THE CRESTON REVIEW

VOL. XXIII. CRESTON, B. C., FRIDAY, SEPTEMBER 4, 1931 No. 24

Robert Stark Dies Suddenly

Resident Here Since 1910—Won High Honors at Imperial Fruit Show 1921-22—Active in Promoting Irrigation System.

In the death of Robert Stark, which took place at an early hour on Friday morning last, Creston district has lost a highly respected citizen, and an orchardist who has done much to advertise the possibilities of this district as a fruit growing area. About three years ago deceased suffered a stroke from which he only partially recovered and death came as a result of a recurrence of this trouble after but a short illness.

Deceased was a native of Devon, England, and came to Canada in 1910, with the intention of locating in the Windermer country, but not finding that locality to his liking he came on to Creston where he acquired a 20 acre tract which he highly developed to tree fruits, notably pears and Cox Orange apples, and about four years ago he branched out into the production of bulbs and cut flowers and was already making a name as a produces of daffodils and tulips.

His outstanding success as an orchardist was in 1921 and 1922 when he was a heavy exhibitor at the Imperial Fruit Show at London, England, and in competitions open to the British dominions as well as the whole British empire he scored heavily with pears and Cox Orange and Winter Banana apples particularly, his successes in the two years bringing him four gold one silver and one bronze medal, as well as ten special prizes.

Prior to suffering his misfortune of four years ago the late Mr. Stark was active in backing all moves to promote the best interests of the fruit industry. He was one of the prime movers for the present East Creston irrigation system, and for years was active on the agriculture committee of Creston board of trade, while in private life the good turns done others less fortunate than himself won for him the well deserved respect of the whole community

The late Mr. Stark was in his 86th year, and leaves a wife and family in England. W. P. Stark, of Victoria, a former resident of Creston, is a brother. The remains were taken to Spokane for cremation, and the ashes were brought back to Creston for burial on the ranch.

Sirdar

Mr. and Mrs. Shultz of Spokane, with Russie Ellison and Lyle Smith of Woodbine, Iowa, were visitors with Mr. and Mrs. R. Heap a few days last week.

Mrs. T. Rogers arrived home on Friday from a week's visit with Cranbrook friends.

Word was received last week from Calgary, Alberta, of the death of Mrs. Frayling, in the hospital in that city. The community will extend a sincere sympathy to Mr and Miss Frayling in their bereavement.

Marshall McPherson of Cranbrook was a visitor with Mr. and Mrs. Jas. Wilson last week.

Jock McDiarmid of Nelson was renewing acquaintances in Sirdar on Friday.

Mr. and Mrs. Jas. Wilson were visiting with Cranbrook and Kimberley friends last week.

Mr and Mrs Altamar and friends of Natal were visitors with Mr. Lombardol

Charles Bleumenauer left on Friday for Vancouver, where he will attend high school this term.

Mrs. Martin arrived home on Saturday from a two weeks' visit with her sister, Mrs. Whiteside, at Crowsnest.

Mrs. Midgley, who has been a house guest of Mrs. McCabe left for her home in Nelson, on Tuesday.

Mrs. Jim Pascuzzo has returned from St. Eugene Hospital, Cranbrook.

Father Choinel of Cranbrook was here for church service on Sunday morning.

Mr. Johnson, the new school principal, arrived from Nelson on Saturday.

Miss Eileen Heap of Spokane, was a visitor with her parents here a few days ast week.

Misses Margaret Rogers and Frances Talerico left on Monday for Creston, where they will attend high school this term.

Miss Rose Pascuzzo was a Cranbrook visitor last week.

Miss Mary Cooper of Trail is a visitor with her sister Mrs. Jim Pascuzzo.

Mrs. R. Hopwood and daughter, Helen, of Creston, are visiting with Mr. and Mrs R. Heap.

T. J. Behan, C P.R. roadmaster, who has spent the past three weeks holiday ing in Vancouver, has returned.

Mrs. A. North, Mrs. C. Neil and Mr. and Mrs. R. Dennes were Creston visitors on Saturday.

Mrs. Talerico, with Frances and Sylvia, were visiting with Cranbrook friends last week.

Wynndel

Mrs. Rumsey and family left last week for Cranbrook, where they will reside for the winter.

Mr. and Mrs. F. Packman and family of Calgary, Alberta, are visitihg with Mr. and Mrs. H. F. Packman.

Rolf Hindley, who has been holidaying in Harrop, returned home last week.

Miss Loreen Williams left by auto for Albion Ridge, Alberta, where she is teaching school this term.

Miss Ruth Joy left for Nelson on Monday, where she will attend high school this year.

Mrs. Glasier and Mabel left on Monday for Cranbrook, where Mabel will atte d high school.

Mr. and Mrs. Redpath of Nelson were visiting here at the beginning of the week with Mr. and Mrs. McGinnis.

P. Andestad was a Nelson visitor this week.

Mrs. B. Murgatroyd and Peggy, who have been visiting with her father, John Bathie, left for their home at Revelstoke.

Misses E. Towson and B. Hulme, A E. Tows n and E. Hulme were auto visitors to Cranbrook on Saturday.

Mrs. H. A. Bathie got back at the end of the week from Edgewood where she has been attending the annual conference of the Kootenay Boundary Institutes.

School re-opened on Tuesday with Mr. and Mrs. McGreagor again in charge. The interior of the school is much improved by its coat of kalsomine and the grounds more spacious with the removal of the old school building. The youngsters will also appreciate the see saws and swing that are now available.

Special prizes are still coming in for the Women's Institute fall fair, which is to be held on September 16th. Creston Farmers' Institute have donated a sack of Purity flour for the best collection of vegetables and the Rawleigh dealer is giving $2 worth of his goods as a prize, which has not yet been allocated.

Erickson

Mr. and Mrs. D. Patinol and children of Cranbrook were weekend visitors here, guests of Mr. and Mrs. L. Heric.

Mrs. Roy Telford and Sandy with Stanley Sanford, returned n Sunday from a motor trip to Champion, Alberta.

Miss Kathleen Bundy, who has spent the past two months at Summerland, arrived home on Wednesday last.

Margaret Grexton, who has been visiting with her aunt. Mrs. McMaster, returned to Yahk at the middle of the week.

Miss Helen Dodds, who has spent the past month at Cranbrook, arrived home on Sunday.

Mr. and Mrs. H. Campbell and J. Dugdale of Bellvue, Alberta were week end visitors at their ranches here.

Miss Marion Heric, who has been visiting at Cranbrook for a couple of weeks, arrived home on Saturday.

Billy McNeil and S. Larson, who have been spending their vacation here, guests of Mrs. R. Dodds, returned to tneir home in Cranbrook on Monday.

Miss Treasa Defoe of Castlegar and Miss Edna Davis of Wynndel are here at present, working at Long, Allan & Long packing shed.

Mrs. Attwood and Mr. and Mrs. Percy Adams of Cranbrook spent a few days at the ranch last week.

School re-opened on Tuesday with a record attendance. D. Tully of Fernie is the new principal, and Miss Walker is again in charge of the junior room.

Anglican Sunday school will be resumed on Sunday with Mrs. Haskins and Mrs. Kemp in charge.

Capt. O'Peters of Miami, Fla., who a few years ago acquired the Lamont land holdings in the Erickson district, is a visitor this week looking after business interests.

Kitchener

Messrs. Alex. Ellis and Clarence Anderson left on Thursday for Merritt, where they hope to secure employment.

Miss Beatrice Molander, who has been visiting with Mrs. Fransen at Creston, returned home on Thursday.

Art. Simpson and son, Lewis, left for Claresholm, Alberta, on Thursday, for the threshing season.

Miss Myrtle Wickholm of Canyon arrived on Thursday, on a visit with Beatrice Molander, returning on Sunday.

Mrs. B. Johnson and son, Robert, returned by bus on Friday, rom Spokane, where they have been visiting her sister, Mrs. Myrene.

Ernest Driffll, who is with the B.C. Telephone construction crew at Wynndel, spent the weekend at his home here.

Mr. and Mrs. C. Taplin and daughter, Beryl, were guests of Mr. and Mrs. N. P. Molander on Thursday. They were on their way to their home in Canyon, after spending a couple of months in Calgary, Alberta.

Miss Beryl Taplin of Canyon arrived on Saturday on a visit with Miss Beatrice Molander.

Miss Irene Cavanaugh, who has spent the summer with her aunt, Mrs. B. Johnson, returned to her home in Kimberley, on Sunday.

Harry Redmile, who has been on a business trip to Edmonton, Alberta, returned on Monday.

Mr. and Mrs. B. Johnson left on Sunday for Kimberley by auto, for a few days' visit with relatives and friends.

Mrs. C. Senesael, Miss Vera McGonegal, John Belanger and Mrs. E. W. Payne of Creston, were motor visitors at Bonners Ferry on M nday.

School opened on Tuesday with 19 pupils in attendance. Miss Jessie White of Fernie is principal this year. Miss White is making her home with Mrs. C. Senesael.

Fred Smith, Wesley Blair and Dennis Bush left on Tuesday for Yahk, where they are on a forest fire fighting crew.

C. Senesael, Carl Anderson and James O'Brien left on Monday for Elko, where where they are working on a B.C. Tele phone Company construction crew

Miss Celina Langlois left at the beginning of the week on a visit with Mrs. Fred Lister at Camp Lister.

Master Allan Cameron arrived on Monday from Vancouver to reside with his grandfather, Z. Geroux, and will attend school at Kit ener this year.

Fred Nelson, photographer, and Mr. McDonald of the Beattie-Noble drugstore, Cranbrook, were calling on friends here on Sunday.

Lister

Mrs. Thos. Walls (nee Flossie Evans) of Sandpoint, Idaho, is spending a holiday visit here at present, a guest of Col. and Mrs. Lister.

Miss Irene Wellspring, who has been holidaying at Kimberley for a couple of weeks, arrived home at the end of the week.

Rev. T. Scott, Anglican rector at Creston, will be here for church service on Sunday morning at 11 o'clock.

Mis3 Celina Langlois of Kitchener has arrived to take Grade 8 work at Lister school and is stopping with Mrs. Lister.

Harry Helme and Harry Bollinger have trucks on the wheat haul from the Reclamation Farm to Creston, and expect to be at work for at least another three weeks.

Mr. tnd Mrs. Klein of Nelson, who have been visiting with Mrs, Meyer, left for their home on Friday.

All road crews were laid off on Monday, and Frank Bodgson and H. C. Sparrow came home that evening.

The school board has let the cohtract for 20 ricks of wood for this year's fuel supply to Mr. Hoglund of Canyon. Agnes Sinclair will again be in charge of janitor work.

Miss Curtis, principal of lister school got back from her holidays at Slocan City on Sunday, bringing back Cyril Bird who has been on a ten-day holiday in that town.

At Huscroft school the contract for the usual 20 ricks of wood has been let to Jas. Huscroft. Kin Demchuk, who had the contract of painting the school finished the work at the end of the week, and the building presents a much improved appearance. School re-opened on Tuesday with Principal Kolthammer in charge.

School opened for the fall term on Tuesday morning with an enrollment of 36 and at least one more to come. A year ago the opening attendance was 38. There are three new beginners in Mary Millner, Stella Beard and Mary Domke, along with Celina Langlois of Kitchener, who is to take Grade 8 work here. As 38 is the maximum number of scholars in an ungraded school it is just possible a second teacher may have to be secured.

AT THE HOSPITAL

The nursing staff wishes to thank Mrs. Garfield, Mrs L. McInnes, Mrs. Jas. Cook, Mrs. Hayes and Mrs. York for flowers and vegetables; J. W. Robinson, P. R. Truscott and Mrs. J. L. Rogers for contributions. Mr. Scott, Ruby and Beryl Palmer and Ethel McLaren, for books.

Helen Dzvigola is progressing favorably, and visitors are allowed.

Geo. Young has again entered the hospital for treatment.

Norman Maddey from Yahk was a patient over the weekend. Whil cleaning a .22 rifle it accidentally discharged injuring two fingers.

Edward Pilon of the B.C. Telephone construction crew is a patient with blood poison, which resulted from a sliver in the hand. He is progressing nicely, and expects to leave shortly to rejoin the crew at Fernie

Record Opening Day Attendance

High School Attendance Up 50 Per Cent.—One-Third Pupils from Outside—Public School Has 29 New Beginners.

All attendance records at both the public and high school were shattered with the opening day enrollment at both these institutions on Tuesday. The high school commenced the term with 75 students, and still have more to come, and at the public school a start has been made with 217 pupils and at least a few more due to appear before the week is out.

At the public school there are 29 new beginners, which with a half dozen held over from last term will give Miss Holmes a class of 35 in Division 6. In Division 5 Miss Hobden starts off with 40 in Grade 2. In Division 4 Miss Learmonth begins with 37, and of these 15 are in Grade 3, and 22 in Grade 4. Miss Wade has it a little easier this year with 35 in Division 3, and all taking Grade 5 work. In Division 2, Miss Meldrum has 38 on the roll for Grade 6 work, and Principal Marriott in Division 1 starts off with 32, and of these 13 are in Grade 7, and 19 in Grade 8. On closing day last June the tolal enrollment was but 215

At the high school Principal Levirs, who will have Grade 11 work, has 15 students. O. Sostad, assistant principal, will take Grade 9, which has an enrollment of 40, and the new teacher, Miss M. Smith, will have Grade 10, with 21 pupils. At present Miss Smith is occupying the former one-room high school room, and Principal Levirs and his assistant have the two rooms on the west side of the central school building. Of the total high school attendance of 76, there are 25 from outside schools, Erickson sending 9, Canyon 7, Sirdar 4, Wynndel 3, and Alice Siding 2.

Additions to last year's accommodation includes the new room fitted up in central school basement for Division 3 of the public school, which will be one of the most comfortable rooms in the school. It is 26 x 37 feet, with a new floor laid over the cement. The upper walls and ceiling are newly painted white, and the lower walls cream. Blackboards have been placed on the end and one side and it is heated by two overhead radiators. With this room in use half the basement is still left for playroom.

Improved high school facilities include the new labratory that has been fitted up in a room 12 x 28 feet on the west side of the building with doors leading into it from both high school rooms For storing supplies there is a seperate compartment 8 x 12 feet. A spacious new labratory table has been provided. It is 5 x 16 feet, with all the necessary sinks and water taps; drawer and cupboard accommodation for 24 students, and the table of a size to comfortably handle 12 students at one time.

Polite Hobo: "Your little dawg 'as bit me, lady."
Lady: "Where?"
Hobo: "I really couldn't tell yer where, ma'am."
Lady: "Nonsense. He couldn't reach that height."—The London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

John Tamar, who served as a farm hand on a farm near Debreczin, Hungary, for 101 years, died at the age of 112.

Thomas A. Edison, noted scientist, is on his way to complete recovery from his recent illness, Dr. Hubert S. Howe, his physician has announced.

Estimated cost of providing relief work to Vancouver's unemployed men with dependents, of which the city must bear an undetermined portion, will be about $450,000 a month.

Excavations on the site of the new Royal Bank of Canada in London, England, have resulted in the discovery of an 1,800-year-old jig-saw puzzle in a Roman pavement.

In the two weeks from August 1 to August 15, 114,000 workers lost their jobs in Germany, bringing the country's total of unemployed to 4,104,000.

Approximately 10,000 head of cattle have been shipped from Canada to the United Kingdom so far this season, according to information in the office of the Hon. Robert Weir, Minister of Agriculture.

Total grain shipments from Vancouver for the crop year ending July 31 were 75,154,053 bushels, an increase of 25,480,745 bushels over the figure of 49,673,308 bushels shipped in the previous crop year.

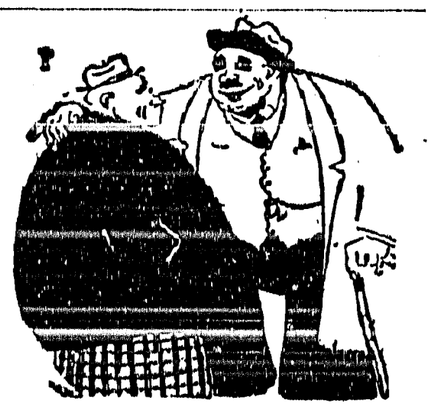
During the months of May, June and July, the fog horn was sounded a few minutes over 772 hours, a period, had it been continuous, of over thirty full days, stated the keeper of the Yarmouth light and fog alarm at Cape Forchu, Nova Scotia.

A reduction of two per cent. in the Canadian birth rate in the first seven months of the year is shown by a preliminary report of the Dominion Bureau of Statistics. The total to the end of July was 50,851 births, as compared with 52,057 in the corresponding period of last year.

Montreal Grain Deliveries

Grain deliveries from the Port of Montreal for the season to date topped the fifty million mark on August 4th, the amount shipped being 50,093,867 bushels. This figure compares with 40,260,982 bushels in the corresponding period of last year. Grain receipts at the port had reached the fifty million bushel mark several days earlier.

If you wish to know how explorers feel frozen in the ice, tell a woman she looks fine in spite of her age.



"Do you belong to the town?"
"No."
"Then we're neighbours. I don't come from it either." — Lustige Kolner Zeitung, Cologne.

SUNDAY SCHOOL LESSON

SEPTEMBER 6

TURNING TO THE GENTILES

Golden Text: "I have set thee for a light of the Gentiles, that thou shouldest be for salvation unto the uttermost part of the earth."—Acts 13.47.

Lesson: Acts 13.13-52; Romans 1. 14-16; 11.1-24.

Devotional Reading: Psalm 72.6-13.

Explanations and Comments

The Result Of Paul's First Sermon In the Synagogue At Pisidian Antioch, Acts 13.42-44.—After Paul's sermon, he and Barnabas withdrew from the synagogue, while the congregation remained for the end of the service and the formal dismissal. As they left they were urged to speak again the following Sabbath. When the synagogue services were over, many Jews and proselytes (Gentile converts to Judaism), followed Paul and Barna-Bas to their place of abode and Paul urged them to continue in the grace of God. This is the first use in The Acts of the phrase, "the Grace of God," i.e., "redemption from sin freely offered in Christ." "Grace" expresses the spontaneity and generosity of God's love; God freely grants His pardon and bestows His love in Christ.

The Jealousy and Antagonism Of the Jews Aroused, Acts 13.44, 45. — As a result of the wide-spread discussion of Paul's sermon and of the work of Paul and Barnabas during the week that followed, "almost the whole city was gathered together to hear the word of God" on the next Sabbath. (A different Greek phrase is used in verse 42 for "the next Sabbath" from that in verse 44, and some scholars translate it in verse 42 as "during the intervening week." "The Jewish congregations had a portion of the Law read in the synagogues not only on the Sabbath but on Monday and on Thursday mornings, that they might not be for three days without hearing Scripture. The peculiar expression may apply to the meetings in the synagogue on these days." — P. Rawson Lumby.

The preaching of Paul during the week created a tremendous interest.

When the Jews saw the multitude they were filled with jealousy. Their antagonism was due primarily, not to opposition to Paul's words, but to envy of his success. It was not loyalty to sacred truth which led the Jews to contradict Paul and to blaspheme.

Turning To the Gentiles, Acts 13. 46-49.—Finding that the Jews would not hear them, Paul and Barnabas spoke out boldly and said, "It was necessary that the word of God should first be spoken to you. Seeing ye thrust it from you, and judge yourselves unworthy of eternal life, lo, we turn to the Gentiles." This speech of Paul's is "an apology for the Gentile Mission, which occurs frequently in the following narrative and appears to suggest that the apostles would not have spoken to the Gentiles at all, if the Jews had listened to their brethren.—Dummelow.

Notice the well-guarded balance between God's sovereign purpose for man and man's free determination of his own life: "It was necessary," but "ye thrust it from you, and judge yourselves unworthy." "The revelation of Divine Grace in the gift of Jesus Christ, the token of eternal life in His resurrection from the dead, the offer of spiritual freedom, of pardon, peace and joy,—all were thrust from them, repudiated and rejected because these things were to be a common heritage."—John Gardner.

Persecution, Acts 13.50-52. — The hostile Jews now had recourse to "the devout women of honorable estate, and the chief men of the city"—the Roman colonists, the local aristocracy, as Professor Ramsay calls them, who were the high privileged class and held the reins of government. These joined forces with the Jews in persecuting Paul and Barnabas till they were driven from the city.

More than 100,000 timepieces were imported into British Malaya last year.

Chemists have developed five methods of making artificial silk.

To Combat Drought Causes

Saskatchewan Seeks Means For Assisting Dried-Out Areas

The Saskatchewan Government has appointed a voluntary commission of six, headed by Hon. J. F. Bryant, K.C., Minister of Public Works, to investigate all contributory causes of drought in the southern portion of the province and to suggest plans for combatting such causes. This Commission, described as a "Commission On Conservation and Afforestation," has already taken steps to assemble all pertinent data from the municipalities situated in the drought areas of the province, and, as part of its assigned duties is to recommend sites for dams for the conservation of water in the creeks and rivers of the south, the Government proposes to seek Federal aid in the erection of dams at the sites suggested. Personnel of the Commission: Hon. J. F. Bryant, K.C., chairman; Hon. Wat. C. Buckle, Minister of Agriculture; W. D. Cowan, M.P., for Long Lake; Dean MacKenzie, University of Saskatchewan; T. A. Patrick, M.D., and Lieut.-Col.. F. J. O'Leary, Regina.

A complete review of the line of investigation which the Commission will follow is given in the following statement issued by the Chairman, Hon. Mr. Bryant:

"The commission on conservation and afforestation intends getting down to business as soon as possible, and in the meantime in order to assemble data, as chairman of the commission, I am today sending out to the secretary of each municipality in the dried-out areas of the province, a questionnaire asking that the council of the municipality co-operate with the commission in supplying the following information as carefully prepared as possible:

1. Name of municipality.
2. Number of farms. Number of abandoned farms, if any.
3. Has there been soil drifting in your municipality, and, if so, to what extent?
4. Number of groves of trees in the municipality.
5. Approximate acreage in trees in the municipality.
6. Number of farms with shelter belts.
7. Number of farms raising fruit trees, and with what results.
8. Number of farmers having dugouts on their property and whether or not there is any water. in same this year. Have they been dry at any time?
9. Number of wells that have gone dry, if any, in the municipality.
10. Number of acres owned by the municipality as a result of tax forfeitures.
11. Is said land suitable for agricultural purposes. If not would it lend itself to afforestation?
12. The kind of trees most commonly found in the municipality.
13. Are there any lakes, sloughs or large bodies of water in the municipality, and, if so, give the approximate acreage of water surface.
14. Please specify any points in the municipality where by the construction of a small dam as a relief measure water could be advantageously conserved.

"In making application to Ottawa for relief moneys, the Government is suggesting that a portion of these moneys be set aside for the construction of dams as a relief measure, and therefore any suggestions as to possible sites for dams will be welcomed, and checked over by the engineers so that such action as might be deemed advisable could be taken in the case of the most desirable site mentioned.

"In the interests of a moisture survey of the dried-out and semi-dried-out areas, steps are being taken to assemble all the data as to the rain fall in these districts since the commencement of the meteorological records by the Federal Government and by the Department of Agriculture in Saskatchewan. An effort will be made to ascertain whether or not present conditions are due entirely to an act of providence or whether it has been brought about in part by human activities such as cutting down the trees which originally formed a wind break and the draining of water areas and sloughs during the past 35 years in order to cultivate the land. In the spring some of our areas are veritable rivers, in the summer they are practically dry.

"The commission will endeavour to ascertain whether or not by impounding this water, and by damming the north Saskatchewan, the south Saskatchewan, Frenchman's Creek, Wood River, Notakeu Creek, Swift Current Creek, Wascana Creek, Souris River, Moose Jaw Creek, Pipestone Creek and others, to form a series of lakes of considerable area, if this would be effective in preventing drouth conditions.

"At the same time it would be desirable if each farmer in the dried-out area would select a natural basin on his land to which the surface water drains, and make a dug-out; such dug-out not to be too wide because the water would evaporate with a wide surface, but to be made long and deep, and if later on trees were planted around the dug-out, the trees would catch and hold the snow and eventually the dug-out would furnish a permanent supply of water for the farmer and his stock. This would help very materially if there was a dug-out built during the slack times on every farm in the dried-out area.

"When the first settlers reached the State of Nebraska there was not enough wood to supply the wagon trains. Nebraska was the largest body of treeless land in the United States and was described on the map as the great American desert. For 50 years Nebraska has carried on a tree-planting policy. Today there are 2,500,000,000 trees in that state and as a result the annual rainfall has increased to more than 30 inches, and even the sand hills produce good potatoes and the western part of the state which formerly cultivated nothing at all is now one of the heaviest producers of sugar beets in the country. Last year when neighbouring states were dried-out, Nebraska produced a crop worth $600,000,000.

"Such measures would of course, be costly, but when we consider that drouth can cost the Province of Saskatchewan a loss of around $200,000,000 in a single year, we feel that it is worth while to make an effort to find a sound and economical solution of the problem.

"In Saskatchewan we get around $2,000,000 from our wooded areas under present conditions annually. In Sweden, where the area suitable for tree growing is no greater, under their forestry policy the wooded areas produce nearly $100,000,000 per annum. I am convinced that under a properly conceived tree-planting policy it is possible to increase the rainfall in southern Saskatchewan very materially; increase agricultural production, and at the same time to produce sufficient wealth from the wooded areas to pay off our provincial debt. A systematic and definite forestry and conservation policy under a commission appointed for a term of 10 years at a time, and embarking on a definite plan which would take 65 to 75 years to fully mature, would work marvels in the southern part of Saskatchewan. A 10-year plan would avoid uncertainty and would make the scheme definite. For each 10-year period a definite sum could be sanctioned and amounts required voted year by year against the estimates."

The Minister of Public Works, in conclusion, stated that he was anxious that all farmers in the dried-out areas should communicate at once with the secretary-treasurer of their municipality, giving information as to the number of acres in trees on their land; the fruit orchards, if any, and their success in connection therewith; the number of acres of water on their land; whether there is a dug-out on their land or not. Further, if the well has gone dry, they are requested to report same to the secretary of the municipality.

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: After many adventures flying over China, Captain Jimmy agrees to fly General Lu to Japan. Running out of gasoline, he is forced to land on a lonely island.

There we were on that lonely little island; General Lu, the Chinese War Lord; Chung, his faithful servant, Fu the interpreter, Scottie and myself.

Rank and fortune suddenly counted for nothing. We were four hungry men—and a dog. Even General Lu's huge fortune, which we had stored away in our 'plane would not buy us a square meal.

The sea stretched away on every side like a flat blue mirror. The island went back four or five miles and ended. Above, the sky rose in a huge empty dome.

"Look here General," I said, "you and I are going rabbit hunting."

After that we tramped and hunted for hours, but never found a rabbit. In fact, we never even saw a mouse or a squirrel. The island rose to a bald peak near the spot where we had landed. The remainder was covered with stunted brush, often burned brown from the sun's heat. The rocks were blazing hot.

More serious than the lack of game, was the absence of water. Hour after hour, we searched for fresh water, but not a drop could we find. As we walked home over a flat sandy plane General Lu suddenly gripped my arm.

In the sand was a long, streaky, track, as if you had drawn a stick along. At first I could make nothing of it, then it suddenly occurred to me that the mark was made by the tail of some animal, while the sand was wet during the rain of the night before. A lizard or a turtle might have made it, but because the track appeared so far inland, it seemed probable that the creature was heading for some known water hole.

The track faded out after a few hundred yards, but soon another appeared. This in turn faded out.

We continued to follow in the direction the last track had pointed. Some large sand dunes rose in front of us. Climbing to the top of these, a very small, green valley appeared below.

Hurrying down, we found a deep rocky dell, from which came the distinct tinkle of water. Out from between two rocks poured a clear, cold spring!

General Lu drank so much, I really feared he would drown. Then we filled our water can and walked back to the 'plane, where Chung and the interpreter anxiously waited for us.

Meanwhile Scottie had gone on up the beach, and was busily digging the sand, and half growling to himself. The sand flew in all directions. Then he came racing back to me. Sure enough, he had found a nest of eggs buried in the sand. His rough methods had ruined some of them, but there were almost a dozen left.

I put the good ones in my helmet and back to the boys I went. The Chinese seemed delighted and set about baking them by the fire. Well, perhaps I am not a very good judge, but to me those eggs surely seemed terrible.

The interpreter looked at me questioningly. "No likee eggs?"

Then he pointed meaningly to the sea. "Flish, he go mightee flinee — easy catchee, hu?"

That was an idea. The shores of that island had never been touched in a thousand years. No doubt the water fairly teemed with fish. But the suggestion nearly cost the lives of two of us on the next day.

(To Be Continued.)

Egg Market Prospect

Many Producers Are Renewing Their Faith In the Egg Market

The current issue of the Egg and Poultry Market Review, published by the Department of Agriculture at Ottawa, after calling attention to the definite turn for the better which is now apparent in the egg market throughout the Dominion, makes the following observation with respect to the present situation:

"Since early in the spring this publication has consistently pointed out the probabilities of the situation which appear now to be developing. A reduction in flocks, such as has taken place in many sections, was andvised against. During recent weeks there has been an active demand for pullets, indicating that many producers are renewing faith in the egg market and are anxious to enlarge their flocks over the proportions planned for earlier in the spring."

A Television Broadcast

Moving Picture Shown In Department Store At Montreal

A small gathering at Montreal saw what was probably the first broadcast of a moving picture by television in Canada. The picture was sent out on the fourth floor of a local department store and presented on a receiving set on the fifth flood.

Through an instrument that looked like a phonograph horn with a small mouth, behind which was a large revolving perforated disc and a special neon tube, a glimpse was caught of a tiny silhouette moving picture in black and white relating the adventures of "Fat Fanny Falling Fast and Furious."

He—"Oh, you mustn't blame me for my ancestors."

She—"I don't. I blame them for you."

Lost Of It Used

Several drummers were seated in the smoking compartment of the train. They were bemoaning the generally demoralized conditions of business, as they found it. Finally they turned to the quiet little man in the corner.

"And how do you find things, brother."

"Never better since I've been on the road."

"For the love of Pete and what's your line may we ask?"

"Selling red ink."

Distant ancestors of the horse, that lived in early geologic times, were no bigger than small dogs.

The Dragon

"You might have brought the boy out of the water dry, and . . . where's his cap?"—Hummel, Hamburg.

CHAUTER XXVIII.—Continued

"Yes, I know you. You have come before, but—but you always go just when I think you're real—just as he has gone. He went down in a dreadful storm—my Nick! There are sharks in those waters, and—and other awful things. I've seen him fighting them—struggling—his hair all wet and matted. I——"

Fear was in her eyes now, fear for her best beloved. She trembled, and her voice rose higher. Desperate, Nick bent to her, speaking with slow distinctness.

"Listen, my precious little wife. I am Nick. I was not drowned. I did not fight those terrible things that haunt you. They are only a dream! but I am not a dream; could a dream hold your hands like this, Gay—and kiss them—like this? Look into my eyes. Can't you believe me, my darling?"

She drew her hands away, putting them to her head as if confused again.

"I—I believed before—and you went away."

Nick was breathing hard, as if at the end of a long race. Oh, if he could fight with his bare hands! he thought savagely. But to battle with something intangible—to conquer something unseen. . . . . His jaw set grimly. He would conquer it! He would find a way to set Gay's tortured spirit free—to bring back the soul to her eyes. Perhaps if he began at the beginning—if he kept calm and steady, and took her back to their first days together—if he recalled to her poor, sick mind the vows he had spoken, wouldn't she understand? Wouldn't she know him?

He said, taking her hands in his: "Gay, you are breaking my heart. You think me a myth—an hallucination—a part of those dreadful nightmares, when all the time I am really Nick, come home after a long journey. But I shall make you believe me. Will you believe I am—if I tell you something that nobody in the whole world knows but just ourselves? I'll tell you where we were married, darling. It wasn't where everyone thinks it was, you know, in the office of that Justice of the Peace, with you looking every minute at Abraham Lincoln when you ought to have looked at me! The stars were shining when we were married, Gay, and somewhere not far away a hermit thrush was singing his evening song. We called it our bridal chorus—don't you remember? You were looking straight into my eyes, sweetheart, and I said: "'God's a good enough witness for me, Gay; and I promise you now that I'll love you—and honour you—and be true to you. . . . . .'"

Slowly, steadily, surely, the shadow was lifting from Gay's eyes. Watching, Nick scarcely breathed. As the distress and fear gave way, her face took on a new and magical beauty. It was like the slow, exquisite opening of a flower. She smiled; stretched out her arms; and cried, her voice echoing out gladly in that silent house:

"Nick! dear Nick, is it really you? Oh, if you love me, stay with me—stay with me. Don't leave me . . ."

She was in his arms.

"Never again," Nick promised as he held her close. "Never, never again . . . . ."

In the room below, Julie Nipps paused in the polishing of a candlestick, and with a wild sob threw herself on Janey Maxwell's breast: while, crouched on the stairs, where he had been listening tensely, for those welcome words, an old man raised eyes that were blurred with tears.

"Oh, God—our Heavenly Father," he said brokenly, "we thank thee ——"

He arose, gasping, as if he could not breathe, and stepping into the air, looked up in rapture at the limitless blue above.

CHAPTER XXIX.

There followed days when Nick never left Gay's room save while she slept. If she awakened to find him gone her eyes would widen pitifully with fear that his return was but a dream. After the first, glad outburst of joy, she was alarmingly weak; but as the days passed and her strained nerves relaxed, the serenity that was the keynote of her character came back again.

Nick never forgot those days when he lived in dread of a relapse. But it did not come. Slowly, to be sure, but with encouraging steadiness, she returned from that dread "no man's land" where she had wandered; yet, unless he were at her side, it was days before she could remember the fact that her husband was really safe.

"I know I'm foolish," she said apologetically, "but your being here is so wonderful that I want to keep you a prisoner every minute."

"Keep me," Nick answered. "It's a case where the prisoner hugs his chains."

After the first, anxious week, those were happy days. Sometimes the little boys would steal in quietly, and climbing onto their father's knee, listen to his stories of the strange and beautiful islands he had seen. Of the storm, and the time that followed, Nick never spoke, nor did Gay ask. Her dreams of the horror had been too vivid. Sometime, perhaps, he would tell her, but not now. Nothing but joy must touch her for the present.

It was three weeks before Halliday returned, and he came alone. Nick sometimes wondered what passed between him and Angela in the hours following her outburst. She did not appear again before Nick left the boat; and her husband's explanation of a sick-headache was accepted with polite credulity on the part of the Myers. It was only Nick who saw the Colonel's suggestively lifted eyebrows.

As for James Halliday, he seemed almost pathetically glad to be back in Bakersville; and small Martha was seldom absent from his side. It was on a Sunday morning that Sonny joined him, when he was instructing the little girl in the art of weeding a flower bed that was "all her own." The boy watched quietly for a moment, and then announced in a tone of pride:

"My baby sister's got a name. Her name's Nancy, same as Uncle Sim's old woman. What you think of that?"

"That's fine," said Halliday. He took a seat on the edge of Selina Smith's old rockery, and smiled at the little boy in his miniature overalls. "What does Uncle Sim say?" he questioned.

"Here comes Uncle Sim now. He said he was 'flabbergasted.' I guess he meant s'prised. He acted that way. Was you s'prised, Uncle Sim?"

"Now what would I be surprised at?" asked Simeon, adjusting his umbrella so that it sheltered little Martha's head.

"I mean about my baby sister having the same name as your old woman. You acted s'prised."

"Well, and I was!" Simeon turned to Halliday, his face as beaming as a Jack-o'-lantern. "You could ha' knocked me down with a feather, and no mistake. Always thought if I had a girl o' my own I'd call her Nancy, but the good Lord never see fit to send us one, nor a boy neither. Seems like I love that little critter just like she belonged to me. When they told me they'd named her for my old woman I felt like my cup was runnin' over."

"Did it spill onto your bib, Uncle Sim?" asked little Martha sympathetically.

Halliday smiled, and Simeon grinned broadly.

"Seems like it did, honey. It spilled all over me in a nice, warm, comfortin' flood."

"Our shower bath can do that," said Martha. She arose, and leaned lovingly against Halliday's knee. "I wish we had a Nancy," she said quietly.

Halliday stroked her hair.

A Clever Engineer

Long List Of Achievements Credited To Sir Alexander Gibb

Sir Alexander Gibb, who has come to Canada to prepare a report on the ports and harbours, comes of an ancient Scottish family with engineering in its blood. He himself was a pupil of Brunel and Barry, and the list of his achievements and decorations fills a whole column of "Who's Who." They include such widely different undertakings as the dockyard at Rosyth and the wonderful acquarium at the Zoo. During the war Sir Alexander played a chief part in developing the Channel ports for the disembarkation of the army. and he was consulting engineer for the great new naval base at Singapore. He is a keen student of Burns, a member of the ancient King's Bodyguard for Scotland, and belongs to no fewer than ten clubs.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Changed Its Nature

X-Ray Experiment Converts Annual Plant Into Perennial

In experiments to learn more about effects of X-rays upon evolution, an annual plant has been changed into a perennial at Cornell University, Ithaca, New York.

The plant which changed its nature at Cornell is the euchaena, the closest wild relative to corn. There are two species, Mexicana, the annual, and perennis, the perennial.

Some of the seed was exposed to X-rays for a few minutes and then germinated. The young stalk began life as an annual, but later on, while still young, it developed some of the appearances of a perennial. Then the annual portion dried up and disappeared, and the remaining stalk developed into a true perennial.

"One should prepare for old age as one prepares for a long journey."

MINARD'S "KING OF PAIN" LINIMENT

New Material Found

Canada May Soon Be Able To Manufacture Mineral Wool

The important discovery that certain deposits of rock in the Niagara district of Ontario are suitable for the production of rock wool, a valuable insulating, lining and covering material, features a report issued by the mines branch of the Department of Mines. The report, by M. F. Goudge, deals with the possibility of establishing an industry in Ontario and manufacturing rock wool, which is classed as one of the most effective insulating materials known.

Rock wool, or mineral wool, as it is sometimes called, the report states, is not manufactured in Canada at present, as hitherto suitable raw materials were not known to exist within the Dominion. It is made from shaly limestones which possess certain definite characteristics. Research carried on in the laboratories of the mines branch by Mr. Goudge, indicate that several deposits of impure limestone outcropping at various places between Niagara Falls and Hamilton are suitable for making rock wool.

In the process of manufacture, the natural rock is mixed with coke and charged to a small blast furnace where it is melted. The molten rock issuing in a small stream from the base of the furnace is blown into a myriad of small globules by a blast of high-pressure steam. As the molten globules hurtle through the air each develops a very thin, pliable glassy fibre behind it. This fibre is known as rock wool.

The discovery of the suitability of the Niagara district rock for the manufacture of this commodity suggests the possibility of a new and valuable product being added to the mineral production of Canada, the report states.

THE RHYMING OPTIMIST

By Aline Michaelis

THE GLEAM ALONE

The friends whom I most love
Are like the stars to me,
As those far bodies move
Along immensity.

The stars are worlds, we know,
And worlds hold joy and pain,
Hold ecstasy and woe,
And purity and stain.

But of those worlds afar
We see the gleam alone;
The glory of the star
That on our path has shone.

And so in friends most dear
I see no fault, no blight,
But only joyous bloom
And opulence of light!

Should Be Congratulated

Woman In California Keeps Employees Regardless Of Age

There is a very special and particular achievement for which Mrs. Mary K. Solari deserves congratulations, entirely aside from the fact that she has just completed her twenty-fifth successful year in the restaurant business in San Francisco. That is the stand that she has taken, as a business woman and as a human being, against the theory of "firing after forty," which has become so lamentable a practice in businesses and industries throughout the United States.

Out of eighteen employees, four have been with her more than twenty years; five, over fifteen years; four, over ten years, which, in a staff of that size, is an extremely high percentage of long service.

Business women may justly feed proud that another business woman has taken up the cudgels so vigorously against this ruthless pushing aside of the so-called middle-aged without consideration of ability or intelligence.

A Seven Months' Tow

On the longest towing voyage on record a floating dock of 17,000 tons lifting capacity is on its way from the builders in Wallsend, England, to Wellington, N.Z. The tow of 13,500 miles will last seven months. Two powerful tugs are employed and the crew is living on the dock during the voyage.

WHEN GASTRIC JUICES FAIL TO FLOW

You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. Your food, instead of being assimilated by your system, simply collects and stagnates inside you, producing harmful acid poisons. What you need then is a tonic—Nature's own tonic—Nature's six mineral salts.

You get all these six salts in Kruschen Salts, and each one of them has an action of its own. Together, they stimulate and tune up the bodily functions from a number of different angles. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again in the intestinal tract certain of these salts promote a further flow of these vital juices which deal with partly digested food and prepare it finally for absorption into the system.

So you see there is no mystery about Kruschen. It works on purely scientific and well-known principles. Prove it for yourself.

Little Helps For This Week

"Except ye become as little children, ye shall not enter into the kingdom of heaven."—Matthew xvii, 3.

Except your Father lead you,
You cannot find the way
Among the snares and pitfalls,
The lures that lead astray;
Except you be like children,
And hold the skirts of love,
You'll miss the narrow pathway
That leads from earth above.
—Mary Frances Butts.

Blessed are ye if ye become as a little child, for a child is the visible likeness of the Lord Himself. And there is a blessedness in perceiving this truth; the blessing is the truth itself. He who sees the essential in the child—the pure childhood—sees the essence of grace and truth; in a word, real childlikeness. — George MacDonald.

Distemper responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Market For Alberta Coal

Orders For 55,000 Tons Received From Winnipeg Firms

Investigation of the quality of various Alberta coals with a view to determining the fuel best suited to the requirements of the Winnipeg City Hydro-Electric is being undertaken by G. W. Oliver, fuel engineer for the City of Winnipeg. It is pointed out that Winnipeg will be in the market during the coming winter for about 40,000 tons of coal for its central heating system and the contract will be placed with various Canadian companies. Orders for 55,000 tons of Alberta coal have been placed recently by large Winnipeg concerns.

Expects Stork in July

"I Suffered such Pain"

"MOTHER advised me to take the Vegetable Compound because I suffered such pain each month.

"It helped me so much that after I married I still took it. I am expecting a little one in July and I depend upon Vegetable Compound. My sister takes it too."

Mrs. Aubrey S. Smith, P. O. Box 104, North Sydney, Nova Scotia is only one of thousands of women who depend on Vegetable Compound to carry them over difficult times. Won't you try it, too?

CRESTON, B.C., FRIDAY, SEPT. 4

LETTERS TO THE EDITOR

Patronize Home Industry

Editor Review:

Sir,—On several recent occasions neighbors have spoken to me in the satisfied manner of bargain hunters who have achieved their object at a departmental store sale, only on this occasion the cause of the satisfaction was some ridiculous price of some vegetables from our local Doukhobors. These neighbors are all people who depend on or have been used to the dependance on the sale of ranch and farm products for their livlihood.

Consistency is a great but little lauded virtue. Upon asking one neighbor as to why he did not purchase his vegetables from a Canadian grower and pay a Canadian price for them, the excuse given was that it was a question of "depth of pocket."

Now, if in the Creston Valley the depth of our pockets will not allow us to support a Canadian standard of living then, for goodness sake, let us give up the sham and 'go' Doukhobor completely; close up the schools, etc., get back to universal hand cultivation methods, market the whole of the Valley's produce at Doukhobor prices, merge all knowledge and dispensation of same in some community leader and, finally, let us extend a hearty invitation to settle in the Valley to the 20 000 of his compeers whom Mr. Vergin would like to see settled dowu in Canada. MATLO.

Kootenay Telephone Co.
LIMITED

OUR K.B.O. BROADCAST

Moyie is complaining bitterly of the shape of the town sidewalks.

Kaslo's share of the recent liquor profits distribution was only $466.

S. J. Mayzes, chief of police at Kaslo has resigned, effective September 8th.

Due to young trees coming into bearing Penticton's pear crop is larger than expected.

Union of Canadian Municipalities will have the 1931 convention at Vernon this month.

A part of the Grand Forks fruit and vegetable crop is being marketed in Trail by truck.

Next season Bonners Ferry will have a new auto camp with 12 cabins and a swimming pool.

Of 520 men registered as unemployed at Penticton, only 70 were residents of that town.

A Rossland jeweler has just presented the movie theatre in that town with a large wall clock.

Canneries are being offered tomatoes at $10 a ton. This is a cut of 30 per cent. over previous years.

For the first time in a score of years Fernie will not have a Labor Day celebration. Michel will try one.

$320 was all it cost to stage the air pageant at Grand Forks at the middle of July. The council put up half the money.

For the first time in several months collections at Penticton hospital in July were sufficient to pay running expenses.

Cranbrook is going to bed earlier. A year ago the July consumption of light was 84,680 k.w. This year it was 77,880.

To date there are only three tomato canneries operating in the Okanagan. These are at Vernon, Ashcroft and Kamloops.

Between losses from sun scald, cracking and severe culling, tomato growers at Oliver refused to pick considerable of the crop.

"C" Grade Wealthy apples are moving out of the Okanagan with but 15 per cent. color. There are 225,000 boxes to handle this year.

Grand Forks Gaxette: It is understood that a number of local apple packers will go to Penticton to pack this season because Doukhobors have been chosen by local organizations to supplant them. The matter will come up at the Board of Trade meeting next Wednesday night.

Canyon City

Mrs. John Chapman has returned to Nelson after a short visit with her parents, Mr. and Mrs. Matt. Clayton.

Mr. and Mrs. Chas. Taplin and daughter, Beryl, who have spent the past two mont s at Calgary, Alberta, returned to Canyon at the end of the week.

School re-opened for the fall term on Tuesday with an attendance equal to opening day of 1 st year. Principal L. W. Stephens and Mis Vera Lister are again in charge.

Canyon has eight students taking first year high school work at Creston this year They are Dolly Tedford, Agnes Johnson, John Spencer, Ethel Van-Ackeran, Helen Browell, Annie Gartland, Alice Westling and Clara Nygaard

Andy Wickholm is at Glenlilly where he has a contract of erecting a new residence on the A. Barnhart ranch.

Mildred Zachodnik has just left for Kamsack, Sask., where she will make an extended visit with her sister.

Picking of Wealthy apples is at its peak, and the crop will be off the trees early next week.

Bill and Kathleen Clayton were weekend visitors at Kimberley with their brother, Bob.

Road improvements at the Canyon bridge were halted at the first of the month, but it is expected they will be resumed under the new relief work plan of operations.

E. L. Langston is here from Raymond. Alberta, on a visit with Mrs. Langston and children who are stopping with her parents, Mr and Mrs. A. Halstead.

Alice Siding

R. Alderson arrived from Turner Valley at the end of the week and will spend the next couple of months at the ranch here.

Will Miller as a weekend visitor with riends at Cranbrook.

School opened for the fall term on Tuesday morning with Principal Freaney again in charge. 23 pupils were on hand for a start.

Miss Helen Moore and Robert Moore of Flagstone and Fernie respectively, who have spent the summer with their mother, Mrs. H Taylor, left on Monday to resume their positions at schools at the points mentioned.

Miss Foxall of Penticton is spending a holiday here, a guest of Mr. and Mrs. A. A. J. Collis.

Miss Dora Nickel was at Cranbrook at the end of the week writing off a supplemental on one subject on which she failed at the midsummer high school examinations.

Miss Joan Hilton left on Saturday for Vancouver where she is taking a commercial course in a school in that city.

Mrs. Tom Marshall left on Saturday for Shepard, Alberta, where Tom is helping with harvest operations on the Frank Martin ranch.

During his visit here last week Hon. Joshua Hincliffe had quite a busy time of it. In addition to the public meeting on Wednesday night, he had a number delegations to talk business the following day, including representatives of the board of trade who urged upon him the necessity of providing a government office building at Creston.

About the only new features to fruit shipping this week are that prunes have just started to move, and Wealthy apples in bulk are being shipped. Two carloads of these have already gone out.

Miss A. H. Doyle was a weekend visitor with her sister, Mrs. Donneau, at Fernie. Corrine Donneau, who has been holidaying there returned with her to resume school work on Tuesday.

High school principal and Mrs. Levirs returned from Vancouver on Sunday, where they have spent the summer vacation. They are occupying the Strong residence on Barton Avenue.

The social season will open Friday evening, 11th, with a bridge in the Parish Hall, under the auspices of the Knights of Pythias building committee. Cards at 8.30 prompt. attractive prizes, and 50c. admission.

Mr. Homersham of Nelson is a business visitor at Creston at present. A couple of years ago he purchased the bees in the apiary of the late John Blinco and he is here harvesting the honey crop.

Geo. Broderick, a former resident of Creston, but for the past fifteen years resident at Penticton, was renewing acquaintances on Tuesday, returning by motor from a holiday visit at Parry Sound and other Ontario points.

Creston and District Women,s Institute September meeting will be on Friday afternoon next, 11th. The feature will be a report on the 1931 Kootenay-Boundary conference, which will be given by the delegate, Mrs. R. Stevens.

Messrs. H. Cornwall, E. Whitfield, Dr. McKenxie, R. Crawford. W. Fleming, H. Harrison and N. Fraser were Spokane visitors on Monday night for the fistic carnival in which Jack Dempsey was the big drawing card.

Official weather records show that August provided two days with temperatures of 97 in the shade. These were the second and tenth The coolest mornings of the month were the 7th, 8th and 27th, on each of which it went down to 40. There was .02 inches of rain on the 23rd.

Mrs. Jas. Downes was a visitor at Nelson a couple of days at the end of the week, a tending the graduating exercises at Kootenay Lake General Hospital, where her daughter, Nancy, was one of the class to complete the three-year training course and receive her R.N. certificate.

Mrs. J. E.. Johnston reopeus her music classes on September 1st, and has a limited number of vacancies for piano and elocution. Pupils hold medals from Alberta and East Kootenay festivals. Pupils prepared for Toronto Conservatory examinations or Royal Academy, England, as desired.

Mrs. Hare, sr , and Mrs. Hulme of Watford, Ontario, who have been visiting with Mr. and Mrs. C. H. Hare for the past month, left at the first of the week for Winnipeg, Man., where they will visit before proceeding to Ontario where the former will make an extended visit with her daughter, Mrs. Hulme, at Watford.

Creston and District Women's Institute have again landed the challenge silver cup put up by the Vancouver Exhibition for the institute making the most points in a special needlecraft section open to all B.C. Women's Institutes. This year Creston ladies won firsts on knitting and embroidery colored and white. Second prize on plain sewing. Third prize on rag rug, and fourth prizes on patchwork quilt and crochet and tatting. This is the second year in succession the institute has won the trophy and if captured next year will become permanent property of the institute. This week they have a similar display at the exhibit on at Victoria.

The Ladies' Hospital Committee had a busy afternoon on Saturday on the occasion of the at-home for the purpose of giving all interested an opportunity to inspect the hospital. From 2.30 until 5.30 there was a steady stream of visitors who were taken in groups through the building by the matron, Miss Yorik, and all who had not made a previous inspection were genuinely surprised at the complete accommodation provided and the thoroughly modern equipment the hospital possesses. Tea was served by the ladies under the direction of Mrs. Jas. Cook, convenor of the hospital committee, who was assisted by Miss White, Mrs. A. E. French, Mrs. Jas. Cherrington, Mrs. Mallandaine, Mrs. Hayes, and Misses Irene LaBelle and Marie Walsh. A contribution plate received a freewill offering of $18.

Vacation Musings

The writer of this column is on a brief vacation, and he intends enjoyit to the full. During the blistering hot days of the summer with its strong hot winds and choking dust storms he stayed "on the job." Now he has hied himself to the lakes and the woods to rest and to play. Se he proposes to fill his column this week through the medium of a pair of scissors and a paste pot. This is not an altogether unknown procedure on the part of some editors, but open confession is not always made as frankly as in the present instance.

In starting on his vacation, the writer desired to get away not only from the hot city pavements, but even more so from the constant talk of depression, hard times, unemployment, which forms the basis of conversation on every hand. He felt it would be a great relief to get back to Mother Nature, and listen to the rippling of the water, the murmuring of the leaves, the song of the birds, and the droning of the bees and insects.

And for his reading he brought along, not a daily newspaper, nor a fiction magazine, nor text books and bulletins on economics, finance or salesmanship, but some little pocket editions of essays by and wise sayings of other men. And it is with scissors and paste pot in this idle hour that he proposes to pass a few of these gems on to the readers of this column in the hope that, for a little time at least, their thoughts may be diverted from those things which lead to present discouragement. So, here goes:

"Like most garments and most carpets, everything in life has a right side and a wrong side. You can take any joy, and by turning it around find troubles on the other side; or you may take the greatest trouble, and by turning it around find joy on the other side. The gloomiest mountain never casts a shadow on both sides at once, nor does the greatest of life's calamities."

"When you make a mistake, don't look back at it long. Take the reason of the thing into your own mind, and then look forward. Mistakes are lessons of wisdom. . . . The past cannot be changed. The future is yet in your power."

"A great many people criticize and find fault; that's jawbone. Some wish things were better, but do nothing to help; that's wishbone. Others co-operate and do things, that's backbone."

"When you get into a tight place and everything goes against you till it seems as though you could not hold on a minute longer, never give up then; for that is just the place and time that the tide will turn.

"Nothing is easier than fault finding; no talent, no self-denial, no brains, no character are required to set up in the grumbling business."

"The most trifling actions that affect a man's credit are to be regarded The sound of your hammer at five in the morning, or nine at night, heard by a creditor, makes him easy six months longer; but if he sees you at a billiard table, or hears your voice at a tavern, when you should be at work, he sends for his money the next day."

"The tendency to persevere, to persist in spite of hindrances, discouragements, and impossibilities; it is this that in all things distinguishes the strong soul from the weak.

"Of every good quality, there is an excess which is undesirable. Excess of self-reliance leads to secretiveness and mulish obstinacy; of curosity to impudence; of imagination to hesitation and inaction; of foresight to indecision; of patience to weak submission; and so on. To give due weight, and no more than its due weight, to each ingredient in the composition of our character, we are fortunate if we are blessed with those twin senses, a sense of proportion and a sense of humor. As a sweetener of life, preserving the rich and successful from odious self-satisfaction and helping all to banish the demons of discontent and ill-will there is nothing to compare with a sense of humour."

"Speaking of unemployment, says 'Life Magazine,' the average man has 12,000,000,000 brain cells. Get busy. Put them to work."

When skies are kind of gloomy,
And the outlook awful dim,
Just keep on keeping on.

Market For Wheat In Ireland

Senator Esmond Of Irish Free State Points To Opportunity

Canada should be able to enter into a mutually satisfactory trade agreement with the Irish Free State, in the opinion of Senator Sir Thomas Gratten Esmond, member of the Upper House of the Irish Dail, passing through Montreal after fishing expedition with Lady Esmond among the salmon streams of Quebec.

"Canada should be able to sell us much of our wheat," he said. "The Free State buys three-quarters of its wheat requirements abroad, and there should be no reason why Canada could not make a treaty with us on the same lines as that under discussion with New Zealand and that concluded with Australia. I certainly shall look into the subject when I get back to Dublin."

Alberta Natural Resources

Regulations Providing For Administration Now Being Published

Complete regulations under the acts providing for the administration of the natural resources of Alberta is being published in a special issue of the Alberta Gazette, running to 300-odd pages. It will be followed by the publication of a series of pamphlets giving the various regulations separately. The new homesteading and fishery regulations, which have already been announced in summary form, constitute an important section of the volume, and among the other items will be those affecting the forestry reserves, timber, placer mining, pertoleum and gas, coal and quartz mining, fur farming, and the various regulations applying to grazing leases and permits.

Dysentery Is a Very Dangerous Bowel Complaint

Dr. FOWLER'S EXT-OF WILD STRAWBERRY

Mrs. E. M. Ward, 627 Ave. H. South, Saskatoon, Sask., writes:—"When my husband was in France he took dysentery, and was in hospital over a year. Ever since he came back he has had the attacks three or four times a year. I cannot emphasize the good Dr. Fowler's Extract of Wild Strawberry has done for him. He generally takes a few doses and gets relief in a few hours.

"I cannot speak too highly of your excellent remedy, and you may be sure we are never without a bottle of it in the house."

Trade In Trees Curbed

Restrictions Necessary To Prevent Spread Of Insect Plagues

Restrictions have been placed by the Department of Agriculture on the movement of poplars and willows from the Maritime Provinces and certain areas in British Columbia because of the satin moth. Gaining a foothold in Nova Scotia and New Brunswick in 1930 after it had made inroads in British Columbia some years ago, the satin moth is a native of Europe and Asia. The restrictive regulations were passed to prevent its further distribution.

Importation into Canada of several varieties of pine wood has been banned by the Department of Agriculture because of insect plagues. On account of the white pine blister rust, every variety of the five-leaved species from all countries has been denied entrance to Canada. Importations of Austrian, Scotch and Swiss mountain pines has been prohibited because of the European pine shoot moth. Recent shipments of pine from these countries have been found to be infested with the moth.

Recipes For This Week

(By Betty Barclay)

PICKLED PEARS

4 quarts pears.
2 pounds white sugar.
2 cups vinegar..
½ ounce stick cinnamon.
¼ ounce whole cloves.

Peel pears. Boil the sugar, the vinegar, the cloves, and the cinnamon for 20 minutes. Place a few of the whole pears at a time in the syrup, and cook them until they are tender. Pack them into thoroughly cleaned jars. Adjust the rubbers, and fill each jar to overflowing with the hot syrup. Adjust the covers and seal the jars immediately.

CUCUMBER CATCHUP

1 quart ripe cucumbers, large.
1 cup white onions.
2 green peppers, medium-sized.
1 pint vinegar.
1 cup sugar.
2 tablespoons white mustard seed.
Salt and cayenne pepper.

Pare the cucumbers. Cut in quarters and remove the pulp. Put the cucumbers, onion, and peppers through a food clopper. Add a small amount of water to prevent sticking, and boil the mixture until the cucumbers are tender. Heat the vinegar, sugar, and seasonings together. Add the vegetable mixture and cook it until it is clear. Seal in clean hot bottles or jars.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestation of internal trouble.

Text Book Changes

Minor Alterations Have Been Made In Saskatchewan

Changes of only a slight nature have been made in the authorized text book list for both public and high schools in Saskatchewan, Premier J. T. M. Anderson has announced.

Principal changes noted are the literature selections authorized for grade 11 and grade 12. The chief text book in literature has been retained however.

Dragged Down By Asthma. The man or woman who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to an army of sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

Survey Of Pasture Lands

A complete survey of all pasture lands in Canada is to be conducted by Prof. L. E. Kirk, of the University of Saskatchewan, announcement of whose appointment as Dominion Agrostologist was made in the House of Commons the other day by Hon. Robert Weir, Minister of Agriculture.

The average woman has no more honour than a man, and when it comes to clothes she has less on'er.

Child's Health Should Be Carefully Checked

So That Conditions Which Are Handicap Can Be Corrected

In many places they have what is called a summer round-up of the children who are to start school for the first time in autumn.

The idea of the round-up is to have the children medically examined. Those who, at that time, are found to be in need of medical care are sent to their doctor and their dentist for treatment in order that when they start school in the autumn they will be physically fit.

Parents should not wait until the child is ready to go to school to have this done, says the health service of the Canadian Medical Association. However, if they have neglected this point, it is best to attend to it now.

One of the commonest and most serious mistakes that parents make is to allow an abnormal condition to persist with the idea that the child will grow out of it, or that he is too young to have treatment.

The child who cannot see without glasses is obviously handicapped until he has been fitted with proper glasses. The child who has a running ear is almost surely on his way to deafness, which is a serious handicap, unless his ear is properly treated. Children do not grow out of such conditions.

Not only are diseased tonsils and teeth a handicap to the child, but they are dangerous in that they poison the body, and are, it is believed, very often the cause of heart and kidney disease in later life.

No child should be handicapped by conditions which can be corrected by proper treatment. There should be no delay in securing treatment simply because of the mistaken idea that the defects are not serious, or that the child is too young for the treatment or that he will grow out of the defects.

Persian Balm — alluring provocative and charming. Fragrant and refreshing as a cool breeze in summer. Delightful to use. Creates complexions of surpassing loveliness. Makes the skin velvety soft in texture. Soothes and dispels all irritations caused by weather conditions. Softens and whitens the hands. Persian Balm is a peerless toilet requisite for women who care for charm and distinction. Use it for hands and face.

Wins Race Around World

Travelling around the world from east to west, K. Fukuma, Japanese newspaperman, succeeded in defeating a colleague who travelled west to east in a race to be first around the world using only regularly established means of travel, he states in a letter received at Vancouver by J. J. Forster, steamship general passenger agent of the Canadian Pacific Railway.

British Columbia Industries

Province Now Ranks Third In Manufacturing In Canada

In 1867, the year of Confederation, British Columbia was credited with 40 factories. Thirteen of these were saw mills and 11 flour mills, leaving 16 others, all of which were at Victoria. In 1901, British Columbia was fourth among the provinces in manufacturing and now ranks third, with about 725 establishments. "These statistics are therefore particularly interesting," says R. H. Arnott, industrial secretary of the Vancouver Board of Trade, "pointing as they do to the wonderful industrial future lying before Greater Vancouver area where 60 per cent. of the entire manufacturing enterprises of the province are located."

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Speedy Mail Delivery

A record for speedy mail distribution was made by the Canadian Pacific liner "Empress of Britain" the other day when letters posted in London at 6:15 p.m., July 28th, were landed in Montreal and distributed before 10:30 a.m. on August 3rd, the time made (with Canadian Airways' 'planes picking up tthe sacks at Father Point), being thus 5 days, 16 hours and 15 minutes.

SINGLE PURPOSE IS TO RESTORE BRITISH CREDIT

London, England.—The new national government has already got down to its job of laying a firm foundation for British credit. Its opening meeting revealed complete unanimity in its task. It appointed the necessary small committees and proposes to go ahead as speedily as possible with the preparation necessary for new legislation.

The method of legislation, it is authoritatively intimated, will be such as to make it effective for immediate operation. It is stated, although not officially confirmed, that in effecting economies, the national government will seek parliamentary authority to proceed by order-in-council.

The government's scheme for balancing the budget and the restoration of British credit will have the double feature of reductions in expenditure and increases in taxation. The plan is to make the entire scheme a complete unity, and a characteristic of that unity will be the equal sacrifice according to position of various classes of taxpayers. In government circles statements that the burden of the new scheme will fall chiefly on those least able to bear it are described as absolutely untrue.

All controversial legislation now before parliament will be suspended. The new government proposes to concentrate on the supreme task of restoring credit, and in that task, it is stated in government circles, there can be no faltering.

Both Conservative and Liberal members of the new administration believe they will have behind them the virtually unanimous support of their parties. Rt. Hon. David Lloyd George and Lord Grey alike, it is understood, have signified their entire agreement with the Liberals in their acceptance of office.

Yet while an overwhelming majority of Conservatives and Liberals are backing the new government, Laborites are forming up behind the "rebels." After several hours' deliberation the general council of the Trades Union Congress, the national executive of the Labor Party and the consulting committee of the Parliamentary Labor Party unanimously decided that the new government should be vigorously opposed in parliament and by the Labor movement throughout the country. They expressed their approval of the action taken by certain ministers of the late government in declining to tender their support to the new administration, and recommended that the Parliamentary Labor Party constitute itself the official parliamentary opposition.

Raise In Gasoline Prices

United Protest From Western Provinces Is Urged

Calgary, Alberta.—Efforts to bring a united protest from all western provinces against increase in gasoline prices were instituted here by directors of the Alberta Motor Association.

The recent advance of one and one-half cents a gallon in the gasoline price was scored by the Alberta directors as unwarranted. Copies of the resolution embodying the criticism are being sent to all motor associations in Manitoba, Saskatchewan and British Columbia, urging similar action to be taken.

Printing Plants Wrecked

Montreal, Que.—Hopelessly ruined by sabotage of the printing presses and the firing of the plant, the weekly newspapers Le Morior, Le Chameau and Le Goglu will disappear from Montreal journalism, Joseph Menard, joint owner with Adrien Arcand, told the fire commissioner's court here at a hearing to probe circumstances surrounding the wrecking of the printing plant.

Had Stormy Trip

Southampton, England.—Owing to a violent storm in the English Channel, the Canadian Pacific liner "Empress of Britain," was unable to call at Cherbourg. When the liner docked at Southampton, Captain Latta said he had fought bad weather all the way across the Atlantic.

Destructive Wind Storm

Man Killed and Others Injured When Tornado Strikes Southern Saskatchewan

Estevan, Sask.—One man was killed, two others injured and heavy damage done when a tornado swept through Estevan and surrounding districts. While assisting workmen to pin down a tent during the height of the storm at a construction camp about two miles west of here, Robert Mitchell Henderson, 50, Calgary, partner in the bridge contracting firm of Mannix and Henderson, was killed instantly when struck by a flying timber. The missile hit him in the head, fracturing his skull. It has been decided that an inquest is unnecessary.

Louis Gonerey, of Estevan and Dalton McKay, of Saskatoon, laborrers with the construction gang, suffered bruises and shock when struck by flying timbers and were brought to Estevan hospital for treatment.

The terrific gale sent box cars crashing into the round house at the Traux-Traer Coal Company Plant, while the roof of the grandstand at the exhibition grounds was ripped entirely off and several barns were blown down. The trestle bridge on the Neptune branch of the C.P.R., five miles from town, was splintered by the wind. A garage was blown down in Estevan, and the roof of the D. L. Irvine residence was torn off.

Historic Sites

Cairn Erected To Mark Landing Of General Wolfe

Sydney, N.S.—"To the honored dead of two nations."

This brief tribute, dropped by a squadron of Royal Canadian Air Force 'Planes, soaring high overhead, epitomized the spirit and thoughts of over 1,200 people gathered on the rocky bluff overlooking Kennington Cove to witness the unveiling by Hon. Frank Stanfield, Lieutenant-Governor of Nova Scotia, of the beautiful memorial cairn erected by the Historic Sites and Monuments Board of Canada, to mark permanently the site of Wolfe's landing on June 8, 1758, six weeks prior to the fall of Louisburg.

Lieutenant - Governor Stanfield pulled the cord unveiling the cairn which now permanently marks the site of Wolfe's hazardous undertaking.

Market For Butter

Canadian Dairy Produce Is In Demand In Great Britain

Montreal, Que.—Dairy produce from Canada is very much in demand among British buyers and consumers, and the British market can absorb all Canadian dairy farmers can send, Dr. J. A. Ruddick, Canada's veteran dairy commissioner stated here on his arrival from England.

"The prospects for butter especially are very good," said Dr. Ruddick. "Canadian cheese is also very popular and tops the market in its class."

Wheat Bonus

Winnipeg, Man.—Farmers are assured of the five-cent bonus on wheat pending arrangements now being made by the Board of Grain Commissioners, E. B. Ramsay, chairman of the board, stated here recently. Mr. Ramsay's attention had been drawn to a suggestion that farmers who have threshed wheat are withholding it from the market because the machinery for the distribution of the bonus had not yet been perfected.

May Withdraw Grants

Toronto, Ont.—Fall Fair Associations in Ontario may have to dispense with the usual government grants in 1932, according to a warning issued by Hon. T. L. Kennedy, Provincial Minister of Agriculture. The associations were warned that they must discontinue the practice of looking to the Provincial Government for financial assistance. This year the usual grants, estimated between $80,000 and $100,000, will be maintained.

Ban Use Of Benzol

Toronto, Ont.—Use of benzol in Ontario factories has been prohibited in an order issued by Hon. Dr. J. D. Monteith, Provincial Minister of Public Works and Labour. This use of benzol has been proven to the department to be injurious to the health of individuals. That fact has been demonstrated on the evidence of chemists who have investigated, and the labour department has prohibited the use of benzol," said Dr. Monteith.

KEEPER OF PURSE

J. A. McIsaac, Dominion Honorary Treasurer of the Canadian Legion of the British Empire Service League, who is busy preparing for the gigantic conference to be held in Toronto this week.

Trans-Canada Highway

Locations Of Final Sections Of Road In Ontario Announced

Toronto, Ont.—Designation of first sections of the trans-Canada Highway in Ontario was announced by Premier Geo. S. Henry following approval by the cabinet. This is the first step in commencing work for unemployed by the government at work camps in the north in conjunction with Federal Government grants.

Two sections are designated in the plan. The first section extends from Pembroke on the east, to Mattawa and hence westerly to North Bay. The second section commences at the town of Schreiber, Thunder Bay district, and goes west to the Manitoba boundary, following the north shore of Lake Superior to the village of Nipigon, thence to Port Arthur and Fort William, proceeding through Upsala, Dryden and Kenora.

Preparing To Send Goods To Australia

Good-Will Ship To Leave Montreal Late In October

Toronto, Ont.—Preparations for the despatch to Australia of a good-will ship, laden with Canadian goods for export to the Commonwealth are under way, according to a statement issued by J. E. Walsh, general manager of the Canadian Manufacturers' Association.

The vessel, "The Canadian Constructor," of the Canadian National Steamship Lines, will leave Montreal October 25, bound for Australian ports. A similar trip by the same ship from Australia to Canada will precede the trip for which arrangements are now under way.

Will Attend Conference

Mahatma Gandhi Leaves For London Parley

Simla, India.—After months of indecision and "heart-searching," Mahatma Gandhi has announced his "inner voice" has told him it would be to India's interest for him to go to London to attend the second round table conference.

At the end of almost three hours' conversation with Viceroy Earl Willingdon, who left a sick bed to see him, the Mahatma agreed to co-operate with the round table conference.

His decision was based on an attitude of "mutual accommodation and compromise." The Nationalist leader agreed to drop his demand for the appointment of an arbitration board to determine whether there have been breaches of the Delhi armistice and the viceroy consented to institute an inquiry into the alleged excesses of tax collectors in the Bardoli district.

Thus, after nearly 20 years' absence from England, Gandhi will set sail for London with Pandit Madan Mohan Malaviva and Mme. Sarojininaidu, also delegates, and will reach his destination September 9.. He will take aboard his goats to provide him with milk.

Defends Position

Hon. J. H. Thomas Says Nation's Interest Is Above Party

London, England.—In a letter to the executive committee of the Labor Party of Derby, the borough which he represents in parliament, Rt. Hon. J. H. Thomas defended himself for following Prime Minister MacDonald and joining the national government.

"I know my action will be misunderstood by many," he said in the letter. "I knew full well I should be subjected to criticism and abuse, but I also knew the nation's interest, which is greater than that of any individual or party, was at stake."

Mr. Thomas explained he had abandoned no policy and sacrificed none of his principles. "My only policy," he said, "has been to face boldly the grave emergency in the nation's affairs, and I have decided to remain in the new government only as long as the crisis lasts, and until stability is assured."

He added that in the elections which were inevitable, he would "accept the verdict as a consequence of my own action."

Joins Up With Gandhi

Ahmadabad, India.—Foreswearing the pleasure of the world, Miss Nilla Cram Cook, 21-year-old daughter of the late George Cram Cook, United States poet and playwright, has joined Mahatma's Gandhi's movement for the liberation of India. She is the first United States National to be admitted to his model colony, conducted on the banks of the Sacred Sbarmati River.

CLUE TO NUNGESSOR'S FATE

John Gaucher (left) and L. V. Allers are shown reading the note they found in a cognac bottle off Fire Island. The note, reproduced below, is believed to be from C. M. Nungessor and Major Francois Coli, the intrepid French fliers, who took off from Paris on May 8, 1927, on a non-stop flight to New York. They were never heard of again. Translated from the French the note reads: "Sinking at this moment in Labrador." It bears a signature believed to be that of Coli.

RELIEF PLANS WILL EMBRACE PUBLIC WORKS

Ottawa, Ont. — Canada's Government is carefully considering a scheme to bring water from the Saskatchewan River to Moose Jaw and Regina, in southern Saskatchewan, according to a statement by Hon. G. D. Robertson, Minister of Labour.

Acting on a message from Hon. Robert Weir, Minister of Agriculture, now in the west, Senator Robertson has recommended to the Department of Public Works that a government engineer be sent to Saskatchewan to examine the possibilities of the proposal. Such a project, the Minister of Labour said, would no doubt operate to create wide employment facilities in that area.

A tentative agreement has been reached with the province of New Brunswick in the matter of unemployment relief, Senator Robertson said.

Details of the arrangement would, however, not be made public until Premier R. B. Bennett returns from western Canada and the recommendations are approved by the governor-in-council.

Conferences were proceeding between the minister and representatives of Manitoba.

It is expected that after discussing individual requests of the provinces the entire programme will be submitted to the governor-in-council within a few days.

Good Crops At The Pas

Acreage Is Limited But Yield Reported Remarkably High

The Pas, Man.—Fully two weeks behind some sections of the southern part of the west, cutting operations started last week on wheat and oat fields here. While there is only a limited acreage in this part of the country the yield has been remarkably high according to farmers in this district.

Oats have run as high as 50 bushels, while wheat has averaged 30 and 35 bushels. This is the fifth consecutive year that grain yields have been good in this area, and considerable interest is being taken in the possibility of throwing open the Carrot River Valley to settlers. This triangle of rich river silt has produced sensational yields for years, but as yet, only squatters are working the land, as it is not open to homesteaders. The local Board of Trade has received enquiries from farmers in the southern part of Saskatchewan regarding the possibility of establishing mixed farming in that area.

Cattle Prices May Be Lower

Ottawa, Ont.—Reporting on conditions now prevailing in cattle markets in the Old Country, the Canadian agricultural products representatives in Great Britain in a cable to the livestock commissioner here says: "Cattle markets weaker. Our best hope is strict selection for type and quality of all weights. Lower prices likely."

May Open Canadian Branches

Montreal, Que.—Six large industrial firms of the British Isles are seriously considering the establishment of branch factories in the Dominion during the coming year, F. W. Field, His Majesty's Trade Commissioner, told members of a service club, during an address on the industrial situation in Great Britain.

Will Deport Canadians

Windsor, Ont.—A number of Canadian citizens from widely separated parts of the Dominion have run afoul the immigration authorities at Detroit and are held in Wayne County Jail awaiting deportation. Among the group are Henry S. Mabee, of Calgary, Alberta, and Gustave A. Auburn, Saskatoon, Saskatchewan.

Celebrates Birthday

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labour, was 57 years old August 26. From the staff of the department Senator Robertson received a magnificent bouquet of roses, while numerous messages of congratulation came from friends and colleagues. The minister was born in Welland, Ont., on August 26, 1874

Local and Personal

Commencing last week and for the convenience of the wheat and hay haukers, Kootenay River ferry is operating 24 hours for the next month. R. Sinclair Smith is assistant ferryman.

Facilities for grain loading at Creston this year will be even better than last season. W. Fleming is operating three loading plattorms, and Mr. Mikklejohn has just about completed the erection of a two-section elevator with storage capacity for at least two carloads.
