PROVINCE OF BRITISH COLUMBIA

THE MILK BOARD

ANNUAL REPORT

for the

YEAR ENDED DECEMBER 31

1971

Printed by K. M. MacDonald, Printer to the Queen's Most Excellent Majesty
in right of the Province of British Columbia.
1972

To His Honour the Lieutenant-Governor in Council
of the Province of British Columbia

MAY IT PLEASE YOUR HONOUR:

SIR: We have the honour to transmit herewith, in accordance with section 56 of the *Milk Industry Act,* the Twenty-sixth Annual Report of the Milk Board under that Act for the year ended December 31, 1971.

THE MILK BOARD

E. D. DAUM, *Chairman*

J. D. HONEYMAN, *Member*

C. H. P. KILLICK, *Member*

Vancouver, British Columbia, February 18, 1972.

Twenty-sixth Annual Report of the Milk Board

For the Year Ended December 31, 1971

This Report of the Milk Board is made in accordance with section 56 of the *Milk Industry Act* and covers the calendar year ended December 31, 1971.

The format of this Report and the related statistical information is considerably changed from that of previous years. The Board is of the opinion the changes implemented provide not only additional pertinent information but present it in a more meaningful form.

LEGISLATION

Milk Industry Act

There were not any amendments passed during the 1971 Session of the Legislature.

Milk Board General Orders

General Order 48 (B.C. Reg. 119/71), made on April 23, 1971, amending General Order 46 (B.C. Reg. 126/70), came into operation on May 1, 1971. The effect of this order was to repeal General Order 47 (B.C. Reg. 305/70) and establish the new base period of 1961–70 and the new base-period values. The order also increased the Class III accounting value by 25 cents from $3.460 per hundred pounds to $3.710 per hundred pounds. This change was necessitated by a 4-cent-per-pound increase in the support price for skim-milk powder and cheddar cheese announced by the Canadian Dairy Commission on February 5, 1971.

General Order 49 (B.C. Reg. 256/71), made on October 22, 1971, further amending General Order 46 (B.C. Reg. 126/70), came into operation on October 1, 1971. This order increased the butterfat differential for all classes of utilization as well as increasing the Class II accounting value 10.5 cents from $2.292 per hundred pounds to $2.397 per hundred pounds and increasing the Class III accounting value 24 cents from $3.710 per hundred pounds to $3.950 per hundred pounds. These changes were necessitated due to further increases in the support price for butter, skim-milk powder, and cheddar cheese announced August 12, 1971, by the Canadian Dairy Commission. These latest increases announced by the Canadian Dairy Commission were as follows: For butter, 3 cents per pound; for skim-milk powder, 2 cents per pound; for cheddar cheese, 3 cents per pound.

MILK BOARD MEMBERSHIP AND ACTIVITIES

The composition of the Board remained unchanged from the previous year, with Elmer D. Daum, B.A., C.A., as Chairman, and John D. Honeyman and C. H. P. Killick, P.Ag., as the other members.

The Board held 25 meetings during the year. Fifteen of these were held to discuss matters of policy and administration. The balance of the meetings were with producers, vendors, and other interested parties to discuss matters pertaining to the production and marketing of milk.

Board representatives also attended numerous meetings held by other organizations to discuss matters pertinent to the milk industry generally. Among these meetings was regular attendance at the British Columbia Federation of Agriculture

Dairy Committee meetings as well as the Federation's Annual Convention. The Board also attended the National Dairy Council Convention held in Victoria and the Western Dairy Conference held in Seattle.

In addition to these regular activities, one of the main projects undertaken by the Board was to study the effect of amalgamating Milk Board areas, taking into consideration both the legal and practical aspects of the issue. This study is of a continuing nature and is being done in co-operation with producer organizations of several areas and with the Dairy Committee of the Federation of Agriculture.

AREAS OF PRODUCTION

During 1971 the five areas of production defined under the provisions of section 40 of the *Milk Industry Act* remained unchanged.

STATISTICAL INFORMATION

Statistical information relative to the sale of fluid dairy products, the production and utilization of qualifying milk, the accounting values for each class of qualifying milk, and producer prices for qualifying milk and the licensing of producers and vendors is given in the tables included herewith.

Where feasible, comment has been made concerning British Columbia statistics relative to national statistics. Also included are comments relative to comparisons of Milk Board controlled areas of production. The details of changes in the individual statistical tables are outlined in the comments applicable to each table.

Table I—Analysis of Quart Sales by Product Category

This table is a consolidation of the information previously provided in Tables I and II. The information excluded from the current table is the totals of the nine previous years. This information, which may be obtained from previous Reports, has been replaced by the more informative comparisons of the current year's figures to those of the previous year.

Total quart sales in the five controlled areas of production increased 3.49 per cent during the year. The Vancouver, the Kamloops-Okanagan, and the Cariboo and Central British Columbia areas showed increased total quart sales, while the Vancouver Island and the East and West Kootenay areas showed decreased total quart sales.

The consumer's increasing preference for milk with a lower butterfat content continued in 1971, with all areas showing decreases in sales of standard milk sales amounting to an aggregate decrease of 3.5 per cent. All areas showed increased sales of low-fat milk, producing an aggregate increase of 13.54 per cent.

Other than standard milk, almost all product categories showed increased sales in all areas during the year. The exceptions to this generalization were decreased sales of the 9-per-cent butterfat creams and whipping cream in the Vancouver Island area and decreased sales in all product categories, except the above-noted low-fat milk sales increase in the East and West Kootenay area.

The trend of decreased retail sales and increased wholesale sales continued during 1971. In the controlled areas of production, 23.74 per cent of the sales were retail and 76.26 per cent were wholesale. During 1970 the retail-wholesale split was 25.48 per cent and 74.52 per cent respectively. This represents a 3.59-per-cent decrease in retail sales and a 5.91-per-cent increase in wholesale sales.

The trend of decreased retail sales and increased wholesale sales followed the Provincial pattern in all but one of the controlled areas of production. The East and West Kootenay area showed an increased proportion of retail sales. This is the result of increased penetration into the area by vendors from outside the area, which reduced the total sales of the area, particularly the wholesale sales, leaving a greater proportion of the retail sales available for the vendors located within the area.

Table II—Analysis of Class I Sales, Including Inter-area Sales

In previous Reports this information was contained in Table IV.

Total Class I sales in pounds (which is the aggregate of all Class I sales in an area of production, whether made by the vendors within the area or by vendors located outside the area) increased in all areas of production during 1971. This resulted in a Provincial increase for the controlled areas of production of 4.81 per cent. However, in both the Vancouver Island and the East and West Kootenay areas the sales of vendors located within the area declined. Thus, the increase in total Class I sales of these two areas was due to increased penetration of vendors located outside the area.

With the exception of the East and West Kootenay area, where their sales penetration in 1971 decreased, the Vancouver area vendors increased their sales penetration in all other controlled areas of production. The Kamloops-Okanagan area vendors increased their penetration in both the East and West Kootenay area and Cariboo and Central British Columbia area.

Table III—Analysis of Qualifying Milk: Production and Utilization

While the numbering sequence of this table has remained as in previous Reports, the information contained therein has been expanded to include average daily production figures, quota milk-production figures, and several inter-related percentage analyses. Also, information concerning the months to be used for 1972/73 daily milk-quota calculations, formerly reported as Table V, has now been included in this table.

Total qualifying milk production during 1971 increased 2.80 per cent in the five controlled areas of production. This is opposite to the latest available national production figures, which show a 3-per-cent production decrease in the first 11 months of 1971.

As the 2.80-per-cent total increase in pounds of production is less than the 4.81-per-cent total increase in pounds of Class I sales, a 3.78-per-cent increase in total Class I utilization occurred.

Total quota-milk receipts in the five areas of production were 76.64 per cent of total production during 1971 compared to 74.89 per cent in 1970. Total Class I utilization of quota receipts fell from 86.80 per cent in 1970 to 85.57 per cent in 1971.

All controlled areas of production showed increases in both production and quota receipts. However, the Vancouver Island area and the East and West Kootenay area were the only areas not to show increases in Class I utilization during 1971. This fact is also evident from the information in Tables I and II and was noted in the comments related to these tables.

As a result of a 15.3-million-pound increase in Class I sales, coupled with only a 7.5-million-pound increase in production, the Vancouver area was the only area to show a decreased utilization of milk surplus to Class I requirements.

Table IV—Class I Accounting Value Formula and Producer Price

The information contained in this table relative to the Class I formula base period, monthly accounting values for all classes of production, and monthly producer prices was formerly contained in Table VI. However, the content of the table remains unchanged.

Table V—Licensing Information

Under the provisions of the *Milk Industry Act* and General Order 46, the Milk Board issues Class I licences to vendors and milk jobbers and Class II licences to producers. Both classes of licences are issued April 1 each year for a 12-month period or portion thereof. A summary of the 1971/72 licences issued, cancelled, and in effect at December 31, 1971, is contained in Table V. The information contained in this table previously formed part of the introductory comments of the Annual Report.

There were 1,533 Class II licences in effect December 31, 1970, in the controlled areas of production, compared to 1,494 in effect December 31, 1971. This reduction of 39 producers represents a 2.54-per-cent decrease.
