THE CRESTON REVIEW

VOL. XVIII. CRESTON, B. C., FRIDAY, SEPTEMBER 17, 1926 No. 31

Kitchener

R. Maxwell, Premier garage, Creston, made a business call here on Tuesday, fixing the electric light at the Russel Hotel.

Elmo Walby and Alex. Menuie left on Monday by car for Dorr, where they will resume work after an absenec of over a month.

Misses Clara Hunt and Mildred Andeen were home from Creston over the weekend.

Miss Marguerite Crawford of Division 2 of Kitchener school, spent the weekend at her home in Creston.

Miss Helen McRoob of Canyon spent the weekend at the home of Mr. and Mrs. Walter Walby, and while here took in the dance. She left for home on Sunday.

Dan McDonald of Yahk spent the weekend at his home here, returning on Wednesday—staying to vote on the 14th.

Jim and Jack Dodds and Ray McKelvey have completed their contract of getting poles Page & Hill Cedar Company of Spokane, and left for their homes at Erickson on Monday.

Those who made the trip to Creston on business on Tuesday were Misses Esther Nelson, Edith Geroux, Mrs. D. McKee and Dick Joyce, Bill Arb, Ray Mckelvey and Jack Dodds.

Jack Hanson made a business trip to Creston on Monday.

Miss Mary Haptonstall of Creston is back on McConnell Hetel staff, Miss Louise Pendry, who took her place for over a month, has returned to her home in Creston.

The dance held in Hunt's Hall on on Saturday night was well attented, and everyone seemed to enjoy themselves. The muscic was good. Next dance on Saturday, Sept. 25th.

Mr. and Mrs. D. Lindbloom have moved in to town from the Continental Lumber & Pole Company mill, and have taken up residence on Bennett Avenue.

A. LePage and Donald Young came down from Iron range at the first of the week, and are remaining to mark their ballots on the 14th.

Alex. Ellis left for Nelson on Friday, where he has secured work, and will be missed by the young people as he has been here for a considerable length of time, and had many friends.

Misses Beatrice Molander and Edith Geroux and Messrs. F. Valerino, M. H. Brogan and J. McInnis made up a motor party to Creston on Sunday.

Mr. and Mrs. B. Johnson and son, Robert, Mrs. G. A. Hunt, Miss Grace Rendall and E. B. McFarlane motored to Creston on Sunday evening, taking Misses Clara Hunt and Mildred Andeen back to high school work at Creston.

Mack Brogan, Frank Valerino and Jim McInnis of Yahk spent the weekend here on a visit with friends.

Mr. and Mrs. Carl Arderson and son, Selmer; A. LePage and Donald Young made up a motor party that visited Creston on Monday.

F. B. Scott, C.P.R. telegraph inspector, Nelson, was a business visitor here on Wednesday.

E. W. Thomas of the Bank of Commerce staff, Creston, paid us a business visit on Thursday.

G. E. Lakan and E. R. Chase were business visitors here from Spokane on Thursday. J. E. Whitford, travelling man for spices, was a business visitor here from Cranbrook, Friday.

Mrs. Fennessey, daughter and son, Jessie and Earl, and Miss Eva Watson were here on Saturday from Cranbrook on a xisit with Cliff. Fennessey. They motored in, and returned on Sunday.

O. J. Oselin, timber inspector, Nelson, was a business visitor here on Monday.

Election day passed off very quietly. A. G. Strudwicke was in charge of the poll, with E. B. McFarlane as clerk. The scrutineers were Harry Redmile and Wm. Arb. The vote was Esling 62, Gale 24—the Tories having ten votes less than in 1925.

Jas. McGovern, manager of the Kitchener Hotel, took the election seriously and was one of the first to cast his vote—in other words, to make the cross—when the poll opened.

Lister

W. A. Harrison, representing the A. MacDonald Company of Nelson, was a business visitor here this week.

Beekeepers are busy at present with honey extraction, and reports would indicate that while the yield is fair, still it is not up to the standard of other years.

Miss B. Dimjock of Walla Walla, Wash., who has been here on a visit with her uncle, John Finlay, leaves this week on her return home, and is accompanied as far as Kingsgate by Mr. Finlay.

John Bird is leaving this week for Cranbrook to undergo medical treatment, which is likely to include an operation for appendicitis at St. Eugene Hospital. In his absence the store and postoffice is in charge of Mrs. Harold Langston.

An event of intrest to Lister people is announced to take place at Cranbrook on the 15th, when Miss Jennie, second daughter of Mr. and Mrs. Bert Yerbury of Lister, becomes the bride of Mr. Pat Holland, an employee of the Consolidated Company at Kimberley. Miss Annie Yerbury is to be the bridesmaid, and after a wedding trip to Spokane, Mr. and Mrs. Holland will reside at Kimberley.

Election day was quiet at Lister, the standing Esling 38; Gale 18, which shows a gain of one vote for the Liberals and a shrinkage of seven on the Conservatives, the vote a year ago being 45 to 17. R. T. Millner was in charge, with Jas. Duncan as clerk, and Messrs. John Bird and John Huscroft scrtineering.

Sirdar

Mrs. Tanner and son, Eddie, who have been here for the past two months, returned to their home in Calgary, Alberta, on Friday.

Miss Goodman of Cranbrook spent a couple of days here last week with her sister, Mrs. R. C. Proctor, leaving later for Nelson for a visit with anothsister, Mrs. Frank Bamford.

Mrs. Hugh Taylor of Creston was a weekend visitor with Sirdar friends, the guest of Mrs. T. Rogers.

There is now a second beer parlor in the district, S. Bysouth getting his license last week, and opening for business at Kuskanook on Friday.

Miss Marion Swanson, who has spent the summer with her parents at Kimberley, went through on Wednesday on her return to Vancouver, where she is attending B. C. University.

Mrs. Clarence Holden, nee Hazel McLellen, of Kimberley, is a visitor with her mother, Mrs. Ike Lewis, and was shaking hands with Sirdar friends this week.

But 40 votes were polled here on Tuesday and of these Esling, Conservative got 27, and Gale, Liberals 13. At the election last October the total vote was 49, of which the Tories got 27 to 22 polled for the Farmer-Labor candidate.

Messrs. Sid McCabe and E. J. Brawn arrived home on Saturday, accompanied by Mr. and Paget of Windermere, in whose auto they travelled, with Mr. and Mrs. Paget guests of Mr. and Mrs. McCabe. They left for home on Tuesday, but the former two remained here until Wednesday.

Mrs. C. M. Loasby and Mrs. E. Martin are just back from their ten weeks absence during which time they spent almost two months sight seeing in England, Ireland, Scotland and France, as well as making a short visit at Ottawa and Montreal. En route home Mrs Martin also visited at Portage la Prairie, Man., and Coleman, Alberta. For the most part the weather was ideal and both thoroughly enjoyed a very busy holiday.

Esling is Winner; King Govt. Wins

In the Dominion election on Tuesday W. K. Esling, Conservative, was again elected to represent West Kootenay, and the King Government—after being out of office about ten weeks—have been returned to power with sufficient supporters to make it look reasonably certain they will be able to carry on for the full term of four years. Returns are not yet complete in this riding, but Esling's majority will be well over 900.

A comparison of the voting this year, with that of October, 1925, when L. W. Humphrey, Farmer-Labor, opposed Mr. Esling, reveals the fact that Creston Valley has not changed its political allegaince to any noticeable extent. A year ago in a total vote of 885 Mr. Esling had a majority of 258. This year, with 925 votes cast his majority is 249. Following are the figures of Tuesday's voting:

Sisdar	27	13
Wyndel	59	54
Kitchener	62	24
Lister	38	18
Creston	268	138
Canyon City	70	19
Erickson	44	50
Reclamation Farm	16	12

The features of the vote were the gains made by the Liberals at Wyndel, and the gain of the Conservatives at Canyon City. At the other polls pretty much the same majority previaled as in 1925, with a smaller vote at Sirdar, Kitchener and Lister, but a considerably heavier poll at Reclamation Farm.

Due to the very busy season there was little or no stir in town, most of the electors just staying long enough to mark the ballot and get back to work. In the evening the Liberals received the returns in the old Speers' Hall and the Liberal win of Canada enabled them to make the biggest display of enthusiasm. The Conservatives congregated in Trinity Church basement and got considerable "kick" out of Mr. Esling's return, but were not quite so happy as the evening wore on and the return of the Liberals to power became assured.

Nelson Fair Next Week

Visitors to the 24th annual fair at Nelson will receive a pleasant surprise when they witness the exceptional program of attractions that have been provided by the directors for the entertainment of their visitors.

The Midway, without which no fair is a success, will again this year be provided by the Conklin & Garrett "All Canadian Shows" under the auspices of the Nelson Gyro Club. These shows are greatly enlarged this year and are carrying several riding devices and numerous side shows.

The free vaudeville attractions, which have this year been booked through the Western Vaudeville Managers' Association of Chicago, comprises some of the foremost acts of their kind playing the larger fairs on the American continent, and without doubt the program is of exceptional merit, and one that is seldom seen outside the larger centres. Each act is a headliner and has been carefully chosen by the directors of the fair to provide an evenly balanced program.

The Famous Valentinos, a three-act combination, comprising six people, will present twice daily in front of the grandstand an amazing performance of skill and daring intermingled with sidesplitting comedy that has won the plaudits of hundreds of thousands at some of the largest fairs and expositions in the United States and Canada during the past few years.

The Esther Four; the nearest description of this troupe would probably be the "Dancing Acrobats," an importation from Europe, composed of two men and two dainty ladies, who introduce many new and novel dance features in acrobatics. Their offering is replete with thrills and beauty, and will prove to be one of the outstanding performances at the fair.

The Three Original Regals, world's famous athletes, are a trio of finished performers. In a blacksmith setting they will be seen in a series of amazing strong man feats. This act will prove a real novelty and is a wonderful exhibition of real feats of strength.

The exhibits of fruit, vegetables, etc., promises to excel that of previous years, whilst the fisheries exhibit, which has at the last two fairs proved a great attraction, will be again seen at this year's fair, housed in a special tank provided at great expense to show this splendid exhibit at its best.

The C.P.R. is offering reduced rates to Nelson Fair, the dates of which are September, 22, 23, 24.

Erickson

Mrs. G. Cartwright was at Crawford Bay last week judging at the annual fall fair, and this week she has done similar duty at Boswell and Cranbrook. She speeded up operations at Boswell sufficiently to get home in time to vote, however.

Frank Palmer arrived home on Saturday from Nelson, where he was a hospital patient the past month with a broken leg. His injury is mending satisfactorily.

Rev. Mr. Healy and family, residents here up till about eleven years ago, and owners of the ranch occupied by Fred Davie, were visitors here at the end of the week. He is looking for an improved ranch to rent.

W. V. Jackson left at the end of the week on a nursery selling trip in the Arrow Lakes country and as far north as Revelstohe.

Miss Annie Fraser of Cranbrook is a visitor here at present, a guest of Mrs. Maxwell.

Miss Beth Putnam, a Cranbrook hospital patient for the past month, is making such satisfactory progress that she is expected to arrive home at the end of this week.

Shipping out of Erickson is averaging three carloads a day. Eighteen cars went out last week.

95 votes were cast at Erickson at the polling on Tuesday with Mr. Gale taking 50 and Mr. Esling 45. In the voting a year ago 79 votes were cast. L. T. Leveque had charge of the ballot box, with J. B. Holder as clerk, and F Palmer and R. Thurston scrutineers.

The Valley lost a much respected family in the departure his week of Mr. and Mrs. Mike McCarthy, and Miss Connie McCarthy for Vancouver, where they will make their home in future. They have been Erickson residents for the past seven years and for a dozen years before that had a ranch at Creston.

Appreciate New Road

The first link of the scenic and high water road in West Creston, going south to connect with the Klockmann highway through to Porthill and Bonners Ferry has been built. This road has been needed for years as it practically now opens up the way to some of the best farming and well watered land in West Creston, comprising the Urmiston, Faas, Wilson, Carruthers, and the Mrs. Geo. Laurie holdings, nearly all of which have the advantage of frontage on the flats and through which this highway will pass. This road has been held back for years on account of parties representing that the cost of building this piece of road would be prohibitive. However Engineer Ramsay and road superintendent Davies looked the road well over this spring and decided to make the attempt, with $1000 appropriated for the first mile leading to the O. C. French ranch, which is considered the most difficult of the whole four miles. Louis Leamy was placed in charge, and under his efficient management and with an able crew of workers the supposedly impossible was accomplished in less than three weeks' time, and a good nine-foot road, not over three per cent. grade—with the exception of one short hill which is about seven per cent.—has been built, over which a car can travel without the difficulty of meeting with the muhdoles on the flats.—Com.

Canyon City

Mrs. Cook and daughter, Lily, left at the end of the week for Calgary, Alberta, where Mr. Cook is at present employed and where they will visit for a few weeks.

Pete Demers returned a few days ago from the hospital at Cranbrook, where he has been a patient for a time past. His condition shows some improvement.

The first frost touches of the season were reported from the sections over the hill on both Sunday and Monday mornings.

Canyon is glad io have back as residents again Mr. and Mrs. Andy Wickholm, who are occubying their ranch, after a year's absence in charge of the Tourist restaurant at Kitchener.

T. Hickey left at the first of the week on a business trip to Nelson.

George Strong received word last week of the sudden death of his brother, Rev. William Strong at Tacoma, Wash., who dropped dead while officiating at service on Sunday, September 5th.

The Ladies' Community Club is putting on a dance tonight, 17th, in the hall, with Mrs. Lister's music, with a charge of $1 to men, and 50 cents to ladies.

Canyon is to be favored with a return visit from Miss Siegel, the talented Calgary entertainer, on Tuesday, 28th, at the church, with popular prices of admission.

Pastor F. Harback, who has been in charge of Canyon United Church for the past year, will take his final service here on Sunday evening, September 19th, and will leave almost immediately for a short vacation at his home at Vulcan, Alberta, before resuming his studies at Robertson College, Edmonton. In addition to being a successful pastor Mr. Harback has been a tireless worker in the community life generally, and his departure will be regretted.

Election day passed off without incident and the vote cast is a very good one considering the very busy season. H. Young had charge of the ballot box, with Geo. Davie as clerk. The vote stood 70 for Esling and 19 for Gale, which is a Conservative gain as the vote last year was Esling 55, Humphrey 29.

Canada's Gains and Losses

Proportionate to its population Canada now has the largest favorable trade balance of any country in the world. During the fiscal year ended March 31, 1926, while imports of goods into Canada substantially increased, the export of Canadian products and manufactured articles increased to a far larger extent, with the result that during the year exports exceeded imports by the huge sum of $401,134,405. This is the largest favorable trade balance in the history of the Dominion except in the last of the war years, 1918, when enormous exportations of munitions and other war supplies at high war prices took place.

During the last fiscal year Canada not only enjoyed a favorable trade balance within the British Empire, but it also had a favorable balance with foreign countries, the adverse balance with the United States being more than offset by favorable balances with other foreign countries. The total of Canada's foreign trade last year was $2,255,939,869, or about $250 for every man, woman and child in the Dominion.

It is this large favorable trade balance which has contributed so largely to the improvement in Canadian exchange and placed the Canadian dollar at a premium in the United States as well as in other countries. It is a sign of the returning prosperity so strikingly in evidence throughout the country at the present time and a promise of further advances in the future.

But while Canada is thus making really remarkable progress in the markets of the world, it continues to suffer heavy and quite unnecessary and preventable losses at home. Of first importance, because it is the most serious, is the unnecessary loss of life from wholly preventable causes. In previous articles in this column reference has been made to losses sustained through disease which could be avoided by the exercise of proper precautions. Attention at this time may well be directed to the increasing list of killed and seriously injured for life as a result of reckless automobile driving. The newspapers are full of accounts of fatal motor accidents, nearly all of which could have been avoided by the exercise of ordinary care. Recently the Railway Commission of Canada issued a bulletin dealing with only one cause of such accidents, namely, the dangerous practices of motorists and drivers of other vehicles at railway crossings. This bulletin records the fact that the Canadian National and Canadian Pacific railways together reported 363 cases of gross negligence by motorists at grade crossings within the last twelve months, and these cases did not cover all crossings, but only a selected few.

One citizen is of much greater value to Canada than many thousands of dollars worth of foreign trade. Each life lost to Canada is a heavy economic loss to the country.

Another source of loss is brought to public attention every summer when the papers are filled with reports of disastrous forest fires in which the growth of centuries is wiped out and untold millions of dollars of timber destroyed. Some of these fires are started by lightning or other natural causes, but many are the direct result of carelessness on the part of campers and others.

It is not through forest fires alones that Canada suffers. The fire fiend is at work throughout the Dominion every day in the year, with the result that the per capita fire loss of Canada ranks among the highest in the world. Taking Canada as a whole, the annual fire loss is slowly decreasing, having dropped from $54,390,000 in 1922 to $48,282,000 in 1923, $45,906,000 in 1924 and $40,712,000 in 1925. But this decrease has been largely effected in Ontario and Quebec, the decrease in the former province in the four years being over $8,000,000 and in Quebec nearly $4,000,000. The record of the four Western Provinces offers an unfavorable contrast. Fire losses west of the Great Lakes were $11,768,000 in 1922, rising to $13,865,000 in 1923, $13,672,000 in 1924, and $12,508,000 in 1925. Saskatchewan, Alberta and British Columbia all sustained heavier fire losses in 1925 than in 1922, while Manitoba showed a decrease.

The besetting sins of far too great a proportion of people in this age and country are wastefulness, carelessness, recklessness, culminating in a disregard for consequences, and inevitably resulting not only in individual and national economic loss, but in untold suffering and much loss of life.

The British Temperament

Important Facts Which Stand Out In Connection With the Recent Strike

Two great facts in connection with the general strike should be appreciated by people overseas. The first is that the ideas of the great mass of British citizens are sound, sensible and moderate. Sooner or later resort is bed to reasoning rather than to violence; wherein is seen the fundamental difference between the British temperament and that prevailing in certain other countries. The second fact is that in defence of common rights and privileges, all classes will at once unite. Our love of liberty and justice, our pride in the British traditions and ideals, make highly repugnant to us the usurpations of dictorial minorities.—Empire Mail.

Veterans On the Land

Soldier Settlement Scheme is Showing Good Results

Of the $100,000,000 advanced by the Federal Government to veterans of the great war placed on farming land, $30,000,000 has already been returned to the Dominion's treasury, according to Major John Barnett, of the soldiers' settlement board. Major Barnett further stated that the government's scheme was showing promising results and that 30,00 0ex-soldiers were now helping to cultivate Canada's vast farming areas.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening and stimulating medicine, correcting the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Fickle Fashion Affects Trade

That the instability of industries may often be attributed to fickleness of fashions is evidenced by the fact that shingling has, naturally, killed the hairpin trade, and seriously reduced hairbrush sales. Owing to the "slip-on" dress, button makers have seen dwindling profits for the last three or four years, whilst hooks and eyes have vanished, of course.

Minard's Liniment for all pains

Record Trade Balance

Largest Trade Balance Per Capita of Any Country in the World

Canada now has the largest favorable trade balance per capita of any country in the world.

For the fiscal year ended March 31, 1926, Canada's favorable trade balance amounted to $401,134,405, an increase over the previous year of $116,705,299. Only on one other occasion was the Dominion's favorable balance as large, namely, the war year 1918, when it amounted to $662,637,214. Among the principal exports are agricultural products which for the 12 months under review totalled in value over $600,000,000. Of this amount grain and grain products accounted for $494,842,476, most of which were the products of the fertile farm lands of Western Canada, where about 100,000,000 acres still await cultivation, of which 25,000,000 acres are near railways and markets. Many of these lands can be bought at prices ranging from $15 to $20 an acre.

Ship Alberta Coal By Water

Claim Saving of $3.50 on Coal by the Lake Route

An appreciable reduction in the cost of delivery of Alberta coal to the Ontario consumer can be effected by the employment of waterbound carriage, according to the claims of a deputation from Owen Sound, Ontario. Headed by M. R. Duncan, ex-C.P. for North Grey, which waited on Premier Howard Ferguson to urge the government to make representations whereby the claims will be investigated by the federal authorities before any report is filed on the haulage rates in question.

It was stated that by shipping Alberta coal by water, the price "laid down" in Ontario would be $11.50 per ton, whereas, under the train haulage arrangements which prevailed last winter, the cost would be about $15 per ton.

Neuralgia Conquered
Its Pain Destroyed
Magical Results Come When You Apply
NERVILINE
It Acts Quickly
Mr. W. T. Greenway, formerly connected with the Guide newspaper staff, has written: "For twenty years we have used Nerviline in our home, and not for the world would we be without it. As a remedy for all pain, earache, toothache, cramps and disordered stomach, I know of no preparation so useful and quick to relieve as Nerviline." Remember this, wherever there is pain, rub on Nerviline, and you will get prompt results—35c at all dealers.

May Visit Australia

Premier Stanley Bruce, of Australia, declared that arrangements were nearly completed for the visit of a member of the royal family to perform the ceremonies at the opening of the parliament in the new capital, Canberra. He anticipated that the Duke of York would visit Australia for the purpose.

Nothing as Good for Asthma. Asthma remedies come and go but every year the sales of the original Dr. J. D. Kellogg's Asthma Remedy grow greater and greater. No further evidence could be asked of its remarkable merit. It relieves. It is always of the same unvarying quality which the sufferer from asthma learns to know. Do not suffer another attack, but get this splendid remedy today.

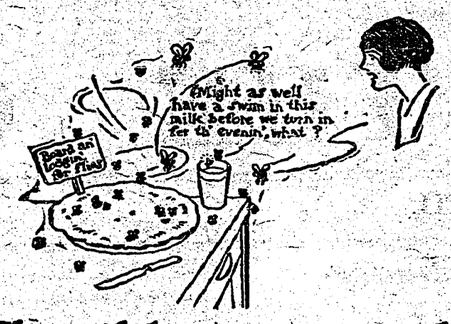
Four Months' Immigration

An Increase of 81 Per Cent. Over Figures For Last Year

A compilation of immigration to Canada for the first four months of the calendar year 1926 shows an increase of 81 per cent. over the same four months in 1925. The actual figures are 39,442 in four months of this year compared with 21,776 in the same period a year ago. There have been increases in every month of the year ranging from 16 per cent. in January to 132 per cent. in March. For the four months in question British immigration increased from 9,319 to 13,923; immigration from the United States increased from 4,778 to 5,797, and from other countries increased from 7,679 to 19,722.

The pulling power of an ordinary railroad engine equals that of 900 horses.

Minard's Liniment for Sore Feet



Do flies like your cooking?
REMEMBER, flies are more than troublesome. They come from filth to food. Get rid of them with Flit.
Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.
Kills All Household Insects
Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.
Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills *all* the insects—and does it quickly. Get a Flit can and sprayer today.

Battle With Sharks

Seaman Falls Overboard in Tropical Sea and Has Thrilling Adventure

A thrilling story of a two-hour fight for life against sharks and birds of prey in the pitch darkness of a tropical sea at midnight was told by officers of the British steamer Ripley Castle.

The big freighter was just south of the equator bound from Philadelphia to Capetown when Tony Madison, 26-year-old seaman, lost his balance and fell into the water.

In the darkness his fall was unobserved and he was not missed until an hour later when the ship put about and slowly retraced its course.

In the morning, faint cries were heard. Two buoys with flares were tossed overboard and Madison was seen struggling in the water. When the seaman was pulled aboard, both legs were bleeding from shark bites and his face was torn and pecked by great birds which had swarmed down on him.

A Youthful Candidate

Farquhar R. Oliver, of Artemsia Township, Ont., who has been nominated in South Grey as the Progressive candidate for the Ontario Legislature, is known locally as the boy wonder in the political world. He is only 21 years of age but has already had considerable campaigning experience as lieutenant to Miss Agnes MacPhail in her last race for the House of Commons. Young Oliver is a nephew of Premier John Oliver, of British Columbia.

One trouble with the "still small voice" is its emphatic way of refusing to keep still.

Enlarge Oil Refineries

The Alberta Refineries, Ltd., one of the newest of Edmonton's industries, announces that it will double its oil refining capacity.

HAD NO APPETITE
WEAK AND DIZZY
This New Brunswick Woman Restored by Dr. Williams' Pink Pills
Mrs. James Belyea, Brown's Flat, N.B., says:—"I am writing to tell you the great good I had through the timely use of Dr. Williams' Pink Pills. My health had failed and I was troubled with great weakness. I had no appetite and frequently had dizzy spells. The least exertion would make my heart palpitate violently and I felt tired at all times. I had doctored a great deal without getting much relief, and was feeling greatly discouraged when I finally decided to try Dr. Williams' Pink Pills. The happy results following the use of this medicine can best be summed up by saying that I am again perfectly well, able to do my housework and enjoy life once more. I feel it a duty to recommend Dr. Williams' Pink Pills to all weak people."
If you have any, or all, of the symptoms above noted, do not delay, begin treatment at once with Dr. Williams' Pink Pills. You will be surprised to note the improvement in your condition after a few weeks. You can get these pills through any dealer in medicine or by mail at 50 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont. If you will send your name and address a little booklet, "Building Up the Blood," will be sent free.

The man who keeps an eye on the line separating obstinacy from independence will save himself a lot of trouble.

Guards Flavour Of Your Meat
Strong in fibre—yet light in weight—Hercules and Ajax wrappers are exactly what every butcher requires. Either of these waxed papers does double duty—resisting moisture and grease—protecting the flavour of your meat.
By using Appleford wraps you impress customers with your standard of cleanliness. You save money because no inside waxed sheet is required. Ask for our prices.

Millions Are Lost Annually In The Western Provinces Through Lack of Research Work

The lamentably apathetic attitude of this country toward scientific research is frequently pointed out. Lack of necessary research assistance for industry is a standing subject with the Canadian Manufacturers' Association; it was referred to again at the recent annual convention. Men who understand how wealth is being created and employment is being provided in other countries, and the handicap under which Canada is laboring by comparison, cry out for an awakening which does not come. We are so busy scrutinizing little things that we fail to appreciate the large problems, a solution of which would wipe out many of the smaller difficulties, says the Toronto Globe.

It might amaze even the Canadian Manufacturers' Association to hear Dr. H. M. Tory state that such an organization as a department of science, industry and commerce "could in a few years be made to mean far more to industry than all the petty tariff changes about which there is so much agitation." These are words he used in an address which is published in the Toronto Board of Trade Journal. They emphasize what he regards as the relative importance of the two subjects. It is quite natural that, as president of the Advisory Council on Scientific and Industrial Research, he should be partial to that organization, but his arguments are highly convincing.

We are lamenting the departure of university trained men from Canada. Many of them have been drafted by other countries spending millions of dollars annually on research work, while we spend not more than a quarter of a million. The field awaits them at home to their own profit and that of the country, but we do not provide it. There are scores of questions demanding solution, having to do with industry, agriculture and natural resources, requiring the employment of specialists, and each of them offering a potential return to the country of many millions of dollars a year. Canada is losing in letting the intelligence and producing ability of these men go elsewhere, but is losing infinitely more in failing to grasp the opportunities which would keep them here.

It is a typical case, as Dr. Tory points out, that more time and attention are given to the expenditure of $3,000,000 on the Hudson Bay Railway than on the elimination of wheat rust in the west, yet during the last eight years Manitoba and Saskatchewan have lost $25,000,000 annually through this blight. And when an expert in pathological work was required to study the subject the salary offered was $2,700! During the past four years the country has paid out $3,000,000 for cattle slaughtered because of tuberculosis trouble, yet the country is not willing to pay for research to wipe out the malady.

The discovery of Marquis wheat has already been worth $500,000,000 to Western Canada. The separation of the bitumen from the tar sands of Northern Alberta has been worth millions of dollars so far, and will eventually run into wealth which cannot at present be estimated. These matters are only illustrative of what can be done in industry as well as with regard to natural resources. Research made Germany first and then the United States industrial leaders. Britain is now spending £5,000,000 a year in learning the secrets which research work will disclose. The United States is spending much more to continue its development. But Canada is almost hopelessly immovable.

We mourn about our taxes and our debt, and this is Dr. Tory's reply: "I say to you that if we would throw off the mantle of pessimism and the inferiority complex which has possessed us, and risk the use of the trained and trainable intelligence of our own people, in one generation we would add to the national assets of our common country the equivalent of our national debt."

Optimism, energy and determination to submerge minor things in a practical working out of the greater problems are all that Canada needs.

W. N. U. 1038

Sweet Clover As A Green Manure

Shown to Greatly Increase the Yield Of Wheat

Comparing sweet clover with peas as green manure crops the results were quite definitely in favor of sweet clover in experiments over several years conducted at the Brandon, Manitoba, experimental farm. The yield per acre of wheat following the ploughing under of sweet clover was higher than that after peas or after summerfallow even when manured. Besides this, sweet clover can be seeded with the oat crop the previous season at a very small cost, while the cost of seeding peas as a green manure is no small item. Furthermore, the use of peas as a green manure crop requires two ploughings during the treatment, whereas the ploughing under of sweet clover can be done at only the additional cost of seed over the ordinary bare fallow.

The experiments also show that in those districts in which moisture is the prime requisite, sweet clover should be ploughed under when no higher than twelve inches. On the other hand, where moisture is not the chief factor in profitable production the clover should be allowed to grow to 18 to 20 inches as the amount of nitrogen returned to the soil is in direct proportion to the height of the crop when ploughed.

Beet Sugar Industry

Area to Beets of About 7,000 Acres in Southern Alberta

The beet sugar industry in Southern Alberta is well along in the second season of its operations with an area to beets of about 7,000 acres, with favorable conditions prevailing. Mark Austin, agricultural expert of the Utah-Idaho Sugar Company, parent of the Canadian Sugar Factories, Ltd., which built and is operating the big Raymond, Alta., plant, stated after an inspection of beet lands that soil conditions were very favorable. While some growers may be obliged to irrigate their beet land, this practice is not likely to prove general.

The United Irrigation district, northwest of Cardston, will ship beets to the Raymond factory for the first time this fall. The extension of a branch line of the Canadian Pacific Railway from Cardston into that fertile tract makes the growing of sugar beets feasible. This line, 29 miles in length, is now under construction, serving a fertile mixed farming area of some 35,000 acres. The block is occupied by Mormon farmers, who are experienced beet growers. The district will raise upwards of a thousand acres of beets this year.

Canada Ships More Wheat

Over Half of World's Wheat Exports Made By Canada In Period Under Review

Over one-half of the wheat exports of the principal wheat exporting countries of the world during the period from August 1, 1925, to February 28, 1926, was made by Canada. According to returns received by the bureau of statistics, wheat exports in the period under review totalled 318,874,300 bushels and of this amount Canada shipped 192,152,800 bushels. In the same period last year exports of wheat from Canada amounted to only 99,816,700 bushels.

Ask For Government Subsidy

Beet Sugar Industry For B.C. Is Possible Soon

Establishment of sugar beet industry in British Columbia will be undertaken if the Provincial Government will subsidize the production of sugar at the rate of $50,000 a year, W. H. Watson, head of a Vancouver syndicate, informed the cabinet. The proposition calls for a factory at New Westminster to cost about $1,250,000, and capable of handling one thousand tons of beets a day.

The subsidy asked of the government would amount to one-half cent a pound on all sugar produced up to ten million pounds.

A rule may work both ways and still be a poor one.

Co-operative Livestock Marketing

Taking Necessary Steps to Form Organization in Manitoba

Following the inter-provincial conference on co-operative livestock marketing at Regina, held a short time ago, the United Farmers of Manitoba have taken steps to bring about the formation of a provincial organization for co-operative livestock marketing similar to those already established or under way in Alberta and Saskatchewan. At the meeting of the central board of the association on June 17, it was decided to call a meeting to be held in Winnipeg on August 5, of representatives of the U.F.M. locals which are co-operatively shipping and of organized shipping associations in Manitoba. This meeting will consider the question of getting co-operative livestock marketing in Manitoba on a contract basis. Several U.F.M. locals and associations have already either established or taken steps towards establishing the use of the contract in their own locals, and the idea of making use of the contract plan is gaining favor in Manitoba, as has already been the case in the other provinces.

At the Regina conference it was arranged to establish an inter-provincial committee on co-operative livestock marketing, one representative to be appointed from each province. Mr. A. J. M. Poole, president of the United Farmers of Manitoba, has been appointed pro tem. to represent Manitoba on that committee. He will act until the meeting of shipping association representatives on August 5 is held, and that body will be asked to select the representative to act after that date.

Canadian Seed Growers

To Enlarge Scope By Growing Certified Vegetable Seed

Plans have been made by the Canadian Seed Growers' to enlarge the scope of the association in the growing of certified vegetable seeds. The horticultural committee has placed seventy varieties of vegetables upon the eligible list, and elite stocks of foundation seed will be distributed among several of the Dominion experimental farms for increase and from there they will be placed in the hands of the growers.

Believes That Next Great War Will Be Fought In The Air And Will Be Decided Quickly

Dates Of Cutting Rusted Wheat

In Ordinary Seasons Early Cutting Found To Be Detrimental

The Brandon, Manitoba, experimental farm has during the last three years carried on experiments to determine the effect of premature harvesting of rusted wheat on the yield, quality and plumpness of the grain. The experiments, which are described in the report of the superintendent, indicate that in ordinary seasons early cutting is distinctly detrimental, while during even severe rust epidemics, nothing is gained by cutting earlier than the prime dough stage. Ordinarily it is good practice to begin cutting before the grain is dead ripe on account of the large acreage under crop. This is particularly true when the wheat stem sawfly is prevalent and when the varieties of wheat grown are prone to shatter.

World's Record Established By Cow

Four-Year-Old Jersey Cow in British Columbia Tops the Record

Pretoria Oxford Janet, four-year-old Jersey cow, owned by Foster Whitaker, of Rosedale Ranch near Armstrong, B.C., recently established under government test, a new world's record in her class for milk and butterfat production. Her record for 305 days was 14,935.2 pounds of milk and 872 pounds of butterfat. This Okanagan Valley cow has not only beaten the record in the four-year-old class in which she was running the test, but she has also passed the record of five-year-old Jersey cows in this particular and had topped the record for actual milk production in this breed.

Every community has at least one no-account man who can always get somebody to sign his note.

Goodness isn't always admirable. Some men are good for the same reason that a snail never runs amuck.

The London Spectator says there is extreme uncertainty that there will be much room for latitude in future relations between Canada and Britain in the event of war. Rt. Hon. Arthur Meighen went even further than Rt. Hon. Mackenzie King, the Spectator continues, in demanding that the ratification of Canada's participation should come from a new parliament, especially elected for the purpose.

It is generally assumed that in a future war the first blows would be struck from the air, and possibly the first few hours would be almost decisive, the Spectator continues. Delay on the part of the Dominion in joining the war because parliament had to ratify the dicision might be fatal.

"However, we know perfectly well that if Britain went to war in a just cause, which concerned the whole empire, it would be impossible to hold the Canadian people back," the Spectator says. "That certainly transcends all difficulties of form and method, but we trust that whatever Canadian Government may be in power in the autumn may be able to lay a clear case for discussion of these aspects of Canadian nationhood before the imperial conference."

The Saturday Review says that the real trouble is that in the development of the political life of Canada no party has a policy which can keep pace with the demands of the continually-changing situation. The greatest need of Canada, according to the Review, is a policy which shall define with precision her ambition in world and imperial affairs.

"For the present, and probably for some considerable time to come, Canada is likely to be swayed this way and that over minor issues which are administrative rather than political questions," the Review says.

Lawns For Farm Homes

Valuable Hints For Cultivating Lawns On the Prairies

The growing of lawns on the prairies is particularly difficult because of the lack of sufficient moisture in most seasons. Several grasses and mixtures have been tried out at the Dominion experimental station, at Rosthern, and the most satisfactory is a mixture of 15 pounds of Kentucky Blue Grass seed and one pound of White Dutch clover seed, sown at the rate of one pound to 500 square feet. Preparation for the lawn must begin the year before, and perhaps the most satisfactory method is to give it a heavy coating of manure and plant potatoes.

This enriches the soil, cleans it of weeds and leaves the soil in splendid physical condition. After such preparation the soil should be raked level and firmed. If this is done in the fall, an opportunity is afforded to see any depressions that may develop during the winter. In the spring, as early as the ground can be worked, rake and level again, and sow the seed and rake it in the roll it. Be careful in sowing and raking to spread the seed evenly. Avoid using the lawn as much as possible the first season, and clip frequently. If running water is available the condition of the lawn can be much improved by watering with a lawn sprinkler weekly.

Grain Shipped West

Record Grain Movement Through the Port of Vancouver

Grain totalling 51,213,268 bushels was exported through the port of Vancouver during the period from August 1, 1925, to June 21, 1926. Approximately 30,000,000 of this total was shipped to the United Kingdom and 20,000,000 to the Orient. The movement so far this year is greater in volume than it has been for some time and the final figures of the grain movement through this port for the 1925-1926 season are expected to constitute a new record.

Gum Is Dental Necessity

Classification of chewing gum has been changed in the official customs list from "confection" to "dentifrice." Experts have agreed that the chewing gum is a dental necessity.

Mayor Martin of Montreal Goes West

His Honor Mederic Martin, Mayor of Montreal, with the Lady Mayoress on his right, photographed in the Windsor Street station, Montreal, just prior to leaving on the across-Canada C.P.R. tour organized by the Universite de Montreal. About a hundred representative Quebec and Montreal citizens took the three weeks' trip to Victoria and back, and they included priests, university professors, doctors, lawyers and judges. The success of the initial trip last year led to its continuance again this year.

C. F. HAYES, Editor and Owner.

CRESTON, B.C., FRIDAY, SEPT. 17

A Call to the Curlers

Everyone interested in curling is asked to attend the meeting of Creston Curling Club, which is announced for Monday night, at which the special feature will be to find out if the roarin' game enthusiasts are sufficiently enthusiastic to finance an addition to the rink building so as to provide an extra sheet of ice and permit of an enlargement of the club membership.

Under existing financial conditions this seems to be about the best that can be done, and should prove a good community investment because, if later on, the curlers decide to have a rink of their own the present building with its enlargement would make a very fine skating rink for a place the size of Creston.

With the prospect of an early winter there is no time to be lost, and it is hoped the turnout on Monday night will be suffiently large and representative to arrive at some definite decision in the matter. Be on hand.

The Fall Fair

Creston district's only community effort—the fall fair—will be with us within the next two weeks. This has has been none too encouraging a year to undertake the exhibition but believing it to be a necessity in the community's all round development the directors have certainly done their part in arranging a most attractive lot of awards, and the fair's success is now up to the citizens generally, both in the quality as well as the quantity of their entries in the various departments.

With the flats haying season finished in ample time, and with the fruit coming in at least two weeks earlier than usual, the dates for the fair appear to be just right to bring out a very fine fruit display, and an equally good showing, particulasly in those departmennts that are housed in the main building.

And to give every possible encouragement, the entries this year will be accepted up till the evening previous to the fair—Tuesday, September 28th.

In addition to the exhibition display attractions are being arranged to make the fair worth while for all to visit, but it must not be forgotten that its real success depends entirely upon the exhibits.

Prize listss are available. If you will take the trouble to read one of them you will be surprised at the number of entries the average householder can make with very little special effort.

Await Irrigation News

It is hoped the copious rains the district has been favored with in the past weeks have not led the trustees of the Arrow Creek Irrigation District to beleieve that the country has entered into a cycle of wet years; that irrigation will not be needed—and the project allowed to drop.

While the late August and early September downpours have been most welcome, one cannot miss the timeliness of the oft heard remark, "If it had only come a few weeks earlier."

Now the election is over, and the end of the harvest rush is almost in sight, it is to be hoped that whatever possible effort can be made to finance the project will be put forward. The district still needs the water, and the expenditure of that amount of money in the area this fall and winter will be most welcome.

In addition to irrigation the village of Creston has a lively interest in the undertaking because if the corporation decides to invest the amount requiied to give the town an interest in the main pipe line, the water thus assured should make the putting in of an electric light plant almost a certainity—and if the village is to have electric light this now looks to be the most likely place to get it.

What About Drainage

Considerable curiosity seems to exist as to why Creston Reclamation Company, Limited, is not getting somwhere with the dyking of the whole, or part, of the 10,000 acres that have been conseded it on Kootenay flats.

If no public announcement has been made as to where the project is at it is probably due to two reasons: Failure, as yet, to interest outside capitalists in going on with reclamation of entire 10,000 acres in one undertaking; and uncertainity as to securing local capital to even reclaim 2000 acres, until the Arrow Creek irrigation project is disposed of one way or the other.

Reports as to the yield and returns from this year's crops on the dyked lands in Idaho have aroused a whole lot of enthusiasm mongst the Reclamation Company shareholders, as well as others, in connection with getting on with drainage, but it is very questionable whether the district could finance irrigation and reclamation simultaneously, hence the anxiety to know what the irrigationists propose to do.

If dyking work is to be got under way in sufficient time to make it appear safe to crop the lands next season there is very little time to be lost.

The High Tariff Hoax

Election hay in drawing near,
But many people gather here
To learn what politicains say
About one and the other's ways.

To hear both sides expostulate
The why and wherefore of our fate;
Buy goods that's made in Canada—
Its the great Slogan of today.

We must buy in the States; this story is true,
If we would thereby saise a revenue.
Then why use the slogan we hear every day,
Buy all your goods here, it is the right way.

The answer is simple, you cannot mistake,
For Meighen is flying a terriffic rate.
Mr. Meighen proclaims he would build a high wall—
As high as the Andes, and they're very tall.

Buy goods made in Canada; this is no slur—
You must make rich the richer, the manufacturer.
Your system is wrong, Mr. Arthur Meighen,
Read Proverbs first chapter, verse eighteen to nineteen.

Those greedy of gain rob man of his life;
The children go destitute; so does the wife.
No, no, Mr. Meighen, your system is wrong,
While we run the gauntlet you ring the gong.

A high customs tariff would make smuggling a trade;
From ocean to ocean the plans would be made.

There has been a great change since the days long ago
When for rich beaver skins they received calico.
The indians pleased; bedecked all in red;
Didn't know his white brother thus had him bled.

But such is the ditch into which you will fall
If you vote for the man with the high tariff wall.
Use judgment and reason; you will never bewail
The day that you voted for R. Harry Gale.

—T. M. EDMONDSON.

CRESTON MERCANTILE COMPANY
LIMITED

Pure beer proved pure by test

THE Amalgamated Breweries of British Columbia are determined that the beer they make for the people of British Columbia shall be pure and wholesome. No care is spared, either in the selection of materials or in the processes of brewing, that will guarantee pure beer.

Each of the five companies associated in the Amalgamated Breweries maintains laboratories where continuous analyses are made, as a check on the methods of brewing and on the finished product. The Government also, through the Liquor Control Board and in the interests of the people, regularly examines for quality all the beer sold in British Columbia. But that is not enough. A further check is provided for the Amalgamated Breweries by absolutely independent tests made frequently by reputable public analysts upon request, and by means of these reports the beers of the various breweries are compared for purity and general quality.

A report has just been made by the well known firm of Macdonald & Macdonald, inspecting and testing engineers of Vancouver and Victoria, on beer made by the Amalgamated Breweries. This report indicates the high quality of the beers sold to the people of British Columbia.

For instance, after noting that in the beer tested the original extract in beer wort was high—14.21 per cent.—that alcohol was 4.37 per cent., that "extract" in the beer was 5.88 per cent., and that there was a complete absence of foreign substances, the report goes on to state:

". . . . . beer is of excellent quality, as the above analysis plainly shows."

The Amalgamated Breweries are sensible of the obligation placed upon them to provide the best and purest beer for the people of British Columbia. Whether you purchase beer by the glass in licensed premises under Government supervision or by the bottle at Government stores you receive a healthful and beneficial beverage.

The members of the Amalgamated Breweries are: Vancouver Breweries Ltd., Rainier Brewing Co. of Canada Ltd., Westminster Brewery Ltd., Silver Spring Brewery Ltd., and the Victoria Phoenix Brewing Co. Ltd., where the beer supplied to the people of British Columbia is made.

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

CORPORATION OF THE VILLAGE OF CRESTON

SALE OF LANDS FOR TAXES

I HEREBY GIVE NOTICE that on Thursday, September 30, 1926, at the hour of 10 a.m., at the Municipal Building, Creston, B.C., I shall offer for sale at public auction the lands in the list hereinafter set out, of the persons in the list hereinafter set out, for the delinquent taxes unpaid by said persons on the 30th day of September, 1926, and for interest, costs and expenses, including the cost of advertising said sale, if the total amount due for period ending September 30, 1926, is not sooner paid. List of properties is as follows—

W. O. TAYLOR, Treasurer.

Loyal Orange Lodge, No. 2095

Meets THIRD THURSDAY of each month at Mercantile Hall. Visiting brethren cordially invited.

W. H. CRAWFORD, W.M.

PRIZE LIST CORRECTIONS—In this year's list of awards an omission is made in Class 1, Section 4, two boxes McIntosh Red apples, in which along with the first prize goes the Archibald silver cup. In Class 5, Section 115, dog kid, the prize should read: first $3; second $2.

Local and Personal

WANTED—Large safe, state price and inside dimensions. Creston Co-Operative Fruit Exchange, Creston.

"Mrs. Besant, Krishnamurti, Occultism and Christianity" will be the subject of the address at Christ Church on Sunday morning next.

At the September meeting on Friday the Women's Institute decided to have a tag day to help the Children's Aid Society work one of the days of this year's fall fair.

SECONDHAND STORE—Alex. Mirabelli reminds all that his secondhand store, next the shoes shop, is well stocked up in all lines, and that he is prepared to buy anything.

Prize lists of Creston's fall fair are available at all places of business in town. This year's list of awards is about the best ever submitted and should draw a big entry list.

Due to the regular meeting of the board of trade falling on election night Tuesday, 14th, it was found necessary to cadcel the meeting, and the next session will be October 12th.

Keep the evening of Monday, Sept. 27th, open for the dramatic recital of Miss Theresa Siegel, who appears in Trinity United Church, at popular admission prices of 50 and 25 cents.

Mr. and Mrs. Frank Ebbutt of Brittania left for their home on Sunday, after a visit with Creston friends, when they were guests of the latter's parents, Mr. and Mrs. J. H. Webster.

J. W. Craig, who has been a hosiptal patient at Nelson for the past six weeks, arrived home at the end of the week, and is making a fine recovery from a critical appendicitis operation.

Rev. S. Newby was at Yahk on Tuesday, officiating at the marriage of Ed. Robinson and Miss Clara Allen. The young couple motored into Creston, where they took the train on a honeymoon trip west.

The rock crushing equipment is being put in shape for operations getting out some repair material for the hard surface road at Alice Siding which will have to be put on before the coat of oil is applied.

Rev. J. Herdman was at Yahk on Thursday night last where he presided at the induction of Rev. E. S. Fleming who will have charge of United Church work at Yahk, Moyie and Lumberton in future. With the reopening of operations at Moyie, and the lumbering activity at Yahk and Lumberton, it has been found necessary to put an ordained man in charge.

Members of Creston Curling Club, and all interested in curling, are asked to attend the meeting at Fraser's bakery at 8 p.m., Monday, September 20th. Enlarged plans for this winter's operations will be discussed.

In the past week the Valley has had every sort of weather imaginable, with just a little too much rain to suit the orchardist. At least another inch of moisture was received in heavy rains on Wednesday and Thursday.

A young people's service will be held at the Presbyterian Church on Sunday morning at 11.30, and in the afternoon at 3 Rev. Dr. Daly will hold service in the old schoolhouse at Wynndel. Sunday, 26th, will be rally day.

Election day passed off very quietly in town, and considering the very busy season with the orchardist the total vote polled compares very favorably with last October's vote. In town the ballot boxes were in charge of F. H. Jackson with W. O. Taylor as clerk, and Jas. Cook who had W. J. Craig doing the clerical work. The vote was Esling 268, Gale 138. In the voting a year ago the figures were Esling 269, Humphrey 135.

Fernie, Cranbrook and Creston

Pride in Service

THERE is a special pride in service along the Crow's Nest Line. The railroad began it; the first Superintendent operated the road just as though it had competitors—six of them, right alongside.

The Imperial Bank of Canada Branches at Fernie, Michel, Cranbrook, Natal, Creston and Invermere also take a special pride in service to the public. Let one of these Branches prove it to you.

WORLD HAPPENINGS BRIEFLY TOLD

The third biennial convention of the World's Federation of Education Societies will meet in Toronto, Aug. 4 to 10, 1927.

Premier Taschereau, of Quebec, declared there will be no provincial elections this year. "The people of Canada have enough to consider and solve already," he remarked.

Films of British cabinet members are to be sent to British seaside resorts, where the pictures of Premier Baldwin, Foreign Secretary Chamberlain and others will be offered as programme features.

Professional mendicants, of Hamilton, who establish themselves on the downtown streets and seek alms by playing various instruments or selling small wares are to be ordered off the streets by the chief of police.

Hon. W. G. Ormsby-Gore, undersecretary of state for the dominions, states that he is not aware of any change being made in the arrangements for the imperial conference owing to the situation in Canada.

Arnaldo Mussolini, brother of Italy's premier, has challenged General Bencivenga to a duel. The challenge follows critical comments by the general, who is a well-known leader of the opposition to the Fascist Government, on an article written by the premier's brother.

Less than one per cent. of the cattle tested in the tuberculosis free area, which is being established in Saskatchewan in the Last Mountain district, have reacted to the test so far, and Hon. C. M. Hamilton, minister of agriculture for the province, is highly gratified at the splendid showing of the cattle in this territory.

The minimum demand for agricultural machinery in Russia for the current year is estimated at 120,135 million pre-war roubles, according to a statement in the forthcoming issue of the Commercial Intelligence Journal.

Three large steamships operated by the United American Lines—the Resolute, Reliance and Cleveland—have been sold to the Hamburg-American line in exchange for a financial interest in the German company.

The Family Physician.—The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Eclectric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a fee.

New Plants Registered

Four new plants have recently been added to the record list maintained by the plant registration committee of the Canadian Horticultural Council. These include the loganberry "Logano," a thornless variety discovered last year in British Columbia; a new peach named "South Haven," originated as a bud sport, the apple "Reveller" and the tulip "Dean Clement." These plants will be given special study with a view to their full registration.

Asthma!

Spread Minard's on brown paper and apply to the throat. Also inhale. Quick relief assured.

MINARD'S "KING OF PAIN" LINIMENT

Russians To Colonize Wrangell

Have Renamed This Barren Waste As Lenin Mitroff

A Russian expedition is on its way to colonize Wrangell Island in the Arctii Ocean, North of Siberia, and rename it Lenin Mitroff.

The expedition, in a Russian ice breaker, the Krasny Oktib (Red October) was scheduled to leave East Cape, Siberia, on the west side of Bering Straits, June 25 for the island, or Mitroff, rechristened in memory of Nicholai Lenin, considered the creator of Soviet Russia.

To Wrangell Island, for whose exploration and colonization loss of 18 lives in three expeditions has been listed in 13 years, the Krasny Okitb was taking 20 familes of Chuckshees (Siberian Eskimos) 100 dogs, and 25 reindeer. Equipment of the colony includes 3,000 reindeer pelts for clothing, and six large Eskimo skin boats.

Provisions on the Red October for Lenin Mitroff were calculated to last three years. Those familiar witn the survey of Wrangell Island (or Lenin Mitroff) pronounce it uninhabitable. This because of cold, inaccessibility, absence of fuel and extreme scarcity of food.

Tiers! Tiers! Tiers!

With them you are smart—without them, that's another story. In this smart frock of printed crepe the slightly flared flounces are slashed in an interesting manner before being set onto the straight dress. There are gathers at each shoulder where the back joins the front. The dress opens at the neck far enough to permit it to slip over the head easily, and long set-in sleeves have their fullness neatly gathered into narrow wrist-bands. No. 1239 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 bust requires 5⅝ yards 36-inch figured crepe. Price 20 cents.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity brought within the means of the average woman. Price of the book 10 cents the copy.

Japanese Nobleman Passes Through Canada

The Right Honorable Viscount Keimin Matsudaira, attache to His Imperial Highness Prince Chichibu, second son of the Emperor of Japan, has just gone across Canada after landing at Quebec on the S.S. Empress of France and from Montreal, Windsor station, where he was photographed, by Trans-Canada Limited to Vancouver whence he will sail for Yokohama for a few months vacation with his family. The Viscount was educated at Balliol College, Oxford, and stated that Prince Chichibu was also entering Oxford this next term and will occupy the rooms at Magdalen College formerly in use by the Prince of Wales. He said that Anglo-Japanese relations were of the most cordial description especially those obtaining between the respective royal families of the two countries. While this was the third time he had passed through the Dominion he had never been able to stay here for any length of time and looked forward to the day when he would sample some of the hunting and fishing facilities of the country, especially British Columbia which is within a twenty-day return trip of Japan. The Viscount will return through Canada to England in the fall.

Canada Colonization Association

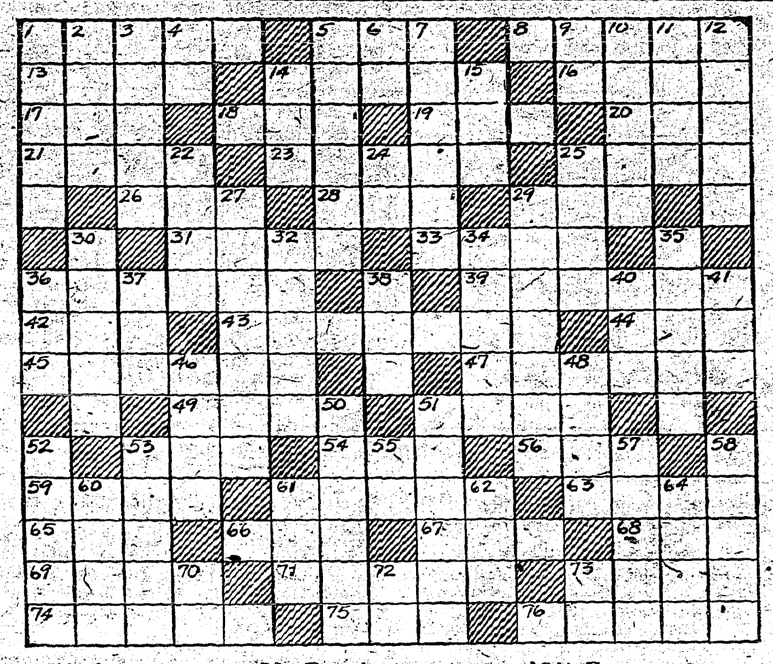
Valuable Work Performed By This Organization In Western Canada

The annual report of the Canada Colonization Association, which organization is operated without profit of any kind as a subsidiary of the Canadian Pacific Railway for the settlement of fully or partially improved privately-owned lands along the lines of the railroad in the prairie provinces, furnishes further testimony as to the valuable colonization work which is being performed by the organization and the increasing reliance which is being placed in it by those seeking satisfactory farm settlement.

In its last fiscal year, which ended on May 31st, the association was responsible for settling 643 families on 150,555 acres of land in the Canadian west, as compared with a settlement of 633 families on 183,371 acres in the preceding year. It is conservatively estimated that the total of land and equipment transactions in the two years was in the neighborhood of $15,000,000. It is interesting to note that in its last month of operation 67,184 acres of land were settled by 267 families, 102 in Alberta, 99 in Manitoba, and 66 in Saskatchewan, through the instrumentality of the association.

The services which the Canada Colonization Association is able to render new arrivals seeking farm settlement under the most favorable conditions are steadily widening with the increasing number of colonization boards which are springing into existence in Western Canada for the more intensive settlement of their districts, and which are co-operating with the association and placing complete and reliable information on land settlement opportunities in its hands. At the closing of its fiscal year the Canada Colonization Association had listed opportunities for settlement on farms on the assisted plan for 721 families on 175,336 acres of land in Western Canada, the greater part of which had been inspected by the staff of the association. Included in this was 3,830 acres available for the group settlement of seventeen families.

OUR CROSSWORD PUZZLE



Horizontal

1—Fastened, as a shoe.
5—A coal scuttle.
8—Nobleman's landed estate.
13—Disclosed to view.
14—Pertaining to the moon.
16—Female of the horse.
17—Wager.
18—Because.
19—At this moment.
20—Pale.
21—Pivotal point.
23—Extended area of land.
25—Small valley.
26—Novel.
28—Expression of assent.
29—Small cask.
31—Roguish.
33—Water from clouds.
36—Signify.
39—Whiten.
42—Bustle.
43—Many.
44—Spawn of fish.
45—Cries like a sheep.
47—Pasteboard box.
49—To net.
51—Violent anger.
53—Article of furniture.
54—Lyric poem.
56—Terminate.
59—Heating chamber.
61—Amidst.
63—Allowance for waste.
65—Clear.
66—Anglo-Saxon money of account.
67—Canine quadruped.
68—Common rodent.
69—Bitter.
71—Bird valued for plumage.
73—Withered.
74—Orange-like fruit.
75—Organ of hearing.
76—Horseman.

Vertical

1—Pertaining to the lobe.
2—Highest point.
3—Oil derived from whales.
4—Half an em.
5—Shout of triumph.
6—Upon.
7—One who dances.
9—Part of "to be."
10—A Moslem ruler.
11—Spoken.
12—Regenerate.
14—Parcel of land.
15—Decay.
22—Settle, station.
24—Forever.
25—Hill of loose sand.
27—Wrenched.
29—Cultivation.
30—Kitchen utensil.
32—Plant of the mustard family.
34—Manila hemp.
35—To lade out.
36—Queen of the fairies.
37—Digit of the foot.
38—Put down.
40—Skill.
41—Female fowl.
46—So be it.
48—Torn.
50—Deference.
51—Give.
52—Calcareous secretion forming reefs.
53—Make obscure.
55—First note of the scale.
57—Defied.
58—Check.
60—Evil.
61—French metric measure.
62—Obtained.
64—Uncommon.
70—Perform.
72—Egyptian sun-god.
73—Note of diatonic scale.

Royalty Engages In Business

Russian Court Women Meet With Success In Commerce

The manner in which ladies of the Russian court have fitted themselves into the life of commerce in Paris is a matter of much comment in the French press.

The Grand Duchess Marie went to work as an ordinary woman in a French embroidery house to learn her chosen profession, and now employs dozens of her compatriots in her own place. In another dressmaking establishment, Princess Obelenski is the cashier and bookkeeper. Princess Troubetskoi is the general manager of the cutting room, and Mlle. Annlenkoff has charge of fittings.

Cheats Executioner

Cuban Sentenced to Die by Garrote Method Hangs Himself

Faced with deaths in the terrible Garrote, Secundio Rosales, convicted with Abelardo Noa of kidnapping a wealthy Cuban, hanged himself in his cell at Ciego de Avila, in the province of Santa Clara, Cuba, where he was held awaiting sentence.

On June 30 last, his fellow kidnapper, Ooa, also committed suicide in the same way, and for the same reason—fear of the Garrote.

An active campaign is being waged in Cuba to abolish the Garrote as a method of execution.

Gets Plans Of Crow Trap

Will Blue Print Jack Miner's Contrivance and Distribute Copies

Plans and specifications of the crow trap, invented and used with success by Jack Miner, Canadian naturalist, have been furnished by request to the biological survey of the department of agriculture at Washington, D.C. Last winter, it is understood that the United States department of agriculture intended to prepare blue prints of the Jack Miner crow trap for free distribution throughout the United States and Canada.

Corns cannot exist when Holloway's Corn Remover is applied to them, because it goes to the root and kills the growth.

Don't doubt the man who says "everything goes." It usually does.

Safer Flying Craft

To Make Travel In the Air As Safe As On Land Or Sea

The time is coming when it will be as safe to travel in the air as on the land or the sea, in the opinion of the board of trustees of the Guggenheim Fund for the promotion of aeronautics, and to hasten the arrival of this era the board will sponsor an international competition for the construction of safer aeroplanes.

Between $150,000 and $200,000 will be appropriated from the fund to finance the contest, the board has announced. It hopes that the best designers and builders of aircraft throughout the world will compete.

Stimulation of commercial air transportation is the chief aim of the board. In its opinion aviation has too long been limited to principally military uses.

An Interesting Ceremony

U. S. Scouts Send British Comrades Bronze Statuette

An interesting little ceremony took place in Gilwell Park, Essex, when the Prince of Wales, in behalf of the British Boy Scouts, 150 of whom were present, accepted at the hands of the United States ambassador, Alanson B. Houghton, a bronze statuette of an American bison, the gift of the Boy Scouts of the United States as a token of goodwill and friendship.

The statuette is dedicated to the "unknown scout" who, by doing a good turn to a United States tourists, induced the United States to take up the scout movement.

There are said to be nearly 200 cases of leprosy in Paris.

Strange, Romantic Love Adventures of the Flapper you know!

Joanna

by H. L. GATES

Copyright 1925 by H. L. GATES

Published by arrangement with First National Pictures, Inc.

THE STORY THUS FAR

Joanna, a modern, pretty, shop girl is to have a million dollars to spend. Graydon, her employer, tells her. There are no "conditions." She is not even to know the name of her benefactor. Nothing more than this can be learned from banker Eggleston, nor his suave, man-about-town nephew who helps he write her first check and tells her that he intends to make love to her. Dazed by the sudden flood of undreamed of wealth, crushed by the fact that her shop girl friends will not believe she gained it honorably she is confronted by John her childhood sweetheart. He also scorns her tale, angry accusations are said—a scene ensues. Joanna crushed sinks to the floor. Later she finds that Mrs. Adams, her landlady, does believe in her. The next day is to be dedicated to Georgie, a shop girl companion. They plan to spend some of the fortune for finery.

CHAPTER IX.—(Continued).

"Tricks," she confessed, laughing to him. "I could hold my own with Georgie—she's been rather a chum, you know—or with any of the rest. If they had somebody I wanted I usually landed them if I tried, and they had to start early to get anyone away from me—but now, well, I'm in for new competition now."

A woman, a young woman, whose smooth black hair clung to a beautifully formed head; a woman with sombre black eyes that suggested twin flowers of night, hovered close to the table and paused. An observer would have thought that she had stopped, and was about to speak to one or the other of the pair at the table. But she moved on, her slender hand fluttering at her escort's sleeve. Only one who observed very closly would have detected the almost imperceptible signal that Brandon passed to her with a gesture of his cigaret. Joanna was not even conscious of the little tableau of an instant. Brandon kept her attention.

"You think, then, that your problems will have to do mostly with . . . what you are calling competition from your own sex? That implies that your plans, when formed, will be a conquest of men?"

Joanna's brow wrinkled. "That sounds as if I'd admitted something I shouldn't. Won't you tell me what?"

"But you haven't," he protested, earnestly. "What else should there be for you to plan—but to bring the moths to your candle-flame. Could there be anything more interesting for a girl so lovely, and so free from care?"

Joanna smiled into his eyes brightly. "There really isn't anything else to do, is there? For a while I shall be buying things. No one will tell me of anything else to do with the money. And there are so many things to buy, I hardly know where to start in. I shall have to find someone, too, to help me. Georgie has been my best girl friend, but she's too much like I am. All she can do is to squeal. That's a trick she developed until it's become second nature to her. I imagine men like you, for example, require more efforts on the part of girls than we could think of behind the silk counter."

Brandon smiled with her. "You mustn't class me as so different from the rest of 'your boys' as you call them. You have succeeded admirably in captivating me, without added wiles. And you can't put me down as a plain fortune hunter, can you? You see I have a famous banker as a doting uncle and I've heaps of stocks and bonds and such things—you are not to consider me as having set a trap for your millions."

"There—that's what I mean," Joanna flung at him. "I shall have to learn how to meet you and your kind when you say things like that. The best sort of talk I've ever had for a man who went right down into deep water was, 'come in out of the wet,' or something like that. John has been the only one I could ever allow to talk seriously to me about—well, about my ever being married, you know."

Brandon caught the wistfulness in her voice, the wistfulness that came into it at every mention of John. His lips curled again, ever so slightly. "You will have to listen to a great many men who will talk of marriage," he said. "I think it is better for you that you had your little smash, last night before you had plunged too far. John will be waiting, when you are ready to call him—if you really want him."

A deep flush warmed Joanna's face. Her eyes hardened. Brandon saw, but he had been deliberate. He met her eyes coldly. Before she could make her attack he disarmed her.

"I fancy that whoever bestowed a fortune upon you would prefer that you be uninfluenced in your spending of it—for a time, at any rate. That, though, is only my own conclusion. And I'm wondering if you will fit John into your new career as snugly as you fitted him into the one behind you."

Again Joanna surveyed the company around her while she considered what sort of a reply to make.

She realized that Brandon had been leading up to this—and she was unhappy before a doubt that he had succeeded in planting in her mind. Would John fit in? Now? Into this gay world of pleasure, joy, unrepression, to which she was being admitted? Could she, with him holding up for her the examples of his own old fashioned ideals, exact from her new opportunities their full need of the only things she knew to be worth while. She hated Brandon, fiercely, she concluded, for conjuring up the doubt. And hated him for the cunning with which he had stirred it.

She was brought abruptly out of her reflections. The woman who had once before hovered at the table, had come up again. Joanna had not seen that quiet signal from Brandon's cigaret which was instantly caught at the nearby table where a woman sat with her escort, a man made much after the pattern of Brandon himself.

Brandon rose and greeted the newcomer. Joanna looked up at her, startled by a sleek, perfectly assembled beauty that was as pungent as the essence of some heavy perfume. Brandon made his presentations easily. Joanna caught the softness of a foreign sounding name, and heard that Brandon called the stranger, "Yvonne." Despite the pretenses, Joanna sensed, instinctively, that the meeting had been arranged.

CHAPTER X.

Joanna Meets Another Suitor

In the sudden cascade of small talk with which the newcomers were settled into their places at the table by two waiters, each more excitable than the other, Joanna was vaguely uncomfortable—out of her accustomed depths. Her store of smart things seemed utterly inadequate to the easy greetings and persiflage. Within her own experiences, introductory conversations took one or the other of two set courses—herself, or "himself." She was never concerned with other women, whether they liked her or, not. Not the ones who came and went across her horizon. They were all like her, merely rivals, equipped as she was, with the common weapons of our modern flapperhood—lips always shaped for kisses, a ready wisdom that guarded those lips when occasions arose, clothes that added to the lure of her and a skill at defense or attack. In Joanna's scheme of things any girl, these days, must be ready instantly to take the defense or launch an attack—one or the other was certain to be necessary. She and Georgia got along splendidly in the induction of all new acquaintanceships among the available supply of properly mannered, good-enough-looking young chaps with new places to go. She considered now, when she stole a glance at the man who had come up with the woman with the sleek, black hair, that by the time he had said, "How do you do?" to Georgie, that little lady would have blithely inquired of him:

"Well now, look who's here: Why do you think you amount to so much?" And she reflected that, this time, Georgie would get the worst of it in any such encounter.

As she had concluded a moment before, at her first sight of him, Kenilworth—"Roddy," Brandon had called him—was made in the same mold as Brandon, but there was a difference. She disliked Brandon, because she feared that he was to have some tragic influence over her and her mysterious future, but, she admitted, he wouldn't be little. He would not be the sort who would plot for some small favor. If he should want to amuse himself with a woman, he would aim at her soul. She knew the kind—and the danger they embodied.

(To be continued)

DOCTOR ADVISED OPERATION FOR MRS. PENN

She Escaped It by Taking Lydia E. Pinkham's Vegetable Compound

Windsor, Ont.—"After the birth of my first baby I was very much run-down in health and the doctor said I must have an operation as I was suffering from a displacement. A friend wanted me to try your medicine—Lydia E. Pinkham's Vegetable Compound—and I took it steadily for a year. During this time I was carrying my second baby and I felt real well all the time and did not have a hard confinement. I feel sure the Vegetable Compound did me a lot of good, and all my people do, too. One sister in Leamington, Ontario, takes it, and both sisters praise it as a good medicine. I am more than pleased with the result."—Mrs. W. PENN, Windsor, Ontario.

Mrs. Corbin Relieved from Pain

Stewiacke, N. S.—"I had pains across my back and in my side for two years after my first baby was born. My mother had taken Lydia E. Pinkham's Vegetable Compound and I read about it in the papers, so I tried it and the pains all left me. I have a family of three children now, and the medicine helped me during the months before they were born. I recommend it to my friends."—Mrs. CARY W. CORBIN, Main Street, Stewiacke, Nova Scotia. C

WILSON'S FLY PADS

Will kill many times more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Druggists and General Stores—10c and 25c per package.

Doll Oldest Known Toy

Among practically all nations, from the remotest of antiquity, the doll is held to have been the oldest of toys. It seems to have figured as a plaything for the youngsters in every land and among all manner of peoples. Edward Lovett of London has made a collection of dolls and has one in it said to be 4,000 years old. It was found in an Egyptian tomb.

"I hear you're moving nearer to London, McTavish. How's that?"

"Ma crystal set's na loud enough.

Cuticura Preparations For All The Family

For generations Cuticura Soap and Ointment have afforded the purest, sweetest and most satisfactory method of promoting and maintaining a healthy condition of skin and scalp. Sample Each Free by Mail. Address Canadian Depot: "Stenlacura, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

U. S. History Re-Written

Revised Histories For Use In American Public Schools

Antagonism to Britain has been a dominating note in the public school histories of many of the United States down through a century. George III. has been the bete noir of the American common school. Braddock, Burgoyne and Cornwallis have been fair to middling ogres and the Boston tea party has been a prank to rank with Pickett's charge. This has all been natural, considering the frailty of human nature, whether American or Canadian.

Now it appears that a new group of histories of the United States, for use in the public schools, is making its appearance. The world war put the old geographies in the same class as a car without a self-starter and it made the old-school histories as out of date as a phonograph with a horn. The histories, it would seem from various reviews of them we notice in the American papers, have considerably upset the old lines of antagonism. Britain comes in for more friendly attention. The Kaiser takes fat George's place in the ducking pool; Von Tirpitz and one Hindenburg now outrank, as objects of scorn, those other Germans who drank much Christian liquor the night that Washington crossed the Delaware.

We wonder what some Anglophobe newspapers think of the new histories. Perhaps they have not seen them yet, their editors being more interested in divorces, scandals, bobbed hair and hootch, evidences of modern civilization, than in the records of other days.—Financial Post.

Good Paying Investment

Britain Has Large Revenue From Shares In Suez Canal

The Empress Eugenie of France was one of the first passengers taken through the Suez Canal when it was officially opened to traffic in 1869. She was aboard the first vessel passed through. Disraeli's purchase of the shares in the Suez Canal which had been held by the Khedive of Egypt, on November 25, 1875, was considered his boldest and timeliest stroke. By this move Great Britain's position in Egypt and the Near East was greatly strengthened. Not only was France curbed but the British nation received an investment that has more than quadrupled in capital value during the fifty years that have elapsed.

Little Helps For This Week

Trust in the Lord with all thine heart, and lean not unto thine own understanding. Prov. iii., 5.

Oh let Thy sacred will
All Thy delight in me fulfill!
Let me not think an action mine own way,
But as Thy love shall sway,
Resigning up the rudder to Thy skill.
—George Herbert.

Our helm is given up to a better guidance than our own. The course of events is quite too strong for any helmsman; and our little wherry is taken in two by the ship of the Great Admiral, which knows the way, and has the force to draw men and states and planets to their good.
—Ralph Waldo Emerson.

Britain's Radio Fog Signal

Apparatus Controlled by Wireless Has Been Perfected

The perfection of a fog-signalling apparatus, controlled by wireless, for use in places where it is too expensive or otherwise impracticable to maintain and attend lighthouses, is announced by the Marconi Company.

The first wireless-controlled fog signal has been established in the Firth of Clyde, Scotland. When a fog is observed from the central station, the keeper sends out wireless impulses which start a gun firing once every twenty seconds until the keeper stops it by another set of wireless impulses.

The invention is expected to greatly reduce the expense of maintaining fog signals.

Cause For Sorrow

Small Boy: "What was the name of the last station we stopped at, mother?"

Mother: "I don't know. Be quiet."

"It's a pity you don't know, mother, because Johnnie got out of the train there."

Artificial Vitamines

Important Discovery is Claimed to Have Been Made in Germany

The discovery of a method of producing vitamines artificially is reported to have been made by three scientists, whereby it is possible to impregnate various foodstuffs with vitamines.

For the present, the names of the scientists have not been made public, for the particular reason, it is stated, that in the next few days Leipsic University will issue important details of the discovery.

RED HOT JULY DAYS HARD ON THE BABY

July—the month of oppressive heat; red-hot days and sweltering nights; is extremely hard on little ones. Diarrhoea, dysentery, colic and cholera infantum carry off thousands of precious little lives every summer. The mother must be constantly on her guard to prevent these troubles, or if they come on suddenly to fight them. No other medicine is of such aid to mothers during the hot summer as is Baby's Own Tablets. They regulate the bowels and stomach, and an occasional dose given to the well child will prevent summer complaint, or if the trouble does come on suddenly will banish it. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The average cost of picking, hauling, washing and packing a box of oranges is about forty cents, and this does not include the cost of growing.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Eclectric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Eclectric Oil for relieving rheumatic and sciatica pains, treating sore throats and chests, coughs, burns, scalds, cuts, bruises and sprains.
