two years before, Tusoo, the Cree trapper, had called this his domain. It had come down to him, as was the law of the forests, through generations of forefathers; but Tusoo had been the last of his worn-out family; he had died of smallpox, and his wife and his children had died with him. Since then no human foot had taken up his trails. The lynx had multiplied. The moose and caribou had gone unhunted by man. The beaver had built their homes undisturbed. The tracks of the black bear were as thick as the tracks of the deer farther south. And where once the deadfalls and poison-baits of Tusoo had kept the wolves thinned down, there was no longer a menace for these mohekuns of the wilderness.

Following the sun of this first wonderful day came the moon and the stars of Baree's first real night.

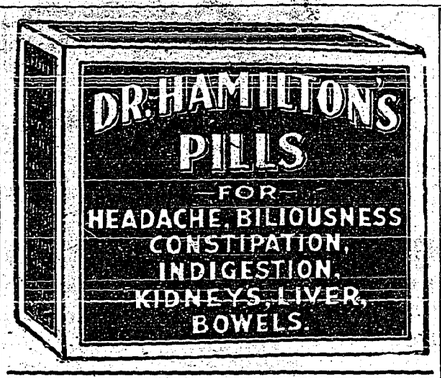
Half a dozen times, as Baree wandered about near the windfall, he hearh a soft whir over his head, and once or twice he saw gray shadows floating swiftly through the air. They were the big northern owls swooping down to investigate him, and if he had been a rabbit instead of a wolf-dog whelp, his first night under the moon and stars would have been his last; for unlike Wapoos, the rabbit, he was not cautious. Gray Wolf did not watch him closely. Instinct told her that in these forests there was no great danger for Baree except at the hands of man. In his veins ran the blood of the wolf. He was a hunter of all other wild creatures, but no other creature, either winged or fanged, hunted him.

(To be continued)

FOR JOY OF GOOD HEALTH

Manitoba Woman Thanks Lydia E. Pinkham's Vegetable Compound

Crandall, Manitoba.—"When I was a young girl at home and working I had terrible pains, almost more than I could bear, and I was not regular. These troubles kept me so tired all the time that I had no strength and no ambition to join in with my friends and have a good time. I was just tired and miserable always and life just seemed as if it wasn't worth living. I saw so much in the papers about Lydia E. Pinkham's Vegetable Compound, and then I had a friend who had taken it and told me about it, so I got some. Every month after taking it I got stronger and I soon did not suffer every month. It stopped the pains and helped me other ways. Then when my babies were coming I was tired and worn out the first three months and ached badly. I took the Vegetable Compound right along and must say it made a new woman of me and able to do my work, and it helped me through confinement. You see I am a farmer's wife with a big house to look after, and three babies now. I have told ever so many women about your medicine. Just last week I got a letter from my old chum in the East. Her baby was born fifteen days before mine and she told me she was not feeling very well, her back aches so much, and that she is going to take the same medicine I took. You can use my letter and I hope some one will be helped by it."—Mrs. Jos. H. Kidd, Box 56, Crandall, Manitoba.



A Tourist Camp At Night

Some of the Trials of the Motorist On Tour

The klaxon sounds the knell of parting day, some late arrivals through the dust clouds creep, and three hours after we have hit the hay the noise calms down so we can get to sleep. Save where, from yonder pennant-clad sedan, the radio set emits its raucous squeal, and underneath a nearby light a man pounds until daylight on a busted wheel. Beneath those tattered tops, those patent tents where falls the dust into each sunburned pore, each on his folding bed of light expense, the rude explorers of the highway snore. Let not ambition mock their creaky cars, their khaki clothes of vintage obscure, no grandeur view, with hauteur like a czar's, the short and simple flivvers of the poor. The boast of shiny paint, the pomp of power, and all that charms the motoristic fop, await alike the inevitable hour—the paths of touring lead but to the shop. Can streamline hood or silver-plated hubs, back to its mansion call the missing spark, can plush upholstery foil the clumsy dubs, who bang into your fenders in the dark? Full many a boob of purest ray serene succumbs each summer to the touring itch, full many a car is doomed to blush unseen, and waste its sweetness in a highway ditch.—Exchange.

Japanese Make New Footwear

Put Canvas Tops On Soles Cut From Old Auto Tires

Used auto tires are in great demand in Kona, Hawaii. Three carloads were recently shipped there from Seattle. Japanese make soles for shoes from these old auto tires and sell them for $1 per pair. Another large shipment is accumulating for the next steamer. Soles are cut from the casings and canvas tops are stitched on. This footwear is said to last from four to six months and generally sells to fishermen and laborers in the sugar and pineapple plantations. The soles are cut symmetrical so that both shoes fit either foot. By changing them about from day to day the wear is equalized.

Fresh Supplies in Demand.—Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that wherever it goes, this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

Autos More Dangerous

The automobile in the United States last year killed 19,000 people and injured more than 450,000. The railroads carried a passenger load equivalent to giving nine rides to each inhabitant of the country and killed only 149, or only one person in each 6,314,000. Once it was thought that the horse was a vain thing for safety.—Our Dumb Animals.

Minard's Liniment for Dandruff

Alberta Sugar Beets

Sugar beets grown in the Raymond district this year should return about $1,700,000 at wholesale prices and the net price to the farmer after paying for their labor should be about $375,000, according to A. E. Palmer, assistant superintendent experimental station. The acreage sown to this crop last spring was approximately 7,000, which works out at a net return of $53 an acre.

Women Engaged In Agriculture

Over 15,800 Canadian women are actively interested in the industry of agriculture, according to a statement made by Miss Beardmore, Dominion convenor of the committee of agriculture of the Federated Women's Institues of Canada. Of this number 1,195 are native-born.

Special rubber insulated gloves and sleeves are now made for the purpose of protecting electrical workers from shock.

Minard's Liniment for Burns

Genuine BAYER ASPIRIN

Say "Bayer"-Insist!

For Colds Headache
Neuralgia Rheumatism
Lumbago Pain

Safe — Accept only a Bayer package which contains proven directions

Handy "Bayer" boxes of 12 tablets
Also bottles of 24 and 100—Druggists

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

WRIGLEY'S "after every meal"

Parents—encourage the children to care for their teeth!

Give them Wrigley's. It removes food particles from the teeth. Strengthens the gums. Combats acid mouth.

Refreshing and beneficial!

Prepared For Emergencies

As a means of preventing suicides, the casino at Monte Carlo maintains a fund to pay the transportation home of any gambler who has lost all his money.

WHEN THE SYSTEM IS ALL RUN DOWN

Often All That Is Needed Is a Tonic to Build Up the Blood

There are many women who have been invalids or semi-invalids so long that they accept their condition as a life burden. They have endured broken sleep, stomach troubles, nervousness, headaches and weakness so long that they have given up hope of enjoying good health. In most of these cases a well chosen diet, fresh air and a tonic to build up the blood would do wonders. To all run-down, nervous people the experience of Mrs. H. J. Cameron, Watervale, N.S., will be of deep interest. She says:—"About two years ago I was in a miserable, run-down condition. I was unable to do my work, my head ached day and night, my nerves were all unstrung, and for three weeks I could not eat or sleep. I then decided to give Dr. Williams' Pink Pills a trial and got six boxes. By the time I had used half of them I felt much better, and when I had taken the six boxes I was as well as ever. I could work all day and not feel tired and have been strong and healthy ever since. I have never taken any medicine that did me so much good and will always highly recommend Dr. Williams' Pink Pills.

You can get these Pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Particular Work

Men employed to classify and value the diamonds contained in a shipment from the mines usually spend several hours or even a whole day in a darkened room before beginning work, in order that their eyes may be in the best possible condition for examining the stones.

The Friend of All Sufferers.—Dr. Thomas' Eclectric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquired for.

A Difficult Task

"Deep breathing, you understand," remarked the doctor, "destroys microbes."

"But doctor," the patient asked, "how can I force them to breathe deeply?"

For COLIC AND CRAMPS PAINS IN THE STOMACH There's Nothing Equals

It has been in use for over 80 years; its action is pleasant, rapid, reliable and effectual, and relief comes promptly.

"Don't accept a substitute."

The genuine is put up only by The T. Milburn Co., Limited, Toronto, Ont.

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2.50 a year in advance. $3.00 to U.S. points.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, OCT. 2

WHAT OTHER PAPERS SAY

Local Horses Feature Races

The Indian race was exciting and the only one in which the third heat decided the winner, Silver Queen, owned and ridden by David Luke, took the first heat, but dropped the second heat to School Boy, owned and ridden by Andrew David. School Boy won in the finals, with Silver Queen second. Jim F., owned by Joe Meschell and ridden by Smoky Nicholas, took three thirds, while Susie Ten Cents, after running fourth in the first and second heats, failed to start in the finals.

The one mile free-for-all race provided a fitting climax to the program each day of the fair. Blackfoot won the opening heat, with Nellie E second, Idaho Boy third and First Principle fourth. The second heat, run Friday, was a race that brought the grandstand up when First Principle came up on the home stretch and all but nosed Blackfoot out of first place. At the rate Lockhead's little horse was gaining, had the race been 20 feet farther, he would have won. In this heat Idaho Boy was third and Nellie E. fourth. In the finals on Satuaday First Principle again came up on the home stretch and won by half a length over Blackfoot with Idaho Boy and Nellie E. trailing in third and fourth place. —Bonner's Ferry Herald.

Settlers for Dyked Lands

The first carload of Kootenai Valley grown grain to be shipped over the Kootenai Valley railway line, arrived in Bonners Ferry Saturday from the A. Klockmann ranch and was delivered to the Bonners Ferry Grain & Milling company. This was also the first carload shipment of grain to be received in the new elevator of the Bonners Ferry Grain & Milling company. Two more carloads of barley and oats were shipped in Tuesday from the Klockman ranch.

To the outside world the shipping of one or two carloads of grain does not signify much. But in this instance the grain was grown on land which until this year was good for nothing but wild hay. Last fall this land was reclaimed by means of dikes and ditches, the dikes protecting the land against the Kootenai river overflow during the spring months and the ditches carrying off seepage water. As a result, it was possible to seed about 1000 acres last fall and this spring, the land producing remarkable yields which, it is predicted, will increase as the ground is worked more.

The grain shipments from the Klockmann ranch are but a small indication of what may be expected next year and the year following. At the present time eight different drainage districts have either been completed or are under way and this means that approximately 20,000 acres of bottom land will be producing grain and alfalfa within the next two years. A large proportion of this land will be in crops next year.

The yields from the reclaimed bottom lands have been extraordinary, it not being uncommon to harvest 40 bushels of wheat or 100 bushels of oats to the acre.

In another three years it is safe to predict that all the lands of the Kootenai Valley will be reclaimed and plans are already under way to colonize the district, the larger landowners having signified their willingness to divide their land into small tracts.

W. F. McNaughton, one of the judges of the Eighth Judicial district, whose home is in Coeur d'Alene, was here Tuesday and Wednesday to make a special study of the Kootenai Valley reclamation plans and in company with J. C. Vernon, engineer in charge of Drainage Districts No. 1, No. 3 and No. 4, and F. A. Shultis, one of the commissioners of Drainage District No. 6, visited the several districts where ditching and diking is being done and where landowners are considering forming new districts. Judge McNaughton stated that he was certain that all reclamation plans in the Kootenai Valley would be successful and that the district has a wonderful future as an agricultural section.—Herald.

Of Interest at Erickson

A pretty wedding, of considerable interest, took place in the Anglican Church, Kettle Valley, on Wednesday, Sept. 16th at 5 p.m., when Jaunita Louisa, eldest daughter of Mr. and Mrs. Joseph Richter, became the bride of Mr. Harold Montague Moll, of Kimberley, youngest son of Mr. W. G. Moll, of London, England. The church was beautifully decorated with sweet peas and lovely asters, by friends of the bride, and at the appointed hour was filled with guests. The service was performed by Rev. E. A. St. G. Smyth. The bride, who was given in marriage by her father, wore a pretty gown of white silk canton crepe trimmed with white satin, with a spray of natural bridal roses on the girdle. Her veil of embroidered silk net was held in place by a coronet of orange blossoms. She carried a beautiful shower boquet of cream ophelia roses and maiden hair ferns. The groom's gift to the bride was a white gold wrist watch, to the bridesmaid a string of pearls, to the flower girl a bracelet, to the page boy a ring, and to the best man gold cuff links. The bride's present to the groom was a leather travelling bag. Mr. and Mrs. Moll left on the early morning train for a honeymoon trip to Vancouver, Victoria and Seattle. The bride travelled in a chic gown of nigger brown satin de chine trimmed with sand and wore a small velvet model hat to match; also a smart coat of brown bolivia cloth trimmed with American opossum. Mr. and Mrs. Moll will make their home in Kimberley.—Greenwood Ledge.

Provincial Sheep Ranch

"Hon. E. D. Barrow, provincial minister of agriculture of British Columbia, has a big scheme that will be welcomed by a large number of farmers. He proposes to secure breeding ewes and run them in large flocks at Sumas.

"It must not be thought that the government is going in for sheep farming, as this rather startling announcement would suggest. Mr. Barrow has recognized the fact that there are too few sheep in the province, and that the time has come when there should be far more. He intends to run sheep and supply farmers desiring stock with any number from 25 to 200, according to Mr. Paterson, who is the only person in the know at present. It is a great idea and should be very popular with quite a large number of farmers. One wonders where Mr. Barrow will get the sheep from. They will be grades and should be at Sumas for fall breeding."—Market Review.

Letter Stationery
---the Printed Sort

FREQUENTLY EVERY GROWER has correspondence to attend to where he wishes he had business (printed) stationery to use.

His lack of it is probably due to the fact that he thinks it expensive.

We can supply you with Printed Letter Paper at a price just a little higher than you pay for pads at the store.

We can supply them padded with a plain duplicate sheet interleaved in case you wish to make a copy of your letters.

Printed Envelopes are comparatively as inexpensive, nnd their use assures you of the letter reaching the party or being returned to you.

No trouble at all to show you samples, and quote you such moderate prices.

The CRESTON REVIEW

Sirdar

Mrs. P. Lombardo, who has been a patient at St. Eugene Hospital, Cranbrook, arrived home on Sunday, and is doing nicely.

Rev. H. Varley will be here on Sunday morning for Church of England services at 8 and 10.30 o'clock.

The auto tourist traffic has about ceased, only an occasional call now being made at Kuskanook to pick up or discharge motor travellers.

Mr. Doyle of Nelson, returning officer for West Kootenay, was here on an official visit on Friday. Mrs. E. Martin has been named registrar of voters for Sirdar. All who wish to vote should register their names with her within the next few days.

Mrs. and Miss McClenahan, R.N., who have been visitors here for a couple of weeks with Mr. and Mrs. Loasby, left on Sunday for Vancouver, where they will spend a few days with friends, and then visit at Seattle, Frisco, Chicago, and Toronto, expecting to reach home at Ottawa, Ont., at the end of the month.

C.P.R. President Beatty's special train of five cars arrived on Monday night, and pulled out immediately for Cranbrook. Supt. T. R. Flett and Yardmaster Ironsides of Cranbrook were here to meet them and accompanied them that far east. The old reliable engineer, H. Brock, handled the engine of the special.

Kitchener

Mrs. Algot Johnson of Moyie is a weekend visitor here, the guest of Mrs. B. Johnson.

Mr. and Mrs. E. Driffle are spending a few days with Cranbrook friends this week.

D. Joyce has just returned from Spokane where he has been visiting friends for a couple of weeks.

Rev. J. Herdman of Creston was a visitor here on Sunday, taking charge of the rally day exercises at the United Church that morning.

G. Hendren of Creston has commenced work on the erection of a new residence for Mr. Seauseau. Houses are in great demand at Kitchener at present.

There was a large turnout of friends on Saturday night for a farewell party tendered Mr. and Mrs. Faystau, who are this week moving to Athalmer to reside. Both have been popular citizens and will be greatly missed.

Sherriff J. H. Doyle of Nelson, who is returning officer for West Kootenay, was here on Wednesday last and has appointed E. McFarlane to act as registrar of voters and D.R.O. at the voting on October 29th. Mr. McFarlane is starting in almost immediately to make up the voters list, and all should see him to make sure their names are enrolled.

NEWS OF KOOTENAYS

If you bring your own boxes apples can be had at 50 cents a box at some of the ranches near Greenwood.

Kaslo is to have another garage. Mayor Archer has purchased the old Club building and is starting Ed. Stanwell up in the auto repair line.

Coyotes are robbing chicken houses in the heart of Greenwood's residential section.

C. T. Fenner has closed his barber shop at Greenwood to go ranching at Summerland.

Much of the wooden sidewalk at Cranbrook is being replaced this year by cinder walks.

There are 105 students at Grand Forks high school this year—the biggest attendance on record.

Nakusp is rather proud of the fact that the town is discarding its wooden sidewalks in favor of cinder walks.

According to the Herald the co-operative warehouse at Penticton is shipping five cars of apples a day at present.

The copper refinery at the Trail smelter is now in operation and is turning out from 25 to 40 tons of copper a day.

Police court business is so brisk at Trail that the magistrate's salary has been raised from $50 to $75 a month.

Night life at Kaslo is so serene that porcupines are invading the select residential section of A Avenue on the hill.

For the first time on record winter apples were coming in to the Penticton packing sheds before the end of September.

A nett profit of $512 was made on sportsday at Revelstoke on Labor Day. $390 of this was the profit on an auto raffle.

The News says there is $140,125 worth of new buildings now under construction, or planned for immediate erection, at Trail.

On the dyked lands at Bonners Ferry the wheat is threshing cut at from 40 to 50 bushels per acre, and 100 bushels of oats are numerous.

The wooden sidewalks that are being torn up at Cranbrook are being carted to the tourist camp for the 1926 fuel supply for autoists.

The News thinks Trail should have a swimming pool, and some thing to cost about $30,000 willl be needed to meet the situation present and prospective.

During the year just closed the ladies' auxiliary to the hospital at Nakusp raised $526, all of which was spent on supplies and improvements to the hospital.

Now Revelstoke is after an auto highway between that town and Banff, and it is suggested the old C.P.R. roadbed through Rogers' Pass might be utilized.

Diging and ditching work is now under way on the 6000 acres that is being reclaimed near Copeland. Some of the owners are already seeding to winter wheat.

The Herald wants action to stop small boys at Penticton selling fruit at the railroad station unless it is first-class stuff. At present the boys are selling windfalls, mostly.

F. W. Steacy, eyesight specialist of Vancouver, B.C., will be at the Creston Hotel for two days, Thursday and Friday, October 1st and 2nd. Charges very reasonable. Glasses are sent on approval, and satisfaction assured.

RANCH FOR SALE—20-acre fruit ranch for sale, close to Creston village. For terms apply David Scott, Champion, Alberta.

WANTED—Apples, tomatoes, crab-apples, and onions, in car lots. Don't sleep at the switch, write or wire us at once. Langstaff Coal Company, Moose Jaw, Sask.

TENDERS FOR WOOD

Sealed tenders will be received by the undersigned up till Friday, October 12th, 1925, for a supply of wood for the Creston schools, as follows:

15 cords 4 foot dry Tamarac or Fir.
15 cords 4 foot green Tamarac or Fir.
10 cords dry 20 inch Tamarac or Fir.

For particulars as to delivery dates and all other information apply S. A. SPEERS, Secretary School Board, Creston.

Announcement!

During the last two days of Creston Fair, Thursday and Friday, October 1st and 2nd, shop will be open from 4 to 6 o'clock.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

Local and Personal

Mr. and Mrs. W. H. Watcher, who have been visiting with old friends at several points in Ontario for the past four months, arrived home on Tuesday. Both are greatly improved in health and report having a dandy holiday.

A sale of town property was completed this week when the residence on Victoria Avenue belonging to W. B. Martin, and occupied by C. H. Hare, was purchased by Dr. Lillie, dentist, who is locating in Creston permanently.

Geo. Taylor reports the sale of his half-acre lot on Victoria Avenue, about opposite the Catholic Church, on which there is a small residence, to Mr. Craig, who has of late been occupying the former Oatway residence in the same locality.

L. R. Shoecraft of Cranbrook, who has taken over the Rawleigh agency in this district, was here on a business visit Friday and Saturday. He will work this area in connection with his other territory which now extends from Crowsnest to Kootenay Landing.

The packing houses are through with the McIntosh Reds and there is a lull in operations this week awaiting the incoming of the winter varieties, which are a light crop. Growers are not storing apples this year in the same generous fashion as other years.

There was some slight bustle around the office of the village treasurer on Tuesday and Wednesday, the last day for paying taxes before another 10 per cent. is added. On the whole rate payers have paid this year's dues pretty well up to the standard of 1924.

J. W. Eastham of Vancouver, provincial plant pathologist, was here at the end of the week, making an inspection of the orchards that were the more severely affected by the December blizzard. He finds many of the trees have made a better recovery than was anticipated earlier in the season.

There has been a big demand for tickets on the fall fair raffle of a fruit cake donated by W. Fraser at the Creston Bakery. The cake is about a foot square and six inches thick, and at 10 cents a ticket someone is going to get great value for their money. It will be drawn for this afternoon at the main building.

Mr. and Mrs. H. W. Dodge of San Francisco, Calif., were motor visitors to town on Monday, stopping long enough to procure a non-resident big game hunter's license, and went on to Kitchener where they will spend a couple of weeks hunting and fishing up Goat River. He is the fourth Californian to enter Canada at this point for a license to hunt big game in B.C.

L. W. Humphrey, ex-M.P. for West Kootenay, arrived in Creston Wednesday and is conferring with the supporters of the Farmer Labor party in the Valley, and on Thursday officiated at the opening of the Creston fall fair. He has covered a considerable part of the riding lately and is quite confident of polling even a larger vote than in 1921, at which time he carried the riding by almost 800 majority.

Major Mallandaine left on Monday or Victoria, to which city he got a telegraphic call that morning due to the death of his mother, who passed away that morning in her 95th year. Deceased had been a resident of Victoria since 1862. Although the aged lady had been in failing health all year and the end was not unexpected, the major feels very keenly the passing of his mother, and his host of friends hereabouts will sympathize deeply with him in his bereavement.

At Cranbrook the continuing Presbyterian Church now has a permanent pastor, a Rev. Mr. Blackburn having been inducted a few days ago. The church is now listed as being in the New Westminster presbytery.

Rossland is praying fervently for almost a week's rain. Unless there is an outpiyring of this sort within a few days the town will have to shut off its water supply several hours daily in order to have enough for necessitous uses.

WARE 181A.

A Shortsighted Policy

The shortsightedness of some people is proverbial, but it is truly amazing to find a whole organization of men numbering tens, if not hundreds, of thousands so afflicted. Yet the coal miners of the United States, Canada and Great Britain seem to be not merely temporarily but permanently incapable of seeing that they are surely destroying their own means of livelihood.

Thousands of miners are on strike in Nova Scotia, and now there is talk of another great strike on the part of the anthracite miners in the United States and rumbles of another strike in the British mines. In no other industry has there been such continuous unrest and repeated strikes as among the coal miners. With what result? The miners themselves would be the last to say that their condition has been improved, while the concensus of opinion is that they are worse off than ever and their future prospects far from bright.

The fact is, and other people realize it if the miners themselves do not, that a very great change is taking place in the world of manufacturing and in transportation to the detriment of the coal mining industry, and the uncertainty, difficulties and losses created by these frequent and prolonged miners' strikes are only serving to accentuate the problem confronting the coal mining industry and hastening the day when the miners will find themselves in a much more serious predicament than now against which they are making such bitter complaint.

The cost of mining and transporting coal, due largely to the high rates of wages paid the miners and increased freight charges resulting from the increase in wages paid railway operatives during the war, and which have not been much reduced, together with the rapid improvements effected in oil-burning machinry and the development of hydro-electric power plants, has resulted in a veritable industrial revolution.

One of the greatest developments taking place in the three English-speaking countries, and one calling for the investment of hundreds of millions of new capital annually, is in connection with water powers and the erection of huge hydro- electric stations generating hundreds of thousands of horse power. Manufacturing plants, finding the cost of coal mounting and their supplies periodically threatened through miners' strikes, are, in ever increasing numbers, *changing over from steam to hydro-electric power.*

All over the continent, with cheap electric power, coupled with its convenience and absence of dirt, housewives are discarding the old kitchen range and installing electric ranges and electric appliances of all kinds.

Another and equally important change is being brought about through the conversion of coal-burning ocean and lake going vessels into oil-burners, while many of the new vessels building are being equipped to burn oil rather than coal. The internal combustion engine using gasoline is displacing the many small coal-burning steam plants everywhere.

In the effort to reduce costs and thus meet the increasing competition of motor cars and trucks, the steam railways are electrifying sections of their systems and extending the same from year to year, while radial railways using electric power are spreading over the land.

These are significant happenings, but especially so to the coal operatives and miners. Yet the latter are apparently blind to a situation which threatens them, and instead of seeking co-operation with the mine owners in a determined effort to reduce the cost of coal to consumers, and guarantee a steady and assured supply at all times, they continue to make demands which the economic situation makes it impossible for the mine owners to accept, thereby increasing present difficulties, jeopardizing the industry in which they are engaged, and speeding up the movement to substitute oil, oil products and electric energy as the motive power in manufacturing industry, transportation and in home economics.

The miners are shortsightedly adopting the attitude of killing the goose that lays the golden eggs for them. Mines everywhere are only operating part time. There are more miners than there is employment for them, and in view of the impetus already given to the movement to substitute other and cheaper forms of power for a haphazard and precarious supply of coal, the number of unemployed miners seems bound to increase. Strikes to enforce wage increases, and impose Union rules, "Check-off" systems, and other arbitrary demands will only serve to further accentuate the miners' troubles, and cannot bring any permanent redress of grievances, imaginary or real.

A Good Reason

Rose came down the stairs looking particularly ravishing in a lavender batiste dress and lavender hat, and the girl who sat across the table opened fire.

"All dressed up in lavender! Wait until Mr. Smith sees you in that!"

"Yes, just wait," was the lightly tossed-off answer. "And he likes lavender, too."

"So that's the reason you wear it?"

"Oh, no!" replied Rose sweetly. "That's the reason he likes it!"—New York Sun.

MOSQUITO BITES!

Let Minard's take the itch out of them. Excellent for all stings and insect bites.

MINARD'S "KING OF PAIN" LINIMENT

Why He Did Not Bathe

I met a man who was just back from a coast resort, and asked him if he had enjoyed the sea-bathing. He fixed me with a glittering eye and said: "I did not bathe. Are you aware that the water in the sea has not been changed for fifty million years? And what sensible man wants to immerse himself in a weak solution of drowned men?" I wilted, but have some idea that these remarks were not original.—London Sunday Pictorial.

Earl Haig Is Color Blind

Earl Haig celebrated his sixty-fourth birthday on the day he sailed from Liverpool to Canada, to attend the conference of the British Empire Service League. It is not generally known that the great soldier is color blind. For that reason, it is alleged, he was refused entrance to the Staff College, and it was only after a great deal of common sense talk by Sir Redvers Buller and Major-General M'Calmont that he was at last admitted.

Minard's Liniment for Aches and Pains

Defence of Empire

Closer Relations With Dominions Upon Naval Policies Are Favored

During a debate in the British House of Commons on the naval estimates, Major L. Hore Belisha, Liberal, suggested, that there should be a more intimate relationship between the Mother Country and the Dominions when the naval problems were settled.

The Dominions are not bearing their full share of responsibility in naval matters, Major Belisha said, not because they are unwilling to do so, because the problem probably has never been approached by them from a truly imperial point of view.

Major Belisha's remarks subsequently were endorsed by other speakers, including Mr. Lloyd George. The latter declared that if it were a question of the defence of the empire, the whole empire might share the burdens thereof.

Earache, Toothache Now Quickly Subdued

These are the sort of ills that call for a powerful and certain remedy. When your tooth is jumping, when you want ease and comfort in a hurry, you always get that quick relief from trusty old "Nerviline." Many who have proved the unfailing merit of Nerviline call it "King over Pain." Certainly no family can afford to be without a bottle of this dependable medicine. Nerviline is a protection against a hundred minor ills, such as cramps, gas on the stomach, neuralgia, toothache, earache, etc. Get a 35c bottle from your dealer to-day.

Tourist Trade Increases

Canada's third largest industry, its tourist traffic, showed an increase of 60,000 in the national parks of Canada for 1924, according to the report of the commissioner. Banff and Lake Louise showed a combined advance of 15,000 visitors. At Banff, 1,693 permits were issued to camping parties.

CHOLERA INFANTUM

Cholera infantum is one of the fatal ailments of childhood. It is a trouble that comes on suddenly, especially during the summer months and unless prompt action is taken the little one may soon be beyond aid. Baby's Own Tablets are an ideal medicine in warding off this trouble. They regulate the bowels and sweeten the stomach and thus prevent the dreaded summer complaints. They are an absolute safe medicine, being guaranteed to contain neither opiates nor narcotics or other harmful drugs. They cannot possibly do harm—they always do good. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Britain Declines Proposal

Under the caption, "A Strange Request," the London Daily Telegraph says Great Britain has declined a proposal from the United States to appoint there a customs attache, one of whose duties will be to investigate prices asked of American buyers by British exporters claiming the right to inspect the books of the British firms concerned.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

Silk In Sacramento

The Sacramento Valley, because of its uniformly mild climate, is believed to be ideal for the growing of silk worms and a large silk worm farm has been started near Oroville, Cal.

ONTARIO AGRICULTURAL COLLEGE

GUELPH, ONTARIO

Prince George Will Stay

Takes His Chance in China Like Other Junior Officers

Those who have been expecting the recall of Prince George from China must be sadly ignorant of the traditions of our royal house. If the British naval forces are employed, the Prince will be with them, and will take the rough and tumble of it like *any other junior officer.* The King is quite alive to the dangers of the situation, but I should imagine that the recall of his son would be his last thought, as it would be the very last wish of the Prince himself. In our royal family, at all events, things like that are just "not done."—Glasgow Herald.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

How Should I Wean My Baby?

This is a serious problem to many mothers. Weaning should always be done gradually, beginning about the seventh month, giving one or two bottle feedings during the day, increasing the number of bottle feedings gradually, until weaning is accomplished. Borden's Eagle Brand Milk is so like mother's milk in taste and ease of digestion that it can be given alternately with breast milk without causing abrupt weaning.

In this paper from time to time you will find an advertisement of Borden's Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company Limited, Montreal, and they will send you, free of charge, instructions for feeding your baby, and a Baby Welfare and a Baby Record Book. Or, just write the Company, mentioning this paper, and they will be sent.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure and satisfactory relief.

Butter Production Increases

Considerable Increase Shown In Saskatchewan Production For May

Butter production in Saskatchewan during the month of May totalled 1,241,522 lbs., as compared with 940,041 lbs. in the same month last year, according to a report of the provincial dairy commissioner. cumulative production for the first five months of the current year is 3,383,986 lbs., as against 3,322,034 lbs., in the corresponding period of 1923, an increase of 561,952 lbs.

Social Service

The call to social service is a call to self-sacrifice, and, if anything is to save this country from the disasters to which certain principles, preached today with the greatest fervor, would commit it, it is the generous service of those who reject the subtle temptation to devote themselves to a stubborn guardianship of their own special privileges.—London Daily Telegraph.

Won Wager By New Stunt

Arthur Riley, 27, recently pushed a truck on which a man rode a distance of 52 miles in 13 hours and 22 minutes. The total weight of the truck was 490 pounds. He did the stunt to win a wager.

Minard's Liniment for Corns and Warts

Germany Buys Canadian Wheat

German Consumption of Canadian Grains is Heavy Says Report

The value of the German and continental markets with regard to the exportation of Canadian foodstuffs is being more than ever exemplified this season in the huge imports of grain and flour from the Dominion by the free port of Hamburg. In addition to more than 12,000,000 bushels of grain shipped from Montreal since the opening of navigation, Hamburg has received 6,014,411 sacks of Canadian flour in the period between September and June, and is 1,000,000 sacks in excess of the 1922-23 season.

Figures show that Montreal not only led all world ports in grain shipments, but also in flour exports. Although the threatened import tax on incoming flour by Germany undoubtedly hastened shipments to that country, the fact is nevertheless apparent that German consumption of Canadian grains is very heavy. The aforementioned tax is to go into effect August 15.

Relieves Asthma at Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Will Not Establish Base At Esquimalt

British Government Denies Rumor of Naval Base on Pacific

The British Government has made no proposal looking to the establishment of a naval base at Esquimalt, B.C. This was stated officially at the department of national defence when attention was drawn to rumors that such a proposal had been made. It was stated that the point was raised from time to time in England that there should be a British naval base on the Pacific coast, but that nothing had been done. The Canadian Government now operates a naval dockyard at Esquimalt.

New Liverpool-London Highway

A 226-mile highway will be built in England between London and Liverpool at a cost of $325,000 a mile. The road is to have no cross roads and will pass through no towns. It will be double, with a roadway for slow traffic and one for fast travel, with no speed limit on the section for fast going. A toll equivalent to a cent the ton will be charged.

152

Increasing Demand For Wheat In Markets Of The World Should Keep Grain Prices Firm

Mr. J. Obed Smith, former immigration commissioner for Canada in London, refers, in a letter to "Canada," the London weekly, to the growing production of foodstuffs in this country and the increasing demand for them from other countries—speaking of wheat, he says:

"Canada sells her wheat to Belgium, France, Holland, Scandinavia, Italy and Germany, besides the Old Land and the United States. Russia has recently placed an order and paid for 16,000,000 bushels of Canadian wheat. That is not all. The population of the states is rapidly increasing, despite the immigration quota, which prevents too many mouths arriving and needing imported food. This American market is nearest to Canada, and will be fed first.

"The Orient has suddenly discovered a liking for wheaten bread, and shipments of Canadian wheat across the Pacific Ocean have shown a large and rapid increase. What will be the immensity of the market if the teeming millions of China and Japan should generally adopt wheat instead of rice, which wheat can only be readily supplied by Canada? The states have no more land that can be profitably used for wheat growing; their average result per acre is far less than in Canada, while heavy overhead charges make it impossible to raise and sell wheat on equal terms with Canada.

"The day of export of wheat or flour from the United States is over. This is why the Canadian farmer has prepared more land for crop this year, and why so many American farmers are crossing the international boundary northward and buying better land than their own at one-third the price. The inexorable law of supply and demand governs the price of wheat, and while violent fluctuations have been seen lately the present market price is likely to be near the economic standard value of wheat for years to come. At that the Canadian farmer will profit."

Commenting on Mr. Smith's letter, "Canada" says that it came opportunely during Empire Shopping Week and that "in London in particular a commendable effort is being made by shopkeepers to bring empire products before the attention of the public. So far as Canada is concerned, the importance of encouraging the development of Canadian farming is obvious from our correspondent's letter. To call the Dominion—as has sometimes been done—'the bread-basket of the world' is not so very far-fetched."

New Settler Satisfied

New Arrival From U. S. Likes This Country

In a letter to the Canadian Government agent at Portland, Maine, David M. Boyes, who recently settled at Meadow Lake, Sask., writes:

"We feel more than thankful for your assistance in getting us here. We like this country very well, and have never seen a place that produced grazing like it does here. The horses are knee deep in wild pea-vine and vetch, besides plenty of natural grasses.

"I took a homestead, and it won't be hard to get 50 or 60 acres under cultivation. I will soon have the house finished. I am building with logs, having the help of two neighbors, and I can pay them back with labor.

"The soil here is a black vegetable loam and very rich. Water can be had at a depth of from 8 to 28 feet, besides there are numerous springs. I am more than satisfied with coming here and can recommend this place to anyone. There is good fishing and hunting, and if we can keep the weeds out we'll have one of the best districts in the west. We are all enjoying good health and have good appetites."

Nightingales In London

A nightingale singing to his mate, and her answering trills, were heard by residents in Holloway in the north of London recently. The birds settled in the branches of a tall tree in one of the gardens, and watchers saw them clearly through opera glasses.

W. N. U. 1587

Canada's Apple Crop

Some districts in B.C. Show Reduction From Last Year

Commercial apple prospects indicate a total crop of 95 per cent. of 1924, when 2,749,544 barrels were harvested, or 64.3 per cent. of a five years' average of 3,088,504 barrels, according to a crop report just issued by the department of agriculture.

The prospective commercial apple crop for British Columbia compared with 1924 indicates 90 per cent., or 2,097,900 boxes, or 80.5 per cent. of a five-year average, the report states. The slight reduction is caused by winter injury and the hot weather during the past month.

The greatest reduction in the apple crop is reported from Creston, Salmon Arm and the northern Okanagan districts where winter injury was most severe. Other districts such as the southern Okanagan, Keremeos and Kootenay Lake, have prospects for increased yields or equal to last year's crop, which should balance the crop situation to the above figures.

Minerals In Rations For Hogs

Test at B.C. Experimental Station Yielded Valuable Information

Valuable information relative to the importance of adding mineral matter to the usual grain rations of hogs has been secured at the Agassiz, B.C., experimental station during the last two winters, is the information contained in a recent "Experimental Farm Note," by W. H. Hicks, the superintendent of the farm.

The mineral ration used was composed of ground bone mael, 8 pounds; ground charcoal, 5 pounds; ground rock phosphate, 5 pounds, and salt, 3 pounds at a cost of 2.7 cents per pound. It was fed at the rate of 3 pounds to each 100 pounds of meal.

In order to test this material, a total of 84 pigs were divided into fourteen lots of six pigs each. In every ration where the mineral mixture was fed increased gains were secured.

When other mineral matter is not available, ordinary wood or coal ashes thrown on the floor gives good results.

Wolf Habits and Importance

Interesting Booklet Which Can Be Obtained Free

Accounts of wild life and descriptive history of such animals are always interesting, particularly so when commercialism is involved. Of this nature is Mr. Norman Criddle's, "The Habits and Economic Importance of Wolves in Canada," published by the department of agriculture at Ottawa, and which can be had free on application to the publications branch there. Last winter it will be remembered wolves were particularly prominent in the public mind, partly owing to their boldness and partly due to the formation of large hunting parties to pursue them. Mr. Criddle tells of grey wolves, Arctic wolves, timber wolves and coyotes, describing their habits, methods of feeding and economic status. He also tells what farmers and outlying settlers most want to know, how the animals can be trapped, poisoned or otherwise destroyed and how the skins can be preserved.

If a baby is born in August it is more likely to live than if it is born in any other month, government records show.

World Forestry Congress

Important Event to be Held at Rome Next Year

Representatives of university forestry departments, schools of forestry and forestry associations from the four corners of the globe are to meet in Rome at an international forestry congress lasting from April 29 to May 5. "Those responsible for the congress," say the advance notices, "trust that they will be able to bring together in Rome forestry experts representing all civilized countries, so that with their collaboration a strong stimulus may be given to the advance of forestry throughout the world, and renewed confidence may be felt in the future of the forest, which is a factor of such importance in human activity and industry." An international forestry exhibition of wood working machinery and general forestry products is being included in the congress plans.

Winnipeg Pulp Mill

Mammoth Paper Mill May Be Erected If Power Rights Are Secured

Assurances that they were prepared to go ahead immediately with the construction of a $5,000,000 paper mill of 250 tons capacity in the Great Winnipeg district, provided the Dominion Government entered into a contract providing pulpwood and waterpower rights, were made by George M. Seaman, of the Seaman Paper Company, Chicago, and E. W. Backus, of the Backus-Brooks interests in Canada and the United States.

The assurances were received with the utmost enthusiasm by the 300 representative men of Greater Winnipeg and other parts of the province present at a meeting called by Mayor Webb.

Suggests Colony Plan

Lord Mayor of Hull Makes Suggestion Re Emigration

Speaking to a gathering of Canadian and Newfoundland representatives in connection with Hull's civic period at Wembley exhibition, the Lord Mayor of Hull suggested that his city should adopt in each colony some place, village, or centre toward which Hull's colonial relationship should be concentrated and mainly directed. He said it seemed that our system of emigration was probably too diffuse and visionary. If their emigrants went to some definite district, and if some tangible and favorable scheme was devised, he thought they might assist migration of very desirable colonists.

Interesting Documents Found

An ancient tax bill inscribed on tablets unearthed in Babylonia are on display in Cleveland. The tax bill is over 4,000 years old and dates back to 2350 B.C. There is also an inventory for sheep delivered for sacrifice, a business document believed to have been written during the life of Abraham, and a document dated 538 B.C. during the reign of Nabonidus, the last king of Babylonia.

New Insulin Discovery

A highly concentrated form of insulin, surpassing the potency of the commercial product used in the treatment of diabetes, has been obtained by a group of scientists in research work carried on during the past year at Johns Hopkins University and the Gates Chemical Laboratory, Pasadena, Calif.

Tourists For Canada

Nearly 20,000 people had booked for the "See for yourself" excursions to Canada, which began to run from British and French ports in July. Passengers included retired military men and civil servants, school teachers and hundreds of sons of farmers.

Party Of American Visitors Are Greatly Impressed With Trip Through Western Canada

The prosperity of western Canada; excellence of growing crops and splendid farming methods followed throughout Manitoba and Saskatchewan were an eye-opener to the party of United States land agents, recently taken on a tour of parts of Manitoba and Saskatchewan, by Dan M. Johnson, western manager of agriculture and colonization for the Canadian National Railways. On their return to Winnipeg, the members of the party, numbering twenty-two from across the border, were most enthusiastic in their praise of the country they had visited, and were loud in their expressions of appreciation for the hospitality shown them by residents of the various districts visited.

The tour took them from Winnipeg through Dauphin, Melfort, Wadena, Prince Albert, Saskatoon, Eston, Kelvington and through the famous Goose Lake and Snipe Lake districts. At Dauphin they enjoyed a full day's drive through the surrounding territory and were entertained at luncheon by the board of trade. At Saskatoon the party visited the forestry farm and the university and also enjoyed a five hours' drive as well as being entertained at luncheon. In the Gooso Lake and Snipe Lake districts they made a drive of 165 miles, while in Wadena and Kelvington districts the party drove over 125 miles in their inspection of farms and vacant lands, being later entertained by the Wadena and Kelvington boards of trade.

On their return to Winnipeg and their later departure for the United State, members of the party were loaded down with samples of grain, vegetables, alfalfa, etc., which they had gathered at different points. They reported having picked excellent domestic strawberries at Dauphin and Eston and were surprised to find this fruit producing so well in western Canada. Nebraska and Illinois agents were particularly impressed with the type of beef cattle and bacon hogs raised in western Canada, which, they believed, were better than anything produced in their parts of the United States.

Before their departure for their homes in the United States, the members of the party presented a resolution of thanks to Mr. Johnson and to Capt. L. B. Boyd, Canadian National representative at St. Paul, thanking them for the opportunities which had been afforded of visiting western Canada and seeing for themselves what was offered here in the way of homes for prospective settlers. The resolution states: "We have seen much of western Canada, its broad, fertile and beautiful land. We have met many of our neighbors to the north. We have been on foreign soil for many days, but we have at no time on our trip had that feeling of a foreigner in a foreign land. We have felt that we have been at home and among friends throughout our journey. We have been royally entertained at all places where our party was scheduled to stop. We have been feasted and toasted and have met with nothing but good fellowship and a glad hand."

Before their departure from Winnipeg, members of the party were interviewed and asked for a brief outline of their impressions of the west. The following summaries, will give western Canadians an impression of the feeling which their own country creates in the mind of the interested visitor:

M. T. Kilmer, western Nebraska, states: "I am convinced there is no place in north America that offers such wonderful opportunities to the young man to own his own farm home as do the fertile fields of western Canada." Richard Ellstrom stated, western Canada's wheat crop is the best I ever saw or dreamed of; furthermore, opportunities for mixed farming on low-priced but fertile lands with small capital are the best I know of in any country." H. J. Hansen, of Leeds, N.D., reports: "For a man with limited means to make a home for himself and his family, it is the best place in north America at the present time."

Had Ride On Turtle

A swimmer off Leighton-on-Sea recently was given a free ride by a big turtle. It suddenly shoved the bather up out of the water and carried him several feet.

Livestock Marketings In 1924

Fifth Annual Report Is Issued At Ottawa

A vast deal of information is contained in the fifth annual report on the origin and quality of commercial livestock marketed in Canada, recently published by the livestock branch at Ottawa and which can be had of the publications branch there. An innovation is the inclusion of maps of each province, by which the most prolific sections of production can be identified. It is interesting to note that the finished handyweight steers, and steers of export weight and quality suitable for the British market were turned out in increasing numbers in 1924 and that all the five provinces dealt with, namely: Quebec, Ontario, Alberta, Saskatchewan and Manitoba, contributed to this desirable increase, being thus instrumental in improving Canada's position on a quality basis. Improvement was observable in the quality of the exceptionally heavy marketing of calves. There was a record output of hogs, and, as the report states, there is much satisfaction in the fact that the extensive movement was not, as is generally the case, accompanied by any deterioration in quality. "Fortunately," also says the report, "under the hog grading policy, we are able to give direct shipments to packing plants by grades." A table is given showing the number of each grade shipped to the plants during the year, by which it appears that the percentage of selects shipped by each province, first to packing plants, and secondly to stockyards, were as follows: Alberta, 2.62 and 3.25; Saskatchewan, 2,94 and 3.26; Manitoba, 8.18 and 4.91; Ontario, 21.58 and 24.41; Quebec, 10.42 and 9.62.

Award Farming Scholarships

Provide Tuition in Canadian College For English Boys

A London cable states that of the fifty scholarships tenable in agricultural colleges in Canada which the Fellowship of the Empire Exhibition is proceeding to allot, twenty-five already have been allotted to London. The others will be distributed in Scotland and among English provincial districts. Each scholar will be provided with a free passage to Canada, education and maintenance for a year and will afterwards be found suitable employment on the land in Canada.

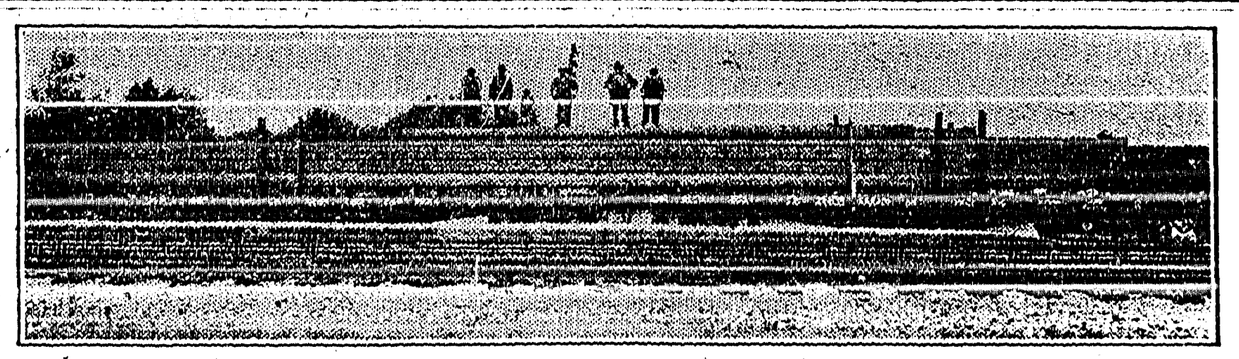
Oil From Crickets Valuable

Very valuable oil, suitable for aviation since it does not congeal even at a very high altitude, can be made from crickets, according to advices received at Washington by the department of commerce from Algiers. Recently about eighteen tons of crickets were sent to Holland from Algeria. Part of this quantity was fed to poultry and from the remainder oil was extracted.

A Better Neighborhood

A woman in the suburbs was chatting over the back fence with her next-door neighbor: "We're going to be living in a better neighborhood soon," she said. "So are we," volunteered Mrs. Nextdoor confidently. "What? Are you moving, too?" "No, we're staying here." — Christian Register.

The fortune that William Hohenzollern has stored away was doubtless saved for a reigny ray.



MIGHTY LOGS FROM BRITISH COLUMBIA

A record-breaking consignment of Douglas Fir logs which arrived recently at Dorval, Quebec, over the Canadian Pacific lines direct from New Westminster B.C. The load consists of twenty-nine logs, some of which were so long that three flat cars were required to carry them. Of the twenty-nine, 12 were 80 feet long, one was ninety feet, 12 were 52 feet, and 4 were 40 feet long, while the load weighed 86,653 pounds. The lumber is intended for an eastern firm of contractors.

Notices are up regarding the registration of voters for the present federal election. W. K. Brown has been named registrar for Creston, and Chas. French will look after the same work at West Creston.

The lower end of Victoria Avenue is greatly improved by the utilizing of the excavation from the United Church basement for a fill in of the dip from about opposite the church down to the Mercantile corner.

Crestonites were surprised on rising Sunday morning to find a very noticeable show of snow almost half way down Goat Mountain. This is the earliest in years for so heavy a fall before October's arrival.

Dong Barney was a business visitor at Cranbrook and Kimberley a few days at the first of the week. He ran into so many Crestonites at the latter place that it hardly seemed like being away from home.

Mining recording was fairly active at Creston for September, work being recorded on eighteen claims by the deputy mining recorder H. McLaren. Twelve of the properties are located in the Kitchener district.

Messrs. Allan and Scrimgeour of the finance committee of the fall fair, made the rounds of the business houses on Saturday afteanoon. In spite of the slow times donations this year are in excess of 1924.

In order to expedite the preparation of examination papers and other lessons Creston school board is investigating the prices of mimeographs and will probably buy one for the use of the public and high school staff.

F. W. Steacy, eyesight specialist of Vancouver, B.C., will be at the Creston Hotel for two days, Thursday and Friday, October 1st and 2nd. Charges very reasonable. Glasses are sent on approval, and satisfaction assured.

Creston Valley Women's Institute will be ten years old on the 14th, and the anniversary will be observed by holding a whist at the Parish Hall to which the members and their husbands will be invited. A committee consisting of Mesdames Boyd, Cook and Stephens have the affair in charge.

Creston's fall fair is developing the Chautauqua habit of bringing along a rain. A moderate rainyspell set in on Saturday, following a Friday night gale that blew down a considerable quantity of the unpicked apples. Things cleared away on Wednesday however, and good weather seems assured for the fair.

WANTED—Apples, tomatoes, crab-apples, and onions, in car lots. Don't sleep at the switch, write or wire us at once. Langstaff Coal Company, Moose Jaw, Sask.

Card of Thanks

Jim Dodds takes this means of expressing his thanks for the practical fashion in which Kitchener Baseball Club have shown their appreciation of the situation in which he finds himself due to having his leg broken whilst playing in a game in that town some weeks ago. On Monday night he received a cheque for $150 from the Kitchener Club and the same is very fully appreciated.
