THE CRESTON REVIEW

Vol. XXIII. CRESTON, B. C., FRIDAY, JUNE 19, 1931 No. 13

Defeat Follows Disastrous Start

Snowflakes Get a First-Inning Lead and Win by Same Margin —Great Game Promised for Sunday—Locals Due for Win.

In the game with the Snowflakes of Spokane last Sunday Creston had one bad inning—the first—in which the visitors annexed a half dozen counters; the exact margin by which they won the contest, the final score being 14-8.

In an effort to strengthen the infield Watson was started at second base, with Ollie Christie doing the backstopping, and the latter made not too bad a showing but Watson found his new position one that required some experience in to do it justice and at the start of the second Watson went back receiving, Brogan replacing him at second, with Baum holding down third. After the inauspicious opening Creston held their own with the invaders, Fortin turing in a day's pitching that would be hard to beat.

This Sunday Creston will try conclusions with the Courthouse nine, also from Spokane. The guests of the day are rated as a good fielding team, but a little weak with the bat. Creston will field the same nine as finished out last Sunday's encounter, and if the locals are displaying the same ability as last Sabbath they ought to turn in a win.

The lineup for Sunday is the best Creston can fiel and the fans are asked to turn out in their oldtime numbers and with their oldtime enthusiasm and give the home talent the support they deserve. Instead of the all too common razz give the team, individually and collectively, 100 per cent. encouragement on Sunday and there should be no disappointment with the final score.

Lutheran Confirmation

Sunday morning Lutheran services were of a festival character. Two young men, Norman Nickel of Creston, and Erwin Meyer of Camp Lister, were received into full adult membership in the church by the rite of confirmation. The church was tastefully decorated with plants and boquets, in ke ping with the festival nature of the occasion.

One of the chief aims of the Lutheran Church is the Christian training and education of its youth, and both these boys have from early childhood been instructed in the doctrines of the bible During the past year they have received intensive instruction according to the outlines of the Lutheran catechism. Last Sunday they were publicly examined by the pastor as to their knowledge of Christian doctrine and practice. After professing their adherence to the Lutheran confessions they were received as communicant members and will shortly partake of their first communion.

The first confirmation service to be held in the new church took place on Pentecost Sunday. On that day Pauline Klein was confirmed in a German service.

Wynndel

Paul and Oscar Ofner were auto visitors at Cranbrook last week.

Mrs and Miss Vera Redpath of Nelson were visitors the past week, guests of Mrs. G McInnis.

Geo. Welsh of Marble Lake was a visitor, en route to Lethbridge, Alberta, a guest of Mr. and Mrs. Towson.

Mrs. G. Taylor and family of Calgary, Alberta, were visitors last week with Mr. Taylor of the Canadian Pacific Express Company, who resides here for the berry season.

Mr. and Mrs. McInnis and Doreen were auto visitors to Nelson at the beginning of the week.

David Taylor, son of Mr. and Mrs G. W. Taylor of Wynndel, is a patient in Lethbridge, Alberta, hospital, having undergone an operation for appendicitis. His condition is very favorable.

The big berry season opening dance will be held at the community hall this (Friday) evening, with music by Al Fredericks' orchestra, and an admission of $1 to gents, and 50 cents to ladies.

Strawberries are moving steadily now, the first carload rolling east on Tuesday. Some patches are suffering from the dry weather. A thunderstorm broke over the valley Monday night and brought a little of the much needed rain.

For the berry season opening dance tonight Al. Fredericks is bringing along much new orchestra talent. He will have Lawrence Neguir, sax. and trombone; Carl Walden, sax. and clarinet; Kenneth Greggerson, banjo; and Sid Walden, piano. The latter has the reputation of being one of the best piano players in the northwest, and the music for this dance will be the best yet.

Erickson

Mrs. Bundy, sr., who has been visiting with Mr. and Mrs. T. W. Bundy for a couple of weeks, has returned to her home at the coast.

Misses Marcella Sanford and Ruby Martin, who have been attending Normal School at Victoria, arrived home on Tuesday. Both were successful in passing the session's examinations.

Miss Hazel White of Fernie is a visitor with her sister, Miss Jessie White, principal of Erickson school.

A. McDerby of Calgary, Alberta, spent a few days here this week, a guest of Mr. and Mrs. T. W. Bundy.

Mr. and Mrs. H. Cowling of Vancouver are now occupying the former Vic. Mawson ranch, which they purchased about a year ago.

Frank Bamford and son, Roy, of Nelson were weekend visitors with Mr. and Mrs. T. W. Bundy.

Erickson Guild of Christ Church had a fine turnout for their lawn social at W. H. Kemp's on Wednesday afternoon last, at which the cash intake was about $55.

A brass plate showing the name of the district, date completed, names of the trustees and engineer, as well as the B.C Concrete Company, has been placed on the irrigation district monument at the Long corner, thus letting passersby know exactly what the cement pillar commemorates.

The quite heavy rains of Monday and Tuesday nights as well as Wednesday are most welcome. They will help out with everything, particularly strawberries, which have suffered from the long, dry spell.

A Great Picture

Mid a blare of martial music and a waving of flags, Gary Cooper will swing onto the screen at the Grand Theatre tonight and Saturday in the greatest soldier role he has ever played, in "Morocco," Paramount's gigantic and spectacular drama of the French Foreign Legion.

Not even in "Beau Sabreur" did Cooper attain to the colorful background which features "Morocco," and the brilliant action which makes every moment of this Josef von Sternberg picture a breath-taking experience In "Morocco," the talking screen has found its voice of love for, with Cooper, is seen that amazingly beautiful actress whom Paramount brought from Germany to feature in this production, Marlene Dietrich.

"Morocco" is a love story, emotion-swept, filmed on an epic scale, under the direction of the man who made "Underworld," whose rare combination of artistic and practical skill has proved his right, time and time again, to be listed with the greatest directors of the al time. It is the story of a man and a woman; a man ruthless with all women, considering them but passing pleasures to be tasted and tossed aside: a woman embittered of life, scorning all men.

Gary Cooper, happy go-lucky soldier of fortune, a private in the French Foreign Legion, is a young man without an illusion, even when he makes a play for the girl, beautiful Marlene Dietrich, a cafe singer, whose ravishing charm also interests a man-of-the-world, Adolphe Menjou.

Institute Having Flower Show

Saturday Afternoon, June 20, is Date—Paying Bounty Gopher Kill—Will Show Needlework Vancouver and Victoria Fairs.

The June session of Creston and District Women's Institute transacted a variet of business at the meeting on Friday afternoon, which was in charge of the president, Mrs. C. F. Hayes, and attracted an attendance of 25.

Miss Edith Crawford, who has been secretary for the past year, tendered her resignation, which was accepted with considerable regret, and the matter of securing a successor left with the directors. It was agreed to pay a bounty on gophers killed, in co-operation with the Farmers' Institute, and the decision was in favor of having the usual flower show.

For the hospital committee, Mrs. Jas. Cook reported the arrival of material for sheeting and gown making, and already material had been given out for the making of half a dozen of these garments. During the month there had been donations of sheets, feathers, cotton rags and tinfoil.

For the home industries committee, Mrs. R. Stevens stated that a fine lot f needlework was coming in for the institute's collection to be shown at the Vanconver exhibition toward the end of August, and also at Victoria exhibition that comes at the end of the same month. Mrs. Stevens was authorized to secure material and to supervise the institute's needleworkers in the making of a comforter which will be shown at these two fairs.

For the home economics committee, Mrs. Jas. Cherrington very efficiently demonstrated the candying of fruit using both a French and an American receipe. In connection with school work it was decided to offer a bounty of one cent per tail on all gophers killed by pupils attending Creston s chool. This effort will be supervised by Mrs. Mallandaine, who is hoping the Farmers' Institute will pay a like bounty to encourage the slaughter of these pests, which are more numer us than ever this year.

FLOWER SHOW

The annual Flower Show under the auspices of Creston and District Women's Institute will be held in Trinity United Church Hall on SATURDAY, JUNE 20th, from 3 to 5.30 p.m. Afternoon Tea and Sale of Home Cooking in connection.

First and Second Prizes will be awarded also several special prixes.

The Secretary, Miss Edith Crawford, will be obliged if exhibitors will send in their entries as soon as possible, though these will be received up to June 19th. The following is the list of classes.

1. Iris, collection.
2. Roses, 3 blooms.
3. Pinks, 6 blooms.
4. Sweet William, 3 sprays, assorted.
5. California Poppy, vase.
6. Oriental Poppy, vase.
7. Any other variety Poppy.
8. Snapdragon, 3 stalks, assorted.
9. Canterbury Bells, 3 stalks.
10. Foxglove, 3 stalks.
11. Shasta Daisy, 3 blooms.
12. Cornflower, vase.
13. Pansy, collection.
14. Peony, 3 blooms.
15. Delphenium, 3 stalks.
16. Petunia, collection.
17. Cape Forget-Me-Not, vase.
18. Columbine, 6 sprays.
19. Pyrethrum, collection.
20. Any other variety of flowers.

HOUSE PLANTS

22. Geranium.
23. Begonia.
24. Fern.
25. Primula.
26. Any other variety house plant.

SPECIAL PRIZES.

28. Single Flower in bud, vase.
29. Best single entry.

To non-members of the Institute there will be an entry fee of 25 cents for each competitor.

Exhibitors must provide plain glass containers for their own exhibits.

The directors were given authority to handle the 1931 flower show to be held in Trinity United Church hall on Saturday afternoon, June 20th from 3 to 5.30, along with which will go a sale of cooking and afternoon tea. Committees were named as follows to handle the fair: Hall, Mrs. Stevens, Mrs. Cherrington. Tea, Mrs. Archibald, Mrs. Lowther, Mrs. Crawford, Mrs. Cook, Mrs. Martin (Sirdar). Home cooking sale, Mrs. Maxwell and Mrs. J. E. Johnston. For this year there will be no canvassing for prizes, as these will be paid out of the regular funds of the institute.

The tea hostesses were Mrs. W. M. Archibald, Mrs. M. Young and Mrs. W. Kernaghan, with the freewill offering amounting to $1.80, which is earmarked for the crippled children's fund.

Alice Siding

Mr. and Mrs. Frank Martin and baby daughter of Shepard, Alberta, arrived in by auto at the end of the week on a visit with his parents, Mr. and Mrs. J. C. Martin.

The rains of Tuesday and Wednesday were most welcome. They will help out the later varieties of strawberries as well as the raspberries and all garden stuff.

Strawberry picking is under way but due the prolonged dry weather shipments are light, and are being taken to Creston for shipment. Rudolf Carr is this year in charge of the shipping at the Reed & Mather stop.

Mrs. Bill Kelly and daughter, Jennie, of Elko, are here on a visit with her mother, Mrs. John Marshall.

A new poultry house has been erected on the W. A. Pease ranch to replace the one destroyed by fire about a month ago. No move has been made as yet to replace the barn and other buildings destroyed.

Alice Siding school will have one pupil writing on the Grade 8 examinations at Creston commencing on the 26th in Betty Stace Smith.

School will close on the 25th as Principal Freaney has been named to supervise the Grade 8 examinations at the Wynndel centre, which commence on the 26th.

The rai : of this week will hold up the alfalfa harvest which got nicely under way the latter part of the week.

All are welcome to the social dance at the schoolhouse this (Friday) evening, June 19th, commencing at 9 o'clock. Good music has been arranged for. Ladies please bring refreshments.

Canyon City

Mr. and Mrs. Grover Kifer arrived home from their wedding trip on Wednesday last, and left immediately for Canal Flats, where they will reside.

The United Church Ladies' Aid are having an ice cream social at the hall on Saturday evening.

Canyon Cougars softball team won the final game of the season against the Creston Wildcats at Creston on Monday evening. The score was 12 to 8.

A. A. Bond, who has been working on a plastering contract at Rossland for the past couple of weeks, has returned home.

Chas. Pipe, who has been working in the Nelson district for some time past, is home again, and expects to go on duty shortly as forestry lookout on Goat Mountain.

For the first time on record Frank Putnam beat the rain to it in getting off the alfalfa crop on his corner acreage. He had the last load under cover a few hours before Monday's rain set in.

Harry VanAckeran, who has spent the past three years in Antwerp, Belgium, where he was at school and employed by a large shipping company, arrived home at the end of the week.

Quite heavy rains on Monday and Tuesday nights will help out garden stuff considerably. So far this year it has been so dry that even the weeds have failed to make their usual growth

The most serious forest fire of the season broke out on Monday on the flats at Goat river and a crew of about 25 men were rushed to the spot and by hard work prevented the flames spreading into a considerable quantity of ties and posts piled in that locality and belonging to A. G. Samuelson.

Directors Decide Have Fall Fair

Name Committees to Handle Prize List Reconstruction and Financing — Redrafting Sports Program—Sewing Class OK.

Creston is to have its annual fall fair. This was the quite unanimous decision of the directors of Creston Valley Agricultural Association, who met in special session at the town hall on Tuesday evening, with the president, Frank Putnam, in the chair, and a full turnout of the directorate The prize list co mittee had a session at the close of the meeting and revised the needlework class and this will be published next week so that exhibitors can start to work at once.

A committee consisting of Mrs. H. W. McLaren, D. Bradley, C. Sutcliffe, Chas. Murrell and the president was named to devise improvements and new methods in the 1931 prize list, and the securing of finances for the successful staging of the fair, this committee to report back to another meeting within 30 days.

H. W. McLaren was named a committee of one, with power to add, to overhaul the sports features of thr second afternoon of the fair. It was decided that for this year all exhibits in canned goods should be in pint containers.

Vice-president Chas. Sutcliffe reported on successfully carrying out the work previously assigned the president and himself, of getting the village council to put a floor in the main building. A letter of appreciation will be sent the council and along with it will go a request that better protection be given the building in the way of preventing the juveniles from breaking into it on occasion. It was thought that if a drinking fountain were installed at a convenient place outside the building such a convenience would do away with the bad habit that has developed of getting into the building for drinking water.

Lister

Birth—On June 11th, to Mr. and Mrs. Kin. Demchuk, a son.

Mrs. Hobden left at the end of the week for Toronto, and expects to spend the next year on a visit with relatives in that city and other points in Ontario.

Gravelling is expected to start this week on the North and South road diversion from the Hurry corner to the the Idaho boundary.

R. T. Millner is working the Lister area this week taking the official census, and will probably complete the work this week.

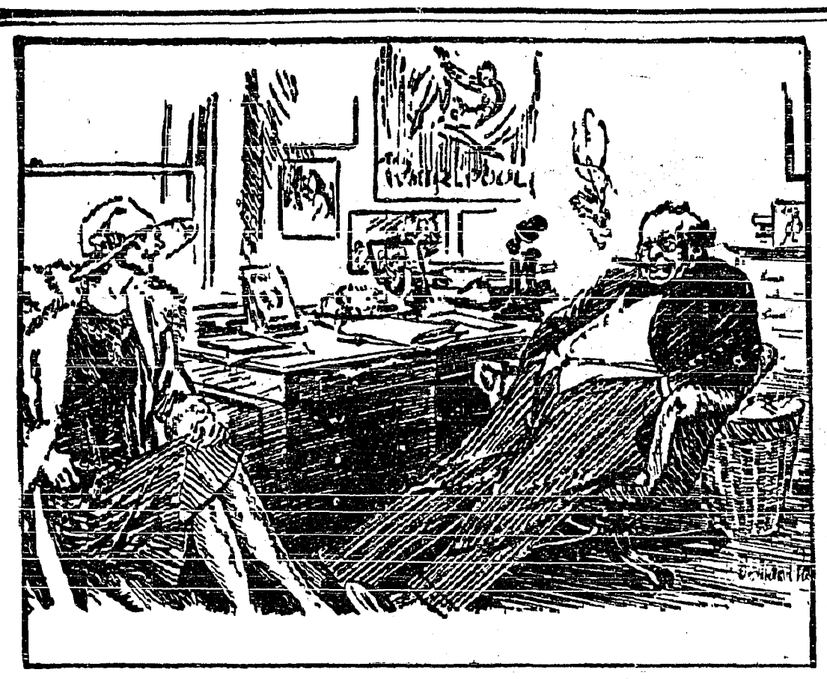
R. Wilson of Nelson, who is working the valley in the interests of the Beatty Washing Machine Company, is a guest of Geo. Hurry.

Jas. Duncan, who has been in charge of the cookhouse at the Washout Creek road camp, is home for a few days. As soon as the gas shovel is repaired work will re-open at Goatfell it is expected.

The rains of Monday and Tuesday have been inopportune for the alfalfa crop, considerable of which had been cut and lying in the fields. The rain is most welcome for al other crops, however.

Sunday, 21st, is the longest day of the year.

All points in the valley, including Porthill, were represented at the Lister-Huscroft Farmers' Institute picnic on Sunday afternoon, which was largely attended. The afternoon attractions were the races and sports for the children and a baseball mate between Canyon and Porthill, which Canyon won by a score of 16 to 15, with Geo. Niblow, jr., and Jack Hale as battery. In the evening an equally exciting softball game between Canyon and Huscroft girls was played with Canyon winning 17 to 16. There was free tea, coffee and lemonade and the supper spread was an excellent one, all bringing well filled baskets.



Theatrical Manager: "What's your line?"
Applicant: "Oh-er-anything in the line of tragedy."
Theatrical Manager: "H'm. Well, let's see what you can do. Make me sob like a child.—London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

As a result of a recent change in its postal service, Poland now has a post office for every 6,300 inhabitants.

The Central Bank of Shanghai recently shipped gold bars to the value of $5,100,000 to Vancouver on the "Empress of Asia."

The Irish Free State Government rejected a proposal for establishment of a gambling casino at Bray, a seaside resort in County Wicklow.

Thirty-one French war veterans recently spent four days in London as guests of the British Legion, which has made them honorary members for their services in connection with Legion pilgrimages.

The international radio conference in Copenhagen, Denmark, at which about 40 nations were represented, ended June 9. A number of proposals were drafted for submission to the world congress, which is slated to be held in Madrid in 1932.

Delegates in Toronto to the World's Women's Christian Temperance Union Convention will carry home with them to the four corners of the earth unique souvenirs in the shape of small phials full of hard wheat from Alberta.

Economic indigestion was put forth as one of the "main contributing causes of the business ailments" affecting the United States in the "world wide epidemic of trade depression" by Senator Davis, of Pennsylvania.

Charles Lindley Wood, second Viscount Halifax, celebrated his 92nd birthday anniversary recently. He is probably the proudest father in Great Britain, for his only son is Lord Irwin, who recently retired from the high post of viceroy of India.

In behalf of enthusiasts of Charles Dickens in Toronto and Boston, wreaths were laid on the novelist's grave in Westminster Abbey, June 9, to commemorate the 61st anniversary of his death. The wreaths were composed of scarlet geraniums, Dickens' favorite flower.

Soviet School In London

A Soviet school with Russian teachers has been opened at a club in London, England, for children of the club's members, who are Soviet employees in the city. There are 20 pupils, who are taught the usual subjects, and both English and Russian, but not religion.

"No, I shall never forget the date of my husband's death. It was either 1910 or 1911."—Moustique, Charleroi.

SUNDAY SCHOOL LESSON

JUNE 21

THE SIN OF CAUSING OTHERS TO STUMBLE—TEMPERANCE LESSON

Golden Text: "It is good not to eat flesh, nor to drink wine, nor to do anything whereby thy brother stumbleth."—Romans 14.21.

Lesson: Romans 14.13-23.

Devotional Reading: 1 John 4.7-13.

Explanations and Comments

One's Responsibilty For His Brother, verse 13.—But thou, why dost thou judge thy brother? questions Paul in the preceding verses (10-12), or thou again, Why dost thou set at nought thy brother? For we shall all stand before the judgment seat of God. So then each one of us shall give an account of himself to God. Therefore, [in view of God's judgment], Paul continues, let us not judge one another any more; but judge ye this rather [notice the play upon words here] that no man put a stumbling block in his brother's way, or an occasion of falling. Instead of thinking about your brother's conduct and condemning it (verse 10), think about your own conduct, and see that it does not cause another to sin. See 1 Corinthians 8.8-13. "Stumbling block" and "an occasion of falling" are seemingly synonymous, though the first is taken to mean a hindrance and the second something that actually throws a brother down in his life's course. See Romans 9.33; Leviticus 19.14.

Another's Scruples Must Be Respected, verses 14-16. I know, and am persuaded in the Lord Jesus, that nothing is unclean of itself, in its own nature. As a "Pharisee of the Pharisees" Paul has strictly kept the Levitical law, which forbade the eating of certain animals (Lev. 11); his knowledge that nothing is unclean of itself had come to him through his fellowship with the Lord Jesus. The Greek word "koinon," unclean, means literally "common"—such food was common to the world, but forbidden to the pious Jew. Recall Peter's vision on the housetop. Nothing is unclean save that to him who accounteth anything to be unclean, to him it is unclean.

The Important and the Unimportant, verses 17-19.—For the Kingdom of God, the reign of Christ over men, is not eating and drinking; the important matters are righteousness and peace, and joy in the Holy Spirt—through His indwelling.

He who serves Christ in this way is pleasing to God and man. So then let us pursue things that make for peace, and things whereby we may improve one another, that is, let us consider what effect upon others our conduct will have.

Abstinence For the Sake Of Others, verses 20-23.—Overthrow, pull down, is the opposite of edify, build up. Possibly some of the "strong" Christians were on the point of disrupting the Church of Rome over the unimportant question of "meat," and Paul counsels them not to overthrow for meat's sake the work of God, "the Christian brother, whose Christian personality is God's work." Paul now repeats the thought of verse 14 in saying, "All things indeed are clean; howbeit it is evil for the man who eateth with offence to his own conscience. It is not good to eat flesh, nor to drink wine, nor to do anything whereby thy brother stumbleth." Compare the Golden Rule and the two Great Commandments.

The faith which thou hast,— the enlightened faith, which permits thee to see that all things are clean—have thou to thyself before God—do not proclaim it so as to offend others. Happy is he that judgeth not himself in that which he approveth. But he that doubteth is condemned if he eat, because he eateth not of faith; and whatsoever is not of faith, whatsoever is not done because one believes it to be right, is sin.

In the electric lighting industry the plant comes before the bulb, but in gardening the bulb comes before the plant.

Vital Statistics

Eighth Annual Report Covering the Year 1928 Has Just Been Issued

The Dominion Bureau of Statistics has just issued the eighth annual report of Vital Statistics covering the year 1928. Although the more important figures for that year were given out in 1929 in preliminary form, the present volume, which contains detailed anlysis for permanent record, has many features of great interest.

The report contains tables classifying the parents of children born during the year, under such headings as age, racial origin and birthplace. Tables of decedents are presented under similar headings, and special attention is given to treatment of causes of death according to age, nativity and conjugal condition, while the occupation of the decedent is tabulated for certain causes. Marriages are classified according to the ages, birthplaces and religions of the contracting parties. Statistics of births, deaths and marriages are also given in detail by localities. The report contains special tables for the Indian population and for the Yukon and the North West Territories.

A very full analytical introduction is included in the volume.

Great Lakes' Level Exceptionally Low

Will Hamper Fall Grain Movement Unless Rains Excessive

Movement of the grain crop down the Great Lakes will be considerably hampered next fall unless this summer sees an excessive rainfall throughout Ontario, Manitoba and middle western United States.

Such is the conclusion to which hydrographic experts in the Department of Marine at Ottawa are irresistibly driven following a check-up of the water levels of the Great Lakes and the St. Lawrence River.

Figures gathered by the department show that these levels are far below the average for this time of year.

Believes Wars Are Inevitable

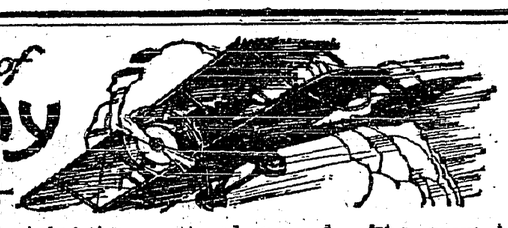
British Scientist Says Mother Nature Uses Wars For Pruning Hook

Man's dream of a world without war can never come true, Sir Arthur Keith, the British scientist, said in an address at Aberdeen University where he is the rector.

"Nature keeps her human orchard healthy by pruning," he said, "and war is her pruning hook. We cannot dispense with her services."

That "harsh and repugnant" assertion was wrung from him, he said, even though the future of his own dreams is a time of everlasting peace.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE



WHAT CAME BEFORE: As Captain Jimmy and his new found friend Jed Stone race away from the Chinese bandits in an old railway locomotive, Jed tells how his brother had been captured by outlaws, and of his vain search.

As Jed told me the story of how his brother had soundly thrashed the bandit chief and how they had carried him away into the hills in revenge, it suddenly occurred to me that these outlaws were the same band from which I had recently escaped.

We were so interested in our plans for getting him free, that I failed to notice another train rounding the curve, until its whistle shrieked a warning. To make matters, worse we were backing up, instead of running forward and our string of freight cars would soon be reduced to matchwood between the heavy locomotives.

The brakes would never stop in time—I switched to full speed ahead in hope that I could lessen the impact. The wheels spun and hissed, and it seemed that our locomotive must jump the track.

Too late! There was an ear-splitting crash and it just felt as if some big giant had kicked the locomotive right out from under us. It seemed as if she were going to turn right over, but somehow it held to the rails.

Looking back we saw a wreck indeed. The engine had plowed into the rear of our train of ten frieght cars. The first three were a mass of splinters, the next two were crossways on the track. The engine itself, after causing all that trouble had jumped the track, and now lay on its side in the ditch steaming and fussing at a great rate.

The tracks looked as if a cyclone had just passed by. Rails were torn up, and ties scattered around. The crew had luckily jumped, and taking no further chances, promptly fled.

"I guess we had better get out of here before someone blames us for all this," chuckled Jed Stone. "First thing you'll know some one or other will want their old engine back"—let's go.

It seemed best to leave the freight cars right there. As quickly as I could, I uncoupled the engine, climbed into the cab and opened the throttle. After roaring along for a few miles an idea occurred to Jed Stone.

"How about cutting the telegraph wires?"

True enough, in a few minutes the crew might decide to return and telegraph ahead, and then there'll be a whole parcel of Chinese troops waiting for us, asking where we found the engine. We slowed down to a stop. In a moment I climbed out and cut the wires.

We were still in enemy territory, many many, miles from Shanghai. Somehow we must get to our airplane and get going. Every moment's delay meant just that much less chance of rescuing Jed Stone's brother, Guy, alive. On and on I pushed the old engine, as fast as I dared.

The country was flat and uninteresting. Most of the timber had been cut away years before, and the ground almost barren of vegetation. Mile after mile passed by, and after a time we began to see an occasional solider walking along the tracks. Then a large wood began to appear on our left, stretching away to the horizon.

(To Be Continued.)

Any of our young readers writing to Capt. Jimmy" 2010 Star Bldg., Toronto, will receive his signed photo free.

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. - - - Pound and half pound tins at your grocers

New Experimental Farm

Will Serve Large Area Of Three Million Acres In Southern Saskatchewan

The new experimental farm of the Dominion Government located two miles south of Regina and a mile east of No. 6 Highway, which recently opened, will serve the Regina-Moose Jaw-Weyburn area which comprises some 3,000,000 acres of heavy clay soil. Soil drifting will be one of the problems to be investigated at the farm, also weed control, comparisons of different methods of summer-fallow land for seeding, preparing stubble land for crop, the economic value of forage crops and their relation to the general problems and intensive studies of weeds prevalent in this area.

The average man is like a match. If he gets litup, he loses his head.

Claim 'Plane Speed Record Exceeded

Trial Flights Of Schneider Cup Pilots Were Speedy

The world's airplane speed record of 357 miles an hour, made by Squadron Leader August H. Orlebar in 1929 was reported to have been broken several times by pilots in training for the Schneider Cup races.

While the figures have not been given out, it was understood pilots exceeded 360 miles an hour while driving racing seaplanes in trial flights.

Army Of School Teachers

There were 9,640 students training as teachers in the 46 normal schools and in 12 of the universities in Canada in 1930. About 70,000 men and women are annually employed as teachers in the schools of Canada.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

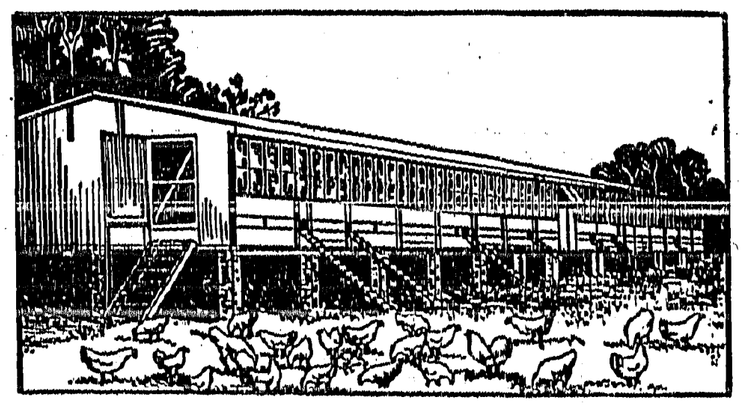
WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE



USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER XX.

Angela was in her element. To be the only beautiful woman aboard a yacht sailing amid fairy isles — to have the daily companionship of a man who, her husband had implied, was adamant to her charms, and to realize that he was keenly aware of them—to have even as antiquated a male as Colonel Nowell eager for her favors, was the breath of life to her. In no way could Amy Myer be regarded as a rival. She was not beautiful, and it was evident that she cared not a snap of her fingers for the admiration of either Nick or the Colonel.

Myer himself was on his good behaviour, and Angela was too absorbed in her conquest of Nick to feel chagrined at the fact that not once had her host manoeuvered to be alone with her. Possibly the presence of his small daughter, to whom he was unquestionably devoted, made a difference. Indeed, little Marjorie was the only rival whom Angela feared, for to Nick the child was a source of unfailing entertainment. Sometimes for entire mornings they would sit on deck playing some ridiculous game, while Angela temporarily deserted, inwardly boiled with rage, and wondered why the Myers should take a child on a trip of this sort.

Nick grew to like Mrs. Myer. Her blase manner which had repelled him last summer at Bakersville, seemed to drop away on shipboard. At little Marjorie's entreaty she sometimes joined in their games; and with her child, at least, she was unaffected.

And Amy Myer liked Nick. It was on a night when he and Angela had entranced them all by singing together in the quiet, tropic starlight, that, in the privacy of their own stateroom, she confided that liking to her husband.

"He's a nice fellow, Nick Hastings. It makes me tired to see Angela set her cap for him. She doesn't make much headway; but I tell you what, George Myer, if I find her succeeding as I've watched her succeed with — others, we'll put for the nearest port."

"Oh, I guess Hastings sees through her all right. He's not in the infant class," answered Myer indifferently.

She said, her back to him: "And how about yourself—last summer — on the terrace at Bakersville?"

Myer was bent low over a refractory shoe-lace. When he lifted his face it had acquired a brick-red color that was not the result of tropic sun.

"What do you mean?"

Amy removed a last hairpin, and shook out the wonderful coils of soft, dark hair which was her only beauty.

"So you thought I didn't know, my dear? I fear you were careless. As it happened, I was on the other side of that lilac bush; and if I'm not mistaken that freak of a maid was in the dining room, directly behind you. Next time——"

"You know jolly well that there won't be a next time," he said gruffly. "There wouldn't have been—that, if it hadn't been for the moon, and a damn pretty woman thrown in."

"Yes, she's pretty," admitted Amy.

She drew a quick sigh as her eyes met her own image in the mirror. Myer heard it, and felt, amid disgust at his own weakness, a sudden, long-dormant protective tenderness for his wife. He arose, limping twoard her on one shoe, and lifted a strand of her beautiful hair.

"Can she beat that?"

"But—but it's all I have, George."

"I'm damned if it is! Do you think for a minute——"

She turned, smiling up at him, her eyes bright.

"No, I don't; but I didn't like her making a fool of you, my dear. That's something no woman who loves her husband likes to see. And she did make a fool of you, George—you can't deny it. It was to prove to myself that my faith in you was unshaken, that I asked her to come with us on this cruise. But I don't like her playing with Nick Hastings. He's got a wife of his own."

Well he hasn't forgotten her—yet; and it's my opinion that he enjoys the kid darn sight more than he enjoys Angela."

He still held the strand of her hair, a bit awkwardly.

"Amy," he hesitated, "I—I'm sorry about last summer. I don't know what got into me, but——"

"I do," said Amy, "and because I understand, I forgive you; but just look out that it doesn't happen again. George."

"I can promise it won't. I've never broken my word to you, have I?"

"No. Perhaps that's my reason for trusting you."

She gently loosened the fingers that held her hair, and began brushing it with sure, swift strokes. Her husband watched her a moment silently; then sat down and unlaced his other shoe. No more words passed between them; but later when he kissed her goodnight, he told himself that he was a miserable cur, and that his wife was the most wonderful woman in the world, which, after all, is a healthful state of mind for a married man.

These were enchanted days to Nick, though at times he worried at the thought that he was accepting a good deal from mere acquaintances. He said as much one morning when he and Amy Myer were playing at shuffle-board with Marjorie, whom Nick had taught to be fairly skillful.

Amy smiled.

"My friend, you're worth your weight in gold just as a nursemaid! I've never taken Marjorie on a cruise and had so much leisure for myself. The child adores you. If there's any obligation it's on our side."

Angela, who had been watching the game, gave vent to one of her bored shrugs.

"Isn't that a unique way to regard one's guest—as a nursemaid?" she queried languidly.

Nick laughed; but Amy replied unsmiling: "Better a nursemaid than a lady's man, I think, or—or a tame cat."

Their eyes clashed for a moment; then Angela looked away. It was like a sudden unsheathing of swords, which Nick, happily unconscious, did not see. He laughed as he said: "I don't mind in the least being regarded as nursemaid, Angela. Gay says I'm a corker! I can do most anything for the kids that she can, from washing ears to telling bedtime stories."

Her lip curled. For the moment she was angry with him.

"I see. You are then, a sort of mother's-helper?"

The words were spiteful. Amy smiled, and thought: "A few more speeches of that kind, and my lady will give herself away." Nick, however, was still good-natured, as he answered:

"That's not a bad shot, Angela; but it doesn't hurt. I'd be ashamed not to be something of a 'mother's-helper' when I've got two kids and no nursemaid to look after 'em. And I wouldn't miss the fun of it, either. Say! your husband's just finding it out! He has great times with his small protegee."

He regretted the words almost instantly. His regret deepened when he saw that Angela had flushed; but she replied evenly: "Yes, Jim has been devotion itself to—Bakersville. Are you so blind as to imagine that Martha is the attraction?"

She met his puzzled eyes with a mocking glance that baffled him. Amy Myer, watching intently, felt suddenly that there was some horrid meaning behind Angela's remark. It was a call to lunch that interrupted the question on Nick's lips, and caused Angela to give thanks to her lucky star. Her irritation had carried her beyond her depth. Next time, she thought, she must be more careful.

It was a week later, one evening when little Marjorie had gone to bed, that Colonel Nowell quite innocently set off a bomb—at least, it was a bomb to Angela, and supplied food for thought to more than one of the party.

The day had been unusually oppressive, followed bu an evening of moonlit beauty that seemed to filter through the hazy atmosphere. The sea was like glass; the air balmy, and fragrant with the scent of some wild shrub, wafted from an island that they were to explore next day. Angela, in high good humor because Nick's chair was close to hers, was crooning a negro lullaby that fitted exquisitely the time and place. Her voice, softly muted to suit her audience, brought to each one some tender memory.

George Myer reached for his wife's hand and clasped it. Colonel Nowell's thoughts were thirty years away, visioning another moon-lit night on the coast of Maine. Nick was thinking of home—wondering if the babies had grown—seeing the look in Gay's eyes when he kissed her goodbye. It was a moment of pure enchantment. Then the voice ceased. It was the Colonel who broke the silence that followed.

"Are any of you familiar with the state of Maine?"

There was a murmured assent. No one seemed yet quite ready for conversation. As the moonlight fell across her knees Amy withdrew her hand from her husband's clasp, and Nick, with an effort, brought himself back from Bakersville.

"Nothing to my mind is lovelier than the coast of Maine," the Colonel was saying. "Went there thirty years ago, and haven't missed a half a dozen summers since. Stayed most everywhere from Bar Harbor to York. It's all beautiful; but give me good old Painter's Neck for a steady diet."

(To Be Continued.)

Praises Famous Vegetable Pills For Indigestion

"Having been troubled with Indigestion and Sick Headaches for several months, I was recommended to try your famous Pills. After the first dose I was made aware of their very real tonic value."—Miss M. Croydon.

Dr. Carter's Little Liver Pills are no ordinary laxative. They are *all vegetable* and have a very definite, valuable tonic action upon the liver . . . exactly what you need to end Constipation, Acidity, Biliousness, Headaches, Poor Complexion, etc. All druggists, 25c & 75c red pks.

NO MORE ECZEMA

Itching Ends Right Away

"I had eczema for several months. Single application of 'Sootha-Salva' ended itch and burn right away. My skin is now clear." Jane Paula. "Sootha-Salva" is quickest known relief for eczema. Itching stops; scales go. All druggists.

Good-Bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape as from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

Prehistoric Man

Discovery Made Of Skull Of a Child Believed To Be 30,000 Years Old

A discovery which is expected to prove of great importance in throwing additional light on prehistoric man was made by the young archaeologist, Theodore McCown at Wady Moughara Athlit, says a dispatch from Jerusalem.

It is a child's skull of the Mousterian age, of the same type as the "Galilee skull" found on the shore of the Sea of Galilee in 1925.

The present skull is estimated to be 30,000 years old.

Switzerland sent nearly 575,000 wrist watches to the United States last year.

Bees Give Pilot Lively Ride

Hive Broke While Being Transported From Marseilles To Paris

Casanova, one of the pilots of the Air Union Line, will be careful hereafter about who he "takes for a ride" even if he loses his job as a result of it.

On his recent flight from Marseilles to Paris, a distance of 500 miles, he carried a consignment of bees, ten hives in all. As they were carefully stowed away in the baggage compartment of his 'plane, he never gave them a thought until some so-called airpockets and the cries of his three passengers brought them forcibly to mind. After one of the lurches of the machine a hive had fallen to the floor, broken open and released the bees. For a minute or two they had tried to get back to their cells. But finding that impossible and sensing their freedom, they had invaded the cabin and tried to escape through the windows which were unfortunately closed.

The passengers recovering somewhat from their fright, protected their heads with whatever they possessed in the way of scarves, coats and handkerchiefs. And thus they remained until their arrival at the aerodrome.

The unfortunate pilot, however, outside of pressing close his goggles, tightening his ear flaps and buttoning high his coat, could do nothing but keep his hands on the controls. Raising one, he found, only attracted the bees and irritated them all the more. Occasionally some of them alighted on his face and a few left their stings. By rare good luck he had put on his gloves before starting and that saved his hands.

When the 'plane taxied up to the landing on arrival and the attendants had opened the door, the bees poured out and it was some time before they were led back by the queen bee to the hive re-erected outside.

It was a record run, but, as Casanova says, "Never again."

THE RHYMING OPTIMIST

—By Aline Michaelis—

A CHILD'S WORLD

So vast, so wonderful, so new,
So full of gleam and gold;
Oh, little child, I envy you,
Who see this world unfold!

It is a world of lovely things
All made for your delight,
By day a world that smiles and sings
Your mother's arms by night!

Here fairy tales come true, sometimes,
Here no deceit can dwell;
To hours as sweet as silver chimes
Life flows, and all is well.

Though soon into your world must creep
Some cares, while joys depart,
You can be blest, still, if you keep
A child's glad, trustful heart.

Barber's Itch and Ringworm are relieved by the use of Douglas' Egyptian Liniment; quick, certain results. Relieves the most obstinate cases.

A New World

Sir Oliver Lodge Believes There Is a Spiritual World Which Interacts With the Material World

Sir Oliver Lodge, nearing 80 years of age, is quoted by the London Daily Mail as predicting that the next revolutionary development of science will be the discovery of a "new world."

"It will be a spiritual world which interacts with the material world and yet is not of it," he said. "It will be discovered that man isn't the highest being in which we have cognizance, but that there is a multitude of other intelligences, some of them far more highly endowed than ourselves."

Referring to his 80th birthday, he said:

"As long as a man can keep well there is plenty for him to do, whatever his age. But it is no good dawdling along in a state of senility. A man may be young at 70, and we should aim at living to be 100."

The conjurer was announcing his act. "I have had telegrams of appreciation," he said, "from people in Ireland, Wales, and England, and also a postcard from Scotland."

At Last! The Truth About PIMPLES

Pimples, acne and blackheads are caused by a rundown, disordered system, by those harmful acids and toxins which make your skin break out.

So if you want swiftly to rid yourself of that ugly, blemished complexion and to obtain beautiful, smooth and soft skin for all times—eyes sparkling like diamonds—superb daily health—take Kruschen Salts.

Kruschen Salts are a perfect blend of the six vital salts which nerves, glands, blood and body organs ought to receive from food if they're to work properly—but it's simply impossible to obtain these salts in these days of modern cooking.!

Therefore take Kruschen Salts in a glass of hot water every morning before breakfast—this quickly puts back these precious minerals into your system—and drives out harmful acids and toxins, assuring you enviable and glorious youthful beauty and health.

Little Helps For This Week

"And the angel said unto them, Fear not; for, behold, I bring you good tidings of great joy, which shall be to all people. For unto you is born this day in the city of David a Saviour, which is Christ the Lord."—Luke ii. 10, 11.

And clear today as long ago,
The angel chorus echoes still,
Above the clamour and the throe
Of human passion, human woe;
"Good-will and peace, peace and good-will."

Through eighteen hundred stormy years,
The dear notes ring and will not cease;
And past all mists of mortal tears,
The guiding star rebukes our fears;
"Peace and good-will, good-will and peace."

—Susan Coolidge.

If we will really persevere in our endeavours and in our prayers, we may be sure that He who was on this day born into the world,—the Saviour of sinners,—and who grew up as a tender plant in a dry ground, will cause the dry ground of our hearts to become fruitful, and the seed of grace to spring up, first the blade, then the ear, then the full corn in the ear.—Peter Young.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Eclectric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sickness. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

A Stein Of Milk

Germany University Students Are Said To Be Giving Up Beer

German university students who have long figured in song and story as gallant bolsters of the beer stein are taking to milk under the tutelage of the Women's Christian Temperance Union, according to Dr. Bertha Kraus, graduate of the University of Frankfurt, who addressed the W.C.T.U. convention at Toronto.

"We have opened a big restaurant —without alcohol—on the campus of the University of Cologne, and you can find there several hundreds of fraternity students sitting in the garden with a bottle of milk," said Dr. Kraus.

Office Boy—"There's a travelling salesman waiting outside, sir — man with a moustache."

Boss—"Tell him I've got a moustache."

PREMIER GARAGE

CRESTON

SUMMER HOMES should have this FIRE PROTECTION

FAR from every hope of aid if a blaze takes hold, the inflammable construction of the average summer home makes it a source of danger and anxiety.

Minimize the fire hazard by lining inside walls and ceilings with inexpensive Gyproc Wallboard that *does not burn.*

This building material is made from gypsum rock into sheets 4 to 10 feet long, 4 feet wide and ⅜ of an inch thick. It nails and cuts as easily as lumber and with minimum waste.

Find out from your dealer how inexpensive Gyproc is; how easy to erect. Ask him for full information about its application or request a direction sheet from him.

Besides being fire-resistant, Gyproc has structural strength and insulation value. It is also draught and vermin-proof.

By panelling, you can save the expense of decoration, yet Gyproc is an excellent base for Alabastine, Gyptex or wallpaper.

Send for the free booklet, "Building and Remodelling with GYPROC" 371W

CRESTON, B.C., FRIDAY, JUNE 19

HOME BREW

In Vancouver, where the unemployed are beginning to get out of hand, the latest demand on the city authorities is for work at $12 a week for single men, and $25 per week for married laborers. The demand should commend itself to finance minister Jones. Both classess of recipients would have to pay the new provincial income tax of one per cent.

"Help the hospital" donation boxes have been placed in the business places in town, and those interested tell us that, judging by the rattle, the one in the government vendor's is receiving the most liberal consideration. Apparently the boys who buy the liquid refreshment wherewith to drown their sorrows, or divers other causes, are not unmindful of the physical troubles humanity meets up with from time to time.

Instead of its premptory order prohibiting the removal of black earth from the flats at Creston the department of lands would have been better advised had it arranged for the sale of the loam at so much per load during the spring and autumn seasons at which time forestry officials could have looked after this work at no extra expense to the department. As a top dressing the black earth is in considerable demand, and heaven only knows the authorities at Victoria need the revenue.

If long service medals were awarded in connection with board of trade activities a couple of the local organization would be entitled to this decoration. Twenty years ago the Associated Boards of Trade of Eastern B.C. had their annual convention at Creston with an attendance of about 100. An oldtimer at this year's gathering pointed out that of the 1911 delegates but five were on the job this year. They were Col. Mallandaine and C. O. Rodgers of Creston; T. W. Bingay and Noble Binns of Trail, and L. A. Campbell of Rossland.

The board of trade resolution suggesting that the government cope with unemployment in this section by having all likely government-owned land in the district cleared and made ready for cultivation has a great deal of merit to it in view of the unusual influx of improved-land buyers this season. However, it is to be hoped none will become over-enthusiastic as to the policy being adopted. A stand pat administration like that at Victoria will find the unsold acres at Camp Lister a sufficient excuse for doing nothing.

The Cranbrook Courier last week celebrated its thirteenth birthday, but notwithstanding the prevailing depression and the unlucky angle to the anniversary, the Courier views "the future of Cranbrook and East Kootenay through the eyes of an optimist," and predicts that "the four-day week will be adopted for all workers, which will provide everyone with sufficient employment to comfortably support a family aud provide something for a rainy day." Oldtimers in orthodoxy would appreciate hearing from Editor Sullivan as to where he gets his authority to amend the fourth commandment, which is most emphatic with its "six days shalt thou labor."

In connection with handling the unemployed this winter press despatches would indicate that Premier Tolmie is seriously considering opening up camps where men could be quartered while working on necessary public works at a low rate of pay, which would inclund board. This is primarily to take care of what are known as "drifters" and in theory it has much to commend it. In practice, however, it is not likely to be quite so good. These "drifters" run largely to "reds" and communists and the presence of these in large numbers in camps is liable to create a situation such as now exists in Edmonton, Alberta, where it has been necessary to have the militia handy in case of emergencies.

With Canyon City the only district in the Valley to express a desire to get in on the proposed consolidated high school at Creston it seems pretty certain this improved educational facility will not be forthcoming this year, at any rate. Creston has no occasion to quarrel with the indifference that is being shown in this connection, but it is well to point out that if any inconvenience is suffered it will be felt by the rural districts. Creston has ample room, and two teachers will be sufficieut to take care of high school material from within the local school boundaries, but there will be no room to spare. And if there should be room for a few it is questionable if they will be accommodated. The local trustees are not likely to leave themselves open to the accusation of playing favorites by admitting even a few outside students.

Local and Personal

Birth—On June 14th, to Mr. and Mrs. Bert Malone, a daughter.

Services at Christ Church on Sunday will be at 11 a.m. and 7.30 p.m.

FOR SALE—Ford touring car, in good shape, $100. F. W. Ash, Creston.

Miss Hazel White of Fernie is a visitor this week with Miss Josephine Pedersen.

Dr. McKenzie, Alf. Speaker and E. Whitfield were weekend visitors with friends in Nelson.

Harold Speers of Trail spent a couple of days at the weekend with his parents, Mr. and Mrs. S. A. Speers.

Sunday's baseball attraction will be a game between the Courthouse nine of Spokane and Creston, at 3 p.m.

FOR SALE OR TRADE—Ford light delivery, in good shape, or will trade on milch cow. N. Husband, Wynndel.

COW FOR SALE—Registered Jersey, 6 years old, due to freshen September 7th, cheap for cash. C. Taplin, Canyon.

See the Valley's choicest blooms and meet your friends at the Women's Institute flower show on Saturday afternoon at Trinity United Church basement, 3 to 5.30. The admission is free.

Reach distant business by the time-saving telephone

Take advantage of the telephone speed in reaching those out-of-town customers. Time lost through writing letters or travelling in person may mean business lost, so why not use the speediest method? A few words over the long-distance telephone will quickly and effectively dispose of the matter in hand.

Kootenay Telephone Co.
LIMITED

According to Rod and Gun Club members robins are much more numerous this year than for several season's past

Mrs. A. North and Mrs Martin of Sirdar were Creston visitors on Friday for the June meeting of the Women's Institute

Miss Irene LaBelle of Calgary, Alberta, arrived on Sunday on a visit with her parents, Mr. and Mrs. F. LaBelle at the Creston Hotel.

According to the Herald strawberries from the Barnwell, Alberta, district are competing with the Creston berries on the Lethbridge market.

Mr. and Mrs. B F. Whiteside of Crowsnest spent a couple of days here this week, guests of the latter's parents, Mr. and Mrs. W. T. Simister.

Geo Garo, who has been with the Steenstrup blacksmith shop for the past year, left at the first of the week for his home at Pincher Creek, Alberta.

Miss Mary Goodwin, who has been attending Normal School at Victoria for the past year, arrived home on Tuesday for the summer vacation.

Provincial police R. H. Hassard was a visitor at Nelson on Saturday, occompanying one of the local indians who is doing 30 days in Nelson jail on a liquor charge.

Adam Robertson, another of the local students at Victoria Normal school, returned on Saturday and will spend the summer with Mr. and Mrs. S. A. Speers.

Robt. Thomson, Ph. G., of New Westminister, has taken a position with Creston Drug & Book Store. Customers are assured of fully qualified service all the time.

Ranchers who will be requiring the arsenate dust mixture for the control of the potato bug pest, can secure it free of cost from C. Murell, secretary of the Farmers' Institute.

Romano Bros. have just installed a Balcrank car greaser at their service station opposite the tourist park. It is operated by air pressure and gives perfect satisfaction.

Miss Jessie Learmonth is a Nelson visitor this week where she is writing on a couple of subjects on which she failed in fourth year high school examination work last midsummer.

Mr. and Mrs. T. R. Lougheed of Maple Creek, Sask., were Sunday visitors with Mr. and Mrs. M. R. Joyce. They were returning home by auto after an extended holiday at Victoria.

Mrs. (Dr.) Lillie returned from Calgary, Alberta, on Saturday, and is expecting to leave very shortly to make her permanent home in that city, where she has purchased a residential property.

Miss Mary Goodwin and Adam Robertson, Creston's two students at the Provincial Normal School, Victoria, were successful in passing their examinations. The results were announced on Wednesday.

Creston had one bad inning—the opener—in Sunday's baseball clash ith the Snowflakes of Spokane, in which the visitors annexed six runs, which was ample to win the game for them by a 14 to 8 margin.

The Frothblower-Wildcat softball clubs had another fine turnout at their second dance of the season at the community hall at Canyon on Friday night, for which music was supplied by Creston orchestra.

A lawn social under the auspices of Christ Church Woman's Auxiliary will be held at Mrs. Payne's residence, Canyon street, Saturday, June 27th, 7.30 to 11 p.m. Strawberries, ice cream, home cooking.

A splendid chance to secure furniture, etc., presents itself on Saturday afternoon, June 27th, when Mrs. Lillie is having an auction sale of her household effects at her residence on Victoria Avenue, at 2 p.m.

The Spirit Of Adventure

Sir Edward Grigg, Governor of Kenya, one of Britain's East African dependencies, who is at present on furlough in England, recently delivered an interesting address in which he noted a decline in the old British sense of adventure and made an appeal for a re-kindling of this spirit in the new generation. Without it, he held, the new generation would not be the equals of their fathers, grandfathers and great-grandfathers,—those three generations that, practically within the reign of Queen Victoria, had built up the Empire as we know it today.

Decline in this sense of adventure Sir Edward attributed to the nervous depression produced by the Great War, and he urged that a revival of it would tend to promote support at home for development overseas, and that this would keep Britain and the Empire strong.

It maybe that Sir Edward is right and that the old roving spirit which sent Englishmen, Irishmen and Scotsmen into all the nooks and corners of the world, civilized and uncivilized, and which in years gone by brought Canada, India, a large portion of Africa, and many of the isles of the seven seas under the Union Jack, is not the impelling force it once was in the lives of British youth. But, on the other hand, is it not possibly true that the same spirit exists but in the changed conditions of the world of today it is merely finding other avenues of expression?

Tens of thousands of young men enlisted in the Great War purely in a spirit of adventure and Sir Edward is no doubt right that in that grim struggle they became disillusioned and a sense of depression followed on the heels of exhilaration. Again, thousands of the most daring spirits among the young men of this generation gave their lives in that great adventure, men who today would otherwise be found following in the footsteps of their sires and grandsires.

But is not youth today much as it has always been? Before the Great War many people entertained the opinion that mankind had become soft, that it could not face the sufferings and sustain the hardships accepted by former generations as inseparable from existence. The stamina displayed in the Great War demonstrated, to the amazement of all, how erroneous were all such ideas.

Is the spirit of adventure dead, or even on the decline? The attempt of Sir Hubert Wilkins and his companions, upon which they are now embarked, to make a dash in a submarine under the ice fields of the Arctic constitutes an adventure more daring than any that excited the imagination of a Jules Verne.

Or consider the recent adventure of Professor Piccard, and his assistant Charles Kipfer, who in a hermetically sealed aluminum ball attached to a balloon soared over 52,000 feet, almost ten miles, into the air, into that rarified stratosphere where winds do not blow, nor clouds form, but where the stars shine by day.

Then let us recall our own daring Canadian aviators who carried out the observation patrols along Hudson Straits to determine the ice conditions and navigability of that route, or who month in and month out maintain the forest fire patrols throughout our northlands, or are engaged in mapping unknown portions of Canada from the air.

All over the world daring and adventurous Britishers, including young Canadians, are engaged in engineering enterprises, building huge bridges, dams, hydro-electric plants, railways, amid jungles and in almost inaccessible places with the same zest and enthusiasm which carried their forebears into the unexplored regions of a by-gone past.

Canada this year celebrates the fiftieth anniversary of the commencement of the Canadian Pacific Railway,—a great adventure,—followed by a still greater adventure on the part of the thousands of men and women who in a few short years settled and transformed the prairies of Western Canada into great wealth producing provinces now inhabited by over two million people.

No, the sense of adventure is not dead; we doubt if it is even on the decline. For example, give a thought to the daily adventurings in the realms of science and invention where patient and courageous souls are discovering more wonderful and finer things than ever did the romantic discoverers and explorers of the past.

Today the sense of adventure is very much alive, but it manifests itself in new ways and in different channels in keeping with the changed conditions of a scientific and machinery age as contrasted with those which preceded the age of steam and electricity. That is all, and there is no ground for pessimism that the British race is losing its determination and grit.

Insanity Increases

Stock Market Losses Are Held Responsible By Mental Hospital Authority Of Quebec

Stock market losses were blamed for an increase in the number of the insane during a discussion at the American Psychiatry Association Convention at Toronto by Dr. A. H. Desloges, director of mental hospitals for the province of Quebec.

The increase of insanity in his province for the past year was 14 per cent. of the total number of cases as compared with the previous year's increase of five and a half per cent. said Dr. Desloges, and he attributed the disparity to the loss of savings by uninitiated investors. He urged government protection for the latter as a step in mental health.

Improved Method For Surveying From Air

Described By Chief Of British Topographical Survey

A new and improved method of aerial survey was described to the Royal Society of Canada by Brig.-Gen. Sir Charles Delme-Radcliffe, chief of the British cadastral and topographical survey. Originally developed in Italy, this method, said Sir Charles, was as rapid as stereoscopic surveying by air and as accurate as the old-fashioned transit survey. The photogrammetric method, which has not yet been used in Canada, is based on a series of photographs from the air, each of which overlaps the next picture by 66 per cent. It is regarded as a great improvement over surveying methods now in use.

MILBURN'S HEART AND NERVE PILLS
Price 50c a box

Suffered From Heart Trouble
Became Weak and Run Down
Mrs. Wm. Diotte, Glensandfield, Ont., writes:—"For a long period I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend H. & N. Pills to anyone complaining of heart trouble."
Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Seeking Record In Flight Around World

Youths Expect To Make Trip In Ten Days

Wiley Post and Harold Gatty, two prudent young men, have figured out the comparative hazards of flying around the world and trying to cross a busy street—and they've decided to fly around the world.

"We got an expert to look over our motor," said Post at the Hotel Baltimore, New York. "Then we figured our chances. We found we had something like 3½ chances of getting hit by an automobile for every one chance that the motor would stop when it wasn't supposed to.

"No, we're not afraid. If we were, we wouldn't go."

Post used to do what he called "rough necking" in Oklahoma oil fields, and Gatty was an Australian marine navigator.

They've got a great, shiny monoplane on which they pin their confidence of circling the globe in something less than ten days for a record.

Recipes For This Week

(By Betty Barclay)

CHOCOLATE ICE BOX COOKIES

5½ cups special cake flour, sifted.
1 teaspoon soda.
3 eggs, slightly beaten.
1 cup sifted brown sugar.
1 cup granulated sugar.
1½ cups butter or other shortening, melted.
8 squares unsweetened chocolate, melted, or
4 cups coconut, chopped.

Sift flour once, measure, add soda, and sift again. Combine other ingredients in order given and add flour last. Pack tightly in pan, 8x8 inches, lined with waxed paper. Chill overnight. Remove loaf from pan, cut in half, and slice crosswise in thin slices. Bake in hot oven (400 degrees Fahrenheit) 5 minutes. Makes 6 dozen cookies.

RASPBERRY DELIGHT

1 package raspberry flavored gelatin.
1 cup boiling water.
1 cup raspberry juice and cold water.
1 cup canned raspberries, drained.

Dissolve gelatin in boiling water. Add raspberry juice and water. Pour ½ into mold. Chill. When slightly thickened, fold in raspberries. Fill mold with remaining gelatin. Chill until firm. Unmold. Serve with sweetened whipped cream, flavored with almond extract. Serves 6.

Persian Balm is a true elixir of youth. Refreshes and rejuvenates. Adds a youthful charm to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. Soothes dry and irritated skin. Corrects and preserves. A flawless toilet requisite for every discerning woman. A true aid to beauty.

B.C. Apples

Gaining In Popularity In United Kingdom and On the Continent

British Columbia apples are gaining in popularity in the United Kingdom, on the Continent and in other world markets, according to R. Robertson, of R. Robertson Co., Limited, of Vancouver, who made a survey of the situation which included United Kingdom and the continent. He stated that the popularity of B.C. apples is assured in Europe and he looked for steady increase in demand.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

A Queer Bargain

Ten thousand cups of coffee was the payment offered by an Italian at Rovereto, Italy, for a motor car. Payment is to be on the instalment system at the convenience of the seller, but the motor car, a small second-hand model, was delivered in exchange for the promissory note. A further term on the note is that the cups of coffee are transferable and the note negotiable.

Forced Labor Spreading

Foreign Purchases Help Soviets To Enslave People, Says Duchess Of Atholl

The Duchess of Atholl in an address at London, said there are now several millions of men, women and children performing forced labor in Soviet Russia because of the speed with which the five-year plan is being pushed.

"It is estimated that over five million persons were forcibly deported under the February, 1930 decree, chiefly to the forests of the far north of Russia.

"Many of them arrived there in the winter and had no houses until they had built them for themselves. History, I think, records no such wholesale uprooting and banishment of peaceful fellow-citizens as this.

She reported that the forced labor had spread to collective farms, handling the grain and timber and other industries.

"That this enslavement is due to the five-year plan is unquestionable," she concluded. "That the shaping and execution of the plan is being assisted by foreign experts, foreign credits and foreign purchase is further undenied.

"Canada has taken action to clear herself completely of responsibility in the matter. Are countries such as the United States and Great Britain, both of which have made sacrifices in the past in the name of freedom, satisfied to do less?"

Berlin Opens Skyscraper

Only Eight Stories High But Is Tallest In Europe

Berlin's tallest building "Europa House," has just been officially opened. It is only 180 feet high, with eight storeys, but is declared to be the tallest business house in Europe. It contains 30 stores, 450 offices, several large halls, a hotel, a restaurant, a swimming pool and a post office. The roof garden has a dance floor. The building is illuminated at night with Neon lights, stretching for nearly half a mile along its front. Express elevators carry 3,000 passengers an hour.

Ship Bees To China

Bees From Alberta To Be Sent In Large Quantities Next Fall

Alberta bees in large quantities are to be shipped to China next fall, according to plans of Geo. Riedell, president of Riedell's Honey, Ltd., Taber, who was in Calgary the other day. Mr. Riedell plans to export his bees to China after the honey season here is over, to take advantage of the recent keen demand in that country, where some 1,500,000 yen is spent annually for bees imported from Japan.

Labor Minister Seeks Data On Unemployment

Is Making Survey Of Conditions In Western Canada

A survey of actual unemployment conditions throughout Canada will be conducted personally by Senator G. D. Robertson, Minister of Labor. Because conditions in Western Canada are more acute, he will start investigation there. Upon his return, a similar mission will be undertaken throughout Eastern Canada. A detailed report to the government will climax the coast-to-coast trip.

Accompanying Senator Robertson on his western trip will be the superintendent of unemployment service and the director of unemployment relief. Discussions will be held with provincial governments and representatives of the largest municipalities. In addition, first hand information on rural conditions as they exist at present and as they may exist during the fall and winter, will be secured.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

Factories Reopened In Orient

The slump in the price of soy beans in Manchura has proved a blessing for Japanese and Korean farmers, who are able to afford large quantities of bean cake fertilizer. Demand for fertilizer at the new prices has become so great that many Chinese factories making bean oil and cake have reopened after years of idleness. New factories are being organized.

BRITAIN PLANS TO PUSH TRADE WITH CANADA

London, England.—Organization of a co-operative body representing British manufacturers to stimulate sales and service in Canada is the main recommendation of the important trade mission sent to the Dominion recently by the Federation of British Industries.

The mission's report declared: "The time is passing for firms, except those of great magnitude, to endeavour individually to sell their products in Canada. Co-operation of home producers is essential in order to build up a selling and service force in Canada sufficient to meet the pressure of competition from foreign countries."

The mission also makes important recommendations urging establishment of better communications and trade facilities between Canada and Great Britain, development of a policy of competition, and the organization of an Empire trade statistical bureau. The mission consisted of Sir James Lithgow, president of the Federation of British Industries; Sir Arthur Duckham and Moir MacKenzie.

The mission confirms the attitude taken by the federation in reports drawn up for presentation to the last Imperial Conference, and, drawn up jointly with the general council of the Trades Union Congress, for presentation to the British Government last September. Special emphasis is laid in the report on the following conclusions:

(1) Development of Britain's trade with Canada must depend on acquiring new business at present in the hands of foreign countries, and development of new lines, and complementing and assisting the existing Canadian industries rather than competing with them; and on the investment of British capital in Canada.

(2) Closer commercial and industrial association between the two countries will result in an improvement in the preferential position already enjoyed by Great Britain in the Canadian market.

Many of the complaints made by Canadian importers against home exporters, of poor delivery and service, are justified and can only be remedied by closer and more personal contact, and a better appreciation of the local circumstances and requirements in Canada, the report continued.

Prospective traders with Canada are urged to make the closest study of transportation conditions, tariff regulations, etc., in order to facilitate acceptance of British goods by Canadian importers.

Greater use should be made by the industry at home of the service of the British trade commissioners in Canada, and industrial organizations should co-operate to this end, the report adds.

Gold Strikes In B.C.

Discoveries Are Reported In Two Widely-Separated Districts

Vancouver, B.C.—Reported gold discoveries in two widely-separated districts in British Columbia are attracting wide attention throughout the province.

In the northern part of the province on the Nation River, a tributary of the Parsnip River, about 110 miles northwest of Prince George, the reported placer gold discovery has attracted two precious metal seeking parties from Vancouver.

Meanwhile news of a rich ore strike on Lowhee, Ol Vow Mountain, near Barkerville, 200 miles north of Ashcroft in the Cariboo, has been brought to Vancouver by four directors of the Cariboo Gold Quartz Company, which for several years has been carrying on development and research work in the neighborhood of Barkerville, where the ore body is known to be approximately twenty-five miles in length.

Dr. W. B. Burnett, of Vancouver, one of the party just returned from Barkerville, said that in the opinion of hard rock men, the strike may yet bring on a rush to Cariboo rivalling that of the early sixties.

W. N. U. 1894

Export Cattle Trade

Assuming Much Larger Proportions Than Was Anticipated

Ottawa, Ont.—The export cattle trade is assuming much larger proportions than was anticipated, with the result that there are numerous western shippers who are unable to book space from Montreal to Great Britain.

These shippers have notified the Federal Government of their difficulties and Hon. Robert Weir is endeavouring to increase the accommodation on ships, particularly for the summer months. He has had most of the heads of the shipping companies at Montreal up to Ottawa to see him, and is trying to persuade them to outfit more ships. One of the great difficulties which has to be overcome is that the British Board of Trade regulations announced early in the year and later suspended, are due to come into full effect in September. These regulations will add much to the cost of equipping ships for the cattle trade, and the shipping companies now hesitate to go ahead on the old basis, fearing that the government will not succeed in having the new regulations further suspended. It seems reasonably certain that, failing the withdrawal of these new regulations in toto, the Canadian Government will get a further suspension probably until November 30, but this is not definitely assured as yet.

The question of providing more space is now under the consideration of the shipping companies and a decision will be reached within a week.

Freight Rates On Grain

Canadian Rates Stated To Be 25 Per Cent. Lower Than U.S. Rates

Ottawa, Ont.—Testifying before a special parliamentary committee on grain freight rates, Sir Henry Thornton said if they were regarded only from the point of view of the railways they were too low. Canadian rates were approximately 25 per cent. lower than United States rates.

At the same time consideration had to be given to the well-being of the west as a whole, and of the individual farmers. Grain should not be carried at a loss, and likewise the farmers should not be taxed too heavily.

Rates were very involved. Charges had to be made for shipping empty cars west before the crop and the revenue of the two or three months in which it moved could not be taken as a time indication of the return to the railway. If it were not for the revenue from western grain the road would be in a much worse position than it was, he added. Grain was not so remunerative as other commodities, but a railway was like a department store, what it lost on one traffic it had to make up on some other.

The average gross revenue per ton mile on general traffic was 1.08 cents in comparison with .528 cents for grain. These figures merely showed, said Sir Henry, that grain was about one-half as remunerative as general freight traffic.

Gandhi Will Go To London

Has Decided To Attend Round Table Conference In Fall

Bombay, India.—Mahatma Gandhi will go to London, England, for the round table conference next fall regardless of the situation regarding the Hindu--Moslem problem, the congress party working committee has decided.

The committee voted a resolution expressing the hope that the communal problem would be settled but asserting that Gandhi's presence in London was essential whether a settlement is reached or not.

To Safeguard Dairy Products

Bill To Make Adulteration An Offence Will Be Considered

Ottawa, Ont.—Increased penalties for the adulteration of butter and other dairy products will be considered by the agriculture committee of the House of Commons. The House gave second reading, without discussion, to the bill introduced by Samuel Gobeil (Cons., Compton) which would amend the dairy industries act by putting heavier penalties on those convicted of offences under the act, and referred it to the agricultural committee.

TO FLY OVER PACIFIC

Col. Charles Lindbergh, famous United States flying ace, who won renown by flying solo to France, has now decided to try his luck over the Pacific Ocean. Lindy and his wife, daughter of Ambassador Morrow, will take off this summer for the long flight from the American continent to Japan.

Barriers On Trade

New Canadian Duties Are Discussed In British House

London, England.—Canada's tariff changes were brought up in the House of Commons recently. Rt. Hon. William Graham, president of the Board of Trade, promised questioners that if further information revealed increases in duties against Great Britain, the government would consider the advisability of representations to the Canadian government.

P. A. Harris, Liberal, asked for particulars of the new Canadian tariff and suggested the president of the Board of Trade should make representations "as to the undesirability of fresh barriers on trade at a time of universal depression."

Rt. Hon. Mr. Graham replied he had not received details of all the recent changes, but they would be published as soon as they were received. The point raised in the second part of the question, he went on, could not usefully be considered in the absence of fuller information than he possessed at present.

Mr. Harris asked if Mr. Graham would make representations if he eventually found that some duties were increased against Britain, and Mr. Graham gave assurance that the question would be fairly considered.

Altitude Record For Women

Saskatoon, Sask. — Nosing her Gypsy Moth aeroplane to an altitude of 16,000 feet, Miss Nellie Carson, of the Saskatoon Aero Club, created what is believed to be the altitude record for women flyers in Western Canada. The flight occupied an hour and 20 minutes. Miss Carson, who wore winter garments experienced severely cold temperature and she had to be assisted from the machine when it alighted.

Tragedy Of the North

Remains Of John Bennett Sent To England For Burial

Edmonton, Alberta.—The remains of John Noel Patch Bennett, 18-year-old schoolboy who sought experience and found death in the wastes of the Pine Pass district, 150 miles west of Grande Prairie, were forwarded to England from Edmonton this week.

Bennett's bleached skeleton, a wolf-gnawed rifle, a pack sack, a diary and a few shreds of the clothing that had been torn from his frozen body by the fangs of wolves that had unearthed it, were discovered by Kelly Sunderman, veteran Hythe guide, who had sought the boy's body for seven months, when he journeyed up Tillicum Creek late in May.

Bennett left his home in Oakdene, Manor Road, Coventry, England, in order that he might gain experience which would school him for a diplomatic career, on which he intended to embark when he attained his majority. He would have inherited a large fortune on his coming of age.

Although warned of the perils of the journey he was about to essay, he set forth from Grande Prairie in October alone with a pack horse, hoping to make his way through Pine Pass to Prince George, British Columbia.

Caught by the winter, his horse abandoned, his moccasins worn out and his food supply exhausted, he struggled on. Finally, with feet and hands frozen by the intense cold of the mountain winter, he could go no further and sank down to die beside the lonely Tillicum Creek, where his body was found this spring.

Wants Conference On Stabilizing Silver

If Canada Leads It Would Be Great Advertisement Says Midland Bank Director

Ottawa, Ont.—It would be a wonderful thing for the world and a great advertisement for Canada if this country would call an international conference on stabilizing silver, said J. F. Darling, director of the Midland Bank of Canada, who returned to Ottawa from Washington. Mr. Darling's proposal for a bi-metal standard would place silver alongside gold as a standard of currency, at one-twentieth its value.

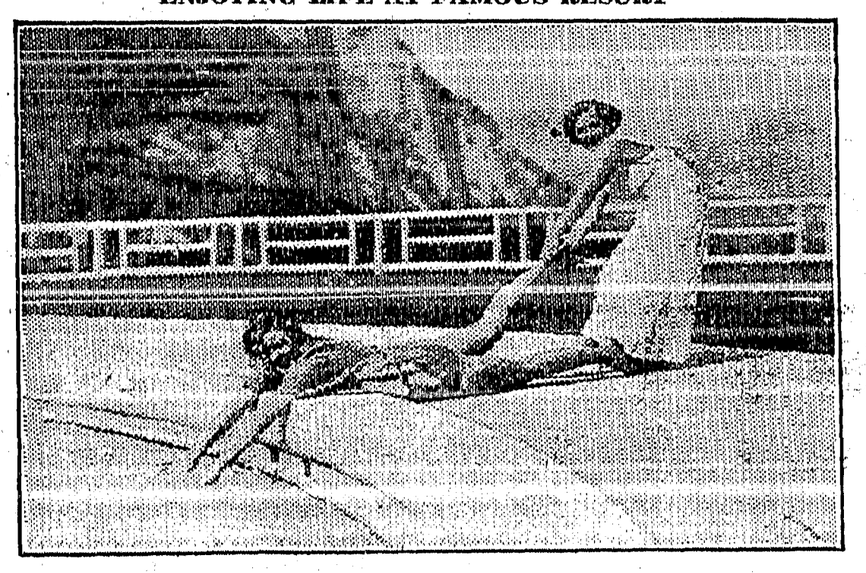
United States would send representatives to Ottawa, Mr. Darling declared. Mr. Darling expects to sail for England at the end of the present week from Quebec and will probably have a further conference with Premier R. B. Bennett before he leaves.

United States has so much gold she could stabilize silver without any co-operation from other nations, Mr. Darling stated. The only salvation for the present world depression was higher prices and Mr. Darling saw no method for accomplishing this except by bringing back the price of silver.

Better Understanding

Winnipeg, Man.—"It is vitally important that Canadians establish a greater understanding between industrialists and agriculturists," declared Elmer Davis, past president of the Canadian Manufacturers' Association, here. Mr. Davis is returning to the east following attendance at the annual convention of the manufacturers at Victoria, B.C.

ENJOYING LIFE AT FAMOUS RESORT



"Just foolin' around and getting tanned," explained the Misses Ena and Brenda Sheffield, of Bournemouth, England, when a photographer at the Banff Springs Hotel made this picture. With their mother these two young Englishwomen have wintered in California and the Hawaiian Islands and are spending the early summer at Banff and Lake Louise before returning east to the Old Country.

CRITICISM HEARD OF EMBARGO ON RUSSIAN GOODS

Ottawa, Ont.—Definite opposition to the Russian embargo on the ground that it is "inconsistent, unbusinesslike, inefficient, and will hurt no one but ourselves," came from Hon. W. D. Euler, former minister of national revenue, who spoke during the budget debate.

"I am opposed to the Russian embargo," asserted Mr. Euler, and he went on to state that the government had put on the prohibited list such commodities as hard coal, lumber, furs, asbestos and pulp. The only one of these commodities which Canada imported was hard coal, and this the Dominion did not produce herself.

"The only good we do by putting hard coal from Russia on the prohibited list is to throw business to our friends the United States," the former minister declared. He had tried to ascertain the reason why the government had barred goods from Russia. Apparently it was because Russia "is an ungodly nation and because she has a system of government with which we do not agree."

"Are we acting as a Christian nation when we declare economic war against another country?" asked Mr. Euler. He held no brief for Russia, he had no sympathy with the methods adopted in that country, but he felt that nothing but harm could come to Canada through the imposition of the embargo.

He referred to the inconsistency—"I almost said hypocrisy"—of the Canadian High Commissioner in Great Britain, who had called in to the wheat conference delegates from Russia.

"Those delegates must have been laughing up their sleeves when he said that we wanted to have nothing to do with them, and then, by a side door procedure, we asked them to do something for us," remarked Mr Euler.

For Permanent Peace

Ratification Of League Of Nations General Act Of 1928

Ottawa, Ont.—Ratification of the League of Nations General Act of 1928 for the pacific settlement of international disputes, was moved in the senate by Hon. G. D. Robertson, Minister of Labor. The House of Commons already has approved of Canada's accession, subject to certain reservations which apply not only to this country but to the other nations of the British Empire.

Senator Robertson said it was a long step toward establishing permanent peace throughout the world. Senator Dandurand heartily approved of the resolution and gave a history of the step acomplished by the League of Nations towards permanent peace. Sir Geo. Foster explained the position of the British governments in 1924 on the protocol. The obligations then, he said, were too great for Great Britain to subscribe to it, with the United States not being a party. The resolution was adopted.

Britain Is Importing Butter From Empire

Answer to Russia's "Five-Year Plan" Says British Member

London, England.—"The empire's reply to the Russian five-year plan," is the description Sir William Wayland, Conservative member of the House of Commons and chairman of the Empire Dairy Council, applies to the increase in imports of empire butter to Great Britain this year.

During the next few weeks no fewer than 46 vessels from New Zealand and Australia will bring more than a million boxes of butter to British ports. Canadian butter is once more entering the British market, too, after being absent for five or six years.

France Opposes Debt Revision

Paris, France.—Recent "steel helmet" manifestations at Breslau have made it difficult to continue peace efforts with Germany, Foreign Minister Aristide Briand told the Chamber of Deputies in declaring that the government was opposed to any revision of the Young plan.

V. MAWSON

CRESTON

According to the latest crop bulletin cherries are making a heavy drop this season and the crop will not be more than 30 per cent. of the 1930 yield.

Wednesday was cloudy and showery, and due adverse weather conditions the turnout at the Presbyterian Ladies' Auxiliary lawn social at Mrs. Telford's, Erickson, that afternoon was not as large as anticipated.

Village residents are reminded that June 30th is the last day on which taxes may be paid to escape the 10% penalty which is added at July 1st. Up to the present tax payments have been almost up to average.

Creston Post of the Canadian Legion are having another of their popular dances at the fall fair dance pavilion on the evening of Dominion Day, Wednesday, July 1st, for which Creston orchestra will supply the music.

Mr. and Mrs. C. M. Loasby of Vancouver are renewing acquaintances in Creston this week, and are guests of Mr. and Mrs. Jas. Cook. Until about three years ago Mr. Loasby was C.P.R. yardmaster at Sirdar for many years.

At the directors' meeting of the agricultural association on Tuesday night it was decided to have a fall fair this year, and committees were struck to hand'e affairs. The awards in the needlework class will be published next week

Miss McGowan, who has been matron at Creston Valley hospital since the first of May, has resigned, and left for her home in Lethbridge, Alberta, on Monday. Miss Passmore of Cranbrook has been appointed matron temporarily.

There was a fair turnout for the social evening tendered the bishop of Kootenay at the Parish Hall on Friday evening. under the direction of the Woman's Auxiliary. While here his lordship was a guest of Mr. and Mrs. Jas. Cook.

The Sunday rush to Kuskanook has commenced, visitors to that point last Sabbath being the biggest of the season. Youngsters and adults alike miss the excitment provided in other years by the arrival and departure of the afternoon boat for Nelson.

The prolonged dry spell which has prevailed since the middle of May, was broken on Monday night when the district had its first thunderstorm, and about a quarter of an inch of rain fell. Further quite heavy soakers were encountered Tuesday night and Wednesday.

Earl Birney, a graduate of Creston high school, who left here about ten years ago to attend B.C. University and has since resided at the coast, was renewing acquaintances in Creston at the weekend, a guest of Mr. ahd Mrs. J. H. Webster. He is on the teaching staff of the state university at Salt Lake City, Utah.

Departmental examinations in connection with Grade 9, 10 and 11 of the high school will ommence on Tuesday morning and continue through till the end of the month. Grade 8, or entrance to high school pupils, commence writing on the 26th. In addition to Creston students will also write at Wynndel on Grade 8.

Rev. P. McNabb got back on Saturday from Toronto, Ontario, where he represented the presbytery of Kootenay at the annual session of the Presbyterian Church general assembly.

RANCH FOR SALE—31-acres orchard property about one mile from Creston. Planted to strawberries, tree fruits and alfalfa. New five room house. Will sell whole property or subdivide in 10-acre tracts. Mrs. F. G. Cartwright, Creston.

In his report on the Valley vegetable crop C. B. Twigg, in his report of June 9th states that tomato planting has been heavy. The number of plants, perhaps, is not equal to last year, but a greater number come under the East Creston irrigation system. The yield should be high. Potatoes are well advanced. Early vaaieties will soon be in flower. Digging should start early in July. There has been an increase in acreage planted.

Under date of June 9th C. B. Twigg, district agriculturist, reports on the 1931 crop as follows. Pears will be a heavy crop, especially Bartletts and Flemish Beauty; D'Anjous are a little light. The drop is not quite over yet but thinning will start shor ly after the 15th on the early varieties. Apples are making good growth. Early varieties are off this year. Wealthys will be fairly good. McIntosh will be lighter, but the winter varieties heav er, especially Delicious, Rome Beauty and Spies.

Lutheran Church

REV. C. BAASE, Pastor.

7.30 p.m.—Evening Service.
10.00 a.m.—Sunday School.
11.00 a.m.—Service in German.

PERFECT FEET

with

JACK and JILL SHOES

JACK and JILL SHOES are approved by physicians, health boards, and orthopedic experts. They are built on genuine Nature-shape Foot-form lasts. It is a parental duty to insist on Jack and Jill Shoes. No others have so many health features.

Parents!

No More Guesswork

Few children are able to tell if new shoes when tried on fit properly. They like shiny new shoes and wanting them as their very own are likely to say they are comfortable when they are not. Then the trouble begins.

A simple, new invention removes all doubt and uncertainty in fitting children's shoes. It is no longer necessary to depend on the children's statements—you actually see for yourself your child's foot in the shoe being fitted. There is no more guesswork. Seeing is believing.

Visible fitting workable with JACK and JILL SHOES only. All styles and sizes. Priced no higher than ordinary shoes.
