THE CRESTON REVIEW

Vol. XXIII. CRESTON, B. C., FRIDAY, SEPTEMBER 18, 1931 No. 26

Erickson

Miss Stella Speaker arrived from Nelson on Friday for a visit with her mother, Mrs. Fred Speaker.

Miss Dora Healey of Creston spent the weekend with her parents.

Melt Beam is a prairie visitor this week, leaving on Sunday.

Public school inspector Manning made his semi-annual visit to Erickson school this week.

Miss Margaret Walsh of Natal is a visitor here, a guest of Mr. and Mrs. E. E. Cartwright.

Miss M. White and Arthur Stanley o Nakusp spent the weekend here, guests of Mr. and Mrs. Healey.

Birth—At Trail Hospital, September 6th, to Mr. and Mrs. Wallace Woodhall (nee Jeanne Hall), a daughter.

Miss Margaret Speaker, who has spent the past three weeks here, left for Cranbrook on Sunday.

Mr. and Mrs. J. Coates and family of Bellvue, Alberta, are motor visitors to their ranch here this week.

Alice Siding

Mr. and Mrs. Sam Boyd of Vanconver are visitors this week with Mr. and Mrs. John Parkin.

Joe Miller and Eric Erickson returned from Alberta at the end of the week, where they have been helping with the prairie harvest but could not make it pay due to considerable wet weather and a low wage scale

Geo. Hood suffered a severe loss on Sunday when one of his team of splendid work horses got out of the pasture and was run over by a westbound freight train on Sunday morning.

Bob Marsholl was a weekend visitor with his sister, Mrs. Billy Kelly, at Elko.

The community Sunday school resmed work on Sunday afternoon at the schoolhou e. Mrs J. C. Martin is again in charge. With this school in operation and C. S. Hester and Byron Willis supervising the Church of England and Presbyterian Sunday scoools at Creston, Alice Siding is sureld doing its share in this good work.

Mr. and Mrs. W. A. Pease, who are now settled in their new home on the Beazer place, which they purchased early in the year, have just installed the phone, 55Y.

J. C. Martin is enlarging his operations in the poultry line with the erection of a new two-deck poultry house 18 x 42 feet. It is built so as to utilize some of the side hill and will be one of the most comfortable poultry plants in the valley.

Practically every resident of the North Creston Alice Siding area was out for the meeting on Saturday night, which was called to discuss the irrigation question. The meeting was quite informal, being opened with a brief statement by Victor Carr, who was responsible for calling the gathering. Quite a few took a hand in the talk and all were quite unanimous that a water supply must be had and all present signed the petition which goes forward to Victoria asking that an engineer, who is now making the survey of the proposed Wynndel irrigation system, also make a survey of the Alice Siding area for the same purpose; as both systems will get their water out of Duck Creek. Messrs. W. H. Mather, Guy Constable and T. Trevelyan were named a committee to press the matter, not only at Victoria but also with Col. Lister, local representative.

At Home

to

Grandmothers

Creston and District Women's Institute will be at home to all the Grandmothers of the District in

Trinity United Church Hall

CREESTON, on

Tues., Sept. 22

3.00 to 5.00 p.m.

ALL GRANDMOTHERS ARE CORDIALLY INVITED.

Canyon City

Mrs. Hodnutt, a former teacher of Canyon school, but now of Grey Creek, was renewing acquaintances in the district at the weekend.

Ernest Langston, who has been a visitor with Mrs. Langston, who is with her parents, Mr. and Mrs. Halstead, returned to Lethbridge, Alberta, at the first of the week.

Chas. Pipe is once more back to the ranch again after spending two months in charge of the forestry lookout station at the head of Thompson Creek. All the forestry staff was laid off on Monday.

Manfred Samuelson had charge of the United Church services at Canyon and Creston on Sunday afternoon and evening, Pastor Cribb being at Kimberley that day.

L. R. Plumb, who is occupying the Witherhead ranch, is doing an extensive business in trucking fruit to Alberta, and on the return trip is bringing in grain and millfeed.

The deer season opened the 15th and all the local hunters were out the first day getting acquainted with t e hunting grounds mostly, as no v nison was brought home

The report is current here that A. G. Samuelson has the contract to erect the camps in which the men employed on the Canyon development will be quartered. Something definite on this is expected at the end of the month.

McIntosh Red apples will commence to roll into the packing sheds at the first of the week. They are being held back for color and to give every opportunity to clean up the Wealthys.

Mr. and Mrs. W. Houle of Kimberley are visitors with the latter's parents, Mr. and Mrs. McRobb, and are accompanied by Bill Robertson and Bill Jarvis of the same town, spending a few days here on a hunting trip.

Presbyterial Meets

The biennial executive meeting of the Kootenay Presbyterial of the W.M.S. of the Presbyterian Church was held in St. Stephen's Church on Tuesday afternoon. The following delegates were present: Mrs. Horne, Kimberley: Mrs. McLean-Bell and Mrs. Large, Cranbrook; Mrs. Condy and Mrs Edmiston, Trail; Mrs. Choate and Mrs. Gibbs, Nelson.

The presbyteria president, Mrs. McLean-Bell presided, taking as the subject of her address the 14th chapter of Exodus. She stressed the point that the word of God is a chariot, and religion must always be on the move. Rest is a disease; pep the cure.

Following the address, greetings were read from the provincial president, Mrs. Ledingham, and from New Denver auxiliary. As this was strictly a business meeting the various problems confronting the society were taken up, and dealt with as expeditiously as possible. There are six auxiliaries in Kootenay Presbyterial, one Y.P. society and three Mission Bands. In connection with the latter a banner has been donated for competition among the older members, with a second prize for the younger ones. A carefully planned program of study has been mapped out for the bands to follow.

The regular annual meeting of the Presbyterial will be held in Trail in February.

Directors Active 1931 Fall Fair

Rearranged Fruit Section Should Attract Large Entry and Later Date for Fair Assure Quality —Prizes are Worth While.

Now that the fall fair prize lists are out it w ll be seen that the directors have made various changes for the better. Except where stated in the prize list the awards will be paid as stated in the schedule on page two of the prize list.

It will be noticed that the number and value of the awards is governed entirely by the number of exhibits. This ensures more and b tter prizes where the competition is heaviest. An entry fee is also being charged which varies in the various sections. The minimum entry fee is one dollar which carries with it a membership ticket which will pass any exhibitor into the exhibition building free of charge. Admission tickets to the grounds 50 cents are also on sale. These tickets are numbered and will carry three prizes wo th $10, $7.50 and $5 and the person lucky enough to hold a winning ticket will not only see the show for nothing but will also have some over to spend in the fair.

In the fruit section it will be noted that the box exhibits have been reduced to single boxes, most of which carry a first prize worth $5. Prizes in the plate section have been increased and a new class added, single specimens. There is a special prize attached to this section of dessert knives, value $15. While this looks a very simple matter to get a perfect apple we have heard several growers state that they have been looking for perfect apples and that they are hard to find. For one thing an apple has to grow in a certain position on the tree to be round, and these round apples do not always have the other requirements.

However, conditions and the later date of the fair are giving the growers a chance to stage a really excellent exhibit which they have not had for some years as the fruit has not been available.

In the baking section competition will be confined to two brands of flour, Purity and Five Roses. Magic Baking Powder is again offering prizes for the best layer cake made from Magic Baking Powder and we have a new contributor in General Foods, Ltd., of Toronto, who are offering a Swansdown baking set as the first prize for the best chocolate layer cake made with their products.

In the canning attention is called to the rule requiring pint containers. This is to ensure uniformity in exhibits which greatly enhances the appearance. The judges last year congratulated us on making this regulation and are again emphasizing the necessity of standard containers in all fairs.

The sc ool exhibit should be of a very high order as this year it is easy to get high quality exhibits. We trust that all the Valley schools will compete both in the school exhibit and in the classes for boys and girls work. The livestock section is again under the leadership of Chas. Sutcliffe, who is the director in charge. The Stockbreeders Association are again giving a cup for the best grade dairy cow, and the Cranbrook Sash & Door Company offer a combination storm and screen door, value $9, for the best horse in the show

The poultry division, with D. Bradley as director, has also been slightly changed and limited to the four main breeds with a pen prize of 98-lb. sack of Purity flour. There is also a section for any other breed, which gives those a chance who fancy one of the less known varieties.

The boys and girls are also given a chance in this section to show what they can do in four classes, with four prizes in each class.

There will be a dance in the hall in the evening with Creston dance band providing the music. The Womens Institute have undertaken to provide the supper. Tickets will be $1.50 per couple, supper included, and a large turnout is looked for.

There is a director in charge of each section this year who is ready to g ive anyone, who wishes to exhibit, and feels that he does not know enough about the game, the necessary information as to how to set about it. The prizes are good and the fruit is the best for many years. Lets have a really good fruit section.

Wynndel

Mr. and Mrs. Lachat and family returned last week from an auto trip to Calgary, Alberta.

Mrs. S. Benedetti and family, who were visiting in Nelson, returned home last week.

J. G. Abbott and Whitfield, Mary and Leah, were Bonners Ferry visitors on Saturday.

The dance on Saturday evening was a huge success. The music supplied by Trail Commanders was splendid, as was also the lunch served by the local committee.

The September meeting of the Woman's Auxilairy was held at the home of Mrs. Greig on Wednesday last, when it was decided to have the harvest festival service on Sunday, 20th.

Geo. Leach of Spokane was a visitor in the district over the weekend.

The Anglicans are having their harvest festival service at Wynndel on Sunday, 20th, at 3 p m. Donations of fruit, flowers and vegetables will be received at the church on Saturday afternoon at 3 o'clock. All gifts will be afterwards sent to Creston hospital.

AT THE HOSPITAL

The nursing staff wishes to thank Mr. Edmondson, Mrs. Hayes, Mrs. Nouguier, Mrs. McFarland and Reg. Eastlake for contributions.

Miss Helen Dzvigola is progressing favorably and will be going home soon.

Orin Plumb of Ca yon is a patient at the hospital suffering from gunshot in the left arm.

Lister

Col. Fred Lister was a visitor at Edgewood at the first of the week where he, on Tuesday, officially opened the Edgewood fall fair

Mr. and Mrs. C. H. Phillips of Kimberley have been spending a ten-day vacation at their ranch here.

Rev. C. Basse of Creston had a good turnout at the Lutheran Church service here on Sunday afternoon.

R. V Willcox, R.O.P. inspector for the federal poultry department, was here on an official visit this week, when he banded a number of pullets at the Powers farm, that are entered in the R.O.P.

Public school inspector Capt. Manning was here on an official visit on Tuesday.

Mrs. Bill Demchuk is a visitor this week at Bonners Ferry, with her daughter, Mrs. VanEtten.

A. W. Dingle, postoffice inspector, and J. B. Corley, district superintendent for the postoffice department, both of Calgary, were here on an official visit on Wednesday.

Gordon Hurry, who has been visiting pt his home here for some time on his return from a trip to Nova Scotia, left this week for Nelson to resume work with the C.P.R.

Lister-Huscroft Farmers' Institute have just placed their fall order for stumping powder amounting to 20 cases

The rains of the past ten days have halted the cutting of the third crop of alfalfa. Due to the very dry summer the crop is light.

A special meeting of the ratepayers of Lister school district is called for Saturday evening, September 26th, at the schoolhouse. The department has granted the right to re-open the second room and secure another teacher, and this meeting is for the purpose of voting the extra money required for the enlarged operations.

The Junior W.A. of Christ Church are having a bridge drive in the Parish Hall on Friday evening, September 25th, with cards to start at 8.15 prompt The admission is 50 cents.

Kitchener

Alex. Ellis and Clarence Anderson returned on Wednesday from Merritt, where the former visited with his sister for a time. They were unable to locate a job for the winter.

Mr. and Mrs. C. R. Paulson and children, Chester and Kathleen, of Spokane, were visitors here over the weekend.

Roy Harris of Cranbrook, local superintendent for the B.C. Telephone Company, was a business visitor here on Friday.

Frank Pym of Cranbrook, supervisor of forestry work in E st Kootenay, was a business visitor on Friday.

Mrs. W. H. Crawford and Mrs. Hayden and son, Orin, of Creston, were Saturday evening visitors with Mr. and Mrs. E. Driffil.

Mrs. Geo. Young was here for the weekend, a guest of her sister, Mrs. Driffil.

All of Kitchener's unemployed have been to Graston to register as unemployed. Relie work is expected to start at Hazel Creek.

Mr. and Mrs. Algot Johnson spent the weekend with the latter's mother at Glenlilly, returned Sunday evening.

Mrs. C. Senesael and daughters, Vera and Hazel McGonegal, motored to Fernie on Friday on a visit with Mr. Senesael, who is working with the B.C. Telephone construction crew at that point, returning on Sunday.

Mr. and Mrs. S. Nichols of Ontario had an accident half a mile east of here on Saturday evening. The lights of their sedan suddenly went out, the car swerved up the bank and turned over. The occupants were unhurt but the car had broken front springs and the top damaged.

Marcel Seneasel left on Friday for Fernie, where he has joined the B.C. Telephone construction crew.

Wesley Blair and Claude Simpson spent the weekend in Spokane, making the trip by auto.

Prize List Amendments

Class 42—Three plates of apples At the request of the Bank og Commerce, who are giving a permanent challenge cup, and minature cup as first prize in this class, the exhibit must consist of three seperate varieties selected from those listed in the prize list.

Class 125—Crystallized Fru t, to read plate or collection.

Due to a printers' error the two following classes have been omitted from the prize list: Class 73—Honey, extracted, 3 12 oz. jars. Class 74—Honey, 3 sections in coomb.

GRAND THEATRE
FRI.-SAT., Sept. 18-19

You May be Shocked at HOWARD HUGHES' Thrilling Spectacle

HELL'S ANGELS

But you will Never Forget It!

The Startling Picture of the Air!

"No theatre-goer who is decently grateful for the divine gift of eyesight should fail to see 'Hell's Angels'.

"Besides the sheer magnificence of a part of this picture, all stage spectacles and colossal circuses become puny."

'Fresh from the gardens'

Courtesy and Safety

"Why is it," remarked the Observant Man, "that a man, who may accidentally jostle you in a crowd, turns and says 'I'm sorry,' or 'I beg your pardon,' but who, when he gets behind the steering wheel of a motor car, throws all ideas of courtesy to the winds and acts as if you had no rights whatever, even the right to live?"

It is the unsolved puzzle of this present age. A man ordinarily polite and courteous, who, if he bumped into another couple when dancing, or stepped on his partner's toes, would express his regrets, when engaged in motoring act, all too frequently, like an ignorant, uncouth boor. He who would hesitate to steal so much as a lead pencil from another, thinks nothing at all of stealing the right-of-way at a road intersection, even from a lady, considers he has done something smart, and even derides or joshes those whom he has made his victim. Yet he is guilty of theft, not only in a moral sense but actually in a legal sense, because the law declares it an offence to take the right-of-way from another to whom it belongs.

Many a motorist, who, if standing on his own two legs on the shore of a lake would never even entertain the thought of pushing a non-swimmer into deep water at the peril of his life, nevertheless does not hesitate to crowd a fellow motorist,—possibly a beginner in the art of driving,—off the road at the risk of smashing the other's car and possibly seriously injuring or killink him.

And why is it that so many men, ordinarily polite and courteous, refined in language and manners, become abusive, profane and quarrelsome over some slight mishap on the road? What is it about a motor car, or the pleasure or business of motoring, that so completely changes many men, and women, too, from their usual tenets of conduct into the most disagreeable creatures, reckless and regardless of the rights, comfort and safety of others?

Is it merely because the modern motor engenders such speed that the drivers of cars become reckless, heedless, and for the time being at least are no longer normal human beings? Or is it that peculiar quirk in our human makeup that seems to impel us to do what both commonsense and the law says we are not to do?

The conduct of not a few, but countless thousands of motorists is an unsolved mystery. No man, except he be a maniac, would think of throwing vitrol into another's face and thereby blinding him, but to anyone used to travelling our highways at night it would seem that the vast majority of motor car drivers think nothing at all of driving past approaching cars with powerful, glaring headlights completely blinding for the time being the drivers of those other cars, and inviting terrible disaster. Is it that they are just too lazy to be even bothered to dim their own lights for a few seconds? Or is it something else, some petty meanness of disposition, some un-understandable twist in their character which does not at other times display itself?

And yet courtesy is such a fine trait, a simple thing, something that costs nothing, but which is the hallmark of the true gentleman.

And how much pleasure it would add to motoring if courtesy, instead of a rude boorishness, became the universal habit of the road! And, oh, how much it would add to the safety of the road!

Governments provide rules and regulations governing the condition of cars; Automobile clubs and associations conduct campaigns of education; tests are provided for brakes, lamps, tires, steering gear, etc., and all serve very useful purposes. But a uniform, universal recognition and acceptance of the ordinary rules of courtesy by one toward another, and by each toward all, would do more than any one thing to obviate accidents with their present appalling bills for damages and irreparable loss of life.

As a nation we are striving with might and main and the expenditure of fabulous sums of money to combat tuberculosis, cancer, and dread diseases of one kind and another; we are engaged in conservation of our forests, our streams and water-powers, our fisheries, our minerals; we spend millions on research work to combat rust in wheat, grasshoppers, and other pests which destroy the proceeds of our agricultural labours,—yet we go blithely on taking human life recklessly, needlessly, maiming many more, and destroying millions of dollars worth of property annually through the agency of the automobile, which to many has become a dread and a menace when it ought to be a joy and a blessing.

And such a little thing, such a simple thing, as the practice of a uniform courtesy would serve to revolutionize the situation for the better. Why not try it for a change! Let a little courtesy do its good work.

Barred From U.S.

William Shier, 48, who was returning to his home in Gary, Ind., after being two weeks at the bedside of his mother in Newmarket, Ont., has been refused re-entry into United States by United States immigration authorities. It is alleged that he entered United States illegally seven years ago at Portal, N.D.

A newspaper man's son says that editors call themselves "we" so that the man who doesn't like the article will think there are too many people for him to tackle.

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

Has Tame Butter Flies

A Philadelphian has developed what is said to be one of the finest collections of live butterflies in the United States. For many years Daniel G. V. Laning has made a study of the beautifully coloured insects, raised them and tamed them. Now, he says, they will alight on his paper while he is reading and not move until he is ready to turn a page.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die.

"My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again.

"My other children also had diarrhoea at that time and I gave them 'Dr. Fowler's' with the same results."

Japan's Population

Is Increasing By Nearly a Million Every Year

One or two competent writers on Japan having announced lately, with some confidence, that the population question in the Japanese Empire would settle itself because the rate of increase was steadily slowing down, the figures of the 1931 census now emerge to shatter that comfortable doctrine. The birthrate in Japan is not going down, it is going up. And the population is increasing at present by nearly a million every year. That fact may not be as disturbing to the rest of the world as it sounds. The Japanese, for all their apparent need for emigration grounds, still show little desire to emigrate on any considerable scale. But the alternative is to convert Japan systematically from an agricultural into an industrial State.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted.

"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colours—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J.F.T., Montreal.

Preparing Relief Camps

Ontario Government Getting Plans In Shape For Unemployed

Payment of 30 cents an hour for an eight-hour day, with a deduction of 80 cents a day for board and 50 cents a month for medical services will be made to men employed in the relief camps being established in northern Ontario by the provincial government for the construction of the Trans-Canada Highway.

Official details of the administration of the camps were issued by Hon. William Finlayson, Minister of Lands and Forests. Present plans are to get the camps into operation early in October.

There will be no military methods but provincial police will be available whenever required at the camps.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Dispels all roughness or chafing. Makes skins delightfully soft-textured. Every woman should use this peerless toilet requisite. Daintiness—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Many Years a Sailor

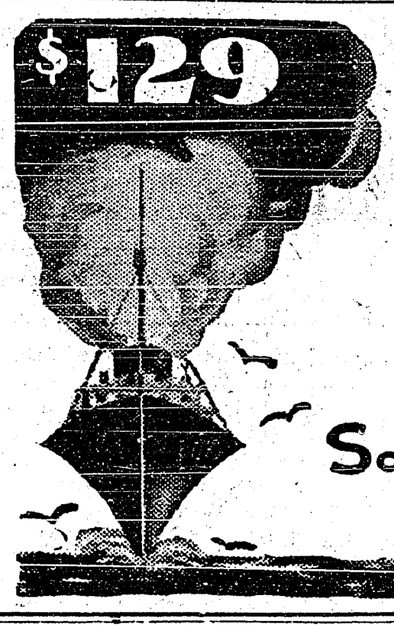
Earl Jellicoe Held Position Of Junior Officer In 1893

It seems ages ago in this whirling world since the disastrous collision in the Mediterranean between the "Victoria," flagship of the fleet, and the "Camperddown," and it is almost startling to recall that Earl Jellicoe, Canada's distinguished visitor, was a junior officer on the ill-fated "Victoria." Though stricken at the time with fever, he plunged into the sea and was among those rescued—in his case to give further distinguished service on another flagship of the fleet. Earl Jellicoe took to the sea when young, as the "Victoria" went down in June, 1893; and he is far from being an old man.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

High Quality Canadian Cattle

Shipments of Canadian cattle to Great Britain have proven at times of such a high quality that the livestock sold on a par with Scottish home-killed beef according to John Byers, secretary of the council of Western Beef Producers. The Canadian cattle he added, at some periods, had been sold in preference to the Irish importations.



TO GREAT BRITAIN *and back*

SPECIAL REDUCED third class fare from Montreal to Belfast, Glasgow, Liverpool, Plymouth or London and back. Good going from

Aug. 1st to Oct. 15th

Bronze Statue Honours Hardy

Unveiled By Sir James Barrie At Dorchester, England

Unveiling a lifesize bronze statue of Thomas Hardy, the work of Eric Kennington, here in Hardy's native Dorchester, Sir James Barrie, creator of "Peter Pan," told how nearly the world came to missing altogether the late novelist's services.

"When the child Hardy was born," said Sir James, "the doctor thought him dead and dropped him into a basket. But a woman stepped forward to make sure and found he was alive. A statue to this woman—Mr. Kennington could have done worse than give us that."

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Woman Wins Air Derby

Aviatrix From Memphis, Tenn., Carries Off All Honours

Mrs. Phoebe Omlie, of Memphis, Tenn., was officially announced as the winner of the transcontinental handicap derby from Santa Monica, Cal., after she had taken a large share of the honours at the national air races.

The contest committee announced that Mrs. Omlie had won the handicap race, in which 50 or more women and men competed, with a rating of 109.19 points. She won the grand prize as well as the prize for the women's division. D. C. Warren, of Alameda, Cal., won the men's division of the race with 103.5 points.

White was the colour of royalty during some stages of Egypt's ancient history.

Co-Operative Wool

Manitoba and Saskatchewan Shipments Reach High Figures

The Canadian Co-Operative Wool Growers, western branch, report the receipt during July of 552 lots of wool at Regina, and of 502 lots at Portage la Prairie; the total Manitoba receipts amount to 200,624 pounds, and Saskatchewan receipts about 333,000 pounds. Up to the end of July eleven cars have been shipped from Regina, seven from Portage la Prairie and one from Marchand. During the month four contracts were received from Manitoba sheepman, covering 130 fleeces and thirteen contracts from Saskatchewan sheepmen covering 984 fleeces.

Bears Killing Alberta Cattle

Right to shoot bears in Waterton Lakes National Park, in southwestern Alberta, was sought by ranchers of the district. Cattle on ranches in the territory have been killed and carried within the park confines before ranchers were able to defend their cattle.

No Longer Bilious—Thanks Vegetable Pills

"I suffered with Biliousness for days at a time. Every medicine I tried failed to bring relief . . . the first dose of your wonderful Carter's Little Liver Pills gave me great relief."—Mrs. C., Leigh.

Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGETABLE and have a very definite, valuable tonic action upon the liver. They end Constipation, Indigestion, Acidity, Headaches, Poor Complexion. All druggists. 25c & 75c red pkgs.

LATE ESTIMATE OF THE WESTERN WHEAT CROP

Ottawa, Ont.—The wheat crop in the three prairie provinces is estimated at 246,400,000 bushels, in a crop report issued by the Dominion Bureau of Statistics. This is substantially below the crop of 374,500,000 bushels in 1930. While there are bumper crops in central Alberta, there is a complete failure in some southern regions of the prairie provinces. Higher wheat production is forecast in Alberta than in Saskatchewan, despite the fact that the seeded acreage in Alberta was only half that in the other province.

"If the provincial estimates are justified by the out-turn it will be the first time that Alberta has been the leading wheat-producing province," according to the report.

The total estimated yields of all the small grain crops, except fall wheat, are lower in 1931 than in 1930. In the maritime provinces, conditions and yields are very similar to 1930. In Quebec, production will be slightly lower. Wheat, rye and flaxseed production will be higher in Ontario, but the later sown oats and barley crops were reduced by summer drouth. In British Columbia, yields are generally higher than in 1930. The grain harvest has proceeded under particularly favourable weather conditions, giving promise of high quality.

"The western wheatfields held very little reserve moisture at seeding time," the report says, "so that crop growth was dependent on the rains of the growing season. These were distinctly limited and late in a somewhat triangular area bordered on the east by Brandon, Manitoba, and on the west by Medicine Hat, Alberta, and attaining its greatest width in central Saskatchewan. The eastern and northern parts of Manitoba, most of northern Saskatchewan, and western, central and northern Alberta were favoured with greater precipitation, although this came too late to make really heavy crops in many districts.

"Threshing is about two weeks behind last year but, with excellent weather prevailing, has reached good proportions in southern regions and in the Peace River district. The quality of the crop promises to be high, although there will be shrunken kernels in the south and some starchiness in the regions of high yields. The market movement of the new crop is very tardy.

"Generally speaking, the wheat crop again proved its ability to withstand adverse drouth conditions better than the other small grains. The proportional reduction in wheat yield from 1930 is much less than in barley, rye and flaxseed, with the barley crop of 1931 estimated at less than half that of 1930, and the rye crop little more than one quarter."

Receives Grain Award

Wins Alberta Championship For Best Field Of Grain In Province

Red Deer, Alberta.—Alberta championship of 1931 for the best field of grain in the province has been awarded to James Hazlett, farmer of the Balmoral district. Hazlett, whose farm is a few miles from Red Deer, captured the southern Alberta crown and later his field was given top place in the whole province.

According to the judges Hazlett's field of Marquis wheat should yield 50 bushels per acre.

Tentative Date For Radio Hearing

Ottawa, Ont.—About December 10 is the tentative date for the hearing of the radio reference before the judicial committee of the Privy Council in England, according to latest official information received. The reference is on the question of the respective rights of the Dominion and the Provinces on radio broadcasting and receiving.

Saskatchewan Horses Win

Toronto, Ont.—George T. Fraser, of Tate, Sask., took prizes for the best mare any age, and best mare three-year-old and over in the Percheron judging at the Canadian National Exhibition.

To Assist Agriculture

Formation Of a National Agricultural Council Is Recommended

Regina, Sask.—The formation of a National Agriculture Council whose functions would include a thorough and continuous study of agricultural policy and the marketing possibilities in Canada and foreign countries, was approved by the agricultural committee of the Canadian Chamber of Commerce here.

The action of the agricultural committee followed a day devoted to a discussion on "what is a sound policy for Canadian agriculture."

Premier J. E. Brownlee, of Alberta, and a number of noted agricultural authorities all told of the difficulties confronting the farmer of today. Though none of the speakers attempted to define a cure for the situation all agreed that the agricultural situation demanded the fullest support of the business and industrial class.

Pleas for a lower rate of credit for farmers was made by Premier Brownlee. There was something in this direction needed if Canada was to avoid a far more serious situation, he said.

The feeding of lower class grain to cattle, to produce first class livestock and dairy products instead of the farmer accepting a mere recognition for his grain on the foreign market; a body to help the farmer market his products and a decrease in farm production, were suggested as means of helping Canadian farmers out of the present situation.

Free Transportation For Settlers' Effects

Alberta Government Extends Time Limit To November 30

Edmonton, Alberta.—Free transportation of settlers' effects in the case of farmers moving from the drought areas in the south to new locations in the north will be in effect until November 30, an extension of the time limit having been made by arrangement between the Provincial and Federal Governments and the free privilege applies to passengers as well as freight up to the end of September, but for the next two months to effects only.

Mexico Will Join League

Mexico City.—Mexico's acceptance of the invitation to join the League of Nations has been cabled to Geneva by Foreign Minister Gernaro Estrada. The proposal must also come before the senate for ratification inasmuch as membership in the league implies adherence to the covenant and the Treaty of Versailles.

Will Leave For France

Winnipeg, Man.—Chief of Police Chris. H. Newton, of Winnipeg's police force, has been appointed vice-president of the International Police Conference which is to be held in Paris, France, September 28. Word of his appointment was received from New York, and he will leave for the meeting within a few days.

HEADS LEGIONNAIRES

Major John S. Roper, who became President of the Canadian Legion of the British Empire Service League when Lieut.-Col LaFleche retired, was re-elected to the important post when members of the Legion from all parts of the Dominion gathered in Toronto.

Arctic Trip Ended

Wilkins Making Preparation For Early Return To America

Longyear City, Spitzbergen. — Sir Hubert Wilkins is overhauling and refuelling the submarine "Nautilus" in preparation for an early return to America, either direct or by way of Iceland.

The chief damage done on his cruise into the Arctic was the breaking of the mast by a violent storm. The radio apparatus also was harmed but repaired on the way back. The party expressed satisfaction with the working of its scientific instruments, especially the gyro-compass.

Members of the crew, bearded and dirty, but smiling, headed for steam baths on arrival. They said that during the southward trip from Spitzbergen the vessel rolled more than at any time since they left the United States, and that some of them were seasick.

Trans-Canada Telephone

System Expected To Be Completed By December 1

Edmonton, Alberta.—The trans-Canada telephone system is expected to be completed by December 1, according to Hon. V. W. Smith, Alberta Minister of Telephones, who returned recently from the Telephone Association of Canada meeting at Minaki, Ont. The Alberta link from Calgary east is finished and work on the western section from Calgary to the British Columbia boundary will be ended by the last of November, he said.

Will Use Canadian Fuel

Winnipeg, Man.—Use of Canadian fuel has been decided upon by the Winnipeg School Board. Orders for 55,000 tons have been placed, 45,000 tons from Alberta, and 10,000 tons from British Columbia mines.

Store Grain In North

Report States That Two Million Bushels Will Be Stored At Churchill This Winter

Churchill, Man.—More than 2,000,000 bushels of grain from the Canadian west will be stored at Churchill's new elevator this fall and winter to relieve the elevator facilities at the lakehead, and to prepare for shipments of grain over the bay route next spring, according to semi-official reports here. Definite decision on the project will be reached if the two ships taking part in the movement of grain from the bay this month reach their European ports successfully.

The project is finding much favour among officials of the Hudson Bay Railway because it means train crews and staffs would be kept on at work until well on into the winter instead of being laid off in a few weeks. As well as aiding in the movement of wheat in the west the plan would make a test of the bay elevator under the rigorous winter conditions of the Hudson Bay. Many claim the north climate will affect grain in storage here.

The most of the grain will come from the Saskatoon district but some of it will be from southern Saskatchewan, Moose Jaw, and Regina, if the Government decides in favour of the scheme.

Canada Favours Arbitration

Would Support Principle Minister Of Justice Tells League

Geneva, Switzerland.— Canada's support for the principle of "arbitration, security and disarmament" — the French formula—was announced to the assembly of the League of Nations by Hon. Hugh Guthrie, Canadian delegate, who is making his first appearance at Geneva. He is Canada's Minister of Justice.

This support, he said, would be in the nature of sympathetic co-operation in whatever plan may finally be agreed upon.

Canada is in no wise a militaristic nation and Canada's armaments are practically negligible, he said.

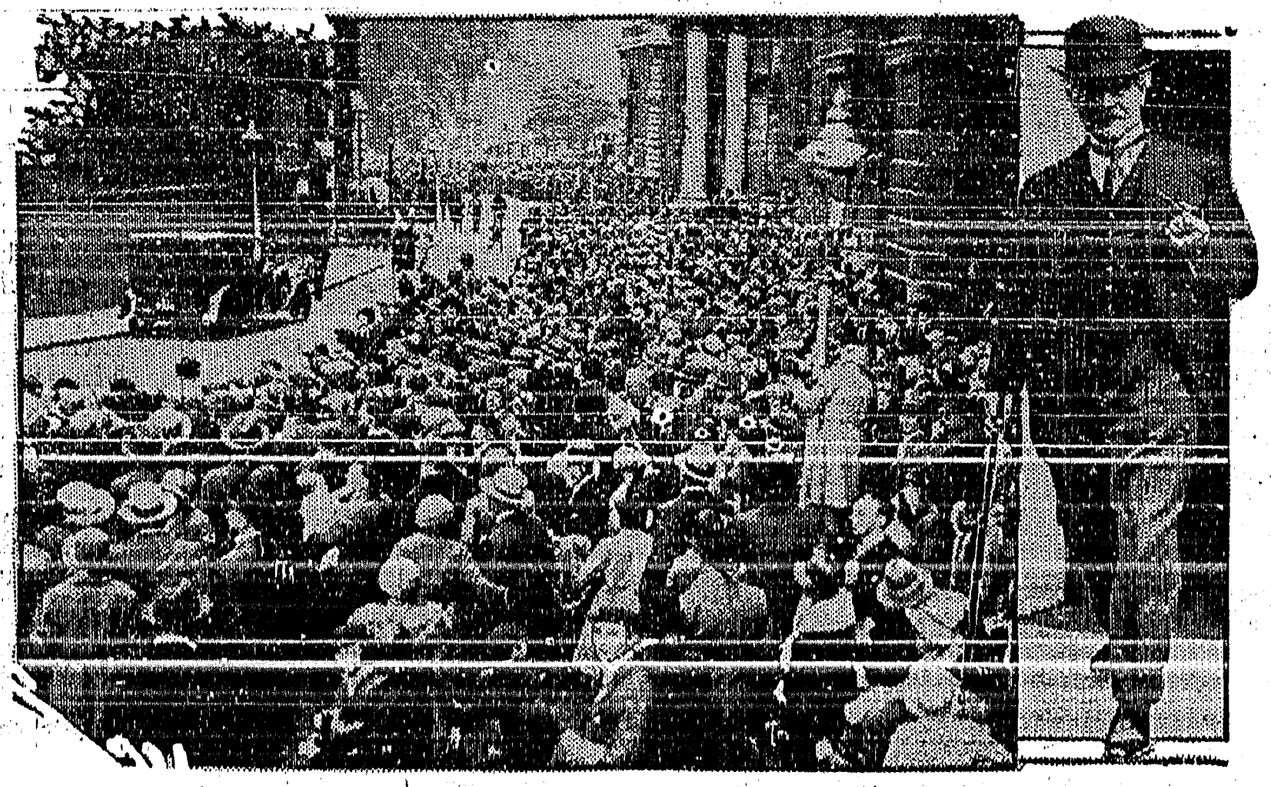
Suggest New Title

Capetown, South Africa.—"That the king's title be known in the Union of South Africa as George I., of South Africa and not George V., of Great Britain," is the resolution to be submitted to the Nationalist Party Congress by its Reitz branch, it was made known here. The branch holds this innovation justified on the ground South Africa obtained its independence in 1926."

Matter Of Federal Concern

Edmonton, Alberta.—Hon. George Hoadley, Minister of Health and Agriculture, had no comment to make on the report that 112 Hutterites were arriving in Alberta from South Dakota, except to state that it was a matter of Federal concern and the Hutterites, having satisfied Federal Immigration authorities, were now free to enter Alberta.

WHEN ENGLAND MET A CRISIS—AND WON



Here is a general view of the large crowd of Britishers which gathered in Downing Street, London, in which the Prime Minister has his official residence, to see what would develop following the downfall of the British Labour Government. When Ramsay MacDonald (right) left No. 10 Downing Street for Buckingham Palace, to confer with King George about the formation of the National Emergency Government, he was enthusiastically cheered by the great throng.

ANOTHER CIVIL WAR IN CHINA IS IN PROSPECT

Shanghai, China.—Only one month of peace has elapsed since the untimed rebellion of General Shih Yo-San was crushed in the north, but China is girding herself for another civil war. With the Cantonese invasion of Hunan Province confirmed, Nanking, while repeatedly professing a desire for peace, is energetically preparing for conflict.

Meanwhile the national flood relief commission approved the $70,000,000 Mexican (about $21,000,000 gold) program of Finance Minister T. V. Soong for the relief of China's destitute millions.

The activities of Chiang Kai-Shek, president of the Nationalist regime and commander of its armies, indicate he is preparing to strike swiftly and with the most formidable weapons at his command in the hope of cracking the insurgent forces before they penetrate far into Hunan.

Military experts expressed the belief that the Hunan struggle would be swift and sanguinary, since the armies of both sides rank highest among all the Chinese in offensive qualities.

Will Continue Aid In West

United Church Of Canada Pledges Relief For Saskatchewan

Montreal, Que.—A new challenge to the Christian Church existed in the fact that "complete and extensive disaster had befallen the people of 40,000 square miles of southern Saskatchewan," Rev. William Munroe, D.D., secretary, declared in addressing members of the United Church of Canada, Montreal presbytery, here.

The Presbytery appointed a special committee to aid the central body of the church in gathering and forwarding clothing and other relief material to the stricken community. It was emphatically stated that the church would stand behind its missionary work in Saskatchewan so that the ministry there would be fully maintained.

German Fleet Below Limit

Could Have Twice As Many Ships Under Versailles Treaty

Geneva, Switzerland. — Germany's arms statement showing an army of 100,500 men and 4,500 officers is published by the League of Nations secretariat.

Foreign Minister Julius Curtius in a foreword said that Germany had not yet been able to build her fleet up to the limit laid down in the Versailles treaty and that the report revealed "how meagre Germany's armament is compared with other states of corresponding territory and population.

"The navy possesses for example only four commissioned ships of the line, whereas according to Article 181 of the Versailles treaty and the regulations of the inter-allied marine control commission six ships of the line should be in service and two ships of the line in reserve, in other words twice as many."

State Hospitals

Hospitals Maintained By the State Visualized For the Future

Victoria, B.C.—Hospitals maintained by the state was a visualization of the future given by Hon. S. L. Howe, provincial secretary, at the opening of the fourteenth annual convention of the British Columbia Hospitals' Association.

"I am of the opinion that the time will come when the health of the people will be a state obligation," said Mr. Howe.

Boat Clears For Scotland

Port Arthur, Ont.—The freighter "Dewstone" of the Newfoundland-Halifax Transportation Company cleared from Port Arthur recently for Aberdeen, Scotland, with 1,600 tons of flour. This is the first boat this year to leave Port Arthur with a cargo direct for overseas. One boat left here for the Atlantic trip last year.

AT THE END OF THE LINE

There is a wire runners from your telephone to the telephone of some dear friend in a distant place.

Talk over it by long-distance telephone and you will hear as clearly as if you were speaking face to face.

All-Canadian lines now carry your voice qnickly and directly to points in British Columbia, Alberta, Sasketchewan, Manitoba. Ask the Long-distance Rate Clerk for rates and information.

LETTERS TO THE EDITOR

Seeing Ourselves as Others See Us

Editor Review:

Sir,—With the beautiful valley of Creston, the magnificent scenery and refreshing mountain air, I doubt very much if the Crestonians really know and appreciate what they have, as their neglect to keep the town handsome is not gratitude, and it is a surprise to visitors and tourists coming to the town and notice the shabby looking buildings and residences sadly in need of paint. The shaky back sheds halfway tumbling down; back yards full of rubbish and trash, and not a man in sight to order all this unsightly garbage removed. What a pest. Not only is it a local disgrace, but detrimental to the province—health and business as well—and extremely injurious to the young generation to live in and witness.

Is it not about time that some one got on to themselves and woke up. If Creston is worth while living in it is surley worth while to keep clean. Hardly a more disreputable settlement can be found for a small community. The business men should be the first to start a campaign to clean up because a place of business is the first place a traveller will notice. Next comes the homes, where the carpenters should be put to work making much needed repairs. Next comes the painter along to put on a new coat, as face powder and paint do wonders.

A regular one month dress up campaign should be started, and during this period dealers should be requested to sell the needed materials at almost cost in order to induce the poor householders to polish up the town. Why, even the council men permit the owner of the burned Creston Hotel to leave the dump of junk from the fire—a most wonderful sight for the tourists to see coming in over the new road; some memories for our visitors to bring home, and to think about the first night to sleep in your city. The fire, isn't it marvellous?

For heaven's sake give the owner order at once to remove all the material immediately. From a point of health, where is the health department anyway. If the owner fails to comply within three days to start and not finish within one week then engage some of the workless and charge it up against the property.

There are many other places needing similar notice and attention. Get after them. What are you afraid of. Work never hurt anybody, and that will help to keep the home fires burning, by engaging labor, as from reports there are homes where the necessities of life are none too plentiful. Helping these people is more important than giving flowers to the hospital, that will not satisfy an empty stomach. If you think it will, just try it on yourself, and let us know.

A spotless town with clean, painted and repaired buildings, store fronts, homes, flower gardens, streets, etc., will make tourists stop to investigate, and spend their money. It will stimulate business and naturally, help unemployment, and also help make a better impression on our dear little children. They are the foundation of the empire, and they will grow up to be better men and women by our example of cleanliness. A shabby town offers no inducement, and visitors pass right through, and you can't blame them.

Have actually seen men loafing about their places; sitting down, doing absolutely nothing worth while; simply chewing the fat about what the other fellow should be doing, when their own place was very much in need of a few nails, some new woodwork, a little painting, fixing up the garden, cleaning the alleys and backyards. Is it any wonder that some of our loving children feel ashamed of their town? What is wrong anyway? Are the young getting old, and the old getting younger. Come on, boys, let's get started, and show the next town up. Yours for a clean sweep and a spotless town—that's Creston. CAPT. C. O'PETERS.

The Cranbrook Courier has it that unemployment camps are to be at Ryan, Yahk and Goatfell.

Council Receives Trio Deputations

Would Lower Wilson Ave. Road —L. M. Simpson Explains the Plebiscite—Col. Mallandaine is Heard re Canyon Power.

The feature to the September meeting of the village council Monday evening was the receiving of delegations on various missions, and disposing of a varied line of correspondence. Reeve F. H. Jackson presided, and Councillors Edmondson and Henderson were in attendance.

Mrs. H. Young, T. Mawson and C. F. Hayes, property owners on Wilson Avenue, were present to discuss with the council the matter of lowering the road on that thoroughfare to get away from the usual spring floods that are damaging the foundations of the buildings on the west side of the street Favorable consideration was promised.

Fulfilling a promise made to the reeve at the board of trade meeting a week previous Col. Mallandaine was on hand to discuss the West Kootenay Power & Light Company's development of Goat River Canyon, on which matter the ouncil has been pressing for action. The outstanding points of Col. Mallandaine's discussion was that definite word would be here by October 1st, and in reply to some questions the visitor stated that the West Kootenay had been negotiating for some months to take over Creston Power & Light Company.

L. M. Simpson, president of the latter company, was present later in the evening to discuss the plebiscite he had asked for, and stated the reason he would like a vote taken was to satisfy the requirments of a firm from which he was arranging to borrow money, this firm not being satisfied that the present franchise was all that it purported to be but a vote of the ratepayers would clear the matter up.

In some discussion on the matter in hand Mr. Simpson stated that his company had not been negotiating with the West Kootenay Company as to the latter taking over the local power plant, and Mr. Simpson assured that he would send a letter to the council making this point quite clear.

The council agreed to grant the plebiscite, Mr. Simpson to pay all expenses, but nothing further will be done until a special meeting on October 5th, at which time the air will be clear as to what West Kootenay Company propose to do at the Canyon.

Before leaving the chamber Col. Mallandaine informed the council that the asked-for improvements in water service in the vicinity of the school is now being provided and that the installation would provide for two hydrants in that section.

In connection with the purchase of the 10 feet of frontage on Canyon street, Chas. Moore, who owns Lot 1, asks $2 per foot, as compared with $1 paid other interested property owners. The council refused to purchase at the higher price.

The council will not lease the park pavilion to the Badminton Club who write asking for a rental price for the season. The request of Mrs. W. H Morrow, Mrs. T. Dickson and Mrs. Bunt for a road to their property recently acquired from Mrs. Edmondson, to be known as Elizabeth Street, will stand over until the blue prints arrive.

The Anglican and United Churhces were given permission to erect permanent refreshmen stands on the fall fair grounds. A new sidewalk will be put down on Fourth street alongside the site of the former Creston Hotel which went up in smoke early in July. The bridges are to be cleaned off, and at the October meeting the 1931 street gravelling work will be considered.

August accounts totalled $480, and of this $224 was for gravel and labor supplied by Creston Transfer. Up to the present no suitable vehicle to serve as a fire truck has been secured but in order to assure the speedy movement of equipment to future fires the council will pay $7.50 to the first owner of a truck who reaches the firehall to pull the equipment, and if a second truck is needed it will be paid $5.

Local and Personal

To-night's attraction is the dance under K.P. building fund auspices at the Park Pavillon, with music by Creston dance band, and dancing to start at 9 p.m., with an admission of $1 and 50 cents. There will be a grand drawing contest for cash prizes amounting to $25.

Arthur Stanley, of Nakusp, a son of A. E. S Stanley, a former owner of the Creston Review, was renewing acquaintances in Creston at the end of the week, having motored in on Friday for a few days stay. Art is now owner of the Arrow Lakes News, published at Nakusp.

According to the records at the Creston office 70 forest fires were reported here during the season. Locally the biggest blazes were the fires on the Winlaw limit and along Goat Mountain. For a time about 325 men were required to handle the latter blaze, and almost as many were on the former for a short time.

Rev. M. Mawhinney of Nelson is announced to take the services in the United Church at Canyon and Creston on Sunday, at 3 and 7.30 p.m. respectively. There will be no service at Wynndel. At the close of the servica at Creston the visitor will have a meeting with the official board and church members.

Creston will have the services of a first-class lawyer commencing with the first of October when W. L. Bell, who has been practising at Tompkins, Sask., for some time past will open here in the store at present occupied by E. G. Timmons as the electric shop. Mr. Bell is moving here with his family and has leased the C. B. Garland residence on Grandview Heights.

Friday night's rainstorm greatly interfered with the attendance at the bridge drive in the Parish Hall that evening under Knights of Pythias building fund auspices. Fourteen tables were in play with the prize scores made by Mrs. R. Chandler and Mrs. A. E. Davies, and the gentlemen's high scores were registered by W. G. Littlejohn and C. S. Hester. A splendid lunch was served.

The school sports will not be held in connection with the fall fair this year owing to the difficulty of obtaining a whole holiday for the schools. The new departmental regulations are very strict in this respect and it has been decided to hold a softball tournament in the afternoon open to teams from the Valley public schools. Prizes will be given to the terms who reach the final. There will also be basketball game between the High and Creston Public Schools. This event was well staged last year and was a fine exhibition of the sporting spirit in which a game should be played.

Local and Personal

A credit auction sale of furniture, implements and other farm equipment will be held at the John Sherwood ranch on Saturday, September 26th, sale to commence at 1 30 p.m.

Mr. and Mrs. C. B. Twigg of Cranbrook were calling on Creston friends a couple of days at the first of the week. Mr. Twigg was one of the judges at the Wynndel fair on Wednesday.

Kasio Kootenaian: M. B. Mikkleson, of Lewiston, Ida., and M. Holben, f Creston, were in the city on Friday endeavoring to dispose of a quantity of feed wheat to local ranchers.

The Review is asked to state that an error occurred in la t week's issue. Mrs. W. Kinahan (nee Elsie Spiers) was a guest of Mrs. G. Hendren and not Mr. and Mrs. S. Hendren as reported.

Creston and District Women's Institute has just been advised that in addition to winning the silver cup for needlework at Vancouver exhibition they also won cash prizes amounting to $17.

Miss Lamont, Presbyterian field secret ary, will hold service in St. Stephen's Church on Sunday morning, Sept 20th, at 11.15 o'clock. She is an interesting speake. and a good attendance is looked for.

Creston and District Women's Institute will be at at home at a tea to all the grandmother's in the district on Tuesday afternoon, September 22nd from 3 to 5 o'clock in Trinity United Church hall.

There is a lull in the movement of fruit this week. Wealthys are practic ally cleaned up and McIntosh Reds will be on the move by the end of the week. They are showing wonderful color and excellent size.

Up to the middle of the month 54 carloads of fru t and vegetables had been shipped from Valley points, Erickson contributing 32 of them and Creston 22. In the lot were about ten carloads of bulk Wealthys.

Mrs. Geo. Murrell, who has been here for the past few months, left on Saturday on her return to England, where she will be remaining for the winter with her daughter, Yvonne, who is attending school in England.

After a showery spell that spread over ten days weather conditions cleared up on Wednesday and wheat cutting was resumed at all points on the Reclamation Farm. Up till Thursday noon 20 car loads ha been shipped.

Quite a number from Creston were at Wynndel on Wednesday afternoon for the Women's Institute fall fair. In the needlework class the judging was done by Mrs. Compton and Mrs Hayes. Col. Mallandaine officially opened the fair.

F. H. Pym of Cranbrook, the assistant forester for East Kootenay, was here on an official visit at the end of the week. Patrolman A. Hurry of West Creston, and Chas. Pipe who has had the lookout at the head of Thompson Creek, were laid off at the 15th.

In connection with request f the minister of public works to all Legion posts to register unemployed veterans, Creston Valley Post is undertaking this good work and registrations can be made with G. H. Kelly at the drugstore The information asked for is applicant's regimental number, name, unit enlisted in, place of discharge and whether married or single All returned men are asked to register whether members of the Legion or not.

PUT HIM OFF HIS PIPE

Indigestion and Acidity

"A few months ago, I had an attack of indigestion, heartburn and acidity, and had no appetite for meals, especially breakfast. I am a pipe smoker, and for several days I felt so ill I could not even look at my pipe. I decided to try Kruschen Salts. A few days afterwards I found that the heartburn and acidity had gone, and for the last five or six weeks I have been in my usual good health. I can now enjoy my pipe-smoking, and in fact feel about 10 years younger."—R. P.

When your digestive juices fail to flow freely your food lies in the system and ferments, thus causing the distress of indigestion. The "little daily dose" of Kruschen first stimulates the flow of the gastric juices, and then ensures complete, regular and unfailing elimination of all waste matter every day.

SUNDAY SCHOOL LESSON

SEPTEMBER 20

THE COUNCIL IN JERUSALEM

Golden Text: "For ye, brethren, were called for freedom; only use not your freedom for an occasion to the flesh, but through love be servants one to another."—Galatians 5.13.

Lesson: Acts 15.1-35; Galatians 2.

Devotional Reading: Romans 8.1-10.

Explanations and Comments

A Deputation Sent From Jerusalem To the Church At Antioch, Acts 15. 22.—When certain men came from Judea and taught the brethren at Antioch that they could not be saved unless circumcised after the manner of Moses, it became evident that the whole question of Gentile Christianity must be settled once for all and settled speedily.

The Church appointed Paul and Barnabas and others (among them Titus, Galatians 2.1), to go to Jerusalem and work out the problem in consultation with the apostles and elders. Read the first twenty-one verses of our chapter. The Council selected two of its outstanding men, Judas and Silas, to return with Paul and Barnabas and deliver its decision to the church at Antioch. "Judas called Barsabbas" may have been brother to "Joseph called Barsabbas," candidate with Mathias as successor to Judas Iscariot (Acts 1.23). Silas became Paul's companion on his Second Missionary Journey, and in the next three chapters of The Acts he is frequently mentioned.

The Earliest Formal and Official Document Issued By the Christian Church, Acts 15.23-29.—With the delegation a letter was sent, directed to "The Gentiles in Antioch, and Syria, and Cilicia." The churches founded by Paul on his first missionary tour are not mentioned, either because they were apparently unaffected as yet, or because the fewness of the Jews in those centers made it unnecessary to accentuate any restrictions.

The letter wholly repudiated the teaching of the Judaizers to whom the church at Jerusalem had given no commandment to declare that Gentiles must be circumcised, and keep the law. They did not have any authority at all from the apostles when they were thus troubling the church at Antioch with these words and so "subverting their souls." The word "subverting" literally means the entire removal of goods and chattels, to pack up baggage and carry off, to dismantle. It expresses with striking pictorial strength the idea that these false teachers were taking away from the Gentile converts their entire possession of Christ. As Paul says in Galatians 2.4, "They came in privily to spy out our liberty which we have in Christ Jesus, that they might bring us into bondage."

Judas and Silas, after exhorting the church, returned to Jerusalem. Paul and Barnabas remained at Antioch for some time, preaching and teaching the word of the Lord.

One machine now being used on Canadian farms can cut and thrash grain on 40 acres in a day with only two men operating it.

Saskatchewan's Cancer Campaign

Hon. Dr. Munroe Announces Opening Of Radium Emanation Plant and Cancer Clinics

Saskatchewan has the lowest death rate of Canadian provinces, and the lowest death rate from tuberculosis, cancer, diseases of the heart, pneumonia and automobile accidents.

These statements of fact are based on Canadian Vital Statistics for 1930, recently released by the Dominion Bureau of Statistics. They demonstrate, unequivocally, Saskatchewan's leadership in matters pertaining to the health of its people.

While several factors have contributed to the spectacular showing of Saskatchewan in statistical records giving the comparative death rates of the various provinces and the Dominion, one that should not be overlooked is the very effective contribution made by the Saskatchewan Department of Public Health, presided over by Hon. F. D. Munroe, M.D., as Minister. The province is noted for its advanced health legislation, and its achievements in the campaign against tuberculosis are too well-known to require citation. It was only to be expected, then, that, when cancer started to claim particular attention as a "major killer," Saskatchewan should be the first province of Canada to tackle the disease as a public health problem.

The psychological opportunity came, in 1929, with an exceptionally favourable combination of circumstances. The medical profession had surveyed the cancer situation and been seized of the necessity of intensive efforts being made to combat the cancer scourge. But someone was required to crystallize the thoughts and ideas of the medical men into action. That person presented himself in Dr. Munroe who, having been elected to the Legislature as member for Moosomin, and appointed Minister of Public Health in September, 1929, immediately grasped the chance and formulated a policy which gained the support and endorsement of the entire medical profession of the province.

The campaign against cancer, then, first conceived in 1929, was presented in tangible and actionable form in the 1930 session of the Legislature when Dr. Munroe, in his first session as Minister of Public Health, piloted the Saskatchewan Cancer Commission Act through the Legislature and was voted a sum of $115,000 for the purchase of radium and equipment. This year, a further sum of $30,000 was voted him for administrative purposes.

Pursuant to the Act, a permanent Saskatchewan Cancer Commission was appointed, the members being Hon. Dr. Munroe, Dr. David Low, Regina, and Dr. R. O. Davison, Director of the Communicable Diseases Division of the Department of Public Health. Drs. Munroe and Low are graduates of McGill University, while Dr. Davison is a graduate of Toronto.

When the Commission settled to the gigantic task assigned to it, difficulties were experienced from the start in arranging for the supply of radium essential to the programme contemplated. During the interim between application for, and actual purchase of, a sufficient supply to start operations, contacts were established by which the Commission obtained access to the latest data in cancer research, and definite plans for the provincial campaign were formulated to the end that no undue delay would follow receipt of the radium and institution of the actual, clinical programme.

So well were the plans laid that, immediately a supply of radium was obtained, Hon. Dr. Munroe was in position to announce that one of the first emanation plants west of Montreal had been established at the University of Saskatchewan to supply clinics in the main centres with radium gas in "seeds" and other suitable containers, for treatment of cancer cases. This emanation plant, it is stated, will not only produce sufficient seeds to meet provincial requirements, but will ultimately be the source of supply of provinces to the west.

The story of Saskatchewan's campaign is best told in the words of its author and sponsor, Hon. Dr. Munroe:

"It was in June of last year, that I announced the personnel of the Saskatchewan Cancer Commission and, since their appointment, the members have been giving their attention to the various problems involved.

"It should be recognized that this Commission is not a temporary one, but a permanent body appointed to carry out the provisions of the Act, its functions including inquiry, education and treatment. We have been able to place an order for radium and are now in receipt of the first shipment which is in the form of radium bromide for use in the preparation of radon, or radium gas.

"In the outstanding clinics of the world, two methods of using radium in the treatment of cancer are considered valuable. One is the use of radium gas enclosed in suitable containers or applicators ("seeds"), and the other is the use of radium salt enclosed in needles and tubes made of platinum. In Saskatchewan, we propose that both methods will be used, either separately or combined, as deemed advisable. We also are making provision for the use of high voltage X-rays, both alone and in combination with surgical treatment and radium therapy.

"It is recognized that cancer cannot be dealt with in a manner that will produce satisfactory results, unless cases are available for treatment in the early stages of the disease. Consequently, with the co-operation of the medical profession, the Commission proposes to adopt an effective educational programme to facilitate early diagnosis and treatment. Consultative diagnostic clinics are being established in two centres, in connection with treatment clinics and also in connection with existing general hospitals. It is believed that more satisfactory results will be obtained by such procedure than by having separate institutions for cancer cases.

"In addition to this, the programme in Saskatchewan will follow the line approved and endorsed by the outstanding authorities on cancer treatment. That is to say, instead of following the very doubtful procedure of distributing radium supplies to physicians in all parts of the province upon requisition, the care of cancer patients will be confined to the established centres. This plan involves definite centralization of cancer treatment, and is based on the experience of other places which is, that cancer requires expert treatment and experienced care if adequate results are to be obtained.

"Cancer is, as a rule, a progressive condition, and the centralization of cases will be of distinct value to the patients, permitting, as it does, periodic re-examination under expert attention, and prompt treatment of recurrencies or metastases. Such a procedure also will be of definite value to us in carrying out provisions of the Act, by enabling us to follow up cases that receive treatment in order that complete and detailed statistical records may be compiled which, later, will serve as a guide in arriving at, and assessing the value of, the procedure used. This following-up of cases, with compilation of the data obtained, will be essential to providing the citizens of Saskatchewan with the most effective known treatment of the disease."

Referring to Saskatchewan's outstanding record as shown in comparative vital statistics, Hon. Dr. Munroe said:

"Saskatchewan is situated very favourably in comparison with other provinces of Canada and states of the American Union. Saskatchewan's death rate from cancer in 1928 was 55.2 per 100,000 population, whereas the older provinces and states recorded a rate in excess of 100. But those figures do not tell the whole story in this province. In 1905, the death rate from cancer was only 8.8, whereas in 1919, it was 33.1 per 100,000. Thus it can be seen that cancer deaths are increasing at an alarming rate. In the ten-year period prior to 1928, the cancer deaths per 1,000 deaths from all causes in Saskatchewan, increased from 38.3 in 1919, to 76.2 in 1928. That means the rate has practically doubled in that period."

In conclusion, the Minister of Public Health said:

"Cancer is a disease of the adult and later life span. In Saskatchewan, the percentage of living persons over 40 years of age is smaller than in the older provinces. Consequently, the present appears to be the opportune time to begin operations against the cancer scourge, by making suitable preparations to provide the citizens of this province with the latest and most approved methods available of cancer treatment."

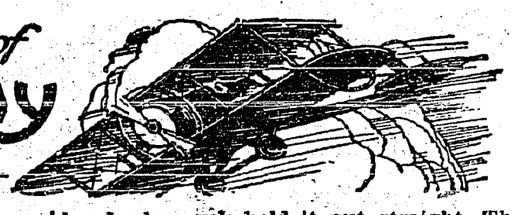
SASKATCHEWAN CANCER COMMISSION

HON. F. D. MUNROE, M.D., C.M., author and sponsor of the Saskatchewan Cancer Commission Act, a native of Glengarry County, Quebec, and a graduate of McGill University, was elected member of the Saskatchewan Legislature for Moosomin Constituency in the general elections of 1929. Appointed Minister of Public Health in September of that year, upon accession to office of the present Government, Hon. Dr. Munroe immediately applied himself to the cancer problem, his efforts resulting in passage of the Cancer Commission Act within the short space of five months. This, he admits, was made possible by the wholehearted support accorded him by members of the medical profession, irrespective of political affiliation. Hon. Dr. Munroe also inaugurated the Saskatchewan mental health programme.

DAVID LOW, M.D., C.M., was born at Bainsford, Scotland, in 1868, and came to Canada in 1870. Educated in the public and high schools of Ontario, he graduated from McGill University in 1889, and for some time was house surgeon in Montreal general hospital. In 1890, he commenced practice in Regina and, from 1894 to 1901, was medical health officer for the city. Dr. Low was active in the establishment of the Regina Victoria Hospital and organized the Regina Medical Association. In 1913, he was elected president of the Saskatchewan Medical Association, and was chairman of the committee of the Canadian Medical Association which drafted the constitution upon which the Royal College of Physicians and Surgeons of Canada is founded.

R. O. DAVISON, M.D. was born at Brantford, Ont., in 1885, and, receiving his early education in the public and high schools of his native city, later entered the University of Toronto from which he was graduated in 1908. Dr. Davison was appointed medical inspector in the Saskatchewan Department of Public Health in 1921 and, when the Division of Communicable Diseases was organized, in 1923, became its first director. When Hon. Dr. Munroe decided to institute a programme to deal with the cancer problem, Dr. Davison was placed in charge of the work as Director of Cancer Service. He has been active in medical circles since coming to Regina and, in 1920, was president of the Regina and District Medical Society.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE



WHAT CAME BEFORE: Captain Jimmy is flying to Japan with the Chinese General Lu. They run out of gasoline and are forced to land on a deserted island in the Chinese Sea.

After our adventure with the shark, we climbed up on the high rock that stood in the centre of the little deserted island. Here we lit a roaring big fire, in hope that some passing ship would see us.

All night we kept it blazing but morning broke grey and cold without a sign of smoke or sail on the horizon. After daylight, we piled on wet wood until a great pillar of white smoke went up to the clouds but never a sign of life did we see on the still, glassy ocean.

Great smooth swells came in from the open water, rose and crashed with a dull boom against the rocks but apart from the sound of the waves, our island seemed to be the most silent, deserted spot in the world. Sometimes we'd find ourselves whispering—why I don't know—for we could have shouted all day at the top of our voices and no one would have heard us.

Day after day we kept the smoke pillar rising into the sky—night after night we kindled a huge yellow blaze on the summit rock. We almost gave up hope of being rescued. No doubt we were far from the regular steamer channels.

When we weren't gathering wood for the fire, we were hunting eggs in the sand—and believe me—they were certainly terrible. We caught a few fish — but they were very small and felt like pin cushions, they were so full of bones. Being left on a desert island isn't half as much fun as we were taught to believe when we were boys.

On the fifth night a dense cold fog came in from the sea. It smelled like sea-weed and salt water and was so thick that you could scarcely see your hand when you held it out straight. The branches dripped with moisture and we huddled close to the camp fire. Even General Lu shivered through his six suits of clothes. Scottie sneezed in disgust and hid himself in the wood pile.

Suddenly I woke up with a start. A deep rumbling sound drifted in from the sea. I grabbed Chung and shook him and he jumped to his feet with a yell. Then the deep rumbling sound came again. Once—twice.

A steamer horn!

Sure enough. It was the deep-toned horn of a freighter. Frantically, we piled wood on the fire. I figured that some steamer was out there in the fog, not daring to move far until the air cleared. Hour after hour, we fed the fire with armsful of wood and brush. Up and down we tracked until we almost dropped from weariness. Lu forgot that he was a General and worked like a Trojan. If only the blaze could be made bright enough to penetrate the fog—

Then morning came again and a strong wind blew up from the East. Soon the air would clear. I paced impatiently up and down trying to peer through the thick white curtain of the fog.

Chung, to my surprise, lay down and prepared to go peacefully to sleep.

"Sloon we know — velly good — velly bad — no can tell," said the tranquil little Chinese. "Sleep always good — all men samee when sleep. No muchee worry."

And with that he shut his eyes and snored loudly!

Meanwhile I stared out into the white fog, wondering what the next hour would bring.

To Feel Your Best

Take a dash of ENO'S "Fruit Salt" in a glass of water every morning. Millions do this daily because they know that ENO—gentle, effective, non-habit-forming—is the deadly foe of constipation.

In cases of acid stomach, fatigue, billiousness—ENO is invaluable. For more than sixty years it has been the standby in thousands of well-regulated homes.

But remember, only ENO can give ENO results. 8

THE HOUSE OF DREAMS - COME - TRUE

BY MARGARET PEDLER

A THRILL'NG NEW SERIAL

From the great castle of Beirnfels, the House-of-Dreams-Come-True, into a world of bitterness and strife and love, went Jean Peterson. Thrilled by a magic day at Montavan, spent with a man of mystery, she was brought face to face with the realization that she loved him—hopelessly.

Tragedy, misery, vengeance dogged at the heels of this beautful love-child the moment she set foot on the shores of England. Disillusioned, broken-hearted, she returned to her castle of shattered Dreams only in time to see it, too, come tumbling down before her eyes, swept by the ravages of fire. But in its place there rose a greater, a more enduring castle—the castle of love—the House-of-Dreams-Come-True.

Cursed from early childhood with an almost uncontrollable temper, and branded in later life by "The Mark of the Beast," Blaise Tormarin committed a crime for which he seemed destined to pay a life-long penalty of mental anguish. But that magic day at Montavan opened for him a new life—a life through which he fought a losing battle against love.

And losing, he yielded to the love of the beautiful girl from the far-off castle, only to find as the wedding day approached, that tragedy still followed, making it impossible for him to marry. Here "Chance," in the person of revenge, stepped in and the world cleared of misery and darkness; and Blaise and Jean found at last their House-of-Dreams-Come-True.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Folly," "The Hermit Of Far End."

Hodder & Stoughton, Ltd., London.

It's a strange road leads to the House of Dreams,
To the House of Dreams-Come-True,
Its hills are steep and its valleys deep,
And salt with tears the Wayfarers weep,
The Wayfarers—I and you.

But there's sure a way to the House of Dreams,
To the House of Dreams-Come-True.
We shall find it yet, ere the sun has set,
If we fare straight on, come fine, come wet,
Wayfarers—I and you.

—Margaret Pedler.

CHAPTER I.

The Wander-Fever

The great spaces of the hall seemed to slope away into impenetrable gloom; velvet darkness deepening imperceptibly into sable density of panelled wall; huge, smoke-blackened beams, stretching wide arms across the roof, showing only as a dim lattice-work of ebony, fretting the shadowy twilight overhead.

At the furthermost end, like a giant golden eye winking sleepily through the dark, smouldered a fire of logs, and near this, in the luminous circle of its warmth, a man and woman were seated at a table lit by tall wax candles in branched candlesticks. With its twinkling points of light, and the fire's red glow quivering across its shining surface, the table gleamed out like a jewel in a sombre setting—a vivid splash of light in the grey immensity of dusk-enfolded hall.

Dinner was evidently just over, for the candlelight shone softly on satin-skinned fruit, while wonderful gold-veined glass flecked the dark pool of polished mahogany with delicate lines and ripples of opalescent colour.

A silence had fallen on the two who had been dining. They had been gay enough together throughout the course of the meal, but, now that the servants had brought coffee and withdrawn, it seemed as though the stillness—that queer, ghostly, memory-haunted stillness which lurks in the dim, disused recesses of a place—had crept out from the four corners of the hall and were stealing upon them, little by little, as the tide encroaches on the shore, till it had lapped them around in a curious atmosphere of oppression.

The woman acknowledged it by a twist of her slim shoulders. She was quite young—not more than twenty—and as she glanced half-enquiringly at the man seated opposite her there was sufficiency of likeness between the two to warrant the assumption that they were father and daughter.

In each there was the same intelligent, wide brow, the same straight nose with sensitively cut nostrils — though a smaller and daintier affair in the feminine edition, and barred across the top by a little string of golden freckles—and, above all, the same determined, pointed chin with the contradictory cleft in it that charmed away its obstinacy.

But here the likeness ended. It was from someone other than the dark-browed man with his dreaming, poet's eye—which were neither purple nor grey, but a mixture of the two—that Jean Peterson had inherited her beech-leaf brown hair, tinged with warm red where the light glinted on it, and her vivd hazel eyes—eyes that were sometimes clear and still and brown like the waters of some quiet pool cradled among the rocks of a moorland stream.

They were like that now—clear and wide-open, with a certain pensive, half-humorous questioning in them.

"Well?" she said, at last breaking the long silence. "What is it?

The man looked across at her, smiling a little.

"Why should it be—anything?" he demanded.

She laughed amusedly.

"Oh, Glyn, dear"—she never made use of the conventional address of "father." Glyn Peterson would have disliked it intensely if she had—"Oh, Glyn dear, I haven't been your daughter for the last twenty years without learning to divine when you are cudgelling your brains as to the prettiest method of introducing a disagreeable topic."

Peterson grinned a little. He tossed the end of his cigarette into the fire and lit a fresh one before replying.

"On this occasion," he observed at last, slowly, "the topic is not necessarily a disagreeable one. Jean"—his quizzical glance raked her face suddenly—"how would you like to go to England?"

"To England?"

Her tone held the same incredulous excitement that anyone unexpectedly invited to week-end at El Dorado might be expected to evince.

"England! Glyn, do you really mean to take me there at last?"

"You'd like to go then?" A keen observer might have noticed a shade of relief pass over Peterson's face.

"Like it? It's the one thing above all others that I've longed for. It seems so ridiculous to be an Englishwoman and yet never once to have set foot in England."

The man's eyes clouded.

"You're not—entirely—English," he said in a low voice.

Jean knew from what memory the quick correction sprang. Her mother, the beautiful opera singer who had been the one romance of Glyn Peterson's life, had been of French extraction.

"I know," she returned soberly. "Yet I think I'm mostly conscious of being English. I believe it's just the very fact that I know Paris—Rome—Vienna—so well, and nothing at all about England, that makes me feel more absolutely English than anything else."

A spark of amusement lit itself in Peterson's eyes.

"How truly feminine!" he commented drily.

Jean nodded.

"I'm afraid it's rather illogical of me."

Her father blew a thin stream of smoke into the air.

"Thank God for it!" he replied lightly. "It's the cussed contradictoriness of your sex that makes it so enchanting. If women were logical they would be as obvious and boring as the average man."

He relapsed into a dreaming silence. Jean broke it rather hesitatingly.

"You've never suggested taking me to England before."

His face darkened suddenly. It was an extraordinarily expressive face — expressive as a child's, reflecting every shade of his constant changes of mood.

"There's no sense of adventure about England," he said shortly. "It's a dull corner of the world—bristling with the proprieties."

Jean realised how very completely, from his own point of view, he had answered her. Romance, beauty, the sheer delight of utter freedom from the conventions were as the breath of his nostrils to Glyn Peterson.

Born to the purple, as it were, of an old English county family, he had stifled in the conventional atmosphere of his upbringing. There had been moments of wild rebellion, bitter outburst against the established order of things, but these had been sedulously checked and discouraged by his father, a man of iron will, who took himself and his position intensely seriously.

Ultimately, Glyn had come to accept with more or less philosophy the fact of his heirship to old estates and old traditions, with their inevitable responsibilities and claims, and he was just preparing to fulfil his parents' wishes by marrying, suitably and conventionally, when Jacqueline Mavory, the beautiful half-French opera singer, had flashed into his horizon.

In a moment the world was transformted. Artist soul called to artist soul; the romantic vein in the man, so long checked and thwarted, suddenly asserted itself irresistibly, and the very day before that appointed for his wedding, he and Jacqueline ran away together in search of happiness.

And they had found it. The "County" had been shocked; Glyn's father, unbending descendant of the old Scottish Covenanters, his whole creed outraged, had broken under the blow; but the runaway lovers had found what they sought.

At Biernfels, a beautiful old schloss on the eastern border of Austria, remote from the world and surrounded by forest-clad hills, Glyn Peterson and Jacqueline had lived a romantically happy existence, roaming the world whenever the wander-fever seized them, but always returning to Schloss Beirnfels, where Peterson had contrived a background of almost exotic richness for the adored woman who had flung her career to the winds in order to become his wife.

(To Be Continued.)

Crude weighing machines based on the balance were used in Egypt at least 5,000 years before the Christian Era.

Little Helps For This Week

"Changed into the same image from glory to glory."—2 Corinthians iii. 18.

As one lamp lights another, nor grows less,
So nobleness enkindleth nobleness."
—James Russell Lowell.

In a very simple and literal way he believed that God was His Father, not in name only, but in very truth. He knew that he, in common with every human being, had it in his power to live as a son or as an alien; and he knew—by that most sure proof, the experience of daily life—that he could only overcome the cravings of selfishness by a constant effort to come into closer union with the life-giving spirit to whom he was truly akin, that so he might not starve, but grow and develop.—Knight-Errant.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Eclectric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Alberta Homesteads

Homestead entries in Alberta for the month of July numbered 1,114, more than half of which were taken out through the Edmonton land office. Of the total for the month, 331 entries were made by women, this being the first occasion in which the new law enabling women to homestead has been in operation.

CORNS LIFT OFF—

Pain Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

PETERS
High Velocity
SHELLS

The fastest and hardest hitting Shot Shell Load on the market

PETERS High Velocity Shot Shells deliver astonishing results, reaching way beyond the range of standard loads with a hard-hitting, killing pattern that brings down the game that ordinarily would get away.

The remarkably effectiveness of this shell is principally due to the fact that the H.V. shell is especially designed and manufactured for progressive burning powder with which it is loaded. The H.V. is the only shell on the market so especially constructed and loaded, hence the results obtained are superior from every standpoint.

For long range, hard hitting results use Peters High Velocity—the blue shell with a "whang". "The shell that gets 'em where others couldn't touch 'em."

HIGH VELOCITY means: More Speed, Harder Hitting, More Penetration, Longer Range All around Effectiveness.
