Ministry of Education

One Hundred and Ninth Annual Report
July 1, 1979, to June 30, 1980

Hon. Brian R. D. Smith
Minister of Education

the Honourable Henry Bell-Irving
utenant-Governor for
Province of British Columbia

y it please Your Honour:

beg respectfully to present the One Hundred and Ninth Annual
ort of the Ministry of Education, covering the period from July 1,
9, to June 30, 1980.

Brian R. D. Smith
Minister of Education

MINISTER'S INTRODUCTION

Upon appointment as Minister of Education in November, 1979, it vas realized that a priority need in the months ahead was to become horoughly familiar with education in British Columbia and the many lifficult issues to be resolved in the new decade of the 1980s. Much ime had to be devoted to cabinet and ministerial responsibilities, ut a determination was made to get out of Victoria whenever ossible in order to see B.C. education in action.

It was a pleasure, not just a duty, to make informal, often nannounced visits to schools and post-secondary institutions in arious parts of the province through the winter and spring. ducation does not enjoy the automatic reverence of former times, nd so it was a happy revelation to find so many good things appening in our classrooms. Excellent programs and enthusiastic nd dedicated teachers were to be found everywhere in the rovince, and informal discussions offered insight into the concerns f teachers and administrators alike.

During this time, plans progressed for a series of professional and ublic forums, along with further school visits, to be conducted in nore than thirty centres throughout the province during the fall of 980. These forums were designed to allow anyone interested to nake written or oral presentations directly to the Minister of ducation on any issue concerning them.

In the meantime, pending completion of the tour report and the eviewing of the issues by senior ministry officials, no major changes vould be made to the *School Act,* nor would revision of the *dministrative Handbook for Elementary and Secondary Schools* be inalized. It was realized that these pivotal documents, however out f date they might be without major revisions in up to twenty years, hould not be overhauled until the minister and senior officials were amiliar with the wishes of both trustees and teachers, the needs of arents and students, and the aspirations of the public as a whole.

The financing of education remained a major concern of overnments at both the provincial and local levels. The provincial overnment contributed two-thirds of the total cost of education nder my ministry in 1980. This represented a slight increase over 975. Growth in homeowner grants, removal of community college perating expenses from local taxpayers and major increases in eacher pension contributions have all helped to maintain this high evel of government support.

The government has also recognized the increased burden which efugees and disabled students have placed upon certain school istricts. Procedures have been established which provide 100 per ent funding by the provincial government for English - language aining for refugees and for educational programs for the severely

disabled in certain provincially designated programs operated by t school boards.

In the post-secondary area, operating grants to British Columbia' 20 colleges and provincial institutes was increased by 15.7 per cent ($29 million) from the previous year, to a total of more than $212 million. The colleges and institutes also received $26.8 million for capital programs, an increase of $7 million. It was gratifying that th government, to a very substantial degree, was able to support the funding recommendations of the three post-secondary councils.

Under the *College and Institute Act* the government in early 197 assumed 100 per cent funding of colleges as well as provincial institutes, removing from local taxpayers their share of this responsibility. The level of funding now established will ensure tha our colleges and institutes are able to provide quality educational and training opportunities. The government considers these to be high priorities.

In 1979/80, forty-three of British Columbia's seventy-five school districts participated in a pilot enrichment program for the gifted. The *programme-cadre de francaise* — a core curriculum in which French is the language of instruction — became available in September in the eleven school districts where parents of ten or more elementary students had requested it. In September also, mo than 350 British Columbians became the first students of the innovative Open Learning Institute.

In May an invitation to speak to the annual conference of the B. School Trustees Association presented an opportunity to express th belief that every school district should have the right to a locally employed superintendent, and to announce that this would be accomplished as soon as possible. It was also announced that a procedure would be established to raise the stipend paid to school trustees, since an annual maximum of $2,000 is not adequate compensation for the contribution trustees make to our education system.

We have now entered a new decade, with new challenges and n opportunities. Public and professional forums, along with continuin visits to schools and colleges, will help ensure that the Ministry of Education is in tune with the issues of the eighties and in a position to provide the leadership that will extend the progress we can see being made every day in the classrooms of British Columbia.

DECEASED

M.J. Rhodes, Secretary

SCHOOLS DEPARTMENT

The Schools Department of the Ministry of Education is responsible ır the overall direction and administration of the public school stem under the terms of the *School Act*. The department works osely with the province's seventy-five locally-elected boards of hool trustees, to which the act and its regulations assign many ecific functions and responsibilities.

The Schools Department in 1979/80 comprised four divisions — ıblic Instruction, Administrative Services, Legislative Services and lucational Personnel — and was directed by a policy and planning ımmittee under the chairmanship of the assistant deputy minister schools.

The major activities of the department during the year included rther development in learning assessment and accreditation, and ovision of further guidance and resource materials to teachers in e evaluation of learning outcomes, all keyed to the B.C. rriculum.

A significant change in administrative practice during the year was rapid acceleration toward local appointment of superintendents of hools. School boards were informed that, by the beginning of the xt academic year, every school district would have the option of pointing its own superintendent.

These and other highlights of the year are detailed in the reports the divisions.

IVISION OF PUBLIC INSTRUCTION

Some 511,671 pupils were enrolled in B.C. public schools in 79/80. Public Instruction is the division of the Ministry of Education ectly responsible for development, implementation and assess- ent of curricula, from kindergarten to grade 12. Curriculum velopment, Learning Assessment, Program Implementation, Spe- l Education, Career Programs, French Programs and the Examina- ns Branch continued during the year as the major operations of division.

asic School Programs

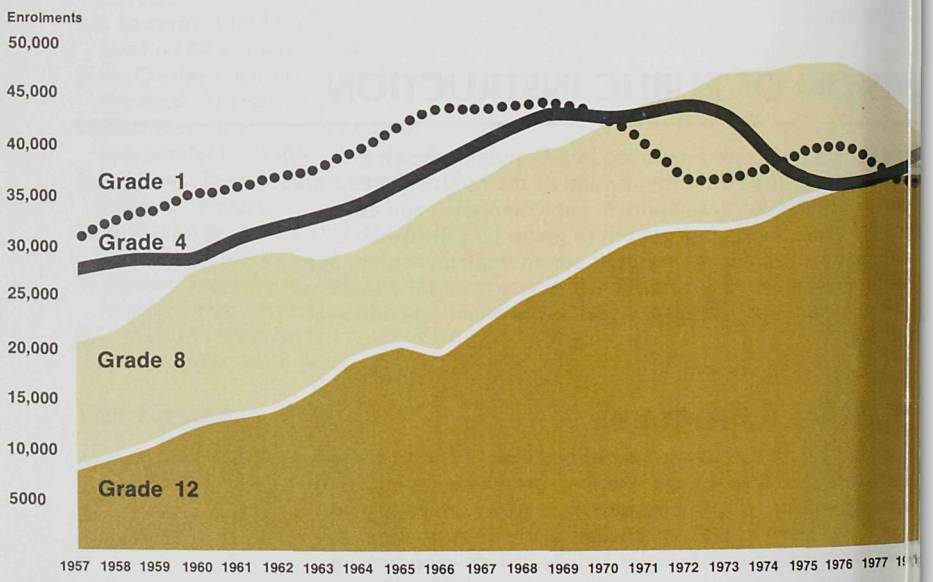
During the 1979/80 academic year efforts were made to consoli- e, with a limited amount of expansion, programming initiated ing the previous year. The development of system-wide plans bled the ministry to project activities that will be undertaken over next ten years. One such major activity, the development of a ial studies curriculum to cover grades 1 through 11, will occupy Curriculum Development Branch for several years, and will have

a significant impact on activities in both Learning Assessment anc Program Implementation.

In addition, major curriculum developments were undertaken the French language subject area and new elective courses were developed for pupils from kindergarten to grade 11. In the area c career preparation, a program was developed for students in grai 11 and 12 to provide experience activities and courses that articu e very closely with colleges and vocational schools.

Computer technology was introduced into the school system through seminars and the announcement of a ministry-sponsore pilot project to provide computers to twelve districts in 1980/81. the same time, teachers and other interested persons were encouraged to develop computer software programs for specific areas of the curriculum. The results of the computer pilot projec influence future provision of computers in schools, and the use computers in instruction.

Trends in Public School Grade Enrolments 1957-1979



Source: B.C. Ministry of Education

Major changes and advances in the work of the division have ›sulted in the following:

Increased interest by students in writing scholarship examinations, with the value of the scholarships raised from $500 to $1,000.

An increased number of French-language programs, which will make instruction in French possible for all students.

Continuation of support for British Columbia book publishers through a program providing library books to schools.

An increase in the number of B.C.-normed achievement tests in response to a continuing high level of demand

Continuation of major assessment programs to identify strengths and weaknesses in school programming and to directly influence curriculum development activities.

Successful completion of the second phase in the development of a new administrative handbook. In 1980/81 a revised handbook will be issued to the schools.

Commencement of formal discussions with other ministries to examine areas of common concern. These areas included health education, physical fitness and delivery of health services in the school system.

urriculum Development

During the 1979/80 academic year, the staff of the Curriculum ›velopment Branch devoted considerable time to the development policies and procedures for branch operation.

.ong-range curriculum plans were completed and events in the rriculum development process were identified. Both have been tlined in a document entitled *Curriculum Planning, 1979.*

A comprehensive system to evaluate all textbooks and other rning resources was introduced. All resources which support ›vincial courses will be reviewed using this procedure. The branch blished a series of "product information" booklets which provide ormation about prescribed and authorized learning resources. ese will assist school districts and teachers in selecting and using h materials.

A procedure for evaluating materials submitted by other ministries d outside agencies was also introduced. This development was de possible by the co-operation of other B.C. government istries developing educational materials.

he branch used a variety of means to encourage wider ticipation in the curriculum process. Reaction panels, consisting of icators, trustees and members of the public, became an integral t of the curriculum development process. Advisory committees e established in certain subject areas and a committee of erintendents was appointed to react to proposals and to provide dance. A number of activities were initiated or continued in order mprove communication between the branch and other parts of ministry, the school system and publishers (the first of what may ome annual meetings with publishers was convened). Staff nbers participated in a large number of professional days and

New curriculum materials available for the first time in September 1981.

onferences. In addition to the documents already mentioned, the ranch produced *Curriculum Update, 1979,* which summarized the atus of all revision and review activities, and *Curriculum Summaries, 980,* a publication which gave specific information about curriculum anges planned for implementation in September, 1980.

A number of revised programs and new materials were introduced r the 1979/80 academic year. Prescribed resources in reading and elling were introduced to support part of the revised elementary nguage arts program. Additional materials will be added over the xt few years. A new curriculum guide, *Secondary English, 8-12 979),* outlines a province-wide scope and sequence for instruction English at the secondary school level. New materials introduced r English 11 include texts which focus on mastering skills and the e of language. Learning resources for use with the revised drama 9 d 10 courses were also made available. September, 1979, also saw e introduction of revised secondary school programs in business ucation and home economics, together with new textbooks.

In addition to these changes for the 1979/80 academic year, work ntinued or was begun in many other areas. There were continuing ojects in business education, secondary English and elementary nguage arts. Other curriculum areas in which committees were tive were: secondary physical education, elementary and junior condary science, secondary physics, agriculture, secondary music, iting 11, French as a second language at the secondary level, condary art and theatre.

The area of social studies revision was a major continuing project. ring the year a study of the scope and sequence of instruction was mpleted for ministry review. Work continued toward completion a curriculum guide for social studies K-11, identification of rning resources, and planning for pilot testing of learning ources.

Two areas of particular interest were English as a second language d special education. The branch prepared an English-as-a-second-guage kit for Vietnamese students and continued work on the velopment of a resource book for teachers of all students learning glish as a second language.

Plans were laid for developing an overall curriculum strategy for cial education. Some pilot testing of materials for use with gifted dents was also carried out in 1979/80.

arning Assessment

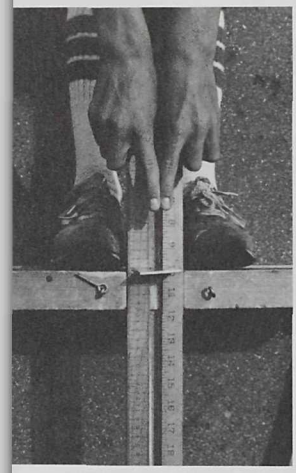
he 1979/80 academic year was a key one for learning assessment hat it marked the end of the first cycle of province-wide essments of major curriculum areas and the beginning of the ond cycle. The first cycle ended with publication of the physical cation assessment reports. The second cycle began simultaneously with the second assessment of reading, which examined nges in provincial performance since the first assessment of ding was conducted in 1976/77. The 1980 reading assessment was unique in being the first provincial assessment which included

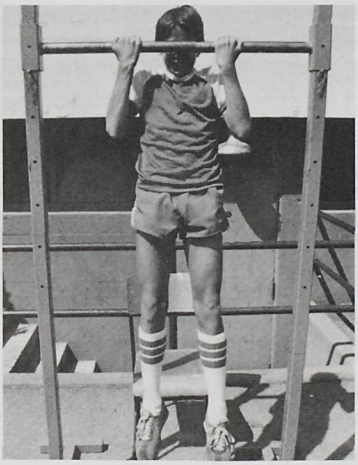
students from both public and funded independent schools, a pattern to be followed in future assessments. Both provincial and individual district reports of the 1980 reading assessment were scheduled to be issued in the fall of 1980. The second assessment o mathematics was launched and is scheduled for completion in 1981

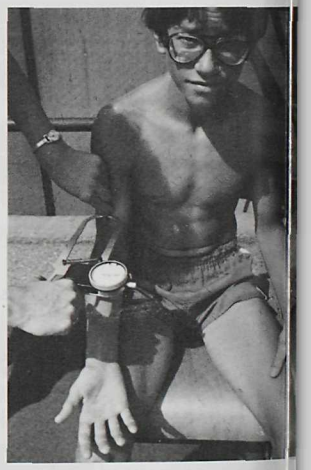
The 1979 report of the physical education assessment revealed many instances of excellent performance among some B.C. student particularly when compared to other Canadian, American and Briti students. However, the overall motor ability and fitness results of tl majority of elementary students and of secondary-level females wa judged to be weak. The report pointed to a disturbingly high incidence of overweight students of both sexes and revealed that t performance of elementary children and of secondary females in cardiovascular endurance tests was weak. Secondary-level boys' performance was judged satisfactory on the majority of measures taken.

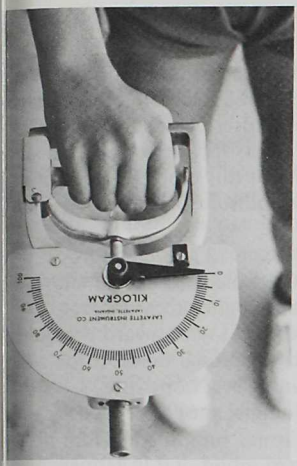
The report recommended that current physical education programs be broadened to provide an increased emphasis on physical fitness, motor ability and knowledge and understanding of physical education. It also urged that particular emphasis be placed on bod fat reduction, cardiovascular endurance, development of motor ski and knowledge basic to active health.

The results and recommendations of this assessment were used b the curriculum committee in revising the secondary physical educa tion curriculum guide which is to be implemented in B.C. schools 1980/81. A further constructive step was taken by the branch throu preparation of packages of physical education assessment materials for classroom use. The materials, distributed to all schools, enable teachers to assess performance of their own students and to plan remedial action where required.









'he past year was also noteworthy for the establishment of closed kages between the processes of learning assessment, curriculum velopment and curriculum implementation. The linkage with riculum development was evident in the launching of the dergarten needs assessment. It was designed specifically to vide curriculum developers with information on which to base ir decision when the scheduled review of this program area gins in 1981. The kindergarten needs assessment is surveying icators and parents of young children across the province. The ort will document the current program status, and expressed nions concerning directions which should be taken by kinder-ten programs and the policies governing them in the 1980s. Reports of this assessment will be distributed early in 1981. Similarly, reading assessment surveyed teachers and administrators to her information which can assist the Program Implementation nch in planning to meet identified needs of districts and schools he implementation of recently introduced reading programs.

Work begun by the Learning Assessment Branch in 1978 to provide sroom teachers with a bank of curriculum-based achievement s was extended in 1979/80. A total of twenty-one tests in hematics, science and English have been made available; more presently under development. An achievement test credit lcation plan was put into place to ensure free access to these tests all teachers and districts.

ne past year also saw completion of a two-year assessment policy elopment program designed to ensure that all districts have in e assessment policies consistent with provincial guidelines. A es of workshops and seminars, together with printed materials, e provided by learning assessment staff to assist districts in eloping these local policies. Work is now underway to continue e efforts by providing leadership and resource materials which facilitate locally initiated program evaluation.

Examinations

The Examinations Branch is responsible for administering the Grade 12 Scholarship Program and General Educational Developm Testing Program (GED), and also issues transcripts for those who obtained secondary school graduation in British Columbia betwee 1890 and 1973. The fourth responsibility of this branch is to provid service evaluating student records from outside the province in te of British Columbia equivalents.

Early in 1980 it was announced that grade 12 graduates who successfully write the B.C. government scholarship examinations m henceforth enrol within two years at a recognized post-secondary institution before becoming eligible for the $1,000 award that goes top candidates. Students in career and vocational fields, to be eligi for a $1,000 district award, must also enrol in a bona fide post-secondary institution, or in a training school approved by the Ministry of Labour.

Grade 12 scholarship examinations are scheduled in January and June annually (German 12, geology 12, Latin 12 and Spanish 12 are administered in June only). In 1979/80 a total of 5,295 candidates applied to write the examinations. Of these, 846 earned scholarship vouchers valued at $1,000 each. A further 370 earned district scholarship award vouchers, also valued at $1,000 each. The winner of the Governor-General's Silver Medal for achieving the highest average on these exams, 97.67 per cent, was Thomas Robe Stevenson, a graduating pupil from Carson Graham Senior Second School in North Vancouver. The winner of the Governor-General's Bronze Medal for achieving second place was Jessica Treisman, a graduate of University Hill Secondary School, Vancouver, who had average of 97.33 per cent.

British Columbia leads the rest of Canada in successful GED candidates. During 1979/80, 6,304 candidates applied to write the tests and 4,221 received a secondary school equivalency standing.

During the school year, the branch issued 3,325 transcripts and evaluated 260 transcripts from outside the province.

Career Programs

The Career Programs Branch was established in the spring of 19 and the first full year of operation has now been completed. The branch is structured to service career programs in industrial education, business education, home economics, graphic commun cations, programs for particular occupations, agriculture, work study-work experience and metric conversion.

Career preparation pilot programs expanded from twenty-five programs with 200 students participating to forty-two with 300 students. During the 1979/80 academic year, all school districts we invited to participate in this project. Seven regional workshops we held to explain the objectives and procedures to senior administra

's from every district. Thirty-two districts responded, and 102 pilot ɔgrams involving 3,000 students were slated to be in operation by ɔtember, 1980. Staff has been seconded to the Schools Department d to the Post-Secondary Department to develop joint curricula iich will enable many of these pilot programs to become :ognized as regular school programs in September, 1981. As a ult of "laddered" studies, secondary graduates may earn advanced cement in a college vocational course or in apprenticeship ɛparation, thereby reducing the total time spent in such training.

'he revised business education curriculum is now in effect for all :ondary schools. A specialist consultant was seconded to the inch to review supporting equipment lists and to write specifica-ns for essential items. The number of students enrolled in business ucation courses in 1979/80 was 106,421, an increase of seven per nt from 1978/79. The number of business education teachers ployed in 1979/80 was 983.

'he number of students enrolled in industrial education courses in 19/80 was 159,988, a decrease of less than .1 per cent from 1978/79. otal of 1,245 teachers were employed in industrial education ssrooms in 1979/80. The Career Programs Branch recruited /-four tradesmen and twenty-five third-year students of the -year university program to provide schools with well-trained ustrial education teachers. Training is conducted through the nistry-sponsored Industrial Education Teacher Training Program at University of British Columbia.

he number of students enrolled in home economics courses in 19/80 was 106,036, an increase of less than .1 per cent from 18/79. The number of home economics teachers employed in 19/80 was 905.

should be noted in this report that 6,454 students were enrolled pecial education and locally developed courses which use lities constructed to accommodate regular courses within career ɔgrams. Work study-work experience programs continued to and and 16,889 students from seventy-two school districts luding one class at Jericho Hill School) were enrolled in 1979/80. represents a student increase of .8 per cent from 1978/79. A t provincial guide for work study-work experience has been ten and distributed to all interested parties for reaction and rovement.

ne Career Programs Branch continued to assume repsonsibility for ric conversion within the ministry, and a handbook for teaching ric, *Metrics in the Schools: A Handbook for Educators,* was eloped for distribution to all schools in the 1980/81 school year. 979/80, most schools offered instruction in metric measurement. ɔndary school graduates entering the work force are able to tion in both metric and imperial measure.

ne ministry's fixed capital asset replacement program enabled ty-three metal-working lathes and five milling machines in ndary schools to be replaced with new machines calibrated in ic.

French Language Services

The past year saw the introduction of the core curriculum in French *(programme-cadre de francais)* in the elementary grades. Classes were established in eleven school districts — wherever ten more students were enrolled — to a total of 232 students in the province.

The *programme-cadre de francais* is the most comprehensive of the French programs; it is offered where parents request a program in which French is the language of instruction for all subjects (except English as a second language). This program parallels the content of the English-language core curriculum.

A substantial increase in enrolment is anticipated for the next school year in all of the French programs offered in the province.

Guides for early French immersion were fully written and developed for kindergarten to grade 7 in all subject areas. In 1979/80, 3,088 students enrolled in early immersion programs in fourteen school districts. Early French immersion programs are designed to produce students with "functional bilingualism". Up to grade 3, French is usually the only language of instruction. English-language subjects are then gradually introduced until, by grade 5 or 6, a balance has been achieved between English-language and French-language instruction.

A committee was established this past year to identify and develop curriculum guides for late immersion in all subjects. Guides in interim form will be ready for June, 1981, and distributed to all schools offering late immersion. Feedback and data will then be gathered to produce final versions of the guides for the 1982 school year. The committee is also developing a curriculum for secondary immersion which is intended to reinforce and expand the French-speaking ability students have gained in elementary school. These guides should also be ready in interim form by June, 1981.

This past year, 103 students in four school districts were enrolled in late immersion. This program usually begins in grade 6, at which time all subjects are taught in French. During grade 7, 80 per cent of the instruction takes place in French, with English language arts making up the other 20 per cent.

The late immersion program is designed to provide students with "instrumental bilingualism." This means that a student who has completed late immersion in grades 6 and 7 with a secondary school follow-up should be able to communicate adequately in French but would probably not be as fluent as one who had the benefit of early immersion.

The most widely taught French courses are still the basic ones at both the elementary and secondary levels. In 1979/80, the enrolments in French as a second language were 83,444 for elementary classes and 94,702 for secondary. These programs are intended to develop basic French-language communication skills and offer an understanding of, and appreciation for, French culture.

A new secondary French curriculum guide was launched in May, the product of a revision committee established two years ago.

hool districts have three years in which to implement the guide th its accompanying instructional programs dealing with language, ltural and attitudinal content.

A provincial survey regarding French literature and reading aterials in the secondary schools was conducted in 1979/80. The sults are being interpreted and used as a source of guidance for e secondary French revision committee.

A draft version of a guide for secondary French literature and ading will be presented to the field for reaction in January, 1981. odifications based on reactions to the draft will be incorporated fore the guide is implemented in September, 1982. This will clude the curriculum, together with support material.

The Fourth Annual Summer Institute, held in July at Pearson llege, was attended by sixty-five elementary teachers representing enty-seven districts. Teachers were offered courses in teaching chniques. They also participated in various conversational activities olving numerous cultural topics.

A Resource and In-Service Training Centre for French was augurated in February and was well attended by over 500 teachers, ncipals, co-ordinators, parents and school district administrators. e centre offers workshops and houses materials relating to all nch programs taught in British Columbia.

Pending the final renegotiation of the Federal-Provincial Agreent for Bilingualism in Education, programs under the purview of French programs co-ordinator were administered according to provisions of an interim agreement for the 1979/80 academic r. In June, $1,250,000 was divided among the seventy-five school tricts as French Language Support Grants. Funds made available der the French Teachers' Bursary Program totalled $276,115, wing 866 B.C. French teachers to receive bursaries to follow ividual programs or to attend district-sponsored in-service sions. Under the terms of the Second-Language Monitor Program, ty-three B.C. post-secondary students were employed as monitors le studying on a full-time basis in other provinces, and ninety-two ncophone students worked in British Columbia, divided among e school districts and two colleges. The Full-Time Monitor gram continued as a pilot project for a second year, allowing en francophones to be assigned to work in school districts away m the province's major centres. The 1979 Summer Language sary Program provided bursary assistance for 493 students to nd six-week total immersion French programs in various parts of country. A total of 444 students from this and other provinces lied here at one of the four post-secondary institutions involved e program. One hundered and five B.C. post-secondary students efitted from the Second-Language Study Fellowship Program, as ,000 was made available for full-time study at francophone or gual institutions within Canada. Also, $1.5 million was divided ng forty-seven special projects where programs of French uction were initiated or expanded.

Program Implementation Services

In 1979/80, its second year of operation, the office of Program Implementation Services expanded its role of providing informati and support to school districts for the implementation of provinci developed programs. The Program Implementation Services secti of the education ministry is responsible for co-ordinating and facilitating:

- implementation of provincially developed curricula
- action arising out of recommendations from provincial learnin assessment reports
- in-service education related to curriculum, assessment, and planned educational change
- linkage of program resources within the ministry and among school districts.

Regular communication with senior school district personnel is maintained during the year at provincial and regional meetings, a through a superintendents' advisory committee. Feedback from school districts is reported to the ministry as a result of this liaiso

Operating with only two professional staff members, Program Implementation Services has been limited in its ability to provide direct support to individual school districts. However, services ha been provided indirectly through numerous provincial and regio meetings planned and co-ordinated by the section. During the school year, thirty-five eductional leaders were trained to offer orientation workshops related to curriculum changes in secondar English, music and physical education; elementary language arts, junior secondary drama. Held in over forty centres throughout t province, these meetings involved 1,200 educators who subseque acted as resource persons in their own school districts. An evalua of this orientation process was undertaken and, although this ser is already valuable to districts, improvement will be made in futu years.

A discussion paper on guidelines for successful program imple mentation has been prepared. Factors which help or hinder the actual use of intended changes in school programs was also the t of intensive study at two week-long summer institutes planned i co-operation with the University of British Columbia and the University of Victoria. Senior administrators from sixty-one scho districts were represented at these professional development pro grams which focussed on planning and evaluating program imple mentation. A resource file has been established which contains recent research, articles and books on planned educational chan

Program Implementation Services analyzes recommendations a ing out of provincial learning assessment programs and co-ordin ministry action on those which are given priority. Three individu school districts which requested support, consultation and in-ser programs to improve student achievement were assisted directly during the year.

While in-service education and professional development pro-

ıms are a major responsibility of universities, school districts and ›fessional associations in the province, Program Implementation ·vices assists in co-ordination and liaison regarding these important ivities. Policy has been prepared to guide ministry-sponsored service programs and funding of proposals from groups of ıcators in the province. A registry of resource personnel available assist districts with in-service programs is available through gram Implementation Services.

'he major focus of activities for the year was to create an ıreness of the complexities involved in bringing about desired nges in the educational program and to provide practical services l support for planning successful implementation.

›ecial Education Programs

ducational support services are provided by the Ministry of cation to assist in the establishment and maintenance of services ch supplement regular services. These include a variety of special grams for exceptional children.

ecial Programs

ıe Special Programs Branch is responsible for developing, ılementing and communicating policies and procedures on ıters relating to the education of exceptional children. Under the ıority of section 181 of the *School Act*, the branch issues special rovals. This funding device — valued at $23,760 in 1979 — allows ıministry to contribute to the shareable cost of school districts' ›ial programs for the education of mentally and physically dicapped children, severely learning-disabled children, autistic dren, visually and hearing-impaired children, and for ›ning assistance and other educational services in related s of need. In addition, special approvals are granted chool districts to support programs and service for ve Indian children and children learning English s second language.

ıder the approval system, the Special Programs ıch allocated over 2,800 special grams approvals in the seventy-five ol districts during 1979/80.

Special Approvals in the 1979/80 Academic Year

Elementary Learning Assistance (K-7)	87
Secondary Learning Assistance (8-11)	52
Moderately and Severely Retarded	22
Hospital — Homebound	12
Physically Handicapped	7
Residential Programs	1
Visually Impaired	4
Hearing Impaired	8
Autistic	3
Rehabilitation	21
Climate and Distance — Specialized	2
Job Training for Moderately and Severely Handicapped	2
English as a Second Language	30
Indian Education	16
Others — Specialized	10
Total	**283**

Increasing numbers of severely handicapped children attended public school programs, and resources were provided to support them. In many instances this was achieved through inter-ministeria co-operation, the efforts of the branch and its participation in the provincial Inter-Ministry Children's Committee. In other cases, teachers provided education in the hospital or home.

The Special Programs Branch has continued to be involved in a variety of councils and committees of an advisory nature, such as t Minister's Advisory Council for the Hearing Impaired. Also, in conjunction with the Curriculum Development Branch, a number committees have been at work developing curriculum guides and teacher resource guides. Among them are:

- *Mathematics Resource Guide for Hearing Impaired*
- *Speech Resource Guide for Hearing Impaired*
- *Life Skills Resource Guide for Hearing Impaired*
- *Survival Skills Resource Guide for Hearing Impaired*
- *Visually Impaired Resource Guide*
- *Moderately/Severely Retarded Curriculum Guide*
- *Language Arts Handbook — Native Indian Children*

The branch undertook and sponsored extensive in-service activi as well as conferences for parents of hearing-impaired and mental handicapped children. With the assistance of the Division of Spee and Hearing of the Ministry of Health, the branch continued to underwrite costs to school districts of auditory training equipment and speech therapy programs.

Among programs for the communicatively impaired in 1979/80:

- **The Provincial Program for the Hearing Impaired** enabled 700 students to be assisted by local itinerant programs and district clas Support was given to parents of hearing impaired children and to 117 teachers offering services to them in forty school districts. Serv

school districts have been in the areas of student placement, ality programming, professional development and the provision of cessary resources, including auditory training equipment.

Jericho Hill School enrolled a total of 156 students ranging in age m five to nineteen years. Programs were provided in both -campus and off-campus settings, including three elementary and e secondary classes in Vancouver School Board schools and one mentary class in Maple Ridge. The on-campus programs offered ademic and pre-vocational courses.

Students atttended Jericho Hill School from all areas of British lumbia. Day students travelled from all school districts in the eater Vancouver area, while forty-nine students from other areas B.C. lived in the school residence, with frequent home visits. In uary, 1980, the ministry contracted with the Western Institute for Deaf to operate a group home for six students as a pilot project investigate the viability of group homes as an alternative to rmitory accommodation.

Staffing at the school included thirty-one teachers and fourteen ld-care counsellors. A team of health professionals, contracted m Vancouver Metropolitan Health, provided continuing medical ervision, psychological and psychiatric services, speech therapy, ntal hygiene, nutrition consultation and occupational and physical rapy. Audiological services were provided by the Ministry of alth.

A committee to recommend future directions for the school was up in the fall of 1979 by the assistant deputy minister. Its report s scheduled for completion by the end of August, 1980, for mission to the minister.

he Provincial Program for Visually Impaired enabled over 350 ually impaired students to receive instruction in regular classes h the support of itinerant and resource teachers of visually paired children.

A Language Arts Curriculum Development Committee for visually paired students was formed in December, 1979. The committee npleted work on a proposed currriculum guide on language arts visually impaired students in kindergarten to grade 3. Future riculum development activities will be administered by the riculum Development Branch. The ministry continued to vide support services to deaf-blind children requiring specialized grams both within and outside the province. These include port of five deaf-blind children attending W. Ross MacDonald ool in Brantford, Ontario, and approximately ten deaf-blind dren being maintained in local programs. The ministry also ded an educational assessment of eight deaf-blind children by a n from the W. Ross MacDonald School.

he Provincial Resource Centre for the Visually Impaired assisted ool districts in the instruction of visually impaired students by ding specialized instructional resources. These included special-nat editions of curriculum materials, such as "talking-books" or

braille editions, and visibility enhancement devices for the partially sighted. A catalogue of all materials available for loan was distributed to all school districts in January, 1980.

The centre lent materials to 237 students during the year, 60 of whom use braille. The total items lent included 5,763 braille volumes, 3,596 cassette tapes, 122 large print maps and books, 262 other tactile aids and fifty-six braille writers.

The production/acquisition section of the resource centre, by purchase or direct staff production, acquires new special-format materials to keep pace with curriculum revision. Some 2,706 acquisitions were made during the year, including 892 braille volumes, 1,246 cassette tapes and 164 braille and large print maps.

Indian Education

To meet the special needs of native Indian children, programs have been designed not only to develop basic skills but also to reflect the cultural, linguistic and social background of the children. The branch supported programs in over fifty school districts during the 1979/80 academic year.

Programs were implemented in co-operation with Indian communities to provide native paraprofessional workers, such as home-school co-ordinators and teacher aides, and to provide native Indian language, cultural, counselling, tutoring and alternative education programs.

DIVISION OF ADMINISTRATIVE SERVICES

The Division of Administrative Services has been responsible for a wide range of administrative, regulatory and logistical functions within the provincial educational system. During the 1979/80 year, these activities were reorganized into two principal areas: Administrative Operations and Legislative Services.

Administrative Services — Operations was established in 1979 to develop general administrative procedures, systems and routines, and to provide support systems and guidance to school district officials. It also co-ordinates inter-departmental activities in certain program and project areas.

Responsibility for the Correspondence Education Branch and the Publication Services Branch was transferred to Operations upon its inception.

Correspondence Education

The primary function of the Correspondence Education Branch is to provide education services to school-age students who are unable to attend school due to distance or illness and secondary school

dents who are unable to take particular courses in their schools. s latter service is especially valuable for students attending small ondary schools where course offerings are limited. In addition, branch enrols adults who wish to take secondary school courses the purpose of upgrading their school standing or for vocational nterest purposes. During the 1979/80 academic year, just under)00 course registrations were processed.

he branch continued to supply course materials for the satellite mentary correspondence school operating out of Dawson Creek. cational services were also supplied to a school in Czechoslovakia blished for children of Canadian workers.

o ensure that the correspondence courses offered are generally ivalent to those taught in the public school system, the branch ntains a continuing program of course development. During 9/80, a revised language arts program for grade 1 was developed, ng with new courses in reading (years 2 and 3), science (years 4 5) and art (year 6). New secondary school courses prepared for lementation in September, 1980, included personal and business ords 9, typing 9, shorthand 11, algebra 11 and 12, and German 11. uring the year, the branch was subjected to a thorough analysis s internal operations. As a result, new procedures were eloped to improve the student registration and record-keeping cesses and to reduce the delay between the submission of lent papers and the return of marked assignments.

lembers of the branch have continued to work closely with ials of the Open Learning Institute in the area of program elopment. In addition, the branch director met with officials of espondence education schools in other provinces to establish hanisms for co-operation.

blication Services

e Publication Services Branch acts as the principal purchasing distribution agency for learning resource materials used by 1,800 lic and private schools in the province. Over four million pounds aterial were shipped during the year, and invoices for learning erials in excess of $10 million were processed.

blication Services operates out of a 40,000-square-foot warese in Victoria, with contracted warehousing space in Vancouver. branch maintains a sufficiently large inventory to meet most ers on demand.

hool district orders are funded through the Credit Allocation . The per-pupil credit is calculated by dividing the branch's ning materials budget by the province's total student enrolment. stments are made to compensate for the lack of volume omies in small districts, the wide geographical dispersion in e districts and increased enrolments. The Credit Allocation Plan s districts more responsibility in the selection and development cal priorities. Each district appoints a co-ordinator who provides on between the branch and the district. Approximately 175 pendent schools in the province are also served by this system.

Savings are realized by having used or damaged books repaired b binderies in Vancouver and central B.C. In 1979/80 over 200,000 repairs were made at a significant saving over the cost of purchasin new replacement textbooks.

The branch also administers the School Library Book Purchase Pla which places one copy of each selection in every school library. Or B.C.-authored and B.C.-published books are reviewed, so this program directly supports the provincial publishing industry. The plan continues to receive an enthusiastic response from schools.

DIVISION OF LEGISLATIVE SERVICES

The Division of Legislative Services was established in 1979/80 through a restructuring of responsibility involving the Division of Administrative Services. The Legislative Services office carries out various administrative, para-legal and logistic functions in support c the Schools Department and school districts. It is responsible for th preparation of *School Act* legislation and regulations in co-operatic with the Ministry of the Attorney General.

The office serves as a focal point for the two-way flow of information between the Ministry of Education and school districts. All administrative and information circulars are distributed by the division. In addition, it provides consultative services to superinten ents and secretary-treasurers in a wide range of administrative and operational matters.

A section of the office is responsible for pupil transportation and for the transportation assistance and adult school crossing guard programs. It also authorizes the inclusion of new or replacement school buses in annual capital programs.

During the 1979/80 academic year, Legislative Services held responsibility for the Provincial Educational Media Centre and the Print Services Branch.

Amendments to the *School Act* (formerly the *Public Schools Act*) approved during the spring sitting of the legislature included improvements in the grievance and appeal procedures for teachers designed to provide increased informality while at the same time protecting teachers' rights. School districts were given permission t assist in the cost of educating a student outside the province — a provision of special value to northern communities which often do not have the numbers to support their own secondary schools. Als the date on which new trustees assume office each year was move forward to December 1 from January 1 in order to parallel the *Municipal Act*. A further amendment enabled the cabinet to determine the remuneration received by school trustees, rather th having the level fixed in legislation.

Provincial Educational Media Centre

The responsibility of the Provincial Educational Media Centre is t

ɔvide media services in support of ministry objectives. The primary ·vices are videotape dubbing and distribution; audiotape dubbing d distribution; film loan, and radio and television school broadcast. ɔgrams are acquired from a variety of sources, and original ɔductions are undertaken when appropriate materials are available.

n 1979/80 emphasis was given to purchase of materials to support ·riculum changes in elementary language arts, elementary science d secondary art. An annotated *Language Arts Media Resources ide,* designed to assist teachers in relating the media programs to curriculum, was prepared and distributed. Work on similar media ources guides in various subject areas was initiated. Another ivity of the media centre was the selection and acquisition of terials to support post-secondary programs. Although services e been available to colleges for several years, it is the first time t a concerted effort has been made to acquire programs cifically for college use.

n co-operation with the Correspondence Education Branch, a ject was initiated to assist primary grade correspondence students anguage development. The award-winning radio series *Sound-pe* was adapted for use on audio cassettes and distributed along h printed lesson plans. The program was enthusiastically received both parents and students, and the development of additional respondence materials using cassettes and filmstrips has now nmenced. Other production activities included radio, televison l film presentations in the areas of British Columbia history and graphy, language arts, music, art and secondary English.

he centre co-ordinated quantity purchases of videotape and liotape from distributors and films from the National Film Board. se bulk purchases resulted in significant savings to colleges, ool districts and the Ministry of Education.

nt Services

rint Services continues to provide the Ministry of Education with a nplete range of specialized educational publishing functions. nary emphasis is on the dynamic integration of educational elopment, graphic design and printing of new learning materials e used in B.C. schools. To keep pace with the ever-increasing nand for high-quality educational materials by the ministry, Print ·ices has assembled a professional manuscript development group nprising manuscript editors, copy editors, graphic designers, trators, proofreaders and indexers.

ecial projects produced this year include the elementary uage arts program for the Correspondence Branch; *Metrics in Schools: a Handbook for Educators;* the secondary French, music physical education curriculum guides for the Curriculum elopment Branch; a *Heavy-Duty Mechanics Manual* for the ram Research and Development Branch; and a catalogue for the ich Language Services Resource Centre.

Demand for publishing and production services increased significantly over the past year, with a current total of 341 publications involving 15 million impressions.

DIVISION OF EDUCATIONAL PERSONNEL

The Division of Educational Personnel is responsible for monitoring field activities throughout the province, through both the provincially appointed district superintendents of schools and the locally appointed superintendents of schools. It assumes responsiblity for the accreditation of secondary schools, provides resources which assist with self-assessment by elementary schools, issues teacher certificates and co-ordinates international teacher exchanges. These functions are carried out by three branches: Field Services, Accreditation/School Evaluation and Teacher Services.

Field Services

The Field Services Branch provides for the recruitment and assignment of provincially appointed district superintendents, assesses the performance of provincially employed superintendents and maintains liaison with superintendents throughout the province. An important function of the branch is to monitor the quality of school district administrative performance.

This was a major year of transition from provincial employment of school superintendents to local employment by boards of school trustees. Twenty-six school districts chose the local employment option as a result of changes to the *School Act Regulations* which permitted smaller districts to appoint their own chief educational officer.

Liaison with superintendents and school boards continued to be an important branch function. Orientation sessions were held for all newly appointed school superintendents and eleven field visits were conducted in the school districts where new superintendents were recruited. In addition, the program superintendent of the branch acted as a consultant to superintendents and school boards.

A major project of the year was an analysis of evaluation reports written on teachers and administrators by school superintendents during the period from 1977 to 1980. This analysis led to a report on issues raised in evaluation reports, an examination of formats in reports and a summary of teacher and administrator evaluation ratings.

The branch continues to administer professional development programs of a leadership and management nature for district and ministry employees. Professional development programs with regional or provincial impact that are consistent with goals

ablished by the Schools Department of the ministry, and those ich have branch personnel involvement in planning, are funded as rt of a comprehensive management leadership training program. is year, a model was developed for evaluating the division's ofessional development activities.

ccreditation/School Evaluation

ll secondary schools in the province must periodically undergo an reditation process. This involves a self-assessment by school staff, d then a thorough evaluation by an external team. During the 9/80 academic year, revisions were made to the accreditation cedures. A secondary school may now be accredited for a period one to six years, depending on the quality level of education ng offered to students. Some 20 provincial secondary schools e so accredited during the 1979/80 academic year.

n order to assist elementary schools with an evaluation process, a -assessment booklet was developed by the branch. Although its is not compulsory, it has proven valuable to school districts in eting a ministry directive which calls for an elementary school -assessment policy by December, 1981.

acher Services

ne Teacher Services Branch is responsible for activities involving certification and decertification of teachers, dismissal and transfer eals and teacher exchange programs. It also represents the istry on the Teachers' Pension Board.

uring the year, a Certification Advisory Committee was established for the first time. The committee is comprised of respresentatives from the teaching profession, teacher education institutions and field of school administration. With the director of teacher ices as its chairman, the committee advises the ministry on ters related to the certification and decertification of teachers.

uring the past year, the number of certificate issues was again n. Over the last three years, issues have declined in number in ing with the decline in student enrolments and reduced loyment opportunities for teachers.

e branch processed over 200 applications for exchange in 9/80, of which 38 were successfully placed in overseas assignts. Negotiations to establish an exchange program with France e completed during the past year, and discussions were begun to ate programs with Italy and Sweden. In addition to existing -provincial programs (Quebec and Ontario), discussions were n with the province of Manitoba to implement an exchange ram.

sponsibility for administering dismissal and transfer appeal esses was transferred to the branch in July of 1979. The branch lishes boards of references and review commissions, as required r the provision of the *School Act*, and processes transfer review ests.

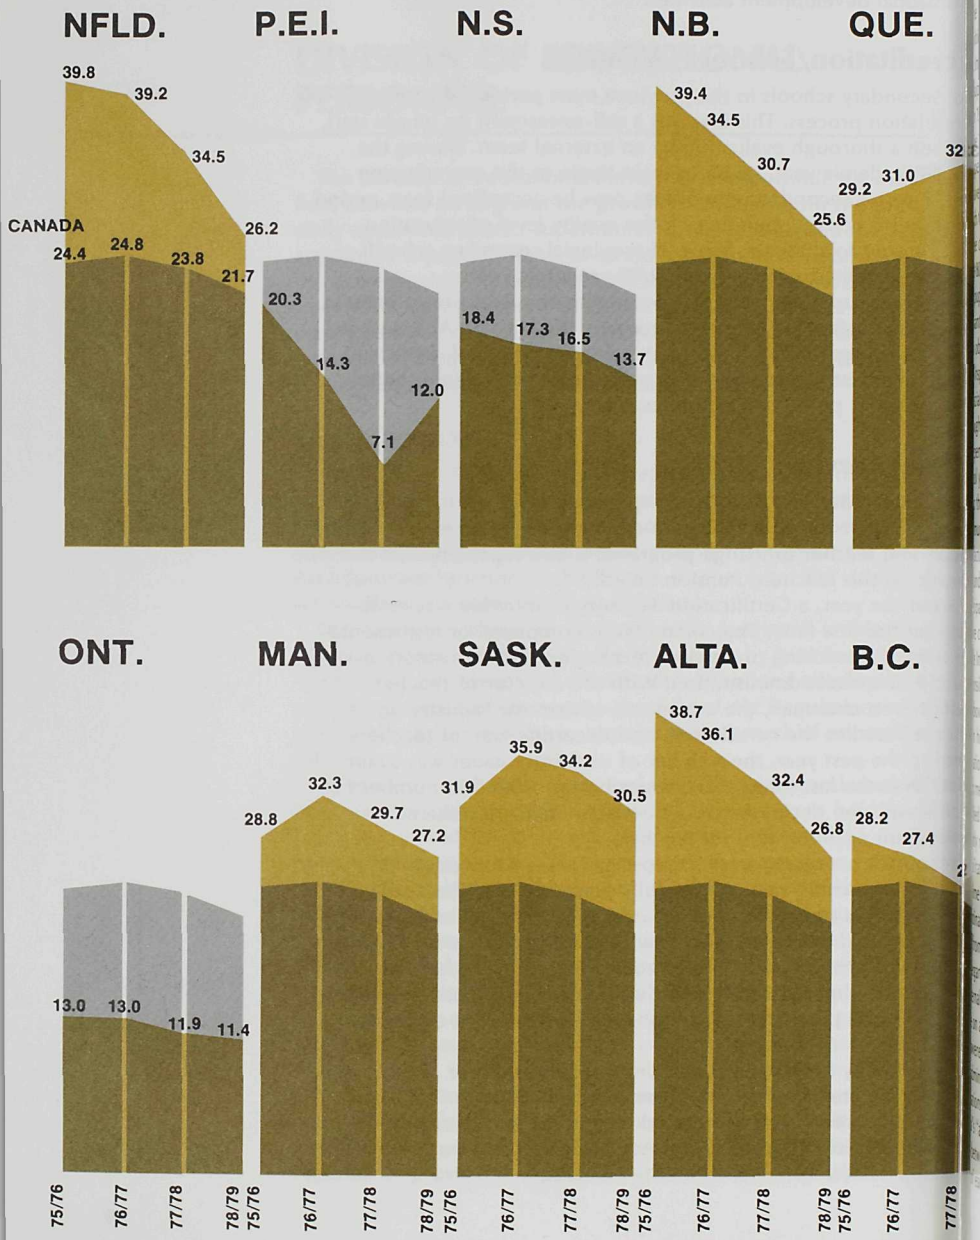
Enrolments per 1000 Population, Ages 18 - 24



Source: Statistics Canada

INDEPENDENT SCHOOLS

'he 1979/80 academic year was the third year of education ministry ivities under the authority of the *Independent Schools Support* . In all, 109 schools with 18,251 pupils and 1,350 teachers qualified support under the terms of the act — an increase of two schools m 1978/79.

'he 1977 act established two grant levels. In the past year, 107 ependent schools qualified for maximum grants of 30 per cent of average per-pupil operating cost of the public school districts in ich they are located. This averaged approximately $600 per pupil. ee other schools qualified for the lower grant level, which in 9/80 continued at nine per cent and averaged approximately $180 pupil.

rants for the year totalled $10,663,400, payable in 1980/81.

o obtain the lower grant level, a non-public school must satisfy Inspector of Independent Schools that it does not foster doctrines acial or ethnic superiority, religious intolerance, or social change ough violent action. Facilities must be adequate and the ependent school must have been in operation for at least five ool years.

or the higher grants, an independent school must also provide imum instructional time on core curriculum subjects, have a sfactory pupil-testing program, meet standards of school opera- and administration approved by an external evaluation team, icipate in the provincial learning assessment program, and act to ure certification of all teachers within five years.

he Inspector of Independent Schools (appointed by, and onsible to, the Minister of Education) must be satisfied that all above criteria are met before funding is recommended. To assist in his task, a Teacher Certification Committee and external uation committees have been established. These committees, ch meet from time to time each year, are composed of highly lified and experienced professional educators and are chaired by ntly retired public school superintendents.

cilitating the work of these committees are two professional -time co-ordinators: a co-ordinator of teacher certification and a ordinator of external evaluation. Professional consultants are also d from time to time to advise in specialist areas such as ergarten, industrial education and foreign languages.

ternal evaluations of all schools receiving the higher grant are e on a four-year cycle. The external evaluation committees, owered by the act "to examine and assess programs, operations administration in the school," make written reports of their uations to the inspector. Discussion of the reports with each ol's "authority" and principal normally follows. In the three s between each formal evaluation, the inspector monitors the of each school by detailed analysis of annual data forms and by

personal visits to each school at least once a year.

While this evaluation and monitoring process is necessary to ensure that schools applying for or receiving grants meet the criteri laid down by the act, it is in no way used to diminish the legitimate independence of the schools. The freedom of independent schools to operate within the very broad limits set by the act is respected at all times, for it is this very freedom which enables independent schools to contribute in significant and varied ways to the welfare c their pupils and to the educational health of society.

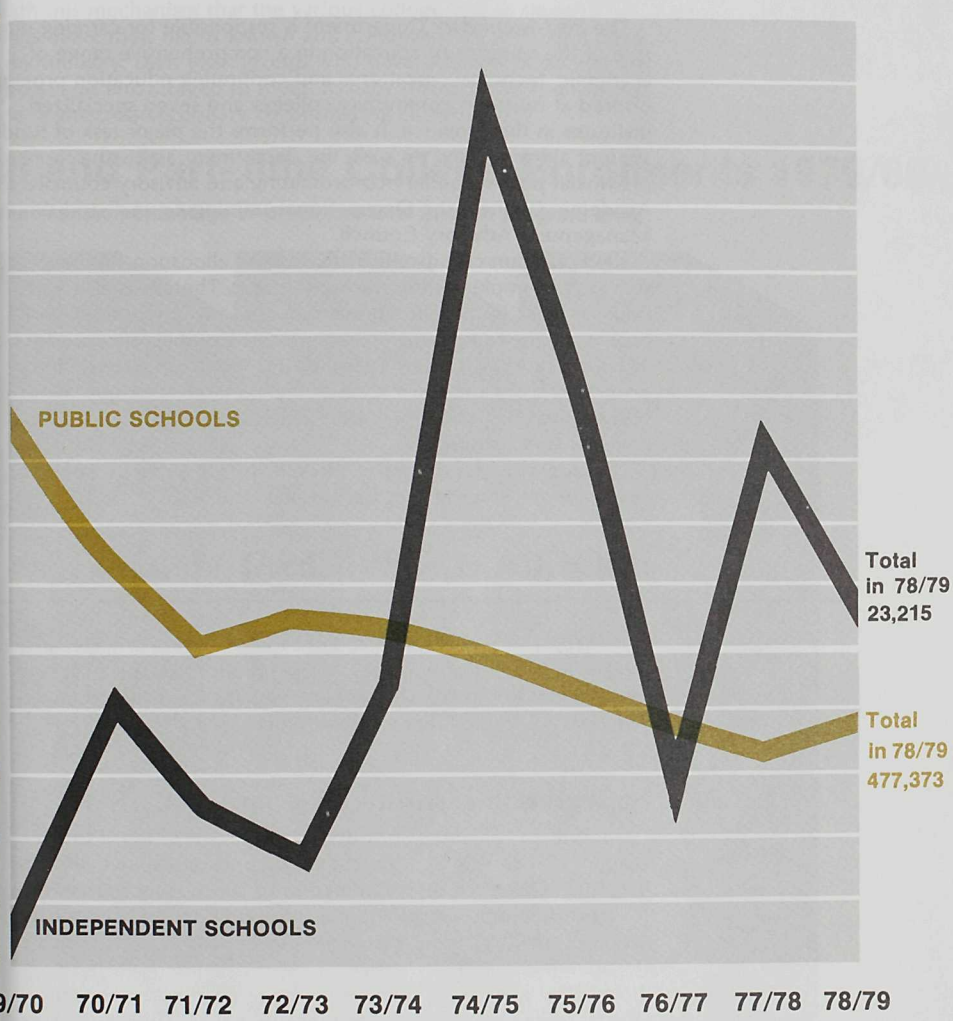
The number of independent school teachers certified under the B.C. *School Act* continues to rise, from 672 in 1978/79 to 719 in 1979/80. The following table shows the numbers and percentages o teachers authorized to teach under all categories:

Certified under B.C. School Act	719 (53.3'
Certified by Inspector of Independent Schools (A number of these teachers (12-15%) will qualify to receive B.C. Schools Certificates after two years of teaching in the province.)	335 (24.8'
Certified by Ten-Year Clause (Some teachers in this group have the qualifications to receive a B.C. Schools Certificate, but have not applied for one.)	144 (10.7'
Certified by Inspector, with Restriction (Most of the teachers in this group have an academic degree or degrees, but no teacher training.)	68 (5.0'
Granted a One-Year Permit to Teach (These are teachers who teach in specialist areas, usually for a few periods a week. They are on an upgrading program and are expected to obtain certificates within five years.)	22(1.6'
Volunteer Apostles (Almost all of the teachers in this group would qualify for a B.C. Schools Certificate, but are on a visa and cannot apply.)	52 (3.9'
Teachers of Religion Only (The members of this category are ministers who teach religion only.)	3 (0.2'

During the year, further development and refinement of the program by the Inspector of Independent Schools and staff took place. It can now be said, three years after the 1977 act was passed, that a process is in place which successfully addresses its intent. In fact, the process is working well, thanks primarily to the high level co-operation by all concerned.

nrolment in Independent and ublic Schools 1969-1979*

rades 1 - 12, excluding Kindergarten



ependent school enrolment figures include pupils from schools receiving aid
ler the Independent Schools Support Act as well as from schools not receiving such aid.

rce: Statistics Canada
B.C. Ministry of Education

POST-SECONDARY DEPARTMENT

The Post-Secondary Department is responsible for carrying out the role of the Ministry of Education in a comprehensive range of academic, technical, vocational and continuing education programs offered at fourteen community colleges and seven specialized institutes in the province. It also performs the major task of funding student aid programs. As well, the department assists the three provincial post-secondary co-ordinating and advisory councils: the Academic Council, the Occupational Training Council and the Management Advisory Council.

New program classification and budget allocation systems were successfully implemented during the year. There was also a marked improvement in the operational data that was provided to the provincial councils. A major new program of industry-based training in co-operation with the federal government was started, and a process of assessing the impact of facilities' costs on operating budgets was begun along with the development of five-year plans colleges and institutes.

The department consists of three divisions: Program Services, Management Services and Continuing Education.

PROGRAM SERVICES DIVISION

The Program Services Division of the Post-Secondary Department engages in two major activities: program approval and program development and research. Program approval is divided between two branches: Academic/Technical and Vocational.

College and Institute Programs

Three main functions constitute the daily activities of the Academic/Technical and Vocational sections of College and Institute Programs. These are the examination of provincial program needs, the co-ordination of new and existing programs and the recommendation of newly approved programs to the Academic Council or the Occupational Training Council.

The 1979/80 academic year was one of change, as more fiscal responsibility was delegated to these branches. Their new duties include the management of their own budgets and the monetary management of curriculum contracts that fall within their program areas. In this respect, the following projects are a sample of what has been undertaken:

- hotel management program

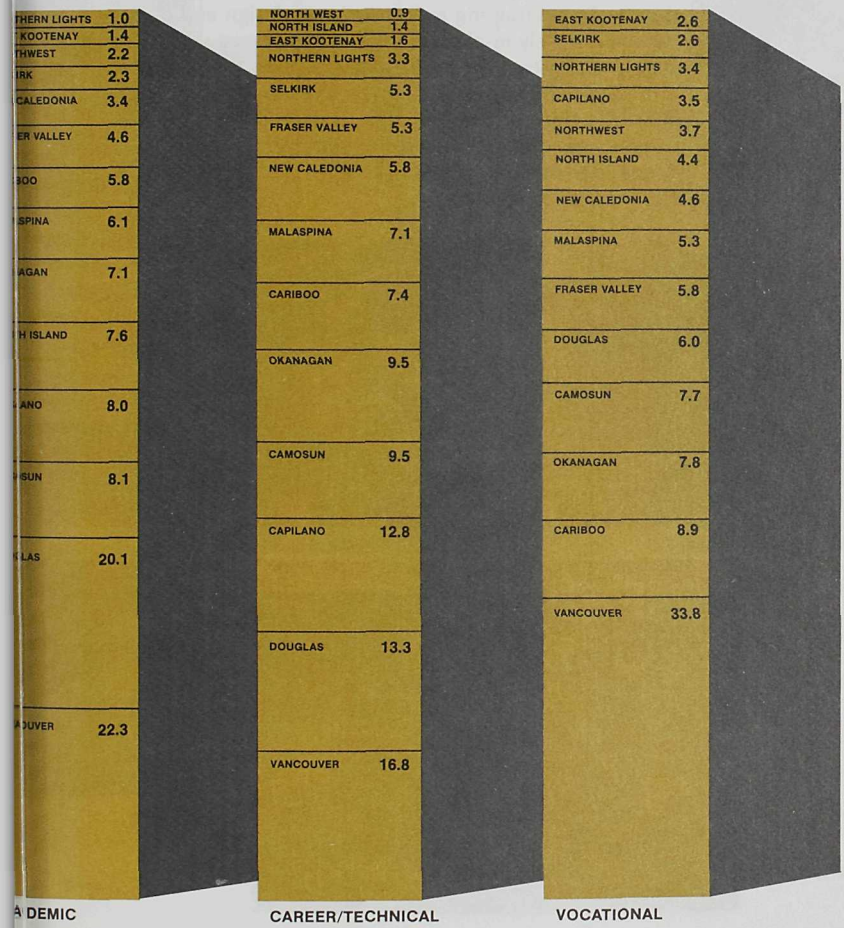
development of a career path in the dental assisting and dental hygiene field

development of counselling guidelines and diagnostic and placement tests for the long-term care and homemaker fields.

These curriculum projects are some of the direct results of the co-ordinating activities in which branch staff are engaged. It is through this mechanism that the various college and institute faculties make their needs known and communicate with each other and the ministry. Each year, groups who have not previously met are identified and encouraged to meet, initially through the sponsorship of one of the post-secondary co-ordinating councils.

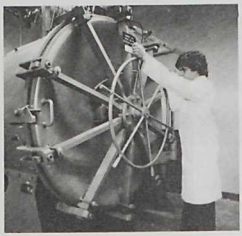
Full and Part-time College Enrolments 1979/80

Figures indicate percentage of provincial total in each program area.



Source: B.C. Ministry of Education

B.C.I.T.



Program Research and Development

One of the roles of the Program Research and Development Branch is to complete or make arrangements for a college or institute to provide the curriculum development and research projects that have been identified through the other two branche The programs mentioned above are examples of this activity. As w this branch has a major responsibility for helping to plan and monitor the five-year plan and institutional review of each of the twenty colleges and institutes. During the year, Douglas College a Capilano College completed their self-studies.

Professional development is another area of responsibility of Program Research and Development. This past year has seen the completion of *Teaching Techniques* and a series of video tapes an booklets that have been placed in each institution to enable instructors to improve their skills. The instructional skills program, short practical training in instructional design and classroom skills has been widely implemented during the past year, with approximately 400 instructors participating around the province.

In the area of research, a study to examine what happened to university transfer students who, in fact, did not transfer was commissioned and received this year. Additionally, an extensive needs analysis of employers, students and residents of various col regions was completed.

DIVISION OF CONTINUING EDUCATION

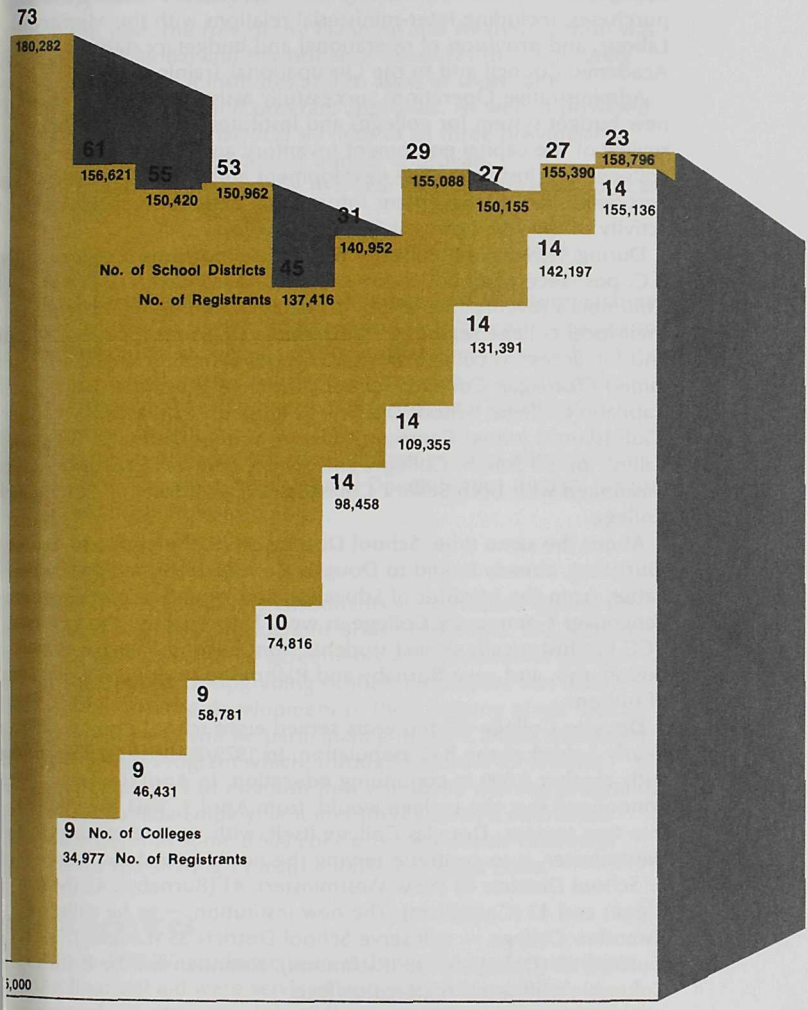
The 1979/80 academic year was similar to those of the 1970s; iva another year of steady growth in adult education. As a transitior year, however, 1979/80 was very important because of several significant events: the first major conference on continuing edu- tion for school trustees, college board members and professiona; the production of a continuing education policy paper and subsequent specific program policies for the province; the intrc.ic tion of a formal budgeting system for school board adult educa'n programs; the completion of a special projects directory; the implementation of rural and urban institutes, and the initiation adult basic education and English-as-a-second-language newsletrs The foundation for continuing growth in the 1980s was thus established.

The ministry continued to stimulate activity in the field of speal education. Several colleges and school districts initiated prograr f handicapped adults, using the curriculum developed at Vancouv Community College. Valuable experience was also gained throu program developed by Camosun College which makes college resources accessible to handicapped people.

The shortage of curricula and resource materials in the area c adult basic education resulted in the development of the *Adult as Literacy Curriculum and Resource Guide,* which is designed to si teachers and administrators in the creation of high-quality adult a literacy programs. In addition, work on a similar guide for Engli- language training programs was commenced. Basic literacy prog r received further assistance through the development of a biblic graphy of reading materials for basic literacy students. Experien with the volunteer tutor training program developed in 1978/79 Northern Lights College assisted Sechelt and Powell River pro- grammers with basic literacy and tutor training programs.

The ministry continued to stimulate professional and commun y development activities, especially in rural centres. English-langu e training workshops were held in Dawson Creek, Quesnel, Nana Cranbrook and Trail. Community needs identification studies we conducted in Delta School District, McKenzie, Cassiar and the Queen Charlottes.

Registration Trends in School Districts and College Continuing Education



Source: B.C. Ministry of Education

MANAGEMENT SERVICES DIVISION

A major role of the Management Services Division, through its Administrative Operations function, is the provision of administr v services for the Post-Secondary Department. Other important rol i 1979/80 were the allocation of capital and operating budgets to colleges and institutes; planning and negotiation of federal train purchases, including inter-ministerial relations with the Ministry Labour, and provision of operational and budgetary statistics to t Academic Council and to the Occupational Training Council.

Administrative Operations successfully assisted the first cycle o h new budget system for colleges and institutes. As well, it comple d review of the capital equipment inventory and funding system in colleges and institutes. The development and implementation of e Post-Secondary Management Information System is a major ong activity of the Management Services Division.

During 1979/80, a number of major developments occurred in B.C. post-secondary education system. The last seven of British Columbia's seventy-five school districts became full participants their local college regions — with representatives on college bo and full access to college services. School District 17 (Princeton) joined Okanagan College; School District 46 (Sunshine Coast) jo Capilano College; School Districts 62 (Sooke), 63 (Saanich), and (Gulf Islands) joined Camosun College; School District 13 (Kettle Valley) joined Selkirk College, and School District 86 (Creston-K was linked with both Selkirk College and East Kootenay Commu College.

About the same time, School Districts 38 (Richmond) and 41 (Burnaby), already linked to Douglas College, accepted a recom dation from the Minister of Education and agreed to participate Vancouver Community College as well. This reflected the fact th VCC has historically served students from beyond Vancouver cit boundaries, and gave Burnaby and Richmond students a wider r of options.

Douglas College for ten years served eight school districts wit nearly a third of the B.C. population. In 1979/80 it had 5,900 stu with another 8,000 in continuing education. In April it was announced that the college would, from April 1, 1981, be divide into two regions. Douglas College itself, with its core campus in Westminster, is to continue serving the north side of the Fraser — School Districts 40 (New Westminster), 41 (Burnaby), 42 (Mapl Ridge) and 43 (Coquitlam). The new institution — to be called Kwantlen College — will serve School Districts 35 (Langley), 36 (Surrey), 37 (Delta) and 38 (Richmond). Kwantlen will be British Columbia's fifteenth regional college.

Amendments to the *College and Institute Act* (formerly the *Colleges and Provincial Institutes Act)* during the spring sitting o legislature increased the number of government appointees on college boards to one greater than the total number of school b

ppointees. Changes and clarifications were also made in respect to ne terms served by members of college and institute boards and rovincial post-secondary councils. Board members appointed by chool districts will now serve for one year, reflecting annual changes hat may occur on school boards, and those appointed by the inister will serve for terms of up to two years. Council members are ow to serve for terms of up to three years.

lanning and Analysis

During the year, the role of the Planning and Analysis section was prepare operational and performance measures for community olleges and provincial institutes and to assist in short- and edium-term planning and program approvals. As well, it provided formation and other analytical services to all three provincial ouncils, and assisted with annual budget approvals.

A major project, analysis of the five-year operating budget forecast, as completed during the year.

raining Projects

The recruitment and training of new industrial education teachers ontinued in 1979/80, as did the upgrading of instructors' training to e standards of the instructor's diploma. Continuous workshops and minars to upgrade instructors were undertaken in an effort to prove professional development and to maintain currency in ecialty subject areas.

The branch also provided for the management and administrative rection of the Canadian International Development Agency logging hool project in Indonesia.

lanpower Training

Provincial industrial training consultants were housed during the ar in selected colleges throughout British Columbia. B.C. employ- entering into cost-sharing agreements with the federal govern- ent for the training or upgrading of their employees can now tain assistance in the development of their training plans. The ovincial consultants will be participating in the Canada Manpower dustrial Training Program which, through financial incentives, courages employers to establish new employee training programs. is year the Canada Employment and Immigration Commission ects to enter into some 8,000 contracts with British Columbia ployers for the sharing of instructional and wage costs.

udent Services

During the 1979/80 academic year, B.C. post-secondary students quiring financial aid were serviced under three programs. proximately 35 per cent of the full-time student body applied for ancial assistance under the B.C. Student Assistance Program during year. In all, 15,074 loans and 11,885 grants were authorized. The rage loan and grant were $1,400 and $846 respectively.

Thirteen institutions participated in the work-study program designed to reduce indebtedness and provide career-related job experience. Approximately 1,000 individuals were involved with on-campus employment.

The Special Assistance Program serviced approximately 225 students studying on a part-time basis or enrolled in a full-time program of a short duration.

The ministry funded ten persons for world scholarship study at Lester B. Pearson of the Pacific on Vancouver Island and at United World College of the Atlantic in St. Donat's, Wales.

Two advisory commitees, the B.C. Student Loan Committee and the Student Services Advisory Committee, dealt with matters related to the administration of student aid programs and the development of student services.

POST-SECONDARY COUNCILS

Under terms of the *College and Institute Act,* three provincial ›uncils co-ordinate the programs and activities of British Columbia's urteen regional colleges and six provincial institutes offering chnical, vocational and specialized education. The Academic ›uncil, Occupational Training Council and Management Advisory ›uncil also advise and work with the Ministry of Education on ›n-university post-secondary education matters pertaining to their alms.

ACADEMIC COUNCIL

The Academic Council in 1979/80 completed its first full cycle of dget reviews and allocations for the fourteen colleges and five ›vincial institutions which offer programs that come under the ademic Council's area of responsibility. This includes all academic nsfer programs, most career-technical programs, and some cational programs. At budget review time, and again at allocation ›e, council members met with representatives of the institutions' ards and administrations so that a direct exchange of information uld take place.

The council held ten regular meetings during the year, with six of ›m at one or another of the colleges and institutes. These included ›etings with students, faculty, administrators and board members. e institutions visited were the College of New Caledonia (Prince orge), Fraser Valley College (Abbotsford), Malaspina College anaimo), Cariboo College (Kamloops), Emily Carr College of Art ncouver), and the Pacific Vocational Institute (Burnaby). These its, plus the budget and allocation meetings, helped the council to derstand the unique objectives, characteristics and needs of each titution and the communities they serve.

Three advisory committees were established — in health, data ›cessing and recreation — to provide the council with province-le and industry-wide perspectives on training needs and the ›propriate programs to meet them. The members are employers, ctitioners and educators. Additional advisory committees will be ablished in other major career areas.

he Academic Council has encouraged meetings of the thirty-two sting articulation committees and has assisted in organizational etings of two new committees — diploma nursing and home-kers. Most academic and career-technical program areas now e articulation committees. Members are from all post-secondary itutions offering the program; their primary concern is with nsferability of courses among institutions.

o assist in carrying out its statutory responsibilities, the council has

developed close and co-operative working relationships with the Ministry of Education and the other councils; effective communications with the colleges and institutes, and an active committee system.

OCCUPATIONAL TRAINING COUNCIL

The purpose of the Occupational Training Council is to review existing and proposed occupational programs as presented by the colleges and institutes. After review, recommendations on funding are made to the Minister of Education. When the minister has established the amount of funds to be made available, the council makes allocations to the colleges and institutes for programs under its auspices.

The council is also responsible for organizing procedures leading to obtaining information from which recommendations regarding funding of programs can be made. In addition, it is responsible for establishing career counselling services to augment those of secondary and post-secondary institutions.

The Occupational Training Council established four major objectives. The first of these for the 1979/80 academic year was to establish nine industry consultative committees covering the following industries: forestry; construction; marine; mining and smelting; agriculture; metal fabrication; transportation; communications and public utilities, and hospitality. The effectiveness of these committees has been a positive means of ensuring an industry perspective is applied to the tasks undertaken by the council.

The second objective was to complete the evaluation of a career advisory resource known as CHOICES. The pilot project for CHOICES has been completed, together with an assessment of the effectiveness of CHOICES terminals in ten secondary and two post-secondary institutions in the B.C. Lower Mainland and Vancouver Island.

The third objective was to establish a rational means of reviewing financial requests received from institutions to allow council members to deal knowledgeably with the data produced through the Post-Secondary Activities Classification Structure (PACS) system. The council, in co-operation with Ministry of Education personnel, established a means of addressing budget requests received from institutions utilizing the PACS system.

The fourth objective, resulting from past experience in reviewing programs submitted for funding, was to establish appropriate criteria. These related to the employment record of graduates and the proliferation of similar courses throughout the province requiring expensive capital equipment.

To address the four objectives, four committees of the council were established: the budget committee, the industry advisory committee, the managment committee and the counselling committee. These committees established criteria and policy utilizing advice from all relevant sources.

ANAGEMENT ADVISORY COUNCIL

he Management Advisory Council, also established under the visions of the *College and Institute Act*, consists of representatives m all B.C. colleges and institutes. It was chaired in 1979/80 by assistant deputy minister — post-secondary.

he council's responsibilities are residual, covering programs not gned to other councils, and functions common to all institutions, h as administration, capital building approvals, support services raries, student aid, etc.), the development of a budgeting process erve the various institutions, long-range planning and personnel tions.

Membership of the council comprises the board chairman of each ege and institute (or a person designated by the board chairman), deputy minister of education and others appointed by the uty minister. Committees of the council were formed to act on cutive matters, budget, capital projects, personnel and library nagement.

DEPARTMENT OF MINISTRY SERVICES

The Department of Ministry Services is responsible for many of the activities of the ministry which, though not strictly educational, form the infrastructure that makes the delivery of educational programs possible. These include finance, facilities services (through which buildings and equipment are provided) and various ancillary services including the Division of Educational Policy Development. In addition, the Division of Data and Information Services provides systems development, implementation and management support to all sections of the ministry.

During the past year the department continued to concentrate on the improvement of ministry management systems. Development of long-range planning systems for the ministry and its field agencies was continued, and five-year forecasts were analyzed in a number of sectors. A number of major reporting systems were made operational.

The Department of Ministry Services is the focal point for the central agencies of government and the conduit through which they are involved in the ministry's long-range fiscal and physical plans. These agencies include the Treasury Board, the Government Employee Relations Bureau, the Public Service Commission, the B.C. Systems Corporation, and the B.C. Buildings Corporation.

FINANCIAL SERVICES DIVISION

The Financial Services Division is organized into three branches: Schools Finance, Post-Secondary Finance and Ministerial Finance.

Schools Finance

The main function of the Schools Finance Branch is to monitor the expenditures of capital and operating funds in all school districts. The branch analyzes the budgetary requirements of the districts, calculates the value of the instructional unit (the basis on which operating grants to districts are determined), advises the government on the effects of various levels of funding, recommends the mill rate which should be established on property taxes for school purposes (the basic levy) and calculates the educational grants payable to each district.

For the 1979 calendar year, school district expenditures exceeded $1 billion (see tables 3.1 and 3.2 for details). Prior to finalization of the 1979 budgets, budget reviews were conducted in selected school districts by senior staff of the division.

Between July 1, 1979, and June 30, 1980, seventy-five capital

xpense proposals, amounting to $128.8 million in borrowing uthority, were processed. This amount was an increase of 19.25 per ent from 1978. Capital expense proposals provide borrowing uthority to the school districts for the acquisition of capital assets in he form of land, buildings, equipment and buses. The actual cost is net by the sale of debentures through the British Columbia School Districts Capital Financing Authority.

In 1979/80, the branch continued its involvement in processing the chool districts' five-year budget projections as well as establishing a ystem of key management indicators. These indicators provide both inistry and school district officials with measures of management fficiency not previously available.

A number of special projects were undertaken during this period, nost important of which was a pilot project involving a number f school districts with a view to establishing a formal operational udit system.

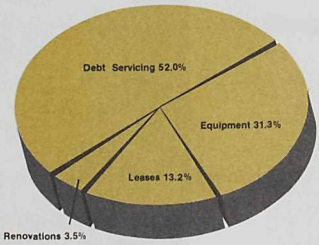
ost-Secondary Finance

The Post-Secondary Finance Branch, while a functional part of the epartment of Ministry Services , performs a staff role for the ost-Secondary Department in areas of accounting, budgeting nalysis and forecasting in relation to colleges and institutes in British olumbia.

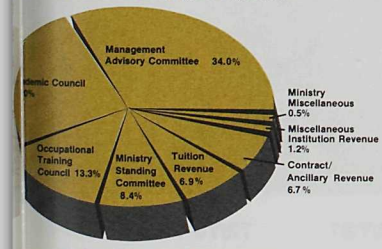
In the past academic year, the branch continued to play an fective role in the implementation of the Post-Secondary Activity lassification Structure (PACS), which is the budgetary system stablished following implementation of the *Colleges and Provincial nstitutes Act* of 1977 (now the *College and Institute Act).* In articular, assistance was given to the Management Advisory Council nd the Ministry Standing Committee which, together ith the Academic and Occupational Training ouncils, are responsible for making ecommendations on college and institute eviewing and budgets.

Administration of the capital financing of ost-secondary facilities continued, as did the anch's involvement in the cost-sharing rangements between the provincial and deral governments related to post-secondary ucation.

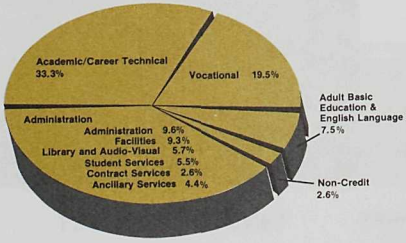
CAPITAL SUPPORT EXPENDITURES



ATING EXPENDITURES by Type of Expenditure



OPERATING EXPENDITURES by Major Source of Funding



urce: B.C. Ministry of Education

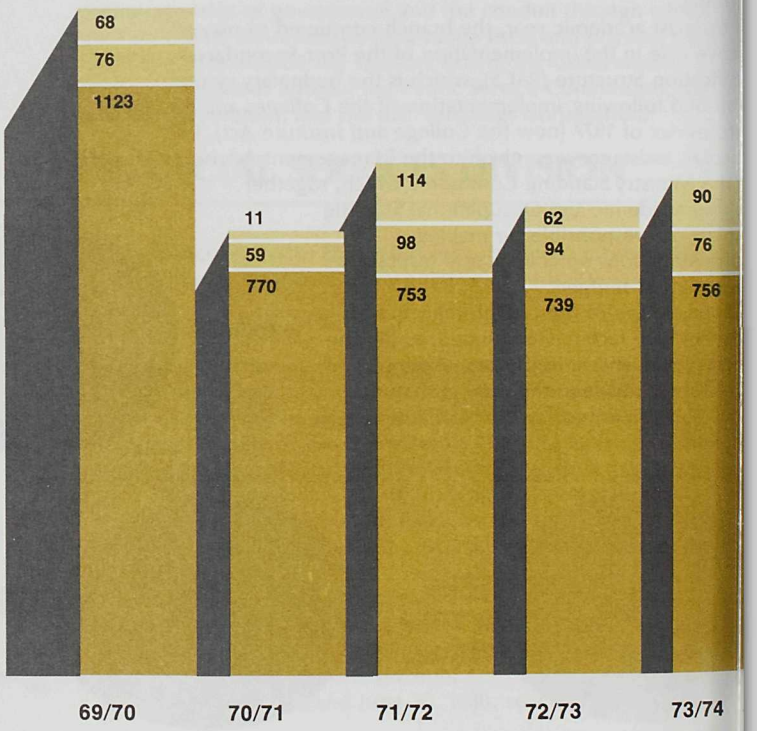
Ministerial Finance

The Ministerial Finance Branch is the service section of the division, responsible for internal finance, compilation of the annu estimates and development and maintenance of effective internal financial control systems and products.

The branch maintains liaison with various branches of the Minis of Finance, including the Comptroller-General's Office and Treasu Board Staff, regarding financial matters. In addition, the branch is responsible for liaison with the Auditor-General's Branch regardin expenditure audits on behalf of the ministry. The branch is responsible for ministerial accounts and, additionally, for monitori and maintaining records of all expenditures, transference of funds and other financial adjustments. It provides a monthly update of expenditures as compared to estimates for all responsibility centre managers who are responsible for budgets.

The Ministry of Education budget for 1979/80 was $1,120,957,317 more than 24 per cent of the entire provincial budget.

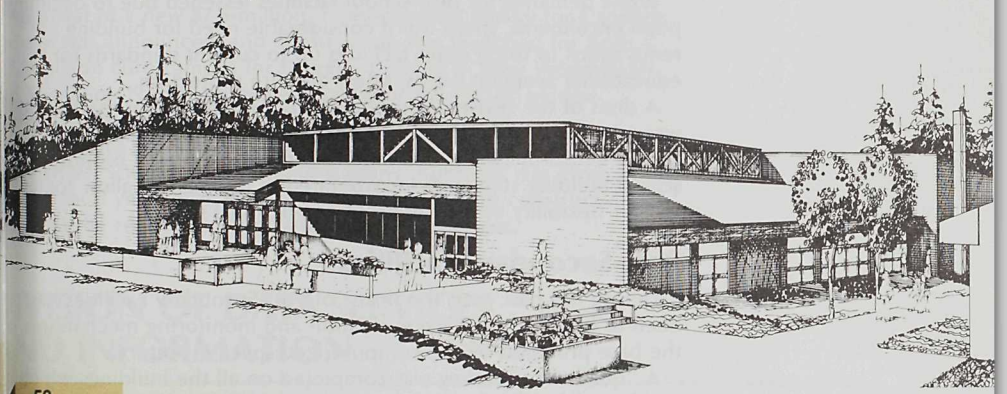
Public School Capital Expenditure Approvals



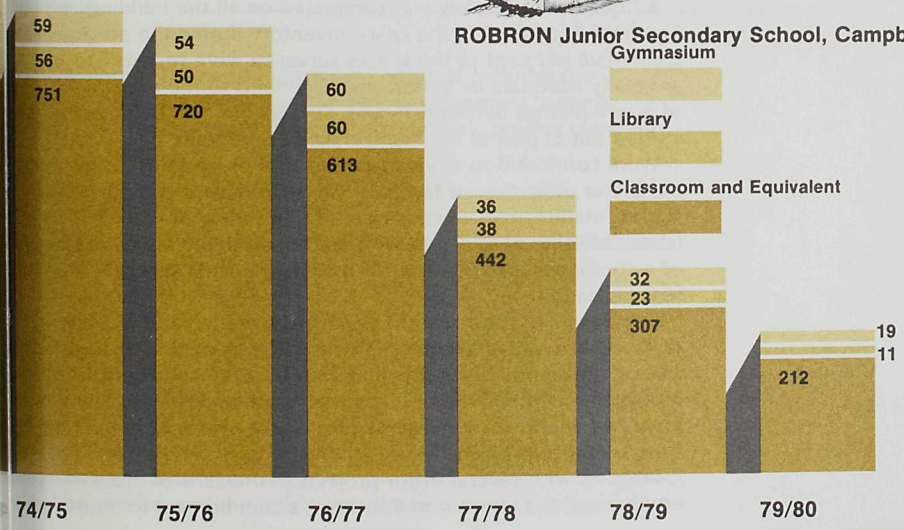
ACILITIES SERVICES DIVISION

The Facilities Services Division of the Ministry Services Department evelops and controls the capital projects required to provide dequate facilities in which to offer educational programs to British olumbians. The division separates naturally into two sections: hools and post-secondary institutions.

The schools section has six regional teams, each consisting of a)-ordinator and a technician who offer full capital projects service the school districts in their regions. The six teams are co-ordinated a project control manager to ensure that selection of building ograms is equitable and monitoring and control of capital projects consistent across the province. The colleges and universities ction has two project managers and an executive director to ovide direct and consistent contact with each institution; overall -ordination is provided by the executive director.



ROBRON Junior Secondary School, Campbell River



ce: B.C. Ministry of Education

Schools Facilities

The Division of Facilities Services — Schools continued the task o assisting school districts in the preparation and processing of capita budgets. Members of the division visited every school district in th province to provide consultation on site acquisition, school buildin standards, code requirements for safety and fire protection and oth facilities matters. The division approved 882 building projects durin the 1979/80 fiscal year.

Expenditures for the 1979/80 Fiscal Year

Sites	$ 8,840,
Buildings	72,928,
Equipment	7,820,
Other	9,454,
TOTAL	**$99,043,**

While demands for new school facilities lessened due to declinin pupil enrolments, there was a considerable need for building renovations to bring older facilities up to current standards for educational program needs, safety and fire protection.

A draft of the revised *School Building Manual* was prepared and was scheduled to be circulated throughout the province during the latter months of 1980 for comment from the field. The proposed ne school building standards incorporated in the manual allow for greater flexibility in the design of instructional spaces.

Post-Secondary Facilities

During the past year, the thrust of Post-Secondary Facilities has been to build other space evaluation and monitoring mechanisms the base provided by the computerized space inventory.

A "qualitative" survey was completed on all the buildings which had been identified in the space inventory during the previous yea Eighty-five per cent of the spaces surveyed were reported to be generally adequate or better. Improvements to the remainder, mos of it in buildings between 15 and 20 years old, will be progressively carried out as part of the capital facilities program.

Work continued to develop criteria and procedures for encourag ing better utilization of facilities. Guidelines were completed for student station areas in classrooms and a variety of workshops and laboratories. Sample data was collected to initiate the development of a computer-based system for monitoring and managing room an seat utilization.

Using a major construction project as a model, and working in collaboration with the institution and its construction management consultants, innovative procedures were developed for isolating an monitoring controllable cost factors separately from escalating cost increases due to continued inflation. These procedures will now be used on other projects.

Progress with several major projects in the 1979/80 academic yea emphasized the Ministry of Education's commitment to improved a

xpanded facilities at British Columbia's post-secondary institutions; pproval was given to twenty-seven projects totalling $77.8 million, gether with $5.0 million for renovations and public works on rvices and building systems.

East Kootenay Community College received approval for development of a $7.5-million core campus to be located on a 31-acre site in ranbrook. Northern Lights College was authorized to call tenders r a $1.25-million regional campus in Fort Nelson.

The British Columbia Institute of Technology was given approval r 47,000 square feet of assignable new space at its Burnaby campus, us renovations to existing facilities, at a total cost of $7.75 million.

ncouver Community College is to have a new 7.8-acre campus at nina Creek in Vancouver's east end, acquired for $5.15 million, and pproval was given for design of a $17-million facility of 190,000 uare feet there to replace the leased King Edward campus. New nstruction and major renovations over a three-year period at ncouver Vocational Institute was authorized at $13.5 million.

Approval of a new $7.5-million, multi-purpose facility for Capilano llege was announced, and construction was launched for both a 7.5-million core campus for Douglas College in New Westminster d $6-million North Vancouver facility for the Pacific Marine aining Institute.

The Facilities Services Division also serves the Ministry of iversities, Science and Communications. Approval was given in the 79/80 fiscal year for expenditure of $14 million on construction, gely in the renovation and public works categories.

IVISION OF DATA SERVICES ND INFORMATION

The Division of Data and Information Services includes the tivities of data operations, data project development, systems surance, statistical services, information services, project planning d control and the ministry library.

ata Services

The year was one of consolidation and laying the foundation for ntinuing improvements to the data services provided to the nistry and the education community at large.

The responsibilities of this part of the division involved three areas. stly, the division provided data and services essential to the nistry for the cost-effective planning, administration, research and nagement of the B.C. education enterprise. Secondly, the division ovided an interface with the B.C. Systems Corporation, outside ntractors such as the B.C. Research Council, other government and n-government data agencies, other provincial government educanal data services and the federal government on data matters

concerning education. The division also co-operated with Statistics Canada, both directly and indirectly through the B.C. Statistics Bureau, and the statistics committees of the Council of Ministers of Education, Canada. Also, as part of this responsibility, the division was involved in procuring and managing outside data services and making these services available to the ministry program areas.

Thirdly, the division was responsible for the custody and release of ministry data. During the year the division published the ministry's updated *Data Release Policy* document which explains how other jurisdictions, organizations and agencies may apply to the ministry for access to current and past educational data. Confidentiality undertakings are required, however, and these, together with the types of use permitted, are explained in the leaflet.

The installation of word processing machines and terminals connected to large computer systems allowed a significant increase in secretarial and clerical productivity. In addition, the use of computer terminals enabled the division staff to design and develop a number of new and innovative data services for ministry managers.

- **The Data Operations Section** collected extensive data from 1,600 schools, seventy-five school districts and more than 20 post-secondary institutions, verified the data, and stored it. Over 50,000 essential documents are collected each year, many of them complex. Many are stored on microfilm and computer tape. A computerized indexing system provides rapid access to records from as far back as 1946. Schedules for the return, processing and reporting of the information have been shortened. This faster turn-around of current data, together with the availability of extensive, detailed historical data increased the value of the information to ministry and field personnel.

- **The Project Development Section** of the division had the responsibility for determining and co-ordinating the data requirements of ministry program areas and other educational agencies and governmental levels, and improving data and information response capabilities and data bases.

Working closely with the B.C. Research Council and the B.C. Systems Corporation, the section established a number of innovative and valuable new data programs to improve accessibility. This enhanced research facility was important because the level of management information requests continued to increase, not only in frequency but also in complexity. The section ensured that requests were met in the most expeditious way possible, proposing and developing new systems or revisions to existing ones.

The development of a modern data base for use in research, planning, management and administration will reduce the number of forms used throughout the system, simplify the maintenance and reorganization of data and enable quick retrieval.

A study of the feasibility of machine-media data collection from the field was well underway. Under such a system, schools and colleges having data processing systems in place would meet the

inistry's data collection needs by direct transfer of computer ecords.

A new Systems Assurance function was implemented to provide uality control on ministry systems by making a number of nprovements to existing systems, many of which provided essential ata to operating divisions of the ministry. It also ensured that stems were developed in a way that minimized operational roblems for user managers and achieved maximum systems erformance.

The Statistical Services Section was designed to provide analysis of ducational and related data. Requests required the integration of fferent sets of data from various services. For example, work started n an analysis of public school dropouts which required analysis of ata on attendance, school organization, teachers, enrolment and nancial information. Special studies included teacher demand and pply forecasts and public school enrolment forecasting.
Statistical Services maintained liaison with committees of the ouncil of Ministers of Education, Canada on the development of ter-provincial information on school operating costs and pupil-acher ratios. There was a close liaison with the Central Statistics ureau of the Ministry of Economic Development which resulted in e production of a joint report on school district enrolment and ipil migration.

roject Planning Centre

The prime function of the Project Planning Centre is to offer oject management expertise, tools and techniques for planning d controlling computerized and non-computerized projects to sure that a project is developed on time, according to a clear plan, d to meet specific objectives.
Originally operated by JEM Research at the University of Victoria, e planning centre was internalized and became a regular staff nction of the ministry in late 1979.
At any time, between twenty and thirty major projects are being naged by the centre. Projects monitored during the past year cluded: CHOICES — Student Guidance in B.C., Career Preparation, structional Use of Microcomputers, Schools Facilities Inventory, lleges and Institutes Budget Data Support System, Ministry nancial Management System, Delegation of Authority, BCUC plication Study, OTC Requirement Analysis, Colleges and Insti-es Financial Systems Study, Northern Colleges Computer Needs sessment, Okanagan College Computing Needs Assessment and clining Enrolments Management Manual.
The direction of each project is determined by a project review mmittee; over 20 such committees operate concurrently. Repres-tation on these committees has been very wide, including people m school districts, colleges and institutes, officials of the Ministry Education and other provincial and federal government depart-nts, post-secondary councils and the B.C. Systems Corporation.

The project planning office also prepared discussion papers and project reports, facilitated the preparation of contracts for consultants and served as an information centre on project progress.

Information Services

The Information Services Branch in 1979/80 became part of the new Division of Data and Information Services. Three information officers were each given responsibility for a department of the ministry.

Emphasis during the year was placed on spending more time in the field and using the monthly newspaper *Education Today* not only to promulgate information about ministry programs and concerns but also to serve as a medium for the exchange of educational ideas. The newspaper, as well as the ministry's expanded annual report for 1978/79 and the staff newsletter, *Bonus,* won awards of distinction in educational publications in a U.S. competition.

Other Information Services activities included development of a series of glossy brochures outlining major ministry program areas. At the 1979 Pacific National Exhibition and other events, an exhibit was developed to convey the concept of learning as a life-long pursuit. As a result of this experience, it was recommended that the branch further expand its PNE activity for 1980 and encourage a broad representation from B.C. post-secondary institutions.

The branch also continued in 1979/80 to extend its editorial, graphic and advisory services to other sections of the ministry. Several special brochures and new report formats resulted, including a standard letterhead design for ministry circulars and bulletins. Also thirteen discussion papers were published and seventy-three news releases produced during the year, including eight releases for the new Ministry of Universities, Science and Communications.

Ministry Library

In the past year the library used the University of Toronto Library Automation Service catalogue support system to produce a computer output microfiche (COM) catalogue. Conversion of all records to machine-readable form was scheduled for completion by September 1980, with copies of the microfiche catalogues available at various locations soon after.

Microfilming of the archive collection of ministry circulars and curriculum guides also proceeded in co-operation with the Central Microfilm Service.

With such tools, and membership in the B.C . Union Catalogue, the library contributed to the resource-sharing network of the province. Additionally, research and support services to ministry managers increased during 1979/80.

)IVISION OF POLICY DEVELOPMENT

The Division of Policy Development evaluates existing policies for 'fectiveness, assesses the needs which must be met, carries out ›search into the feasibility of proposed policies, and undertakes lot projects to test the validity of particular policies.

Several initiatives taken this past year were closely linked. Studies ' students who leave school without graduating are continuous and e effects of local and provincial policies on the numbers involved e closely observed. Four other areas are allied to this study. A task rce report on counselling at the secondary levels was made to the inistry and has been distributed widely. A pilot study in the use of computerized career search tool, CHOICES, was undertaken in ›-operation with the Occupational Training Council. Terminals were aced in ten school districts and two colleges. As a result of the pilot, e decision was made to make CHOICES available to all secondary hools and post-secondary institutions in the province.

A study was begun into the kinds of information specific to B.C. ıich should be included in the CHOICES program. The following ıds of information have been identified and are being collected: ·mand for people in each major industry in B.C., pay ranges, ticipated technical advances, kinds of training needed and places ıere this training may be obtained.

The decision was made at the end of a pilot project in career eparation programs to extend the option to all school districts and provide supplementary resources to those districts which set up ›grams of this kind.

These initiatives were directed toward providing better, earlier and sier career counselling which is specific to the B.C. situation, and provide opportunities during the last two years of schooling to ›pare students for the years following grade 12.

The Traffic Safety Program, begun in the United Nations Interna- nal Year of the Child, was continued in co-operation with the nistry of Health, and work has begun on a new policy for the ›vision of a basic schools health service.

'he division co-operated with the Special Services Branch in the velopment of a policy for the placement and funding of severely ndicapped children. Liaison was maintained with the Ministry of lalth in the development of materials to be used from grades 4 to 'to show the danger of using drugs. Liaison also continued with the nistry of Highways, the Insurance Corporation of British Columbia d the Ministry of the Attorney General in the Counter Attack ıools Program which is aimed at drinking and driving among nagers.

'he year's activities also included numerous research projects in sh areas as provincial sports and fitness programs, cross-grade minations, the provision of medication in schools, family life ›grams, student exchange programs and outdoor education.

SPECIAL REPORTS

ADVANCING WITH TECHNOLOGY IN EDUCATION

With the advent of the 1980s, British Columbia's education system led by the Ministry of Education, took firm hold of the challenge an opportunity presented by increasingly sophisticated computer and communications technology.

Management information systems such as PACS (Post-Secondary Activity Classification Structure) have received developmental emphasis over the past several years, with PACS becoming fully operational in 1979/80. A Project Planning Centre was established within ministry headquarers in late 1979, and development progressed on a computer acquisition policy for B.C. school districts.

In March the Ministry of Education sponsored a well-attended conference on the instructional use of microcomputers. There it wa announced that an experiment on this teacher-support technology would begin in the fall of 1980 though a pilot project in which 100 units would be placed in B.C. schools at a purchase cost of approximately $330,000.

Deputy Minister Dr. Walter Hardwick told the conference, crowded with interested teachers, that "microcomputers are a new technology which may have major implications for the learning process at (B.C.) schools, colleges and universities . . ." He stressed the importance of developing the necessary educational programs, suitable to British Columbia, for use with classroom microcomputer

It was announced that the 100 microcomputers would be purchased through the B.C. Systems Corporation for placement under ministry direction in schools of various sizes in both urban ar rural areas. They would be used for computer literacy, computer science and remedial instruction, and to augment regular classroom teaching.

Another technological development was CHOICES, a computer-based career counselling system which matches the aptitudes and ambitions of individual students with one or more of 1,114 primary occupations and 3,000 related jobs which are listed in a central computer. (These represent ninety-five per cent of those employed in Canada.) Examination of CHOICES began in 1977 and by the end of the 1979/80 academic year, following a successful pilot project managed by the Occupational Training Council, the Ministry of Education neared final approval of a program which will offer CHOICES terminals to all B.C. secondary schools and colleges. As in the Lower Mainland pilot project, these terminals would be linked a B.C. Systems computer in Victoria.

For a number of years the B.C. Ministry of Education has been dvancing the concept of employing interactive television broadcast-ig by satellite to overcome the barriers of distance and isolation to ducation in this large and mountainous province. In a two-month xperiment in 1977, video and audio signals were relayed by anada's Hermes satellite to receiving dishes at a logging camp and our colleges in widely separated parts of the province, and audio gnals were returned to the Provincial Educational Media Centre udio in Burnaby.

British Columbia extended its leadership in this field in 1979/80 rough a year-long program of regular interactive instruction via the ewer Anik B satellite from the British Columbia Institute of echnology to six colleges in northern and eastern B.C. and, as well, e Yukon Vocational and Technical Training Centre and the niversity of Victoria. Students were thus able to receive lectures and participate in class discussion almost as though they were in a CIT seminar room in Burnaby.

Then in June, 1980, building further on this pioneering work of the linistry of Education, the B.C. government announced establishment the Knowledge Network of the West Communications Authority NOW) to co-ordinate distance education programs of universities, lleges, provincial institutes and school districts and to manage a ew telecommunications delivery system.

KNOW would not produce its own programming, it was stated, but ould assist other institutions in the development and distribution of eir education materials. The Knowledge Network would have three ements:

a closed-circuit cable and micro-wave system connecting the three universities, BCIT, the Open Learning Institute, the Robson Square Law Courts and the Vancouver teaching hospitals;

a closed-circuit, low-power transmission and satellite link to off-campus, interior and northern locations;

public access to an educational channel on community cable systems wherever located around the province.

Thus, as the 1979/80 academic year came to a close, CHOICES, NOW and classroom microcomputers were being entered below e B.C. Union Catalogue (a computerized file of all books in B.C. iversity, college and public libraries) and other major innovations previous years on the list of Ministry of Education advances in the ilization of computers and high-technology communications.

CHILDREN'S ART OF BRITISH COLUMBIA

Creative activity is a crucial factor of human experience, the mea of self-revelation, the basis of empathy with others. Art teaching forms the foundation of visual literacy. Perception of the world around is dominated by the eye, and the eye is also the window on the inner worlds of imagination, feeling and expression.

These catalogue reflections helped introduce the British Columbi Exhibition of Children's Art which toured thirteen centres across th province for ten months from September, 1979. Organized by the Emily Carr College of Art Outreach Program and supported by the Ministry of Education, the exhibition assembled 192 outstanding paintings, prints and drawings created by students and children fro age two to eighteen years in seventy-seven B.C. communities. They were selected from more than 5,200 submissions from students in public and independent schools and the Ministry of Education correspondence program, as well as others.

"We look for those personal qualities which transcend style, whic have something to say, something to reveal of the child's response to life and the physical world, as well as the imaginative inner life o the child," the ECCA Dean of Instruction, Tom Hudson, said in his catalogue notes. The sampling on these pages (mostly from original in colour) concentrates thematically on students' perception of the people that affect their lives.

Source: September 1979 Form J.

N = Number of teachers from that jurisdiction who hold the type of certificate shown expressed as a percentage of:

A = Percentage of teachers from that jurisdiction holding all types of certificates.

B = Percentage of teachers from all jurisdictions holding that type of certificate.

C = Percentage of teachers from all jurisdictions holding all types of certificates.

[1] Including Professional Advanced, Professional Basic and Professional C certificates.

[2] Including Elementary A certificates.

[3] Including Elementary B certificates.

Note: Calculation of F.T.E. pupils — each Grade I through XII pupil is counted as 1.0; each Kindergarten pupil is counted as 0.5.

Calculation of F.T.E. teachers — part-time as well as full-time teachers are counted. Each part-time teacher is counted according to the appropriate decimal fraction of full-time (i.e., a half-time teacher is counted as 0.5). All district-wide (i.e., directors of instruction, supervisors, teacher consultants, coordinators, district librarians, district counsellors, relieving teachers, etc.) as well as school-attached teachers (i.e., principals, vice-principals, department heads, librarians, counsellors, regular classroom teachers, etc.) are counted.

[1] Average daily attendance as a percentage of FTE net enrolment. Since 1968/69, percentage of attendance is total actual attendance as a percentage of total possible attendance.
[2] The total expenditure for public schools was borne by the Government.
[3] Excluding unknown expenditure made for incidental expenses in city school districts.
[4] Since 1922/23 this amount includes the annual grant from the Government to the provincial universities and since 1963/64 to school district and regional colleges.
[5] Since 1955/56 this amount is exclusive of capital expenditures from by-law funds.
[6] The numbers of teachers reported from 1966/67 on include district-wide teachers with supervisory and administrative duties. These district-wide teachers were excluded from this table prior to 1966/67.
[7] Since 1973/74 the number of teachers is reported as of September 30 rather than June 30.

TABLE 3.2

EXPENDITURE FOR EDUCATION
CALENDAR YEAR 1979
(EXCLUSIVE OF CAPITAL EXPENDITURE FOR BY-LAW FUNDS)

Total Expenditure by school districts (including Colleges)			$1,161,912,446
Total Expenditure by *Ministry of Education*			1,153,436,650
			$2,315,349,096
Less:	Grants to school districts in school district expenditures	$421,683,858	
	Grants to reduce local taxation included in Ministry expenditures	203,730,621	
	Total Government grants to school districts		625,414,479
	Grand total expenditure		$1,689,934,617

TABLE 3.3

COST PER PUPIL — CALENDAR YEAR 1979

Grand total cost of education			$1,689,934,617
Deduct:	School district expenditures not affecting pupil cost:		
	Colleges	$ 19,379,140	
	Non-operating expenses	24,680,494	
	Debt services	107,329,518	
	Non-shareable capital	7,686,483	
	Total school district reduction	$159,075,635	
	Ministry of Education expenditures for post-secondary and adult education, correspondence courses, technical and vocational training, grants to independent schools, student aid programs, Jericho Hill school, etc.	448,666,657	$ 607,742,292
	Total operating costs		$1,082,192,325
	Operating cost per pupil based on average daily attendance of 477,169.4		$ 2267.94

INDEPENDENT SCHOOLS

TABLE 5.1 GENERAL INFORMATION, 1979-80

1. PUPILS
   Number of qualifying pupils
   (group 1 and 2 schools) 18,251

2. TEACHERS
   Number of teachers
   (group 2 schools) 1,350

3. FINANCE
   Percentage of average operating costs of the school district in which the independent school is located applicable to grant.

Group 1 schools	9 percent
Group 2 schools	30 percent

4. SCHOOLS
   Number of schools receiving grants 109

   Classification of group 1 and 2 schools

Elementary (K-VII)	75
Elementary-junior secondary (K-X)	7
Elementary-senior secondary (K-XII)	11
Junior secondary (VIII-X)	2
Secondary (VIII-XII)	14

Source: Colleges and Institutes; Academic/Technical areas: College Statistical Reports. Data reported as at October 31. Colleges and Institutes, Vocational area: TV-27 and TV-27A Data reported monthly.

Note: [1] Data for the Academic/Technical areas represent snapshot data (enrolments reported for one day during the year), while vocational data represent the total number of students enrolled at any time during the year.

[2] Indicates a preliminary or estimated figure.

[3] These figures do not include part-time vocational enrolments, which are not available.
