THE CRESTON REVIEW

Vol. XVII. CRESTON, B. C., FRIDAY, NOVEMBER 13, 1925 No. 39

Rector of Christ Church Resigns

Definite announcement was made at the first of the week of the acceptance by Rev. H. Varley, rector of Christ Church, of an offer from the Archbishop of New Westminster to take charge of the parish of Surrey, in the Fraser Valley, which also includes the Anglican work at Cloverdale, White Rock and Hall's Prairie.

The rector has tendered the vestry of Christ Church his resignation approval of which is expected from the Bishop of Kootenay this week, and the resignation and the matter of securing a successor will be discussed at a congregational gathering in the Parish Hall tonight.

Rev. Mr. Varley has been in charge at Creston for about four and a half years, coming here from Edgewood at Easter, 1921, and due to the fact that he became a resident rector after the parish had been getting along with services once every three weeks for at least six years, previous, his work here has been much taken up with getting the Anglican forces in the area between Sirdar and Yahk together and organizing the church effort, at which he has been successful to a very considerable extent, now giving Sunday services at least once a month at Yahk, Wynndel, Sirdar and Creston with very gratifying attendances.

The retiring rector has been particularly successful in arousing the younger members of his parish to their responsibilities, this being strikingly shown in the classes for confirmation at the four visits that the bishop has made to Creston during Mr. Varley's incumbency.

The rector's decision to accept the very desirable offer of Surrey is in some measure due to the continued poor health of Mrs. Varley, it being thought that a removal to a lower altitude would prove beneficial.

No date for his departure has been decided upon, but it will probably be about the middle of December as the archbishop is desirous of having him in charge at Surrey before Christmas.

Wynndel

The whist and dance in the old schoolhouse on Saturday night was a very successful affair. There were about a dozen tables of card players, and the prizes went to Mrs. G. W. Taylor and W. J. Cooper for the high scores, and the booby prizes were secured by Mrs. H. F. Packman and O. H. Davidge. After cards a dainty supper was served and the evening rounded off with a few hours dancing.

Mrs. M. Hagen left on Friday for Robson to visit her daughter, Mrs. E. Uri, whose youngest son, Donald, was seriously ill with typhoid fever. Latest reports are that the boy has taken a decided turn for the better and is doing nicely.

O. J. Wigen, who has been under the doctor's care with pneumonia and pleurisy, is now making a nice recovery, and was up for a while at the first of the week. His many friends are hoping to see him round again shortly as well as ever.

Fred Mower, who has been on the prairie since last fall, returned on Monday on a visit to his parents, Mr. and Mrs. J. Mower. He reports continued bad weather for threshing.

Miss Ethel Towson, who has been assisting with packing the apple crop at Willow Point, returned home on Monday.

Carl Wigen is busy these days making alterations to his residence, enlarging and lathing up the kitchen.

A. Spencer of Canyon City was here on Tuesday, attending to some business for the Co Operative Fruit Growers, whose books he is in charge of.

Many friends of late Oswald Hindley are grieved to hear of his some what sudden death on Thursday last at Nelson hospital, after undergoing a serious operation. He leaves a wife in England and three brothers in B.C. to mourn his passing.

Oscar Ofner, who has been in Seattle for the past year, returned to his home here on Saturday.

Mr. and Mrs. Chas. Hindley received a sudden call to the Nelson hospital on Wednesday last on account of the former's brother being a patient there, and whose death occurred the following evening.

Oscar and Paul Ofner, jr., left on Tuesday for Harrop, where they are going to work on the wood pipe boring company who are operating there.

H. F. Packman, who has been on the road crew at Queens Bay for the last two months, returned home on Monday.

E. Wall, who has been on the staff of the Bluebell mine at Riondel, was laid off due to a shortage of water for the mill, returning to his home here on Friday. He will return as soon as a real good rain sets in.

Remember the big concert and musicale in the old schoolhouse on November 27th, and keep the date open.

Miss Cherrington, principal of the Wynndel school, has issued the following report for October: Highest standing, names in order of merit, Grade 8—Gweedo Benedetti, Crawford Irving, Jean Wood. Grade 7—David Taylor, Rodolpho Benedetti, Manuel Irving. Grade 6—Alice Davis, Lois Cooper, Whitfield Abbott. Grade 5—Dennie Trudeau, Andy Haged, Melvin Hagen. Perfect attendance—Lewis Abbott, Whitfield Abbott, Gweedo Benedetti, Alice Davis, Andy Hagen, Melvin Hagen, Crawford Irving, Manuel Irving, Marguerite Joy, Gilbert Payette, David Taylor, Dennie Trudeau.

The report of Miss Walsh for Division 2 is as follows: Highest standing, Grade 4—Dorothy Moon, Ellen Hagen, Mary Cooper. Grade 3—Kenneth Packman, Ruth Trudeau, Lawrence Davis Grade 2—Bertha Gilette, Hilda Hagen, Esther Wittman. Grade 1—Clara Wittman, Elmer Davis, Campbell Payette. Perfect attendance—Ruth Joy, Dorothy Moon, Maron Moon, Ellen Hagen, Ned Bathie, Margaret Irving, Clara Wittman, Campbell Payetee, Lawrence Davis, Kenneth Packman, Ruth Trudeau Bertha Gelette, Hilda Hagen, Esther Wittman, Alvin Hagen.

Sirdar

The usual third-Sunday in the month Church of England service is withdrawn for Sunday next, 15th.

Cranbrook Courier: Miss Margaret Ellen Chadwick, of Lancashire, England, and Mr. Hughie Brock, well known Canadian Pacific Railway engineer, of this city, were quietly married at Nelson on Wednesday, September 28th, by the Rev. J. Althoff, of Nelson. Mr. and Mrs. Brock have taken up residence in Cranbrook.

Miss Dorothy Cam was a Creston visitor the fore part of the week, the guest of Mrs. Jas. Johnston.

Geo. Jansen is advertising the livestock and other effects at Kuskanook for sale, and does not intend to continue the farm at that point.

Tickets are on sale this week for a benefit dance to be given in the school house on Saturday night, 14th.

MILK

10c. Quart Delivered

Pure, fresh Milk from my fine Dairy herd is now being delivered every day and I am prepared to supply many more customers. If you wish high grade milk, at a moderate price let me hear from you. Regular and prompt delivery assured.

D. LEARMONTH

Board of Trade November Meet

The November meeting of Creston Board of Trade on Tuesday night was graced with one of the best turnouts of members this year, there being at least a dozen present when President C. W. Allan called the gathering to order.

The secretary had a sheaf of correspondence to present, including a request from a Canadian soldier now resident in Washington state, who is desirous of coming back to British Columbia, and who wrote to enquire as to the prices and terms on land in the Lister area. His preference is for dairying and is specially anxious to know if the country is adapted to that line. He is also desirous of getting some place where the winters are reasonably balmy.

A gentleman from Trail wanted to know what openings there were in the business line at Creston, and wants to be specially informed as to the possibility of profitably operating a jitney service between Creston and Yahk.

A third letter was from a Mr. Hill of Lethbridge, Alberta, who has previously been employed by the C.P.R. on its irrigation systems at Bassano, as well as on the big Lethbridge Northern system, and who wants his application filed for work as a leveller when the Kootenay Flats drainage operations are gone on with. All three letters will be taken care of by the secretary.

A letter from A. J. Kent of the Commercial Club, Bonners Ferry, produced an animated discussion on the north and south highway to connect with the trans-provincial highway across B.C. Mr. Kent informs that the road through Idaho is now within seven miles of the boundary and will be completed next year. He wants the local board to jack up the B.C. government so as to have the B.C. connecting link built in 1926 also, and suggests the ideal route as the abandoned K.V. right of way which in addition to giving the right grade also offers some scenic advantages traversing as it does the Kootenay River for part of the distance.

In the discussion that followed the majority of opinion was for at once advising the minister of public works that Creston preferred the K.V. route, assuring as it does that the tourist traffic from the south must pass through Creston, but the matter was disposed of by referring it to the transportation committee which is asked to make the necessary recommendations at the December meeting. In his letter Mr. Kent said that the tourist business at Bonners Ferry the last summer had enabled the merchants of that town to show a 100 per cent. gain in turnover as compared with months when there were no auto visitors.

There was also a lettter from the Canyon local of the United Farmers asking the assistance of the board in preventing the wanton destruction of road signs and danger signals, particularly in the Canyon area. A copy of the letter will be sent to the local provincial police with the request that the matter be given special attention.

The urgent need of irrigation was forcibly presented by Chairman Adlard of the committee on agriculture, and Robt. Stark, a second member of that committee. Due to the prolonged dry spell that has prevailed since the middle of June heavy rains will be needed before the freezeup or there is very grave danger of severe winter injury should the winter months be at all severe. Mr. Stark urged that it was time this yearly worry as to moisture supply was done away with and the only remedy was irrigation, whilst Mr. Adlard argues that the plentiful supply of water would almost double the output of every orchard taking the water.

Now that the board has successfully accomplished village incorporation and has electric light and reclamation well under way it was quite unanimously agreed that for the next few months the board's special effort might well be directed toward developing the irrigation situation and the president was authorized to augment the irrigation committee, which now consists of three members, by adding at least four more and that the enlarged committee have a report for the board's consideration at the December meeting.

8-Piece ORCHESTRA

DANCE

ALICE SIDING MUSICAL PARTY announce their openiug Dance at the

Grand Theatre Ballroom

WED., NOV. 18

DANCING 9 to 2

Music by SIX-PIECE ORCHESTRA.

GENTS $1. LADIES 50c.

SUPPER INCLUDED.

Canyon City

Misses Kathleen Clayton and Nissie McRobb, who have been at Willow Point on the apple packing staff for the past few weeks, arrived home on Sunday.

Miss Muriel Knott, who has charge of the Glenlilly school this term, was home for the Thanksgiving weekend vacation.

A. D. Pochin is now doing his travelling in a Chevrolet car, having last week purchased a rebuilt machine at the Lidgate garage at Creston.

Rev. J. Herdman of Creston will take the United Church service here on Sunday evening, at which the sacrament of the Lord's Supper will be dispensed.

Canyon observed Armistice in fitting style at the schoolhouse on Wednesday morning, the exercises including the usual two minutes silence at 11 o'clock, a hymn and the national anthem.

Mr. and Mrs. Cameron of Skookumchuk were motor visitors here over the weekend, guests of Mr. and Mrs. F. Knott. Miss Frances Knott, who is teaching at that point, accompanied them.

The biggest deer ever taken in these parts was brought in on Sunday by Gordon Vance and Paul Stinson who while operating near the Ridd place, brought down a 12 point buck that dressed 250 pounds. Jock McRobb is another local hunter to get a deer, securing his on Saturday in the Kitchener country.

Canyon witnessed the first football game in its history on the afternoon of Thanksgiving day when teams that have been developed by Principal Jenks at Lister school and a team turned out by Principal Kolthammer and Mr. Harback at Canyon, met on the Fleming field and played a tie game, Hilton Young refereeing. The return match will be at Lister, probably on Saturday afternoon.

The Great Northern Railway is undertaking a big publicity campaign to secure settlers for the diked lands that will be available for farming near Bonners Ferry next spring.

Had it not been for a few hundred of revenue secured in a popular girl voting contest in September the Courier says the Cranbrook fall fair would have gone behind at least $500.

Whist Parties Well Attended

Twenty tables of players and quite a gallery of spectators were out for the Conservative celebration of the West Kootenay victory which took the form of a whist and dance in the Parish Hall on Friday night. At cards the high scorers were Mrs. John Ryckman and Jas. Cherrington, and the low scores were made by Mrs. M. Young and Bert Boffey. After supper there were a few hours dancing, and the affair was much enjoyed throughout. A committee of the Women's Conservative Club was in charge of the affair.

About twenty tables of players were in evidence for the Armistice whist under Women's Institute auspices at the Parish Hall on Wednesday night at which the prize scores were made by Mrs. Bamford and Mrs. Jas. Wood, while the top scorers amongst the gentlemen were school inspector Manning and Mr. Woodburn of the Imperial Bank staff. The ladies served a very substantial lunch after which the floor was cleared and dancing was indulged in for about an hour with Mrs. Putnam and Miss Jeanne Hall presiding at the piano.

Erickson

Miss Trembath, principal of the Erickson school, was a visitor with Mrs. Moll at Kimberley for the Thanksgiving weekend.

Mr. and Mrs. Bundy got back on Sunday from their short visit at Spokane and are this week on a visit with Mr. and Mrs. Reid at Macleod, and Mr. and Mrs. C. Bundy at Cowley, Alberta.

Miss Cotterill is on a professional visit at Wynndel at present, where O. J. Wigen has been seriously ill with the flu.

Messrs. Gerald and Eric Craigie, E. A. Penson and C. Botterill are out on the work of putting in metallic circuit of the government telephone line between Creston and Yahk.

W. Long was a visitor at Cranbrook on Saturday making the trip by motor. Walter Long came back with him to spend the Thanksgiving vacation at his home here.

Word comes from Canyon that Paul Stinson has shared with Gordon Vance the honor of taking the biggest deer ever killed in that section. It is a buck that dressed almost 250 pounds and displayed 12 points. They got it on Sunday.

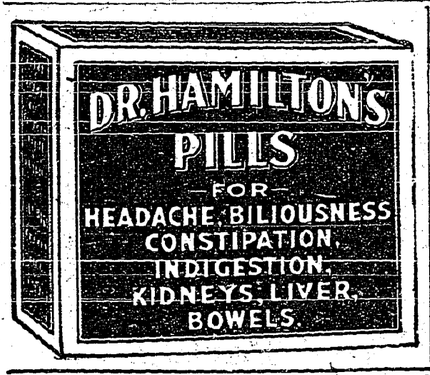
Alf. Boffey is home from Johnston's Landing and Kaslo, where he has been for at least a month in charge of apple packing operations at both points.

Miss Sewell of Sunshine Bay was a visitor here a couple of days last week, the guest of Miss Florence Wood.

Kitchener School Report

Highest Standing: Grade VII—Olga Nelson, Mildred Andeen, Laura Andeen. Grade VI—Beatrice Molander, Claude Simpson, George Wickholm. Grade V—Wesley Blair, Richard Molander, Edith Nelson. Grade IV—Vivian Langlois, Elsie Nelson, Willard Blair. Grade III—Mildred Hamilton, Margaret Hamilton, Grace Strong. Grade II—Celina Langlois, Hazel McGonegal, Frank Abar. Grade IIB—Mary Androsoff, Marie Arb, Charlie Bush. Grade I—Dorothy Hamilton, Eva Arb, Laura Androsoff.

Perfect attendance—Laura Andeen, Mildred Andeen, Nettie Androsoff, Mary Androsoff, Laura Androsoff, Ludwig Anderson, Clarence Anderson, Selmer Anderson, Myrtle Anderson, Frank Abar, Marie Arb, Eva Arb, Wessley Blair, Willard Blair, Dennis Bush, Charles Bush, Clifford Dorey, Mildred Hamilton, Margaret Hamilton, Dorothy Hamilton, Clara Hunt, Vivian Langlois, Vera McGonegal, Richard Molander, Beatrice Molander, Myrtle Strong, Marjorie Strong, Grace Strong, Claude Simpson, Henry Nelson.



Want Canadian Governor-General

Vancouver Native Sons of Canada —Favor Canadian for Post

The Vancouver Assembly, Native Sons of Canada, went on record as favoring the appointment of a Canadian to the office of governor-general. Sir James Aikens, Sir Robert Borden, Sir William Muloch, Hon. Rudolphe Lemieux, Sir Arthur Currie, Sir Lomer Gouin, and Rt. Hon. W. S. Fielding, were suggested as suitable for the position.

BAREE, SON OF KAZAN

by James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitagraph Picture, With Wolf, the War Dog, is an Adaptation of This Story

SYNOPSIS

Baree, the young wolf-dog, wandering in the wilderness, came upon a colony of beavers. He tried to make friends with Umisk, their leader, but the little animals ran away from him, leaving Baree lonely and unhappy. He was attracted by the mooing of the moose and the yap-yap-yap of a fox, but thrilled most at the wolf cry. It was the call of his own, summoning him to the chase, the hunt, the wild orgy of torn flesh and running blood.

CHAPTER VII.—Continued.

For a quarter of an hour Baree watched him while he knocked fish out of the pool. When at last he stopped, there were twenty or thirty fish among the stones, some of them dead and others still flopping. From where he lay flattened out between the two rocks, Baree could hear the crunching of flesh and bones as the bear devoured his dinner. It sounded good, and the fresh smell of fish filled him with a craving that had never been roused by crayfish or even partridge.

Twenty seconds after the last of Wakayoo had disappeared in a turn of the creek, Baree was under the broken balsam. He dragged out a fish that was still alive. He ate the whole of it, and it was delicious.

Baree now found that Wakayoo had solved the food problem for him, and this day he did not return to the beaver pond, nor the next. The big bear was incessantly fishing up and down the creek, and day after day Baree continued his feasts.

For a week life continued to be exceedingly pleasant. And then came the break—the change that was destined to mean as much for Baree as that other day, long ago, had meant for Kazan, his father, when he killed the man-brute in the edge of the wilderness.

This change came on the day when, in trotting around a great rock near the waterfall Baree found himself face to face with Pierrot, the hunter, and Nepeese, the star-eyed girl who had shot him in the edge of the clearing.

It was Nepeese whom he saw first. If it had been Pierrot he would have turned back quickly. But again the blood of his forebear was rousing strange tremblings within him. Was it like this that the first woman had looked to Kazan?

Baree stood still. Nepeese was not more than twenty feet from him. She sat on a rock, full in the early morning sun, and was brushing out her wonderful hair. Her lips parted. Her eyes shone in an instant like stars. One hand remained poised, weighted with the jet tresses. She recognized him. She saw the white star on his breast and the white tip on his ear, and under her breath she whispered "Uchi moosis!"—"The dog-pup!" It was the wild dog she had shot—and thought had died!

The evening before Pierrot and Nepeese had built a shelter of balsams behind the big rock, and on a small white plot of sand Pierrot was kneeling over a fire preparing breakfast while the Willow arranged her hair. He raised his head to speak to her, and saw Baree. In that instant the spell was broken. Baree saw the man-beast as he rose to his feet. Like a shot he was gone.

"Nepeese was not more than twenty feet from him."

Scarcely swifter was he than Nepeese.

"Depechez vous, mon pere!" she cried. "It is the dog-pup! Quick!"

In the floating cloud of her hair she sped after Baree like the wind. Pierrot followed, and in going he caught up his rifle. It was difficult for him to catch up with the Willow. She was like a wild spirit, her little moccasined feet scarcely touching the sand as she ran up the long bar. It was wonderful to see the lithe swiftness of her, and that wonderful hair streaming out in the sun. Even now, in this moment's excitement, it made Pierrot think of McTaggart, the Hudson's Bay Company factor over at Lac Bain, and what he had said yesterday. Half the night Pierrot had lain awake, gritting his teeth at the thought of it; and this morning, before Baree ran upon them, he had looked at Nepeese more closely than ever before in his life. She was beautiful. She was lovelier even than Wyola, her princess mother, who was dead.

Floating back to him there came an excited cry.

"Hurry, Nootawe! He had turned into the blind canyon. He cannot escape us now."

She was panting when he came up to her. The French blood in her glowed a vivid crimson in her cheeks and lips. Her white teeth gleamed like salt.

"In there!" And she pointed.

They went in.

Ahead of them Baree was running for his life. He sensed instinctively the fact that these wonderful two-legged beings he had looked upon were all-powerful. And they were after him! He could hear them. Nepeese was following almost as swiftly as he could run. Suddenly he turned into a cleft between two great rocks. Twenty feet in, his way was barred, and he ran back. When he darted out, straight up the canyon, Nepeese was not a dozen yards behind him, and he saw Pierrot almost at her side. The Willow gave a cry.

"Mana—mana—there he is!"

She caught her breath, and darted into a copse of young balsams where Baree had disappeared. Like a great entangling web her loose hair impeded her in the brush, and with an encouraging cry to Pierrot she stopped to gather it over her shoulder as he ran past her. She lost only a moment or two, and was after him. Fifty yards ahead of her Pierrot gave a warning shout. Baree had turned. Almost in the same breath he was tearing over his back-trail, directly toward the Willow. He did not see her in time to stop or swerve aside, and Nepeese flung herself down in his path. For an instant or two they were together. Baree felt the smother of her hair, and the clutch of her hands. Then he squirmed away and darted again toward the blind end of the canyon.

Nepeese sprang to her feet. She was panting—and laughing. Pierrot came back wildly, and the Willow pointed beyond him.

"I had him—and he didn't bite!" she said, breathing swiftly. She still pointed to the end of the canyon, and she said again: "I had him—and he didn't bite me, Nootawe!"

That was the wonder of it. She had been reckless—and Baree had not bitten her! It was then, with her eyes shining at Pierrot, and the smile fading slowly from her lips, that she spoke softly the ward "Baree," which in her tongue meant "the wild dog"—a little brother of the wolf.

In and out among the rocks Baree sought swiftly for a way of escape. In a moment more he had come to the "box," or cup of the canyon. This was a break in the wall, fifty or sixty feet wide, which opened into a natural prison about an acre in extent. It was a beautiful spot. On all sides but that leading into the coulee it was shut in by walls of rock. At the far end a waterfall broke down in a series of rippling cascades. The grass was thick underfoot, and strewn with flowers. In this trap Pierrot had got more than one fine haunch of venison. From it there was no escape, except in the face of his rifle. He called to Nepeese as he saw Baree entering it, and together they climbed the slope.

Baree had almost reached the edge of the little prison-meadow when suddenly he stopped himself so quickly that he fell back on his haunches, and his heart jumped up into his throat!

Full in his path stood Wakayoo, the huge black bear!

Baree darted to one side and ran for the open meadow. Wakayoo did not stir as Baree sped past him—no more than if he had been a bird or rabbit. Then came another breath of air, heavy with the scent of man. This, at last, put life into him. He turned and began lumbering after Baree into the meadow trap. Baree, looking back, saw him coming—and thought it was pursuitt. Nepeese and Pierrot came over the slope, and at the same instant they saw both Wakayoo and Baree.

Where they entered into the grassy dip under the rock walls, Baree turned sharply to the right. Here was a great boulder, one end of it tilted up off the earth. It looked like a splendid hiding place, and Baree crawled under it.

But Wakayoo kept straight ahead into the meadow.

(To be continued)

Cuticura Baths Comfort Baby's Skin

The absolute purity and delicate medication of Cuticura Soap make it ideal for baby's tender skin. Used daily, with touches of Ointment to little skin troubles, it keeps the skin smooth, clear and healthy. Cuticura Talcum is soothing and cooling, ideal for baby after a bath.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd. Montreal" Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

A Canadian Explorer

Major Burwash Starts On a Long Patrol of Northern Points in Canada

When Amundsen made his spectacular flight to the North Pole—or to some point in its vicinity—the whole world was interested. When the McMillan expedition, thoroughly outfitted and equipped in every way for its work of Arctic exploration set out, every item of news about the trip is featured in the press of the world.

Less is heard about the trip a Canadian is making into the far north. The magazine published by the interior department at Ottawa gives some particulars about the little advertised adventure on which Major L. T. Burwash, of the government service, has embarked. Major Burwash has started on a long patrol from the mouth of the Mackenzie River to Hudson's Bay. He goes alone on his two legs, expects to be two years on the journey, and to live with the Eskimos he encounters on the way. He will study the country, estimate the population, make astronomical and meteorological observations, and take notes on bird, animal and floral life. He expects at the end of two years to come out either at Repulse Bay or Chesterfield Inlet, as convenience at the end of the trip may determine.

There is no great publicity about such an adventure as that of Major Burwash. Nor is it unusual for men in the Canadian service to make these long and arduous northern journeys. Men of the department of the interior are forever doing it, as are men of the Mounted Police. There is scarcely an annual report of the Mounted Police issued that does not contain a brief but graphic report of a trip covering long months and thousands of miles on foot, by canoe, dog-sled and snowshoes. These trips are often made by men of action, not writers, or some wonderful books of travel would appear.—Regina Leader.

London Zoo Loses Old Exhibit

White Bear Has Been Entertaining Feature For 22 Years

Sam, the great white bear which has been one of the most entertaining features of the London zoo for 22 years, was recently sentenced to die a military death and was formally shot.

For six months he steadfastly refused to take a bath, although, when in his prime, scrupulous attention to his appearance was one of his many pleasing characteristics.

The reason for Sam's loss of interest in life is domestic. For 19 of his 24 years he was the henpecked husband of a wife even more famous than himself. She died and efforts to find Sam a new wife failed.

Lizzie, three years old and decidedly flapper in her ways, was introduced, but Sam resisted all her charms, treating her with rude coolness until one day Lizzie angered him beyond endurance and he ducked her in the pool and sat on her head. That ended Lizzie's career as Sam's wife, and nearly ended Lizzie's life.

Fine Record of Imperial Airways

Britain's air transportation company, The Imperial Airways, which came into existence May, 1924, recently completed 1,000,000 miles of flying. During the past 12 months aeroplanes carrying $10,000,000 worth of bullion, 15,000 passengers and 1,000 tons of freight have flown across the channel at 100 miles an hour.

If angels fear to tread where fools rush in, they might use their wings.

English Oaks Becoming Rare

Not Good For Use Until Tree Is 400 Years Old

England's famed oaks are disappearing. Many oaks were cut down during the war, as the wood was urgently needed. Said a botanist, "The wood of an oak is not really any good until the tree is 400 years old, and people today cannot afford to grow oaks for posterity. Originally large parts of England were covered with oaks. The tree is almost a rarity now in some places. It is said that an oak takes 400 years to grow to full size, is mature for another 400 years, and takes 400 years more to decay. In some cases I should say this is true."

KEEP BABY WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhœa, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours' illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

Respect For Law

If Chicago has thirteen times as many murders as all Canada she cannot plead the "new country" excuse. The fact is that English law and the spirit of English law-abidingness work wonderfully in the newest countries on earth.—Brooklyn Eagle.

For Quick Hot Water

Fill an SMP Enameled Tea Kettle. Set it on the stove. No Kettle will boil water quicker. That means convenience, time saved, too. All SMP Enameled utensils are very fast coming to the boil and in their job of cooking. Not only quicker to cook with, but easier, more quickly cleaned after. The best any way you look at it. Think this over.

HUNTERS!

Take a bottle of Minard's to the woods with you. Splendid for sprains, cuts, bruises.

MINARD'S "KING OF PAIN" LINIMENT

COULD NOT SLEEP NIGHTS

Pains and Headaches Relieved by Taking Lydia E. Pinkham's Vegetable Compound

Dublin, Ontario.—"I was weak and irregular, with pains and headaches, and could not sleep nights. I learned about Lydia E. Pinkham's Vegetable Compound by reading the letters in the newspapers and tried it because I wanted to get better. I have got good results from it as I feel a lot stronger and am not troubled with such bad headaches as I used to be and am more regular. I am gaining in weight all the time and I tell my friends what kind of medicine I am taking. You may use my letter as a help to others."—Mrs. James Racho, Box 12, Dublin, Ontario.

Halifax Nurse Recommends

Halifax, N. S.—"I am a maternity nurse and have recommended Lydia E. Pinkham's Vegetable Compound to many women who were childless, also to women who need a good tonic. I am English and my husband is American, and he told me of Lydia E. Pinkham while in England. I would appreciate a copy or two of your little books on women's ailments. I have one which I keep to lend. I will willingly answer letters from any woman asking about the Vegetable Compound."—Mrs. S. M. Coleman, 24 Uniacke Street, Halifax, Nova Scotia.

WORLD HAPPENINGS BRIEFLY TOLD

Canadian export trade showed an advance and import trade a reduction during the twelve months ended July.

The first London bus has arrived in Berlin. It is introduced as an experiment and, should it prove satisfactory, 200 of them will be put in operation.

Assurance has been received from the C.N.R. engineers' department at Winnipeg that track laying on the Turtleford southeast branch will commence early in the fall.

When a policeman at Orange, N.J., ordered their Fiery Cross extinguished, 500 Ku Klux Klansmen continued their initiation ceremonies in total darkness.

San Francisco now boasts of a seven-story building for training firemen. It has a special room where the firemen brave smoke and test out protective devices.

T. W. Young, who has been in the Dominion Government's grain inspection department at Winnipeg for the last 21 years, has been appointed grain inspector at Calgary.

The students at the government colleges at Peking decided to end their strike called in sympathy with the anti-foreign movement. They will return to their studies when the fall terms begin.

Three human skeletons, believed to be of the Neolothic age, have been discovered by archaeologists at Solutre, France. The skeletons are believed to be from six to eight thousand years old.

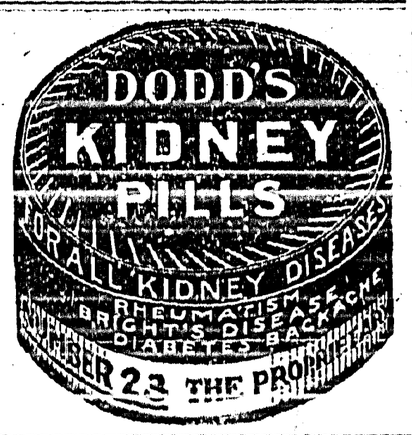
Fire has destroyed most of the medical department of Kyushu University at Fukuoka, Japan. Among the buildings destroyed was the hospital. The loss is estimated at one million yen.

Norfolk, Neb., has learned that Dr. Richard J. Tanner, a resident for years, is in reality the "Diamond Dick" of Wild West fame, one-time associate of Buffalo Bill, "Wild Bill" Hickok and "Pawnee Bill" Major Gordon Lilly, noted characters of a past era.

One million dollars annually might be saved by the United States in its bill for printing money if the people would use fewer one dollar bills and more twos. Avoidance of the twos is blamed on a superstition that they are unlucky. The bureau of efficiency has issued a statement about it.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

To facilitate the movement of traffic, and as a safety measure, the city of Washington has raised the speed limit for automobiles from 18 to 22 miles an hour.



Bells Shipped From London to New York

Large Carillon For Church Weighs Nearly Ten Tons

A large carillon of bells was recently shipped from London for Park Avenue Baptist Church, New York, weighing 9¼ tons. Such an unusual shipment necessitated special transport arrangements. Permission had to be obtained from the authorities to convey the biggest bell through the streets, as owing to its size it contravened traffic regulations. The bells were taken from the foundry by lorry to the Thames, where they were transferred to lighters and towed to the ship's side in King George V. dock. There a big floating crane was run alongside and the bells hoisted into one of the Albania's holds, where they were secured on a heavy wooden staging. Scores of bundles of rags were then packed tightly round them. The structural gear for these bells weighs another 10 tons.

ECLIPSE FASHIONS

Exclusive Patterns by Cecil Bayne

Charming Pantie Dress

Every child needs many frocks, and what mother will not want to make one, or even several, with this charming frock as a model. The design is so simple and the dainty printed and colored fabrics in the shops so fascinating, that it is real fun to see what delightful frocks can be evolved with little effort. The front of the printed frock above is cut at the armhole, and the skirt joined to the upper part by several rows of shirring, forming a yoke effect. The collar is one piece and fits comfortably to the neck. The sleeves are long and gathered to a narrow band, and adorable little pockets trim the front. The panties are cut in two pieces only, with elastic run through a casing at the top. Sizes 2, 4 and 6 years. Size 4 years requires 2⅞ yards of 32-inch, or 2⅝ yards of 36-inch material. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

Ancients Practiced Enamelling

Enamelling was practiced by the ancient Egyptians, Chinese, and other nations. It was known in England in the time of the Saxons. At Oxford is an enamelled jewel which belonged to King Alfred, and which, as appears by the inscription, was made by his order in his reign, about the year 887.

An instrument of five strings which has the combined range of violin and cello has been invented by Prof. Vladmir Karapetoff, of Cornell University.

Cheered For Canada

Empire Press Meeting In New Zealand Applauds Speech of Canadian

There was a remarkable scene at a banquet given by Premier J. G. Coates at Wellington, New Zealand, in honor of the visiting press delegates, who were on their way to Australia to attend the imperial press conference, in connection with a speech made by J. H. Woods, of the Calgary Herald, president of the Canadian Press.

Mr. Woods spoke for Canada in response to the welcomnig words of Premier Coates, following Lord Burnham, president of the imperial press conference. Mr. Woods eloquently appealed for tolerance and active sympathy among the dominions.

When he sat down the gathering rose and cheered Canada and the New Zealanders scrambled to shake hands with Mr. Woods. They expressed admiration and good wishes for Canada.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Eclectric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Many Scientists In Leningrad

A census undertaken by the Leningrad Academy of Science shows there are 4,265 acknowledged scientists in Leningrad, while in Moscow there are only 2,740. The majority of the scientists are mathematicians and natural science specialists. Agriculturists form only four per cent. of the above figures. The percentage of women among the Moscow and Leningrad scientists is 14 per cent. and 22 per cent., respectively.

A Power of its Own.—Dr. Thomas' Eclectric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many many years it has been prized as the leading liniment for man and beast.

Catch Monster Lake Trout

While trolling at Cold Lake recently two anglers caught a 53-pound lake trout. For two hours and one-half, the men fought the fish in an endeavor to land it. Finally, the trollers were successful in pulling it in, but had to call in the services of an axe to put an end to the struggles of the fish.

Rebuilding Schools In B.C.

Doukhobors Completing Six to Replace Those They Burned

Six new Doukhobor schools, erected by the Christian Community of Universal Brotherhood, are being rushed to completion to replace those burned in the last couple of years, bringing the number of Doukhobor schools to ten.

The community is exceeding its promise made in June to build four schools, and education officials are much pleased at the spirit shown.

The only burned school not being replaced this season is the one at Spencer, whose pupils will be accommodated in the Carson and Columbia schools.

The new schools are at Outlook in the Grand Forks district and at Glads, Krestova and Pass Creek, and two at Brilliant in the Nelson district.

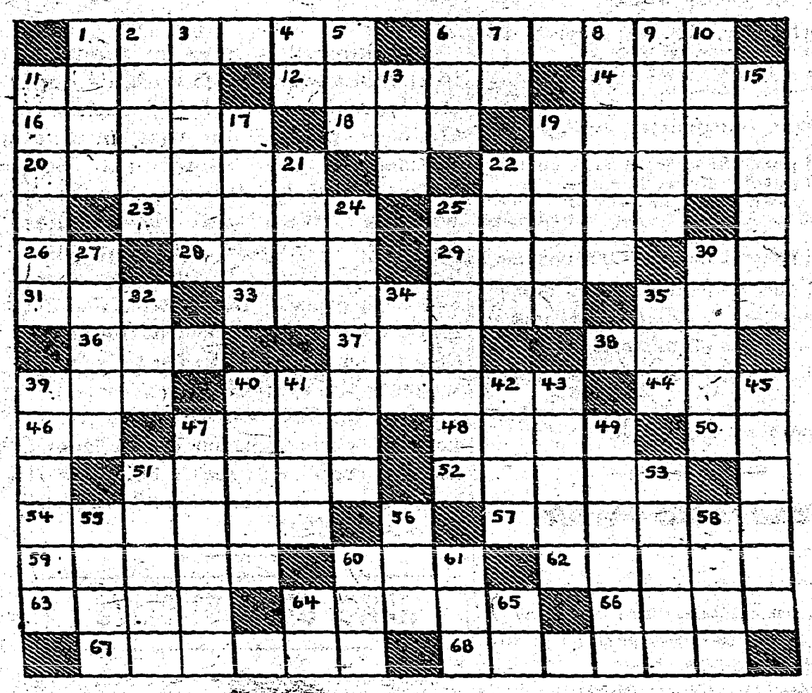
OUR CROSSWORD PUZZLE



Horizontal

1—Has an unlawful desire.
6—Encompass.
11—A game.
12—Made of oak.
14—Merit.
16—Discharges.
18—Indistinct.
19—Backbone.
20—Frenzied.
22—Portions.
23—Maladies.
25—Asterisks.
26—Behold.
28—Heroic.
29—Thaw.
30—That man.
31—Sol.
33—Black vulcanite.
35—Insane.
36—Toll.
37—Sunken wheel track.
38—Torn piece of cloth.
39—Beseech.
40—Flags.
44—Wound secretion.
46—Either.
47—Preserve.
48—Incline.
50—And (Latin).
51—Fathered.
52—Steeple.
54—Waver.
57—Famish.
59—Egresses.
60—Also.
62—Employed.
63—Take Out.
64—Winged animals.
66—Male offspring.
67—Supplies with resolution.
68—Barren waste.

Vertical

1—State of unconsciousness.
2—Greenish-yellow color.
3—Dedicated by a vow.
4—Toward.
5—Sorrowful.
6—Jewel.
7—Within.
8—Go.
9—Dens.
10—Sea-eagle.
11—Dangers.
13—Relations.
15—Built nests.
17—Game-bird.
19—Oily rock.

Death of Butterfat Champion

Melba 15th of Darbalra, the Australian Shorthorn, which held the world's record for butterfat production, with 1,611 pounds in 365 days, is dead as the result of an accident. She was close to breaking her own record at the time of her death, and may, indeed, have done so, as the final report has not yet been received. In 330 days of her last lactation she gave 30,285 pounds milk.

Dutch authorities in North Sumatra are urging natives to plant rubber along the fields.

The skin of a horse when properly cured and tanned may be cut into 100 baseballs.

Minard's Liniment used by physicians

Supplied Prince With Meat

During the stay of the Prince of Wales at the Rand Club in Johannesburg, S.A., an Aberdeen-Angus steer was presented by the Aberdeen-Angus Cattle Society of South Africa for the supply of meat for the royal table. This animal was specially selected from a consignment of Aberdeen-Angus cattle bred and fed by Captain Harold Phillips.

There are now twenty women holding seats in the national parliament of Finland.

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2.50 a year in advance. $3.00 to U.S. points.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, NOV. 13

Yields $86 per Acre

In connection with the revenue producing possibilities of the Kootenay Flats acres were they reclaimed, one has heard a lot of offhand figuring of so many tons of hay at so much a ton, and so many bushels of grain at so much per bushel, but to A. B. Ashby, the Great Northern Railway agent at Bonners Ferry, must be given credit for doing the necessary bookkeeping to demonstrate the actual money goteing qualities of the overflowed lands, and his accounting shows that in 1925 the 18½ acres operated by him gave him a return of $86 per acre. Here is the way he summarizes the year's work:

Timothy hay, first and second cutting, on 14½ acres, 65 tons.
Wheat, 1.9 acres, 93 bushels.
Potatoes, one-quarter acre, 2500 pounds.
Cabbage, one quarter acre, 10,000 pounds.
Small patch head lettuce, 30 crates.
Small patch celery, 8 crates.
Beans, two rows, 50 pounds.
Sweet corn, two rows, 20 dozen ears.
Small patch turnips, 4,000 pounds.

From the 18½ acres Mr. Ashby estimates that the produce is worth $1600 or approximately $86 per acre. The crops enumerated above were grown without irrigation or special care of any kind.

Domestic Pack

The possibility of all being of one accord in one place, even politically, has just been demonstrated for the second time within two years at Thrums where, on the 29th, every voter put his X opposite the name of the Conservative candidate, repeating the history of June, 1924, when every ballot cast at that point was marked in favor of Col. Lister. Notwithstanding its name the population at Thrums must be largely Irish or of Hibernian descent to be so unanimously agin the government.

—

In his card of thanks to the electors of East Kootenay for the support given him on the 29th, Dr. Rutledge, the Conservative candidate, expresses great satisfaction over the fact that he got a majority of the votes in his home town of Cranbrook thus demonstrating that the Bible even errs when it points out that a prophet is of no account in his own country.

—

It is to be hoped the dancing fraternity will be out in generous numbers on the 18th, when the Alice Siding Musical Party put on their opening dance at the Grand Theatre ballroom. The programme the Party presented the second afternoon of the fall fair stamps them as an organization Creston can find considerable use for and as their dance is the first opportunity that presents itself to show tangible appreciation it will be most unfortunate if the turnout is not large on Wednesday evening.

—

Somebody who can inven a week with more Fridays and Saturdays in it will do local entertainment promoters a good turn, as just now there is altogether too great a shortage of weekends to meet the demand. Recently one of the church organizations had to book a likely Saturday in December at least two months ahead of time—and got itself very much disliked due to the fact that a sister organization of the same sect had previously claimed the Saturday preceding, forcing a rival denomination to put on its year-end affair two weeks sooner than planned and altogether too early to produce the best financial results—and they all need the money.

—

The W. S. McAlpine pen of Barred Rocks, which figured in the just-completed 52 week egg laying competition at the experimental farm at Agassiz, has given Creston some good publicity, and the showing made by the birds is most creditable. Anyone who combines operating a ten acre fruit ranch along with poultry and can turn out pullets that average 210 eggs for the year has no occasion to be ashamed of coming second in a competition open to all British Columbia. What some local orchardists are curious to know is why Mr. McAlpine stays with the fruit The anti-dumping clause should not worry him at any rate.

—

Speaking at a growers meeting in the Okanagan a few nights ago the president of the Associated Growers pointed out that in that district the crop would run between 200 and 300 boxes per acre, whereas in Washington the average would be between 500 and 600 boxes. Not only in quantity does the U.S. grower excel, but also in quality as a 1925 report of the U.S. department of agriculture tells that whereas the crop of this year is 15 million bushels less than in 1924, yet the portion known as the "commercial crop" will reach 30,134,000 barrels, as compared with 23,587,000 barrels in 1924.

NEWS OF KOOTENAYS

Cranbrook farmers have already shipped eighteen cars of potatoes, three of which went to Minneapolis.

Kimberley becomes more metropolitan every day. The latest in that town in a Caledonian Society.

A Women's Missionary Society has just been organized in connection with the United Church at Kaslo.

According to the Free Press Fernie miners have only been off work twelve days in the past ten months.

The Free Press tells its readers that the recent federal contest was the quietest election Fernie has seen in twenty years.

Cranbrook has more than a few cases of typhoid fever, and folks in that town are blaming it on the none too pure milk supply.

Cranbrook will put on a fall fair in 1926 and C.P.R. Supt. Flett has been chosen president of the agricultural association for next year.

Prosperity has returned sufficiently to Fernie to encourage the citizens to have a four day Chautauqua, which opens on November 20th.

Kimberley Oddfellows are starting work at once on the erection of a $10,000 lodge building, the ground floor, of which will be rented as a store building.

Autoing is not supreme at Penticton. A riding club has been organized in that town. Rides are scheduled for every Saturday afternoon for the present.

The B.C. Spruce Company sawmill at Lumberton has shut down for the season, after completing a cut of 35 million feet. The plant ran night and day for four months.

At Grand Forks the apple packing season will close at the middle of November. Despite the December blizzard the crop at that point has been larger than was at first predicted.

At Nakusp meetings are to be held regularly throughout the winter with a view to bringing the men of the United and Anglican churches together. The town probably hopes to get along with one church in the near future.

Lister

Principal Jenks of the public school, was a holiday visitor with Nelson friends, leaving on Saturday.

Mrs. Jory left on Friday for Greenwood, where she will make a visit with old friends, having resided there prior to coming to Lister.

According to legislative reports Col. Lister, M.P.P., has been named a member of the house standing committees on mining and agriculture.

Mrs. Knott and Mrs. Jacks and young son were at Creston for the holiday weekend, and were guests of Mr. and Mrs. Bert Hare.

Rev. J. Herdman is announced to take the United Church service here on Sunday afternoon.

John Finlay left at the first of the week on a visit to Kimberley, where he will spend a few days with old friends.

The Lister school football team journeyed to Canyon on Thanksgiving day for a game with the Canyon school team, the score being a tie—neither team scoring. Canyon will be at Lister on Saturday afternoon, 14th, for the return clash.

Alice Siding

Geese are reported unusually numerous on Duck Lake, northwest of here, and local hunters are bringing in a honker or two every trip to that spot.

Miss Jennie Marshall, who is employed at Sirdar, was home for the weekend with her parents.

Br Stewart is at Creston this week, where he is in charge of exterior improvements to the heating plant of the United Church, necessitated by the erection of the new addition and basement.

From all accounts hallowe'en was the quietest ever witnessed in these parts. One misplaced gate is all the devilment that can be got track of.

Mrs. Trevelyan is away at present on a visit with friends at Kimberley, where Tom is working this fall.

R. Alderson got back on Friday from Utah, where he is at present employed, and will be making a short visit at the ranch here.

The Alice Siding Musical Party will make its debut as a dance orchestra at the Grand Theatre ballroom on Wednesday night. They are booked for a church at home at the Parish Hall on the 13th.

Clifford Seaver arrived from Three Pines, Idaho, at the end of the week bringing with him Master Dan Seaver, who will be spending the winter with his grandparents, Mr. and Mrs. R. Stewart.

Reed & Mather took delivery of a tractor and ploughing equipment at the first of the week, John Whitman bringing it home under its own power on Monday.

Alice Siding is due to have its first ever Sunday school concert and Chrisnmas tree at a date around December 25th, and the children are already rehearsing for the affair practices to be held each Saturday afternoon from now on at 2 o'clock.

Letter Stationery
---the Printed Sort

FREQUENTLY EVERY GROWER has correspondence to attend to where he wishes he had business (printed) stationery to use.

His lack of it is probably due to the fact that he thinks it expensive.

We can supply you with Printed Letter Paper at a price just a little higher than you pay for pads at the store.

We can supply them padded with a plain duplicate sheet interleaved in case you wish to make a copy of your letters.

Printed Envelopes are comparatively as inexpensive, and their use assures you of the letter reaching the party or being returned to you.

No trouble at all to show you samples, and quote you such moderate prices.

FATHER Says "I just can't get that boy of mine to settle down."
MOTHER Says "When I was 17 a girl had to be home by nine o'clock."
JOHNNY Says "I'll bet Pa was no angel when he was a boy."
MARY Says "Of course Ma means well, but times have changed."

And they are all right!

You'll learn the truth about modern family life when you see—

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

Lidgate Bros.

Local and Personal

Miss Carrie, a former teacher on the local high school staff, now at Fernie, and Miss Vipond of Nelson, were Creston visitors over the weekend, guests of Mrs. R Stevens.

Although the weather is ideal for poultry production is considerably below par and the price of fresh eggs has gone up to 50 cents. Butter is up a nickel and now fetches 40 cents.

Christ Church Ladies' Guild are having weekly sewing meetings every Tuesday afternoon in connection with the usual year end bazaar which is booked for Saturday, December 5th.

The Presbyterian Ladies' Aid had the usual good turnout at their thanksgiving chicken dinner in the Parish Hall on Thursday night, at which the cash intake was in the neighborhood of $65.

The winter evenings are due to pass pleasantly at the Lockhead home at the ferry where a radio has just been installed and is picking up broadcasts as far east as Chicago, as well as all the Pacific coast stations.

"Bud" Leitch, who has been in charge of the mechanical department at the Bevan garage for the past nine months, left on Wednesday for Kelowna, where he has secured a similar position.

A rolled oats famine that has prevailed locally was relieved at the first of the week. The shortage is due to the popularity of the three minute oatmeal which the manufacturers have not been able to turn out fast enough to meet the demand.

The Whirlwind Club at Erickson are entertaining again at a whist and dance at the Long packing shed on Friday evening, November 20th, to which all are invited. The admission is 50 cents, and a three piece orchestra will supply the dance music.

The new basement of the United Church will be used for the first time on Thursday, November 26th, on which date the church Ladies' Aid are having their usual Thanksgiving dinner from 6 to 8 o'clock, with an admission of 50 and 25 cents.

A meeting of the Hustlers Tuxis Square was held on Friday night last, under the leadership of H. Gobbett, who took charge in the absence of the mentor. The speaker of the evening was D. T. Scrimgeour. The square meets again on Friday night, 13th.

Invitation are out for the congregational at home for November of Christ Church, which is being held tonight. The church executive is asking for a full turnout as it wishes to ascertain the congregation's views in connection with the resignation of Rev. H. Varley.

The prolonged dry spell that has obtained since the middle of June was broken on Tuesday morning since when all points in the Valley have been favored with quite a steady rain, accounting for at least an inch of moisture up till noon Thursday, and still coming.

The dance of the season is scheduled for Wednesday night, 18th, when the Alice Siding Musical Party, an orchestra of eight pieces will give their initial dance in the Grand Theatre ballroom, at the popular admission prices of $1 to gentlemen, and 50 cents to ladies, these prices to include supper.

"The Mollusc," an English comedy, was presented at the Grand on Thursday night by a travelling company of quite talented artists, who also introduced some vaudeville turns between acts. As the show was put on on less than one day's advertising the turnout of 18 persons was more or less natural.

John Ward, who pleaded guilty of being one of the two men who held up the Creston branch of the Imperial Bank about a month ago, and on whom about $3500 of the stolen money was found, was on Tuesday sentenced to eight years imprisonment with twenty lashes. Judge Forin of Nelson passed sentence.

Having successfully accomplished village incorporation, and with electric light and reclamation of 10,000 acres of Kootenay Flats well in hand, Creston board of trade is now to take up the irrigation question in the same businesslike fashion, and a preliminary announcement in this connection may be looked for very shortly.

Creston Reclamation Syndicate is called to meet this (Thursday) evening when permanent organization will be effected. Word from Bonners Ferry indicates that the organization of still more drainage districts indicates that by the fall of 1926 almost 25,000 acres of Kootenay Flats lands in Idaho will have been dyked and under cultivation.

Customs officer Davis nabbed a couple of Copeland, Idaho, citizens on Tuesday, who were attempting to get across the line without reporting, and on a search of their new Star car being made it was found to contain nineteen bottles of liquor. The car was immediately confiscated and brought into Creston for storage until the matter is cleared up in the courts.

Sunday's Vancouver Province carried a reproduction of a group photo taken in connection with the conference of the United Church held in that city the past two weeks. It shows a party of 80 ministers of the denomination who served in the great war, three of whom have held the pastorate of the Creston church, Revs. M. W. Lees, G. H. Hamilton and J. Herdman.

The rainy weather that prevailed on Wednesday kept down the turnout at the Armistice Day exercises at the monument at 11 o'clock. The ceremony was brief, consisting of the usual two minutes silence, a five minute talk appropriate for the occasion by Rev. J. Herdman, with the national anthem to close proceedings. A small company of returned men paraded to the monument in charge of Sergt. Major S. M. Watson, and a number of wreaths were placed on the granite pillar. A service of remembrance was conducted by Rev. H. Varley at Christ Church, at 10.30 the same morning.

The Cow Behind The Wagon

Doleful things are said and written these days about the present generation of youths and maidens, and sharp contrasts to their disadvantage are drawn with their parents and grandparents. We hear and read much to the effect that the young men and women of this age are going to the dogs; that they lack the morals, the stamina, the strength of character of previous generations. Much the same kind of thing was said of mankind in general prior to the Great War—that the race had lost its virility, its power of endurance, its courage and willingness to sacrifice and suffer. But the war demonstrated the falsity of such statements.

None the less it is true that we have lost some of the things that made our fathers and mothers the salt of the earth. In recent years we have heard a good deal about hard times, but contrasted with what the early pioneers of this country had to endure, these years were times of plenty and ease.

The world progresses and it is only right and what should be that succeeding generations should not be called upon to undergo the trials and struggles of bygone days. But our modern civilization, with all its manifold comforts and conveniences, has caused the young men and women of today to expect too much for what they are willing to give; to assume the attitude that the world owes them a living and that they are going to collect it in the easiest and quickest possible way.

Our attention was recently directed to a little local item appearing in a United States paper about a couple that was taking a deferred honeymoon, a honeymoon that took place twenty-five years after marriage. In that item it was stated that this couple, which has achieved a substantial success in the quarter century since marriage, had taken the original wedding trip in a lumber wagon with a cow behind the wagon, a gift of the bride's parents to the happy and hopeful couple.

This little reminder of a quarter century ago struck a popular chord in many memories, for within ten days after the article appeared not less than ten people dropped in at the newspaper office to tell the editor that they, too, had led a cow home behind the wagon after the wedding ceremony, and that their only wedding journey was from the home of the bride to the new home where the couple was to start housekeeping. Most of those who came in were people to whom the years have given good things, many of them being able to buy cows today by the herd, if they wanted the critters. All of them gave credit for their success to their willingness to start with little and work hard for advancement.

The cow behind the wagon, says this newspaper, is symbolic of a generation of real workers, men and women who faced the world with little but with earnest ambition, willing to give for what they wanted. Armed with youth, determination, health and strength, the world was theirs for the taking.

The pioneers of fifty, even twenty-five years ago, first required a home. But the ambition of a large percentage of young people today is to own an automobile, whether they have a home or not. They will mortgage the future for present gratification. Forgetful, or perhaps ignorant, that "it is not the original cost but the upkeep," they blithely sign a bunch of promises to pay, fill up the tank with gas and are off. Off to where?

Despite all the talk of hard times, there are more advantages for the ordinary man and woman today than there have ever been before, but the men and women who wish to attain success must be prepared to pay the same price as our fathers and mothers and those before them paid—they must give before they get.

Word, hard work, and lots of it is one of the fine things life has to offer. There is nothing quite so satisfying as to begin at the bottom and climb, to start with little and accumulate for yourself. The boy or girl who does not have to strive for themselves, but who have everything found for them by their parents, are not the really fortunate ones, as we are sometimes led to believe . The young couple starting out in life where their parents left off miss the joy of achievement which their fathers and mothers experienced, and they never know that close and sympathetic comradeship which is realized by those who plan and work together shoulder to shoulder.

Peanuts and Almonds

Mr. Jack Prout, an enterprising young farmer near Portage la Prairie, has made a venture this year by attempting to grow peanuts and almonds. So far he has succeeded, and expects to have a satisfactory crop. Although he sowed his initial crop last year with good results, he embarked on a larger scale this season, and hopes it may prove a remunerative investment.

Marriage is the end of all man's troubles—one end or the other.

Invents New Method of Weaving

Cutting of cotton imports into Germany by half may result from a new method of weaving cloth with hemp, invented by the German textile expert, Dr. Gminder. The hemp, it is expected, will replace in part the cotton formerly used in the cloth. There are about 5,000,000 acres of moorland in Germany adapted to the raising of hemp.

Sometimes people don't mind their own business because they haven't any—mind.

Children Cry for

Fletcher's CASTORIA

MOTHER:— Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

Flying Into Matrimony

Swedish Couple Had Ceremony Performed On Board Aeroplane

A young Swedish couple were recently married while flying through the air on board an aeroplane. When the machine, carrying a full complement of passengers, had risen to a height of 1,500 ft., an altar was erected in the cabin, before which a Swedish clergyman performed the marriage ceremony, with a lawyer and his wife as witnesses. A wedding breakfast was then served, and the health of the couple drunk in champagne by all the passengers. The clergyman and the lawyer left the machine at Hamburg, but the couple continued their honeymoon trip to Amsterdam.

Home Not Complete Without Nerviline

When your stomach is badly upset, when you are belching gas and suffering from nausea, the quickest relief will come from 20 drops of Nerviline. Take it in sweetened water and you get an immediate result. Nerviline has been used for nearly half a century and is considered a necessity in most houses, because of its usefulness in preventing many small ills that constantly arise. Sold everywhere in 35 cent bottles.

Buenos Aires Wakes Up

The crossword puzzle craze, unknown to the general public a few weeks ago, has struck Buenos Aires and is spreading rapidly into the interior.

TONIC TREATMENT FOR INDIGESTION

The Surest Way to Relieve Stomach Trouble is Through Dr. Williams' Pink Pills

When the stomach is feeble and food lies in it undigested, the poisonous gases distend the walls of the stomach and cause serious interference with the other organs, especially with the action of the heart and lungs. These poisonous gases have other ill effects. They are absorbed by the blood and so weaken and corrupt it as to cause aches in remote parts of the body and the formation of unhealthy tissue everywhere. Experience shows that these troubles vanish just as soon as the stomach is made strong enough to digest the food. In other words, it needs a tonic that will enable it to do the work of changing the food into nourishment. The tonic used ought to be one that will agree with the most delicate stomach and this is exactly what Dr. Williams' Pink Pills do.

Here is a bit of convincing proof given by Mrs. Chas. Ladner, Ellerslie, P.E.I., who says:—"For some years I was a sufferer from stomach trouble. Everything I ate caused distress, sour stomach and belching. I could not eat meat or potatoes, and I grew weak and very nervous. No medicine seemed to help me until I was persuaded to take Dr. Williams' Pink Pills, and these simply worked wonders. I took the pills faithfully for a couple of months, by which time every symptom of the trouble had disappeared, and there has not since been the slightest symptom of stomach trouble. No wonder I praise Dr. Williams' Pink Pills."

You can get these Pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A wealthy Scotsman, 75 years old, is travelling 7,000 miles from Honolulu to Scotland to pick a few sprigs of heather and eat a dish of haggis.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Trying New Experiment

Boys In London Orphanage Educated As Individuals

In this day of specialization it is interesting to read of a novel experiment in education which is being tried, so far with signal success, by one of the orphanages of London. Each boy is treated as an individual, and a separate timetable is drawn up for his benefit. Class work is in this way abolished altogether. A boy is encouraged to specialize in the particular branch for which he is fitted, and the confident hope is expressed that in this way those whom the institution sends out into the world will be found specially equipped for the vocation in life they are to follow.

Mrs. Dumb (who has just received her C. O. D. package from the butcher shop).—"Here, take these codfish right back. I ordered herring."

Ask for Minard's and take no other

Canadian Crop Important

Will Be Main Source of Export Supply For Next Few Months

"Canada's crop will be the main source of export supply until the crops of the Southern Hemisphere come on the market in February, 1926," says a statement issued recently by the Dominion department of agriculture. This prediction is based upon a general survey, in which North American, European, African and Asiatic production receives consideration. Estimates of wheat yields have now been issued by 22 countries, which last year produced 70 per cent. of the world's wheat, excluding Russia. Their total production is now estimated at 2,174,000,000 bushels, as compared with 2,106,000,000 last year and 2,184,000000, the average of the five years 1919-1923.

"Europe will likely have about 200,000,000 bushels of wheat more than last year, and with a good rye yield iss import requirements will be reduced considerably. On the other hand, the United States crop is 195,000,000 bushels below last year, and the Indian crop is 40,000,000 bushels, or over ten per cent. less. Very little wheat will be exported from either the United States or India. Russia and the Balkan States will probably be exporters, but Canada's crop will be the main reliance," says the statement.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

After Many Years

French and Belgian Troops Turn Ruhr Over to Germans

The French and Belgian troops have turned over the Ruhr to the Germans after four years occupation, undertaken to compel Germany to pay reparations. There were no disturbances, no demonstrations, no public expression of either regret or pleasure. There were, however, many emotional partings between young French soldiers and their German sweethearts.

Waiting impatiently outside the city, 1,500 security police were assembled to take over the general policing.

The allied army marched out with bands playing.

Distinguishing Marks Necessary

There are so many people named Smith in England, that a symbol, known as the monomark, has been patented to distinguish them. There are a total of 530,000 Smiths in business. Of these 204,000 are J. Smith, 41,000 John Smith, 30,000 John W. Smith and 5,000 John William Smith.

Keep Minard's Liniment in the house

British Coal Exports Increase

A statement of the coal division of the department of commerce on the British coal situation, sent by radio from London, points out that, while British coal exports fell off in the first seven months of the year, the export of 319,000 tons to Canada in the seven-month period represented a big increase. The British coal industry is said to be slowly resuming operations after the labor crisis.

The needle of a Chinese compass points to the south.

Rapid Fire Gun Disappears

Failed to Arrive at French Station and Cannot Be Found

Mystery surrounds the disappearance of a newly invented rapid fire gun built on lines of the Lewis gun, from which great things had been hoped for. The weapon disappeared from the railroad depot at Brive la Gaillarde, France, while in transit.

The gun, which is the invention of the workmen of a Tulle arms factory, was being shipped to a proving ground for trial before a parliamentary commission prior to its adoption by the army. It failed to arrive and an inquiry was started. It was traced to Brive la Gaillarde, where the box in which it had been packed was found to have been opened. Parts of the gun were scattered about the depot. It is not known whether the parts were abstracted to be copied in the interest of some foreign power or whether the breaking open of the box was due to carelessness by railway employees.

Danger From Yellow Races

Is Economic Rather Than Military Says Dean Inge

Dean Inge, who recently visited Canada, thinks the danger to the white races will come, not from the black nor from the red races, but from the yellow and the brown—the Japanese, the Chinese, and the Indians. He believes that for a long time to come the danger will not be of a military but of an economic character. The question was how the high-standard European and American was to cope with the cheap labor, perhaps directed by white capital, of the Asiatic races.

Nights of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

New Liquid Motor Fuel

A new liquid motor fuel called carbonan, invented by Makhanin, a Russian, is said to have given ten to fifteen per cent. higher efficiency than benzine when tested by the French navy.

Build Giant Airplanes To Carry Passengers Across Atlantic Is Dream Of Aircraft Expert

The scheme to build giant aeroplanes capable of crossing the Atlantic, with an estimated passenger list of one hundred and fifty voyagers, besides the weight of engines, baggage, fuel and crew, is the grand dream of Mr. Jose Navarro, whose experience as aircraft expert entitles his proposal to respectful attention. That it comes within the compass of up-to-date aerial adventure is shown by the remarkable flight of Drouhin and Landry, the French aviators who recently stayed aloft more than forty-five hours and covered a distance of four thousand kilometres, enough to foreshadow the possibility of traversing by plane the big pond in the regular way of traffic. Such an achievement, says the Minneapolis Journal, would be simply an extension of what is being done overland alike in Europe and the United States. Improvements of late years made in the speed, equipment and safety devices of aerial ships indicate that the day is not far distant when all the merits belonging to floating airships will be absorbed by flying ships. The latter, as sketched out and furnished with nine Napier Lion engines of four hundred and fifty horsepower each, should be able to navigate the route, and Mr. Navarro is confident that they will.

An estimated wing-spread of one hundred and eighty-five feet from tip to tip presents the vision of an awesome condor nosing its way through cloudland, so that the problem of landing and providing suitable landing places is probably greater than getting into the air or proper steerage facing all weathers of these high altitudes. But each year brings forth new inventions making for assured control, and more devices for safety resort in case of any partial breakdown of the machinery. The giant planes are designed to carry collapsible boats and lifebelts in case they should descend upon the water; and it is noticeable that as aeroplane construction devolops, better means are forthcoming to make an up-line start and smoother finish of the voyage.

Aicraft structure and pilotage is still in its infancy. Considering that it is less than twenty years ago since Santos Dumont made a distance record of two hundred and twenty metres in twenty-five seconds, it will be seen that an amazing advance has been already made, and had the French aviators referred to flown in a bee-line instead of in circles they would have crossed the Atlantic without pause. Much still remains to be done by way of reducing the wing-spread consistent with the maintenance and increase of power, and to this purpose aerial experts are addressing themselves with considerable success. Professor Low thinks that there is urgent need that some method of silencing, or at least subduing, the noise made by aerial engines and propellers should be discovered. In time this may also be attained. Yet already the passengers who embark in a modern plane can be sure of comfortable and even luxurious quarters aboard the wheeling hotel, and all signs predict that ere many years have passed it will be possible to book from London to New York, or by any other route established for a thirty-five hour flight, with no greater risks than are encountered in any other mode of travel. Just now the chief concern that Mr. Navarro has in mind is the financing of the new venture.

A Plucky Canadian

Patrick Mongeon, a Canadian, joked and smoked for three-quarters of an hour while attempts were made to relieve his foot, which was caught between two cars on the Hudson-Manhattan tube. The foot had to be amputated. No anaesthetic was used, and Mongeon remained cheerful during the operation.

Output Of Silver

The output of silver from Cobalt during July amounted to about 400,000 ounces, according to preliminary estimates. This had a value of less than $300,000, or at the rate of about $3,500,000 a year. Nipissing was the heaviest producer, followed in turn by O'Brien, Mining Corporation, McKinley Darragh, La Rose and Menago.

Oats For Hay

Experiments Show That They Vary In Value

In his report for 1924, Dr. Shutt, Dominion chemist, gives some interesting details of an experiment with different varieties of oats when cut for hay at the Cap Rouge experimental station, Quebec.

The experiment was established to compare some of the more important varieties of oats for hay value over a number of years. The crops were cut when the hay was in the late milk stage and the weights taken of the cured hay.

Banner yielded 5,180 pounds dry matter in 1924, Victory, 4,455 pounds and Gold Rain, 2,799.

The analysis shows that Banner again takes first place for high protein and low fibre content with Victory next in order fairly close behind.

The crops were all cut at the same stage, and it is assumed that the results are strictly comparable in the matter of digestibility and other factors.

The report gives the experiment in detail and is to be had free from the publications branch, Ottawa.

Of Interest To Swine Breeders

Report of Organization Meeting Held At Saskatoon

The department of agriculture at Ottawa has performed good service by publishing in a 60-page pamphlet a full report of the proceedings at the organization meeting of the western swine committee at Saskatoon, Sask., on April 3 and 4 of the present year. This meeting, it will be remembered, was presided over by the Dominion livestock commissioner and attended by the chief live stock officials and swine breeders of the provinces. Discussions took place on a variety of subjects of value and interest to swine breeders, including western swine marketing problems, the basis of estimating the ten per cent. premium for selects, educational problems, filling, shrinking and bruising and problems relating to breeding and feeding. It will be acknowledged that all these topics are of importance both to the small and large swine breeder and, therefore, a study of the publication, which can be had free from the publications branch of the department in Ottawa, is to be commended.

Cod Liver Oil For Chicks

Experiment Shows Beneficial Effects Of Feeding Oil to Young Chicks

An experiment conducted at the Indian Head, Sask., Dominion experimental farm, relating to the feeding of cod liver oil to chicks shows that the oil is beneficial. Two lots of chicks, one of 48 and one of 49, were used in the experiment, at the end of which 46 of the oil division were alive and 44 of the no oil division. Also the chicks given the cod liver oil made greater growth and better development than the others. Again none of the chicks given the oil showed leg weakness while ten per cent. of the others did. The oil was given as two per cent. of the wet mash. At the conclusion of the experiment proper the chicks in lot 2 were given the oil and in a very few days, the superintendent in his annual report states, all signs of leg weakness has disappeared and the chicks had improved in vigor and general thriftiness.

Should Fill the Bill

The circus proprietor was anxious to engage a dwarf, and an agent had assured him that he could put him in touch with the very man. "You're sure he's a real midget?" asked the showman. "Real midget, my boy!" exclaimed the agent. "Why, he's so short that every time his feet ache, he thinks he's got neuralgia!"

Wheat Market in the Orient

A prophecy that the Orient would become in the very near future a really large importer of Canadian wheat was made recently by Hon. Dr. J. H. King, minister of public works. In predicting increased Orient trade in grain, Dr. King pointed out that imports of wheat from Canada for 1923-24 increased by 400 per cent.

Experimenting With New Cereal

Adlay Is First Grain To Be Discovered For Centuries

Experts are interested in experiments that are being made in the Philippines with a new cereal called adlay. At one time or another all cereals, such as wheat, rice and maize, were wild grasses, and many years of patient research have been necessary to develop their edible utility. There must be numerous grains of potential value growing throughout the world, but until the discovery of adlay no addition has been made to our existing supplies for centuries. Adlay has been known in India and Asia for some time. The natives have made use of it in its half-wild state, but no effort was made towards its cultivation and development. There came a day, however, when somebody discovered that the grain contains as much protein as wheat, and at least three times as much fat. Experiments have proved that adlay is more productive, more feeding and more palatable than the majority of existing cereals.

Basis Of All Prosperity

Says Agriculture the Most Solid Asset of Canada

"Agriculture is the basis of all prosperity and no matter how serious is the crisis that affects farmers today, and in spite of the fact that your city is passing through a period of industrial prosperity never before seen, I have no hesitation in saying that there is more misery among your labor population than among any group of farmers in this province," said Hon. J. E. Caron, minister of agriculture in the Quebec Government, at the luncheon of the Three Rivers exhibition.

The minister of agriculture was emphatic in his statement that agriculture was the most solid asset of Canada and he denounced in energetic terms those who are discouraging the agricultural class.

Too Much For One

A farmer found his cart too heavy for the donkey to pull up a steep hill. A passing tourist came to the rescue, and helped to drag the vehicle. The farmer, full of gratitude, turned to the obliging pedestrian and, thanking him, added: "I never could have done it with one ass."

The degree of his scorn for those lower down reveals how recently he climbed up.

The Great Importance Of a Pure Water Supply For The Rural Districts Should Be Stressed

It is a well-known fact that with the introduction of public water supplies in cities and towns which had previously been dependent on domestic wells, the death rate from typhoid fever, the most serious of water-borne diseases, has decreased to a remarkable extent.

In our country districts, however, where the scattered population makes the establishment of a public water supply system impossible, the farmer is forced to depend upon his own domestic source, which is, in most cases, the shallow well. That such a well can be a source of positive danger from typhoid, dysentery, diarrhoea and other disorders has been amply proven, but still many farmers do not realize fully the importance of a pure unpolluted water supply, or the danger to their families and their stock lurking in contaminated water.

The location of the farm well is frequently faulty and denotes a lack of knowledge of the danger to health from water when there is any chance of drainage or leaking from such sources of pollution as barnyards, cesspools, privy, manured fields, sink drains, etc. Not only should the well be placed at a reasonable distance from such sources of filth (say 40-50 yards), but also, if possible, on higher ground. The more porous the ground, the greater should be the distance from any contaminating source.

Even when the well is removed from any source of pollution, the ground water should be made to filter through at least 12 to 15 feet of soil before entering the well. Soil tends to remove germs and impurities from surface wasnings. The water, however, should be made to really filter through the soil by insuring that the sides of the well, for a depth of 12 to 15 feet, are tight and impervious to water. The top, naturally, should be so constructed that no contamination can possibly enter.

Water may be seriously polluted without showing this by its taste or appearance. A bright, sparkling water is by no means a guarantee of a pure supply. When, however, water from a well becomes cloudy or turbid after a heavy rain, there is evidently some defect, for this condition indicates that surface washings are entering without proper filtration.

The divisions of bacteriology and chemistry at the central experimental farm will analyze water samples submitted by farmers living within a reasonable distance. Application for instructions as to taking the sample should first be made.

Winter Feeding For Egg Laying

Testing Various Feeds and Their Effect Upon Egg Production

In the report of the Dominion poultry husbandman for 1924 half a dozen pages or more are devoted to particulars of a series of experiments conducted during the winter of 1923-24 to test various feeds and their effect upon egg production and hatchability. Such minute details are given that they are far better studied than summarized. Indeed a mere summary could in no way do justice to the mass of facts supplied, not only as to results but as to cost. With the exception of the special feeds under experiment all pens were handled and fed alike. The scratch grain was a commercial mixture, the mash being the standard home-made mash consisting of equal parts by weight of bran, shorts, cornmeal, ground oats and beef meal. This mash was fed to all pens except those in which protein feeds were under test. Grit, shell and charcoal were kept before the birds in hoppers at all times. Unless otherwise indicated they were also given both milk and water to drink.

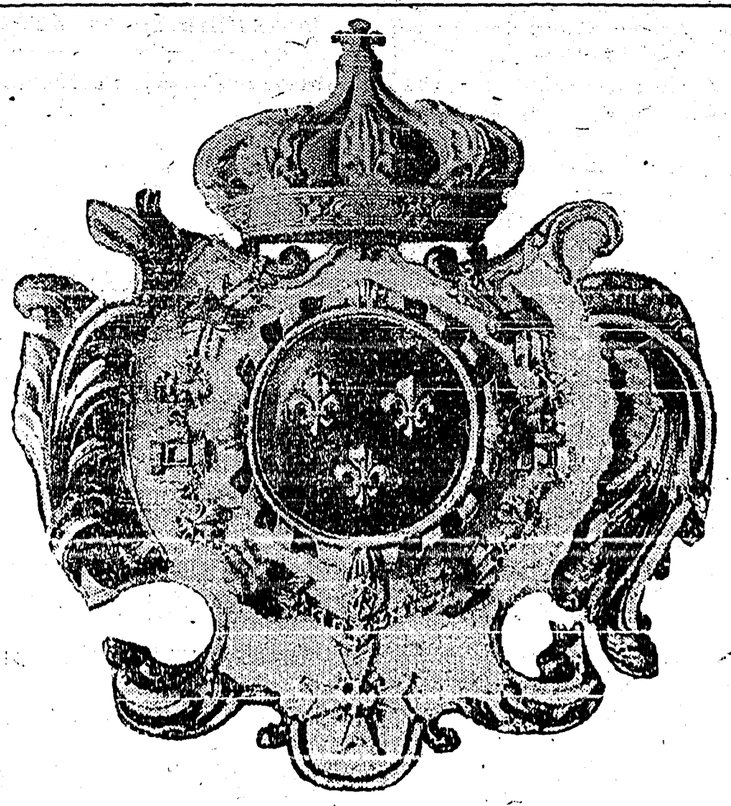
The various experiments of which full and clear tables of results are given were as follows: (1) Beef scrap vs. tankage vs. liver tankage vs. raw liver; (2) animal protein experiment with hatching results; (3) Mangels vs. sprouted oats vs. clover leaves vs. cabbage vs. Epsom salts vs. no green feed. Tabulated summaries are also given in the report, which can be had without cost on addressing the publications branch, Ottawa, of two years' experiments with green leaves and substitutes, of a green feed experiment with hatching results and of a clover, clover meal, alfalfa meal and tomato pulp experiment with hatching results.

They're Needed At Home

Perhaps it would be quite in order to invite the 125 U. S. evangelists who are now visiting Great Britain where there are less murders than in one American city with the idea of telling the British people how to live, to visit their own country and straighten out this business of lax law enforcement. —Toronto Saturday Night.

Ancient Escutcheon Back In Quebec

Hon. P. C. Larkin Brings Relic Returned By People Of Hastings, England



The arrival of the White Star-Dominion liner, Megantic, which docked at Quebec recently, marked an important event in the history of that city, inasmuch as she carried among her passengers the Hon. P. C. Larkin, Canadian high commissioner in London, who brought back to this country the ancient escutcheon of King Louis XV. of France. No public ceremony was held, this having been postponed until September 10, to enable many prominent citizens, now away from their home, to attend.

The historic shield was removed from one of the gates of Quebec in 1759, after the capture of that city by Wolfe, and was taken to England by General Murray. Since that time, this relic of the French regime has been in the possession of the city of Hastings, England, and some time ago negotiations were started with a view to its restoration which resulted in its return. The escutcheon measures four feet high and three feet wide, and is beautifully carved and painted. Mr. Larkin has had constructed a mahogany case for the shield and during its journey across the Atlantic it has been carefully stored in a room specially provided on the Megantic.

Record Oat Yield

Ottawa Experimental Farm Harvested 95½ Bushels Per Acre

The largest yield of oats ever secured from the fields of the central experimental farm at Ottawa, was harvested this year, according to a statement issued by farm officials.

A one-acre field of banner oats yielded 95½ bushels per acre. These oats were grown on a three-year rotation of corn, oats, and clover. For the corn crop, which preceded the oats, a dressing of farm manure was applied. No manure or fertilizers of any kind were applied for the oats.

Another acre of banner oats in a four-year rotation of corn, oats, clover and timothy yielded 91 bushels per acre. As in the former case, no manure or fertilizers were applied for the oat crop, but the corn crop which preceded was given a good dressing of farm manure.

Covers Require Nailing

"Much of the butter being exported from Canada, particularly through shipments from inland points, is being exported without the covers of the boxes being nailed," says the latest Dairy News Letter issued by the dairy and cold storage branch. "It is highly desirable that covers be nailed, putting one box nail through each corner of the cover. If the covers are nailed in this manner, fewer will come off and be broken in handling."

Women are naturally foolish because they were made to match the men.
