THE CRESTON REVIEW

Vol. XVIII. CRESTON, B. C., FRIDAY, OCTOBER 15, 1926 No. 35

Kitchener

Clarence Devlin was a business visitor at Nelson at the first of the week, leaving on Monday.

Miss Olga Nelson, who is attending high school in Cranbrook, spent the weekend with her parents here, going back on Sunday.

Miss Alice Molander, who has been attending business college at Nelson the past year, arrived home on Wednesday last, and is welcomed back by Kitchener young people.

Ed. Sneff of Page & Hill Cedar Company, Spokane, spent the week end at his home in Sandpoint.

C. Erickson of Spokane arrived on Monday, and is a guest of his daughter and son-in-law, Mr. and Mrs. B. Johnson.

Miss Mary Haptonstall of the McConnell Hotel staff, left for her home in Creston on Monday on a visit.

Miss E. Hurry of Creston was a weekend visitor here, a guest at the McConnell Hotel.

Misses Mildred Andeen and Clara Hunt, who are at high school at Creston, were home for the weekend.

Jack Hanson of Trail is renewing old acquaintances in Kitchener this week.

Dan McDonald of Yahk spent the weekend at his home here. Roy Burch, forestry patrol, Yahk, was here on Tuesday.

Mrs. Langlois and daughters, Vivian and Celina, made a business trip to Creston on Friday.

Mrs. T. Chevalley and children, of Creston, came up on Friday to visit friends, and while here were guests of Mrs. W. Arb.

The dance at Hunt's Hall on Saturday night was well attended. The next "hop" is scheduled for Saturday, 23rd, and will probably be the last dance of the season.

Miss Louise Pendry of Creston spent the weekend here, the guest of Miss Mary Haptonstall.

W. F. Cameron of Cameron & Sang, and M. McCosham of the Crystal Dairy, Cranbrook, were business callers on Monday. Chas. Stocks and W. C. Kettlewell of Nelson were business callers on Tuesday.

Mr. Thomas and R. L. Harris, auditor, of Spokane, were here on business with the Continental Lumber & Pole Company, Friday.

G. K. and D. McSweeney and C. Fambut of King City, Calif., were motor visitors here on Saturday.

H. McIntyre with Mrs. McIntyre and a party of friends were here from Porthill on Saturday.

H. McLaren, provincial police officer at Creston, was here on an official call on Monday.

Alf. Speaker left on Thursday for Kimberley, where he has secured a job and will be remaining. He will certainly be missed from the younger set at Kitchener.

Jack and Jim Dodds and Ray McKelvey of Erickson arrived on Thursday equipped for hunting with a couple of bird dogs, They bagged five chicken, which indicates that hunting is not too bad at Kitchener.

Ed. Sneff, the Page & Hill Company representative here, entertained a few of his friends at the residence of Mr. and Mrs. B. Johnson, where everyone enjoyed themselves thoroughly with cards, dancing, and at midnight a very nice lunch was served. The invited guests were Misses Marguerite Crawford, Grace Rendall, Mary Haptonstall, Edith Geroux, Esther Nelson, Alice and Beatrice Molander, Mrs. Driffil, and Messrs. E. Merritt, H. Redmile, E. McFarlane, Jack and Jim Dodds, Ray McKelvey, Jack Olsen of Nelson, Mr. and Mrs. B. Johnson.

Miss Rendall, principal of Kitchener school, has issued the following report for September: Proficiency, Grade 4—Mildred Hamilton, Grace Strong. Grade 5—Elsie Nelson, Myrtle Strong. Grade 6—Edith Nelson, Richard Molander. Grade 7—Claude Simpson Beatrice Molander. Perfect attendance—Clarence Anderson, Selmer Anderson, Wesley Blair, Willard Blair, Dennis Bush, Vivian Langlois, Beatrice Molander, Richard Molander, Marjorie Strong, Grace Strong, Claude Simpson.

Miss Crawford's report for Division 2 is as follows: Highest standing, Grade 1 Junior—Lee Strong, Robert Johnson. Grade 1 Senior—John Cowley, Fred Androsoff. Grade 2—Dorothy Hamilton, Frank Cowley. Grade 3 Junior—Marie Arb, Mary Androsoff. Grade 3 Senior—Celina Langlois, Hazel McGonegal. Perfect attendance—Frank Abar, Myrtle Anderson, Laura Androsoff, Mary Androsoff, Eva Arb, Marie Arb, Charles Bush, Frank Cowley, Celina Langlois, Douglas McKie, Henry Nelson, Robert Johnson.

Wynndel

George Willett arrived on Tuesday, and expects to be making Wynndel headquarters for about a month.

Mr. Tyo was a businees visitor at Creston on Tuesday.

Miss Mable Penson, who is packing apples at Boswell, went through on Tuesday to consult a dentist at Creston, getting back on Thursday.

Mrs. Geo. Huscroft and children left on Tuesday for Salt Lake City, Utah, where they will spend the winter with her mother, Mrs. Winch.

G. W. Taylor is the first of the local hunters to bring in a deer so far this season.

Oscar Ofner and Arnie Andestad were business visitors at Nelson this week, getting the needed permitt to operate a trap line this winter.

Miss Jean Wood wasa Creston visitor a few days last week, the guest of Mrs. Hayden.

J. B. Winlaw has the carpenters at work on an office building for the lumber company, eeplacing the structure that went up in smoke about a year rgo.

Misses Penson, Ringheim and Benedetti were home from Boswell for the weekend, returning to the appie packing operations there on Monday.

C. Gregary was a visitor at Cranbrook last week, leaving on Thursday.

Messrs. B. Middleton and E. Davis, evangelists, who were here two years ago, were weekend visitors, guest of Mrs. Joy.

Mrs. C. A. Davis left on Wednesday for Riondel, where she is on a visit with her daughter, Mrs. R. E. Cornwell.

Messrs. M. Wigen and C. Carlson were Wynndel's representatives at the dance at Kitchener on Saturday night, and report having a good time.

Rev. S. Newby will be here for harvest thanksgiving service on Sunday morning. Fruit and vegetacles for decoration should be at the church not litter than 3 o'clock Saturday afternoon

The United Church congregation, which a couple of weeks ago celebrated its first anniversay, at which a balance sheet was presented which showed but $25 of debt on a building that cost about $1100 to erect one year previous, had another celebration on Monday night at which many witnessed the burning of the church mortgage—the unpaid $25 having been collected a few days after the anniversary. Mrs. A. W. Mason manipulated the mortgage parchment until the burning process was all but complete, with Alex. Cameron applying the match. After the bonfire there was a short musical program with the school children under Miss Severn taking a prominent part and refreshments were served to bring a unique and enjoyable occasion to its close. It was eminently fitting that Mrs. Mason should be the central figure in the mortgage burning as her husband, whose death occurred in April, had been very prominent both in organizing the congregation as well as in supervising the erection of the new edifice.

Alice Siding

Guy Constable was a business visitor at Nelson a few days this week, getting back on Wednesday.

Mr. and Mrs. Marshall and daughter, Jennie, are visiiors at Elko this week, with their son-in-law and daughter, Mr. and Mrs. William Kelly.

Alice Siding ranchers are busy this week with the potato harvest and the yields are turning out better than expected.

Apple picking in this district will finish this week. More apples are being stored here than ever before, growers refusing to pack, even. before knowing just what frost damage has been done.

The hard surface road crew has the coat of oil on as far as the Ostendorf ranch. So mnch rainy weather is hampering operations.

A charivari party in which was a couple of auto loads of young Creston people, paid their respects to Mr. and Mrs. A. G. Cox on Friday night. Most of the melody was of the gasoline can variety with cowbell oblagato, and the dance and other hospitality shown the serenaders was so much appreciated that the owner of the cow bell forgot to take it along with him on the home trip.

Sirdar

Sirdar loaded out its first straight car of apples this season at the first of the week. There were over 800 boxes in it, most of which was from the S. Pascuzzo & Son ranch.

Mr. Walthers, C.P.R. agent, is taking his usual two weeks' vacation at present, and is relieved by Mr. Vangerburg, travelling relieving agent.

Mrs. B. F. Whiteside was a Creston caller on Tuesday. Mesdames Rogers, Martin, Loasby and Mr. Loasby were at Creston by auto on Sunday night for the harvest thanksgiving service at Christ Church.

Art James, a freight conductor into Sirdar about fifteen years ago, is now a regular passenger conductor, succeeding Rube Tiffin, who has a run between Lethbridge and Calgary.

Car foreman W. Dibley was a visitor with Nelson friends a few days this week.

Freight traffic both east and west is very heavy this month. On both Monday and Tuesday three freights were moved moved east, which is a record for the year. The sidings at Wynndel and Creston have had to be used for storage part of the time.

McCake's B & B crew is working at Canyon at present, and Sid and Mr. Brawn were home for the weekend. They will be shifting to Kimberley early next week.

Rev. S. Newby will be here for harvest thanksgiving service on Sunday evening. Fruit and vegetables for decoration should be at the school house not later than 3 o'clock Saturday afternoon.

A Creston indian excited the attention of some of the citizens on Tuesday morning, when he arrived in from Hall Creek with four feet off a four year old black bear he had shot the day previous. He was looking up the Chinese cook with the Scott McDonald crew—the Chinese chefs setting considerable store by the tratters off a bruin.

Canyon City

Geo. Niblow got back at the end of the week from a few weeks' stay at Saskatchewan points. It will take about another month to finish threshing in that province.

Rev. J. Herdman of Creston was here on Sunday for United Church service, and Conyon is to have a visit this week from Miss Whyte, the travelling deaconess, who is at present working in the Kootenay presbytery.

Friends of Mrs. Kenny, mother of Mrs. C. A. Robinson, will regret to hear that her health is very poor, and as she is in her 96th year, her recovery is doubtful.

Mr. Wearmouth got back at the end of the week from a short visit with old friends in Fernie.

W. H. McQueen and Mert. McCullough have gone to Trail, where they are expedting to remain for at least the winter.

Cliff Vance is the first Canyon hunter to get a deer this season. He brought in quite a nice buck from the Skimmerhorn section a few days ago.

W. Ridd, Andy Wickholm and A. Wesling, who have been working for the Continental Lumber & Pole Company at Kitchener, are home again, the mill having closed down.

W. Ridd is getting things in shape to get away to supervise the erection of a sawmill plant in the country at Lacombe, Alberta, and will be associated with Ross brothers of Waldo in the enterprise. They are reported to have secured a stand of timber in which there is a cut of forty million feet.

Local and Personal

With no one available to replace Pastor Harback in the United Church work at points east of here, Rev. J. Herdman is having a busy time giving weekly services at Kitchener, Canyon, Lister, Creston and Wynndel, as well as taking at least one service a month at Porthill. He took his first service at Kitchner Monday night, with the the seating of the schoolhouse insufficient for the congregation.

O. F. Cummins of the engineering and contracting firm of Cummins & Robinson, Toronto, was here at the end of the week in conference with the directors of Creston Reclamation Company, Limited. He made a careful examination of the proposed 2900-acre unit the company hopes to dyke before next high water, and will submit an offer to do the work to the meeting on Thursday night, 14th.

The young people's department of Trinity United Church resumed the weekly meetings on Tuesday night; the feature of wnich was the election of officers for the ensuing year, at which the following were chosen:

President—Miss Clara Morrow.
Vice-president—Harry Smith.
Secretary-treasurer—Vic. Mawson.
Group leaders—Misses Edith Cook and Violet Morrow, and Messrs. Vern. Cook and Herb. Lewis.

The department plans to carry on much the same as last year, with each group taking charge of one meeting per month.

There were large turnouts both morning and evening for the harvest thanksgiving services at Christ Church on Sunday, at the latter of which Rev. F. V. Harrison of Cranbrook was the preacher. Members of the congregation were urged to show practical thanksgiving by making contributions to defray the cost of a drive shed, painting the Parish Hall, repairing the church roof, buying crockery for the hall, giving toward a $100 levy by the diocese, and by volunteering to help with the Sunday school work.

Geo. Taylor, who has the former Burgess ranch opposite the Arrowsmith place, along the K.V., was this week showing some Clapp's Favorite pears that were a second 1926 crop, and some of which were quite fair size. At the same time he was carrying a paper sack containing 300 peas which were harvested from a single pea sown late this spring. The increase is phenomenal Mr. Taylor recalling that even in the parable of the sower the seed that fell on good ground multiplied only "Some thirtyfold, some sixtyfold; and some one hundredfold."

A newcomer to the ranks of local weather prophets tells us that there will be little snow this winter, due to the large amout of rain that has fallen this summer and fall. The records, we are told, for large number of years of heavy rainfall have been followed by winters of light snowfalls. Every year a certain amout of moisture rises from the earth in various ways and this returns to the earth when it becomes condensed either in the form of rain or snow. The more that falls in one form the less there is to fall in any other form, and as we have had such an abundance of rain there must, of necessity, be a shortage of snow.

Erickson

Miss Edith Leveque of Medicine Hat, who has been a visitor with Mr. and Mrs. L. T. Leveque the past few weeks, left for home on Thursday last.

There will be a harvest thanksgiving service at the schoolhouse at 3 p.m., Sunday, October 17th, with Rev. S. Newby in charge.

Apple picking in this section should be completed early next week. Larger quantities of apples than ever before are being stored by the growers this year.

Geo. Leadbeater had the good luck on Friday last to bring in a very fine sample of a two-year old black bear which he bagged on Goat mountain near his place. At noon hour he saw the animal in the clearing on the hill and getting his rifle went immediately in chase and one shot was all that was required to bring him down. The animal weighs about 210 pounds and the coat is in excellent shape.

Although only resident here since August, 1925, the death on October 7th, at Cranbrook hospital, of Peter Heric brings regret to quite a circle of friends gained in deceased's fifteen months' residence in Erickson district. His passing, too, came as a complete surprise as when he went to the hospital about three weeks' previous his ailment, which was diagnosed as kidney trouble, was not considered serious. The late Mr. Heric was in his 59th year, and had resided in British Columbia for many years, having been previously located at Wardner and Bull River, before coming to Yahk in 1920, where he had charge of the C.P.R. mill boarding house until his removal to Erickson The funeral took place on Sunday, with interment in Cranbook cremetery, and was very largely attended by his host of East Kootenay acquaintances. In addition to his widow he leaves two daughters, Mrs. Markle of Bull River and Mrs. Patinaude of Yahk, with three sons, Lee of Yahk, and Fred and Jack of Seattle, to whom goes out the sympathy of all in their heavy bereavement.

Lister

Jos. W. Bell arrived from Kimberely on Friday on his usual two weeks' fall vacation, which he will spend at hunting in this area. He is at Spokane this week attending a mining convention.

Rev. J. Herdman of Creston took United Church service here on Sunday morning, and will be here again in two weeks for service. This arrangement will hold until a successor to Mr. Harback arrives.

Jas. Duncan left a few days ago for Creston where he has caught on as a survey party Chas. Moore has at work at Corn Creek.

Henry Demchuk, who has been working at Seattle for some months past, is now located at Kellogg, Idaho, where he has a better position.

John Finlay left on Tuesday for Nelson, and expects to land a job in either West Kootenay or the Boundary country.

Captain Manning, public school inspector, was here at the first of the week on his semi-annual official visit.

Another first year high school student was enrolled on Tuesday in Thelma Vance of Canyon, who is making her home with Mrs. Lister.

E. J. Cornford arrived a few days ago from the Old Country and is a visitor with his sister, Mrs. Yerbury. There is very liklihood that he will take a place at Lister and remain permanently.

Joe Swizinski, who recently acquired ten acres from Col. Lister, in the Huscroft district, had the misfortune to lose his house and most of the contents by fire on Tuesday of last week. Fortunately he carried some insurance.

WILSON'S FLY PADS

Will kill many times more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Druggists and General Stores — 10c and 25c per package.

WORLD HAPPENINGS BRIEFLY TOLD

A Reuter dispatch from Moscow says it is semi-officially announced there that the Russian Baltic fleet has sailed for manoeuvres in the Baltic Sea.

The Grand Army of United Veterans in annual convention at Kamloops, decided unanimously to enter the Canadian Legion of the British Empire Service League.

Believed to be one of the oldest negro women in Canada, Mrs. Matilda Parnell, aged 104, died recently. Up until a year ago she was active in her life-long work as a laundress.

Col. Sir William Wilson Hoy, Johannesburg, general manager of railways and harbors, South Africa, will accompany the South African premier, General James Barry Herzog, to the imperial conference.

A new era in air transportation with installation of taxi freight and passenger service between municipal air ports in Winnipeg, Man., and the principal cities of the north west states is in prospect as a result of the Ford Reliability Aeroplane Tour.

Vergil, immortal singer of old Rome, is at last to be honored with a monument in his home town. A national subscription, to which the government is adding 100,000 lire, is to defray the cost of a statue in Mantual, Lombardy.

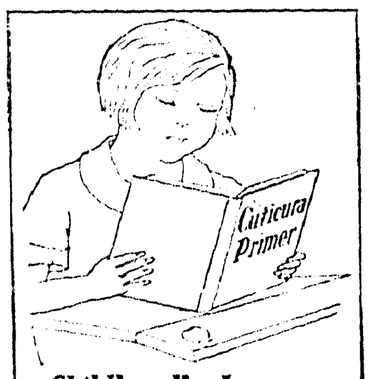
Sesqui Faces A Huge Deficit

Philadelphia Exposition is Confronted With a Debt of Large Proportions

The Sesquicentennial Exposition not only faces court action to prevent operation of its amusements on Sundays, but it is also confronted with a huge operating deficit and needs $3,700,000 to meet outstanding obligations. Despite these developments, however, Mayor Kendrick took an optimistic view of the situation, asserting that the celebration of the one hundred and fiftieth birthday of American independence was "cheap at any price" and that he was confident the citizens of Philadelphia would support and encourage the Sesqui directors.

Some New Answers

New answers were given to old questions in a test given recently to high school sophomores at Sacramento, Cal. "Alcohol is made from gasoline," "air brakes are used on balloons," "marmalade is a kind of marmalade" and "bacon comes from a cow," were some of the answers.



Childhood's Lessons Affect The Whole Life

Teach your children to use Cuticura Soap daily to keep the skin clear. Soothe and heal rashes, eczemas and other irritations with Cuticura Ointment. Shampoo with Cuticura Soap to keep the scalp in a healthy, hair-growing condition.

Sample Each Free by Mail. Address: Canadian Depot: "Stenhouse Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Canada's National Emblem

Union Jack Is Only Suitable Flag For Dominion

What objection can be raised to the Union Jack as Canada's national emblem? This Dominion is a part of the British Empire. No person openly advocates separation. But the only argument that the Sentinel can think of for a distinctive flag must rest upon Canadian independence.

Assuming that Canada is to remain a part of the empire, then the Union Jack is not only suitable, but highly desirable as the flag of this Dominion. It is an emblem of liberty. It has a history of which every man and woman of British blood should be proud. It is emblematic of the highest type of civilization to which mankind has yet attained. It speaks of service, not only to one race, but to all races—world service in the broadest sense of the term. It is respected by all nations, and it is feared by aggressors against freedom.

The Union Jack is part of an inheritance that includes even-handed justice to all classes, the right to civil and religious liberty, personal freedom to live according to one's conscience, and glorious traditions that have marked the advances of humanity to higher levels with each succeeding generation.

To supplant it with any other design, no matter how artistic it may be, is to rob the Canadian people of their invaluable inheritance accumulated through centuries of earnest strivings for what is best.

Let Canada keep the Jack as its national emblem.—Sentinel, Toronto.

Slender Lines Find Favor

The rich designs of the bordered materials form decided trimming features in themselves. Cut to slip on over the head, and with a convertible collar that may be fastened high, this distinctive-looking frock for daytime wear is developed in bordered crepe of graduated polka-dot pattern. A single large tuck in front of each shoulder gives easy fullness over the bust, and the long full sleeves are gathered into narrow wristbands. There are two large patch pockets, and a narrow belt is worn at the low waistline. No. 1197 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 bust requires 3¼ yards 36-inch, or 3⅛ yards 40-inch, or 2½ yards 54-inch bordered material as pictured. Price 20 cents.

The secret of distinctive dress lies in good taste rather than a lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book is cents the copy.

New Industry For Palestine

Government Establishes Plants to Take Salt From Dead Sea

The Palestine Government proposes to erect a plant for the recovery of thirty odd billion tons of salt from the Dead Sea, and very soon huge chemical factories and warehouses will be established round the lake, and the peace and quiet of centuries will give place to the ceaseless whir of wheels. It is remarkable that one of the most desolate spots in the world should suddenly acquire such tremendous economic importance. Of all the billion tons of salt in the Dead Sea, only about ten tons is common salt. The remainder consists of salts of potassium and magnesium, an abundance of which will make Palestine the richest potash country in the world. In appearance this strange sea challenges the Mediterranean with its clarity and blueness, but so deathly still are its waters that they have earned it its gruesome name.

Potential Murderers

Vendors of Deadly Alcoholic Brew and Their Work

What must be thought of the concocters and the vendors of this fatal brew? They must know it to be deadly in its effects, and that anyone who drinks it does so at the risk of his life. Are they not potential murderers? Technically they may not be guilty of murder, for their purpose is not to kill but to make money; and yet, callously careless as they are of human life, and knowing as they must that every bottle they sell may be the instrument of death, their offence more closely resembles murder than does the act of a man who, under the stress of a sudden gust of anger, strikes and kills.—Hamilton Herald.

Will Cover Large Range

Many Subjects To Be Discussed At Empire Parley

The agenda of the Imperial conference to be held in London in October will cover a wide variety of subjects. The agenda is incomplete as yet, but some of the matters to be discussed have been announced.

These are promotion of inter-imperial trade, including the work of the imperial economic committees and the empire marketing grant; overseas settlement; economical defences and currency within the empire; exhibition within the empire of empire films; the work of the imperial shipping committee; airship service and empire air route; co-ordination in technical liability of state enterprises to taxation.

There are still some subjects to be announced, Sir Henry Drayton, acting prime minister, said.

Gave Practical Demonstration

Famous Scientist Records "Heart Beats" of Snapdragon

Sir Jagadis Chandra Bose, the famous Hindu scientist, who says plants have heart pulsations, caused something of a sensation before the British Association by revealing the "heart beats" of the snapdragon by means of a delicate apparatus.

His apparatus, part of which was introduced to the assembled scientists for the first time, recorded the action of the snapdragon's heart beat.

Sir Jagadis also demonstrated that nervous reactions in plants are stimulated by drugs in the same way as human beings.

FOR "Cholera Infantum" MOTHERS SHOULD USE

This valuable preparation has been on the market for over 80 years, and has no equal for offsetting the vomiting, purging and diarrhœa of cholera infantum.

43—Narrow paths.
47—On the ocean.
50—Companion.
52—Make lace.
55—Musical note.
57—Pronoun.

Indicates Great Brain Power

Professor Advances Theory About People With Little Hair

The meetings of the British Association for the Advancement of Science are affording discussion on subjects of popular interest among scientists, ranging from why primitive man lost his hair to the danger of the world population overtaking the food resources, and the wastage involved in growing raw material for alcoholic beverages.

Prof. Herbert J. Fleure, of the anthropology section, supported the theory that lessened hair growth came with increased brain power.

Dr. R. T. Cunther, a noted authority on natural history, presented the theory that shagginess first became uncomfortable when primitive man discovered fire and used it as a weapon against his fellow men.

In the agricultural section, Sir Daniel Hall, professor of history of the University of Rangoon, Burma, in a presidential address, urged the necessity of new views on agriculture. He argued that a vegetarian was "most economical," and that vegetarian diets would become increasingly necessary, as was proved in overcrowded China and India.

Dr. Hall admitted, however, that the race which cut out meat and alcohol in order to multiply would always be of a slave type.

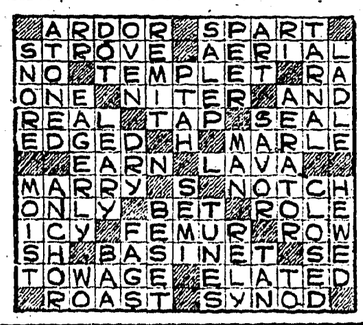
Possible to Broadcast Heat Waves

It is no more improbable to broadcast heat waves than it is to broadcast sound waves, according to Prof. E. S. Dibble, of the Carnegie Institute of Technology. Discovery or invention of instruments capable of controlling heat waves, and a detector that will hold the waves and amplify them are the main need.

"Do you like shrimps, Helen?"

"Oh, George, you're not so small!"

Answer to Last Week's Puzzle



No Alibi For the Choir

A young clergyman gave out the weekly church notices as follows:

"On Thursday, God willing, there will be a mothers' meeting at 5 p.m.

"On Friday, God willing and the weather permitting, we will hold the church committee meeting at 7 p.m.

"On Saturday, in any case, there will be the usual choir practice at 6 p.m."—Boston Transcript.

Strange, Romantic Love Adventures of the Flapper you know!

Joanna

by H. L. GATES

Copyright 1925 by H.L.GATES

Published by arrangement with First National Pictures, Inc.

CHAPTER XI.—(Continued)

"I'm afraid I would be awfully funny to you," she said to Yvonne, her excitement at the prospect playing in her voice. "I can't be still, for long, because there is so much I want to do but can't think of, that I just ran around in circles."

"But I'll help you, perhaps," Yvonne assured her. "I shall have as enjoyable a time about helping you launch yourself, as you, yourself. There will be a motor car to buy—and I've never got over my fondness for picking out motor cars; and jewels and clothes—it will be a lark, truly!"

Joanna would have yielded to Yvonne's suggestion that to-night would be as good as any other time, but while they waited in the foyer of the restaurant-club for Brandon's car and Yvonne's, Brandon murmured to her:

"Decisions made after midnight are not always safest. Yvonne will welcome you tomorrow, as warmly as to-night. And tomorrow will do you just as well. I am going to drive you home."

"You mean," Joanna said, lightly, "to the rooming-house. Whatever I do, or wherever I go, you must remember that I haven't any——!" She waited a while, while she bit at her lips. Then she finished: "That I haven't had any home, for a long time!"

CHAPTER XII.

Joanna Visits Eggleston

So Joanna, a billow of snow white ermine, nestled in the cushions of Brandon's limousine, went happily to the place she had called home. Went to the rooming house where Mrs. Adams lost her sleep over flapper lodgers. She thought it would be for the last time.

Realization that she was rich, fabulously rich like Yvonne Coutant; like a movie star, like Mrs. Delancy Jordan, with whose son Bob Joanna once had a date, negotiated over his mother's shoulder at the silk counter, had settled at last in her groping brain. Her fight for understanding of the fantastic thing that had happened to her was over, soothed away by the retrospects of the evening. The feel of the ermines against her cheeks and throat and shoulders, the nearness of Brandon, who wore his evening clothes so smartly, the prospects of the morrow when she would move into the aura of Yvonne, the symbol of Life, throbbed through her pulses and suffused her alert body with a gentle glow.

For the twentieth time she resolved to puzzle no more about the source of the money or the reason of it. Something would happen to her, of course. She'd meet it on tiptoes. One thing, though, she must square up. Brandon, whatever his part in her affairs, mustn't think she was—well, the kind of a bell that is all clapper and no ring. She taxed him suddenly:

"Why didn't you want me to go to Miss Coutant's tonight? It would have been much easier than tomorrow."

"A wholly selfish reason," Brandon informed her. "You're an important person to someone, you know, for some reason. Decisions you make now are of consequence. I'd rather not have the responsibility of delivering you into anybody's guidance. Then you will not be able to tell me about it later on, if you feel like it."

"Do you think I shall ever be sorry?"

"Decisions made after midnight are not always safest. I'm going to drive you home," said Brandon.

"That doesn't follow. Certainly, though, Yvonne Coutant represents a distinct theory of what life owes its dependents. You wouldn't adopt her as a counsellor in the same impulse that would lead you to go in for—let us say, uplift!"

"Yet you want me to go to her, to learn from her what to do with my money, to spend it her way, and to become like her? You knew she was going to ask me. You arranged it."

She saw that she had struck home. For a brief moment Brandon was perturbed. Then he smiled to her. "When you begin to accuse me I know I'm getting on," he murmured.

"Oh, I shall let you get on fast enough until I know what's what. Then—"

"And then what?"

"There's no use going to a funeral until somebody's dead, is there? We won't be downhearted now."

When he stood with her for parting minutes in the rooming house reception hall, where a dim light burned its grim reproach to young ladies who breezed in from midnight to four, Brandon suddenly took Joanna's hands in his and gently drew her to him until she stood quite close, so that she had to lift her chin to look into his face. For a moment she was panic stricken. It was the prelude of a kiss, she thought. She didn't want Brandon to kiss her. Her lips burned at the threat of it. She would not protest if he asked her, or if he took his caress without asking. But it would spoil the evening. Still, when chaps were decent and had contributed what might be called a good time for lack of a better phrase, there was but one coin with which to reward them—the coin that passed frankly as currency. But she didn't want Brandon to take it, and he didn't.

He held her hands and looked down into her eyes silently. She met his gaze steadily, unafraid, but quivering a little. She had reasoned to herself that tonight she had discovered a clue to her fear and dislike of this cynical, good looking, perfectly poised man, who impressed her always as if he was taking charge of her. It would be woman, she thought. The woman in her leaped to the defensive before him, and with a sense of futility. Kenilworth she could battle on his own ground. Brandon tortured women, she had concluded. She wasn't ready yet to meet him fairly.

But he spoke softly. "Do you know," he said, "I shouldn't be surprised if you'd win through after all!"

She caught her breath. "Win through? Why—what!"

He dropped her hands instantly, and his manner changed. "You must forget that," he said, mocking again. "It's another case of a funeral with nobody dead yet. At least don't remember it for a long time."

Georgie, her own new hats and wraps and gowns, Joanna's shower of gifts, hung from the door top, the chandelier and either side of the mirror, so that she might prop back on the bed pillows and examine them, was awake and waiting. She refused all invitations for the evening, both sentimental and hilarious, frankly admitting she couldn't leave her wardrobe at home alone. Joanna threw off her momentary depression, the aftermath of Brandon's sententiousness, and plunged into a gay recital of the night's events. Then Georgie broached her own news.

"John was here tonight," she announced. "He was at the bank today. Mr. Egglestone sent for him. Mr. Graydon at the store had told Mr. Egglestone what you had said—that John had suspected the place the money came from. The bank wanted to put him right. John's got it all through his half baked mind and he's like a bird dog that's been pointing the wrong way."

Joanna sank onto the bed, the wistfulness haunting her eyes again. Her plans for the morrow began to crumble, and in their place rose something else, vague and unshapen, but before it she stood side by side with John. Then with a petulant shake of her shoulders she re-assembled her plans, and the arrogance came back into the tilt of her chin.

"But he hurt, George. I don't think—"

"Oh, you can arrange things to suit yourself," Georgie assured her wisely. "He's got six cylinders under the hood maybe, but only one works. I've always told you he was full of carbon. He's frightfully cut up."

"That's not it. I knew he would be some day. It wasn't me he suspected so much as it was anybody, any girl, I mean, who's got knees and isn't ashamed to show them. I'm going to—"

"What?" Georgie prompted her, but Joanna bit her lips and wouldn't finish her sentence.

YOUNG WOMEN SUFFER MOST

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was awful sick each month, too, having pains in my back until sometimes I was obliged to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me and I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year and recommend it to others."—DONALDA FANTEUX, Ayer's Cliff, Quebec.

"Unable to Work"

Canning, Nova Scotia.—"I had irregular periods and great suffering at those times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved."—LAURA J. EATON, Canning, King's County, Nova Scotia.

Anti-British Sentiment

This Propaganda Is Spread All Over France

The British Government was seriously exercised by the flood of anti-British propaganda which is spread all over France, stimulated by the fall of the franc.

While Paris has shown particular antagonism to Americans, the French people in the country attribute the rise in the cost of living to the pound sterling and are still inclined to regard most foreigners as Englishmen. The result is a feeling of irritation and hostility towards Britain all over France.

This is due, of course to ignorance of the situation, but its existence is nevertheless disquieting.

New Theory About the Moon

Was Formed From Layer of Earth's Crust is Belief

A new theory is now being put forth that the moon was formed from a layer of the earth's crust, about 41 miles thick, and covering about two-thirds of its total area, and which was pulled off by the attraction of the sun. The crustal area left on earth formed the continents. This theory also accounts for the fact that while, according to generally accepted ideas, masses of lighter density such as make up the earthly continents should cover the entire surface of the globe, they actually cover only about a third, the missing two-thirds consisting of the moon. The new theory also fits in with the ideas of a German geologist, Professor Alfred Wegener, who believes the American continent was originally united with Europe and Africa, and that it floated away to its present place. This would not have been possible so long as the entire earth was covered with such a crust, but after the moon had been torn away it was possible for the continents to separate from their long embrace.

Little Helps For This Week

There shall be one fold and one shepherd.—John x., 16.

Wild bird flying northward, whither thou?
And vessel bending southward, what thy quest?
Clouds of the east with sunshine on your brow,
Whither? and crescent setting in the west?
Still we pursue while the white day is ours;
The wild bird journeys northward in his strength;
The tender clouds waste in their sunny bowers,
One shepherd guides and gathers them at length.
—Annie Fields.

He will guide us in a sure path, though it be a rough one; though shadows hang upon it, yet He will be with us. He will bring us home at last. By His eye or by His voice He will guide us, if we be docile and gentle; by His staff and by His rod, if we wander or are wilful; anyhow and by all means He will bring us to His rest.—Henry Edward Manning.

A Remedy for Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Eclectric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

Some people never succeed in finding out which side of their bread is buttered until they drop it.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

A woman can keep an expense account almost as long as a man can keep a diary.

Minard's Liniment for Dandruff

Hobson.—So your wife is convalescent. That's fine! I heard the doctors made a great fight for her life.

Dobson.—They did, and they almost got it too.

STANDARD OIL CO. (NEW JERSEY)

New Zealanders Patriotic

Few German goods are entering New Zealand, merchants declare. Before the war the importation of German hardware was very considerable, but it is now very small. The average artisan refuses to buy tools unless the name of a British manufacturer is branded on them. Germany has lost all the cutlery trade.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little one every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

C.N.R. Earnings Show Increase

The gross earnings of the Canadian National Railways for the period ended July 31, 1926, were $7,408,639, as compared with $7,059,027 for the corresponding period of 1925, an increase of $349,612, or five per cent.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

"You say Cohen was so badly injured that he lost his speech?"

"Yes, both his arms were broken."

Minard's Liniment for insect bites

Don't imagine that because one of the participants in a quarrel is wrong, that the other is altogether right.

Most men are as anxious to get rich as most women are to be beautiful.

CRESTON, B.C., FRIDAY, OCT. 15

The Prairie Selling View

By S. J. FEE, Vernon Fruit Company, Calgary, in Calgary Daily Herald.

"Selling organizations for the British Columbia apple crop are getting very much worried over the marketing of one of the largest crops British Columbia has produced, and by far the best quality, as most of the poorer variety trees have been replanted to the better varieties," so S. J. Fee, of the Vernon Fruit Company, informed The Herald, Thursday.

"The long spell of bad harvesting weather over the prairies came just at the time when British Columbia was expecting the heaviest consumption of apples, and the demand dropped from one hundred and twenty-seven cars in one day from the Okanagan, to a daily demand of thirty to fifty carloads. This partially dammed the outflow and overfilled the packing houses. Every effort was made and is being made to overcome this. Very reasonable prices, attractive and careful pack, and heavy export of those varieties and grades that are popular in other countries, obtain.

"However, while the apple growers and their selling agencies are gloomy over the situation, it probably will prove one of the best things that could happen to them," Mr. Fee continued. "It will force them to market their crop in an up-to-date manner, instead of the old way of forcing almost their entire crop onto the markets in the few short harvesting months, tumbling one popular variety on top of another, overloading all markets, city and country, causing heavy wastes in depreciation from poor storage facilities, sacrifice, sales, and the tieing up of large sums in freights, packing charges, and so forth.

"Then, no matter how great the crop is, by late winter or early spring, apples are being imported from the storages across the line at a greatly increased cost to our consumers."

"Years ago it was necessary to distribute the apple to the country as early as it was possible to do so. Farmers often came very long distances to get their apples and brought their winter supply. Horses made such trips very slowly, and the danger of the apples freezing was a serious one, and had to be avoided. Now, with autos and better roads has entirely changed the farmer's way of buying apples. He now buys a box whenever he wants it, and gets it home without any danger of freezing, and he only buys a box when he needs it.

"It is the same in the cities. No ratailer stocks up; he buys what he wants from day to day. He has his apples fresh and at all times. Neither does the wholesaler carry any great stock. The selling margins are too small.

The apple selling agencies have not fully grasped these changed conditions and keep trying to force the markets beyond their economic needs. No apple is really out of season as long as it is in prime condition, and the fear that it will get out of season and its sale over forced has caused very seriour losses to the growers.

"The season for each variety can be greatly extended with proper handling and storage, and the apple season made to last the entire twelve months with a very greatly increased consumption.

"There are two other matters for the applegrowers' serious attention. While the wholesalers and retailers are working on the closest possible margins, it is a queston if the packing houses and selling agencies could not considerably reduce their costs. There is the matter of freights. Years ago apples cost us for freight, twenty eight cents per box from Okanagan points to Calgary for cars of 550 boxes; now it is thirty-five cents for 750 boxes, a difference of more than $100. or seventy per cent. per car. The figures that it cost so much more for haulage, wages, coal, etc., are open to question. A crew will now handle fifty cars of heavier tonnage as against twenty five of lighter tonnage.

"It is true apples are a higher class classification than lumber, for instance, but both are handled on the same trains, and railways insist on apples and such charges being guaranteed, so, taking no risk that way, why should there be so much higher a rate. It looks like a discriminating charge against a great food staple."

In an editorial headed, "A Better System Needed," the Calgary Daily Heraly observes:

British Columbia apple growers are victims this year. Their crop is not only tremendously large but of finest quality. To complete the sum of their discontent, the long delayed harvest on the prairies has made the farmer slow in his purchase of apples. He will buy them ultimately, but the grower wants him to buy right away.

At first glance there would seem to be no cause for distress this season among the fruit growers. Their trouble, according to one fruit authority, is that they have not adopted up-to-date methods of handling the crop. This authority deprecates the plan which is in vogue with the growers, of dumping the crop on its natural market over the short period of a couple of months. His idea is that the apple season should and might be extended by the growers to include the whole year.

If as Mr. Fee says, the British Columbia apple crop contains sufficient good keeping varieties to hold the home market for the whole year provided proper storage arrangements are made, it does seem foolish for the growers to force the whole crop on the market during a small portion of the year. Apple buyers in both country and urban districts on the prairies are not inclined to load themselves up with a full year's supply at one time. What is more, they do not have to. They know that when the British Columbia stock is off the market they can be supplied with fruit from storage stocks in the United States.

This question of storage looks to be a matter of vital importance to the British Columbia growers. If they are able by this means to control the apple market of the Canadian west for the whole year, thus keeping the United States grower out of this part of Canada altogether, they should surely go in for storage. It is not true, as would appear to be the case, that British Columbia is growing more apples than the prairies are able to absorb. What is lacking is a system of orderly marketing of the Canadian fruit. The co operative growers should make study of this problem.

How Do Your Children Grow?

Only a few more days remain of the summer holiday season, and soon boys and girls all over the land will be trooping back to school. Johnny, who was in the fourth grade last year, has passed into the fifth, while Bessie has moved from the eighth grade into high school. They are looking forward to meeting their new teachers and becoming acquainted with new school mates. Their advancement from grade to grade are milestones along the way indicating one form of growth.

In our modern school-system both Johnny and Bessie were examined last term by the school nurse and their height and weight recorded to ascertain if they were normally developed for their ages or underweight. From time to time their weights were checked to determine if they were making gains or losses. Johnny gained nearly five pounds during the last term, but Bessie did not do quite so well. The same system of checking up their physical condition will be continued this term. Thus is growth in another way revealed and recorded.

From year to year teachers and parents can follow the growth of the children under their care in these two respects. Examination papers, marks received, application displayed in studies, passing from grade to grade, into high school and college, tell the story of mental growth, increase in knowledge, and development of those powers of thought and concentration which mark the advancement of our modern civilization. Measurement charts and weight tables, increased application in study, more vigorous enjoyment of sports and all forms of outdoor recreation, in like manner reveal physical growth. These two things are fully demonstrable, and through our modern methods in education we demonstate them. We know, by comparison of records extending over a period of years, that the standard of intelligence is higher and that the span of life is being lengthened.

It is well that these tests and measurements of the mental and physical development of the younger generation should be made, that records be kept, and that these be compared and analyzd so that we may know where strength and weakness exists, and thus learn the correctness of falsity of the methods being employed.

Our school system, however, has a greater function to perform than the giving of knowledge, the development of boys' or girls' mental faculties, and the encouragement of right living leading to physical health and strength. These things are, after all, but the foundation stones upon which to erect that noble structure which true education is designed to build—character.

Our examination tests and physical records do not, and cannot, reveal whether as a result of the school term any hardening iota of character has been added to the wobbly parts of any boy's moral backbone, or any of the essence of spirituality made more fragrant any girl's standard of conduct. Intellectual equipment and bodily vigor without character only serves to launch into the world a man or woman capable of doing greater harm than they could otherwise do. On the other hand, the development of a fine character, supported by bodily vigor and those attainments and refinements with which education endow, results in giving to the world the greatest of all gifts.

Character training should be the aim of education, first, last, and all the time. No child is too young to begin it; no student is old enough to dispense with it. Those who provide education, whether it be the teacher, the parent, boards of school trustees, or the taxpayer whos money maintains our educational system in its entirety, are engaged in fitting others to take their places in the life and activities of the world. They must not forget the fundamentals.

Life is becoming more strenuous year by year; the newcomer must be better equipped than the one whose place he takes. Activity crowds upon activity, distraction upon distraction. Science and invention is setting a swift pace which calls for all the resources of mental and physical power of which the race is capable. But above all it calls for strong characters, men and women of sterling honesty, uprightness of purpose, high ideals and noble ambitions.

Within the first quarter of this present century greater advancements in science and invention have been made than in any like period in the world's history. The world has moved forward at an unprecedentedly rapid pace, and the developments of the past twenty-five years have but opened the way to even more momentous and still more rapid strides in the years just ahead. The boys and girls of today must be fitted for the great responsibilities which will be theirs. If they have character they will rise to the occasion; lacking it, danger signals can be seen on every hand.

Character is the perpetual reminder that education carries with it a responsibility. How do your children grow? In mental attainments; towards physical perfection; in strength of character?

"That's a good one on me," said the boy, as the minister sat down on him.

Has Established A Record

Paris Clerk Gives Gallons of Blood To Heal Sick

Having given 22 liters, roughly five gallons, of his blood in 87 transfusions and operations since November, 1924, Reymond Briez claims to have established a record. Briez is a healthy looking, fresh complexioned young man, employed in the clerk market of Paris. He is 29 years old, is married, and leads a normal life, going to the office every day.

He happened one day to visit a sick friend in a hospital and met Dr. Becart, who stopped him and said, "You have a splendid looking pair of cheeks, I have good use for you."

He had his blood analyzed and the first operation was performed, which since then he has repeated almost continuously. Dr. Becart presented him to the International Congress on Surgery in 1925 and an American doctor offered him $25,000 to come to America.

Sour Stomach Risings Subdued by "Nerviline"

A Few Drops Bring Relief

The wonderful relief you get from twenty drops of Nerviline will surprise you. Take it in sweetened water, and almost immediately you feel better. Nerviline brings up the gas caused by fermenting food, and relieves that distressed feeling in the stomach. When colic or cramps strike you at night, Nerviline is a sure relief. For general use in the family, for emergent ills, always keep trusty Nerviline on hand. 35c at all dealers.

Bridges Built In Dark Ages

Eighteenth Century Engineers Had To Re-invent Principles Of Construction

It is a curious light upon the interpretation of our common term "the dark ages" that those "dark ages" should have given England nearly all the bridges she had till the time of the Georges, for bridge building perished with the destruction of the monasteries, and even the principles had to be re-invented by eighteenth century engineers.

RUN DOWN IN HEALTH

Why Many Men and Women Are Badly Handicapped

When you are so run down in health that it impairs the efficiency of your work as well as your power to enjoy your leisure hours, or obtain rest, it is time you looked to the cause. If you do not, a serious breakdown is almost sure to result. In nearly all cases this condition, which doctors usually describe as general debility, is due to poor blood—blood that is deficient in red corpuscles. When the blood is thin and weak your whole system suffers. You lose appetite, have no energy, your nerves trouble you and you feel restless.

What you need is help to build up your blood and you should begin at once to make your blood rich and red by taking Dr. Williams' Pink Pills. You will soon notice the difference in your health by a better appetite and increased vigor. The reason is that the new blood created by Dr. Williams' Pink Pills stimulates all the organs of the body to healthy activity and so the system gains nourishment and strength. If you are weak or out of sorts, begin gaining new strength to-day by taking Dr. Williams' Pink Pills. "I was in a badly run down condition," says Mrs. J. Potter, of Winnifred, Alta., "when I began using Williams' Pink Pills and they fully restored my health. I strongly recommend this medicine to all weak people."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Air Service To Red Lake

Flights by regular aeroplane service into the northern goldfields of Manitoba and Ontario will soon be as common as stepping on the gas of any motor bus travelling into all districts surrounding Winnipeg. The newest route through the air to be organized for business is that of the Patricia Airways and Exploration Limited, which promises a daily service from Sioux Lookout, on the Canadian National Railways, to Pine Ridge, Red, Woman, Birch and Cat Lakes. Special stamps have been issued and necessary permission to carry mail has been given by the post office department.

There are two ways of running for office—the other one being when the alarm clock doesn't go off in time.

Minard's Liniment for Corns and Warts

This Washboard will wear for Years

IT'S so strong you could stand on it without doing it any harm. The rubbing surface is heavy SMP Pearl Enamel, positively smooth as glass, but unlike glass, *it cannot break!* And it won't wear out, like zinc. The back is heavily re-inforced with wood. It's a washboard that will last for many years, and remember, it is SMP made.

SMP ENAMELED WASHBOARD

Bootleg Booze Is Fatal

Alcohol Causes Third of the Heart Disease Mortality

One-third of the 116 deaths attributed to heart disease and the same proportion of 49 laid to apoplexy during July were traceable directly or indirectly to alcohol, according to Health Commissioner Francis E. Fronczak, of Buffalo. He expressed the opinion that physicians failed to give the real causes of death in many instances to protect the names of families of the dead.

Out of the 29 deaths admittedly due to alcoholism during the month, 14 were caused by wood alcohol poisoning, the commissioner's report says.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Eclectric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

Queen "Hat" Reconstructed

Queen "Hat," who was the Queen Bess of ancient Egypt, has been reconstructed by Mrs. Winnifred Brunton, and Londoners are now able to get some idea of the appearance of the strong-minded ruler who dressed as a man on state occasions. The real name of this queen was Hatshepsut. But Egyptologists have nicknamed her "Hat."

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

Canada's Highways

Canadian highway development last year cost $150,000,000. There are 400,000 miles of highway in the Dominion, 55 per cent. of which are unimproved earth, 10 per cent. gravel.

Keep Minard's Liniment handy

Rather Hard to Answer

Emily had been fascinated by Uncle Will's stories. Particularly was she impressed with some exploits of Teddy Roosevelt before he became president of the United States.

"And do you rmember him?" asked the little girl.

"Yes, indeed," replied her uncle. "You see, I'm much older than you."

"Well, then," she asked, "how much older will I have to be before I can remember him?"—Christian Science Monitor.

Encourage Canadian Authors

Assistance Should Be Given To Canadian Writers Dealing With Canadian Material

The advice of Robert Watson, Canadian novelist and poet, given at a session of the Canadian Authors' convention in Vancouver, was to make literature a crutch rather than a staff. The Canadian reading public was limited and where two or three well known authors had their works distributed years ago, there were scores today. He thought, however, that Canadian writers should get a number of level-headed businessmen to take up the question of syndicating by Canadian newspapers, Canadian material by Canadian authors. He laid special stress upon the fact that while the American Government taxed the work of Canadians going into the United States, the Canadian Government put no taxes upon the enormous flood of American literature circulated in Canada.

A very interesting talk upon his experiences with publishers was given by Arthur Hemming, noted Canadian author and illustrator.

Reduced by Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

Railmen Leader to Tour Canada

J. H. Thomas, general secretary of the National Union of Railwaymen, is about to embark on a tour of Canada, says the Westminster Gazette. Mr. Thomas, who was instrumental in ending the British general strike, is booked for a six weeks' tour of Canada.

Porter.—This train goes to Buffalo and points east.

Old Lady.—Well, I want a train that gets to Syracuse, and I don't care which way it points.

PAIN.
Minard's relieves pains and aches, is highly beneficial for stiff joints, sore muscles.
MINARD'S "KING OF PAIN" LINIMENT

Bakers Everywhere Are Adopting The Tiffany Bread Wrap
BECAUSE its lacy appearance appeals to all customers, and especially to women.
BECAUSE its wrinkle-proof quality prevents a loaf from looking shabby.
BECAUSE it is so different and so attractive that customers show it with pride to non-customers.
BECAUSE its distinctive appearance tends to put a baker's business on a higher quality basis.
BECAUSE the lacy edges of the wrap permit its use as attractive shelf paper—a constant reminder of the baker to all who see it.

Valuable Tree Planting Work Is Having the Effect Of Changing the Prairie Landscape

A gradual change in the general prairie landscape is taking place in Western Canada as a result of the co-operative tree-planting work being carried on the by the forestry branch of the department of the interior. This change is particularly striking to those who were familiar with conditions as they existed in Manitoba, Saskatchewan and Alberta some twenty-five years or thirty years ago. Thousands of shelter-belts have been established from seedlings, cuttings established fgrom seedings, cuttings and transplants distributed from the nursery stations at Indian Head and Sutherland, Saskatchewan, and the work has grown to such proportions that during the spring of 1926 over 5,500,000 seedlings and cuttings of such varieties as maple, ash, caragana, poplar and willow were sent out. In addition to these broadleaf varieties over 50,000 evergreen spruce and pine trees were distributed at nominal cost for general farm planting and about 60,000 for planting on forest reserves in Manitoba and Saskatchewan.

The progress of this important work will be better realized by a brief statement of the results obtained since it was inaugurated in 1901. The first distribution consisted of 58,800 seedlings supplied to 47 farmers in Manitoba and the Northwest Territories. In 1902 this was increased to 466,000 plants to 496 farms. The demand grew rapidly in subsequent years and in 1916 the number sent out had reached 4,460,000. Since then the annual distribution has continued between four and a half million and five and a half million, the total distribution for the twenty-five year period being 87,205,000 trees to 80,300 farmers scattered over the three prairie provinces.

During recent years the distribution has been carried on from two stations, Indian Head making shipments to Southern Manitoba, Saskatchewan and Alberta, and Sutherland to the northern districts. Careful check is kept of all material sent out until the plantations can be considered as fairly well established and no trees are allotted to an applicant until inspection and inquiry indicate that land has been properly cultivated in preparation to receive the young trees. In most cases special plans are prepared in the office of the tree planting division at Indian Head during the winter time for the guidance of the individual planters in the spring. This season some 3,297 plans were so prepared and during the summer the inspector will visit those who received trees to see that the stock has been properly planted and is being given reasonable care and cultivation.

The tree planting inspectors started out on their annual trips over their respective territories in the latter part of May and about 11,200 farms are on their lists to be visited. A staff of eight inspectors will be engaged in this work until the winter sets in, each visiting an average of 1,400 prospective planters. Unfavorable weather conditions last year cut short the inspection period, but reports show that 5,700 plantations were visited of which over 73 per cent. were in first-class shape, 20 per cent. fair, and only a little over 6 per cent. neglected. Those classed as fair could, with a little care, and attention on the part of the owners, be put in good shape.

The effect of tree planting on the social and economic life of the prairie provinces is considerable. Shelter belts have made the homestead more home-like and comfortable, while by checking the high prairie winds and conserving moisture the production of the farm is increased. The farmers of Western Canada quickly realized the value of planting trees and in the large and steady demand for material is seen their approval of this important work.

Old Lady (to booking office clerk).—"What time does the three o'clock train go?"

Clerk (smiling).—"Sixty minutes past two."

"There, I told Mary the time was changed."

A banana plant may grow 40 feet in a year.

Creamery Buttermaking

Composition of Product Must be Controlled Within Narrow Limits

Commercial buttermaking in Canada is not the easy task it was a comparatively few years ago when all that was necessary was to manufacture butter having good flavor, body, texture, color, etc., regardless of the percentage composition of fat, water and salt. According to a new bulletin on Canadian creamery buttermaking issued by the dairy branch of the department of agriculture, the butter-maker of today is required not only to manufacture butter having good workmanship, but also to control the composition of his product within very narrow limits. For instance, economical conditions demand that the moisture content of butter be not less than 15.5 per cent., while butter containing more than 16 per cent. water or less than 80 per cent. fat, is illegal. The salt content of butter is also very important and must be carefully regulated. Every detail in the process of making butter of high quality fulfilling all marketing requirements is described in the new bulletin, which may be obtained from the Publications Branch of the Department of Agriculture, Ottawa.

Russia Purchases Canadian Horses

From 500 to 600 Alberta horses are being purchased for shipment to Russia. These are animals weighing from 1,000 to 1,100 pounds, rather light for the Alberta demand, but just what the Russian needs. This is in the nature of a test order and if the horses give satisfaction it is expected that repeat orders on a larger scale will be received.

"Have you seen Johnson lately?" enquired one motoring speed-merchant of another.

"Unfortunately," remarked the latter, "I ran across him last night!"

Canadian Harvest Important

A Strong Demand For Canadian Wheat in World's Markets

According to the latest crop report issued by the Canadian Government bureau of statistics, the wheat crop of Canada for 1926 is estimated at 348,626,000 bushels. Last year's Canadian wheat harvest yielded 411,376,000 bushels.

In a general review of world crop conditions the report adds, "that production estimates from eighteen countries show that this year's total world wheat crop will probably be 2,175,700,000 bushels, compared with 2,201,500,000 last year.

"Judging by general conditions in other countries," the report continues, "the general outlook appears to be for a strong demand for the Canadian crop, now in its critical stages, so that the Canadian yield will again be a very important factor.

"There is an increase this year in sown acreage of one and a half per cent. In countries other than Canada and the United States the sown acreage is less, but the increase of 609,000 acres sown in Canada, and 5,487,000 sown in the United States recovers the balance."

"The French crop is reported unofficially as below the 1925 yield, and France probably will be an importer this year. Floods are reported from Germany. India is not expected to be able to spare any appreciable quantity of wheat for exports."

Big Wool Clip

It is anticipated that the wool clip in Southern Alberta will reach the 2,000,000 pound mark this year. Of this a million and a quarter pounds will be handled through the Canadian Co-operative Wool Growers' Association. The fleeces this year are stated to be unusually large.

Seed Oats From Manitoba

The Solsgirth Oat Growers' Association, of Solsgirth, Man., grew and prepared 30,000 bushels of registered seed last year and has practically disposed of it all, shipments going to every province in Canada, to the United States, and a choice shipment of 1,500 bushels to the Argentine.

Clemenceau Appeals To U. S. Not To Treat War Debts As A Purely Commercial Matter

"Old Father Victory" has again come to the defence of France in her hour of trouble.

George Clemenceau, wartime premier, appealed to President Coolidge in an open letter not to treat the settlement of war debts as a purely commercial matter. The proposed Berenger-Mellon debt agreement he asserted to be impossible of fulfillment and to threaten the independence of France.

The spirited appeal of "the Tiger," who will be 85 years old next month, came with dramatic unexpectedness at a moment when the French Government is hesitating before taking a definite position on the ratification of the proposed agreement.

The Franco-American negotiations leading to promise of payment, the former premier declared, are impossible of fulfillment because they would result in a loan "with solid security in the shape of our territorial possesions, as was the case for Turkey." He warned President Coolidge that France will never accept such a thing.

"France is not for sale—even to her friends," he said. "Independent she came to us. Independent we shall leave her."

For once, the "Tiger" has apparently taken off the famous gray gloves of his diplomacy. He tartly compared the separate treaty made by Russia at Brest-Litovsk during the war. Both were made, he charged, without "the slightest attempt" to adjust matters with their comrades in arms.

"After making a blood peace with the common enemy," he said, "today a money peace is being devised with the allied and associated powers."

M. Clemenceau entreated President Coolidge not to consider the war debts as purely cash transactions between creditor and debtor to be settled by technique experts. The United States attitude, he said, had made France uneasy today lest the United States be taking up "the old time policy of England," of controlling Europe by playing off one continental power against another.

American Settlers

This Year Witnesses Increased Movement of Settlers From U. S. To Canada

Marked activity in the movement of settlers from United States to Canada is noted by the department of immigration and colonization. In the month of June the Canadian Government agency at Fargo, North Dakota, was instrumental in moving to Canada 195 settlers, who, with their wives and families, represent a population of 312 people. They brought with them cash and effects valued at $495,550—almost half a million dollars. These settlers were almost entirely from the states of North Dakota and Minnesota, and were destined to Manitoba, Saskatchewan, Alberta, British Columbia and Ontario. They are practical farmers, attracted by the advantages which Canada offers to agriculturists. Forty of these families made the trip to their new Canadian homes by automobile.

The movement from the Fargo territory in June, 1926, was 135 persons greater than June, 1925.

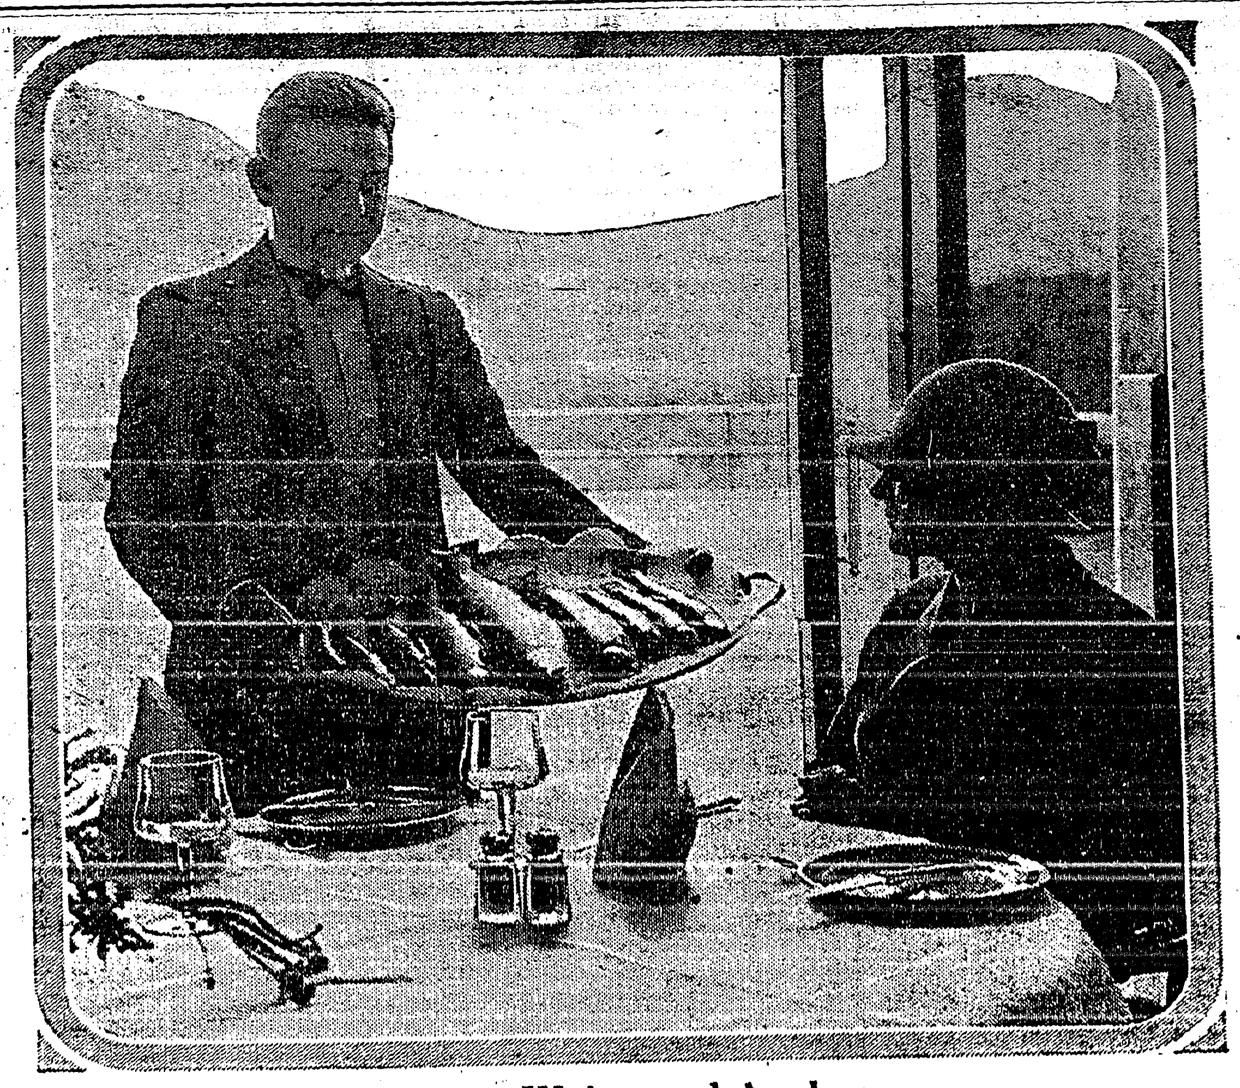
Preserving the Wapiti

The three hundred wapiti placed in Banff and Jasper National Parks, Alberta, a few years ago have now increased to fifteen hundred. In addition to these there are 350 of this otherwise nearly exterminated animal in Buffalo Park, Wainwright, and 220 in Elk Island Park.

Sea Fish Haul

The total quantity of sea fish landed in Canada last month on the Atlantic and Pacific coasts was 100,380,200 pounds, valued at $3,668,468, compared with 96,238,400 pounds, valued at $3,297,812, during June, 1925. This is an increase of 4,141,800 pounds.

A Chicago girl of 17 has three husbands, while many girls twice her age haven't more than one or two.



Tony, Waiter and Angler

When one goes camping in the wilds, it is absolutely necessary for one to provide the food, cook, then eat it. But why one should catch fish, supervise the cooking of it and then serve it to people whom one has never seen before seems to be the act of one suffering from over-kindliness. However there is one man in this country who feels it a duty to do this generous act, and instead of boasting of his prowess as an angler, but to treat people and serve them with what he thinks is the greatest food for a summer dish.

Umbarto Targella, head waiters' captain, at the Banff Springs Hotel, widely known as "Tony," when not serving guests of the hotel at meal hours, takes a boat, also his fishing tackle, which is composed of the very best rods available, with every known fly, and journeys to the Bow River to patiently sit and wait for the fish to take the bait. Often he may be seen as early at 5 a.m. with his inevitable fishing rod. When he has had good sport, he takes the fish to the chef of the hotel and supervises the cooking with the experiness of the best Italian or French chef.

Then he himself, makes a special point of serving the fish to people who desire the delicious morsel, and his smile of gratification grows with every call for his fish.

He first introduced the idea on the morning of the opening of the new dining room of the Canadian Pacific Hotel at Banff. The following morning he had more orders than he could cope with, so now he spends every available moment to secure the finnery breakfast for his friends, as he now calls the guests.

A New Breed Of Cattle

Yakalos Now Being Developed At Wainwright National Park

The new breed of livestock called "Yakalos" is being developed in the national park at Wainwright by crossing buffalos with yaks.

"Yakalos" combine the meat producing qualities of the yak with the foraging characteristics of the buffalo, said G. B. Rothwell, director of the animal husbandry division of the department of agriculture. The new animals breed true to type, he said, and have proved more adaptable than "catalo," evolved several years ago by crossing buffalo with domestic cattle. Cattalos are sterile.

The meat of Yakalos is described as almost identical with beef, aside from being finer grained. The animals are hardy, can forage for themselves, are capable of wintering in the open, and are resistant to many of the common diseases of domestic cattle.

Seeding Down To Grasses and Clovers

The Proper Place In Rotation to Seed Grass and Clover Mixture

Tests made during eleven years at the Brandon, Manitoba, experimental farm in order to determine the proper place in a rotation in which to seed down a grass and clover mixture have brought out several important factors. It is shown that the use of a nurse crop, especially wheat, is more economical than seeding the grasses or clovers alone. Seeding on corn land is advantageous provided the corn has received good cultural management. The application of manure to first year stubble previous to seeding down has not proved to be economical. Maximum yields are not likely to be obtained where second year stubble is seeded down.

Stefansson, the explorer, says that in the course of almost 12 years spent in the Arctic regions, his diet was 100 per cent. meat the greater part of the time.

Local and Personal

GOAT FOR SALE—Dry. Price, $12. C. Blair, Canyon.

The 1926 grouse shooting season closes at sundown tonight.

Cabbage, carrots, onions, potatoes for sale. Fred Lewis, Creston.

Christ Church Ladies' Guild announce their annual bazaar for December 4th.

COW FOR SALE—3-year old new milch cow and calf, $75. Mrs. P. Heric, Erickson.

Mr. and Mrs. O'Neil of Gray Creek are Creston visitors this week the guests of Dr. and Mrs. Lillie.

R. A. Maxwell of the Premier garage, was a visitor with Spokane friends a few days this week.

A whist drive will be held on Friday, October 15th, at 8.30 p.m., in the Parish Hall. Admission 35 cents, and everybody invited.

FOR SALE—30-gallon hot water tank and piping, $12.50. Also large, new washtub and set of feather pillows. Mrs. W. K. Brown, Creston.

Rev. S. Newby was at Cranbrook on Sunday, where he took the evening service in the Church of Englgnd in that town.

W. R. Ross, the well known Kimberely barrister, was here on Thursday and Friday on legal business at the police court.

Rev. F. V. Harrison of Cranbrook, who took the evening harvest thanksgiven service at Christ Christ Church on Sunday, was a guest of Mr. ond Mrs. Jas, Cook during his stay in town.

MEN'S

Pure Wool Hose

at

50c. Pair

A pure wool hose with wide bar ribs, close knit top—just the hose you are wanting for these chilly days.

COLORS:

Grey - Fawn - Black.

V. MAWSON

Loyal Orange Lodge, No. 2095

Meets THIRD THURSDAY of each month at Mercantile Hall. Visiting brethren cordially invited.

W. H. CRAWFORD, W.M.

Lutheran services for October 17th are: Sunday school at 10 a.m., and preaching service at 7.45 p.m., at G. Reinwald's. The sermon topic is "The Christian's Armor."

Due to pressure on our space this week we are compelled to hold over till next issue reports of the October meetings of the Women's Institute and the Board of Trade.

Chas. Biafore, a former fruit buyer in this section, now in the retail store business at Blairmore, Alberta, is here this week, and is making the purchase of a couple of cars of apples.

COW FOR SALE—One gentle milch cow, Jersey-Shorthorn, 6 years old, extra good cream and butter cow, due to freshen October 21st, $75. Mrs. M. Nathorst, Wynndel.

TOWN PROPERTY—Lots for sale on Barton Avenue, Creston, $10 down and $10 a month, with no interest. Apply Mrs. F. A. Barton, 2912 Wood-and Drive, Vancouver, B. C.

Due to harvest thanksgiving services being scheduled for Wynndel in the morning and Sirdar at night Church of England services at Creston next Sunday are withdrawn.

If you are troubled with your eyesight don't miss the visit of F. W. Stacey, the well known eye expert, who will be at the Creston Hotel on Saturday evening and Monday morning.

The September accounts passed at the Monday night sitting of the village council totalled but $158, of which $158 was to pay for sidewalk lumber, and another $50 was the donation to fall fair.

Trinity United Church Ladies' Aid have appropriated Thursday evening November 25th, for their annual chicken supper, and the afternoon of Saturday, December 11th, for the annual bazaar.

Creston Valley Co-Operative Association are now using the 40-foot addition that has just been made to their new store in town, and which expedites the handling of the firm's big trade in mill feeds.

The weather the past week has been about 50-50 sunshine and showers with gloomy weather mostly in evidence. There have been no severe frosts, and apple picking should be about compeled this week.

In reply to a wire from the Rod and Gun Club, Secretary Butler of the Game Conservation Board states that Hungarian partridge can not be shot in this district. There is no open season on these birds.

At the sacrament and reception service at Trinity United Church on Sunday evening five new members were received in to full communion, bringing the membership of the Creston congregation up to 95.

PHOTOS—Mr. V. C. Russell of the Photo Crafts Studio and Art Store, Cranbrook, will be in the Lamont building, Creston, on November 4th, 5th and 6th. Don't miss this chance to get your Christmas portraits taken.

The fall fair directors were in session on Wednesday night to wind up affairs in connection with the 1926 exhibition. Although receipts from admissions, particularly, fell off it is hoped to be able to pay all debts in full.

The Cranbrook Courier states that our former townsman, G. M. Argue, is resighing as manager of the City Drug Company at Nelson, and will take full charge of the Beattie-Noble drug business at Cranbrook next month.

The Women's Institute have named the president, Mrs. R. Stevens, as a delegate to the Kootenay-Boundary institutes' conference at Nelson next month. The total intake on tag day for the Children Aid Home at Vancouver was just over $72.

At the meeting of the village council on Monday night instructions were given for the preparation of a needed by-law to permit the commissioners to purchase lands for street or other purposes. The council has in mind the opening of a couple of road extensions.

Miss Olive Whyte, United Church deaconess, who has been working in the Kootenay presbytery for a little over a year, is spending the next two weeks in the Creston Valley, which will wind up her work in this district, after which she will work in the Cariboo country.

The Rod and Gun Club ask us to announce that there is no pheasant shooting allowed this year, the club being unable to get the Game Conservation board to permit the two-day shoot in the district east of Kootenay Landing as well as west of that point, which is fixed for today and tomorrow.

At the Creston Reclamation Company meeting on Friday night at the town hall a special finance committee selected to make a call on likley investors to secure the needed funds to get on with the dyking of a first unit of 2000 acres. The committee is to report at another meeting called for this (Thursday) evening.

R. B. Staples was a Thursday to Sunday visitor at Creston, coming in from Vernon to look after some urgent Creston Growers, Ltd., business. He states that the Okanagan has still an enormous tonnage of McIntosh Reds to move, and there is heavier exports of apples from that district than ever before.

D. W. Stover, an engineer of the Dredging Contractors, Limited, Vancouver, was here on Friday conferring with the directors of Creston Reclamation Company, Limited. The firm he represents is anxious to have the contract and be associated with the local company in the reclaiming of the 10,000 acres conceded the Creston company on the flats by the department of lands.

F. H. Puckett, field superintendent, and Engineer Sloan, from the Morrison-Knudsen Company, Boise, Idaho, were here on Wednesday and made an inspection of the 2000 acres Creston Reclamation Company, Limited, propose dyking as the first unit of their big projec. Afterwards the visitors conferred with the company directors and will submit terms and a bid on the work on the occasion of a return visit early next manth.

A whist drive will be held on Friday afternoon, October 29th, at 3 o'clock, in the Parish Hall. Admission 25c.
