THE CRESTON REVIEW

VOL. XXIII. CRESTON, B. C., FRIDAY. OCTOBER 2, 1931 No. 28

Kitchener

A. C. MacMillan of the Great West Life Assurance Company, Vancouver, was a business visitor here on Tuesday.

Mrs. N. P. Molander spent a few days last week at Cranbrook, a guest of her daughter, Mrs. W. C. Slean, returning on Thursday.

Miss Olga Nelson returned on Friday from Spokane, where she visited with friends for a week, making the trip by bus.

The crew of C P.R. men laying heavier steel have arrived at Kitchener and expect to make this place headquarters for some time.

Sam Littlejohn, Mr. and Mrs. E. Driffil and Mrs. Geo. Young of Creston spent Saturday in Cranbrook, making the trip by motor.

Miss Beatrice Molander returned on Saturday from Cranbrook where she has been visiting her sister, Mrs. C. Slean for some time.

Mrs. Geo. Young of Creston pen the weekend here, a guest of Mr. and Mrs. E. Driffil.

A superior school is to be opened at Kitchener next week, where there is prospect of twelve pupils for first, second, third and fourth year high school grades.

A crew of mem have started grading the government road here, employing half a dozen men. The relief camps will be finished very soon and work will commence there.

The Community Bridge Club had their first social evening in Hunt's Hall on Saturday evening. The ladies, high score prizes were won by Misses Hazel McGonegal and Olga Nelson, and the gents high score prizes fell to Selmer Anderson and John Belanger. After cards a lunch was served, and then there was a couple of hours dancing with music by the local orchestra, everyone having a very enjoyable time.

Lister

Sam Lazachuk was renewing acquaintances here during the past week. He was here from Kellogg, Idaho, on a visit with his sister, Mrs. Lindhorst, at North Creston.

Col. Fred Lister was a visitor at Victoria at the end of the week, taking up with the government matters of importance to the Creston constituency.

McIntosh Red apples are on the move out of Lister this week, the Langston, Jacks, Powers, Stevens and Yerbury ranches all contributing their quota.

Mr. and Mrs. J. Swanson, who have been on the former Lyon ranch for the past year, are leaving this week for Vancouver, where they will reside at least for the present.

Rev. T. Scott, Anglican rector at Creston, will have harvest thanksgiving service here on Sunday morning at 11 o'clock. Fruits, vegetables and flowers for decoration should be at the church Saturday afternoon.

Miss May Webster arrived from Coal Creek on Tuesday and the second room of the Lister school was opened on Thursday morning. Miss Webster is staying with Mr. and Mrs. R. Stevens at present.

There was quite a large turnout at the special school meeting on Saturday night, at which $100 was voted to operate the new room with, and it was decided to make an exhibit in the school section at Creston fair next week, Mrs. Powers consenting to gather up the exhibit. The meeting was presided over by R. T. Millner.

At the close of the school meeting most everyone present remained for the meeting to reorganize the Community Society. Last year's officers carried out their duties so satisfactorily that they were re-elected by acclamation, A. W. Sinclair as president, and Mrs. H Langston. secretary-treasurer. The opening meeting will be a dance at the schoolhouse.

Erickson

Mrs. W. Woodhall (nee Jeanne Hall) and baby daughter, of Trail arrived on Friday on a visit with her parents, Mr and Mrs. John Hall.

Mrs. H. Campbell and J. Dugdale of Bellvue, Alberta, are motor visitors at their ranches at Erickson.

Geo. Lastocky left this week for Lethbridge, Alberta, where he expects to spend the winter.

Mr. and Mrs. Stewart of Yahk spent Sunday here, guests of W. Stewart.

Mr. and Mrs. Nedlac of Yahk were visitors here, guests of Mr. and Mrs. W. L. Heric

Mrs. R. Thurston returned from Cranbrook on Saturday, where she has been visiting with Mrs. C. B. Twigg.

Mr. and Mrs. Mackie and Miss Margaret Stewart of Cranbrook were Sunday visitors here, guests of W. Stewart.

F. Dean, who two years ago was in charge of apple inspection at Creston and Erickson, was a visitor here on Tuesday. He is working at Nelson this year.

Alice Siding

Miss Alice Carr, who is with the Kootenay telephone central at Fernie, is holidaying here this onth, a guest of her parents, Mr. and Mrs. Victor Carr.

Alice Siding growers are through with the harvest of McIntosh Reds, and a start has been made on the winter varities. Due to the very dry season the crop is below normal.

The government road crew has made a considerable improvement in some of the bad spots in the hard surface road between here and Creston.

There was a good turnout of buyers at the Sherwood auction sale on Saturday, but bidding was not at all high. Mr. and Mrs. Sherwood are moving to Creston to reside.

Sam Lazachuk of Kellogg, Idaho, was a visitor here last week, with his sister, Mrs. Lindhorst, who, with her husband, have the Frank Rose ranch on lease this year.

It is quite authoritatively stated that the irrigation superintendent does not favor extending the proposed Duck Creek irrigation system through to include Alice Siding, due to the excessive cost of construction.

Chas. Raymond of Piapot, Sask., who recently purchased the N. Schade ranch, is expected in this week to take possession.

Haying season is declared over on the flats, and the cattle have again been turned loose to pasture all over the area.

Fall Fair Entries Close Tomorrow

New Quarters Provided for the Poultry—Fruit Display Should be Splendid—Outdoor Sports Varied and Interesting.

Every effort has been made by the directors to make this year's fall fair an outstanding success, and on looking over the prize list it must be admitted that the changes seem to be all for the better.

In the box exhibits the five and three box lots have been omitted and the prizes increased, with two special prizes attached to these classes.

The plate section has been also extended and the prizes increased, and a new section added in the shape of single specimens. This section was taken from the Kelowna prize list and we trust that it will meet with the support from the growers that the section deserves. There is a special attached in this section for the best apple, value $15.00 ---surely worth going after.

Entries close at 10 p.m. Saturday, October 3rd, and we would remind ny grower that it would be well to look over his list to see that nothing has been omitted.

The ladies section is always good, and as nature has been kind this year and given us fruit fit for exhibition it is up to the grower to make a serious effort to show their wives and daughters that they are not the only ones who can turn out high class exhibits.

From the splendid results obtained by the Women's Institute exhibits at the coast we may expect a needlework section of a very high order.

The new poultry shed that is being built on the east end of the exhibition building should ensure a good poultry exhibit as this takes away the old complaint of birds being exposed to the bad weather with bad results. The Experimental Farm at Windermere will stage an exhibit.

Admission tickets have been on sale for the past week with the chance of a cash prize for the holders of the three lucky tickets. These tickets are on sale at all of the stores and from the secretary and directors. Buy one before the fair and take a chance on the prize money.

There will be the usual attraction ons the grounds and this year a softball tournament has been put on for the valley schools in the place of the usual sports. If the youngsters show half the enthusiasm that these games generally call for there should be a great time.

There is also to be a dance in the exhibition building in the evening of fair day. The town orchestra is furnishing the music, and supper is included in the admission fee, gentlemen, $1 00, ladies .50c.

Quite a large number of prizes have been donated in goods this year and these prizes will be on display at the fair and will be handed over to the winners at the close of the fair.

It has been also arranged to hold the annual meeting within two weeks after the fair and it is intended to have all the prize cheques, ready for distribution at that meeting. This should ensure the election of a strong board of directors and a good turn out of members.

There is a director in charge of each section and we should urge all to make a final effort to round up any exhibitors who have not handed in their entries. Conditions are right for a record fair. Let's make it so.

AT THE HOSPITAL

Mrs. Robert Lowerison underwent an operation and is progressing favourably.

Mr. Harry Demchuck and Mr. Orin Plumb are progressing nicely..

Miss Helen Dzvigola has left the hospital.

OUR K.B.O. BROADCAST

Trail cancelled its 1931 fall fair.

At Kaslo the public school staff has been reduced to two teachers.

More than 600 men are registered as wanting work at Penticton.

Vernon fire chief claims the last six fires in that town were of incendiary origin.

Last year 59 per cent. of the Okanagan McIntosh Reds moved as "C" grade or household.

Vernon council estimates it will need $20,000 to cope with unemployment this winter.

Kaslo has a brass band of 19 pieces. Most of the players are under 20 years years of age

Penticton is installing an iron stoker at the high school. It is expected to reduce the fuel bill 25 per cent.

Kimberley is now getting but one mail a day. It comes up from Cranbrook after the arrival of the eastbound train.

The Vernon News claims that in 1930 one box of Fancy McIntosh Reds netted the grower more than 2½ boxes of household.

Kaslo Women's Institute claims the biggest memberstip of all the Kootenay. It has 105, as compared with 94 in Nelson.

In order to provide work for its unemployed Penticton council is arranging to spend an extra $21,000 on public improvements.

Kimberley schools have the largest attendance on record. There are 644 in the public school, and 95 in the high school.

According to the Kootenaian four Japanese plums brought into that office in September, 1897, was the first fruit harvested in Kaslo.

A sports club has just been organized at Rossland. It will supervised all indoor activities at at the armory building this winter.

The Vernon News points out that in 1923 about 68 per cent. of the McIntosh Reds moved as Fancy. In 1930 this was cut to 40 per cent.

The Press claims there is enough ore in sight at the Sullivan mine at Kimberley to maintain the present production for 150 years.

Owing to the continued hot weather during the filling season the average yield of wheat at Bonners Ferry will be around 25 bushels per acre. Normally it is 40 bushels.

Wynndel

Mrs. Manuel of Nelson was a visitor here last week, a guest of Mrs. J. J, Grady.

John Wigen was another cf last week's lucky hunters, bringing in a fine buck at the weekend.

Tenders are being called for the supply of firewood for the school and teacherage use.

Mr. and Mrs. G. McInnis and daughter were Nelson visitors, guests of the latter's sister, Miss Redpath.

The October meeting of the W.A. wil be at Mrs. Towson's, Wednesday, 7th, at 2:30 p.m.

Painting operations were started on St. Paul's United Church this week.

In the report submitted by Wynndel Institute at the 1931 conference at Edgewood mention was made of lack of community support beins their drawback. The report of fall fair in last issue, with almost 100 per cent. cooperation of the district, and the splendid financial support disproves this statement. Seldom, if ever, is a well deserving cause let go unsupported in Wynndel.

Canyon City

Picking of the McIntosh Reds was completed at the middle of the week. The crop is fully 20 per cent. heavier than expected, and this is the "off" year for Macs.

Mr. and Mrs. Walde and children and Mr. and Mrs. Wearmouth were Bonners Ferry visitors at the first of the week, making the trip by auto. The Walde's left for home on Wednesday.

Mrs. Walsh returned at the first of the week from a visit with friends in Kaslo.

Manfred Samuelson was at Kimberley on Sunday where he was in charge of the services in the United Church.

Gordon Vance is the first of the local hunters to bring in a deer—a fine sample of venison, taken at the first of the week.

Orin Plumb, who is still a patient at Creston hospital continues to make a satisfactory recovery and all will be glad to know that he will not lose his arm, although he will not be able to use it for several months.

John Bedry, who recently purchased the Kemp ranch at Canyon has this week taken possession of his new home. The George Strong ranch, vacated by Mr. Bedry, is now occupied by Mrs McDonald and family, who have for some time been living with her brother, Mr. Plumb.

Rev. R. E. Cribb has accepted a call to the United Church at Kimberley which work he takes charge of at once, and will have his final service at Canyon on Sunday afternoon.

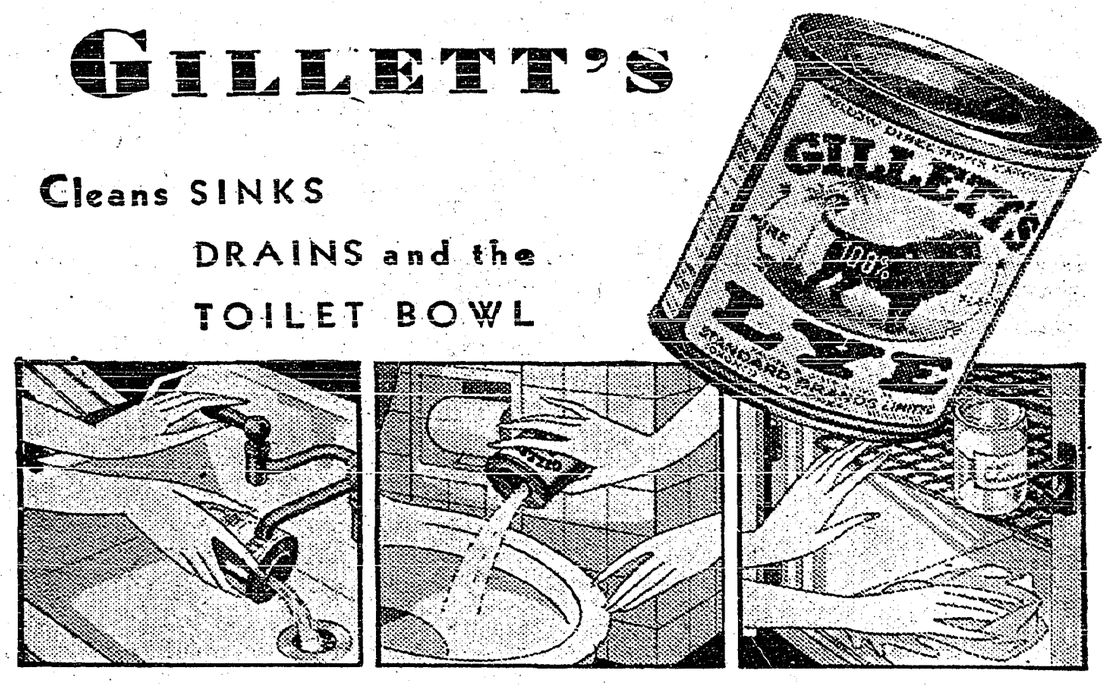
GILLETT'S Flake Lye

Cleans SINKS
DRAINS and the
TOILET BOWL



■ Full strength for Sink Drains ■ Full strength for the toilet bowl ■ In solution for all general cleaning

★Lye should never be dissolved in hot water.

USE full strength Gillett's Lye to keep all your drains clean and free-running.

A small quantity poured down your sinks and toilet bowl, each week, will rid them of all dirt accumulations and save you costly repair bills.

For all household cleaning, one tablespoonful of Gillett's Lye dissolved in a gallon of cold★ water provides a safe solution for washing floors, tiling, refrigerators, etc.

• • •

The new FREE Gillett's Lye booklet describes many other ways this handy product can help you with all your cleaning. Send for it.

GILLETT'S Lye "Eats Dirt"

WORLD HAPPENINGS BRIEFLY TOLD

Twenty-two vessels, nearly all Diesel equipped, were launched in Japan in the first six months of this year.

Professor Edwin R. A. Seligman, internationally known economist of Columbia University, thinks the suspension of the gold standard by Great Britain will stimulate industry.

Miss H. D. Hobrecker, for nine years leader of the Young Women's Christian Association in Nova Scotia, has been appointed national secretary of the Y.W.C.A. for Canada.

The memorial to those who lost their lives when the giant dirigible R-101 crashed in France last October, has been unveiled above the graves of the victims in Cardington churchyard.

Estimating a wheat average for the provivnce of 16½ bushels per acre, a general crop report issued by the Alberta Wheat Pool places the Edmonton district above all sections with an average of 28 bushels to the acre.

Further discouragement to British migration to the Dominion appeared in an announcement from the Overseas Settlement Department that the special $50 passage rate for British settlers to Canada was withdrawn October 1.

Assurance that the Dominion Government would assume 50 per cent. of the total cost of unemployment relief work in Alberta, including labour and material, has been announced by Hon. G. L. McPherson, Provincial Minister of Public Works.

Sir Howard Grubb, noted authority on astronomical instruments and builder of them, died recently in Dublin. Sir Howard has sometimes been credited with the invention of the submarine periscope and he made many developments on it.

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Eclectric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

England's Speed Records

England's official speed records for air, land and water despite the unfortunate termination of the race at Detroit are as follows: Airplane — Squadron Leader A. H. Orlebar, 357.7 miles an hour, with a Super-marine Rolls-Royce S-6. Automobile — Malcolm Campbell, 246.066 miles an hour. Speedboat—Kaye Don, 110,223 miles an hour, with "Miss England II."

SUNDAY SCHOOL LESSON

OCTOBER 4

THE MACEDONIAN CALL

Golden Text: "Go ye therefore, and make disciples of all nations. — Matthew 28.19.

Lesson: Acts 15.36 to 16.15; Romans 15.18-21.

Devotional Reading: Hebrews 11.8-10.

Explanations and Comments

The Two Great Workers Separate, Acts 15.36-41.—"Come and let us go back and visit the brothers in every town where we have proclaimed the word of the Lord. Let us see how they are doing" (Moffatt's Version), said Paul to Barnabas, who had spent some time in Antioch of Syria after the return from the Council in Jerusalem. Barnabas was ready for another missionary tour, but he wished to try Mark again, while Paul would not take a man with them who had deserted them in Pamphylia on their first tour. Unable to agree, the two apostles separated—Barnabas took Mark with him and sailed for Cyprus, and here we part with great-hearted missionary, for there is no further record of his work. Paul chose Silas as his companion and they went by land through Syria and Cilicia, strengthening the churches on the way.

"The separation of Paul and Barnabas was highly conducive to the progress of the gospel. Each could now work with greater freedom. Barnabas would be delivered from a position in which he might from the increasing importance of Paul feel his own influence was diminishing; and Paul would feel more thoroughly independent. Besides, instead of one mission, now there were two; Barnabas and Mark labouring in one quarter, and Paul and Silas in another; and thus double work would be performed."—Gloag.

Timothy Chosen As a Companion, Acts 16.1-5.—Paul and Silas visited Derbe and Lystra, and in the latter city Paul chose Timothy, a young man of good reputation, to accompany them on their journey. As they travelled from town to town they delivered to the churches the resolutions passed at the Council in Jerusalem. Everywhere the churches were strengthened in the faith (i.e., faith in Christ, as over against the idea of the works of the law) and increased in numbers.

The Call To Europe, Acts 16.9, 10.—Up to the time of Paul's vision at Troas, the Holy Spirit had exerted His influence by hindering, restraining. Then at Troas a challenge was set before Paul, he was called to make a new advance; in a vision at night there was a man of Macedonia standing, beseeching him, and saying, "Come over into Macedonia and help us."

Paul's Aim In His Work, Romans 15.18-21.—From the moment when Ananias informed Paul that Christ counted him a chosen instrument to bear His name before the Gentiles, up until the hour when Paul addressed his letter to the Romans, he had visioned with increasing clearness that his task was "to make the Gentiles obedient to Christ." Christ had worked through him, he writes, through his words and deeds, through the power of signs and wonders, through the power of the Holy Spirit. From Jerusalem and round about even unto Illyricum, on the west of Macedonia, he has, he proudly declares, "fully preached the gospel of Christ." This was Paul's glorying, that he had met to its fullest extent the duty of his calling as the apostle of the Gentiles. He could point to his task and call it done, as far as time and circumstances had permitted.

His special aim had been not to build upon another's foundation, but to preach Christ where he had not been named. In the words of Isaiah,

"They shall see, to whom no tidings of Him came,
And they who have not heard shall understand."

Text Books In Schools

Few Changes Required By Departmental Regulations In Saskatchewan

Allegations that the Saskatchewan Department of Education has authorized radical changes in school text books involving needless expense to parents in these days of financial depression, are declared unfounded in a recent statement to the press, emanating from the Department. The statement asserts that the new curriculum recently adopted for public and high schools of the province, does not require the scrapping of old text books and the purchase of new. In fact, it is set forth that, pursuant to instructions from Premier J. T. M. Anderson, as Minister of Education, pupils having access to old school books formerly authorized by the Department, are not required to purchase new ones.

The statement further shows that, far from causing additional expense to parents, the new curriculum actually calls for a smaller expenditure on books than ever before. Certain text books have been eliminated, thus making savings possible, while the only new books authorized are inexpensive.

In the public school grades, the only new book to be authorized was the Congdon Music Primer (price 25 cents), for use of grades three and four. This was necessitated by the addition of Music to the public school curriculum in all grades. On the other hand, Elementary Composition (price 50 cents), formerly a text book for grades five to eight, and Public School Grammar (35 cents), formerly an alternative text with English Grammar in grades six to eight, both have been dropped, as no text book is authorized in this subject. Further, the cost of the Canadian Speller was reduced, this year, from 40 cents to 30 cents.

With the exception of literature selections in English and foreign languages, the high school text books authorized for this year are almost identical with those of last year, according to the statement. Selections in supplementary reading have been changed throughout, in compliance with earnest requests from high school teachers. Literature selections in grades nine and twelve have been changed for the same reason, while a few changes have been made in Latin, French and German prose. It is the usual practice for departments of education to change the selections in English and foreign languages annually, but, the statement adds, no changes were made in Saskatchewan for 1930-31. The cost of literature and foreign language texts, it is pointed out, range from 15 to 50 cents. In grade twelve Biology, the former text book being out of print, it was replaced, necessarily, by the revised edition. However, pupils having access to the old text are not required to purchase the new book.

Free Distribution

Carrying the economies with regard to school text books further, the Department of Education has made arrangements with the Saskatchewan Teachers' Alliance for the collection of used text books, and their distribution, free of charge, amongst schools in the dried-out areas of the province. Where text books, previously authorized, are available, they may be used to meet the emergency says a statement issued by Premier Anderson covering this phase of the matter, which follows:

"The Department of Education has received many letters from all parts of the province, but particularly from the dried-out areas, requesting that pupils unable to purchase school books should be furnished with them by the Department. Arrangements have now been made with the executive of the Saskatchewan Teachers' Alliance whereby the latter undertakes to assist the department in taking care of cases of urgent need. The Alliance has welcomed the opportunity of sharing the responsibilities of the present situation.

"Through their 176 locals in the province, the Alliance will gather together at local points any discarded books available in their respective areas, at the same time they will ascertain through their members information regarding urgent cases. So far as possible each local will distribute books collected to needy schools in their district, the books to become the property of the school and not of individual pupils to whom they will be loaned for use.

"Any surplus will be sent to the Department of Education, and where there are cases which the locals are unable to handle, the information will be passed on to the department for attention. The department will undertake to distribute used books outside the territory served by the Alliance locals or where a local is unable to meet the local demands.

"The Department of Education has decided that no child should be kept out of school because of lack of books. Relief will be furnished as quickly as possible, but in the meantime children should be kept in regular attendance at school. Where text books previously authorized are available, they may be used to meet this emergency condition, provided authorized books are not available. It is further suggested that, where necessary, teachers should arrange the sharing of books among their pupils as it is not essential that every child should possess a complete set."

Lovely Skin

Vegetable Pills Did What Creams Couldn't

"I find (writes Miss E. T. Clapham) that Carter's Little Liver Pills will do more to keep the complexion clear and the skin free from blemishes than all the face creams I have used."
Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGETABLE and have a definite, valuable tonic action upon the liver. They end Constipation, Indigestion, Biliousness, Headaches, Acidity. All druggists. 25c and 75c red packages.

Solution Of Economic Distress On Prairies

Lies In Diversified Farming Opinion Of Financial Corporation President

More diversified farming and limited raising of livestock, under a system of advisory farm management is the only solution for economic distress on the Canadian parirles, in the opinion of C. M. Bowman, president of the Colonization Finance Corporation. He has returned from a three weeks' tour of 125 western farms which are being operated under the supervision of the corporation.

The company was formed in 1929 when it was found mortgagors were falling in arrears of interest and tenants and purchasers under sale agreements were failing to meet their obligations.

Through its system, western farmers were slowly being shifted away from an all-wheat crop, he said.

Railroads of Argentina are fighting private trucking companies by establishing parallel truck lines.

Danced On the DO-X

Germany Proves Great 'Plane Good As Ocean Liner

For the time being, her size satisfies our imagination. With a wing spread of 152 feet and a hull 131 feet long, twelve motors and two decks providing ample quarters for passengers and crew, it is possible for her to carry a pay load of from sixty to seventy passengers in addition to her crew of twelve. In one trial flight she actually carried 169 persons. As a final note on her resemblance to an ocean liner, it is reported that the passengers en route to New York held a dance on board ship after leaving Hampton Roads.

The DO-X is an experiment and its mishaps may be attributed to this fact. It is still to be seen whether either this 'plane or others built like her can be regularly and profitably used in air transportation. In any event Germany has shown us what can be done with the dirigible in trans-Atlantic flying; she is now attempting to demonstrate the possibilities of giant airplanes.—New York Evening Post.

LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kruschen Salts for 3 months, and have reduced from 212 lbs. to 182 lbs. (age 40). I am a hearty eater, and have never dieted in any way. Also I have never felt any ill effects whilst I have been taking Kruschen salts."—T. H.

That is an instance of Kruschen succeeding without assistance. But if any fat person will be satisfied with a moderate diet, and will take one half teaspoon of Kruschen Salts in a glass of hot water before breakfast every morning—they can lose fat in just the same way.

This is what Kruschen Salts does—it cleans out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fills you with a vigor and tireless energy you'd almost forgotten had existed—you get the needful exercise.

As a result, instead of planting yourself in an easy chair every free moment and letting flabby fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

Champion Rabbit Catcher

Isaac Gough, of Gloucestershire, England, claims to be the champion rabbit catcher of Britain. He declared recently that he and his two sons had caught 52,343 rabbits between August and March. They have caught 1,500 in 10 days and 534 in one night. Mr. Gough makes so much money from trapping that he pays income tax and is proud of it.

Persian Balm promotes daintiness, charm and beauty. It is unrivalled in its magical effect on the skin. Swiftly absorbed by the tissues, it leaves never a vestige of stickiness. Delightfully cool to the skin. Stimulating and invigorating. Softens and makes the hands flawlessly white. Subtly fragrant. Imparts youth and loveliness to the complexion. Persian Balm is the inevitable choice of the woman who cares.

Purchase Junkers 'Plane

T. Siers, superintendent of maintenance for Canadian Airways (western divison), is now in Germany to take delivery of a new Junkers 'plane for his company. The aircraft, known as the JU-52 type, is designed as a commercial air freighter and will carry a load of 6,000 pounds at a speed of a hundred miles an hour.

The Thousand Islands of the St. Lawrence are rivalled by the 1,500 islands along the waterfront of Rio de Janerio.

CORNS
Lift off - No Pain!

Just a drop or two of Putnam's on any sore corn and out comes all the pain. The corn shrivels up and drops off. No scar, no pain, no pinching from tight shoes. You can dance or walk in comfort. Use only Putnam's Corn Extractor. Satisfaction guaranteed. Sold by druggists everywhere.

PUTNAM'S

159

the old country for Christmas

YOU can go home for Christmas NOW, even if the money you have set aside is less than you thought necessary. Fares on the luxurious Canadian Pacific Steamships are specially reduced, yet the comfort, service and cuisine is the same as before. Living costs are lower than they have been for years. You can go now for much less money.

Ships sail regularly and frequently each week. Last-minute special sailings to get you to the Old Country for Christmas are:

From Saint John:

Montclare	December 5
Duchess of Bedford	December 11
Montrose	December 12
Duchess of Richmond	December 16

ENO'S "FRUIT SALT"

Mothers! Don't Risk Their Health With Violent Purgatives

Constipation is one of childhood's greatest enemies. Unless the intestinal system is kept clear and clean ill health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary, cheap cathartics.

ENO'S "Fruit Salt" in a glass of water, every morning is the safest, surest and most pleasant way to inner cleanliness and perfect health.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Splendid Folly," "The Hermit Of Far End."

Hodder & Stoughton, Ltd., London.

CHAPTER I.—Continued.

"Staple? Is that the Brennans' place'?

"God bless my soul, no! The Tormarins acquired it when they came pushing over to England with the Conqueror, I imagine. Anne married twice, you know. Her first husband, Tormarin, led her a dog's life, and after his death she married Claude Brennan—son of a junior branch of the Brennans. Now she is a widow for the second time."

"And are there any children?"

"Two sons. The elder is the son of the first marriage and is the owner of Staple, of course. The younger one is the child of the second marriage. I believe that since Brennan's death they all three live very comfortably together at Staple—at least, they did ten years ago when I last heard from Anne. That was not long after Brennan died."

Jean wrinkled her brows.

"Rather a confusing household to be suddenly pitchforked into," she commented.

"But not dull!" submitted Peterson triumphantly: "And dullness is, after all, the biggest bugbear of existence."

As if suddenly stabbed by the palpable pose of his own remark, the light died out of his face and he looked round the great dim hall with a restless, eager glance, as though trying to impress the picture of it on his memory.

"Beirnfels—my 'House of Dreams-Come-True'," he muttered to himself.

He had named it thus in those first glowing days when love had transfigured the grim old border castle turning it into a place of magic visions and consummated hopes. The whimsical name took its origin from a little song which Jacqueline had been wont to sing to him, a glorious voice investing the simple words with a passionate belief and triumph.

It's a strange road leads to the House of Dreams,
To the House of Dreams-Come-True,
Its hills are steep and its valleys deep,
And salt with tears the Wayfarers weep,
The Wayfarers—I and you.
But there's sure a way to the House of Dreams,
To the House of Dreams-Come-True.
We shall find it yet, ere the sun has set,
If we face straight on, some fine, some wet,
Wayfarers—I and you.*

Peterson's eyes rested curiously on his daughter's face. There was something mystic, almost visionary, in their quiet, absent gaze.

"One day, Jean," he said, "when you meet the only man who matters, Beirnfels shall be yours—the house where your dreams shall come true. It's a house of ghosts now—a dead house. But some day you and the man you love will make it live again."

CHAPTER II.

Madame De Varigny

Jean was standing looking out from the window of her room in the hotel at Montavan. In the distance, the great white peaks of the Alps strained upwards, piercing the mass of drifting cloud, whilst below lay a world sheeted in snow, the long reach of dazzling purity broken only where the pine-woods etched black trunks against the whiteness and the steely gleam of a frozen lake showed like a broad blade drawn from a white velvet scabbard.

It had been part of Peterson's expressed programme that, before going their separate ways, he and Jean should make a brief stay at Montavan, there to await Lady Anne Brennan's answer to his letter. Jean had divined in this determination an excuse, covering his need to take farewell of that grave on the lonely mountain-side before he set out upon the solitary journey which could not fail to hold poignant memories of other, former wanderings—wanderings invested with the exquisite joy of sharing each adventure with a beloved fellow-wayfarer.

Instinctively though Jean had recognized the desire at the back of Glyn's decision to stop at Montavan, she was scrupulously careful not to let him guess her recognition. She took her cue from his own demeanour, which was outwardly that of a man merely travelling for pleasure, and she listened with a grim sense of amusement when poor Monsieur Vautrinot, the Maitre d'Hotel, recognizing Peterson as a former client, sympathetically recalled the sad circumstances of his previous visit and was roundly snubbed for his pains.

To Jean the loss of her mother had meant far less than it would have done to a girl in more commonplace circumstances. It was true that Jacqueline had shown herself all that was kindhearted and generous in her genuine wish to compass the girl's happiness, and that Jean had been frankly fond of her and attracted to her, but in no sense of the words had there been any interpretation of a maternal or filial relationship: "Of course I know I'm a quite superfluous third at Beirnfels, but, all the same, you two really do make the most perfect host and hostess, and you try awfully hard not to let me feel de trop."

But, despite the fact that Jacqueline had represented little more to her daughter than a brilliant and delightful personality with whom circumstances happened to have brought her into contact, Jean was conscious of a sudden thrill of pain as her glance travelled across the wide stretches of snow and came at last to rest on the shoulder of a hill. She was moved by an immense consciousness of loss—not just the mere sense of bereavement which the circumstances would naturally have engendered, but something more absolute—a sense of all the exquisite maternal element which she had missed in the woman who was dead.

And then came recognition of the uselessness of such regret. Nothing could have made Jacqueline other than she was—one of the world'c great lovers. Mated to the man she loved, she asked nothing more of Nature, nor had she herself anything more to give. And the same reasoning, though perhaps in a less degree, could be applied to Peterson's own attitude of detachment towards his daughter; although Jean was intuitively aware that she had come to mean much more to him since her mother's death, even though it might be, perhaps, only because she represented a tangible link with his past happiness.

Thrusting aside the oppression of thought conjured up by her glimpse of that quiet God's Acre, set high up among the hills, she turned abruptly from the window and made her way downstairs to the hotel vestibule.

Here she discovered that Peterson had been claimed by some acquaintances. The encounter was obviously not of his own choosing, for, to Jean's experienced eye, his face bore the slightly restive expression common to it when circumstances had momentarily got the better of him.

His companions were a somewhat elaborate little Frenchman of fifty or thereabouts, with an unmistakable air of breeding about him, and a stately-looking woman some fifteen years younger, whose warm brunette colouring and swift, mobile gesture proclaimed her of Latin blood. All three were conversing in French.

"Ah! La voici qui vient!" Peterson turned as Jean approached, his quick exclamation tinctured with relief. Still in French, which both he and Jean spoke as fluently and with as little accent as English, he continued rapidly: "Jean, let me present you to Madame la Comtesse de Varigny."

The girl found herself looking straight into a pair of eyes of that peculiarly opaque, dense brown common to Southern races. They were heavily fringed with long black lashes, giving them a fictitiously soft and disarming expression, yet Jean was vaguely conscious that their real expression held something secret and implacable, almost repellant, an impression strengthened by the virile, strongly-marked black brows that lay so close above them.

For the rest, Madame de Varigny was undeniably a beautiful woman, her blue-black, rather coarse hair framing an oval face, extraordinarily attractive in contour, with somewhat high cheek bones and a clever, flexible mouth.

Jean's first instinctive feeling was one of distaste. In spite of her knowledge that Varigny was one of the oldest names in France, the Countess struck her as partaking a little of the adventuress—of the type of woman of no particular birth who has climbed by her wits—and she wondered what position she had occupied prior to her marriage.

She was sharply recalled from her thoughts to find that Madame de Varigny was introducing the little middle-aged Frenchman to her as her husband, and immediately she spoke Jean felt her suspicious melting away beneath the warm, caressing cadences of an unusually beautiful voice. Such a voice was a straight passport to the heart. It seemed to clothe even the prosaic little Count in an almost romantic atmosphere of tender charm, an effect which he speedily dispelled by giving a Jean a full, true, and particular account of the various pulmonary symptoms which annually induced him to seek the high, dry air of Montavan.

(To Be Continued.)

Little Helps For This Week

"The Lord is my shepherd; therefore I can lack nothing."—Psalter.

So whether on the hilltops high and fair
I dwell, or in the sunless valleys where
The shadows lie, what matter? He is there.
And more than this: where'er the pathway lead,
He gives to me no helpless, broken reed,
Bpt His own hand, sufficient for my need.
So where He leads me I can safely go,
And in the blest hereafter I shall know
Why in His wisdom He hath led me so.

—Henry H. Barry.

He is a strict but tender Master; and on the way which He leads us are not only crosses and thorns, but light, and love, and sympathy, and peace, and at the end—heaven.—M. K. Vincent.

Smallpox was unknown in America before white men came.

She Suffers So—Unnecessarily!

Nearly Nervous Prostration

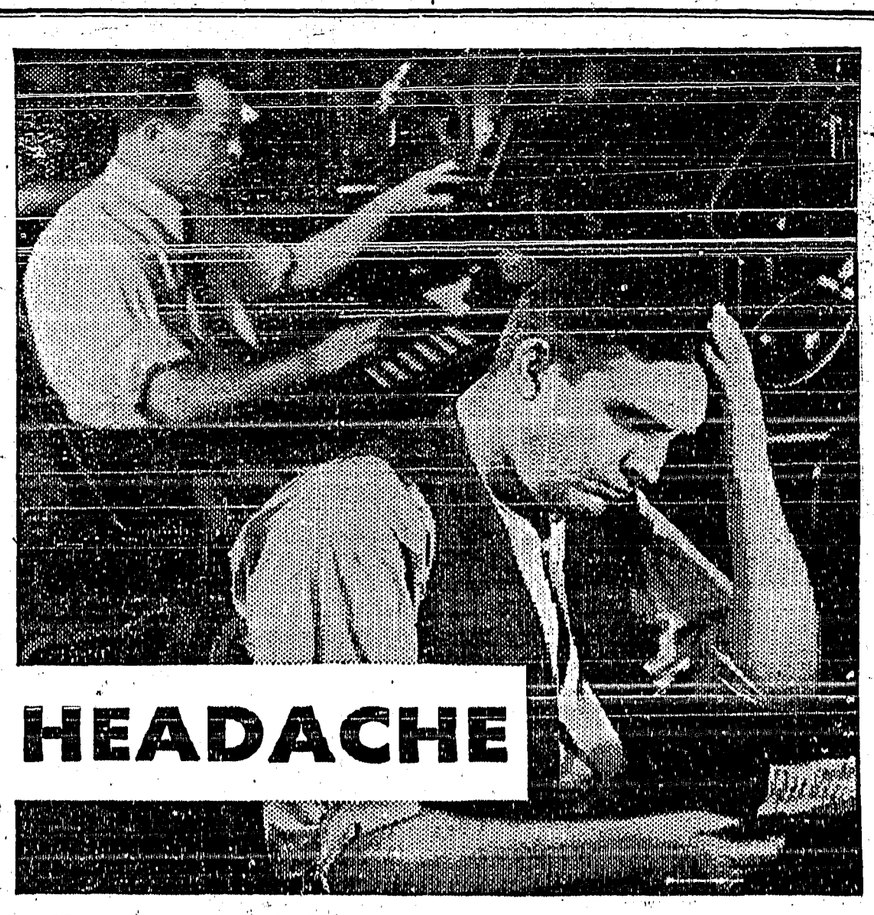
DO you know her . . . this poor woman who wakes up, her head still aching, her nerves ragged?

How many young women are working "on their nerve" because female weakness has robbed them of strength and health?

If they would only try Lydia E. Pinkham's Vegetable Compound. It strengthens by its tonic action . . . brings soothing, comforting relief.

Get a bottle of the liquid from your druggist today. Or try it in the new convenient tablet form.

Lydia E. Pinkham's VEGETABLE COMPOUND



Nerves on edge. A head that throbs. You can't stop work, but you *can* stop the pain—in a hurry. Aspirin will do it every time. Take two or three tablets, a swallow of water, and you're soon comfortable. There's nothing half-way about the action of Aspirin. You will always get complete relief when you take these tables.

These tablets should be in every shop, office, and home. Ready to relieve any sudden ache or pain, from a grumbling tooth to lumbago. Don't suffer with that neuralgia, neuritis, rheumatism, etc.; or lose any time because of colds or sore throat. Get some Aspirin and just follow those *proven* directions for instant relief.

Aspirin tablets cost very little, especially if you buy them by the bottle. Any doctor will tell you they are harmless. They don't hurt the heart. They don't upset the stomach. So take them as often as you have the least need of their quick comfort. Take enough for complete results. On sale at drug stores everywhere. Made in Canada.

CRESTON, B.C., FRIDAY, OCT. 2

Praises Irrigation System

According to a bulletin issued by Mr. deWolfe, provincial superintendent of irrigation, Creston is the one bright spot in the whole of British Columbia's irrigated districts.

At most points in the Okanagan further expenditures have been made in order to increase the water supply.

At South East Kelowna $45,000 is to be spent to capture just the flood water from a nearby stream and divert it into Mission Creek, which is the main source of supply.

At several places dams have been put in to increase storage, and others have had to resort to pumping. This latter feature is not highly favored by Mr. deWolfe, who refers to the experience Grand Forks is having in these terms: "The city of Grand Forks and the irrigation District are having constant trouble with their pumps and distributing system through silt which gets into it from hydraulicing operations higher up the river above Rock Creek. This silt wears out the pumps and plugs the distribution system. So great is this nuisance that a short time ago they were forced to shut down about every three or four hours to repack the pumps."

All features of the East Creston project are referred to in enthusiastic terms by Mr. deWolfe who says, in part:

Creston, over in the Kootenays, has an ideal irrigation system. Installation of a system was completed last July at a cost of $151,000. The irrigation system supplies domestic and irrigation water for the town and about 1,600 acres of lands and the homes thereon.

So abundant is the supply that there are no restrictions on the amount of water used winter or summer, day or night. The lands are served by a sprinkling system instead of the open ditches in the Okanagan. There are Hume concrete pipe mains and cast iron pipe in the laterals. This is believed to be the most modern type of irrigation system. Another feature, there is only one employee, L. T. Leveque, who attends to all the secretarial duties and outside work. Best of all, the cost is but $6 an acre, and it is reckoned that if there was no moratorium, the cost would not be more than $10 an acre, to take care of maintenance and the repayment of principal.

As a result of plentiful supplies of water, the production is increasing at a splendid rate. Practically the whole district is under cover crops and the increase may be 100 per cent. greater production inside two or three years.

Commends Institute Effort

Tuesday afternoon Creston and District Women's Institute had on display the needlework shown at Vancouver exhibition in August and on which a score of 15 points was recorded, entitling the local institute to have the silver cup awarded in this connection for the second year in succession. The many who viewed the display of needlecraft will agree with Mr. Munro, deputy minister of agriculture, who has just written the institute congratulating them on their success. He says:

Victoria, Sept. 1, 1931.

Mrs. R. Stevens,
Secy. Creston W.I.,
Creston, B.C.

Dear Madam:-

I am enclosing a number of prize cards which have been handed to me by Mrs. D. E. Humphrey, who had charge of the Women's Institute Section at the Vancouver Exhibition.

In passing these cards on to you I wish to extend my hearty congratulations on the excellent showing the women of your district have made at Vancouver this year. To win first prize on knitting and embroidery, second prize on plain sewing, third prize on hooked rug and two fourth prizes on patchwork quilt and crochet and knitting required a very high standard of excellence in the numerous articles from Creston district. I am sure that the exhibition management will welcome your entries on future occasions for they add very much to the quality of the exhibits in the classes devoted to women's interests.

Yours very truly,
J. B. MUNRO,
Deputy Minister.

The good work other organizations did in the past in exhibiting fruit, more especially, at outside points, is being carried on successfully by the Women's Institute who this year had exhibits at both the Vancouver Victoria exhibitions. Those who contributed work as well as those responsible for arranging for these displays have given the district some timely advertising and are to be commended for their good work.

Bonners Ferry district is receiving more new settlers this year than for some time past.

Kaslo trustees have decided to engage a second teacher for the high school who will take Grade 8 work, in order to help out the reduced public school staff.

At Bonners Ferry the public school attendance is less than last year, but high school enrollment is larger. There are 298 public and 224 high school students.

The Great Northern is at present operating a daily freight service between Bonners Ferry and Porthill to take care of the grain haul from the dyked lands in that area.

The Herald is fearful lest the recent rains mingling with the ashes from the forest fires and running into the streams will poison many fish in Bonners Ferry streams.

1350 have registered as unemployed in Fernie, and district. 400 of these are residents of Fernie. The married men will be taken care of on work provided in the city.

The Herald is very much peeved because orchardists in the Penticton area are employing Doukhobors and Orientals to pick fruit, while there are over 600 men looking for work in that district.

Fertilizer from the Consolidated Mining & Smelting Company plant at Trail was tried on the dyked lands at Bonners Ferry and where used the wheat yield was 29 bushels to the acre. Where not used the grain went only 18 bushels.

Kaslo board of trade is asking the fishery department at Ottawa to supply a statement showing the number of trout eggs taken at the Gerrard hatchery for the past few years, and how many of these have been placed in the main Kootenay Lake.

Meeting The Challenge

In these troublesome times, when economic conditions the world over are causing acute suffering, any line of reasoning that will tend to stiffen the morale, is surely welcome. Some comfort, perhaps, may be drawn from the fact that we in Canada are doubtless less affected than other countries, and if we can credit the utterances of many well-informed writers and public speakers, we shall be among the first of the nations to emerge from this depression. We are no doubt now paying the price of rather extravagant living, and the present is a very good time to take stock and to reconstruct our ideas in conformity with the fixed laws of economics. And we must consider not only material things, but also the matter of character and the true worth of the individual. The present is surely a testing time. Roy L. Smith, contributing a most helpful article in a recent issue of The Rotarian, says that while the financial conditions have upset our economic structure, the real values of life are unshaken and solid. We cannot do better than to quote his article in full, which is as follows:

"We have passed through a panic suffered from a crash on the stock market and are now more than half way through the depression, and I am still rich.

"It may be true that I have much less to live on than I had a year ago, but it is certainly true that I have just as much as ever to live for. The real values of life are unshaken and solid.

"The stock crash cost us much that we never had—paper profits which never got nearer our pockets than the financial pages of the daily papers. The market failed but nothing else did. Prices went down, but not one acre lost its fertility and all the electrons, protons and ether waves went on working in their accustomed ways.

"When the depression came I was compelled to take an invoice and soon discovered that I was still rich. All my capacity for the enjoyment of life was intact.

"The depression has not lowered the value of a single friendship. Neighbors still greet us in the same old, cordial way, business associates be[illegible] us and our sons hold us in high respect. The wife's welcome at the close of the day has not depreciated in the least and our daughters continue to lavish their affection upon us with the same old extravagance.

"My faith in the goodness of the universe is unimpaired. By that faith I am emboldened as I face defeat and despair. The prayers my mother taught me and the faith in God instilled in me by a devout father remain as priceless treasures no depression can touch.

"No nation becomes great by becoming rich. Neither does a man find enduring satisfaction in life by owning something—only by becoming something. The most degrading poverty is that which results from killing the spirit that the body may be served.

"This depression has cost us some of the things we created but it has robbed us of none of our power to create. We may lose some beautiful things, but we have lost no love of the beautiful.

"It is a challenge, not a catastrophe. A generation that has conquered the air and sent giant 'planes circling the globe, which has plunged into the deeps and disported on the ocean's floor, which has climbed above the clouds and lived in the stratosphere, is now faced with the challenge to rise above its dependence on mere things and seek an emancipation of the spirit of man.

"The last six months have been for many men a thrilling spiritual adventure through which they have discovered their real wealth. Bereft of dividends and profits they are discovering the sustaining powers of strong religious faith: the abiding value of courage, heroism, honor, clarity and trustworthiness.

"A financial crisis can wipe out profits and bring business to a standstill, but character is beyond its reach. It can rob us of all we have, but it cannot affect what we are.

"The investments we made in ambitious youth, hospitals, crippled children's camps, colleges and service institutions go on paying dividends. The deepest satisfactions of life—those which come from sharing and serving—remain secure.

"I am still rich because I am independently rich—none of my wealth depends upon business conditions or market reports."

Tar Sand Development

The tar sand development at Fort McMurray is proceeding satisfactorily, according to Dr. S. C. Ells, mining engineer of the Dominion Department of Mines, who passed through Edmonton, the other day, from Waterways, on a routine business trip to Ottawa. Dr. Ells, who has been conducting the tar sand development at McMurray for the past year, will shortly return to Edmonton and Fort McMurray.

A loud speaker that magnifies the human voice about 2,000,000 times, was successfully tested in London.

The forests of Canada are its second most important resource, exceeded in actual value only by farm products.

Douglas' Egyptian Liniment makes the finest blister known. Is valuable for stock. Leaves the hair roots in natural and healthy condition. Hair comes back. No scar remains.

Flags For All Occasions

In the matter of flags the Manitoba Free Press of Winnipeg is prepared for all emergencies. When the King and Queen of Siam recently visited the city the Siamese flag was flown in their honour, and there was no trouble in obtaining it since it was on their own flag stock. "Our flag lockers," E. H. Macklin, president and general manager, says "contains full-sized flags of all the different nations of the world, and these we fly from our courtesy flag staff on the occasion of national holidays of the different nations.

Dysentery Is a Very Dangerous Bowel Complaint

Dr. FOWLER'S EXT-OF WILD STRAWBERRY

Mrs. E. M. Ward, 627 Ave. H. South, Saskatoon, Sask., writes:—"When my husband was in France he took dysentery, and was in hospital over a year. Ever since he came back he has had the attacks three or four times a year. I cannot emphasize the good Dr. Fowler's Extract of Wild Strawberry has done for him. He generally takes a few doses and gets relief in a few hours.

"I cannot speak too highly of your excellent remedy, and you may be sure we are never without a bottle of it in the house."

Roads For Airplanes

Beam Like Searchlight Enables Pilots To Keep Their Bearings

In the near future aeroplanes may use roads or tracks just as motorcars and railway trains do today. The aeroplane roads will not be visible, but they will be there. They will consist of beams of unseen rays focused from one point to another just like the beam of a gigantic searchlight. An experiment with this new method of flying was made recently. At Manchester and Bristol transmitting stations are erected which send out wireless waves focused into a beam some four miles in width. The aeroplane contains receiving apparatus which indicates to the pilot any straying from his proper course. Starting from Bristol, an aeroplane can be certain of making its way direct to Manchester in the blackest darkness or the thickest fog. All that the pilot has to do is keep in the beam and to fly straight on. It will no longer be possible for pilots to lose their bearings.

NEIGHBORS TALK

"I am employed in a theatre and it is a problem to make ends meet, as I help support my mother and sisters. I like to dress well but haven't very much to spend on clothes. To give the appearance of variety to my slender wardrobe I change the colour of a dress or stockings as soon as the things become faded. I always use Diamond Dyes for the work — using them as dyes for dresses and as tints for stockings. I have always gotten such perfect results that our neighbors talk about the great number of new things I have.

"I learned about Diamond Dyes from our wardrobe mistress. She says she has tried all the dyes on the market but none do such splendid work and are so easy to use as Diamond Dyes. I understand they are the world's most popular dyes — and they deserve to be."

L.P., Montreal.

Telephone Line Completed

Flin Flon Now Has Regular Long Distance Service

The telephone line to Flin Flon, which will link the northern mining town with the outside world by regular long distance telephone circuit, has been joined by the "copper link."

For two months workmen have been engaged in erection of a pole line to the north, and final details of the project have been completed. Local people who spoke to Flin Flon citizens talked over the standard No. 10 copper wire. The cut-in was made without a hitch and connections were perfect.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Home-Grown Fruits

Demand In Winnipeg This Season Has Exceeded the Supply

The demand for home-grown small fruits in Winnipeg has been so brisk this year that dealers have not been able to meet all the requirements of patrons—this, despite the fact that growers within a radius of fifty miles of the city have made heavier shipments this year than at any time during the past five years.

Awful Asthma Attacks. Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

Aid For Orientals

Registration of Orientals for unemployment relief aid in the province British Columbia is to be permitted, it was stated at the legislative building. The question was considered at a meeting of the executive council and it was agreed that the Orientals out of work should share in unemployment aid.

Small Boy (who has been scolded by his mother): "I say, dad, we'd have had a fine time doing as we liked if you hadn't married mother."

New Canadian Stamps

Colour Had To Be Changed When Postage Was Increased

The increase in Canadian postage rates necessitated the changing in colour of the Canadian stamps. According to the regulations of the International Postal Union, of which the Dominion is a member, the stamp which will prepay an ordinary letter in each country must be red in colour. For that reason the two-cent Canadian stamp was red. When the rate was advanced to three cents, the three-cent stamp did the work formerly done by the two-cent, and therefore the new three-cent stamp was coloured red, the Canadian three-cent stamp corresponding to the United States two-cent and the British penny stamp. This facilitates the work of postal clerks, as they need only to look at the colour of the stamp to ascertain if the letter is sufficiently prepaid. Of course, during the present transition period, when there are some red two-cent and red three-cent stamps being used, the clerks are obliged to examine the letters to make sure that the three and not the two-cent stamp has been used. This change in colours necessitated a new colour for the two-cent stamp and that stamp has been issued as a brown stamp. It will be recalled that during the war, when postage rates were increased, there was a brown two-cent stamp with the "I.T.C." surcharge, and later a three-cent brown stamp was issued.

John Bull Keeps Cool

Does Not See Way Out But Knows One Will Be Found

Despite all appeals and warnings Britons seem to retain their customary confidence that everything will turn out right in the end. This is the attitude which returning travellers report that they have encountered in all parts of England. The people do not know exactly how they are to be pulled out of their trouble, but are positive that the thing will somehow be done. Dr. Johnson's saying of a certain writer that "he flounders well" might be applied to John Bull. He has, and he knows it, a way of floundering through. This is what keeps him calm when the visible facts might make others think that he ought to be frightfully agitated.—New York Times.

Reject Freight Rate Appeal

Board Of Railway Commissioners Hand Down Judgment In Coast Case

The Board of Railway Commissioners in a judgment handed down dismissed the application of the corporation of the City of Victoria together with the Panama Pacific Grain Terminals, Limited, for an export rate on grain by the Canadian Pacific Railways equal to that of the City of Vancouver.

The charge that the existing rates were discriminatory, upon which the applicant based its case, was unfounded, C. O. Fullerton, chief commissioner, stated in handing down his decision which was unanimously concurred with by the other two members of the board.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Sitka Spruce

Canada's average annual cut of Sitka spruce is approximately 90,000,000 board feet, of which a portion is used in the manufacture of pulp and paper. The trees are prolific in British Columbia where they grow to a great height and size.

WANT FURTHER FEDERAL AID FOR HIGHWAYS

Lucerne, Que.—The election of Hon. A. C. Stewart, Minister of Hightways for Saskatchewan, as president of the Canadian Good Roads Association; lengthy discussion as to the part urban centres should bear in the maintenance of the country's highways; a review of the tourist traffic and its consequent "invisible export" of Canadian scenery and pleasures, and a debate on level crossings, featured an active closing day of the Association's 18th annual two-day convention here.

Further Federal aid for the construction of highways and the elimination of level crossings was recommended in resolutions adopted by the association.

Taxation for commercial vehicles should be much higher, S. W. Fairweather, director of the Bureau of Economics of the Canadian National Railways stated. He sounded a warning against the country plunging too deeply into highways expenditures without making adequate plans for a return on the investment.

While the efforts of the Board of Railway Commissioners had improved level crossings conditions, a total of 341 railway crossing accidents had occurred in 1930 in Canada, and a total of 115 lives and 475 injured had resulted, Hon. Frank Oliver, advisory officer to the Board of Railway Commissioners, stated.

Subways and tunnels have been built where feasible and financially possible, and highways diverted to avoid crossing the right-of-way, he said. The Dominion still had, however, some 28,000 level crossings from coast to coast.

W. G. Robertson, manager of the Ontario Motor League, disputed a remark by Mr. Oliver who concluded that Ontario held the leadership in reckless driving. Two other provinces had a higher accident rate than had Ontario, Mr. Robertson said. The number of cars in Ontario, its larger winter mileage, its many tourists and the province's 7,000 level crossings were among the factors contributing to Ontario's accident total.

Other officers elected were: Hon. W. R. Hibbs, Minister of Public Works, Newfoundland, first vice-president; Hon. R. W. Bruhn, Minister of Public Works, British Columbia, second vice-president; Hon. Leopold Macaulay, Minister of Highways, Ontario, third vice-president.

New directors elected were: Hon. W. Finlayson, Minister of Lands, Forest and Northern Development, Ontario; Hon. Leonard MacNeil, Minister of Highways, Prince Edward Island; Mr. Justice Fullerton, Chairman of the Board of Railway Commissioners; Charles M. Black, President of the Royal Automobile Club of Canada, and J. L. Stewart, General Manager, Canadian Automobile Chamber of Commerce.

Coal From China

Protest Landing Of Cargo Is Made At Halifax

Halifax, N.S.—A protest against the landing of Chinese coal in Canada, was telegraphed to Rt. Hon. R. B. Bennett, Prime Minister, by Hon. W. A. Black, M.P., and Felix P. Quinn, M.P., Federal Members for this constituency.

The protest followed the announcement that a Norwegian freighter was on the way from Port Redon, French Indo-China, with a cargo of 4,000 tons of Chinese anthracite for sale in Nova Scotia and New Brunswick.

Escapes From Ice

Point Barrow, Alaska.—The Hudson's Bay Company trading steamer, "Baychimo," which for several days had been in danger of being crushed and beached, has escaped the clutches of the Arctic ice pack and headed southeast along the coast to safety.

Hudson's Bay Chief In West

Winnipeg, Man.—With the object of obtaining first hand information about the business of the company, Major Patrick Ashley Cooper, new governor of the Hudson's Bay Company, is in Winnipeg conferring with local executives of the company.

W. N. U. 1009

Plea For Independence

Mahatma Gandhi Voices Strong Demand For Self-Government For India

London, England.—Two hundred members of all parties in the House of Commons sat in the historic grand committee room at Westminster while Mahatma Gandhi, Hindu Nationalist delegate to the Indian Round Table Conference, voiced the strongest demand he has yet made for Indian independence.

Squatting in his homespun cotton robes with a group of followers, Gandhi, in easy conversational tones and a gentle voice, declared he would be satisfied with nothing less than complete independence. Safeguards proposed in the draft constitution drawn up by the first conference — such as British control over Indian defence, foreign policy and finance—were unacceptable, he said. But India's complete independence would not exclude partnership with Britain on a bas's of equality,, he added.

"I will not accept the husks of independence, carrying with them safeguards and reservations," he said. "Rather would I declare myself a rebel . . . . thousands of Nationalists have shed themselves of the fear of death."

Mr. Gandhi spoke for an hour and 45 minutes. Later, when questions were rained upon him by the members, his sense of humour won him sympathy. To one member who wanted to know what the word "mahatma" meant, Mr. Gandhi answered. "It means an insignificant person." The chairman explained the term meant "the embodiment of a great soul."

Among Gandhi's audience were Miss Megan Lloyd George, James A. de Rothschild and two members of the old Labour Cabinet, Rt. Hon. J. R. Clynes, and Rt. Hon. Tom Shaw.

Many Returning To Britain

More Inward Bound To Old Country Than Going Out

London, England.—For the first time in history—except during the war—more people are returning to Great Britain from the Dominions than are emigrating to them, the "Overseas Settler," organ of the Overseas Settlement Committee, points out.

During the year ending June 1931, there was an outward balance of settlers from Britain to the Dominions of only 200, and the outgoing persons exceeded returning ones only in the case of New Zealand. Figures from all the other Dominions showed an inward balance.

In the same period the total British emigration to all parts of the Empire was 38,000 compared with 80,000 in the preceding year.

And many Britons who settled in the United States since the war are returning to Britain, the "Overseas Settler" added.

Armaments Truce

London, England.—The British attitude toward the Italian proposal for an armaments truce is a favourable one, Rt. Hon. Stanley Baldwin, acting head of the National Government in Premier Ramsay MacDonald's absence, told the House of Commons. Viscount Cecil of Chelwood, at Geneva, had been given instructions that he could agree to naval proposals subject to their acceptance by all other powers, Mr. Baldwin said.

Search For Cramer Continues

London, England.—Hope that Parker D. Cramer, United States airman, who was lost on a flight from Detroit to Copenhagen, remains alive lingers. The British Broadcasting Company has appealed to ships in North Sea waters and residents of the barren Orkney and Shetland Islands to keep a sharp watch for Cramer and his radio operator, Oliver Pacquette, as they might be on an unhabited island.

People Live Longer

Kansas City, Mo.—W. B. Jones, Pittsburgh, secretary-treasurer of the Association of American Cemetery Superintendents, said here that the depression had struck cemetery men as well as others. In times of depression, he declared, people eat and drink less, so live longer.

Japan Withdraws Troops

Tokyo, Japan.—Japanese occupation of positions outside the south Manchurian railway zone has been halted, the foreign office announced, and withdrawal of troops is under way.

SKY ROCKET

Travelling faster than man has ever done before is not fast enough for Flight Lieut. G. H. Stainforth (above), of the British Schneider Cup team, who recently averaged 386 miles an hour over a three kilometre course, and he will shortly attempt to establish a speed record which will stand for a number of years.

Would Ship Wheat To China

Proposal Made To Dispose Of Surplus Wheat On Credit

Victoria, B.C.—That Canada ship its surplus wheat to China and take a chance on receiving payment for it later, when China is in better financial shape, is the proposal advanced here by Hon. William Atkinson, Minister of Agriculture. Mr. Atkinson will discuss his plan with the Dominion Department of Agriculture shortly.

"We find in the world today," Mr. Atkinson said, in making public his proposal, "an appalling situation. The wheat producing nations, Canada particularly, are embarrassed by huge surpluses of wheat and yet in China, according to latest reports, millions will starve to death during the coming winter.

"Apart from the moral aspect of the question which is important, it seems to me that this is an absurd position from an economic standpoint. That is to say, we can not use our wheat and it is doing us no good lying in elevators. If we could dispose of it, however—if we could get anything for it at all—we should clear the way for the sale of the next crop at least.

"The obvious thing, it seems to me, is to ship our surplus wheat to China and take China's note in return for it. We might be some time getting all our money, but we could not help being better off than we are now, with our grain choking the channels of business.

"Another important point, too, is that if we unloaded our wheat surplus in China now, we would create a wheat appetite among the Chinese. We would be building up a huge potential market for our grain."

Retrial In Kern Case

Moose Jaw, Sask.—Retrial of J. H. Kern, Sr., J. H. Kern, Jr., and D. K. Horne on charges of conspiracy to defraud was ordered in court of King's Bench when the jury brought in its final verdict of disagreement. The case will come up at the next jury sittings of King's Bench court in this city, next January.

To Secure Evidence

Raid Conducted In Ontario On Motion Picture Concerns

Toronto, Ont.—Books and papers of seven motion picture companies, named by Peter White, K.C., as being members of an illegal combine, were seized here in a raid conducted by a combined force of provincial and city police. The seizure followed announcement by Hon. W. H. Price, Attorney-General of Ontario, that the province would prosecute several motion picture corporations in connection with the alleged combine.

Offices of the Canadian Paramount Corporation, Famous Players Canadian Corporation, the Bloom and Fine Theatres, Regal Films, Ltd., and Exhibitors Distributing Co., Ltd., were among those visited by police.

Seizure of the books and papers was merely carrying out necessary details in securing evidence in connection with the impending prosecutions, Col. R. H. Greer, K.C., who will conduct the prosecution for the province, explained. There were no objections raised to the seizures in any of the offices.

Prosecution is scheduled to commence October 5 at the fall criminal assizes, with several other provinces co-operating with Ontario in the action.

Indictments are at present in the course of preparation and counsel have been instructed to move at once to bring the cases before the assizes.

Both the provinces of Alberta and Saskatchewan will, it is understood, co-operate with Ontario in one set of prosecutions against the alleged combine.

Some 20 companies are affected by Ontario's action. All these were named by Commissioner White as parties to the combine.

Japan Shaken By Severe Earthquake

Houses Collapsed and Telegraph Lines Put Out Of Commission

Tokio, Japan.—Mid-Japan has been shaken by another severe earthquake which caused 14 deaths and injuries to 60 in Saitama and Gumma prefectures alone.

In Saitama prefecture 150 houses collapsed, including the famous temple of Hikawa in Humagai.

Landslides interrupted rail travel on various lines and 17 telegraph and telephone trunk lines were put out of commission, cutting off communication with Kobe, Dairen, Kumamoto and Hakodate.

Seismologists said the 'quake was the most severe this year.

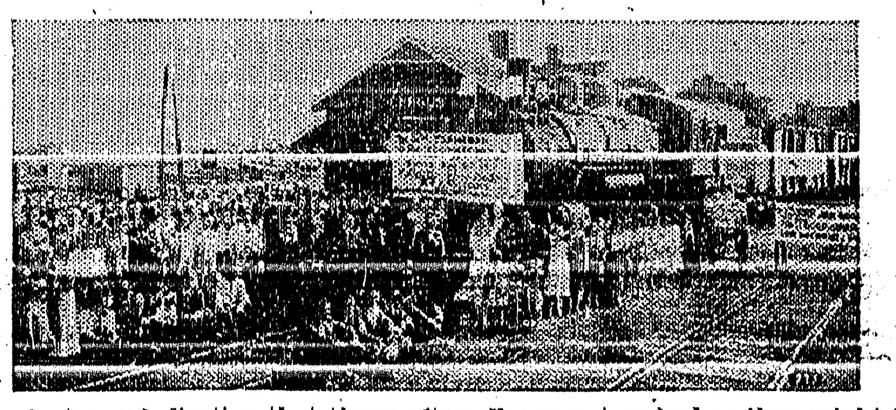
Children Perish In Fire

Six Burned To Death When Farm House Destroyed

Hague, Sask.—Six of the nine children of Mr. and Mrs. John P. Unruh, of Hague, Sask., were burned to death when their farm home was destroyed by fire. Three of the children managed to escape from an upstairs window, but apparently the fire had overcome the others, who ranged from one year and ten months to 13 years of age.

The bodies of the six little victims were practically reduced to ashes. Four of the children had apparently huddled together as their remains were discovered in a heap while another was found at one side and the baby had been burned to death in her bed.

Who Said Depression?



A strong indication that times after all, are not as bad as they might be was recently given at Fergus, Ont., when a train of 27 cars pulled out of the Canadian Pacific Railway Station, carrying products of Beatty Bros., Limited, manufacturers of electric washing machinery. With all the talk about "produced in Canada goods" and employment for Canadians, the event, which has become one of the town's regular events of recent years, was this year vested with special interest and the employees of the plant and the townsfolk in general turned out to cheer the train as it sped away to distribute its freight from coast to coast throughout the Dominion.

GENERAL SMUTS PICTURES A NEW ERA OF SCIENCE

London, England.—A tremendous ovation was accorded General the Rt. Hon. Jan. C. Smuts as he entered the Central Hall at Westminster to deliver his presidential address, opening the centenary meeting of the British Association for the Advancement of Science. General Smuts, distinguished South African soldier, statesman and scholar, was accompanied by several renowned past presidents.

The hall was filled to capacity and three overflow halls were also jammed as General Smuts furnished a "Scientific world picture of today" in which he set the keynote for one of the greatest gatherings of scientists the world has ever seen.

General Smuts saw a new era of science which scraps materialism and may surpass religion in ethical uplift. He showed how recent scientific discoveries point to evidence the material objects recognized by man's senses are in their origins as immaterial as thought or mind, and that both materials and thought seem to go back to some principle of not-yet-understood unity, which he named "holism."

"The new concept has made it possible to construe matter, mass and energy as but definite measurable conditions of the curvature of space time," General Smuts declared. "We may say that matter and energy will have disappeared as independent entities and will have become mere configurations in space-time.

"The space-time world, however novel, however shattering to common sense, is not in conflict with reason. Indeed, the space-time world is largely a discovery of mathematical reason and is an entirely rational world."

But in the new scientific drive General Smuts said, it is recognized the world consists not only of electrons and radiations, but also of souls and aspirations. Beauty and holiness are seen as much aspects of nature as energy and entropy. "We seem to have passed beyond the definitely physical world into a twilight where prophysics and metaphysics meet; where space-time does not exist and where strictly casual law in the old sense does not apply."

"It may fairly be said science is perhaps the clearest revelation of God to our age," General Smuts also told his great audience. "While religion, art, and science are still separate values they may not always remain such. A serious lag has already developed between our rapid scientific advance and our stationary ethical advance, a lag which has already found expression in the greatest tragedy in history.

"Science itself must help to close this dangerous gap in our civilization which threatens the disruption of our civilization and the decay of our species. Its final and perhaps most difficult task may be found just here. Science may be destined to become the most effective drive toward ethical values and in that way render its most priceless human service. In saying this I am going beyond the scope of science as at present understood.

"The ancient spiritual goods and heirlooms of our race need not be ruthlessly scrapped. The great values and ideals retain their unfading glory and derive new interest and force from a cosmic setting."

British Motion Pictures

Toronto, Ont.—Wider distribution in Canada of produced-in-Britain moving pictures is promised by N. L. Nathanson, recently returned from a two-months' tour of England. Mr. Nathanson was not prepared to announce he had completed any arrangement with British production companies, but he indicated the probability that his organization would effect a closer alliance with British producers.

May Have Winter Train Service

The Pas, Man.—Churchill this year will be linked with the outside world by a train service throughout the winter, it was learned unofficially here. Once a week over the frozen tundra that stretches along the 500-mile bay line from here to the new bay port, engines will plow through the snow to bring mail and supplies to the few that will remain at Churchill throughout the winter.
