THE CRESTON REVIEW

VOL. XVII. CRESTON, B. C., FRIDAY, JANUARY 15, 1926 No. 48

Lister

Wilfrid Langston, who has been working at Kellogg, Idaho for almost the past seven months, arrived home on Sunday, and will be remaining for a few weeks holidays.

Mrs. John Johnston of Spokane was a visitor here during the New Years' holiday, a guest of Mrs. Geo. Jacks. She spent a couple of weeks at Creston, returning at the end of last week.

Russell House of the Huscroft area, who was very severely burned when a gasoline can exploded at wood cutting operations early in the year, is making a very satisfactory recovery.

A radio has just been installed in the home of Mrs. Ed. Smith and is working splendidly. It is a three tube Crosley and gets all the Pacific coast broadcasts as well as some of the prairie cities.

Alf. Latoille, who has been working at Kimberley for some months, arrived at the end of the week, and will be making an extended stay at his ranch here.

The Boy Scouts are having 100 per cent. attendances at the regular Friday night sessions under Principal Jenks, and are rapidly getting into shape for an official inspection by Capt. Hicks of Cranbrook, the scout commissioner for East Kootenay.

At the United Church service on Sunday afternoon Pastor Harback announced the reopening of the Sunday school for the 17th, at 2 p.m. He will have three lady teachers, and the hour is set to permit him taking charge with the opening preceding the regular church service.

The settlers had a conference at the home of Col. Lister on the evening of January 4th, at which matters in connection with the promised reappraisal of Lister lands and a revision of the the terms of sale were discussed. Several points were agreed upon, one of which was the request for the Land Settlement Board to provide a domestic supply of water. A non-resident returned man of long residence in the Valley has been named to act for Lister men on the board of arbitrators that it is expected will be appointed.

Sirdar

Mrs. Goodman of Cranbrook has been here for a few days' visit with her daughter, Mrs. Proctor, who returned to Cranbrook with her on Friday.

Mrs. Martin was a Creston visitor on Friday, and Mrs. Rogers and Mrs. Dennes were at the metropolis on Saturday.

Will Goodman is at Cranbrook for a weeks' holidays, leaving here early last week.

Sid McCabe, B & B foreman, with B. Brawn of the same crew, were home for the weekend with their families here. The crew is at work near Kitchener at present.

Yard Foreman George Cam is off work at present on account of sickness, and Roy Proctor has charge of the switch crew. Working with him are Dave Dow and W. Bradley of Cranbrook.

The snow flanger made its first run of the season from Cranbrook here on Friday, being attached to No. 67.

Enginner Wm. Neil of the yard crew is away on a couple of weeks' vacation is a visitor at Cranbrook and points east. Engineer R. Bartholmew of Cranbrook has Neil's place at present.

Gus Oman of Kootenay Landing has returned after spending the Christmas-New Year holidays with friends at Fernie.

Rev. H. Varley will be here for Church of England service on Sunday evening, and it will probably be his last service as, we understand, his successor has been named for Creston and Mr. Varley will be leaving for his new work at Surrey.

Erickson

Miss E. Brownrigg of Yahk was a visitor here for a few days last week with Mr. and Mrs. H. Brownrigg.

Another radio has been added to the array at Erickson, a Radiola having just been installed in the residence of Ray Crisler.

Mr. and Mrs. M. R. Palmer returned at the end of the week from Spokane, where the former has been very successfully treated for his eyes, his new glasses enabling him to read and write quite handily.

The East Creston Water Users Association had their annual meeting at the Geo. Hobden home on Monday night when the year's business was wound up and the executive of three elected as follows: P. R. Truscott, chairman; Jas. Adlard, secretary; Harold Gobbett.

The Whirlwind Club has the first of its 1926 whists and dances at the R. J. Long packing shed on Friday night, 15th, with cards due to start at 8 o'clock. The girls are looking for a big turnout as the card playing fraternity is turning out in large numbers with each succeeding at home.

The Putnam, Palmer & Staples sawmill beyond Arrow Creek commenced sawing on Monday morning. The sleighing is not too bad on their downhill haul. Two of the firm's bridges across the Goat went out in the ice flow that followed the ease up in the cold snap at the middle of last week.

Erickson is getting wide spread publicity in C.P.R. literature this month due to the fact that the Erickson station garden has been awarded the grand prize for the best station flower garden in all British Columbia, carrying with it quite worth while cash prize. Agent T. W. Bundy is deserving of more than ordinary commendation for bringing home the premier honors for the whole province—with a quarter acre of land that early in 1924 was a mass of underbrush and stumps. It will be recalled that in 1924 Mr. Bundy won first prize for the best first-year garden in the province.

Morgan Long Dead

Morgan B. Long, residing at Napa wine, and having gone to Tacoma on business on December 21st, was taken suddenly ill with a paralytic stroke on December 22nd, was removed to the Tacoma General Hospital, and after four days' illness died on Saturday, December 26th.

Mr. Long was 77 years of age. He was born in Green County, Pennsylvania, November 20th, 1848, and went with his parents to Mashaska county, Iowa, in 1852, overland, being among the pioneer settlers of that county.

Mr. Long was engaged in cattle buying and selling, travelling extensively, making many friends. In 1882 he came to Canada and lived in Calgary and Macleod, then finally settled in Pincher Creek, and married Miss Jeannette Joan Long of Scotland in 1889. They resided here until 1915, then with their one son moved to Creston, B.C., thence to Oakville, Wash., in 1921, thence to Montesano in 1922, and again to Napaville in 1925, residing the last five years with his son, Trenny J. Long, operator on the Northern Pacific Railway. Deceased leaves, besides his wife and son, a sister in Denver, Colorado. The late Mr. Long was buried beside his brother, John, at Elma, Wash.—Pincher Creek Echo.

Institute Elects New Directorate

Creston and District Women's Institute on Friday afternoon combined the pleasure of listening to a timely talk on potato culture by Jos. Heath of the Dominion Experimental Farm at Invermere, with the business of electing officers for 1926, and winding up the business of 1925. There was a fine turnout of members, and the chair was occupied by Mrs. M. J. Boyd, the retiring president.

Mr. Heath's talk had to do with the production of seed potatoes, which is part of his work at the farm, and at which he has achieved at least province wide fame due to his success at the annual B.C. Potato Shows. He very strongly advocated the production of spuds from certified seed. Bigger yields would be harvested, and potatoes of known freedom from disease were always in demand at good prices. From his quite long residence in the Creston Valley Mr. Heath advised the planting of the Walter Raleigh variety locally, giving some practical pointers on planting and cultivation. The Institute was so impressed by his talk that the meeting decided to purchase couple of sack of certified seed to be sold in small quantities. At the close of his address he was accorded an enthusiastic vote of thanks.

The treasurer's statement showed that the Institute for 1925 has operated on the policy that their funds were for community work and had invested their intake almost as fast as it accumulated in various lines of endeavor, closing the year with a balance of about $180—the amount realizen on the sale of their Barton Avenue lot in December.

Mrs. Hayes and Mrs. Henderson were scrutineers for the election of directors which resulted in the choice—out of a field of seven—of Mrs. Robt. Stevens, Mrs. Geo. Young, Mrs. Jas. Cherrington, Mrs. F. C. Rodgers, and Miss Scrimgeour, with the former three, at a later gathering, chosen to act as president, vice-president and secretary respectively.

The meeting passed a very hearty vote of thanks to the retiring president Mrs. Boyd, and Mrs. R. B. Staples; Mrs. Hayes and Mrs. M. Young, the 1923 directors, who declined to stand for another term. There was the usual tea at the close with Mrs. W. H. Crawford, Miss Scrimgeour and Mrs. Geo. Young as hostesses.

An outline of the year's work may be gleaned from the secretary's report, presented by Mrs. Cherrington, and which is as follows: The membership for 1925 was 44. Eleven general monthly meetings were held during the year. The attendance at these meetings was as follows: January 17, February 21, March 22, April 16, May 25, June 15, July 14, September 7, October 24, November 20, December 24, and the average attendance working out at 19.

Money raised during the year was $324.90. With the sale of the Institute lot on Barton Avenue the revenue is raised to $404.90. This with the $102.02 carried forward from 1924 made a total of $526.02. Here are the details:

RECEIPTS

Cash on hand from 1924	$102.02
Members' fees	20.00
Flower shows	100.95
Entertainments	35.00
Miscellaneous	35.30
Sales—Cooking, flowers, cook books and sundries	47.55
Sale of W.I. lot	180.00
	$526.02

EXPENDITURE

Hall rents, delegates' expenses, prize money	$117.20
Postage and advertising	17.12
Crippled children	37.15
Donations and secretary's salary	120.00
Merchandise, flowers, etc.	51.10
	$342.48

The Institute held both a bulb show and flower show. The former was in April when flowering bulbs were at their best. An afternoon tea and cooking stall were operated with the proceeds of these, along with the sale of the flowers, were added to the funds. The flower show was held near the end of June. This was very successful, notwithstanding the fact that the Institute had to finance it without help from the department of agriculture. Friends of the Institute contributed generously of money to be used as prizes. In the early part of the year the Institute put on a banquet for the local board of trade and served same, and from all accounts the men were well pleased with the way the women handled it.

The fall fair was helped by the Institute, not only by money donated, but by members placing and looking after the women's display generally. The Institute donated $10 for prizes to the children taking part in the fancy dress parade in connection with the 1925 Chautauqua.

The public school library was given a contribution of money. So also was the public library. $10 was sent to the matron of the Children's Aid Home in Vancouver for her to buy shoes for the Dishman children, whom were taken there from Creston. On her return from taking the children Mrs. McLaren gave a very interesting account of her visit there.

Dr. Lamb, travelling medical health officer of the province, addressed an open meeting held under the Institute auspices, on tubercular problems of the day. Mrs. Lashley Hall gave an address on "New Terms in Psychology." Principal McLellan of the public school, spoke at one of the monthly meetings, urging co operation between parents and teachers, and the placing of good reading matter before the children of school age.

The late Mrs. Lyne gave several reports on immigration, of which committee she was convenor. So also has Mrs. R. B. Staples on behalf of the committee on local neighborhood needs, as well as Mrs. Stevens for the committee on better schools. Much good was derived from these reports and work done along the different lines. The First Aid cabinets placed in the schools by the Institute were replenished with gauze, antiseptics, etc. Some garments brought in some time ago for the Near East appeal were distributed locally.

A resolution was drafted protesting against a license being granted for a beer parlor at Creston. This was placed before the members and passed and copies sent to the attorney general and the chairman of the Liquor Control Board.

There was a birthday party early in October, being the tenth anniversary of founding the Institute in Creston. Each member invited a male guest. The evening was spent playing court whist. Music and refreshments were features, with a short dance at the close. This was a very enjoyable evening. The Institute had two afternoon at homes; one in honor of Mrs. C. G. Bennett, who had gone to Fernie to reside, and the other in honor of our late president, the late Mrs. H. Lyne, who since her departure to Esquimalt has since passed to the great beyond.

From month to month the Crippled Children's Fund has received the tea money to help this wonderful work, and the members favored the words, Women's Institute, being included in the official title of the work which is now designated Women's Hospital Association for Crippled Children. We had a delegate to the provincial conference at Victoria, and the representative, Mrs. Cherrington, reported fully on all items of interest on her return. Mrs. Geo. Young was the delegate to the district conference in Nelson, and gave an interesting account of the work done there.

Armistice Day evening a whist drive was held. The proceeds going into the Institute treasury. The old lumber from the wrecked library building was sold for a small amount. The Institute lot has been sold for $180. Mrs. M. Young demonstrated how to strike slips, and explained how to take care of plants and bulbs during the winter. Flowers were sent to sick members, as well as letters to members who had sorrow.

The hostesses each month—usually three—provide a short entertainment as well as afternoon tea. This part of the gathering was always enjoyed and the directors with the co operation of the members have made a creditable showing, and the year's work has been very pleasant. Let me close my report by wishing the institute every success, and may it live up to its great possibilities and opportunities.

Kitchener

C. Bush and E. Blair were business visitors in Fernie on Thursday, returning the following day.

Miss Rita Strong of Canyon was at Kitchener last week with Mrs. Swanson, returning on Saturday.

Miss Louise Bevan, teacher of Division 2, spent the weekend with her parents at Creston, getting back on Sunday.

E. W. Thomas was a visitor at Creston on Thursday last.

Mrs. B. Johnson and little Robert went to Cranbrook on Thursday for a few days' stay, getting back on Sunday.

Miss Myrtle Strong was a weekend visitor with her grandparents at Canyon at the weekend.

Mrs. O. Myrene and Elmer Cavanaugh, who have been visitors with Mrs. B. Johnson, returned to their home at Kimberley on Thursday.

G. Burns went to Cranbrook on Tuesday, visiting his wife who is a hospital patient in that city, and getting home on Thursday.

A few of the business people of Kitchener are busy putting up the ice supply. Some of them are also stocking up with firewood for the summer.

Snow has arrived at last and now it is here Kitchener has less unemployed.

Alex. Mennie, who has been working at Kitchener for some time, left on Sunday for Gold Creek.

Mr. Webster has been in town, leaving on Thursday.

N. Salone, who has been working at Strong's camp, returned on Friday from Cranbrook.

Ed. Renstrom and Rex Millar of Strong's camp, attended the dance here on Saturday.

Miss Marguerite Benney Creston has been a visitor with Miss Mary Haptonstall, leaving for home on Monday.

Mrs. H. Walby and Messrs. Alex. Mennie, Elmo Walby and Robert Maxwell motored to Canyon on Friday night for the bachelors' dance in the schoolhouse in that town.

A dance was staged in Hunt's Hall on Saturday at which the best of good times is reported. The music was by Mr. Bush, violin, and Alex. Mennie, piano.

Pastor Harback had the usual good turnout at the service in the schoolhouse on Monday evening.

The Political Situation

The result of the general Dominion elections held on October 29 is not a good thing for Canada. It creates a new House of Commons in which one political group commands a majority and consequently a situation is brought about where it is impossible to have a strong Government able to carry its policies into effect and give the country effective and efficient administration.

A majority of the constituencies rejected the policies of the King Government, but, while disapproval of the Government and its policies was thus recorded, neither did a majority of the constituencies express approval and extend support to the leadership and policies of the Conservative Opposition. In an even more emphatic way the country as a whole rejected the Progressive Party.

A condition of "stalemate," a deadlock, ensues, which apparently it will require another appeal to the electorate to break. In other words, for the time being at least, there must be a "marking of time," a period of drifting, which is an extremely bad thing for any country, and especially so for a young country like Canada with a number of serious national problems demanding vigorous and constructive action.

Comment by "the man in the street" is, of course, largely colored by his party affiliations but all too frequently an amazing ignorance of the constitutional position of affairs is disclosed. Without in any way touching on the party aspect of the situation, it may be well to clearly state the constitutional position.

If the Government of the day is clearly defeated in a general election, the practice both in Great Britain and in Canada is for that Government to immediately resign, and for the Premier to advise the Governor-General to call on the leader of the victorious Opposition party to form a new Government. But a defeated Government is not obliged to take this action; it can continue in office and meet Parliament and is not obliged to resign until it suffers defeat in the House of Commons. That is to say, the tenure of office by any Government rests with the House of Commons.

But, if following a decisive defeat in a general election, the Government did not resign the Governor-General can take cognizance of that defeat and take responsibility for dismissing his Ministers and calling upon the Leader of the Opposition to form a new Administration. In this event the new Ministry must obtain a vote of confidence from Parliament otherwise the usefulness of the Governor-General is past.

However, in the election last month, while the Government failed to secure a majority, so, too, did the Opposition. Consequently the Government would be justified in continuing in office and asking Parliament for a vote of confidence, relying on a combination of Liberals and Progressives to reach such a vote. If, on the other hand, the Government resigns and Mr. Meighen is asked to form a Government, it is quite evident he could not command a majority in the House of Commons as at present constituted, and another election would become immediately imperative.

Mr. King is, however, confronted with a second problem. If he decides to await a verdict from Parliament, he must in view of his personal defeat and the defeat of one-half of his ministers, reconstruct his cabinet. This involves a series of by-elections. In the present indecisive state of public opinion it is doubtful if these ministers could be elected.

Furthermore, for the King Government to continue in office any length of time under present conditions would be to perpetuate the unsatisfactory situation in the House of Commons and Government which Mr. King himself in advising dissolution of Parliament, urged as one outstanding reason why an election at this time was necessary, namely, to provide a Government with a clear mandate and a working majority. Mr. King further announced that if the election did not result in providing such a clear working majority he would again appeal to the country.

Disturbing and expensive though it would be, the logic of the situation points to another election without loss of time. Whether Mr. King remains in office, re-constructs his cabinet, and calls that election, or whether he resigns and Mr. Meighen forms a cabinet and then goes to the country, is a matter for Mr. King tand his advisers to decide, and possibly before this article is published a decision will have been made. But as in any event it is quite evident that the holding of another election cannot long be deferred—and in the interests of strong, stable government in Canada should not be deferred—then the sooner it is held and the whole situation clarified, the better for Canada.

Settlers From Sunny Italy

It is reported that banking interests in Northern Italy are negotiating for the purchase of forty thousand acres of farm land in Manitoba, on which it is planned to settle five hundred families of Italian agriculturists. If the deal is promulgated, it is planned to bring the vanguard of settlers next spring.

Manitoba Dairy Industry

The growth of the dairy industry in Manitoba is well illustrated by a comparison of the figures of production in 1900 and 1924. In 1900, the total value of dairy products produced in Manitoba was $1,681,305. Last year it was $13,093,902. In 1924, 198 carloads of creamery butter were exported from Manitoba totalling 4,435,200 pounds.

CHILDREN CRY FOR

To avoid imitations, always look for the signature of Chas. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

British Settlers Do Well

Favorable Report Given in London Regarding Settlers in the West

The position of British agricultural workers in Canada was raised at a meeting of the British Passenger Agents' Association held in London, especially the question of whether British harvesters in Canada were stranded at the end of the season.

Secretary Wright, of the Passenger Agents' Association, who was with a party that recently toured Canada, asserted that sometimes the farm hands would not remain at work at the conclusion of the harvest in Western Canada when they could do so, but instead of this they spent their money and got into financial difficulties. He was satisfied, he said, that there was enough work there to keep the people employed all the year.

The report of the delegation that had made the tour in the Dominion gave a favorable account of the position of the settlers in the west who had emigrated from Great Britain under the Canadian Government's colonization scheme ultimately to settle 3,000 families on the land. The conditions in connection with these settlers showed improvement this year compared with the conditions a year or two ago, the report stated, and there was every reason for optimism with regard to the scheme.

WHY RHEUMATISM OFTEN COMES BACK

The Usual Treatment Does Not Reach the Root of the Trouble

Most treatments for rheumatism do no more than aim to keep down the poison in the blood and enable nature to overcome that particular attack. Then when the system becomes run-down from any cause the disease again gets the upper hand and it all has to be done over.

Sufferers from rheumatism who have found their condition unrelieved or actually growing worse while using other remedies, would do well to try Dr. Williams' Pink Pills. The tonic treatment with this medicine has proved in thousands of cases that it builds up the blood to a point that enables it to cast out the rheumatic poisons through the regular channels, the bowels, kidneys and the skin. When this is done rheumatism is banished, and as long as the blood is kept pure and rich the patient will be immune from attack. This is fully proved by the case of Mr. Samuel Zinck, Upper Blandford, N.S., who says:—"For a long time I was a great sufferer from rheumatism which settled in my hip and down by leg to the knee. At times the pain was so great that I could not walk. I tried liniments and medicines but without getting more than mere temporary relief. Then one day a friend called who said that he had been afflicted with this trouble which was banished by Dr. Williams' Pink Pills, and urged me to try them. I did as advised and after using a few boxes there was no doubt they were helping me. Not only was the rheumatism disappearing, but my general health was improving. I continued the pills until I had taken about a dozen boxes when every trace of the trouble had disappeared, and I have not felt a twinge of it since. I may add that my wife used these pills for a run-down condition with equally good results."

You can get these pills from any medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canadians Win At Fruit Show

Awarded Several Prizes At Exhibition In London, England

For the third year in succession, Canada has won premier honors in the British Empire section of the imperial fruit show at London, England. First, second and third prizes for dessert apples went to the Associated Growers of British Columbia, Limited, Vernon, B.C., with Jonathan, McIntosh and Winesap apples.

The Ontario Fruit Growers' Association took first prize in cooking apples with Greenings; second and third going to the Associated Growers of British Columbia, Limited.

One first prize in the overseas section was won by the Associated Growers of British Columbia, Limited.

First Warning For Christmas Mail

The British post office has issued a warning that all persons who desire to send Christmas presents to the Old Country should mail them long in advance of the holiday. The warning is to avoid delay of packages similar to that which occurred last year owing to the great congestion in the mail.

Famous Watchdog Dead

Was Familiar Figure Around Geneva Headquarters of League of Nations

Bristol, he famous St. Bernard watchdog of the League of Nations headquarters at Geneva, is dead. He was washed specially for the sixth assembly, and it is thought he must have caught a cold. The next day he was suffering pain, and a dose of opium was injected, death taking place at once. Bristol—whence he got the name is not known—was about 15 years old, and originally belonged to an Italian count, who was a resident in the Hotel National before it was taken over by the league. The St. Bernard had been a watchdog since the foundation of the league, and was probably the most familiar figure there. All day the delegates at the assembly, and many others, were inquiring as to the state of his health. He was known and loved by everyone. Bristol is to be buried in a grave in the front garden of the Palais des Nations.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Homesteads In Alberta

A total of 71 homesteads were filed on during the month of September in the Edmonton land district which includes a large territory in Central and Northern Alberta. In addition to this 11 soldier grants were filed on.

Whales Often Migrate

Whales, it is believed, often pass from Antarctic to Arctic waters and a British expedition now in the southern seas will attempt to label a few of the animals in the hope of solving the problem of their migratory habits.

She Couldn't Sleep Heart Was So Bad

Mrs. J. D. McClintock, Charlottetown, P.E.I., writes:—"About a year ago I was greatly troubled with my heart.

I could not sleep at night, and was so nervous I imagined that I could see everything in the room moving, and would have to turn on the lights before I could get to sleep.

After having read of your

MILBURN'S HEART AND NERVE PILLS

I took several boxes of them, and can now get a full night's sleep without any trouble, and feel fine in every way."

H. & N. Pills have been on the market for the past 32 years; all dealers sell them; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. (Acetyl Salicylic Acid, "A. S. A.") While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

A Novel Method Is Used By Overseas Representative To Advertise Canadian Goods

There was held at the Hotel Cecil on the Strand, London, England, on October 22nd, a somewhat novel dinner, to wit a dinner where every item on the menu, even to the ice cream, was actually produced in Canada. W. A. Wilson, agricultural products representative, had the task of planning the dinner and securing the materials for it. High Commissioner Larkin presided and the guests were members of the London provision trade and the press.

In addition to arranging the dinner, Mr. Wilson was called upon to respond to the toast to the "Produce Trade of Canada," and portions of his address are of great interest to the producers of Canada inasmuch as they indicate what he, as representing them, has pledged them to provide for the British consumer. Mr. Wilson's reply was, in part, as follows:

As stated on the menu card, the dinner served consists of food products from Canada, and the kind reception and warm support accorded to me by new and old acquaintances alike in planning for and securing the necessary supplies, made the undertaking pleasant.

Canada needs people to cultivate her uncultivated lands; her producers need markets for their agricultural products, railway and steamship companies need tonnage; and business men need the public's buying power. The people of the United Kingdom need food and the respective governments have negotiated repeatedly concerning plans to provide homes in the overseas dominions for this country's surplus population. The surest road to a successful permanent emigration policy is to establish a market for the products produced by the people you encourage to emigrate and whom we welcome. The money you spend in buying our farm products, is, in a large measure returned to you in orders for manufactured goods.

There is an enormous moral advantage and no material disadvantage in formulating a wide programme for marketing empire foods as a goal for the future and advancing to that goal step by step as occasion offers, rather than having exactly similar measures grudgingly forced out of one by popular clamor. Macaulay's description of the New Philosophy is fitting. He says: "Its law is progress. A point which yesterday was invisible is its goal today and will be its starting point tomorrow." Our commercial salvation lies in the practical use and development of the great resources and possibilities of trading within the empire.

The qualities so splendidly shown in the war did not finish when peace was declared, and whatever our difficulties are—and they are considerable—I am certain we can rely upon the integrity and determination of our race to come through them successfully. We are not going to be content with military achievement only to be beaten in time of peace by the difficult problems that confront us. To improve the economic conditions is our task, and through its accomplishment will come a greater measure of freedom, contentment and happiness.

Canada's responsibility in that effort is, broadly speaking, the production of commodities possessing quality and character sought after and demanded by the best trade in your largest markets; to produce them in volume and to produce them regularly; no detail in their preparation being too small to be unworthy of our best attention.

China invented the art of weaving 1,000 years before it was known in other countries.

Winter Care Of Poultry

Value of Substitutes for Green Feed in Poultry Feeding

During the winter months, when it is sometimes difficult to get suitable green feed for poultry, certain substitutes may be used. In order to test the relative values of clover leaves, sweet clover meal, alfalfa meal and tomato pulp for this purpose an experiment was conducted in 1923-24 by the Dominion poultry husbandman at the Ottawa experimental farm. One pen was given clover leaves fed in the litter once a day, another was given clover meal mixed in the wet mash fed at noon, a third pen received alfalfa meal in the same way, and to the fourth pen tomato pulp mixed in the wet mash was fed. All the hens were fed a standard scratch grain and standard mash, beef scrap was kept continually before them and they had both milk and water to drink.

The clover meal gave by far the best results for production, cost of producing eggs and profits. Tomato pulp came second, alfalfa meal third and clover leaves last. The hatchability of the eggs from the birds fed tomato pulp was, however, exceptionally poor.

Good Apple Crop

Production This Year Is Expected To Exceed That Of 1924

Canada's commercial apple crop for this year is now estimated at an increase of three per cent. over 1924, or 2,950,335 barrels, according to a report of the federal department of agriculture. The commercial apple crop in Ontario is now placed at 174 per cent., or 1,190,886 barrels—this is a record for this province. British Columbia is expected to contribute 2,318,138 boxes; Quebec, 40,853 barrels; New Brunswick, 55,433 barrels; and Nova Scotia, 860,450 barrels. All the provinces, with the exception of Ontario, show decreases.

Says Fish Industry Second To Farming

Has Always Been One of Canada's Prolific Trades

The fish industry in Canada is second to agriculture, and since early times the fish trade has been one of the most prolific of the country, said Daniel J. Bryne in giving addresses on Canadian fisheries at the request of the department of marine and fisheries. Consumption of fish per head per annum in Canada, he stated, is only 22 to 24 pounds, while in England it is 45 to 50 pounds, and in Japan more than 200 pounds.

Heavy Salmon Pack

British Columbia Catch Greater This Year Than Ever

British Columbia's salmon pack to date is in excess of the same period in 1924, and last year was one of the record years. Statistics published by the Dominion fisheries department show that the total pack up to October 5th in the present season is 1,376,442 cases. Last year at the same date the pack was 1,373,635 cases.

Trophy For Corn Show

A solid silver cup measuring 18 inches in height has been presented to the Saskatchewan Corn Growers' Association by the Saskatchewan Wholesale Implements Association as a trophy for the novice class to be competed for annually at the provincial corn shows. This trophy will be awarded for the first time at the third provincial corn show to be held at Indian Head on Nov. 18 and 19.

Brides Are Disappointed

Disappointed war brides are returning daily from America to their homes in France. It has been estimated that as many as 30 per cent. of the marriages between American soldiers and French girls have resulted in a failure.

German scientists have made leaves of gold and nicked so thin that it would require 2,500,000 of them to measure an inch in thickness.

We doubt if even a great and famous orator could explain to a barber exactly how he wanted his hair cut.

Keeping Milking Records

Practice of Weighing the Milk is Recommended to Dairymen

A practice that is generally followed and advocated at the illustration stations in Eastern Quebec conducted under the Dominion experimental farms branch is that of weighing each cow's milk. There are too many cows, says the supervisor in his annual report, that do not produce sufficient to pay for their feed. By weighing the milk these animals can of course be identified and eradicated. The average of thirteen herds is given as 5,245 pounds, which is better than the average production of cows in Canada, and indicates considerable improvement brought about by the methods pursued. Realizing that more milk could be produced by more intelligent feeding and breeding, states the supervisor, Mr. J. H. Tremblay, B.S.A., five operators have been induced to purchase pure-bred sires with dairy record qualifications. Other operators are expected to follow suit in the near future. In the production of the thirteen herds quoted there is the wide margin of over 4,000 pounds in the average per cow, the best average of a herd comprising eleven cows being 7,967 pounds and the lowest average of one consisting of 13 cows being 3,156 pounds. The highest producing cows in a herd of Holsteins was 11,049 lbs., in a herd of Ayrshires 9,259 lbs., and in a herd of grade Shorthorns 10,003 lbs. The best in a herd of grades standing at the bottom of the list is 3,891 lbs. It is hardly necessary to say that the keeping of these records is an incentive to both better feeding and better breeding.

British Columbia Timbers

Exhibit Shown at Wembley Has Resulted In Large Orders From Britain

As a result of the British Columbia exhibit at Wembley, many prominent architects of the United Kingdom are availing themselves of the new and beautiful interior decorative schemes which are obtainable with the now well-known British Columbia timbers. Wembley has provided a means to place before the public in general, and architects and builders in particular, practical illustrations of the use and coloring of these timbers. In this regard it has played a most important part in the pronounced increase of British Columbia timber exports to the United Kingdom.

Canadian Butter Shipped To Orient

Large Quantities Are Shipped to China, Japan and the Philippines

Last year Canada shipped to Japan 538,000 pounds of butter, to China 289,000 lbs., Hong Kong 20,000 lbs., to the Philippines 188,000 lbs., and to the United Kingdom 767,870 lbs., all through the port of Vancouver. The majority of the shipments went from Alberta. Altogether some 2,000,000 lbs. of butter were exported through Vancouver last year.

Crime Increases

Crime in Chicago costs the city so much each year that it could well afford to pay each of its 30,000 crooks $20,000 annually or $600,000,000 to leave town, C. R. Holden, president of the Chicago crime commission, told a church audience. He estimated that approximately one per cent. of the city's 3,000,000 population are engaged in criminal pursuits, and asserted that crime had increased 100 per cent. since 1900.

Plea For Plain English

Speaking before the British Association for the Advancement of Science at Southampton, England, Sir Oliver Lodge asked that scientists talk in plain English. A particular appeal was made to botanists, who were declared to be the most prolific coiners of troublesome words.

New B.C. Fox Farm

Portland Island, near Moresby Island, B.C., has been bought by T. E. Westortan, of Shanghai, for the purpose of converting it into a fox farm. The island is approximately five hundred acres in area and it is Mr. Westortan's intention of stocking it with blue and silver foxes.

Helps Children Grow
SCOTT'S EMULSION
RICH IN COD-LIVER OIL AND HEALTH-GIVING VITAMINS

Unoccupied Lands In West Greatest Single Asset In Sight For Canada's Future Growth

Prize Winning Butter

Settlers From Britain Meet With Success in Canada

In just over four months from the time of her first arrival in Canada, Mrs. W. N. Smith, who with her husband and six children came to Canada under the British family farm settlement scheme at the end of last May, has become a prize-winning butter, cheese and cream maker. At the fall fair recently held at Milner, British Columbia, Mrs. Smith won first prize for fresh butter, first for fancy butter, first for cream cheese and second for clotted ceam.

Mrs. Smith made good butter and cheese on her husband's farm in the Old Country and shortly after she arrived at their new 40-acre farm at Fort Langley, B.C., early last June, she began again to put her knowledge of making dairy products to practical use. A family of six children ranging in ages from 19 to four years, pronounced them excellent. Visitors registered a similar verdict. The field officer of the land settlement branch of the department of immigration and colonization advised Mrs. Smith to compete with her butter and other dairy products in the Milner fall fair. She did so with the results aforementioned.

Robert J. Alway, another British settler, who came to Canada last April, has recently won a first prize for a horse, first for a cow and two second prizes for cows at the Agassiz, B.C., fall fair.

Mr. Alway was a farmer near Bristol, England. He has a wife and two children, a girl of 17 years of age and a boy of 12 years. The boy may claim a share in the honor of winning the prizes for it was he who prepared the animals for the show.

Mining In British Columbia

All Records For Mineral Production Will Be Eclipsed In 1925

All yearly records for mineral production both from the standpoint of quantity and value, will be eclipsed in 1925, according to a summary of mining operations for the first eight months of the present year, issued by the B.C. minister of mines. It is estimated that the monetary value of the mineral production for the first eight months of 1925 is approximately $41,000,000. This indicates that the total final production for the year 1925 will approximate at least $60,000,000, an increase of $11,295,396, or 23.10 per cent. over the total for 1924, hitherto a record for the province.

Shipping Wheat Via Vancouver

Shipments of wheat from Vancouver during the first two months ended September 30, 1925, were 1,457,904 bushels, and receipts 893,330. For the whole of last year approximately 25,000,000 bushels of wheat passed through this port, and it is anticipated that the wheat movement through Vancouver this year will equal, if not exceed, that of 1924.

France Honors Canadian Ace

Major W. F. Sussan, Ottawa, Ontario, in command of the Sheriffenne Escadrille, 37th Regiment of Aviators, French Air Forces in the Moroccan war, has been awarded a Colonial Cross and received creditable mention in dispatches for the valiant services of the Canadian ace in fighting the Riffians.

Is Far From Bankrupt

"The wildest nonsense," was the expression used by Right Hon. Sir Robert Horne, former chancellor of the exchequer in the British Government, in characterizing suggestions made recently by a British shipowner that Great Britain is heading for bankruptcy and ruin.

Dairy Cattle For China

The first shipment of pure-bred dairy cattle from British Columbia to Southern China left Vancouver recently, when thirty head of stock went forward to Shanghai.

About 1,000,000 tickets for free medical treatment have been issued by the Tokyo, Japan, municipality in the last six months.

The natural resources intelligence service of the department of the interior at Ottawa says: An area slightly less than two hundred million acres lies within the surveyed tract of the three prairie provinces. What has been done with this vast territory? Twenty-five years ago Canada was calling from the housetops that free homesteads were available to all. The call for settlers produced amazing results. Today, there are nearly ninety million acres of the land in the three provinces occupied as farm land. Undoubtedly the best of the land open for homesteading has been taken up. No less than 72,131,000 acres have been granted to settlers and others in the form of homesteads, land sales, bounty grants, half-breed scrip, etc. Grants to railways and to the Hudson's Bay Company have absorbed 38,432,000 acres of the surveyed area, while 27,422,000 acres have been set aside for forestry purposes. Indian reserves, school lands, parks, grazing leases, water-covered land, and road allowances account for 35,954,000 acres, leaving a total of 25,957,000 acres not allocated at the commencement of the present year.

Studied solely with an eye to the surveyed lands still held by the crown, the western land situation might not look very promising for further large settlement. There are, however, two other important factors to take into account.

First, the surveyed area can and, in time, will be, somewhat enlarged when the railway network is extended into areas which are still too remote to warrant surveys, let alone settlement.

Secondly, there are the privately-owned unoccupied lands within the present surveyed areas—that is, the lands held for sale by individuals and by the railways and the Hudson's Bay Company. It is estimated that there are about 18,000,000 acres of such lands. When it is borne in mind that these are largely select lands, whereas the surveyed lands still held by the public are the "marginal" lands in every sense, one can realize how closely the future progress of western settlement is tied up not only to public policies with respect to crown lands but to the marketing and occupation of privately-owned lands. Public lands no longer dominate the situation with respect to western settlement.

Quite aside from the figures for the acreage which have been surveyed and disposed of in different forms, rough estimates, the best that can be made with present information, indicate that there is a total of about 167,000,000 acres of land in the three prairie provinces physically suitable for grazing or for agriculture. The area at present occupied as farm lands is rather less than 90,000,000 acres. Allowing liberally for the acreage now being used for grazing purposes, still leaves it amply evident that the west has a long road to travel before its agricultural areas are anything like fully developed. To cite only one more figure, it is worthy of notice that Dr. O. E. Baker, of the United States department of agriculture, recently estimated that Canada is potentially capable of producing a wheat crop exceeding 1,300 million bushels. Thus, viewing the western land situation by and large, it is fairly safe to say that the unoccupied lands of the prairie provinces are still the greatest single asset in sight for the Dominion's future growth.

Misaka, Japan will convert it into a naval museum.

Instead of scrapping the warship

The "Merry-Go-Round" Political

While Artful Meean skates round Ottawa's gates
Cutting figures for Premier position;
Wily Lyon the King, with arm in a sling,
Seeks an in-off a slippery transition.

Thus they run the show, still we dont know
Who owns the merry go round;
But that the people pay be it owned either way,
Doth reason out true and sound.

Now the political soup of the "Ginger Group."
That in Ottawa now is found
Doth sicken for sure, as of it nothing truer.
These joy riders of the merry-go round.

Thus Jiggs has a hunch, while sitting at lunch,
Cries gee whizz 'tis over proof, strong;
While Maggie chimes in, with gnaw she ate-ing grin,
—Hot stuff, we can't stand it for long.

For its spoiling the show and business don't go,
As it did in the good old days past;
They've torn holes in tent, the King Pole is bent,
And our fame's going down the hill fast.

For fifty long years, we say it with tears,
We've been running the country's show
And now list forsooth, mid day's of our youth,
They say time is up, we must go.

They may have us tight, tho' balance be light,
They may see saw us low or high,
Doth mean, in or out, in either case doubt,
May force us to do or to die.

So we must file suit, against "Ginger Group."
Or they'll get our goat, by heck;
Just look at our plight, we'll have to unite,
—Sweep this "Ginger Group" and soup from the deck.

. . . . . .

Maybe say we, but wait, let' us see,
Who owns this merry-go-round;
For the blooming show for all we know,
Isn't worth two lead cents a pound.

So the best thing we sue, between me and you,
Is to scrap the old party's machine;
And stay with the soup and the "Ginger Group,"
Till we change the screen and the scene.

Time's call for a change so let us arrange,
To get rid of their flim-flam and junk;
Get out of the fog, and this political bog,
And old party slough of piffle and punk.

Of old party's stuff, we've sure had enough,
Let us build on just principles then,
End this rule and reign. of Punch and Judy fame,
Be no longer mutts and nuts—but men.

. . . . . .

Seek principles sense power, make old party's cower.
As we build a parliament worthy of men;
And this merry go-round be finally found,
On the scrape pile of political junk then.

Creston, B.C. —JALID

Board of Trade Elects Officers

Creston Board of Trade had the annual meeting on Tuesday night at which the features of the session were the election of officers and a comprehensive review of the Arrow Creek irrigation project presented by James Adlard, chairman of the board's committee on agriculture, the information given out being from the report of Engineer McCullough, which came to hand that day. Mr. Adlard stated now that the report was to hand no time would be lost in acquainting all interested with full information on the project and by the February meeting hoped to be able to report success in launching the project.

With the exception of the executive all the officers were elected by acclamation, as follows:

Hon. President—C. W. Allan.
President—Major Mallandaine.
Vice-President—Jas. Adlard.
Secy. Treas.—Geo. H. Kelly.
Auditor—Dr. Henderson.
Executive—C. W. Allan, W. Fraser, C. F. Hayes, Geo. Johnson, C. O Rodgers.

The honarary president, president and vice president were named to select the 1926 standing committees. In eulogistic terms votes of thanks were tendered the retiring president, C. W. Allan, and the retiring secretary, R. S. Bevan.

Due to a shortage of space publication of the president's address is deferred until next week.

Canyon City

Miss Nissie McRobb left early last week for Nelson, where she is attending business college in that city.

The bachelors' dance at the schoolhouse on Friday night last was only fairly successful, the turnout being rather below the average. Music was furnished by Messrs. Mawson and Davie.

The service at the United Church on Sunday night will be in connection with boy's work, and Pastor Harbuck is preparing an address suitable for the occasion.

Col. Lister is announced to address a public meeting at the schoolhouse on Saturday, evening, January 23rd.

The United Church Ladies' Aid are having a tea and musical concert at the schoolhouse on the evening of Saturday, January, 16th.

The ranchers are all busy hauling home the flats hay cut. Just a little more snow would be most welcome.

DOMINION ELECTIONS' ACT.

ELECTORAL DISTRICT OF WEST KOOTENAY.

SUMMARY OF RETURN of CANDIDATE'S EXPENSES

There is below set out, as required by Section 79 (5) of the above, Act, a summary signed by the Official Agent of the return of the election expenses made to me by him on behalf of William Kemble Esling, one of the candidates at the recent election of a member to serve in the House of Commons of Canada, which said return is on file at my office and may, on payment of a fee of twenty cents, be there inspected and extracts taken therefrom, at any reasonable time during the six months next after the 4th day of January, being the day upon which the said return was furnished to me.

Dated at Nelson, B.C. this 4th day of January 1926.

JAMES HINGSTON DOYLE,
Returning Officer for the Electoral District of Kootenay West.

RECEIPTS.	Amount.	Number of Persons from whom received.
Contributions	$3,399.46	2
EXPENDITURES.		
Candidate's personal expenses	$449.60	
Postage paid by me	15.00	
Hire of Premises	730.00	25
Services	374.97	11
Travelling expenses and hire of vehicles	836.45	16
Goods Supplied	685.65	19
Advertising	772.39	12
TOTAL	$3,864.06	83

Undisputed Claims still unpaid.....None
Disputed Claims.....None

Dated at Nelson, B.C. this 4th. day of January, 1926.

E. G. MATTHEW, Official Agent.

Who wants 2 little pet cats? I want to secure a good home for them before I leave. Write or call. MRS. HERTIG, Creston.

MUNICIPALITY OF THE

Village of Creston

Voters' List Court of Revision

Notice is hereby given that a list of voters entitled to vote at the forthcoming election of Commissioners to be held on January 28th next, is posted at the Courthouse, Creston. And further take notice that a Court of Revision will be held for the revision of the said list on Monday, the Eighteeth Day of January, at Ten o'clock in the forenoon, at the said Courthouse.

W. O. TAYLOR, Clerk.

NEWS OF KOOTENAYS

For 1925 Cranbrook had 225 births, 73 marriages, and 81 deaths.

For 1925 the electric light plant waterworks system yielded Penticton a total profit of almost $2000.

At the municipal elections this year Fernie people will vote on the question of the city council financing and running the town's public library.

Amongst its assets Penticton shows $49,000 of property that has reverted back to the town due to the failure of the owners to pay their taxes.

W. R. Flumerfelt, the East Kootenay district forester, has been transferred to the coast. His successor at Cranbrook has not yet been named.

Musical talent is so scarce—or shy—at Rossland that it took the choirs of the United and Anglican churches to put on a sacred cantata in that town on the 4th.

By using a tractor, which it purchased at $500, Revelstoke council saves $40 per day over the previous cost for clearing the walks of snow formerly done by teams.

Although Grand Forks cut its tax rate sufficiently to save the ratepayers $2000, the council closes its year with the biggest surplus the town has had in fifteen years.

Black fox farms have just been started in a small way at Grand Forks and Greenwood, and at least another half dozen of them will be inaugurated as soon as breeding stock can be obtained.

The Rossland Miner believes that the Indian prediction of a short and mild winter will materialize. That town has had the most California like winter in its history so far this season.

Due to an unprecedented increase during the year at both the high and public school, with the attendant necessity of hiring more teachers, Penticton school board expenses exceeded the estimates by $4800.

WATER NOTICE

DIVERSION AND USE

Take notice that The Nakusp Electric Light & Power Company, whose address is Nakusp, B.C., will apply for a license to take and use 75 cubic feet per second of water out of Goat River, which flows westerly and drains into Kootenay River at Creston, B.C. The water will be diverted from the stream at a point about 1660 feet down stream from C.P.R. bridge, on Block 291, of Lot 812, and will be used for power purposes upon the area described as the undertaking of the Company within a radius of twenty miles of the power site. This notice was posted on the ground on the 10th day of January, 1926. A copy of this notice and an application pursuant thereto and to the Water Act will be filed in the office of the Water Recorder at Nelson, B.C. Objection to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper.

NAKUSP ELECTRIC LIGHT & POWER COMPANY, Applicant.
GEO. P. HORSLEY, Agent.

The date of the first publication of this notice is January 15, 1926.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 5,000 board feet per acre west of the Coast Range and 8,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price of first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

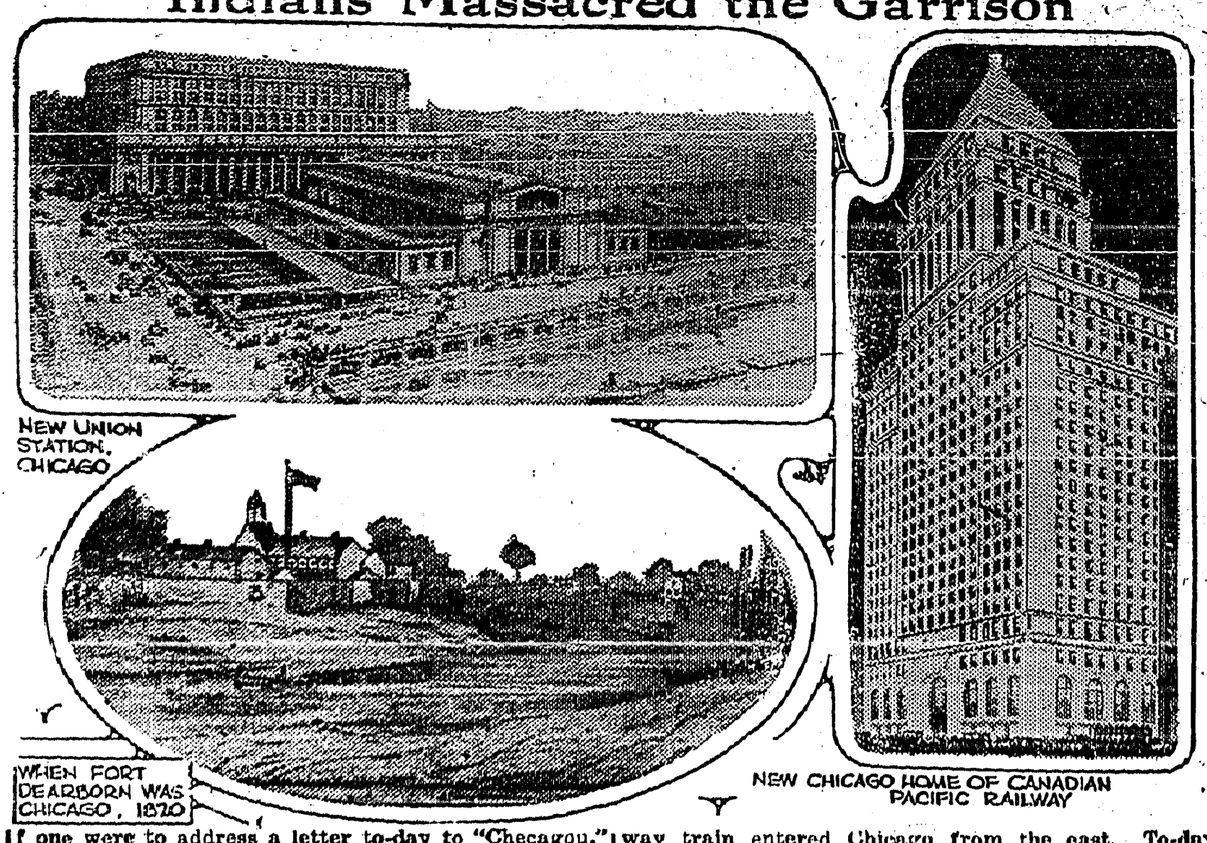
LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock owners may form associations for range management. Free, or partially free, permits are available for settlers, campers and travellers, up to ten head.

Indians Massacred the Garrison



If one were to address a letter to-day to "Checagou," even a clever post-office official would be puzzled, but that was how the great French explorer, La Salle, spelled Chicago 241 years ago. Chicago was only a name when Jolliet, Pere Marquette and the Sieur de la Salle camped there on their way to the Mississippi. Chicago was then a part of Canada—New France, it was called Jolliet and Marquette visited it 251 years ago, or ten years earlier than La Salle. Even then Chicago was a great transportation centre for Indians and French explorers for it was on the line of march westward from Quebec, via the Great Lakes, to the Mississippi and southward to the Gulf of Mexico. La Salle actually went from Quebec to the Gulf of Mexico and back again, and was murdered somewhere in Mississippi by his own followers.

When the canoe and the prairie schooner of the pioneers were succeeded by the railway train, Chicago became one of the world's greatest transportation centres, being on the same old line of march from the east to the west, and vice versa. Fort Dearborn was built in 1803 and for three decades was Chicago. In 1812 Indians massacred the garrison but the old fort was rebuilt and in 1852 the first railway train entered Chicago from the east. To-day Chicago is a great railway hub, the spokes of which run north, south, east and west. Her new Union Station, now nearing completion, will be one of the finest terminals in the world and will be used by the Pennsylvania, Burlington, St. Paul and Alton railways.

Another new and important rail development in Chicago is the move of the Canadian Pacific's rail and steamship passenger offices and those of the Soo Line to the new Straus Building, corner of Michigan Avenue and Jackson Boulevard, a very attractive and imposing 32 story building not far from the site of historic Fort Dearborn. Following the route of the early explorers of 250 years ago, the Canadian Pacific enters Chicago via its own lines and the Michigan Central westward from Montreal and places the eastbound Chicago traveller aboard ship for Europe in Montreal in less than 24 hours. Westward over the Soo Line and Canadian Pacific, the traveller reaches Vancouver in 81 and a half hours from Chicago and in only 20 hours from Montreal. What would La Salle, Jolliet and the good Pere Marquette think of such transportation feats now?

NOTICE

Canyon City Lumber Company, Limited, are closing out their business and all those indebted to them please make settlement at once. Anyone having claims against the Company please present same. CANYON CITY LUMBER COMPANY, Limited.

BULL CALF ESTRAY

Came to the premises of the undersigned at Canyon, on or about November 1st, 1925, bull calf, red, about one year old. Owner can have same on proving property and paying all expenses. FRANK CLARK, Canyon.

Light and Heavy

Shoes Made to Order

New Stock of Harness

Second Hand Store in connection

A. Mirabelli

Shoe and Harness Repairing

Local and Personal

The village commissioners will sit as a court of revision on January 18th, for the purpose of revising the voters list to be used at the voting on January 28th. Clerk Taylor posted the first draft of the list at the courthouse on Tuesday morning.

There is a considerable export of dressed beef from Creston this season most of which is going to Crows Nest points. There is also a decided increase in the shipping of dressed poultry, Trail, Rossland and Sandon being the marketing centres.

Certainly the weather is unusual; so much so that for about the first time since coming to Creston H. S. McCreath had to stick to the house for a few days at the end of the week due to a very severe cold. He was out, however, on Monday, for the regular meeting of the village commissioners.

Rev. A. Appelt, Lutheran pastor at Creston, was at Edmonton, Alberta, several days last week attending a conference of the clergy of that denomination of Alberta and eastern B.C. He has just moved into the R. Sinclair Smith house on Canyon street, until lately the R.C.M.P. headquarters.

The present village council had their last regular meeting on Monday night at which permission was given Vic. Mawson to move his store building on Wilson Avenue to a new location across the track opposite the Grand Theatre. A. Spencer was appointed audltor and is now at work on an official check of the 1925 accounts.

These old boys of Bruce, just simply cannot be kept down. At the election of mayor at Fort William, Ontario, early in January Joseph E. Crawfork triumphed over Newton Edmeston, who was seeking his fifth term as mayor, by a majority of 877 votes. The mayor-elect is a brother of W. H. and T. J. Crawford of Creston.

Following the regular monthly meeting of the committee of management of Christ Church announcement is made that Rev. Mr. Newby, at present located at Edgewood, has been named to succeed Rev. H. Varley as rector of Christ Church, and is expected to assume charge early in February. Mr. Varley has accepted an appointment as rector Surrey.

In an effort to reduce fuel bills the attorney general's department has authorized an expenditure to lower the ceilings of the provincial police residential quarters from the oldtime 14 feet to 10 feet, and the job has just been completed by Mr. Reinwald. Owing to the big windows in the courtroom it is impossible to lower the ceiling in that section. Up till about fourteen years ago the building was Creston's public school, which accounts for the high ceilings.

One of the best year's in the recent history of the Presbyterian Ladies' Aid was reported at the annual meeting at the home of Mrs. McKelvey on Thursday afternoon last, the chief feature of which was the election of officers, which resulted as follows: Honarary president, Mrs. (Rev.) Daly; President, Mrs. J. W. Dow; Vice-president, Mrs. H. S. McCreath; Secretary, Mrs. R. Walters; Treasurer, Mrs. C. H. Hare. The treasurer's report showed a cash intake for 1925 of about $800.

Creston and District Public Library Association held the annual meeting on Saturday afternoon, when the following directors were elected: Mrs. Twigg, Mrs. G. Young, Mrs. J. W. Hamilton, and Messrs. P. R. Truscott and W. J. Truscott. Mrs. Hamilton was re-appointed secretary and librarian. A new lot of books from Victoria has been sent and if is hoped that new and renewal subscriptions for 1926 will come in sufficiently to allow of the purchase of at least a few new books when current expenses are paid. In 1925 the circulation of fiction was 1382; of general literature, 181; and of juvenile books, 61; making a total of 1624 books lent out during the year.

NEWS OF KOOTENAYS

For 1925 Cranbrook had 225 births, 73 marriages, and 81 deaths.

For 1925 the electric light plant waterworks system yielded Penticton a total profit of almost $2000.

There are 713 names on the voters list to be used at the municipal election at Cranbrook this month.

Kimberley trustees are getting out plans for another addition of four rooms to the public school in that town.

1100 children at Coal Creek were each given a half dollar as a Christmas present by the B.C. Miners Association.

Building permits issued at Penticton for 1925 exceeded $66,000, showing quite an increase over the year previous

The Elks Lodge at Kimberley has presented the hockey team in that town with a brand new outfit of playing uniforms.

Some of the marketing experts in the interior figure potatoes will be worth not less than $55 a ton for the balance of the season.

According to the Herald the government liquor store at Cranbrook did the biggest Christmas trade in its history last month.

With the exception of one case the Fernie police court in the past two years has had no business to send on for trial at a higher court.

There were no business failures in Kelowna in 1925, but so great has been trade increase that there is not available business premises of any description, and during the year a building program of almost unprecedented volume has been going on.

Fernie, Cranbrook and Creston

Pride in Service

THERE is a special pride in service along the Crow's Nest Line. The railroad began it; the first Superintendent operated the road just as though it had competitors—six of them, right longside.

The Imperial Bank of Canada Branches at Fernie, Michel, Cranbrook, Natal, Creston and Invermere also take a special pride in service to the public. Let one of these Branches prove it to you.

The Improved

Ford Touring Car

AN all-steel body on the improved chassis, with a new top designed to harmonize with the reduction in height, gives the Touring Car a grace and smartness heretofore unapproached.

Advances in comfort have kept pace with improvements in design. Placing the fuel tank under the cowl has made it possible to lower the seats, giving greater leg room and added comfort for driver and passengers. Ventilation and driving vision are improved by the new touring windshield, the lower half of which is adjustable.

The side curtains, generally re-designed to conform to body and top changes, add the final detail of touring comfort.

When in place, the curtains open with the doors and combine wide vision with lasting durability.

A Long Patrol

Tremendous Distances Covered By Mounted Police In Performance Of Their Duty

A patrol covering a distance equal to one and a half times across the continent, has been completed by the Royal Canadian Mounted Police in the past year in the Cumberland Gulf-Baffin Land district. Four police, under Sergt. Wright, traversed on one trip alone 2,230 miles, travelling with dogs and sleds.

BAREE, SON OF KAZAN

by

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BAREE, SON OF KAZAN," a Vitagraph Picture, With Wolf, the War Dog, is an Adaptation of This Story

SYNOPSIS

Nepeese, daughter of Pierrot, the trapper, took Baree, the wolf-dog, into the woods and the two spent the night there. Baree was still untamed, but the girl was determined to make a pet of him. Nepeese was quarter-Indian, with French blood also in her veins. In a few days she would be seventeen years old and her father had brought her ribbons for her hair, real shoes and material for a new dress. McDonald, the government map-maker, arriving, took photographs of the girl in her birthday finery.

CHAPTER XVI.—Continued

It was late in August when Baree saw the first of his kind outside of Kazan and Gray Wolf. During the summer Pierrot allowed his dogs to run at large on a small island in the centre of a lake two or three miles away, and twice a week he netted fish for them. On one of these trips Nepeese accompanied him and took Baree with her. Pierrot carried his long caribou gut whip. He expected a fight. But there was none. Baree joined the pack in their rush for fish, and ate with them. This pleased Pierrot more than ever.

"He will make a great sledge-dog," he chuckled. "It is best to leave him for a week with the pack, ma Nepeese."

Reluctantly Nepeese gave her consent. While the dogs were still at their fish, they started homeward. Their canoe had stolen well out before Baree discovered the trick they had played on him. Instantly he leaped into the water and swam after them—and the Willow helped him into the canoe.

Early in September a passing Indian brought Pierrot word from Bush McTaggart. The Factor had been very sick. He had almost died from the blood-poison, but he was well now. With the first exhilarating tang of autumn in the air a new dread oppressed Pierrot. But at present he said nothing of what was in his mind to Nepeese. The Willow had almost forgotten the Factor from Lac Bain, for the glory and thrill of wilderness autumn was in her blood. She went on long trips with Pierrot, helping him to blaze out the new trap lines that would be used when the first snows came, and on these journeys she was always accompanied by Baree.

"By midwinter I will have him the finest dog in the pack, mon pere!"

This was the time for Pierrot to say what was in his mind. He smiled.

"I am going to send you down to the school at Nelson House again this winter, ma cherie," he said. "Baree will help draw you down on the first good snow."

The Willow was tying a knot in Baree's babiche, and she rose slowly to her feet and looked at Pierrot. Her eyes were big and dark and steady.

"I am not going, mon pere!"

"Her eyes were big and dark and steady. 'I am not going, mon pere.'"

With a shrug of his shoulders Pierrot watched her. After all, was he not glad? Would his heart not have turned sick if she had been happy at the thought of leaving him?

"The Saints be blessed!" he murmured. "Now—now, it is Pierrot Du Quesne who knows what to do!"

CHAPTER XVII.

Back to Lac Bain, late in September, came MacDonald the map-maker. For ten days Gregson, the investigating agent, had been Bush McTaggart's guest at the post, and twice in that time it had come into Marie's mind to creep upon him while he slept and kill him. The Factor himself paid little attention to her now, a fact which would have made her happy if it had not been for Gregson. He was enraptured with the wild, sinuous beauty of the Cree girl, and McTaggart, without jealousy, encouraged him. He was tired of Marie.

McTaggart told Gregson this. He wanted to get rid of her, and if he—Gregson—could possibly take her on with him it would be a great favor. He explained why. A little later, when the deep snows came, he was going to bring the daughter of Pierrot Du Quesne to the Post. In the rottenness of their brotherhood he told of his visit, of the manner of his reception, and of the incident at the chasm. In spite of all this, he assured Gregson, Pierrot's girl would soon be at Lac Bain.

It was at this time that MacDonald came. He remained only one night, and without knowing that he was adding fuel to a fire already dangerously smouldering, he gave the photograph he had taken of Nepeese to the Factor. It was a splendid picture.

"If you can get it down to that girl some day I'll be mightily obliged," he said to McTaggart. "I promised her one. Her father's name is Du Quesne—Pierrot Du Quesne. You probably know them. And the girl? "

SPOHN MEDICAL CO. GOSHEN, IND.
DISTEMPER COMPOUND

The next day MacDonald started for Norway House. McTaggart did not show Gregson the picture. He kept it to himself, and at night, under the glow of his lamp, he looked at it with thoughts that filled him with a growing resolution. There was but one way. The scheme had been in his mind for weeks—and the picture determined him. He dared not whisper his secret even to Gregson. But it was the one way. It would give him Nepeese. Only—he must wait for the deep snows, the mid-winter snows. They buried their tragedies deepest.

McTaggart was glad when Gregson followed the map-maker to Norway House. Out of courtesy he accompanied him a day's journey on his way. When he returned to the Post, Marie was gone. He was glad. He sent off a runner with a load of presents for her people, and the message: "Don't beat her. Keep her. She is free."

Along with the bustle and stir of the beginning of the trapping season, McTaggart began to prepare his house for the coming of Nepeese. He knew what she liked in the way of cleanliness and a few other things. He had the log walls painted white with the lead and oil that were intended for his York boats. Certain partitions were torn down, and new ones were built; the Indian wife of his chief runner made curtains for the windows, and he confiscated a small phonograph that should have gone on to Lac la Biche. He had no doubts, and he counted the days as they passed.

Down on the Gray Loon, Pierrot and Nepeese were busy at many things, so busy that at times Pierrot's fears of the Factor at Lac Bain were forgotten, and they went out of the Willow's mind entirely. It was the Red Moon, and it thrilled with the anticipation and excitement of the winter hunt. Nepeese carefully dipped a hundred traps in boiling caribou-fat mixed with beaver-grease, while Pierrot made fresh dead-falls ready for setting on his trails. When he was gone more than a day from the cabin, she was always with him.

It was the Willow's voice which Baree had learned to understand, and the movement of her lips, her gesture, the poise of her body, the changing moods which brought shadow or sunlight into her face. He knew what it meant when she smiled; he shook himself, and often jumped about her in sympathetic rejoining, when she laughed; her happiness was a part of him, a stern word from her was worse than a blow. Twice Pierrot had struck him, and twice Baree had sprung back and faced him with bared fangs and an angry snarl, the crest along his back standing up like a brush. Had one of the other dogs done this, Pierrot would have half killed him. It would have been mutiny, and the man must be master. But Baree was always safe. A touch of the Willow's hand, a word from her lips, and the crest slowly settled and the snarl went out of his throat.

Pierrot was not at all displeased.

"Dieu! I will never go so far as to try and whip that out of him," he told himself. "He is a barbarian—a wild beast—and her slave. For her he would kill!"

So it came, through Pierrot himself—and without telling his reason for it—that Baree did not become a sledge-dog. He was allowed his freedom, and was never tied, like the others. Nepeese was glad, but did not guess the thought that was in Pierrot's mind. To himself Pierrot chuckled. She would never know why he kept Baree always suspicious of him, even to the point of hating him. It required considerable skill and cunning on his part. With himself he reasoned:

"If I make him hate me, he will hate all men. Mey-oo! That is good."

So he looked into the future—for Nepeese.

(To be continued)

NERVES AND FAINTING SPELLS

Sent Woman to Bed. Great Change After Taking Lydia E. Pinkham's Vegetable Compound

Sarnia, Ontario.—"After my girlie was born I was a wreck. My nerves were too terrible for words and I simply could not stand or walk without pains. I suffered with fainting spells until I was no longer any good for my household duties and had to take to my bed. The doctor said I should have an operation, but I was not in a fit condition at that time. My neighbor said, 'Why don't you try Lydia E. Pinkham's Vegetable Compound? I am sure it will do you good and will save those doctor's bills.' So I was advised by my husband to try it after I told him about it. I am very thankful to say that I was soon able to take a few boarders for a while as rooms were scarce at that time. My baby is 17 months old now and I have not yet had an operation, thanks to your medicine. I have recommended the Vegetable Compound to a few people I know and have told them the good it has done me. I know I feel and look a different woman these last few months and I certainly would not be without a bottle of your medicine in the house. You can use this letter as you see fit, as I should be only too glad for those suffering as I have to know what it has done for me."—MRS. ROBERT G. MACGREGOR, R. R. No. 2, Sarnia, Ontario.

A recent canvass of women users of the Vegetable Compound report 98 out of 100 received beneficial results. This is a remarkable proof of its merit. C

Man's Color Depends On Salt

Scientist Tells Why Races Are White, Yellow, Brown and Black

An eminent scientist, speaking of the significance of common salt, states that one's color is dependent upon salt. If your ancestors ate much salt, the chances are that your couplexion is fair. In Northern Europe, for example, where there has always been an unlimited supply of salt, the inhabitants are white. In China, Greenland, Korea and India, where salt is obtainable, but expensive, the color is yellow. On the plains of America and the Malay Peninsula, where the lack of good transportation makes salt difficult to get, man is brown. And finally, in West and Central Africa, in many sections in which is actually unknown, man is black.

Requisite on the Farm—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

Pastimes Of Wise Men

Skipping Pebbles Has Fascination For Famous Writers

Though playing ducks and drakes on the seashore can hardly be deemed an intellectual pastime, it seems to have a peculiar fascination for men of letters. A friend who spent a week with Alfred de Musset on the Brittany coast complained that the poet spent almost the whole time trying to make pebbles skip across the waves, and Mr. Lewis Hind tells of a whole afternoon which he and Joseph Conrad and H. G. Wells spent on the beach at Sandgate engrossed in the same pursuit.

BABY'S OWN TABLETS
AN EXCELLENT REMEDY

For Any of the Many Minor Ailments of Infants and Young Children

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen their severity, and to make baby's battles for health easily won.

Nine-tenths of the minor ailments which afflict babyhood and childhood are caused by some derangement of the stomach and bowels. Regulate the stomach and bowels and these troubles will disappear. To do this nothing can equal Baby's Own Tablets. They are a mild, but thorough laxative which through their action on the stomach and bowels never fail to banish constipation and indigestion; colds and simple fevers; expel worms and make the dreaded teething time easy.

Concerning Baby's Own Tablets Mrs. A. Koshan, Hamilton, Ont., writes:—"Kindly send me your booklet, "Care of Baby in Health and Sickness." I have two little children four and a half and three years old and have used nothing else for them but Baby's Own Tablets. I think the Tablets are a wonderful medicine for little ones."

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

All In Knowing How

Finnish Waitress Readily Understood Order of Canadian Nurse

One of Canada's representatives to the recent International Conference of Nurses at Helsingfors, Finland, tells of the desperate time some of the visitors to the Finland meeting had in obtaining honey for breakfast at their hotel. They pronounced it slowly and loudly, but to no purpose. Their waitress had not the slightest idea what was wanted. Then one of the nurses, with that resourcefulness for which their profession is noted, waved her hands in the air as gracefully as any Kindergartner, and said, "Buzz-z." In a second the waitress had put the honey on the table.

In the last six years 18,000 bald eagles have been destroyed in Alaska.

Prince Of Wales Must Study

Should Consider Seriously His Life's Work Says King George

His Majesty says the Prince of Wales must go back to school on his return from his South American tour. The King has decided the time has come for the Prince to study seriously the work he will have to do when he takes the throne. With this thought in mind, the King has prepared a very definite course of instruction for the Prince. The Prince's education at Oxford was interrupted by the war and his travels abroad, on diplomatic missions, have not permitted him to do a great deal of studying. It is admitted that at times he shows his education is not all that is befitting one destined to succeed to the British throne. Economics, civil government, history and legal procedure are subjects in the curriculum the King has laid down for the Prince.

About one-fifth the population of the United States lives in villages.

ADVISES NERVOUS WOMEN

Chatham, Ont.—"Dr. Pierce's Favorite Prescription is the best tonic and nervine that I have ever taken. Several months ago when in a run-down, debilitated state of health, it was Dr. Pierce's Favorite Prescription that restored me to good health, and to it I owe my splendid health of today."—Mrs. Annie Buesnel, 41 Edgar St.

Health is of vital importance to every woman. Do not neglect the most valuable asset you have. Get this Prescription from your neighborhood druggist, in tablets or liquid, or send 10c for trial pkg. to Dr. Pierce's Laboratory in Bridgeburg, Ont.

Canada's Foreign Trade

Dominion Is Now Among First Six First Nations of the World

Canada's foreign trade now places her among the first six nations of the world as an exporting and importing country, a place which she has won not only by the export of her vast annual grain crops, but also as a manufacturing nation. In the year ending August 31, 1925, the exports of the Dominion reached new heights when the total value of her export trade was placed at $1,130,753,557.

BEAUTIFY IT WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

ECLIPSE FASHIONS

Exclusive Patterns by Hazel Bayne

1179

The Tailored Coat-frock

New lines and details make this model unusually chic for both large and small women. It will be found one of the newest and smartest of the season's tailored frocks, developed in French repp, and finds its freedom of movement in the inverted plaits at the side seams. Long revers cross the front diagonally and terminate in an extension which laps to the left hip, and then falls free. A vestee is set under the front, and the long sleeves are fitted at the wrist. The extension may be omitted and the sleeves made short. No. 1179 is in sizes 16, 18 and 20 years (or 34, 36 and 38 inches bust). Size 18 years (or 36 bust) requires 3¾ yards of 36-inch, or 3⅜ yards of 40-inch material. Price 20 cents.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

Prevent Grippe with Minard's Liniment

The Frontier College

Provides Opportunity of Bringing Education to the Worker at His Work

The Frontier College has just published its first calendar. This contains many interesting educational features. While its courses are varied, there are no restrictions made by way of enforced attendance at some central institution.

It is the purpose of the Frontier College to offer varied courses for home study and thus encourages domicile in countryside and settlement. The Frontier College has set for itself the task of bringing education to the worker at his work. The established universities give prizes and scholarships on condition that men attend lectures; the Frontier College in order that they be encouraged to stay at home. In pursuance of this, university credits even for a degree, are made available for all, who have the capacity, the energy and the time to study, whatever be the circumstances of their life and work.

But while much latitude is given in the matter of options there is no thought of cheapening the degree. In fact, certain subjects such as Forestry, Biology, Agriculture, subjects very vital to Canada, with its ever present problems of settlement, reforestation and immigration, are made compulsory. An examining board has been formed which numbers among its members many men who have already won a Dominion-wide reputation in their special fields. The calendar may be had upon application to the Frontier Collegefi 67 Yonge Street, Toronto.

Joint Soreness Subdued, Swellings Quickly Reduced

Wonderful Results From Rubbing the Sore Parts With

NERVILINE

"My testimony should convince anyone that 'Nerviline' is a splendid preparation to use on swelled joints. Rheumatism left me badly crippled," writes Amos F. Fleury, from Kingston. "I went to McKay's Drug Store and they recommended Nerviline, which restored me completely."

For Rheumatic pains, Lumbago, Sciatica, you will get lasting satisfaction from a 35c bottle of Nerviline. Sold everywhere.

Export Of Canadian Cattle

Up to October 1st, 1925, Canada shipped to the British Isles a total of 77,242 live cattle, as against 58,694 in the same period in 1924, and 44,206 in 1923. It is considered probable that the the aggregate before the end of the year will exceed 100,000 head.

An Oil that is Famous.—Though Canada was not the birthplace of Dr. Thomas' Eclectric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

Billy's Age

"How old are you, Willie?"

"I'm 13 at home, 12 at school and 11 on the train."

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Forest fires during last summer are blamed for a fur shortage.

The average weight of an elephant at birth is 165 pounds.

Large Red Pimples Itched Terribly Cuticura Heals

"My face became full of large, red, scaly pimples and at times they itched terribly. They spread in great blotches and formed large, sore eruptions that burned a great deal. I was ashamed to go anywhere on account of them, and the trouble kept getting worse. The trouble lasted about a year.

"I tried various kinds of ointments without success. I sent for a free sample of Cuticura Soap and Ointment and they helped me. I purchased more, and after using three boxes of Cuticura Ointment, together with the Cuticura Soap, I was healed in about two months." (Signed) Miss Mildred M. Breau, Crousetown, Nova Scotia.

Prevent pimples by daily use of Cuticura Soap, assisted by touches of Cuticura Ointment when required. Dust with Cuticura Talcum.

Sample Each Free by Mail. Address Canadian Depot: "Stebhens, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Cucumber Native Of Egypt

Was Introduced Into England From Holland In 1538

The cucumber was one of the good things of Egypt for which the Israelites longed after they had left the land of bondage and were travelling through the wilderness. This plant grows in the fertile earth around Cairo after the inundation of the Nile, but not elsewhere in Egypt. From that country it was probably carried to Palestine and later to Europe. It is mentioned by the Latin poet Virgil. It was introduced into England from Holland in 1538.

All Night with Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unfitted for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

There are eight varieties of poisonous mushrooms, according to recent investigations.

Rub the scalp with Minard's Liniment

B.C. Pulp Goes To Japan

Canadian pulp practically controls the Japanese market, as far as price is concerned. During last year between 2,000 and 3,000 tons of pulp from British Columbia have been imported into Japan, out of a total of some 3,500 to 5,000 tons from all countries. It is anticipated that Quebec will presently enter in the field.

More than 200,000 students enroll every year in agricultural schools of the United States.

Conquers Bad Breath and is Popular Again

"The day I started taking Carter's Little Liver Pills," says Mr. John A. Perry of New York City, "my habitual bad breath and bad stomach stopped. I strongly recommend them to all those afflicted with these nasty troubles. I assure you that my own case was a bad one, causing me untold embarrassment, and Carter's helped me right from the start."

Bad breath comes from sour stomach and can usually be relieved quickly by Carter's Little Liver Pills.

They are wonderful for constipation, sick-headache and indigestion and they physic the system in a mild and gentle manner, no bad after effects.

Recommended and for sale by all drug stores.
