Creston to Defend Ball Championship

Batting Enthusiasts of the Crow on Warpath—Gore Sought at Fernie's Forthcoming Labor Day Jamboree.

Fernie is planning a monster Labor Day celebration, scheduled for Sunday and Monday, September 4 and 5. Invitations have been sent out to all and sundry baseball outfits along the crow to participate in the occasion by contesting Creston Valley's rights to the famous Chevrolet Trophy, donated by Crows Nest Motors, Fernie, for a baseball contest at Fernie upon a similar occasion two years ago.

At that tournament Creston Valley club swingers marched in and walked away with the trophy against all comers, and must now perforce put up a scrap for its retention, inasmuch as all the fencepost heavers around Cranbrook, the zinc muckers of Kimberley and coal and coke eaters in and around Fernie, Coal Creek, Michel, Blairmore and Natal have rolled up their sleeves with a mighty determination that the coveted trophy, emblematic of baseball championship of the Crow, shall no longer repose in the possession of a bunch of agriculturalists and fruitgrowers.

Hence some of the boys here have become exceedingly busy and are now as active as a bunch of A.P.A's. on the 12th of July. They are lining up a local team to go to Fernie on the date aforesaid and prove to the coal and coke eaters and sundry other fauna that Creston can produce good Babe Ruth's just as well as high class strawberries, cherries and apples. Hence notice is being given all and sundry to chip in and assist Creston and vicinity maintain its A1 reputation for whatever this district tackles, whether it be ball swatting, fish hatching, fruit growing or making home brew.

Two years ago the players who went to Fernie paid their own expenses in addition to doing the hard work and standing for whatever the umpire saw fit to hand them. This time they feel that it is only fair the community make a small per capita contribution for that purpose, but will present therefor a good quid pro quo in the shape of a dance to be held in the Exhibition hall on Friday, Aug 26. Admission is by tickets to be on sale shortly; the proceeds will be used to defray expenses of the team picked to go to Fernie. In that way the financial burden will not be felt on any few pockets and contributors will get full value for their money.

Music at the dance is to be furnished by the well known and justly popular Creston Commanders orchestra, which organization is now putting in some extra licks practising the latest saxophony jazz numbers under the resourceful baton of Fred Duck. Refreshments are to be served, and as the evenings are getting cool dancing will once more be popular. The event winds up the social doldrums of the hot season. The affair is in charge of Orin Hayden and Ray Crisler.

The team for the Fernie tournament has not yet been picked. Its assemblage is in the hands of a competent committee consisting of Roy Telford, Babe Fortin and Ray McKelvey, who are weighing the pros and cons in favor or against the best players of Creston, Erickson, Canyon and Kitchener in order to round out the best aggregation possible.

The bone of contention, a beautiful silver cup, is to be on display this week in the windows of the Speers department store.

Cranbrook Courier—In county court Wednesday morning Judge G. H. Thompson, dismissed the case against Dr A. T. Thompson, physician of Yahk, which has been pending for some time. Some time ago the doctor was arrested on a statutory charge, covered by Section 303 of the Criminal Code of Canada. For a time it was thought the case would assume sensational proportions, but this bubble has been burst by the quiet termination of the affair.

Grading of School Grounds Completed Monday

Grading and leveling of the Creston public and high school grounds was successfully concluded by Monday evening. A very considerable yardage of dirt had to be moved, several men, teams and a scraper being on the job a number of days. A number of other necessary alterations to the school premises have also been completed.

Fruit Packing Plant Starts Work

Local Co-Op. Begins With Pears—Mixed Car Movement Not So Heavy By Reason of New Lower L.C.L. Rates

A new phase of Creston's 1932 fruit harvesting and marketing season was entered on this week with commencement of packing at the plant of the Creston Co-Operative Fruit Exchange here.

For some time past efforts of the management have been directed towards having everything in first class shape for the major movement of the year. Miss Nissie McRobb has joined the office staff to help care for the extra work there during the ensuing two or three months. All equipment in the big plant alongside the track is ready to take care of an anticipated heavy volume of business.

The packing season began with pears, which are now being harvested and shipped in a preliminary way. Within a few days the movement will be much heavier.

Apples have begun to move; these are for the present confined to Early Transparent and Duchess. Up to the present rail shipments in carload lots have not been heavy, only one or two cars having been assembled by the various Creston shipping organizations; such cars being mixed, the shipments consisting of apples along with vegetables.

There is less of a tendency to send out mixed cars this season, because of the new express rates, which are proving more stimulating to l. c. l. shipments and doing away to some extent for the necessity of assembling a full car before forwarding. The new l.c.l. rate on fruit and vegetables from Creston to Lethbridge is, for instance $1, as compared with the old rate of $1.90. Other points are in proportion. This is some material reduction and aside from this provides the advantage of keeping stuff moving every day instead of waiting for assembly.

Pears are expected to bring a good price. Realization on plums and apricots will be fair, it is believed.

Early varieties of local plums are putting in an appearance; so are apricots. Of the vegetables, tomatoes and cucumbers are leading off with corn following close behind.

Creston's best vegetable market is in the Crow, but comparatively speaking that is restricted this season, due first of all to lack of the usual purchasing power there, and second, to many residents through that section and at Kimberley celebrating the depression by putting in vegetable gardens of their own.

J. G. Grady Passes

J. G. Grady, an old and respected resident of this locality, died at the Creston Valley hospital on Saturday night. His age is given as 83. He was born in Minnesota and has resided in or around Creston for the past 25 years.

Mr. Grady is survived by his wife; by a son, Edward, Tacoma, and a daughter, Mrs. Hook, Spokane.

In addition to a home at Wynndel, Mr. Grady owned considerable real estate and business property in Creston. He was very active at one time in the lumbering business here.

Funeral services and High Mass were held at the Holy Cross church Monday, after which the remains were shipped to Spokane for interment.

Proposition to purchase 59 acres of land at $100 per acre for use as an airport by Kamloops city council has been given the six months' holst.

Creston Hospitality Gets a Big Hand

Spokane Visitors Express Official Thanks for Courtesies Shown on Occasion of Recent Goodwill Tour.

That the recent excursion of members of the Spokane chamber of commerce to Creston and the Valley be made an annual affair is the suggestion made by Harry Goetz, of the Coeur d'Alene hotel, in a letter to R. Walmsley, of this city. Mr. Goetz reported that the fame of the Valley as a result of this preliminary jaunt has spread to such an extent in Spokane that a greater crowd can be looked for next season if the excursion is repeated.

Official appreciation of Creston's hospitality is contained in a letter received by Col. Mallandaine from A. W. Lindsay, trip chairman, who writes under date of Aug. 10:

"Col. E. Mallandaine, Creston, B.C.

"My dear Colonel: I just want to express to you my sentiments as to the wonderful treatment the Spokane and Bonners Ferry delegation had under your supervision while we were in Creston on our good will tour and inspection.

"We saw some wonderful sights both in the Kootenai District of the United States and in the same district of British Columbia. I never saw such a sight from an agricultural standpoint in all my life. The fifty people from Spokane will corroborate me in this statement. I think Creston is a beautiful spot. With its orchard district and soldiers' settlement it must be a very delightful place to live.

"Some day the lands on the Kootenay will be reclamed to the Kootenay Lake, all of which will be a big benefit to your town. Just think of the thousands of acres of fertile land that could be brought under cultivation and the population it will sustain when completed.

"You are to be congratulated on living in such a wonderful country, and I take this opportunity to thank you, Mr. Forbes, Dr. McKenzie and the members of the Board of Trade of Creston for the wonderful reception accorded our citizens while visiting your district on this tour.

Yours truly,
A. W. Lindsay"

Erickson

Rev. Carl Basse is holding a summer school for Lister children for two weeks in the school house.

Otto Dersch, Nelson, was a guest for a few days at the home of Adolph Domke.

Ben Beyer left the end of last week for the prairies where he will run a separator during the harvest.

H. E Mills has been a guest at the home of S. Demchuk. He addressed the Farmers' Unity League meeting at Canyon Tuesday night.

Mrs. George Jacks, who has been a guest of Mrs. Hare at Kuskanook, returned home Thursday.

Miss Kitty Beard recently spent a week with Mr. and Mrs. John Miller at Alice Siding.

J. W. Bell and Capt. and Mrs. Bride are spending a two weeks' holiday at the former's home here.

Calgary Artist Paints Twin Bays' Scenery

R. L. Harvey, of Calgary's school teaching staff, has been camped with his family at Twin Bays. Mr. Harvey is a very proficient water colorist and has been transferring the main lake scenic beauties to paper. His work has been attracting much attention from other visitors and local residents.

C. O. Rodgers Box Output Big

Local Plant Most Complete in British Columbia—An Important Factor in Stabilizing Industrial Conditions Here.

A most important unit in the industrial activities of Creston and district is the Rodgers mill, situated within the Creston municipal limits. Although it has been out of the question for the management to maintain operations in the sawmill, box factory and in the woods at full capacity during the dull period, the operation has doubtless been a most important factor in making business in this vicinity relatively better than in any other B C. community. The plant is at present employing 30 hands, and earlier in the season had a considerably larger number when girls could be used on tintop and other veneer basket work.

The plant is one of the largest fruit box making establishments in the province, being exceeded in capacity only by one or two at the coast; it also has the distinction of being about the only one where the raw material is handled all the way through to the manufacured state under one roof. Box factories ordinarly buy their box making material from sawmilling concerns; the Rodgers plant manufactures its own lumber from logs cut from the Rodgers' limits.

The activities of the management, therefore, calls for routing of material, through the raw, semi-finished and finished stages and does not end until it is disposed of as baskets, crates or boxes to fruit growers and shippers.

The market for the plant's product is not by any means confined to Creston and district. A very considerable quantity of it goes down to Nelson, on the West Arm; north on the main Kootenay lake as far as Kaslo; some into the Slocan Valley and there is a certain specialized quantity going carload lots to prairie cities, and in such cases as far east as Regina. Some of this consists of bedding baskets, acquired in considerable quantity by greenhouses.

The veneer department's product runs into an item of imposing proportions. For instance, this season's output of tintops was 400,000; of bedding baskets, 180,000. This is one of the t ree plants in B. C. making tintops and other veneer baskets. The smaller items run in proportion. When that department was going full blast, 16 girls were employed.

Raspberry and strawberry crates are an important item. This season's output of the former was 10,000; of the latter, 30,000. The cherry lugs manufactured this season numbered 20,000.

The end of the small and soft fruit season brought a shift to the making of apple, pear and plum boxes. A high degree of efficiency is attained by arrangement of the various mechanical units, the raw material passing through each successive stage with a minimum of lost motion. Steam, generated from sawdust, provides ample power in all departments through individual electrical operation of the various units.

Incorporation papers have been filled with the Idaho secretary of state for Kootenai Navigation company. The company is capitalized for $10,000. Ralph Clapp, Frank Spence and Patrick H. Walker, all of Bonners Ferry, are the incorporators. Plans provide for operation of a boat and barge line on the river, with particular reference to handling of grain shipments from the west side to rail shipping points. It is proposed to bring a tug boat from Pend Oreille lake.

Okanagan Apple Cartel Detailed

Ninety Per Cent. of Marketing Organizations, Including Creston Shippers, Reported in on the New Deal.

Details regarding the Okanagan apple marketing "Cartel" have in the main been completed, following the meeting held at Kelowna a week ago.

Local shipping organizations through their affiliations are to a large extent governed by the Okanagan situation. It is understood that marketing organizations approximating 90 per cent. have agreed on the plan decided upon at Kelowna.

The new plan combines the features and principles included in both the original quota plan and the scheme proposed by the Shippers' Council. It is to be known as the "1932 Okanagan Apple Cartel," and its complete text will probably be made public later.

Everything possible is being done to hasten completion of the agreements, and so far as ninety per cent of the tonnage is concerned, the plan will be in shape to put into operation by the end of this week. However, naturally some difficulty may be experienced in securing outside shippers to sign.

The sixty per cent of the crop to be stored and exported will be released from time to time by a committee in control of the Cartel. The manner of the release will be by percentage, but in all probability the amounts released will be quite small and calculated to supply the demand for short periods only. This is in order not to defeat the object of the Cartel, which is that each shipper shall retain an equal interest in the unsold portion of the crop.

It is also intended that storage will be stimulated to the greatest possible extent by calculating each shipper's portion of export along with storage in computing his percentage of release. In other words, the quantity of apples which any shipper may have at any given time will depend upon the amount which he has exported, and the shipper who has exported the largest percentage of his storage will be the first to clear up his stocks finally. Penalties will be provided which will take care of the possibility of any shipper breaking his agreements.

It is understood that no shipper will be embarrassed by having to put up at this time of the year a substantial deposit in cash, but a deduction will be made on each car shipped to create a sum sufficient to protect the deal. The reasonableness of this proposal lies in the fact that the amount deducted from each carload return will be in the nature of a portion of the increased selling price that will come as a result of stabilized marketing.

The agreement is based upon a compromise prepared in regard to the quota plan by the Shippers' Council. Several important shipping firms objected to the quota plan on the principal ground that it would be difficult to operate, due to the fact that at its commencement its operations were to be based upon estimates. The compromise plans to release forty per cent of the crop for sale on the domestic market and proposes that the remaining sixty per cent is to be stored or exported. Storage stocks will be released from time to time, but the percentage of interest of each subscribing shipper in the storage and export portion is to remain constant.

It was agreed to place the plan under the management of an independent shipper. Arrangements to complete details are in the hands of a committee consisting of Messrs E. J. Chambers, D. McNair, R. B. Staples, A. P. Hayes and M. V. McGuire, who met in Vernon recently and put most of the finishing touches to the plan.

A correspondent of the Kimberley Courier calls attention to the fact that fire hose purchased for the zinc camp has been used as a carpet for autos. During a recent fire he says he counted 20 cars and trucks drive over a piece of hose in 23 minutes.

Mutual Trust Must Be Re-established

One of the most interesting and thought provoking articles it has been our privilege to read for some time, and in these days of depression and pessimism it is as refreshing as a heavy shower on parched land, appeared in a recent issue of Toronto Saturday Night from the pen of Nicholas Ignatieff, a gifted young Russian engineer and thinker now resident in Canada. Mr. Ignatieff knows his native land and has written thoughtfully and sympathetically of it, but in the article to which we now refer he writes of "the British Empire as a new Canadian sees it."

As he sees it the British Empire is not menaced so much by external enemies, by Bolsheviks or Communists, as by crass materialists within the Empire itself who insist on dealing exclusively with material, economic values,—those individuals who have abandoned the best traditions of the Anglo-Saxon race and have plunged into the abyss of crude money-worshipping, greedy, corrupt politics which care nothing for duty and public service. The real enemies of the Empire are those who have cut themselves away from the vital sap of the historical, spiritual life of the mother country.

Mr. Ignatieff declares that it is not only his conviction, but the conviction of one of the foremost economists of the British Empire, Sir George Paish, that the way to general recovery does not lie so much in the field of economics as it does in the moral, spiritual sphere, which affects primarily our politics, and reflects adversely on economics. Sir George Paish points out that as long as politics are dominated by fear, suspicion, distrust and narrow self-sufficient nationalism, no economic remedy can solve the depression; and just as soon as our mental attitude is changed and gives place to a desire to co-operate, compromise and trust one another, the economic situation will solve itself. In his book, "The Way to Recovery," Sir George declares: "By replacing fear with confidence, injustice with justice, and antagonism with co-operation, a new and infinitely greater era would be introduced.

Continuing, Mr. Ignatieff says that when it is pointed out that one of the root causes of depression is the collapse of our present credit system, it is never realized by the crude materialist that here we are dealing practically exclusively with moral values. In the first place, credit being based on the future, it is obviously non-material; it is primarily based on trust. The general break-down of credit implies nothing more than the collapse of morals, the break-down of mutual trust. Internationally, countries are no longer trustworthy because they do not honour obligations, because they are suspicious and fearsome, selfish and greedy. Within nations, the same applies among individuals—there is general misuse of credit—credit is employed largely for anti-social purposes by greedy, unscrupulous, immoral individuals. The solution of the paradox of scarcity in the midst of plenty is spiritual, not material. A little thought will convince one of the truth of these observations, yet they are dubbed "platitudes" by so many worldly wise people.

Until fear is dispelled, suspicion allayed, confidence restored, there can be no real and lasting economic recovery, because, until these better conditions prevail, credit cannot be re-established. Credit is founded upon these things; trust is the one permanent foundation upon which a credit structure can be erected, and until credit is restored the world will remain economically sick. So long as fear and suspicion rule men and nations, so long as narrow nationalism, because of such fear and suspicion remains the guiding policy of the nations, so long will trade obstructions be maintained, so long will there be an absence of credit. And just so long will the peoples of the world suffer economic hardship and loss. Therefore, it can be repeated, what the world stands in need of today is a spiritual readjustment rather than economic reorganization. Given the first, the second will automatically and quickly follow. But without the one the other is impossible.

Lack Real Leadership

U.S. Public Opinion Not Yet Ready For Debt Readjustment

The New York Evening Post, agreeing that virtual cancellation of war debts must come, says that general United States "public opinion is not quite ready for the debt readjustment which her eastern seaboard now recognizes as inevitable." Public opinion "is not quite ready" because the United States public men and the press have persisted, chiefly for political purposes, in pretending, though they must have known better, that the debts were collectable. When they begin to deal with the question realistically, as is now the case, public opinion in the United States will accept the cancellation as not only inevitable but desirable. The people are all right if they are given competent leadership. But what leadership they have had, in all the allied countries, since the war!—Winnipeg Free Press.

"Well, I've brought back the car you sold me."

"How come?"

"When I bought it I thought '1632' was the license number, but now I realize it's the year of manufacture."

Victorian Order Of Nurses

Miss Smellie To Visit Europe To Study Maternal Welfare Work

In recognition of the comprehensive programme of maternal welfare carried on by the Victorian Order of Nurses for Canada, the Rockefeller Foundation has extended to Miss Elizabeth Smellie, its chief superintendent, an invitation to visit a number of European countries within the next few months for the purpose of studying conditions of maternal welfare there.

Miss Smellie expects to sail early in September, visiting England, Denmark, Austria, Germany and Italy, and returning to Canada about the middle of December.

An Absurd Practice

One well known radio station has decided that in future the names of radio announcers will not be given, and it is said that others are likely to follow suit. The plan has always been about as sensible as it would be for a brakesman to give his Christian and surname after calling out the next station.

Don't leave kind words unsaid. Tomorrow may be too late.

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Landry, Moncton, N.B., writes:—"I can certainly recommend Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels.

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I would have to sit down. I took 'Dr. Fowler's' and was soon relieved.

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Poor Crop Prospects In Russia

Believe Country Will Need All Its Grain For Food

Poor crop prospects in Russia are indicated in the report by districts which the Dominion Bureau of Statistics received by cable from its London correspondent. "Grain exports," the summary declares, "are dependent upon the policy of the Soviet Government and the urgency of the need of foreign currency. The country needs all its grains for food, especially in view of the continued acute shortage of other foodstuffs."

Since it was the flood of Russian wheat on the market last autumn that broke the prices, the Russian crop prospects are of particular interest to Canada. Last year Russia exported, to July 31, 71,000,000 bushels, but the present report indicates that it will reach nothing like those proportions this year.

The summary states: "Vegetables are lacking for the winter months and at present vegetables constitute a large part of the diet as grain reserves, excepting army supplies from 1930 crop, are consumed. The foregoing and other factors, including a tremendous discrepancy between open market and collective prices, the freedom of peasants to sell on the open market after December, and an acute shortage of manufactured goods to trade for grain, indicate unprecedented difficulties in collecting the government's share of the harvest. Much poorer crops than last year are indicated in the areas around export outlets."

Oldest In the World

Ancient Skull Is Found While Excavating In London

The oldest known human skull belonged to a London woman, G. Elliot Smith, professor of anatomy at the University of London, stated at a meeting of the international congress of pre-historic and proro-historic sciences.

"The skull is known as the Lloyd's skull," he said, "and was found in blue clay 40 feet below the surface during excavations for the new home of Lloyd's corporation in Leadenhall Street. "It belonged to a woman about 50 years old, who probably was left-handed.

After considering all the evidence and carefully studying all other known skulls of the kind, Professor Smith said, he decided the London skull represented the earliest genuine remains of homo sapiens, giving it pride of place over the Java man, the Peking man, and all other pre-historic finds.

The other attendants at the congress expressed great surprise over the announcement and left the hall immediately afterward to examine the skull and discuss the problem.

No More Asthma. Dr. J. D. Kellogg's Asthma Remedy sounds the death knell of this trying trouble. It stops the awful choking and painful breathng. It guards against night attacks and gives renewed ability to sleep and rest the whole night long. Much is claimed for this remedy, but nothing but what can be demonstrated by a trial. If you suffer from asthma try it and convince yourself of its great value.

In Times Of Peace

Germans Learning Protection Methods Against Gas Attack From Air

Classes have been established in Berlin to train women in the steps they must take for the protection of their household in the event of a gas attack from the air. Lectures are given on such subjects as how to make cellars gas proof. Branches of the "Women's Air Defence League" are being established in several centres throughout the country.

Keep Douglas' Egyptian Liniment always in the stable, ready for immediate use. Removes proud flesh and inflammation, Thrush or Hoof Rot, and infection of cow's teat.

Larned a Lesson

A U.S. tourist made loud complaint in Aylmer, Ontario, recently. It seems he had replenished his gas supply at a station in another town, tending a $10 U.S. bill in payment, and received his change in good Canadian money. On arrival at Aylmer he endeavored to change the Canadian money back into U.S. funds, and was most indignant when the bank demanded a discount. He learned a lesson in exchange which has been taught many a Canadian visitor to the U.S.

Exposition Of Fascism

Premier Mussolini Does Not Believe In the Possibility Of Perpetual Peace

War is exalted by Premier Mussolini as giving "the seal of nobility to peoples" in his concluding exposition of Fascism for the Encyclopedia Italiana which was published in his old newspaper, Il Popolo d'Italia. Perpetual peace, the premier says, is impossible.

His dictum of democracy is this: "It is a failure more tyrannical than tyranny."

"Fascism, as it generally regards the future and the development of mankind and apart from consideration of present policies, does not believe in the possibility of perpetual peace," the premier writes.

The premier reaffirms the doctrine that the state is supreme.

His discussion of religion is brief.

"Fascism is not indifferent to religion in general or Italian Catholicism in particular. The state does not have a theology but a morality. Religion is not only respected but defended and protected."

Improving On Nature

Soil Heated By Electricity Can Be Kept At Even Temperature

Soil heating by electric current has come to be recognised as an aid to the growers to get their produce to market earlier and secure better prices. Equipment for heating beds, including cable and thermostats, was sold to farmers in the United States last year for the first time and several plants were set up in Canada. The bulk of the power is used between sundown and sunrise, making it practically an off-peak load.

The advantage of electric heating over steam or manure is seen in the more complete control. Flowers, such as Easter lilies can be speeded up and a greater percentage of growth is noted in cuttings of plants. Celery appear to respond particularly well to the electrical current.

Persian Balm is unrivalled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands flawlessly white. Especially recommended to soothe and relieve roughness or chafing caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. Persian Balm is the one toilet requisite for the woman who cares for charm and elegance.

Serum For Addison's Disease Is Expensive

Fifteen Oxen Are Required To Supply One Dose

Fifteen oxen are required for a newly discovered treatment for Addison's disaese.

Successful results of the treatment have been obtained at a London hospital.

Fortunately the disease which attacks the pituitary gland and stops growth is rare, for the expense of extracting one dose of serum from fifteen oxen is enormous.

The life of one patient was saved with this new treatment, but $125 was spent on him to do it, and the treatment continued to cost $5 a day.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Many Placed In Employment

Saskatchewan Government Finds Jobs For 2,511 Persons In Five Weeks

Jobs for 2,511 persons were found by government employment offices in Saskatchewan during the five weeks ending July 30, official figures indicate. The number of persons applying for work at the nine employment offices in the province during the period were 2,926, and the number of employers' orders received were 2,637.

In addition to these figures there were 187 applications received from school teachers and 62 of these were located with positions.

The oldest cemetery in Canada is thought to be the one adjoining Old Fort Anne, Annapolis Royal, Nova Scotia.

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschen Salts is appealing to girls and women who are striving for an attractive free-from-fat figure.

Here is the method they are following to banish fat and bring into blossom all the natural attractiveness that they possess: every morning they take a half-teaspoonful of Kruschen Salts in a glass of warm water before breakfast.

They do this every morning—without missing one—for "it's the daily dose that takes off the fat." When Kruschen is taken daily, every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys, and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts is carried to every organ, gland, nerve, and fibre of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity, and a charming figure.

A Warmer Climate

Scientists Predict Radical Weather Changes In the Future

Some times you hear people who lament the present condition of mundane affairs express the wish that they might be living on this planet a few thousand years hence. They are sure there will then be more culture more altruism, more highly improved mechanics and a happier state of things all around.

But, according to the recent pronouncements of scientists, there will be great drawbacks to the enjoyment of an Edenic existence in those future days, and one of them will be a devastating flood. Dr. W. J. Humphreys, professor of meteorology of the United States weather bureau, says that with the vanishing of the last 6,000,000 square miles of ice sheets at and near the poles and in the high mountains the oceans will be raised 151 feet.

In this dismaying prediction Dr. Humphreys is supported by Professor David, of Australia; Professor Meinardus, of Germany, and others, who also accept the theory of the American scientist that it's going to be pretty warm in the present temperate zones, for as the ice melts the tropics will press upon them and they in turn will press upon the polar regions. — Los Angeles Times.

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Business Is Growing

Increase In Air Passengers Between Germany and Russia

Air service between Germany and Russia continues to grow. Estimates are that "Deruluft," the German-Russian air transportation company, will carry this year at least nine times as many passengers as it did in its first 12 months nine years ago. Mail, baggage and freight also have made great gains. Two services are operated, one between Berlin and Moscow, and the other from Konigsberg to Leningrad. Scheduled flights have increased from two to seven times a week.

CANADA'S SHARE OF BRITAIN'S WHEAT IMPORTS

Ottawa, Ont.—During the calendar year 1931 Russia supplied the United Kingdom with 24.24 per cent. of its total wheat requirements while Canada's percentage was slightly higher at 25.12. These figures were contained in a special report on world trade in wheat, issued by the Dominion Bureau of Statistics, especially for the benefit of the Imperial Economic Conference. Russia's total exports of wheat to the United Kingdom in 1931 amounted to 54,010,298 as compared with total Empire imports to the United Kingdom of 94,948,376.

The total wheat requirements in 1931, of the United Kingdom, chief wheat importing country of the world, amounted to about 223,000,000 bushels. This was supplied mainly as follows: Canada, 55,982,000 bushels; Australia, 43,397,000; British India, 899,100; other British countries, 73,656; Russia, 54,010,298; Argentine, 88,701,714; United States, 15,576,000; Germany, 4,283,000; France, 35,000, and other foreign countries, 9,875,000.

Russia's upsetting invasion of the Empire wheat market came in the last two years, the total to the United Kingdom for 1930 having been only 34,939,000 bushels, while the five-year average ending with that year was 8,783,000 bushels. This compares with a five-year average over the same period of 78,194,600 for Canada.

Estimated gross average yearly British exports of wheat for the five years ended with 1930 amounted to 330,166,000 bushels. Canada which leads all wheat exporting countries had an average total of 257,863,000 bushels.

Estimated average world exports during the same period totalled 692,649,000 bushels. Argentine led among the foreign countries contributing to this total with an average of 149,785,696 bushels, with United States, Hungary, Algeria, Germany, Rumania, France and Russia, following next in order. Russia's average was 31,968,800 bushels.

Kaye Don Will Race Again

Britain's Speedboat Racer Has Hope Of Capturing Trophy

London, Eng.—Kaye Don, Britain's speedboat racing idol and holder of a new world's record upon the water, left here for Southampton to sail on the steamer "Majesty" for Detroit, where he will race against Gar Wood for the Harmsworth trophy.

A large crowd of cheering admirers bade him farewell.

"I am making no promises," he said, "except this — I will do the best I can against Wood's boat, which has a much greater horse-power than my Miss England III."

By promising to do the best he can, Don meant he would try to reach again on the new Detroit course the two-miles-a-minute pace he set when he slashed his shellcased power plant across Loch Lomond at an average speed of 119.81 miles an hour, with a top mark of 120.5 miles, the fastest any human has travelled over the water.

Optimistic At Eighty

Man From Ontario Quite Confident Of Finding Work

Winnipeg, Man.—Flat broke and 80 years of age, an optimistic traveller arrived in Winnipeg from Bracebridge, Ont. He visited the city hall and said he had ridden bumpers here in search of work in the harvest fields. He was not exactly looking for a meal ticket at the city hall, he said. He just wanted to look in and talk to some of the folks.

A blacksmith by trade, he said he had never missed a meal in his life and did not expect to. He was sure he'd find something to do in the west after the harvest.

Alberta Delegates

Edmonton, Alberta.—Hon. George Hoadley, Minister of Agriculture, and Dean Howes of the university, will be the Alberta delegates to the meeting called by Hon. Robert Weir, federal minister of agriculture, for August 29 in Toronto.

No Dairy Shipments

Lack Of Refrigeration Service May Prevent Exports Over Churchill Route This Year

Montreal, Que.—Owing to the high rates that would have to be charged, little hope is held out that a refrigeration service will be available out of the port of Churchill, Man., to carry butter and cheese to Great Britain, at least this year, Thomas Harling and Co., steamship agents here, stated recently.

Efforts had been made by western Canadian interests to obtain steamship service from the new northern port for dairy produce, the company stated, but it was felt the rates would be too high to attract shippers. Vessels at present using the Hudson Bay route to carry grain do not have the refrigeration facilities necessary.

Western Canada last year shipped a considerable quantity of butter to the United Kingdom when exports of that commodity were resumed after a lapse of several years. Certain quantities of eggs and poultry are also shipped overseas by the west, the shipments being made via Montreal.

Winnipeg, Man.—Officials of the On-to-the-Bay Association had little comment to make on a Montreal despatch, saying it would be practically impossible to ship dairy products from Churchill this year owing to prohibitive rates. They regarded the statement as indicative of the difficulties encountered in developing the new route. Ample dairy produce was available in the west for export to ensure profitable operation of a refrigerated ship on a reasonable freight rate basis, it was stated.

National Research Laboratories

Two Thousand Guests Attend Official Opening At Ottawa

Ottawa.—The handsome, bronze doors of Canada's new national research laboratories swung open to 2,000 guests from the British Empire. Between the doric columns of the main facade light shone from half-a-hundred windows.

His Excellency the Governor-General faced one of the most distinguished audiences in Canada as he pronounced the words declaring the building formally opened.

Hon. H. H. Stevens, Minister of Trade and Commerce for Canada, presided. Speaking briefly, he called upon the Prime Minister, Rt. Hon. R. B. Bennett, to address the assemblage. After a short address from Mr. Bennett, his excellency, upon whom fell the duty of declaring the building open, spoke.

Enlarging Elevator

Winnipeg, Man.—The United Grain Growers, Limited, have awarded a $250,000 contract to the Northern Construction Company, of Vancouver, for the extension of their elevator there to a capacity of 2,000,000 bushels, the work to be completed by November 1, according to an announcement of R. S. Law, president of the firm here. The present capacity of the elevator is 1,600,000.

ADDRESSES SEED GROWERS

Under the auspices of the Canadian Seed Growers' Association, Field Days are being held this month at various points throughout Saskatchewan. Mr. H. S. Vigor, Secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

War Loan Conversion

British Plan Is Attended With Success According To Report

London, Eng.—The success of Great Britain's war loan conversion is strikingly illustrated in the official report of government revenue and expenditure for last week, from which it is inferred that nearly £1,600,000,000 out of the total of £2,084,994,000 was converted by July 31.

The report includes an item of expenditure, "cash bonuses, £15,703,000 sterling." When the government announced its conversion scheme on June 30, where five per cent. securities could be exchanged for a 3½ per cent. issue, bondholders were offered a cash bonus of £1 for each £100 if they gave notice of intention to convert before July 31.

While no official announcement of the progress of the scheme was issued, London financial houses were quick to observe the cash bonus item, multiplying it by 100 to find the figure converted in July.

Wheat For Italy

Shipment Being Forwarded Direct Through Port Of Churchill

Winnipeg, Man.—A shipment of wheat will go to Italy this summer direct from the port of Churchill. Thomas Harling, Sr., head of Thomas Harling and Son, shipping agents, made the announcement here just before he left for the northern port to superintend the loading of the first two ships of the season, the "Pennyworth" and "Sierentz."

Mr. Harling said the chartering of a vessel for the shipment to Italy indicated the Hudson Bay route was appealing to continental importers as well as to Great Britain. The vessel would carry the first cargo to go direct from Churchill to the continent. The three vessels already chartered will carry about 150,000 bushels of wheat.

Double Taxation

Steps Being Taken To Remedy Grievous Situation

Edmonton, Alberta.—Recommendations from the conference of income tax officials of the four western provinces, [illegible] was held here, will go in course [illegible] their respective governments, [illegible]tain general principles and working methods having been agreed upon for joint adoption if approved. It is expected that the changes will be made to apply to next year's tax.

Provincial income taxes as affecting wage-earners are the chief point on which some changes in the present system are desired. The superintendents of the four provinces are trying to find a way of avoiding the taxing of the same income twice. A number of cases were found in this year's operations of persons living in one province and working in another, and under the income tax laws as they stand at present the incomes of such persons are liable for taxing purposes in both provinces. This overlapping and double taxing will be remedied, it is understood, if the suggestions of the superintendents' meeting are adopted.

Floods Take Heavy Toll

Hundred Thousand Chinese Homeless and Many Lives Lost

Harbin, Manchuria.—A hundred thousand Chinese residents of Harbin were forced by unprecedented floods to abandon their section of the city, which has become a vast inland sea.

Approximately 3,000 persons were reported missing in the valley of the Shanghai River, which has risen far above the level in 1914, when Manchuria experienced the worst flood in its history.

Harbin's Chinese residents have congregated in cemeteries and fields on the outskirts of the city. Many of them are without food, clothing and shelter.

Cholera is spreading in the district and the people are hoarding food as prices sky-rocket.

Quest For Blondes

Scientists Require Golden Hairs For Recording Humidity

Montreal, Que.—The McGill University weatherman's quest for blondes whose tresses reach their waists brought quick response Wednesday. Telephone calls assured him there are still women in Montreal with hair unbobbed and who are willing to sacrifice a few hairs of it on the altar of science.

The McGill meteorologist requires the fine, sensitive, golden hairs for a hygrograph, a delicate instrument used for recording humidity changes from hour to hour. The hair of brunettes is too coarse.

Should Attend Unveiling

St. Thomas, Ont.—Representation of the Dominion of Canada by a composite battalion of great war veterans at the unveiling of the Canadian memorial at Vimy Ridge, which may take place next year, was recommended by Col. Hercule Barre, Canadian trade commissioner to France.

PREFERENTIAL TARIFF ASSISTS EMPIRE TRADE

Ottawa, Ont.—Preferences granted by Canada to Empire countries amounted to $30,000,000 during the year ended March 31, 1931, according to the preliminary trade report just issued. This was estimated as the difference between the duty collected under the preferential tariff and what would have been collected under a general tariff. The difference between the preference and treaty tariffs would have been six million dollars less.

Total Empire imports for the year under the preferential tariff amounted to $141,588,195. The duty collected amounted to $19,125,220, at an average ad valorem rate of 13.5 per cent. The estimated duty for this volume under treaty tariff would have been $42,849,989, and under a general tariff $49,202,030. Of the total imports goods valued at $37,151,606 entered Canada free.

The great bulk of these imports came from the United Kingdom, the total being $95,365,805, of which $18,288,442 represented free imports. Duty collected on United Kingdom imports amounted to $15,437,744. Under a treaty tariff this would have been $23,737,060, and under a general tariff, $28,982,152.

The next largest importer to Canada, the British West Indies, sent goods valued at $13,563,762, of which $8,745,705 was dutiable, bringing a revenue of $1,366,476.

Under a treaty tariff this would have been $7,072,931, and under a general tariff, $7,147,446.

Increased Acreage

Prairie Provinces Have More Than Million More Acres Under Crop This Year Than Last

Ottawa, Ont.—The prairie provinces have 1,042,278 more acres under wheat this year than last, according to a crop report issued by the Dominion Bureau of Statistics Wednesday, August 10.

For all Canada, the increase is 984,350 acres.

"The estimates of the areas sown to the principal grain crops in the three prairie provinces as shown by the annual statistics collected in June last through the rural schools are now available. The figures reveal an increase of 1,042,278 acres (four per cent.) in wheat, and 221,033 acres (2.7 per cent.) in oats, with slight decreases in barley and rye and a rather drastic reduction of 28 per cent. in flaxseed acreage from 618,561 to 445,700 acres.

Jobless Veterans Offer Services To Bolivia

British Soldiers Would Join In Fight Against Paraguay

London, Eng.—Many unemployed war veterans called at the Bolivian legation and consulate general here in response to an announcement of the British Fascisti that a large number of British Fascists were anxious to join the Bolivian army in its dispute with Paraguay. They were courteously informed, however, that recruits were not needed at present.

The consulate-general said it had received hundreds of letters from men desiring to offer their services, in addition to a "British Fascist" offer of 10,000 men if necessary.

Menace To Health

Dental Authority Says Sugar and White Flour Injurious To Teeth

Toronto, Ont.—The corner candy store is a greater menace to public health than the old corner saloon, according to Dr. Martin Dewey, New York, president of the American Dental Association.

Asked for an interview during the dental convention he is attending here, Dr. Dewey said, "just say this—it has been said a million times but it will stand plenty of repetition—white flour and white sugar are the big enemies to the teeth of civilized peoples. Those are the culprits which are responsible for more ill-health as far as teeth are concerned than any two articles you could mention."

WHERE A NOTED WARRIOR RESTS

The grave of Field-Marshal Lord Plumer in Westminster Abbey, showing four cushions on which are placed his insignia. Lord Plumer's remains lie close to those of the "Unknown Warrior." The tablet shown at the left background reads in part: "To the Glory of God and to the Memory of One Million Dead of the British Empire who Fell in the Great War of 1914-1918."

THE CRESTON REVIEW

Issued every Friday at Creston, B.C. Subscription: $2.50 a year in advance; $3.00 to U.S. points.

C. F. HAYES, Editor and Owner

CRESTON, B.C., FRIDAY, AUG. 19

PARTY GOVERNMENT

Disturbed economic conditions invariably brings talk of coalition government; frequently coalition results. There are many who profess to see in combining the best elements of political parties something in the way of salvation for the harassed people who pay the taxes.

There is a great deal of noise in some quarters of this province with regard to coalition—a suggested combination of the existing Tolmie government with Liberal forces in an effort to improve a desperate situation.

Whatever may be its merits, coalition, at best, is only a temporary pallative. To that extent it may be useful. Eventually it fails, in that not satisfied with getting enough feet into the trough politicians of whatever color they may be are inclined to coalesce with others of similar opinions; before it is realized the old line parties are see-sawing and balancing as before, with one set to the right of the speaker and the other to the left, alternating positions as the whims of the electorate direct.

Party government appears inseparable from maintenance of democracy, and democracy, after all, is still experimental. Party government is therefore, to that extent also, an experiment. In its final analysis it is a reflection of the people who cast the ballots. No 100 per cent. honest or thoroughly equalized government will come into existence until such time as its electors are themselves 100 per cent. on the level.

THE KIDD REPORT

The return of Premier Tolmie to the provincial capital brings expectation of early release of official information regarding the Kidd report. This interesting document has unquestionably caused a great deal of fuss along the coast.

Advance reports indicate most drastic recommendations. Such for instance, as a six-man cabinet, and 14 parlimentary members for the entire province. Heavy slashes in expenditures are urged. Prepared by a committee of successful business men, it is to that extent regarded as authoritative—a mandate to the politicians of the province to mend their ways. Successful business men meddling in political affairs is nothing new. Good hardware dealers, bankers, editors, preachers and Gawd knows what else, irrespective of success and ability in their own hen yard, have invariably got things into a worse mess than before whenever foolish enough to inject themselves into active politics. Of course, sitting on the side lines and giving advice to bedevilled politicians is quite another matter; whether the said bedevilled politicians will carry out the recommendations is also something else again. The voters will be enthusiastic about it as long as individual corns are not stamped on; they want taxes reduced but there's going to be a most terrific squawk if such reduction cuts appropriations in various ridings and leaves less in the trough for various and sundry aggressive political henchmen.

KICKS AND HALFPENCE

By Ye Guest Editor

Many auto drivers have a mania for stepping on the gas when driving through the suburbs of Creston. They appear to have an idea that the main stem through this community was designed as a speedway. Undoubtedly passers-through are offenders in this respect, but as there is always a certain proportion of folks in any particular locality who are the sons of wild jackasses it is safe to conclude that outsiders are not the only ones. They go by in a whirl of dust and at a speed making license plate identification a matter of difficulty. One of these days, assuming operation of the law of averages is not rendered ultra vires by some act of divine providence, there is going to be a crash. After somebody gets killed, in all probability there will be something done about it.

o o o

A few days ago a man applied at a Creston home for a meal. He was admitted to the kitchen and asked to wait while some food was made up. He noticed a loaf of bread on the table and quickly grabbed it and ravenously tore off two or three mouthfuls. For this he apologized, stating that he had been without food for three days, and was so beset by hunger as to lose all control of himself.

The instance is unquestionably extreme, but the fact that millions of people in North America, boasted land of plenty, are in almost as bad a plight is a sad reflection on the economics of a much lauded civilization which may in its final analysis be tottering on the brink of destruction. The fact is that those who seek relief from hunger pangs, either via back door handouts or from regulary authorized relief funds drawn from resources of taxpayers, are in numerous cases being helped by fellow pilgrims who themselves are close to the ragged edge.

o o o

There is a justified lack of general knowledge as to what should be done to terminate such a deplorable state of affairs. Some say this; others say that. A satisfactory solution of the problem appears to recede as time advances.

It is true that a great deal of advice emanates from the seats of the mighty. "Have patience," they say, "and everything will right itself in time." Fine! But that doesn't fill empty stomachs. It is to be noted that a whole raft of such like hooey comes from self-styled economists of New York, London, Berlin and Paris, and whose dictation of the world's monetary affairs has in a large measure led to the present impasse; it is further noted that these gentry all have consistently full bellies and ride around in swell limousines and palatial yachts.

The riots at Washington a few days ago are but the handwriting on the wall; if this warning is not accepted they are merely a minor and insignificant foretaste of what is going to happen.

The effects of "humanity's crucifixion on the cross of gold," prophecied by William Jennings Bryan as far back as 1892, are beginning to be felt.

Scriptural narrative of the passage of the children of Israel through the desert, their erection and worship of the golden calf, was a symbol. The divine punishment meted out to the chosen people is being duplicated.

o o o

Gas wells, so-called, are rotten eggs; oil wells are great live eggs; gasoline is the nerve or germ; electricity is the intelligence or germ of the air. These energies have been fertilized by the intelligence of man, who has reproduced mechanically the living creatures of nature—birds, fish, animals, reptiles. Now he must allow the machine to pay the rent and feed the man, or admit he is at the end of the trail of evolution. What to do? What to do? Start back to the place from whence he came, with the horse, the mule and the jackass leading the way.

o o o

It is gratifying to note the financial success achieved in connection with the Boswell regatta. This indicates there is some cash money in local socks. It may also be accepted as proof of the good sportsmanship of Crestonites and others interested in buying admission tickets, when there was nothing to prevent them seeing the show for nothing did they feel so inclined. This recalls that there must be a marked difference between folks of this vicinity and those of Cranbrook, because only a short time ago the Courier took the natives to task for their sneaking around and "crashing the gate" at sporting events while outsiders planked their dough down on the counter like little men. But after all what else can be expected? The plains of St. Mary never bred anything but a bunch of cheap skates and low brows anyhow:

The telephone to the rescue

Saved by the telephone!

It happens very often: a sudden illness that requires a doctor quickly; an invasion by burglars; the house on fire—and in such emergencies it is usually the telephone that brings help and is the means of saving life and property.

It's "the telephone to the rescue"—if you have a telephone.

CABBAGE FOR SALE—$2 per hundred. S. Fraser's, Erickson.

Mrs. Surtees and daughter Norma were here from Cranbrook Monday.

Mr. and Mrs. McPhee, Cranbrook, were guests at the Sinclair home Sunday.

BOARDERS WANTED—With or without room. Apply Box 34, Creston. 22-3

Mr. and Mrs. Millen returned Sunday from a vacation trip to Saskatchewan points.

Miss Ruth Hare returned home Sunday from Cranbrook after a week's stay in that city.

Mrs. Harry Hewatt arrived from Kimberley Wednesday and is a guest at the LaBelle home.

The Creston Hardware is advertising a line of builders' hardware in advance of fall building activities.

Mrs. S. A. Speers has her Sunday school class at Kuskanook this week for their annual camp outing.

FOR SALE—Little pigs. Ready August 28; also fifty gunny sacks. F. J. Collis, Alice Siding. 22 3

FOR SALE—1929 Ford coupe. $175 cash or $200 terms to reliable parties. A. R. Bernard, Camp Lister. 22-3

J. McLean, who has been relieving "Shorty" Millen on telephone line work here, returned to Cranbrook Tuesday.

Mrs. Page McPhee returned a few days ago from Kaslo where she was a guest of the parents of Pilot Page McPhee.

Miss Jessie White, who has been spending part of the summer at Fernie, is a guest at the home of Mr. and Mrs. J. Hayden.

The annual picnic of the United church Sunday school was held by the swimming hole on the Flats Wednesday afternoon.

Sandy Telford, Jim Downes and Jack Lyons left a few days ago for a camping expedition to Summit lake, 30 miles west of Port Hill.

The S. A. Speers department store is offering another special 10-day bargain sale. Men's work shirts are being offered at an attractive price.

Mrs. J. W. Dow held a lawn tea on Wednesday afternoon. It was in honor of a number of visiting ladies. About 25 invited guests were present.

Musical sounds pouring from the K. of P. hall each Tuesday evening indicates that the band is getting down to business with regular weekly practicing.

A large delegation of Pythian Sisters from Kimberley is scheduled to arrive here Saturday evening for a visit with the local lodge. A banquet will be held.

Mr. and Mrs. R. J. Forbes reached Los Angeles safely a few days ago and were in time to witness some of the Olympic finals reports received here state.

NOTICE—All outside pupils wishing to attend Creston High School for the ensuing term are requested to make application at once. Geo. Nickel, Secretary Creston Board of School Trustees. 22-2

Carl Wigen, Wynndel, has made a big hit with ye guest editor by presentation of a basket of those splendid peach plums, as big as baseballs, and for which the Wigen place is noted.

A spectacular thunder and lightning storm, accompanied by a heavy downpour of rain, followed a sultry Tuesday afternoon. Some of the evening showers brought a light fall of hail.

While playing at the Cartwright place, Erickson, on Monday, Master Clayton Sinclair fell and dislocated an elbow. He was brought to the hospital, x-rayed, and had the dislocated member set.

Due to an electric eye going out of commission there was no show at the Grand Saturday. A new one has been secured and Zane Grey's "Rainbow Trail" is scheduled for tomorrow night.

Reports from Kuskanook are to the effect that hailstones as big as hens' eggs bombarded that city on Tuesday night. Some of the residents and campers suffered severe wallops on the bean and elsewhere.

D. P. Kane, postmaster at Kaslo, was a visitor here the first of the week bringing up his daughter, Mrs. J. R. Paget, of Winnipeg. Mr. Paget, who is a member of the C.P.R.'s prairie engineering staff, met his wife here with a plane and returned east with her upon arrival.

Carl Wigen was up from Wynndel Saturday. He reports the new summer resort camp at Twin Bays as proving attractive to campers. Among those camped there this week are W. G. Robinson and family, Cranbrook, and Percy Truscott and his mother, from Creston. R. L. Harvey, a Calgary educationalist and artist, is also at Twin Bays with his family. Fishing in that vicinity is reported good.

Members of the local Knights of Pythias lodge will hold their annual basket picnic at the first bend in the Goat river on Sunday, August 21, commencing at 1 p. m. The committee in charge consists of Fred Menhenick, Wynndel; Joe Romano and William Craig, Creston. There will be a supply of ice cream and candy for the youngsters. A cordial invitation has been extended to all members of the order and Pythian Sisters to attend.

James Cherrington, of the Creston Mercantile staff, returned Friday from a few days' vacation trip to Rossland. He was accompanied by Mrs. Cherrington and James, Jr. and while in Rossland had an opportunity of viewing the splendid new swimming pool opened there recently. An inspection was made of the Consolidated's fertilizer plant back of the Trail smelter. Mr. Cherrington was greatly impressed with the immensity of the latest big Kootenay industry, and evidences of the great volume of shipments of its product to widely scattered areas, including points in the States and even to as far afield as China and Japan.

Dr. E. M. Warren, chiropractor, arrived here a few days ago, accompanied by his wife. They came here from Warner, Alta., and have rented Mrs Castley's house on Victoria avenue. Dr. Warren is so strongly impressed with Creston that he has decided to locate here professionally and is at present looking around with a view to securing suitable quarters down town. He is a graduate of the National Chiropratic School, Chicago, and has had many years' professional experience. Mr. and Mrs. Warren are accompanied by Mr. and Mrs. Orris Whittaker, formerly of Lethbridge, who may also decide to locate in or around Creston.

Dr. McKenzie and Frank Putnam are reported to have been conducting naval manoeuvres near Kuskanook last Tuesday night when the storm broke. They had to find their way to land by lightning flashes. Hailstones were big enough to smash the windshield in the fo'csle, while some extra large ones crowned Frank lord of all. Ashore, even more exciting things were happening. R. Walmsley hooked an 19-inch salmon just as the storm cut loose. The noble fish struggled and flopped, and the former skipper of the Lardeau limited reeled away. Just as he had the fish ready to land, an extra large hailstone would fetch him a crack on the cranium. The lightning flashed and the thunder roared while Walmsley and the salmon fought on, the former blazoning forth in a loud voice the immortal defiance of Rhoderick Dhu: "Come one, come all, this rock shall fly, from its firm base as soon as I." The battle, it is reported, was finally settled by a hailstone hitting the fish on its snout, whereupon it gave up the ghost and was gathered unto its fathers.

Alice Siding

Mrs. Alderson and son Gerald have returned from St. Eugene hospital, Cranbrook, where both underwent operations.

The high school building at Alice Siding has been completed.

Joe Miller and Eric Erickson left for the prairies a few days ago to look for harvest work.

Bob Parkin left a few days ago for the prairies to assist with the harvest.

Kitchener

Rudolph Nelson, who has been visiting friends here, returned to his home at Nelson on Wednesday

Misses Katherine and Irene Cavanaugh arrived on Wednesday from Kimberley for a visit with Mr. and Mrs. B. Johnson.

Mrs. Gus. Patrick left last week for prairie points.

O. H. Perkins of the M7 ranch has completed his haying.

Master Robert Johnson returned on Wednesday from Kimberley where he has been on a visit.

B. Johnson was a business visitor at Kimberley Tuesday, returning Wednesday.

H. Bohan left Tuesday for Cranbrook where he has entered the St. Eugene hospital.

Mrs. B. Johnson, Mrs. A. Simpson and son Lewis left Monday for Pincher Creek, Alta., where they will spend the week visiting friends.

Mrs. Ed. Bylander, Canal Flats, is visiting Mr. and Mrs. N. P. Molander.

Misses Vera and Hazel McGonegal left Friday on a few days' visit with the Misses Helen and June Browell at Canyon.

Carl Anderson has gone to Saskatchewan for the harvest.

CARTER'S LITTLE LIVER PILLS

WORLD HAPPENINGS BRIEFLY TOLD

The Rothesday dock, one of the largest on the Clyde, has been temporarily closed on account of decline of shipbuliding.

Dividend on the common stock of Canadian Pacific Railway for the first six months of 1932 is not being paid at present.

The Church of Scotland plans to build 30 churches in Scotland in the next seven years, 10 of which will be in Edinburgh and five in Glasgow.

Representatives accompanying the Japanese Olympic team plan to buy the cabin of each athlete from that country who wins an Olympic title.

Newton, Mass., one of Boston's wealthiest suburbs, has nearly two automobiles for every family. There are 14,000 families and 23,000 automobiles.

Florenz Ziegfeld, New York theatrical producer, who died recently in California, bequeathed his whole estate to Billie Burke, his widow, and Patricia, their daughter.

An air-taxi was chartered from Imperial Airways by a London woman for a return flight to Chelmsford, Essex, where she placed a wreath on a grave in the churchyard.

Art and agriculture are the only creative professions in the world, says John Erskine, novelist. "By artists I mean all craftsmen who are creators," he said, "and by agriculturists I mean all those who produce and create wealth from the soil."

San Francisco's new $6,000,000 opera house, the first and only municipally owned opera house in the United States, will be formally dedicated next month as a war memorial. It will open Oct. 15, with perofrmance of Puccini's "Tosca."

Indicative, it is said, of an improved lumber outlook, is the protest filed with the British Columbia government by mill men against export of logs. Loggers, however, contend that they are in a position to satisfy all demands of the mill men as well as taking care of any export trade being offered.

Britain's Unemployed

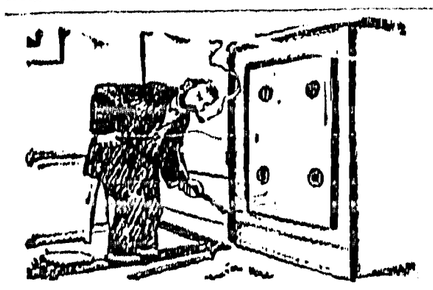
Seven and a Half Million People Depending On Government Aid

A wandering army of unemployed youths, vaguely reminiscent of the United States bonus army, is making its appearance in Great Britain as a result of increases in the number of jobless announced as 2,811,792.

Unemployment has made approximately one-fourth of Britain's 45,000,000 population dependent to some extent on government aid, for fully 7,500,000 men, women and children are existing wholly or partly on government or local relief in addition to the official total of jobless.

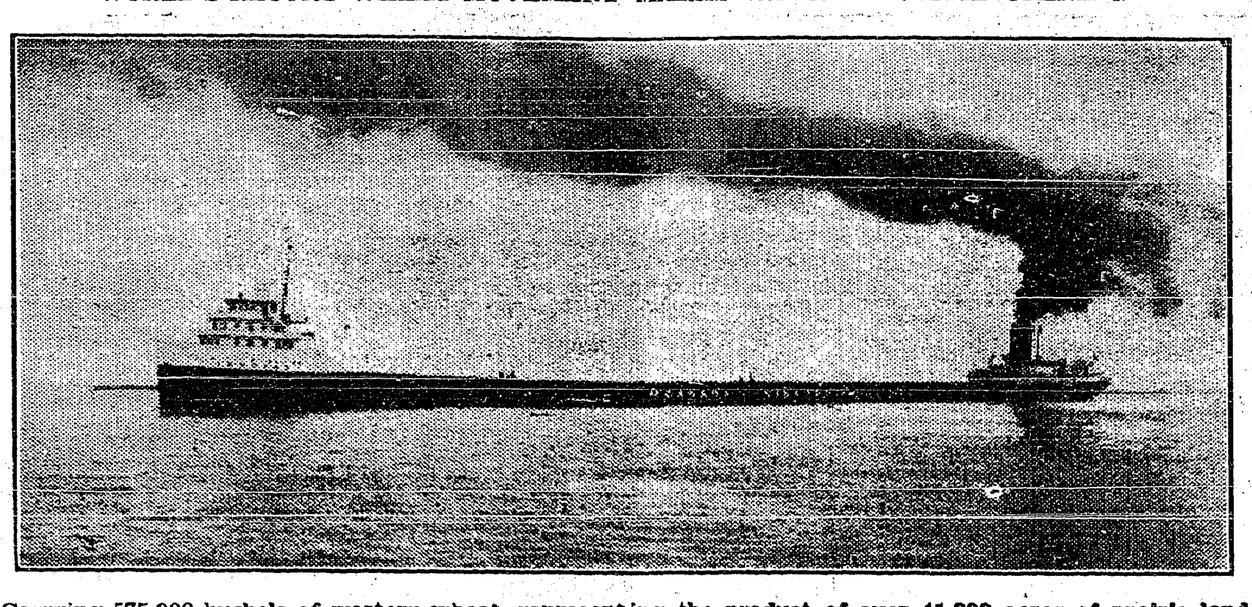
As a result of the latest official figures, an increase of 64,438 in the month of July, and of 96,432 in the last year, the nation's relief machinery is scarcely able to cope with the situation.

A material that does not stop the ultra-violet rays from the sun, resembling glass, and not as fragile, has been made from natural gas.



Safe-breaker at home: "I should hate to open my own safe any other way."—Muskete, Vienna.

WORLD'S RECORD WHEAT MOVEMENT MARKS WELLAND CANAL OPENING



Carrying 575,000 bushels of western wheat, representing the product of over 41,800 acres of prairie land and the largest single cargo ever carried in any single ship on any sea, the giant S.S. Lemoyne, of Canada Steamship Lines, 633 feet long and the biggest vessel on freshwater, opened the Welland Canal officially on August 6 in the presence of His Excellency, the Governor-General, Rt. Hon. Stanley Baldwin, and the delegates to the Imperial Conference, Premier R. B. Bennett, members of the Cabinet and thousands of spectators.

Largest Grain Carrier

Boat That Is the Pride Of Canada's Inland Waterways

World's largest grain carrier, holder of all Great Lake freight records and pride of the inland waterways, the S.S. Lemoyne of the Canada Steamship Lines fleet, officially opened the new Welland Ship Canal on August 6. Officiating at the ceremony was His Excellency the Earl of Bessborough, Governor-General of Canada, and delegates from all parts of the Empire attending the Imperial Conference in Ottawa.

Designed and built by Canada Steamship Lines at their own shipyards at Midland, Ontario, in 1926, the "Lemoyne" is considered a triumph of Canadian achievement and is the boast of Canadian shipyards. Since she first took the water she has captured all the major honors of the Upper Great Lakes freight carriers. Her records go even beyond freshwater for she has carried in single cargoes more grain and more coal than has ever been moved in any other single ship.

In 1929 the "Lemoyne" took on a cargo of 571,885 bushels of wheat, the crop of approximately 40,000 acres or more than 62 square miles of prairie land. In May 1930 she established a world record for the carriage of coal by taking aboard 16,538 tons and carrying it to Fort William. It required more than 300 railroad cars to bring this cargo to the ship.

Six hundred and thirty-three feet long, with a seventy foot beam, a depth of twenty-nine feet and a registered tonnage of 10,480 tons the "Lemoyne" will be by far the largest ship ever to have entered Lake Ontario and will clear the way for the carrying of the great bulk of the wheat crop of the prairies to the ports of the east by water. The "Lemoyne" along with other ships of her type will no longer be confined to the Upper Lakes; her eastern terminal becomes Kingston, Ontario, and her east to west cruising radius more than one thousand miles.

During the last twelve months the Welland Canal has seen a series of new records established. Last year the S.S. Noronic, upper lake passenger liner and flagship of the Canada Steamship Lines, northern fleet, established the first of the series of records when she made her first voyage into Lake Ontario and visited the ports of Toronto, Hamilton and Kingston for the first time. On that occasion over one hundred thousand people from these three cities went on board the "Noronic" and the walls of the canal were lined with thousands of people during her historic cruise. The "Noronic" at that time was the largest vessel of any type to go through the canal and remains the largest passenger steamer to have entered Lake Ontario. Her length is approximately half of that of the "Lemoyne."

Following the establishing of this record by the "Noronic," giant upper lake freighters of the Canada Steamship Lines set three new marks for the canal in a little over a week. Early in July this year the freighter "Ashcroft" went through the canal with 360,000 bushels of wheat on her way to Kingston only to see her record broken within a few days by the freighter "Gleneagles" with 380,000 bushels. Both these vessels had formerly been confind to the Upper Lakes.

Less than a week after the "Gleneagles" had set her new record for grain she returned to Lake Erie and brought down to Hamilton 12,910 tons of coal, another Welland Canal record which will likely stand for some time. On her latter trip the "Gleneagles" also shattered all records for cargo carried into the port of Hamilton.

Today the "Gleneagles" is the largest boat ever to have entered Lake Ontario, but compared to the "Lemoyne" she is a small freighter. Her length of 596 feet compared with the "Lemoyne's" 633 feet and her capacity is approximately 380,000 bushels compared with the "Lemoyne's" 571,885 bushels.

Considered of special importance to the Empire since the Welland Canal in future will be the route used by most of Canada's grain ships, it was decided some time ago that the official opening should be on the programme of the Imperial Conference and efforts were immediately made to have the largest Canadian lake boat go through for this ceremony. Elaborate preparations were made for welcoming the "Lemoyne" to Port Colborne on her first voyage and that in addition to delegates, government officials and representatives from other provinces large crowds of people viewed the ceremony.

Testing Out New Device

Invention May Prevent Flying Students From Freezing Controls

A new device to overcome the danger of flying students "freezing" the controls of aircraft in a panic has been developed by engineers of the department of national defence and is now undergoing thorough tests.

An arrangement whereby the instructor can disengage the student's controls in flight was found unsatisfactory, because once the student had overcome his momentary panic it was necessary for the aeroplane to land before his controls could be connected up again.

The new principle under test provides a jointeod control stick that becomes automatically disconnected when too much pressure is applied to it, and yet resumes its usefulness when the student's grip relaxes. The instructor in the other cockpit is provided with a normal control stick and has control of the aircraft at all times. By pulling on his stick he can force the student's control out of joint.

Limit To Cattle Exports

Less Than 25,000 Head May Be Shipped To England Next Year

Less than 25,000 head of cattle would be shipped to the United Kingdom next year from Canada, even if the restriction now imposed against Canadian cattle landing in Britain were lifted. This estimate was made in an interview recently by Hon. Robert Weir, Canadian Minister of Agriculture.

Reports which have gone out that the lifting of the restrictions would result in Canada shipping from 100,000 to 400,000 head annually to Britain are regretted by Mr. Weir. These reports would tend to fill the British farmer with fear that his home market would be flooded by Canadian cattle, while no such danger really exists.

In ancient Babylonia, medicines were frequently mixed in beer.

SUNDAY SCHOOL LESSON

AUGUST 21

THE TENT OF MEETING

Golden Text: "Jehovah spake unto Moses face to face, as a man speaketh unto his friend."—Exodus 33.11.

Lesson: Exodus, chapters 32, 33.

Devotional Reading: Psalm 5.1-7.

Explanations and Comments

The Place and Purpose Of the Tent Of Meeting, verses 7-11.—These verses describe the customary way in which Moses performed his high priestly service during the wilderness life, before the tabernacle was erectd. At every new encampment he "used to take the tent," a special tent which he called the "Tent of Meeting," and have it set up by itself, far from the camp.. Similarly, after the settlement in Canaan, the local sanctuaries were beyond the towns and villages. The tent was especially sacred because there any inquirer might come with his perplexities and receive an answer from Moses as priest. When his duties were over, Moses returned to the camp, but the tent was constantly guarded by his assistant, a young man named Joshua.

When Moses had tarried on Mount Sinai, the people had complained to Aaron that, "as for this Moses, the man that brought us up out of the land of Egypt, we know not what has become of him," and this new arrangement was better for the people, for they could follow him with their eyes till he entered the Tent. When they saw the pillar of cloud, the symbol of the Divine Presence, hover over the door of the Tent, each man, sitting and watching at the entrance of his own tent, would rise up and worship. And Jehovah spake with Moses.

"Prayer is more than meditation, it is communion. It is a dialogue, not a monologue. It is not enough that man speak to God; he must believe that God can hear and, in some way, speak to him again. And one of the most welcome and surprising features of the Bible is that it is even more full of God's speech to men than of man's to God."—John E. McFadyen).

Within the "Tent of Meeting" Jehovah used to speak unto Moses face to face, as a man speaketh unto his friend. The expression, "speaking face to face," has become proverbial for intimate converse. It is an interesting and profitable exercise, as Dr. John E. McFadyen reminds us, to watch the Hebrew mind gradually transcending its earlier limited conceptions of God. "Sometimes the higher and the lower views may be found within the same chapter. A profounder view than in verse eleven occurs a few verses farther on, 'Thou canst not see My face; for man shall not see Me and live.' A still more severely spiritual view occurs in Deuteronomy 4.12-15, where it is urged with great emphasis, as if in opposition to popular conception, 'Ye only heard a voice, ye saw no manner of form'."

"Prayer is the psychological act by which the soul comes into conscious contact with God."—Robert F. Horton.

"We have too little praying face to face with God every day. Looking back at the end, I suspect there will be great grief for our sins of omission—omission to get from God what we might have had by prayer." —Andrew Bonar.

According To Supply

The doctor was giving a lecture to a class of girls.

"Also," he remarked, "it has been found that the human body contains sulphur!"

"Sulphur!" exclaimed a pretty young girl. "And how much sulphur is there in a girl's body?"

"Oh, the amount varies," said the doctor smilingly, "according to the girl."

"Ah," remarked the girl. "That's why some of us make better matches than others."

Stops Summer Odors—

The heavy smell which warm weather brings to many people is largely prevented by regular bathing with a free lather of Baby's Own Soap.

The delicate aroma dispels all unpleasantness and the skin feels so refreshed, cool & sweet.

Baby's Owns sells at 10c. a cake at dealers everywhere.

"Best for you and Baby too"

Naval Armaments

Difficult To Distinguish Between Defensive and Offensive Weapons

Why all this bother about "offensive" and "defensive" naval weapons at Geneva? Is the submarine offensive? Are battleships, mine-layers and bombing planes defensive?

There is one simple rule by which every case can be decided: The other fellow's weapon is extremely offensive, your own is purely defensive.

Ask any schoolboy or baseball fan. The humble pop bottle is the most innocuous of objects, quite inoffensive. Only prejudiced persons like the umpire could possibly construe it as offensive. Again take the pea-shooter. Whoever heard of a schoolboy that used this mild little weapon for attack? As any boy knows, the uses of the pea-shooter, like the water-pistol, are solely for the warding off of attacks by others, especially those armed with pea-shooters.

And so it is with submarines and the like. The gentle U-boat regarded the Q-boat as highly offensive, whereas we all know it to have been purely protective. During the war, some of us harbored hard thoughts about submarines. Quite unjustly, it now seems, according to the French and Japanese thesis. The under-sea boat has become the Poor Nation's Armor. It is the cheapest naval weapon for frightening off offensives, according to its backers.

The sad truth is quite evident. Weapons are defensive or offensive according to the uses to which they are actually put. When you have decided who is the offender, and who is on the defensive, then, perhaps, you may decide whose weapons are offensive. Meanwhile, most nations seem to proceed on the principle that if a club is defensive, three clubs and a machine gun are twice as defensive. —Montreal Star.

Make Interesting Discovery

Canadian Scientists Gain Knowledge Of Universe Of Great Importance

New knowledge of the universe, stated to be of tremendous potential importance in the scientific world, has been gained by Prof. J. S. Foster and Dr. A. Vibert Douglas, McGill scientists who returned to the university following a month's research work conducted at the Dominion Astrophysical Observatory at Victoria.

Professor Foster declined to claim full success for their achievements until he and Dr. Douglas have had time to re-study their findings. He said, however, that the results of their work would quite likely create an upset of opinion among European scientists.

The two McGill scientists set themselves to examine the electrical fields of stars.

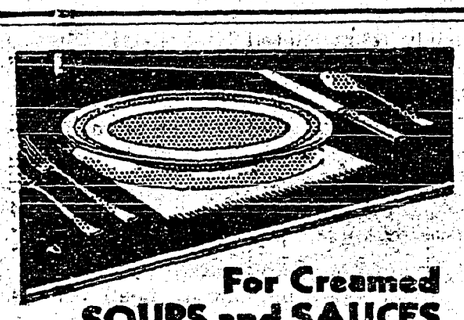
They conducted observations both at Victoria and at Pasadena, Cal. Only one day was spent at the latter place.

"What's that you're putting in your shirt pocket?" asked Murphy.

"Dynamite," whispered Donovan. "I'm waiting for Casey. Everytime he meets me he slaps me on the chest and breaks my pipe. Next time he does it he'll blow his hand off."

She: "They say that a sailor has a sweetheart in every port."

He: "Yes, but this isn't port."—Buen Humor, Madrid.



For Creamed SOUPS and SAUCES

IF YOU have not tried St. Charles Milk you will be surprised at the improved flavor it gives to cream soups and sauces. It is handy and economical too and with it you can make hundreds of tasty dishes that you and your family will enjoy.

Always ask for St. Charles by name and then you can be certain that you are obtaining the finest evaporated milk.

Borden's ST. CHARLES MILK UNSWEETENED EVAPORATED

THE HOUSE OF DREAMS-COME-TRUE

MARGARET PEDLER

Author Of "The Splendid Folly." "The Hermit Of Far End."
Hodder & Stoughton, Ltd., London.

CHAPTER XXVIII.—Continued

"Oh, yes, she did. It was quite clear in the afternoon when she started—looked like being a lovely night."

"But—but——"

Nick stammered and came to a halt. There was a look of bewilderment in his eyes.

"But who's she gone with?" he demanded at last. "I thought she said she intended stopping the night with Judith and Burke at their bungalow?"

"So she did," replied Blaise. "Why? Have you any objection?"—smiling.

"No. Only"—Nick frowned—"I don't quite understand it. Judith isn't on the Moor."

"Not on the Moor?" broke simultaneously from Lady Anne and Blaise.

"How do you know, Nick?" added the latter gravely.

"Why, because"—Nick's face wore an expression of puzzled concern—"because I saw Judith in Newton Abbott late this evening."

Blaise leaned forward, a sudden look of concentration on his face.

"You saw Judith?" he repeated. "What time?"

"It must have been nearly eight o'clock. I was buzzing along in Jim Cresswell's car to catch the seven-forty-five up train, and I saw Judith with one of the Holfords—you know, those people from London—turning into the gateway of a house. I expect it was the place the Holfords are stopping at. They didn't see me."

"You're quite certain? You've made no mistake?" said Blaise sharply.

"Of course I've made no mistake. Think I don't know Judy when I see her? But what's the meaning of it, Blaise?"

Tormarin rose to his feet, tossing the stump of his cigarette into the fire.

"I'm not sure," he said slowly. "But I'm going to find out. Madonna" — turning to his mother—"did Jean tell you exactly what Judith said when she rang her up on the 'phone about this moonlight plan?"

"It wasn't Judith who rang up," replied Lady Anne, a faint misgiving showing itself in her face. "It was Geoffrey who gave the message."

Tormarin looked at her with a sudden awakened expression in his eyes. There was dread in them, too—keen dread. The expression of a man who, all at once, sees the thing he values more than anything in the whole world being torn from him—dragged forcibly away from the shelter he could give into some unspeakable darkness of disaster.

"That settles it." He pressed his finger against the bell-push and held it there, and when Baines came hurrying in response to the imperative summons, he said curtly: "Order me a fresh horse round at once—at once, mind. Tell Harding to saddle Orion, and to look sharp about it."

"Blaise—Lady Anne's obvious uneasiness had deepened to a sharp anxiety—"Blaise, what are you going to do? What—what are you afraid of?"

He looked her straight in the eyes.

"I'm afraid of just what you are afraid of, madonna—of the devil let loose in Geoffrey Burke."

"And—and you're going to look for her—for Jean?"

"I'm goin to find her,' he corrected quietly.

Gravity had set its seal on all three faces. Each was conscious of the same fear—the fear they could not put into words.

"But why do you take Orion?" asked Nick. "The little thoroughbred mare—Redwing—would do the journey quicker and be lighter of foot over any marshy ground on the Moor."

"Orion can go when he chooses," returned Tormarin. "And he'll choose tonight. Redwing is a little bit of a thing, though she's game as a pebble. But she couldn't carry—two."

The significance of Tormarin's choice of his big roan hunter, three-parts thoroughbred and standing sixteen hands, came home to Nick. He nodded without comment.

Silently he and Lady Anne accompanied Blaise into the hall. From the gravelled drive outside came the impatient stamping of Orion's iron-shod hoofs. Just at the last Lady Anne clung to her son's arm.

"You'll bring her back, Blaise?" she urged, a quiver in her voice.

"I'll bring her back, madonna," he answered quietly. "Don't worry."

A minute later he and the great roan horse were lost to sight in the mirk of the night. Only the beat of galloping hoofs was flung back to the two who were left to watch and wait, muffled and vague through the shrouding mist like the sound of a distant drum.

CHAPTER XXIX.

The Golden Hour

Orion had fully justified Blaise's opinion of his capabilities. As though the great horse had gathered that there was trouble abroad to which he must not add, he had needed neither whip nor spur as he carried his master with long, sweeping strides over the miles that lay betwixt Staple and the Moor. He was as fresh as paint, and the rush through the cool night, under a rider with hands as light as a woman's and who sat him with a flexible ease, akin to that of a Cossack, had not disturbed him in the very least.

Now they were climbing the last long slope of the white road that approached the bungalow, the reins lying loosely on Orion's neck.

The mist had lifted a little in places, and a watery-looking moon appeared through the clouds now and again, throwing a vague, uncertain light over the blurred and sombre moorland.

Tormarin had no very definite plan of campaign in his mind. He felt convinced that he should find Jean at the bungalow. If, contrary to his expectation, she were not there, nor anyone else to whom he could apply for information as to her whereabouts, he would have to consider what his next move must be.

Meanwhile, his thoughts were preoccupied with the main fact that she had failed to return home. If she had accepted Burke's invitation to the bungalow, believing that Judith and the Holfords would be of the party, how was it that she had not at once returned when she discovered that for some reason they were not there?

Some weeks ago—during the period when she was defiantly investigating the possibilities of an "unexploded bomb"—it was quite possible that the queer recklessness which sometimes tempts a woman to experiment in order to see just how far she may go—the mysterious delight that the feminine temperament appears to derive from dancing on the edge of a precipice—might have induced her to remain and have tea with Burke, chaperon or no chaperon. And then it was quite on the cards that Burke's lawless disregard of anything in the world except the fulfilment of his own desires might have engineered the rest, and he might have detained her at the bungalow against her will.

But Blaise could not believe that a "tete-a-tete" tea with Burke would hold any attraction for Jean now—not since that day, just before the visit to London, when he and she had been discussing the affairs of Nick and Claire and had found, quite suddenly, that their own hearts were open to each other and that with the spoken word, "Beloved," the misunderstandings of the past had faded away, to be replaced by a wordless trust and belief.

But if it "had" attracted her, if — knowing precisely how much the man she loved would condemn—she had still deliberately chosen to spend an afternoon with Burke, why, then, Blaise realized with a swift pang that she was no longer his Jean at all but some other, lesser woman. Never again the "little comrade" whose crystalline honesty of soul and sensitive response to all that was sweet and wholesome and true had come into his scarred life to jewel its arid places with a new blossoming of the rose of love.

He tried to thrust the thought away from him. It was just the kind of thing that Nesta would have done, playing off one man against the other with the innate instinct of the born coquette. But not Jean—not Jean of the candid eyes.

Presently, through the thinning mist, Tormarin discerned the sharp turn of the track which branched off from the road towards the bungalow, and quickening Orion's pace, he was soon riding up the steep ascent, the moonlight throwing strange, confusing lights and shadows on the mist-wet surface of the ground.

Suddenly, without the slightest warning, the roan snorted and wheeled around, shying violently away from the off-side bank. A less good horseman might have been unseated, but as the big horse swerved Tormarin's knees gripped against the saddle like a vice, and with a steadying word he faced him up the track again, then glanced keenly at the overhanging side of the roadway to discover what had frightened him.

A moment later he had jerked Orion to a sudden standstill, leapt to the ground and, with the reins over his arm, crossed the road swiftly to where, clad in some light stuff that glimmered strangely in the moonlight, lay a slender figure, propped against the bank.

"Blaise!" Jean's voice came weakly to his ears, but with a glad note in it of immense relief that bore witness to some previous strain.

In an instant Tormarin was kneeling beside her, one arm behind her shoulders. He helped her to her feet and she leaned against him, shivering. Feeling in his pockets, he produced a brandy flask and held it to her lips.

"Drink some of that!" he said. "Don't try to tell me anything yet."

The raw spirit sent the chilled blood racing through her veins, putting new life into her. A faint tinge of colour crept into her face.

"Oh, Blaise! I'm so glad you've come—so glad!" she said shakily.

"So am I," he returned grimly. "See, drink a little more brandy. Then you shall tell me all about it."

At last, bit by bit, she managed to give him a somewhat disjointed account of what had occurred.

"I think I must have been stunned a little when I fell," she said. "I can't remember anything after stepping right off into space, it seemed, till—oh ages afterwards—I found myself lying here. And when I tried to stand, I found I'd hurt my ankle and that I couldn't put my foot to the ground. So"—with a weak little attempt at laughter—"I—I just sat down again."

Blaise gave vent to a quick exclamation of concern.

"Oh, it's nothing, really," she reassured him hastily. "Only a strain. But I can't walk on it." Then, suddenly clinging to him with a nervous dread: "Oh, take me away, Blaise—take me home!"

"I will. Don't be frightened—there's no need to be frightened any more, my Jean."

"No, I know. I'm not afraid — now."

But he could hear the sob of utter nerve strees and exhaustion back of the brave words.

"Well, I'll take you home at once," he said cheerfully. "But, look here, you've no coat on and you're wet with mist."

"I know. My coat's at the bungalow. I left in a hurry, you see" — whimsically. The irrepressible Peterson element, game to the core, was reasserting itself.

"Well, we must fetch it——"

"No! No!" Her voice rose in hasty protest. "I won't—I can't go back!"

"Then I'll go."

"No—don't! Geoffrey might be there——"

"So much the better" grimly. "I'd like five minutes with him." Tormarin's hand tightened fiercely on the hunting-crop he carried. "But he's more likely lost his way in the mist and fetched up far enough away. Probably"—with a short laugh—"he's still searching Dartmoor for you. You'd be on his mind a bit, you know! Wait here a minute while I ride up to the bungalow——"

But she clung to his arm.

"No, no! Don't go! I—I can't be left alone—again."

The fear was coming back to her voice and Blaise, detecting it, abandoned the idea at once.

"All right, little Jean," he said reassuringly. "I won't leave you. Put my coat round you"—stripping it off. "There—like that." He helped her into it and fastened it with deft fingers. "And now I'm going to get you up on to Orion and we'll go home."

"I shall never get up there," she observed, with a glance at the roan's great shoulders looming through the mist. "I shan't be able to spring—I can only stand on one foot, remember."

Blaise laughed cheerily.

"Don't worry. Just remain quite still—standing on your one foot, you poor little lame duck!—and I'll do the rest."

She felt his arms release its clasp of her, and a moment later he had swung his leg across the horse and was back in the saddle again. With a word to the big beast he dropped the reins on to his neck and, turning towards Jean, where she stood like a slim, pale ghost in the moonlight, he leaned down to her from the saddle.

"Can you manage to come a step nearer?" he asked.

She hobbled forward painfully.

"Now!" he said.

Lower, lower still he stooped, his arms outheld, and at last she felt them close around her, lifting her with that same strength of steel which she remembered on the mountain-side at Montavan. Orion stood like a statue—motionless—as if he knew and understood all about it, his head slewed round a bit as though watching until the little business should be satisfactorily accomplished, and blowing gently through his velvety nostrils meanwhile.

Try Lydia E. Pinkham's Vegetable Compound

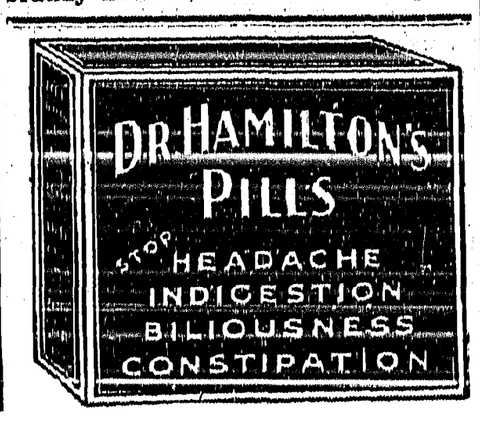
Had Melancholy Blues

Wanted to die . . . she felt so blue and wretched! Don't let cramps ruin your good times. Lydia E. Pinkham's Vegetable Compound gives you relief.

PACKS RIGHT- LIGHTS RIGHT- BURNS RIGHT IN YOUR PIPE

OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco.



All mothers can put away anxiety regarding their suffering children when they have Mother Graves' Worm Exterminator to give relief. Its effects are sure and lasting.

A railway season ticket, covering 175 miles of travel, was issued to a dog, at Plymouth, so it could accompany its mistress, a travelling saleswoman, on her trips.

You can cook 3 vegetables AT ONCE

in the same saucepan by using CANAPAR

Do each vegetable up in its own bag of Canapar Cookery Parchment.

There won't be any odor, not even from cauliflower. *All* the food value and flavor will be retained. And you use only *one* burner *turned low* for cooking. The flavors will not mix!

Do the same with boiled or steamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No saucepan or kettle to clean up. When roasting meat, line your pan with Canapar. Fats and juices won't burn. No more scraping or scouring of the pan afterwards.

You can use Canapar repeatedly by simply rinsing it off and hanging up to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silky, strong, and doesn't spread lint. Made by the makers of the famous PARA-SANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't, send this coupon direct to the makers and we'll give you a new and unique booklet entitled "Leftovers", containing one hundred recipes as a bonus for your trouble.

Applsford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full size package of *Canapar Cookery Parchment* and your 100 recipes for "Leftovers".

There is considerable volume of complaint regarding the looting of gardens of potatoes and other vegetables, presumably by transients.

A Scotchman and an Irishman participated in a riot. The Irishman got into the riot because it was a fight; the Scotchman got into the riot because it was free.

Liquor prices in this province, at least on Canadian products, are likely to be reduced, according to advices from Victoria. There is also a prospect of lowered prices on Old Country brands.

What many a girl can't understand is why before marriage her sweetheart acts as if he had a 999-year lease on half the porch swing, while after the wedding she has to entice one of the neighbor women over if she doesn't want to sit in it alone.

H. W. McLaren and family returned Sunday night from a holiday trip to coast points. H. L. Harrison, who has been relieving Mr. McLaren in the liquor sto e here, left on Tuesday for Kimberley.

Albert, Edwin and William Peterson have disposed of 380 acres of their holdings in Drainage District No. 9, near Copeland, to George Fox, a Spokane cattle buyer. Part of the consideration was the Blackstone apartment house, Spokane. The Peterson boys still retain large interests in Valley bottom lands.

Mrs. A. R. Bjorneby, Kalispel, Mont., was a weekend visitor at the home of her parents, Mr. and Mrs. LaBelle. She returned Monday, accompanied by Opal, Eva and Yvonne LaBelle, who will spend the ensuing three weeks in Kalispel. Mrs. LaBelle and Telesphore accompanied them as far as Waldo.

E. Pfrimmer and family of Edmonton, passed through northbound by auto on Monday after a trip south which took them as far as Portland. Mr. Pfrimmer is an old Edmonton friend of The Review's regular editor and dropped in to pay his respects. He states that the crop outlook this year in and around Edmonton is very satisfactory.

The Cranbrook board of school trustees is desirous of ascertaining the number of probable students for the senior matriculation class for the term commencing September 6. Applications should be sent in immediately, as whether or not an extra teacher will be required depends on the number of students available. The fee charged is $10 per month.

OUR K.B.O. BROADCAST

The Okanagan crab apple crop is light this season.

A federal fish hatchery may be established at Sandpoint, Idaho.

ARE YOU MAKING YOUR OWN PICKLES ?

EVERY HOUSEWIFE prides herself on the quality and variety of pickles she makes each season. She knows too well that no matter how careful she is in making those pickles, unless the SPICES and VINEGAR used are the best, satisfactory results cannot be secured.

H. J. Heinz Company prepares several varieties of good vinegar; but for pickling purposes especially recommends White Pickling Vinegar—distilled from grains—full strength, pure and wholesome.
