THE CRESTON REVIEW

Vol. XXIV. CRESTON, B. C., FRIDAY, MARCH 10, 1933 No. 51

Basketball Near Season's End

Postponed Games to be Played Off Fast—Regular League Season Closes Tonight—Dominoes Still Losing—Centipedes Win

MEN.

	Pld.	Wn	Lst.	Pct.
Centipedes	6	6	0	1.000
Bearcats	6	5	1	.800
Imperial Groctria	7	2	5	.333
High School	7	0	7	.000

LADIES.

High Reps	8	8	0	1.000
Creston Motors	10	6	4	.600
Meds	9	5	4	555
Highfliers	9	4	5	.375
Dominoes	10	0	10	.000

A poor crowd witnessed one of the hottest league battles of the year when the Bearcats took the fixture from the Groceteria in the dying minutes of the game.

The Highfliers swamped the Dominoes in the curtain-raiser, 19-6. The blue-and-white squad completely faded after the first few minutes, when Jean Henderson scored two baskets. Theo Tompkins and Phyllis MacDonald, of the school team, had their shooting-eyes in and peppered the Dominoes' basket from all quarters. The whole Highfliers team played fast basketball in the second half.

The second game was another walk-away, with the Centipedes taking the High School into camp, 25 7. The league-leaders played a sound defense game the first half and then carried the game into the opposing territory after the intermission. Their shooting was poor, however, despite their fast breaking. Tully and Farris were in form for the victors. Sostad did some nice interrupting. Young Lance Maddess and Roland Miller of the school team did some quite spectacular shooting.

The Groceteria quintette played beautiful basketball the first half and should have had the game on ice, but a rally by the Bearcats seemed to break down their morale. The orange-and-black squad had nice combination, but their shooting was not so good. The last few minutes they played with four men only, losing Robinson on personals and having no substitutes. With four seconds to go, Holmes scored the winning basket for the Bearcats. The game was marred by a little argument in the second half, that seemed likely to develop into a fight, but nothing came of it.

Highfliers—MacDonald 6, Palmer 4, Tompkins 7, Downes, E. LaBelle 2.—19.
Dominoes—Sanford, M. McDonald, Henderson 4, Nora Payne 2, Cartwright, Walker, A. McDonald.—6. Referee, D. Euans.

Centipedes—Tully 7, Marriott 9, Farris 9, Webster, Sostad, Moore, Evans, Levirs.—25.
High School—Miller 2, Scott, Telford, Maddess 4, Young 1, Speers, Nichols, Dodd.—7. Referee, M. Levirs.

Bearcats—Holmes 6, Crane, Johnston, Ross 2, Corrie 3, LaBelle, MacDonald 2.—13.
Imperial Groceteria—Couling 5, Bourdon 3, Robertson, Kelly, Christie 3.—11. Referees, F. Levirs and E. Marriott.

Postponed games will be played off in quick order. Tuesday: 7.30—High Reps. vs. H'ghfliers. 8 30—Meds. vs. Dominoes. 9.30—Centipedes vs. Imperial Groceteria.

Alice Siding

Fred Alderson, who recently underwent an operation for appendicitis at Cranbrook hospital, returned home on Sunday, and is rapidly regaining his former good health.

Miss Ruth Joy of Wynndel is making her home at present with Mr. and Mrs. Husband, and is attending the high school department at Alice Siding school.

N. Husband, who has been cook at the relief camp at Sirdar for the past few months, has been forced to quit the job on account of indifferent health, and arrived home at the first of the month.

J. C. Martin reports a very healthy demand for his Leghorn pullets. Already he has made two shipments of 175 birds each to two different parties at Nelson, as well as having a good local demand.

Building bees to help out local citizens have been a feature of community life this month. Last Wednesday 15 of the neighbors were on hand to help with the erection of the log framework of the new home for Mr. and Mrs. John Miller, jr., and Wednesday of this week a similar turnout in evidence at a bee for the same class of work on the new home of Mr. and Mrs. Frank Martin, on the acreage recently purchased from the defunct Home Bank.

The Social Club wound up the season of weekly whists on Friday night last at the home of Mr. and Mrs. Victor Carr, at which the prizewinners were Mrs. I. Willis and Jack Smith. Following cards there were a few hours dancing, which was much enjoyed, especially by the young people. The Friday evening previous Mr. and Mrs. Frank Simister were hosts to the club, followed by a much enjoyed dance, and the evening's winners at cards Elsa Willis and Fred Simister.

With an enrolment of 28 pupils an average daily attendance of 26.43 for February is the showing made by Alice Siding school. Class leaders were: Grade 8—Geoffrey Constable, Ethel Mather. Grade 7—Hazel Miller, Elsie Mather. Grade 6—Sidney Argyle, Carl McDougall. Grade 5—Joan Smith, Alfred Parkin. Grade 4—Marion Smith, John Smith. Grade 2—Billy Constable, Wilbur Argyle. Grade 1a—Frank Simister. Grade 1b—Joe Smith, Mabel Mather. Perfect attendance—Betty Smith, Arthur Constable, Edward Argyle, Charles Ostrensky, Geoffrey Constable, Ethel Mather, Hazel Miller, Sidney Argyle, Elsie Miller, Joan Smith, Violet Parkin, Alfred Parkin, Ada Smith, Marion Smith, Billy Constable, Wilbur Argyle John Marshall, Martha Marshall, Joe Smith.

Kitchener

Miss Esther Nelson arrived home from Cranbrook on Wednesday, where she has been visiting the past few weeks.

A new radio has just been installed at at the home of Mr. and Mrs A. LePage, Cecil Moore of Central Motors, Creston, put the deal through.

A number of men from the airport put on a dance in Hunt's Hall on Thursday evening last, when a crowd large attended. The music was good and the affair was greatly enjoyed. There were a number of pianists, violinists and banjoists supplied the music and a fine lunch was served.

There are now 96 men at the airport, the last report showing work being carried on as best it can be expected with so much snow to contend with.

Mrs. E. W. Payne of Creston spent the weekend, here, a guest of Mrs. C. Senesael, returning on Sunday.

The report of Kitchener school for February is as follows: Grade 8—Myrtle Anderson 77. Grade 6—Leonard Bohan 70, Frank Huson 69, Helen Oja 66, Jack Langlois 61, John Bohan 53, Robert Johnson 53, Alta Blair 53. Grade 4—Alice Bohan 58, Jean Blair 52, James Huson and Joe Langloie not ranked. Grade 2—Mary Bohan, Lillian Hankey. Grade 1—Ralph Abar, Marjorie Blair, Jimmie Bohan, Maxine Nowlin, Jack Huson, Harold Nelson.

Misses Clara Hunt, Beatrice Molander and Mrs. Foisy were hostesses at a shower honoring Mrs. Douglas Putnam, nee Vera McGonegal, who was recently married at Spokane. It was held in Hunt's hall, Saturday evening, when about 75 invited guests attended. Bridge was the opening feature of the function, with high and low scores made by Mrs. Douglas Putnam and Mrs. H. Bohan; Z. Geroux and Willard Blair. After cards Mrs. Putnam was presented with a basket decorated in pink and white filled with presents for her new home, which were both beautiful and useful as well as being plentiful. Miss Clara Hunt, on behalf of the guests, extended felicitations to the bride, which she suitably acknowledged. A nice lunch was served, and then dancing was enjoyed. Music was by Mrs. Elmer Blair, piano; Geo. Priest, violin; Hans Swanson and Denis Bush, banjo.

Michel Here To-Night

The Michel Intermediate A team which is playing here tonight (March 10) has a remarkable record, having gone through the season without a single defeat, after having played teams throughout the Crowsnest and Southern Alberta.

They are on the way to the Okanagan where they will play the Valley champions in their division for the Interior and B.C. title.

For a young team, they are remarkably heavy The following is the team personell.

Centre—Tommy Krall, 18 years old, 6 feet 2 inches, 210 pounds. Guards—Dan Quayle, 19 years, 6 feet, 190 pounds; Johnny Krall, 20 years, 5 feet 10, 185 pounds; Henry Eberts, 18 years, 5 feet 11, 158 pounds; Freddy Brown, 20 years, 5 feet 8, 155 pounds. Forwards—Joe Katrickak, 19 years, 5 feet 11, 184 pounds; Paul Chala, 19 years, 6 feet, 160 pounds; Fred Venzi, 19 years 6 feet, 178 pounds; Steve Katrichak, 18 years, 5 feet 10, 178 pounds.

The feature game will be preceded by a regular league fixture between the High Reps. and the Creston Motors.

Wynndel

Summer time for Wynndel school was inangurated on Wednesday last, the pupils now starting study at 9 a.m.

Wynndel fall fair committee held a meeting last week and funds for 1933 fair prizes were discussed. It was decided bridge drives would get best results, the first to be held in the hall on Saturday, March 11th, at 8 p.m.

The K.K. Klub have booked the evening of Monday, April 17th, for an Easter Monday dance.

Little Mildred Stevens, who has been a patient in Nelson hospital, returned home last week, much improved by treatment received.

Miss E. Towson left on Sunday for a visit with friends at Willow Point.

Public school inspector Manning was a weekend visitor here on school business.

Anglican Church service on Sunday, March 12th, at 3 p.m.

Miss Clara Wittman was a Creston visitor for the weekend.

Lister

Ben Byer left at the end of the week for Anyox, where he has been fortunate in securing work in the smelter at that point.

The 1933 honors for early chicken hatching belong to Mike Riedlmayer who reports a hatch of 14 farmyard variety chicks from 14 eggs, on the 14th of February.

Rev. M. T. Percival of Kimberley wil be here on Sunday at 11 a.m., for the usual Church of England service.

R. V. Willcox of Salmon Arm, the R.O.P. inspector for the poultry section of the federal department of agriculture, was a visitor at the Fred Powers ranch this week on registration work.

The fourth annual meeting of Lister Waterworks District is called for 2 p.m., Saturday, March 11th. at the schoolhouse. W. P. Edwards is the retiring trustee.

A number from here were at Canyon on Wednesday evening last for the Canyon ladies' hospital auxiliary concert, Mrs. Geo. Jacks being one of the contributors to the programme.

W. Vollmerhaus moved to Creston last week, where he has leased some acreage from C. Hollm, and is going quite extensively into poultry. He has been on the former Jack Head ranch the past two years.

Lister lost some good citizens at the end of the week when J. J Reimer loaded out a car of effects and left the same day for his new home at Yarrow, in the Chilliwack district. On Sunday Mrs. Reimer and daughter, Tonia, left by train to join him there.

Miss Curtis' report of Division 1 of the Lister school shows an average daily attendance of 96 per cent. Those taking highest standings were: Grade 8—Clara Domke, Rose Hayward. Grade 7—Douglas Sinclair, Clara Meyer. Grade 6—Cyril Bird, Erika Meyer. Grade 5—Alice Wellspring. Frank Taylor. Perfect attendance—Kirk Beard, Kitty Beard, Cyril Bird, Margaret Dent, Clara Domke, Bert Hayward, Rose Hayward, Erika Meyer, Manning Powers, Doug. Sinclair.

In Division 2, Miss Webster reports an average daily attendance of 94 per cent., with the following making highest standings: Grade 4—Johanna Daus, Margaret Sinclair. Grade 3—Rosemary Wolfrum, Mary Daus. Grade 2—Stella Beard, Mary Millner. Grade 1a—Arthur Sommerfeld, Harold Osborn. Grade 1b—Dorothy Millner, Bernice Dent. Perfect attendance—Milly Beard, Stella Beard, Harold Daus, Mary Daus, Johana Daus, Bernice Dent, Eric Jacks, Dorothy Millner, Mary Millner, Harold Osborn, Tonia Riemer, Margaret Sinclair, Hugo Sommerfeld, Rose Wolfrum, Irene Yerbury.

Arrow Creek

Arrow Creek school, which opened at September with an attendance of 18, had an enrolment of 25 for February.

Miss Lily Staff left a few days ago for Canal Flats, where she is a visitor with her sister, Mrs. M. Kennedy.

Mr. Jorde left a few days ago for Daysland, Alberta, where he will spend a few weeks with relatives.

Mr. and Mrs. Bohmer entertained at a hard times dance at their home on Friday night, which proved a most enjoyable social affair and the great variety of better days' costumes provided no end of amusement, but much serious effort on the part of the judges in making the awards. The "hardest" costume prizes went to E. Cardinal and F. Bunce and the "hardest" comic costumes were those of Misses June Wiltse and Edra Walkey.

Erickson

Erickson school had an enroiment of 52 for February. Commencing Wednesday last the time schedule was changed to summer hours, school now opening at 9 a.m.

Work at Goat River canyon development is getting along to the point where work on the big dam is likely to commence any day now. A considerable supply of gravel is already here.

R. P. Brown returned from South Slocan at the end of the week to resume his position on the West Kootenay Power and Light Company engineering staff.

The March meeting of the Erickson Ladies' Hospital Auxiliary was held at the home of Mrs. Sam Fraser on March 1st, at which four new members were enrolled.

Erickson school report for February shows Principal Tully's Division 1 with 24 pupils enrolled, and an average attendance of 23.30. Proficiency: Grade 8—Patsy Dodds, Muriel Penson, Peg. Murphy, Carol Healey, Evelyn Speaker. Grade 7—Hazel Beam, Peter Heric, Jack Fraser, Gwen Putnam, Lawrence Leadbetter. Grade 6—Margaret Bundy, Zeona Heric, Yvonne Putnam, Olive Speaker, Marion Healey, Kenneth Tompkins, Elvaline Clark. Grade 5—Aileen MacDonald, James Carr, Stella Tompkins, Bertha Fraser, Roy Cartwright, Joan Heric, Anton Neumann.

Perfect attendance—Aileen MacDonald, James Carr, Roy Cartwright, Bertha Fraser. Stella Tompkins, Joan Heric, Olive Speaker, Leona Heric, Margaret Bundy, Marion Healey, Jack Fraser, Patsy Dodds, Evelyn Speaker, Carol Healey, Peg. Murphy.

In Division 2 Miss Walker reports an enrolment of 28, with an average attendance of 25.50, and the following making the highest standings (names in order of merit): Grade 4—Mildred Fraser, John Richardson, Zane Beam. Grade 3—Martha Neumann, Norma Bundy, Anita Heric, Beryl Tompkins, Emil Neumann, Rose Leadbetter, John Murphy. Grade 2—James Holder, Alice Healey, Jessie Beam, Lois Botterill, Fred Speaker. Grade 1—Lois Bundy, Elizabeth Gadski, Mabel Hlookoff, Norma Spedding, Elmer Pagans, Fred Carr, Harold Beam, Maurice Murphy, Leland Heric, Hazel Botterill, Evelyn Andrew, Mabel Chornoff, Henry Read.

February School Report, Creston

Enroiment for Month Same as January, 315—Divisions 2 and 5 Have Highest Average Attendances for the Month.

Division 1—E. Marriott, Principal.
Number attending, 33.
Average attendance, 31.25.
Proficiency: Grade 8—Sylvia Talarico, Nila Hintz, Arthur Nastasi. Grade 7—Jessie Spratt, Maisie Ferguson, Iona Hills.

Perfect attendance—Raymond Bevan, Bill Bourdon, I. Brady, Billy Craig, Jean Danaldson, Clarence Embree, Irvin Fergusion, Margaret Henderson, Iona Hills, Stewart Hilton, M. Joy, August Morabito, Rachel Morrow, Frank Morth, Arthur Nastasi, Beryl Palmer Jessie Spratt, Donald Truscott.

Division 2—Miss Meldrum, teacher.
Number attending, 33.
Average attendance, 36.58.
Proficiency: Grade 7—Lottie Klein, Stanley Hendren, Ruby Palmer. Grade 6—Ruth Davis, Leona Schmidt, Helen Staples.

Perfect attendance—David Armitage, James Bourdon, Ronald Cooper, Gladys Davies, Ruth Davis, Vernon Donaldson, Charles French, Russell Gabelhei, Doris Hendy, Egon Hollm, Edith Johnston, Kenneth Keirn, Willie Krygsveld, Helen McCreath, Billy McFarland, Irwin Nickel, Ruby Palmer, Eva Phillips, Mary Ross, Leona Schmidt, Dick Trevelyan, Goldie Walker, Billy Weir, Campbell York.

Division 3—Miss Wade, teacher.
Number attending, 38.
Average attendance, 36.
Proficiency: Grade 6—Elsa Foerster, Ethel Morrow, Marguerite Grant. Grade 5—Kenneth Hester, Jack Hall, Alex. Campbell.

Perfect attendance—George Carr, George Cartwright, Elsa Foerster, Marguerite Grant, Walter Hills, Johnnie Joy, Dorothy Klingensmith, Tinus Krygsveld, Thelma Lowther, Robert Lowther, Bert McFarland, Evelyn Nastasi, Irene Pridham, Ariel Schade, Thelma Stewart, Clayton Sinclair, Mary Watson, Ardrey Weir.

Division 4—Miss Learmonth, teacher.
Number attending, 38.
Averaffe attendance, 36.75.
Proficiency: Grade 4—Esther Ostendorf, Charlotte Wilks, Vera Watson. Grade 3—Rosie Rota, Jean Bunt, Jean Bailey.

Perfect attendance—Jean Bailey, Jean Bunt, Audrey Cooper, Bert, Crosby, Kenneth French, Doris Gabelhei, Mary Gabelhei, Olga Hurrack, Leslie Jones, Tony Joy, Russell Martin, Ethel MacLaren, David McFarland, Jimmy O'Neil, Esther Ostendorf, Jean Pridham, Muriel Raymond, Rosie Rota, Dorothea Schmidt, Vera Watson, Edna Willis, Blanche York, Isobel Macka .

Division 5—Miss Hobden, teacher.
Number attending, 36.
Average attendance, 32.42.
Proficiency: Grade 3—George Bourdon, Harley Brady, Raymond Moore. Grade 2—Teddy Olivier, Louise Hare, Bertha Gardiner.

Perfect attendance—Russell Biccum Harley Brady, Louise Hare, Agnes Lovestrom, Leona Lovestrom, Raymond Moore, Anna Peltzer, Betty Ross, Frank Rota, Sam Rota.

Division 6—Miss Holmes, teacher.
Number attending, 32.
Average attendance, 29.93.
Proficiency: Grade 2b—Harry Ostendorf, Louis Klingensmith, Victor Peltzer. Grade 1—Gwen Moore, Raymond Cooper, Eunice Hughes and Hawkshaw Powell equal.

Perfect attendance—Raymond Cooper, Patsy Forbes, Eunice Hughes, Fred Hurack, Kathleen Joyce, Louis Klingensmith, Bill MacDonald, Lewis Millin, Gwen Moore, Harry Ostendorf, Lewis Palmer, Victor Peltzer, Hawkshaw Powell, Gloria Romano, Ardell Schinnour, David Timmons, Donald Handley, Joan Langston.

Welcome Announcements.

The recent statement by Premier Bennett in the House of Commons in which he outlined the attitude of himself and his Government on the subject of reciprocal trade relations with the United States, and in which he declared that the United States was Canada's natural market, constitutes, not only an announcement of great interest and importance, but it has the effect of removing, at least so far as the principle involved is concerned, this particular phase of the tariff question from the realm of partizan politics. Differences of opinion as to details of any such trade arrangement may exist or develop between the two great political parties in this country, but, so far as the question of the desirability of such an arrangement, it has now been quite plain that there is no difference of opinion.

To all those who feel that the important question of the tariff should, as far as possible, be removed from the arena of partizan political controversy, this unanimity of view will be most gratifying, as well as a most hopeful sign that at no distant date a marked improvement in the trade relations of these two great countries, having so many things in common, and divided only by an imaginary boundary line, will be effected.

Premier Bennett made his momentous announcement when speaking to a resolution moved by a Liberal member, and which was worded as follows:

"That, in the opinion of this House, it is expedient that the Government of Canada re-open negotiations with the Government of the United States of America with a view of bringing about a satisfactory reciprocal trade agreement between Canada and the United States whereby the natural products of Canada, that is the products of the sea, the farm, the mines, and the forests, and including fish, lumber, wheat, cattle, etc., should have free entry into the United States in exchange for the admission of certain goods from the United States of America, which in the interests of both countries may be admitted into Canada, free from customs tariffs."

Almost equal in its importance to Premier Bennett's statement, is the announcement contained in press despatches that the new Administration at Washington, under the guidance of President Roosevelt, proposes to make overtures to the Canadian Government looking to the negotiation of such a trade agreement or treaty, if, indeed, such overtures have not already been tentatively made.

Canadians generally will welcome these new developments, and nowhere will they be received with greater goodwill, and with sincere hopes that success will attend such negotiations, than in the provinces of Western Canada. Unquestionably, the continent of North America is one economic unit, however it may be divided politically and nationally. Nature made it so geographically and climatically.

The United States can supply Canada with many things we do not, and cannot, produce for ourselves,—cotton, tropical and semi-tropical fruits, anthracite coal, many articles of manufacture, to mention only a few items. On the other hand, the United States stands in need of enormous quantities of other natural products which Canada can supply in abundance. Why, then, should both countries erect barriers against the natural exchange of such commodities to the disadvantage of both?

Here in Western Canada we can raise tens of thousands of head of range cattle, but we are handicapped in finishing them for market, including the British market, and are at a distinct disadvantage in competing with the Argentine. But the United States raises enormous quantities of corn for feeding purposes. What is more natural than that Western Canada should ship thousands upon thousands of stocker cattle to the corn states to the south to be fattened for market? Both countries would profit thereby.

Why should the Maritime Provinces be forced to look for markets long distances inland in Ontario and Quebec, even in the West, with the rich markets of the great cities along the U.S. Atlantic seaboard right at hand and easily and cheaply reached by water transportation? Why should Ontario, lacking coal supplies of its own, be denied free and cheap access to the great coalfields immediately to the south but in the United States? Why should either country cripple the natural flow of trade north and south, fighting geography in an uneconomical fashion, while striving for markets thousands of miles away?

Is it now admitted, almost universally, that the troubles which today beset the world are almost entirely of our own making, the result of our own blindness and stupidity, and not the fault of an all-wise Providence nor the breakdown of the immutable laws of Nature?

Canada and the United States have set the world an object lesson for more than one hundred years of an undefended boundary line thousands of miles in extent. We have shown the nations of the world how international relations should be conducted so as to avoid all physical warfare. Can we not also show the world, in its present time of distress, how international economic relations should be governed so as to avoid economic warfare?

Assuredly we can, if we will. And it is because we should do so that these announcements of the past few weeks are so welcome, so promising of great betterment for the peoples of both countries. And to us in Canada especially welcome as indicating a unity of desire and policy on the part of all our political parties in the advancement of the common good and economic welfare of this Dominion.

A three-day census shows 4,000 homeless men, women and children in Cleveland.

Great Britain has the highest taxation; France comes second and Germany third.

MILBURN'S HEART AND NERVE PILLS

Headaches and Dizzy Spells Nerves In Bad Condition

Mr. Neil Crawford, Hamilton, Ont., writes:—"My nerves were in such bad condition I found it almost impossible to get a good night's sleep.

I was also bothered with headaches and dizzy spells.

I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Heart and Nerve Pills I could hardly believe the change they had made in my condition."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Rich Gold Strike

New South African Field Opens Up Great Possibilities

Another great gold strike—possibly equal to past rushes which helped end former depressions—was described to the American intitute of mining and metallurgical engineers.

One-eighth of the world's present gold production is the estimate, though not yet proven, capacity of this new field, the Consolidated Goldfields, South Africa, This dazzling estimate was reported by F. W. Lee, supervising engineer, geophysical so-supervising engineer, geophysical section, United States Bureau of Mines, Washington.

It caps several weeks of reports in inside circles of New York engineers that the new South African field might produce enough gold to start the ball rolling toward world prosperity.

Lee told the story of how the new scientific "diving rod," the magnetometer, located the ore.

"The greatest outstanding achievements of the year," said Mr. Lee, "was made by the engineers in the Consolidated goldfields. Here the subcutcrop of the main reef series was traced from Middelvlo through properties of the Westward area, a distance of from 30 to 40 miles.

Art Competition

Manitoba and Quebec Student Architects Win Awards

Manitoba and Quebec student architects won awards in the Royal Architectural Institute of Canada competitions, result of which were announced recently.

Leonce Desgagne, Ecole Des Beaux-Arts, Quebec, won first prize in the class "A" project, in which 53 designs were submitted, and Eric Thrift University of Manitoba, was awarded first prize in class "B" project. Forty-nine designs were submitted for the latter class.

Maurice Germain, Ecole Des Beaux-Arts, Montreal, won second in class "A" project; G. R. Whale, University of Toronto, was third, and William Sheets, University of Manitoba, received honorable mention.

In class "B" Lowell Wallace, University of Manitoba, was second, and I. M. Saunders, University of Toronto, third. The University of Alberta had one design entered in the class "A" project and eight in class "B" but won no prize.

The jury of award consisted of: H. L. Featherstonaugh, Montreal; Irenee Vautrin, Montreal; Wilfrid Lecroix, Quebec; John M. Lyle, Toronto, and H. J. Burden, Toronto.

Another Use For Radio

Fever Machine Is Newest Treatment For Certain Diseases

A "fever machine" which treats disease by the power of radio waves to raise the temperature of the body was described before the American College of Physicians at Montreal.

It is a new application of radio, treating disease instead of sending messages, and was reported by Dr. Walter M. Simpon of Dayton, Ohio. The machine is used in treating diseases that are sometimes cured and often improved by producing artificial "fevers' in the body. Among these diseases are general paresis, a form of paralysis that attacks many insane persons, some forms of arthritis, a disease of the joints, and diseases that affect the bodily extremities—arms and legs, feet and hands.

The fever machine is a short-wave radio transmitter, which "broadcasts" 30-meter radio waves through the patient from large metal plates.

Orient Buying Wheat

Shipments From Canada This Season Total 8,814,011 Bushels

Steadily increasing demand in the Orient for wheat is instanced by the fact that Canada has shipped 8,814,011 bushels to China and Japan so far this season. This is 677,413 bushels greater than consignments at this time last year, and it is believed final figures will exceed last year's mark by more than a million bushels.

Bookings up to the end of March for the Orient are 366,666 bushels. Only the lower grades are wanted, and Australia, near at hand, has been getting the lion's share of the business.

C7 THE CANADA STARCH CO. LIMITED, MONTREAL

Robe Proved Good Mascot

Gift Of Maori Chief Treasured By British Admiral

Admiral Sir Lionel Halsey, comptroller and treasurer to the Prince of Wales, told the Authors' Club at London, England, of a New Zealand "kiwi" robe which he wore whenever he fought in action during the Great War.

The garment, a kind of kilt made of flax, was given to him by a Maori chief when he was in command of the battle cruiser "New Zealand." The "New Zealand" went on a cruise to the dominion. One chief, after being shown over the ship, gave him the "kiwi" robe and asked him to promise that whenever he took the ship into action he would wear it. He told him that it had been worn by his forbears in war, but that it would never be required in that country again.

On August 28, 1914, when the action of Heligoland was fought, Sir Lionel said he wore the robe in the conning tower, and he added that the "New Zealand" never received a scratch during the fighting.

After this the garment was looked upon as a mascot. On Jan. 24, 1915, the "New Zealand" fought the German ship "Blucher," which was sunk. Again he wore the "kiwi" with the same result, the "New Zealand" receiving no damage whatever.

In May, 1915, he left the "New Zealand" to Captain, later Admiral, Sir John Green. He handed over the "kiwi" to his successor and in the Battle of Jutland Captain Green wore it when he took the ship into action. Two ships in his own line were blown up and sunk, but the "New Zealand" received practically no damage whatever. After the war, Sir Lionel added, the garment was returned to him and it was one of his most treasured possessions.

Long Gas Line

Proposed To Build Gas Line From Alberta To the Coast

The findings of the Alberta conservation commission is expected to have a bearing upon the plans of oil syndicates to construct a pipe line through to the coast to supply the cities of Vancouver in British Columbia, and of Spokane, Seattle and Tacoma in the state of Washington, with natural gas, it was stated by William C. Fisher, of Calgary.

"This is not a visionary project," said Mr. Fisher. "The findings of the conservation commission will determine the extent of the gas pressure in the Turner Valley area.

"If it is proved that the field can guarantee a 20-year supply, there should be nothing to hinder the proposed gas pipeline to the coast for the supply of cheap natural gas."

Catalogues Human Diseases

Retina Of Eye Affected By Any Abnormal Condition

Practically every disease common to man, says Dr. Clarence R. Ellis, of the Ohio State University applied optics department, can be diagnosed by an examination of the retina of the eye.

Any abnormal condition, he explained, affects the retina immediately—particularly such diseases as brain tumors, heart trouble, cancer and inflammation of the liver.

The chief cause of eye trouble, he added, is the use of too powerful light bulbs in reading lamps.

A patent for a medical compound is obtained only in rare instances in the United States.

Ninety per cent of the women's clothing is made of cotton.

Electric Eye Records Activity Of Housewife

Information Obtained By U.S. Bureau Of Home Economics

For each member of her family, the average housewife makes 18 trips a day to the kitchen sink, according to a February issue of the American Journal of Home Economics.

Each time she goes to the sink, the article shows, she spends, on an average, one minute.

Thus, the homemaker in a family of five will average 90 trips daily to the sink and will work there for an hour and a half.

A photo-electric eye was used to help record every trip made, together with the time spent at the sink. The U.S. Bureau of Home Economics was asked to make this study by the chairman of the committee on kitchens of the president's conference on home building and home ownership, and it received outside co-operation.

An analysis of the study shows that the Washington, D.C., housewives in whose kitchens the photo-electric eye was placed, spent from 38 to 152 minutes at the sink each day, while the number of trips varied from 32 to 217. The reasons for such variations, according to the article, can be determined only by more detailed studies. The definite factual data hitherto unavailable in such studies should make possible more definite conclusions as to the comparative efficiency of different types of kitchen arrangement, Dr. Stanley says.

Dog Runs Elevator

"Bal," a German police dog, has mastered the mysteries of elevator operation. He visits his owner, Robert Mullen, daily in a Denver office building, using his nose to push the button that sets the automatic elevator in operation. He also makes occasional visits to other tenants in the building, going from floor to floor unattended via elevator.

A $4,250,000 paper mill is being built at Ellesmere, England.

CHEST COLDS — A MECCA OINTMENT AND MUSTARD POULTICE

Relieves Congestion — Does Not Blister

At first sign of a cold on the chest apply a Mecca Poultice with the addition of mustard. The warmth in combination with marvellous healing properties of Mecca Ointment will give quick relief. Full directions in each package. 38

End POT SCOURING — Improve FOOD FLAVOR!

Cookery Parchment

brings better, easier, cheaper cooking. Confines odors. Holds full flavours of meats, fish and vegetables. Inexpensive. Each sheet can be used over and over. All dealers, or write direct to

HAMILTON, ONTARIO

RAILWAYS WILL MAKE USE OF AUTO TRUCKS

Montreal, Que.—An important development in freight services on the Canadian National and Canadian Pacific Railways which will provide door-to-door pickup and delivery of freight shipments without extra cost to either shipper or consignee, was announced jointly by George Stephen, vice-president in charge of traffic of the Canadian Pacific Railway, and Alistair Fraser, K.C., acting vice-president in charge of traffic of the Canadian National Railways.

The two railways, the announcement stated, had completed contracts with approximately 45 trucking firms at cities and towns served by their lines in western Ontario, between Toronto and Windsor and Toronto and Sarnia, whereby pickup and delivery service will be provided for shippers at no extra cost. New tariffs embracing this feature will become effective this week.

The railways, it was emphasized, are not entering the trucking business. At some of the points affected by the new tariffs, they already have contracts with cartage firms for pickup and delivery of freight.

Under the present plan, however, this service is extended, by arrangement with local trucking contractors, to points where pickup and delivery service did not previously exist.

The new door-to-door consignment system will improve the service offered at such points and will make use, under contract, of existing cartage services instead of involving the organization of new facilities for that purpose.

New Motor Law

Bill Introduced In Saskatchewan Legislature For Protection Of the Public

Regina, Sask.—Motorists responsible for an accident will have their licenses taken away until they pay any judgments rendered between $100 and $1,000 for property loss, $5,000 for the death of one person or $10,000 for two or more deaths, according to a bill brought into the legislature by Hon. A. C. Stewart, minister of highways.

The proposed act also provides proof of financial responsibility before an auto license is issued to any person under 21 or over 65 years of age, or anyone held responsible for a motor accident.

Saskatchewan's proposed law on financial responsibility of motor owners and drivers is modelled after Ontario's law.

The proposed act does not deny the plaintiff in any motor accident case from proceeding for remedy under any other section of the law.

Price Remains the Same

Radio License Will Be Two Dollars For Another Year

Ottawa, Ont.—Radio licenses will remain at the $2 figure for another year, Hon. Alfred Duranleau announced in the House of Commons. At the same time he expressed the hope the Canadian radio commission would limit programs to advertising produced-in-Canada goods or to Canadian non-advertising programs.

The House "went on the air" discussing radio estimates of the Department of Marine and taking in a wide range of topics. No decision had been made, the minister said, on the system of collecting receiving licenses this year although the object was to force every owner to pay his fee.

Mr. Duranleau said the department this year would be paid for 100,000 more radio licenses at $2 less the 40 cents commission, under the house to house canvass system.

Predicts U.S.-Jap War

Richmond, Va.—Asserting that the United States and Japan inevitably will meet in a future war, General William Mitchell, former chief of America's army air service, recommended the mobilization of air power in Alaska.

Studying Income Tax Law

Government Seeks Workable System To Cover Bearer Bonds

Ottawa, Ont.—The quest for a workable system of enforcing the income tax upon income derived from bearer bonds continues.

The proposal to apply a flat rate of four per cent. on all interest coupons presented to the banks for payment has lost ground heavily in the past few days. It is claimed that to adopt such a policy would be to invite wealthy citizens with liquid assets to invest these assets in bearer bonds and reduce their income tax rate to four per cent.

Another proposition has now been put forward which, it is understood, is meeting with a more favorable reception by the cabinet. This plan is to compel all persons cashing interest coupons to make out a certificate of ownership. The certificate would be given to them by the banks, when the coupons were presented for payment. In addition to declaring ownership, the bond holders would have to sign an affidavit declaring the income concerned had been shown on their tax statement. The certificates and affidavit, of course, would be forwarded to Ottawa and checked against the tax statements.

Bill Goes To Senate

Federal House Passes Measure Extending Ten Per Cent Salary Cut

Ottawa, Ont.—The bill to extend the civil service salary reduction for another year passed all stages of the House of Commons and was sent to the senate. The measure continues the 19 per cent. reduction in the salaries of civil servants and members of parliament until the end of the fiscal year 1933 34.

About 60,000 people would be affected by the 10 per cent. salary reduction, Hon. E. N. Rhodes, minister of finance, said. In addition to 13,000 casual employees and postmasters of small centres operating on a commission basis, the following public servants would be affected:

Salaries below $1,200—16,408.

Salaries between $1,200-$2,000 — 22,745.

Salaries between $2,001-$3,000 — 6,123.

Salaries between $3,001-$4,000 — 1,579.

Salaries between $4,001-$5,000 — 461.

Salaries over $5,000—215.

Gun Running Plot

Seizure Of Machine Guns In Vancouver Leads Police To Investigate

Vancouver, B.C.—Seizure by police of six machine guns, dissembled and expertly packed in the back of a parked automobile and more than 100,000 rounds of ammunition, has led officers to investigate the possible existence of an international gun-running plot centering in Vancouver.

Authorities are attempting to trace the origin of the guns, convinced they were designed for shipment to China to be used in operation there against the Japanese. No local trouble, police point out, could possibly call for the use of such a formidable array of guns and large amount of ammunition.

Fine For Honeymooners

Mussolini Cuts Railway Fares For Newly Weds

Rome, Italy.—Honeymooners have been streaming into Rome at the rate of 2,000 couples a month since Mussolini granted them reduced railroad rates.

The order cutting 70 per cent. off newlyweds' fares from anywhere in Italy has been in force seven months. In that time 14,000 couples have visited the capital.

Pope Pius has received practically all of the visitors. He gives each bride a rosary and each bridegroom a religious medal.

May Amend Game Act

Edmonton, Alberta.—A government bill to amend the Alberta Game Act, if accepted by the Alberta legislature will permit farmers to shoot game birds anywhere in the province without a license. At present the farmer can only shoot game birds on his own property without a license.

CALLED TO BAR

Lady Chatterjee, wife of Sir Atul Chatterjee, head of the Indian delegation which came to Ottawa to the Economic Conference last summer, has been called to the British Bar at Lincoln's Inn. Lady Chatterjee has been studying law for a number of years.

Indian Goes Modern

Now Taking His Place In Affairs Beside the White Man

Ottawa, Ont.—The Indian has gone modern, entering professions, graduating from universities and taking his place beside the white man in business and high finance, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons today. But the Indian retains all his wiliness and adroitness—he often refuses to become a nationalized Canadian, subject to legal action and taxes. The Indian, as the ward of the Dominion pays no taxes, has no vote, cannot be sued in a civil court and "is cute enough to want to stay that way."

That was the reason, said Mr. Murphy, why the government sought power to compel Indians to be franchised—so they would assume the responsibilities as well as the privileges of citizenship.

For the entire sitting the House discussed the Indian and his problems, Liberals objecting to the compulsory enfranchisement provisions of the government legislation.

Premier R. B. Bennett finally poured oil on the troubled waters by saying a change would be made in the system of enfranchisement—a board consisting of a representative of the Indian tribe, a representative of the Indian Department at Ottawa and a county court judge, would be established to review each application.

No Recent Loans Made

Winnipeg, Man.—Loans have been made by the Dominion government to the provinces, including Manitoba, but none have been made since April, 1932, for direct unemployment relief, stated Premier John Bracken in the legislature. Neither had loans been made in respect of the municipalities' share of the expenditure.

Millionaire Released

Chas. Boettcher, Kidnapped February 12, Is Freed By Abductors

Denver, Col.—Chief of Police Albert T. Clark announced that Charles Boettcher 2nd, heir to millions, who was kidnapped February 12, had been released by his abductors and that no ransom had been paid.

Chief Clark said the 31-year-old broker was released from a motor car and immediately communicated with the home of his father, Claude K. Boettcher. He was taken to the elder Boettcher's home and the chief of police rushed there to question him.

Clark said young Boettcher was in good condition when released.

Details of the release were not immediately available, but Clark said Boettcher had been released from the car on the outskirts of the city. Clark said he did not have full details of the release, but reiterated that no ransom had been paid.

Boettcher, prominent young Denver broker and member of one of the city's wealthiest families, was abducted by two men from the garage at his home Sunday night, February 12, and held for $60,000 ransom.

Protest Arms Embargo

Should Be Limited To Aggressor Opinion Of China

Nanking, China.—It was officially announced that China was making representations in London in connection with the British arms embargo against China and Japan.

Spokesman for the Chinese National Government foreign office said any Far East arms embargo should be limited to the aggressor waging war on China. "It is a colossal blunder and it will have absolutely no effect on the present hostilities."

Toko, Japan.—Great Britain's announcement of an arms embargo against Japan and China was interpreted by Japanese authorities as meaning a handicap for China only. In official and business circles there was uneasiness lest the embargo turn out to be only the first instance of pressure against Japan, with the possibility of eventual economic sanctions.

Royal Assent Given Bill

Authority Granted Manitoba To Borrow For Financing Relief

Winnipeg, Man.—Authority for Manitoba to borrow money for the financing of unemployment relief and to lend money to municipalities for their share of relief costs, was granted the province when Premier John Bracken's bill was given royal assent.

Although the act as it was amended by Mr. Bracken provides for the province borrowing money without specifying the source of the loan, Premier Bracken served notice on the House that later in the session the members will be asked to unanimously request the Dominion to make loans to the province.

ARGENTINE TRADE MISSION IN ENGLAND

Dr. Julio Roca, Vice-President of the Argentine, is shown with General Sir Charles Harrington, G.O.C., when he visited the Aldershot Command in Hampshire. Dr. Roca is in England at the head of the Argentine Trade Mission seeking trade treaties with the Mother Country.

GERMANY TO TAKE MEANS TO SUPPRESS REDS

Berlin, Germany.—Hermann Goering, minister without portfolio in the Hitler government, declared in a speech that the incendiary fire at the reichstag building was meant to inaugurate a series of violent acts culminating in a Communist revolution.

For this reason, he asserted, the government was justified in promulgating its drastic decrees of the last few days, which have already increased penalties for treason and have placed Germany under virtual martial law.

Captain Goering declared the lives of Communists and Socialists were not endangered so long as they kept strictly within the law.

Chancellor Hitler, addressing a delegation of Nazi workers, promised to ameliorate the lot of the German workman so that Communist arguments no longer would draw him.

The nation-wide process of squelching Communism continued unabated, with hundreds of leading Communists undergoing arrests, while many others fled into hiding.

Extensive precautions were resorted to for the protection of railways, bridges and power stations. Numerous armed guards were posted.

Squads of armed storm troops in the brown Nazi uniform can be seen at any time marching through Berlin streets on auxiliary police duty. About 3,000 are in service here. Throughout Prussia there are about 60,000 of them.

Banning Allegiance Oath

De Valera In Position To Force Removal From Constitution

Dublin, Irish Free State.—In sixty days the oath of allegiance to the British crown will vanish from the constitution of the Irish Free State and become a dead letter in the Anglo-Irish treaty.

The Dail Eireann passed by a vote of 75 to 40 a government bill abolishing the oath of allegiance to the British crown. The measure now goes to the senate.

The constitution provides that bills which the senate refuses to pass in such a manner as to satisfy the lower House will, at the expiration of 18 months, become law despite the senate.

In the event the dail is dissolved in the meantime, the waiting period is shortened to 60 days.

After the 1932 elections, when Mr. de Valera foutnd himself heading the government for the first time he immediately attempted to remove the oath. He was blocked by the senate. He is now in a position to force removal of the oath, but is still faced with a possibility that this move will fail to satisfy left wing extremists, including the old Sinn Fein.

May Close High Schools

Calgary, Alberta.—Closing of Calgary high schools may occur unless the city can find a way out of its present financial predicament, it is understood. Struck severely by declining revenue following the depression's appearance, the city is forced to every economy. Primary schools would not be shut down.

Royalty Sees First Talkie

London, Eng.—The king and queen have seen their first talking movie and apparently enjoyed it. It was the premiere of the screen version of J. B. Priestley's "The Good Companions" shown as a benefit for the unemployment relief fund. The performance was declared a great success, the proceeds totalling about $40,000.

Dividends Run Into Millions

Toronto, Ont.—Despite adverse business conditions dividends to be paid in March by Canadian companies may exceed $16,000,000 when all declarations are made. At present some 43 companies have declared dividends and there are a few more which usually make payments in March.

Portugal has increased its appropriations for public works.

The telephone brings help in a hurry

A sudden illness that requires a doctor, quickly; an invasion by burglars,; the house on fire —in any one of these cases the telephone may be the means of saving life or property.

In such an emergency, imagine the plight of a family without a telephone!

The telephone brings help in a hurry—if you have a telephone. It's a great protection at a small cost.

CRESTON, B.C., FRIDAY, MARCH 10

Miss the Whistle

The Valley sleeping; sleeping still—
  Waiting for a master will
Awakening spirit to instill
  In people, over vale and hill.

. . . . . .

In the morning still . . . no whistle

. . . . . .

  A gloomy spell is o'er all cast
  As sleepy ones roll out at last—
  The lame excuse, 'The clock was fast!'
  And set about a late repast.

. . . . . .

For they had heard no whistle.

. . . . . .

The Valley sleeping . . . sleeping yet;
A rousing clarion still to get;
Folk of all lands . . . Rose and Thistle—

Please, Mr. Rodgers, blow your whistle!

BACK OF BEYOND

By OPTIMIST

Part V.

Requesting the stranger to lead the horse to the end of the ferry apron the farmer made for the shore, carrying the ends of the chain and rope with him, then giving the stranger word to start the horse the same exhibition of determination and cruelty began.

It took somewhat longer this time as the beast did not appear to have the tremendous strength of its mate, and when about half way through the animal seemed to give up the struggle. The farmer allowed the beast to rest awhile, then with his harnessed horse and a stout singletree, which he had seemingly hidden previously beside the road, he coupled onto the free end of the chain, which was fastened about the neck of the bogged animal.

Giving the harness another careful inspection he gave the command to his horse to pull, whilst himself helping the strain with the rope. By these means the bogged animal was drawn to firm land where the farmer allowed the beast to rest before cleaning it and restoring its harness, which he had carried from the ferry in the meantime.

After the horses were sufficiently rested the farmer backed them down to the edge of the bog and with chain and rope made fast to the pole of his vehicle he hauled the load ashore. The strain on the gear must have been very heavy, and it now became apparent to the stranger why the farmer used such a comparatively light conveyance. With the aid of two long sticks the stranger made his way along the three-inch pole walk to shore where he rejoined the farmer, who was once more removing the harness from his horses.

"A rest wont hurt them," he remarked "and with the harness off them they can roll back the circulation of blood to their legs. Let us also sit awhile." They sat themselves upon the ground where, presently they were joined by the man in charge of the Nightmare. "Well," said he, addressing the farmer, "you made it."

"Yes," rejoined the farmer, "we made it, but I notice one of the springs got broken and a few parts got loosened up in the making.' Can I borrow a hammer and wrench from you for a few minutes. I would like to tighten things up a bit before striking out." "Sure thing," said the custodian of the Nightmare, and forthwith he made his way aboard ship, to return after awhile with an old monkey wrench, which refused to monkey, and a clawhammer minus claws. "Here's the sum total of my engine room workshop," he observed. "Maybe they'll help; I'm sorry I haven't any more tools, but the requisition I sent in hasn't been filled yet." "And that was two years ago," suggested the farmer.

"Heard about it." Then turning to the stranger, "It's a queer state of affairs," he said, "we are given to understand that each year a special appropriation is made for the maintenance of this ferry, yet no tools are ever supplied to keep the engine and ship in repair, of if they were supplied it is so long ago that the present settlers have forgotten them."

"The captain of the ship seems to be expected to find his own fuel to keep his engine from freezing in the wintertime. To borrow tools from the surrounding farmers to deal with ice conditions, and generally seems to be expected to use his paycheck for the maintenance of the ship, while the money that is appropriated for this purpose goes—Ha! Ha! Ha! Ha! that's a good one; where does it go?"

"Well cheer up," said the farmer addressing the ferryman "you're not the only one that doesn't get what he asks for. I, mysely, asked for some of that half-rotted plank that has been torn from the bridge back there to cover the bogs on either side of the crossing and, instead of plank, I receive advice. I pointed out to the incompetent just what we were up against, the cruelty to our horses, the damage to our gear, and the danger to our lives, and in return I was told that the farmers should know better than to use the roads when they were unsuitable for travel. By which, I take it, we are to be off the roads about nine months of the year. No wonder the farmers of these parts are getting rich."

"Can nothing be done to alter the situation?" asked the stranger. "Oh, yes, a beer parlor would alter the situation very considerably. With one established over here our roads would, I feel sure, soon become quite worthy of attention. It's astonishing how good the roads are in the vicinity of beer parlors. And, even at that, the member and the officials are not satisfied. They are over the roads (examining, I suppose) morning, noon and night, not omitting Sundays . . . . in the meantime we will have to be satisfied with plank, rotten or otherwise, if we can get it, but it seems very doubtful.

"Mr incompetent seems very zealous of his plank and his money saving reputation. He said to me, 'among other things, when I last was in his office, 'How can I save money for my department if I meet all the demands made me. Why there ain't enough timber in this province to cover all the dangerous places in my roads. Such requests, Mr. Farmer, are ridiculous, and a waste of my time."

He possibly would have said more, but that moment a man came in with a load of refreshments, and I was requested to get out, which, seeing that the boss was about to become very busy, I got." "And do you take that sort of stuff lying down," asked the stranger. "Yes," said the farmer, "I am about as spineless as the rest of them. We, none of us, appear to have the courage of a cootie. If we had, we would possibly use tar for other purposes than road dressing." Then, turning to the stranger, "I hope you will not carry away the impresssion that you have fallen among Trotsky's headquarters.

"We are not reds, nor pinks; in fact we are verging on the yellow, but its a long, long road that produces no homebrew; someday the worm is going to get ramapant, and when that day comes it will take an ironbound casket to keep the worms from their meat." With this cryptic remark the farmer turned his attention to his rig, which he worked over for awhile, then returned the strayed museum articles to the captain who returned with them to the ship.

Presently our traveler's ear drums were shattered by the discordant racket that came from the packing case on the Nightmare, and the stranger, gained a point of eminence, was able to view the passage back to its berth on the east side of the river.

The farmer proceeded to harness the horses and hitch up. Then calling to the stranger to climb aboard, the pair proceeded upon their way. For a few hundred yards the road resembled a shell-pitted battlefield, then suddenly became a better road than any in the district the stranger had travelled over.

"Why," said he, "I thought your government wouldn't build roads for you? This is the best I have seen yet; not excepting the once hard surface road through the village." "Don't worry," said the farmer, "the government had no hand in this. You see that sweep of land to the south of us." The stranger gazed, and replied in the affirmative. "The people who own that land built this road and if they ever become aware that you credited their effort to that incompetent in town they will not feel pleased aboet it."

"I am sorry," said the stranger, "after what I have seen I should have know better than to make such a fool remark." "Alright," said the farmer, "You are forgiven." Then continuing said, "We must give the devil his due. The government did help with this road after all. They appropriated many thousands of dollars from our taxes to surface the road with gravel, after the other people had built it." "And, evidently, didn't finish the job," interposed the stranger."

"No," continued the farmer, "they didn't. You see, the member decided that it was foolish to spent all the money in one place, and possibly make a better road here than the member had around where he lives, so the gravelling was called off when the job was half finished and the balance of our tax money went alsowhere."

"Do you think it went on refreshments," asked the stranger? "Well, as to that, I cannot say," replied the farmer." It went somewhere, and we who provide the money are none the wiser.

Canyon City

Mrs. Jas. and Miss Gwen Wilson o Sirdar were guests of Mr. and Mrs. G. E. VanAckeran a few days last week, being amongst those from outside to attend the hospital concert Wednesday evening last.

The government had a crew of men at work at the first of the week making some needed repairs to the Goat River canyon road.

The effects of the depression are being felt even by the cattle at Canyon. Tom Hickey has a cow gone dry this year that for the previous four years refused to declare a moratorium on milk supply.

Canoon Farmers' Institute at the March meeting on Saturday decided to again have a S. George's Day celebration, this year on April 21st. Endorsation was given a resolution dealing with provincial redistribution that had been forwarded from Creston board of trade.

With the exception of Creston all points in the valley were represented at the Ladies Hospital Auxiliary concert at the community hall on Wednesday night, which was an outstanding entertainment success as well as successful financially, the intake being in the neighborhood of $40. The auxiliary executive, Mesdames Hickey, Humble, Niblow, Blair and Browell, ar responsible for putting on the entertainment and are to be congratulated on its success. In the ten months the auxiliary has been in existence it has accumulated $100 for hospital building fund.

Local and Personal

HORSES WANTED—Can use a few castoff horses. Arrow Creek Fox Ranch.

HAY FOR SALE—A few tons mixed clover and timothy. John Carlson, Creston.

Mrs. W. Belanger of Jaffray is here on a visit with her parents, Mr. and Mrs. G. Johnson.

Rev. M. T. Percival is having a Lenten service at Christ Church this (Friday) evening, at 7.30.

Father L. Choinel will say Mass at Holy Cross Church, Creston, at 10.30, Sunday, March 12th.

Mrs. Bert Whimster of Nelson is renewing acquaintances in town this week, a guest of Mrs. A. L. Palmer.

Miss M. Carr, matron of Creston Valley public hospital, was a weekend visitor at her home at Cranbrook.

FOR SALE CHEAP—Ford engine, 6 volt 13 plate battery, 30 x 3½ tires and tubes. Apply or write J.A.Avery,Creston.

Mr. and Mrs. Frank Garrett of Blake were here for the weekend with the latter's parents, Mr. and Mrs. F. LaBelle.

FOR SALE—Good milch and butter cow, grade Ayrshire, 3 years old, freshened March 1st. Fred Lewis, Creston.

The March Meeting of Creston Women's Hospital Auxiliary will be held at the home of Mrs. M. Ross on Thursday, 16th, at 3 p.m.

David Evans, of the Bank of Commerce staff at Keremeos, arrived at the end of the week on a holiday visit with his grandmother, Mrs. M Young.

The Woman's Auxiliary of Christ Church are having a tea and sale of home cooking at the home of Mrs. Matt. York, Saturday, March 11th,

Rev. Jas. Youngson of Nelson, who took services at the Presbyterian Church on Sunday, was a guest of Mr. and Mrs. W. H. Watcher during his stay in Creston.

Rev. W. E. Pike and Miss Pike were weekend visitors at Creston, making a distribution of literature and collecting funds for the old people's home at Summerland.

The annual meeting of Creston Valley Agricultural Association will be held at the town hall, Creston, Monday, March 20th, at 8 p.m. All friends of the fall fair are asked to attend.

Basketball fans will be interested in tonight's fixture between the Michel quintette and the pick of the local men's talent. The game will commence at 8.30 with an admission of 25 cents.

The Full Gospel Tabernacle building has been going through some changes, having got a new brick chimney, and some patering and decorating done on the interior living quarters. Other changes are to be made in the mission hall part, we are told.

Evangelist Eddie Scratch, a young flaming evangelist of Kelowna, who has been giving special Services at Kimberley and Cranbrook during the last two months, will give Creston two services next Sunday, March 12th, 11 a.m. and 7.30 p.m. in the Full Gospel Tabernacle.

L. A. Campbell, managing director of West Kootenay Power and Light Company, was here at the middle of the week making an inspection of the company's development work at Goat River canyon. The foundation is being put in for the big cement dam, on which work is about due to start. Several carloads of gravel have already arrived.

There was a good turn-out at the monthly meeting of the Canadian Legion which was held Tuesday night, at which Colonel Mallandaine was unanimously elected a Life Member of the Creston Valley Post. It was decided to hold a church parade on Vimy Day, April 9th, time and place to be announced later through the press. W. McCooper announced that plans for a concert on St. Patrick's Day, in the Parish Hall, were well in hand. The question of utilization of the Legion Property on Barton Avenue was discussed, and will come up for further discussion at the next meeting.

In the County Court of West Kootenay

IN PROBATE

IN THE MATTER of the ESTATE of ALBERT EDWARD JEFFERSON, Deceased.

AND IN THE MATTER of the "ADMINMINISTRATION ACT."

TAKE NOTICE that, by order of His Honor Judge W. A. Nisbet, made the 24th day of February, 1933, I was appointed administrator of the estate of the said Albert Edward Jefferson deceased, and all parties having claims against the said estate are hereby required to furnish same, properly verified, to me on or before the 11th day of April, A.D. 1933. And all parties indebted to the said estate are required to pay the amount of their indebtedness to me forthwith.

M.E. HARPER, Official Administrator, Courthouse, Nelson, B.C.
Dated this 3rd day of March, 1933.

CENTRAL MOTORS

Canyon St. PLYMOUTH and CHRYSLER DEALER CRESTON

Hospital Benefit Concert Success

Canypn Ladies' Hospital Auxiliary Stage Play and Variety Program—Satisfactory Attendance—Intake About $40.

1933's outstanding entertainment effort was that of Wednesday evening last at the community hall, Canyon, under the auspices of Canyon Hospital Ladies' Auxiliary, which in addition to being a financial success was thoroughly enjoyed by a crowd of at least 150 in which were representatives from all points in the valley, except Creston.

The chair was occupied by H. Young, one of the Canyon representatives on the hospital board, and the first half of the evening was given over to a variety programme in which Canyon talent was heard to splendid advantage in musical and literary numbers, with all the performers giving good account of themselves. Mention is due the violin solo of Annie Berggren, a pupil of Mrs. Fred Lister, who continues to delight Canyon audiences, but whose work would be greatly improved if the young artist would only 'throw' herself more completely into her work. Presiding at the piano during the evening were Miss Gwen Wilson of Sirdar, Mrs. Lister, Miss Frances Knott, Mrs. (Rev.) Walker of Creston.

Solo—Miss Ethel VanAckeran.
Recitation—Mrs. Les. Clarke
Violin solo—Miss Annie Berggren.
Duett—Mrs. Kolthammer and Miss June Browell.
Solo—Mrs. H. Langston.
Instrumental duett—L Moberg, T. R. Mawson.
Solo—Miss Frances Knott.
Sketch—"The Lean Dod"—A. Bond, T. R. Mawson.
Trio—Mr. and Mrs. Kolthammer and Jas. Bateman.
Reading—Mrs. Geo. Jacks.
Violin solo—Miss Holly Bond.
Solo—H. Langston.

The second half of the programme was the two-act comedy, "Miss Molly", which was put on under the direction of G. E. VanAckeran, who is being complimented on all sides on the creditable performance of the amateur talent under his care. The cast:

Reginald Peters—L. Rowe.
His sister, Annie—Mrs. R. Brcwell.
Joe Johnson, a Negro servant—Roy Browell.
Molly Peters, neice of Reg and Annie—Miss Mary Goodwin.
Julian Hewitt, an artist—Glen Messinger.
Sissie Saunders, a governess—Miss Edna Hickey.
Lady Elusia Nestron—Mrs. Niblow.
Pearly White, Negro maid—Miss June Browell.

A very creditable performance, indeed, was that of Miss June Browell who as understudy only took up the part of her sister, Helen, who had to undergo an operation at Creston hospital one week before production night.

Miss Mary Goodwin made her debut in Valley theatrical circles, and proved a most adorable and chic heroine. Her interpretation of the part suffered somewhat due to her natural reserve which on this occasion seemed to somewhat restrain her ardor. If she can overcome this weakness she ought to make quite a name for herself in parts such as that assigned here Wednesday night.

Mr. and Mrs. Roy Browell gave of themselves in a performance that was well up to their well known standard. Of all the cast Miss Edna Hickey seemed to take her part as a psuedo governess. Glen Messinger gave some very impressive flashes as to how an artist feels towards his work. One might, however, add that if this could have been said of the tender love scenes with Miss Molly his portrayal of Julian, the artist, would have been a masterpiece.

As an irascible uncle L. Rowe seemed to be entirely carried away by the temper of his part. We hear that this temper did not entirely subside until next day.

FOR SALE—Leghorn pullets in splendid condition, laying over 60 per cent. 50c. each. J. C. Martin (Alice Siding), Creston.

FOR RENT—5-room house on central corner, bathroom and pantry, house new, yard fenced, garage on property. Apply Mrs. Fransen, Creston.

WORLD HAPPENINGS BRIEFLY TOLD

Possibility of using surplus farm crops of the United States for the production of alcohol as an aid to agriculture is being studied at the request of President-Elect Roosevelt.

George Bernard Shaw viewed the great wall of China from an aeroplane at a height of 8,000 feet, but had nothing to say regarding his experience.

Hon. Vincent Massey, former Canadian Minister to the United States, will be given the honorary degree of Doctor of Laws by McGill University, Montreal, at Convocation on May 25.

So many automobiles have been pawned in Paris, where the municipality runs the pawnshop, that a new garage to accommodate 2,000 cars is being built.

Alberta government does not favor appointing a commission to survey taxation, Premier John Brownlee informed a delegation from the Alberta branch of the Canadian Manufacturers' Association.

After many years' public controversy over the divorce question, the Chief Justice of Trinidad has granted the first divorce in the island's history. The hearing took only forty-five minutes.

John Robert King of Vancouver, prominent figure in the mining, fishing and lumbering industries of the Pacific Coast in pioneer days, is dead aged 80. He was born in Madoc, Ont., and came to British Columbia in 1876.

Prof. August Piccard, explorer of spaces 10 miles above the earth, is convinced he can build an aeroplane capable of flying through the stratosphere at 500 miles an hour, if he were furnished $500,000 for the purpose.

The Japanese Government through the embassy at Washington, issued a 6,000 word statement in defence of her military activities in Manchuria and her actions at Geneva in the face of condemnations on the part of the League of Nations.

A Featherweight Airplane

Slow-Moving Machine Is Remarkably Easy To Handle

Britain sees remarkable results achieved with a slow-moving, featherweight airplane. This new type, which may indicate the coming of "flying for all," is designed by C. H. Lowe-Wylde. A woman beginner recently made a flight after half an hour's instruction, the instructor giving his orders from the ground. After three hours in the air the pupil was able to pass the tests for her "A" certificate. The 'plane carries only a 6 horsepower motorcycle engine. Its top speed is 50 miles. But the big factor is that it lands at the "standstill" speed of 18 miles an hour.

TIRED AND IRRITABLE?

Tired Of Depression Talk

Woman Mining Recorder Returns North Where People Do Not Grumble

Tired of talk of depression which she has continually encountered in the cities, Mrs. F. Muncaster, British Columbia's only woman mining recorder, started the return to Squaw Creek, near the boundary of the Yukon and Alaska. "At Squaw Creek,' she says, "things were never exactly prosperous, but folks take things as they are and never grumble. Why, they don't even know there's a depression. Things go on just the same."

Mrs. Muncaster took in a team of sleigh dogs and supplies and she plans to make the trail to Squaw Creek before the ice thaws. Her goal is reached by way of Haines on the United States side and Pleasant Valley, a former Mounted Police outpost.

"As a matter of fact, conditions are better at Squaw Creek now than ever before," says Mrs. Muncaster. "Most of the people are trappers, with about one white man to five Indians. There's not much money in fur these days, but gold was discovered up there not long ago and the miners are making from $8 to $15 a day in some places, with absolutely no place to spend their money."

Nothing lowers and depresses you more than the poisons of unsuspected constipation. Take Eno every morning.
TAKE ENO'S 'FRUIT SALT'

Recipes For This Week

(By Betty Barclay)

LUNCH BASKET PINWHEELS

1 cup flour.
2 teaspoons baking powder.
2 tablespoons butter.
½ teaspoon salt.
⅓ cup milk.
2 tablespoons sugar.
½ tablespoon orange juice.
Grated orange rind.

Mix and sift flour, baking powder and salt, rub in one tablespoon butter, or other shortening, and moisten to a dough with milk. Roll thin; spread with remaining butter, sprinkle with sugar, mixed with orange juice and rind, and roll up like a jelly-roll. Cut in slices and place, cut side up, in buttered muffin-pans. Sprinkle with remaining sugar, and bake in a hot oven.

HAM MOULDS

1 cup cooked ham, chopped fine.
2 tablespoons butter.
¼ cup stale bread crumbs.
⅔ cup milk.
1 egg.
1 teaspoon sugar.
Salt and pepper.

Melt butter. Add bread crumbs and milk. Cook five minutes, stirring constantly. Add ham, egg slightly beaten, and seasonings. Pour into buttered custard cups. Set cups in pan of hot water. Bake in a moderate oven until firm. Serve with a white sauce.

Fish Cargo By Air

Former Two-Day Trip Now Takes Half An Hour

Within half an hour after white fish are caught in the lakes of northern Manitoba they are delivered to a point by aeroplane on the Hudson Bay Railway, 35 miles away, for transit from this point by rail to cities in Canada and the United States where they are in demand. Formerly the 35-mile journey by horse outfits and tractors took two days over rough trails.

The inland fisheries of Canada are among the country's most valuable assets. The fish caught in large quantities for the commercial market in Manitoba come from Lake Winnipeg, Lake Winnipegosis, Lake Manitoba and the smaller lakes. White fish and pickerel are the chief fish caught, but pike, tullibee, gold-eye and several other varieties are plentiful.

Drifted Many Years

A bottle containing a card of the hydrographic department of Japan was found on the beach a mile south of Tillamook Bay by C. L. Barview, Oregon. The bottle was sealed with wax and contained a card indicating it had been set afloat June 6, 1911.

Although it is a bird, the New Zealand kiwi cannot fly. Its feathers are incomplete and have the appearance of coarse hair.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile —Without Calomel

You are "feeling punk" simply because your liver isn't pouring its daily two pounds of liquid bile into your bowels. Digestion and elimination are both hampered, and your entire system is being poisoned.

What you need is a liver stimulant. Something that goes farther than salts, mineral water, oil, laxative candy or chewing gum or roughage which only move the bowels—ignoring the real cause of trouble, your liver.

Take Carter's Little Liver Pills. Purely vegetable. No harsh calomel (mercury). Safe. Sure. Ask for them by name. Refuse substitutes. 25c. at all druggists.

SUNDAY SCHOOL LESSON

MARCH 12

JESUS MINISTERING TO THE MULTITUDE

Golden Text: "The Son of Man came not to be ministered unto, but to minister, and to give His life a ransom for many."—Matthew 20.28.

Lesson: Mark 6:1-56.

Devotional Reading: Isaiah 35:1, 2, 5-10.

Explanations and Comments

A Prophet Not Without Honor Save In His Own Country, verses 1-6.—"You remember how, in his Holy War, John Bunyan stations one old Mr. Prejudice, with fifty deaf men under him, at Ear-Gate, to defend that particular gate into the citadel of Mansoul against the assaults of Prince Emmanuel. Well, it was Mr. Prejudice who stopped the ears and hardened the hearts of these Nazarenes against the appeals of Jesus that day."—J. D. Jones.

The Baptist Beheaded, verses 17-29.—The death of John the Baptist was a turning point in the life of Jesus. The enemies of Jesus now felt assured that they could compass his death without opposition, since no protest came from the people at this dastardly deed.

The Return Of the Twelve, verses 30-32.—We might consider the preceding topic, verses 14-29, as an interruption of the narrative, for verse 30 continues the story left at verse 13. The word "apostle" means literally "one who is sent forth, a messenger." The Twelve had been sent forth on their mission, and now on their return Mark calls them apostles, for the first and only time. From the various towns and villages to which they had been sent, two by two, they returned eager to report to their Master what they had done and taught, what success and what failures had been theirs in their apprenticeship, as it might be called.

"He sent men out to preach the living Word,
Aflame with all the ardor of His fire;
They spoke the truth, wherever truth was heard;
But back to Him they brought their heart's desire;

They turned to Him through all the lengthening days
With each perplexity of life or creed,
His deep reward, not that they spoke His praise,
But that they brought to Him their human need."
—Hildegarde Hoyt Swift.

Jesus noted the disciples' need of rest as well as of opportunity for uninterrupted talk with him—for there were many coming and going and they had no leisure so much as to eat—and He counselled their going over to the quiet uplands on the other side of the lake. This they did.

Artists Very Seldom Have Beautiful Hands

Photos Show Them Strong and Capable But Not Decorative

The idea that hands exhibit more character than faces, and that artistic hands are invariably soft, slender and graceful, is nothing but a snare and a delusion, Mrs. Alma Reed says.

Mrs. Reed opened an exhibition in New York of more than 150 photographs of hands of famous men and women, actresses, prizefighters, writers, painters, politicians and housewives.

"The hands of famous actresses," she said, "are almost universally beautiful. Long, slender fingers, meticulously cared for nails and smooth contours are characteristic. Their hands are decorative, as they should be. But when it comes to musicians, writers, sculptors, male or female, the rule does not hold.

"Their hands are apt to be strong—capable, yes, but not necessarily beautiful.

Pulp and Paper Industry

Operated On Sound Economic Lines It Would Regain Former Place

When prosperity returns, it should be the task of both Government authorities and those who direct the destinies of the pulp and paper industry to work for an effective control of development, in order that the evil of overproduction may be avoided and the industry allowed to expand in response to normal demands not to artificial stimulus. If it is thoroughly rehabilitated and operated on sound economic lines, there is no reason why it should not regain its former place, but the danger from the American schemers is written plain.—Montreal Star.

Things don't seem half as expensive when you can charge them.

BABY'S COLDS

BEST FOR ADULTS, TOO

Offers Great Possibilities

Diesel Engine Travels Quickly With Small Amount Of Fuel

Flashing over the rails at 65 miles an hour, the first Diesel electric train ever used on an English main line had a successful trial on the 113-mile run from London to Birmingham.

Five minutes ahead, puffing clouds of smoke and steam, sped the regular London-Birmingham flier, but the Diesel train travelled just as fast and purred along smoothly and almost noiselessly. It required only 25 gallons of fuel, costing a total of seven shillings (about $1.20 at current exchange) for the journey.

The trip opened startling possibilities for the hard-pressed British railway companies, which have been keeping to steam for a century because of the cheapness of British coal. Recently the Southern Railway tried a new departure, electrifying the main line from London to Brighton, but at a heavy initial cost and after three years' work.

Not only is the coal industry worried by the success of the Diesel train but the advocates of electrification are beginning to wonder whether the Diesel storage battery system is not cheaper and better fitted to British conditions.

World's Brains Still Busy

Someone Is Always Thinking Of New Things For Invention

In 1843, a current magazine article reveals, an official of the United States patent office resigned because "Everything possible had been invented."

Since this gentleman left his post in the smug belief that the world was a finished product, the world's brains have invented the sewing machine, the typewriter, the electric locomotive, the air brake, wireless telegraphy, internal combustion engines, airplanes, cash registers, incandescent lamps, motion pictures and about a million and a half other devices which we now consider commonplace.

Hopes To Better Record

Speaking at a testimonial dinner given in his honor, Sir Malcolm Campbell, who established a new world automobile speed record of 272 miles an hour, said he was hopeful of returning to Daytona Beach, Florida, next year from England to try for a 300-mile-an-hour mark.

SHE WAS GETTING FATTER

Now Down To Normal

"I was putting on flesh very rapidly," writes a married woman, "and also suffering from constipation, and was very liverish. Three months ago a friend advised me to take a teaspoonful of Kruschen Salts in hot water every morning. I have kept this up regularly ever since, although I have been down to my normal weight (126 lbs.) for several weeks. I never felt better in my life, and I intend to carry on with Kruschen always. Several of my friends have remarked how slim I was getting and how well I was looking. After my having told them how it was done, they are doing the same."—(Mrs.) D.H.

Overweight arises frequently because the system is loaded with unexpelled waste, like a furnace choked with ashes and soot. Allowed to accumulate, this waste matter is turned into layer after layer of fat. The six salts in Kruschen assist the internal organs to throw off each day the wastage and poisons that encumber the system. Then, little by little, that ugly fat goes—slowly, yes—but surely. You feel wonderfully healthy, youthful and energetic—more so than ever before in your life!

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 75c. package.

This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorised to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

CHAPTER VI.—Continued.

A question came from Joyce:

"He and—and Elizabeth—have decided definitely, then, Bill?"

"Yes. She's waiting for him to come for her or send for her. They've made plans to be married in Edmonton and have their honeymoon in the Selkirks and then go on over to Victoria."

Joyce asked one last question. She asked it calmly, without faltering or even pausing on the precipice edge.

"Did Elizabeth say that, or did Alan?"

"Alan said it. I overheard them, that night he left. They planned it together, there in his cabin. . . . ."

* * * * * * *

Joyce was aroused by old Dad Pence calling for her. Raising her head from her arms, she looked around. Gropingly she realized that she was there on the jutting rock, numbed with cold—with a cold that was more than physical.

Dawn had come. The dark hours had passed. It took her moments to realize. Time had stood still for her since she told Bill good-by.

Before going up the river bank she had the presence of mind to go down to the water edge and bathe her face and hands and smooth back her hair.

She went back to the trading store with old Pence, and prepared breakfast for him. Over his birch-marl pipe old Pence began whittling again at the "story-stick" he was carving these days. The stick was a long-standing ambition of his, for with his razor-keen, six-bladed knife, he was carving the story of his life. And he was going about in in earnest, carving steadily every day. It was as though he had some dim fore-knowledge of the black wings hovering—a warning to hurry.

Noticing Joyces exceeding paleness and her exhaustion, he bade her;

"Now you got to go an' rest, gal. I'll tend to th' furs this mornin', if anybody comes."

Joyce went into her room. It seemed so cold; she could not get warm; the chill seemed to have pierced her through and through. She kindled a fire in her small sheet-iron stove and put in wood, and then lay down on the bed.

From the dresser Alan's picture was looking down at her. She did not glance away, but looked at it steadily, as she lay there so motionless and still.

The exhaustion that had drained her had left her very quiet of mind. She could think clearly, in thoughts precise and rational. . . . .

You fought this battle once, Joyce, and you won it; and then you handed the sword back to your enemy and gave him power over you again. When Bill first told you last fall of Alan's engagement—do you remember the heartbreak of those weeks, Joyce? You finally rose above it, you conquered. But then you permitted yourself to hope again. When Alan merely came past here on a patrol, after staying away from you all winter, you went wild with hope.

Last night Bill came to you once again; and after he left, you collapsed there on that rock. Joyce, don't lay yourself open to agony such as that. You must forget Alan Baker. You must, you must! You cannot turn this way or that; you cannot evade it; you must walk that path. You must never again look back. You have been punished for looking back, and your punishment has been terrible. In self-preservation you must forget Alan Baker. . . . .

As she lay there gazing up at Alan's picture and seeing her course so clearly, it seemed to Joyce that if she could destroy his image there on the dresser, if only she had the courage to do that, it would be a symbol of destroying his image in her heart.

After a little while she got up from the bed; and going over to the dresser, began taking out of it all of Alan's letters to her. They dated back across six years, addressed to her here, at her college, at Ottawa—all of them carefully treasured. Pack by pack they went into the stove.

There was good augury for Joyce in the firm and unhesitant way she set about burning them.

He had given her more than a few presents; a costly old-fashioned lavalliere which had been his mother's; a miniature hope chest of India-silk kerchiefs which had been the envy of her college friends; a gold-and-ivory hunting knife; a wrist watch for graduation present, and a dozen less expensive gifts. Joyce laid aside the lavalliere to send to Elizabeth; but the other gifts she destroyed by fire.

She took his picture from the dresser, and burned it.

Afterwards she sat by the table writing a long letter to her bureau chief in Ottawa, telling him frankly about her father, her hope to see her father vindicated and then to bring him over to Ottawa with her; and asking him if his former promise of a position whenever she wished to return was still good.

At noon, hours later, when old Pence looked in, he was pleased to find her plunged into a dreamless sleep. The secret worry he had noted on her face this last week seemed to have gone now. Her features were pale, but there was a look of peace on them, of some strange spiritual peace at heart.

CHAPTER VII.

By Lone Camp Fires

That gray dawn when he said good-by to Joyce at Fort Endurance, Baker set off alone on a journey of a thousand miles. Instead of heading northeast toward the Thal-Azzah where the bandits were hiding, he turned his canoe prow directly away from them and started south, up the Mackenzie. He did not delude himself about his plan. It was little better than a desperate gamble, and he knew it. But the usual man-hunting methods were useless against those criminals; and his plan was the last thing in the world they would be expecting.

By traveling in his own motor canoe, depending entirely on his own resources, he expected to cut ten days from the fastest time of the fur-company boats.

In those lonely hours, as he stared in reverie at the shimmering pine hills, it was borne in upon Alan that he had forever cut himself off from life here in this North country. He felt as though he had been torn up by the roots. The system he had founded at Fort Endurance had been his own creation. He had been a builder in his own right. From the ground up, Fort Endurance belonged to him. He and Curt and Jimmy had cut the very timber for barracks and cabins. The work had been his particular work in life. "Sergeant Baker of Endurance" stood for something. There was but one such man in the Dominion. Now he was cut off from it, an alien of lost identity, never to be a part of it, the guiding genius of it, again.

On the third day he met a lone-fire Indian, a young Chipewyan wandering aimlessly, with some secret personal tragedy preying on him. Alan took him into the motor canoe, and together they travelled on. Hardly speaking a dozen words a day, they worked on up the Mackenzie, sleeping by turns, spelling each other at the motor. Raising a blanket sail to a northeast wind, they scudded across the island-dotted lake from Resolution, and whipped up the Quatre Fourches delta toward Fort Smith.

Watching the dim clouded stars above him, Alan looked steadily at the two girls who had loomed so large upon his manhood. In this last week a cataclysm had happened in his life, breaking into the old order, blasting the even routine of week and month and season. It had opened his eyes in a deeper way than ever before to the preciousness of his intimacy with Joyce, to the priceless quality of their former comradeship. Now, when it was irrecallable, he was asking himself whether the motive and powerful circumstance which had actuated him were humanly justifiable. Had not he and Joyce had a right to happiness? Had he, in his stern sacrifice, been blind to the needs of the human heart?

Tired out by days of incessant travel, he fell asleep at last, and dreamed that in his cabin it had been Joyce, not Elizabeth, whose arm had been around him and who was waiting for him when this lone adventure should be ended.

At Fort Smith the heavy rains had rendered the sixteen-mile portage impossible to teams and to the motor trucks which plied that stretch. Alan dared not wait; his days were too precious. In his decision to go on, his young Chipewyan friend stuck with him. Shouldering their craft, they plodded stoically across that slippery, red-clay stretch to Fitzgerald.

Among the north-bound crowd waiting there, he spotted the tall, slightly-stooped figure of Superintendent Williamson, who was going north to inspect the down-river posts. The superintendent was the last person in the world whom Alan wanted to meet. His first superior officer when he graduated from the "Awkward Squad," Williamson had been good to him and taken a fatherly interest in his brilliant work. What would he say when he learned that his protege had bought out and deserted the Force? . . . . "Your commisson wasn't forthcomng, so you quit! Your loyalty to our work went deeper than that!" In his eyes a quitter was worse than a gross incompetent.

Passing by, ten feet away, Williamson merely nodded slightly and said, "Good luck, Baker."

Alan understood. He thought: "In civilian clothes, so far away from Endurance . . . He thinks I'm on some detective detail. Good Lord, when he finds I'm out, bought out—!"

Williamson's esteem was a precious thing to Alan, as precious as a father's. An impulse swept him to talk with the superintendent and tell him the whole sorry story. But there was the matter of that signed affidavit. Alan refused to go back on that; and even if he did he would literally be branding himself a liar. What did his personal feud with Haskell matter now? He was out of the Mounted. And the superintendent would try to stop his venture if he heard, for it was beyond the law.

He allowed Williamson to go past. Setting their boat to water, he and the young Chipewyan hurried on to the great delta-mouth of the Peace, where they caught up with a steamer going on to McMurray. The young Indian wanted to turn west to the Rockies and see the Land of Ice Mountains. Giving him the motor canoe and the outfit, Alan shook hands, said Klahowya, and went aboard the boat.

(To Be Continued).

Weather Permitting

"Dearest Annabelle," wrote Oswald, who was hopelessly in love. "I would swim the mighty ocean for one glance from your dear eyes. I would walk through a wall of flames for one touch of your little hands. I would leap the widest stream for a word from your lovely lips. As always —Your Oswald.

"P.S.—I'll be over on Saturday night if it doesn't rain."

Get Rid of That

SORE THROAT!

Any little soreness in the throat grows rapidly worse if neglected. Crush some tablets of Aspirin in some water, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel safe. If all soreness is not gone promptly, repeat. There's usually a cold with the sore throat, so take two tablets to throw off your cold, headache, stiffness or other cold symptoms. Aspirin relieves neuralgia, neuritis, too. Use it freely; it does not hurt the heart.

Gillett's Lye dissolves clogging grease . . .

JUST sprinkle Gillett's Pure Flake Lye down your drains and toilet bowls each week. Use it full strength—this powerful cleanser cannot harm enamel or plumbing.

Grease and dirt dissolve like magic . . . germs are killed . . . odors banished. Your drains run free and clear.

And Gillett's Lye in solution has many uses in your kitchen. One teaspoonful dissolved in a quart of cold* water makes short work of greasy pans, tracked-up floors and other tiresome cleaning tasks.

Use *Gillett's Pure Flake Lye* for *all* your household cleaning. It saves hours of hard work. Ask for it by name . . . at your grocer's.

GILLETT'S LYE

Free Booklet

The Gillett's Lye Booklet tells you how to avoid drudgery by using this powerful cleanser and disinfectant for dozens of heavy cleaning jobs.

Also contains full directions for soap making, disinfecting and other uses on the farm. Ask for free copy. Standard Brands Limited, Fraser Avenue & Liberty Street, Toronto, Ontario.

* Never dissolve lye in hot water. The action of the lye itself heats the water.

Here is a picture you won't forget—a drama that will become part of yourself. It's real!

At their February meeting the Rod and Gun Club went on record as favoring drastic reduction in the catch of fish at present allowed out-of-province anglers, so e of whom have been guilty of spending a week on some of the creeks, catching the daily limit, which they smoke or salt down and take home with them for winter food.

At the February meeting of Creston Rod and Gun Club it was decided to requisition 40,000 cutthroat trout for Arrow Creek, and 20,000 eastern brook trout fry to be placed in Goat River. Some objection is made to improving fishing in Arrow Creek due to the increased fire hazard but to meet this objection the club asks that a patrol of the creek be provided, the cost to be borne equally by the forestry and fishery departments and the East Creston Irrigation District.
