PROVINCE OF BRITISH COLUMBIA

THE MILK BOARD

ANNUAL REPORT

for the

YEAR ENDED DECEMBER 31

1972

Printed by K. M. MacDonald, Printer to the Queen's Most Excellent Majesty
in right of the Province of British Columbia.
1973

To His Honour the Lieutenant-Governor in Council
of the Province of British Columbia

MAY IT PLEASE YOUR HONOUR:

SIR: We have the honour to transmit herewith, in accordance with section 56 of the *Milk Industry Act,* the Twenty-seventh Annual Report of the Milk Board under that Act for the year ended December 31, 1972.

THE MILK BOARD

E. D. DAUM, *Chairman*

J. D. HONEYMAN, *Member*

C. H. P. KILLICK, *Member*

Vancouver, B.C., February 28, 1973.

Twenty-seventh Annual Report of the Milk Board

For the Year Ended December 31, 1972

This Report of the Milk Board is made in accordance with section 56 of the *Milk Industry Act* and covers the calendar year ended December 31, 1972.

LEGISLATION

Milk Industry Act

The Twenty-ninth Legislative Assembly did not pass any amendments to the *Milk Industry Act* during the Third Session. However, on the 22nd of June 1972, Order in Council 2450 was approved, which, pursuant to section 40 (*c*) of the *Milk Industry Act,* repealed the Kamloops-Okanagan and East and West Kootenay areas of production and redefined the territory encompassed by these areas as the Okanagan-Kootenay area of production.

The First Session of the Thirtieth Legislative Assembly did not pass any amendments to the *Milk Industry Act.*

Milk Board General Orders

General Order 50 (B.C. Reg. 106/72), made on April 26, 1972, amending General Order 46 (B.C. Reg. 126/70), came into operation on May 1, 1972. The effect of this order was to repeal General Order 48 (B.C. Reg. 119/71), and General Order 49 (B.C. Reg. 256/71). It established the new base period of 1962–71 and the new base period values. The order increased the Class III accounting value for milk of 3.5 per cent butterfat content 21 cents from $3.950 per hundred pounds to $4.160 per hundred pounds. This change was necessitated due to a 3-cent-per-pound increase in the support price for skim-milk powder announced by the Canadian Dairy Commission on March 29, 1972. Other effects of the order were to increase the handling charge allowance on bulk transfers of milk for Class I use, to provide for compulsory interim payments to producers, and to provide for the announcing of accounting values prior to the first day of the month to which the accounting values are applicable.

General Order 51 (B.C. Reg. 162/72), made on June 27, 1972, further amending General Order 46 (B.C. Reg. 126/70), came into operation on July 1, 1972. The order was necessitated due to the approval of Order in Council 2450 defining the Okanagan-Kootenay area of production and made the Board's General Orders applicable to the newly defined area. The order provided for a uniform classification of Class II milk in all controlled areas of production. The order also amended the Class I accounting value formula to provide for the linking of imported alfalfa hay prices to Vancouver pick-up prices for alfalfa hay.

General Order 52 (B.C. Reg. 227/72), made on September 25, 1972, further amending General Order 46 (B.C. Reg. 126/70), came into operation on September 28, 1972. The effect of the order was to delete from the Class I accounting value formula the Index of Commodities and Services Used by Farmers and replace it with the Index of Prices of Farm Inputs. This was made necessary due to Statistics Canada discontinuing the publication of the Index of Commodities and Services Used by Farmers and replacing it with the Index of Prices of Farm Inputs.

Milk Board Membership and Activities

Membership of the Board remained unchanged from the previous year, with Elmer D. Daum, B.A., C.A., as Chairman, and J. D. Honeyman and C. H. P. Killick, P.Ag., as the other members.

The Board held 15 meetings to discuss matters of policy and administration and held 10 additional meetings with producers, vendors, and other interested parties to discuss matters pertinent to the milk industry.

As in past years, Board representatives attended all meetings of the Dairy Committee of the British Columbia Federation of Agriculture, and the Board members attended the Federation's Annual Convention.

The Board Chairman and Administrator attended a meeting of the four western Canadian milk control agencies, held in Edmonton, Alta.

The Board acted in an advisory capacity to the subcommittee of the Dairy Committee of the B.C. Federation of Agriculture charged with the responsibility of studying the possible entry of British Columbia into the Canadian Dairy Commission's comprehensive market-sharing programme.

Areas of Production

As stated previously, Order in Council 2450 repealed the Kamloops-Okanagan and the East and West Kootenay areas of production and redefined the territory as the Okanagan-Kootenay area of production. The other areas remained as defined in past years.

Statistical Information

To provide comparability between 1971 and the current year in the tables applicable to the newly defined Okanagan-Kootenay area of production, the totals in the tables of the Board's 1971 Annual Report pertaining to the Kamloops-Okanagan and the East and West Kootenay areas of production have been consolidated.

Table I—Analysis of Quart Sales by Product Category

Total quart sales increased in all four areas of production, with the total increase being 4.33 per cent.

Again in 1972 the sales of standard milk decreased, while low-fat and skim-milk sales increased in all areas of production. The aggregate decrease in standard milk sales and the aggregate increase in low-fat and skim-milk sales were 1.96 per cent and 10.49 per cent respectively.

Buttermilk sales declined in all areas with the exception of Vancouver Island, which showed a large 18.93-per-cent increase.

Cream sales of all types increased in all areas with but one exception, that being in the Vancouver Island area of production, where whipping-cream sales continued to decline. Light-cream (9 per cent butterfat content) sales in the Vancouver Island area increased almost 7 per cent after showing a decrease in 1971.

In all controlled areas of production, with the exception of the Vancouver area, the switch from retail to wholesale sales continued. The Vancouver area showed increases in both retail and wholesale sales. The aggregate decrease in retail sales in the controlled areas of production was 0.87 per cent, while the ag-

gregate increase in wholesale sales was 5.95 per cent. In the controlled areas of production, 22.55 per cent of the quart sales were retail and 77.45 per cent were wholesale.

Table II—Analysis of Class I Sales, Including Inter-area Sales

Total Class I sales in pounds (which is the aggregate of all Class I sales in an area of production whether made by the vendors within the area or by vendors located outside the area) increased in all areas of production during 1972. The aggregate increase was 5.07 per cent. Within area Class I sales increased in all controlled areas of production as did inter-area Class I sales.

Table III—Analysis of Qualifying Milk: Production and Utilization

Total qualifying milk production during 1972 increased 2.5 per cent in the controlled areas of production. This is slightly higher than the latest available national production figures, which show a 1-per-cent production increase in the first 11 months of 1972.

As the 2.05-per-cent increase in pounds of production is less than the per cent increase in total in pounds of Class I sales, a 4.11-per-cent increase in total Class I utilization occurred.

Total quota milk receipts in the controlled areas of production were 76.44 per cent of total production during 1972, unchanged from 1971. Total Class I utilization of quota receipts increased from 85.57 per cent in 1971 to 87.36 per cent in 1972.

Total production, quota milk receipts, and Class I utilization increased in all controlled areas of production.

With the exception of the Okanagan-Kootenay area of production, all areas of production experienced a larger increase in Class I utilization than in total production, thereby creating a decrease in the milk-supply surplus to Class I requirements in those areas.

Table IV—Class I Accounting Value Formula and Producer Price

The contents of this table summarize the accounting values for each class of utilization announced by the Milk Board for the calendar year 1972. Also shown are the producer prices (before adjustments), calculated monthly by the Board. Details relative to Milk Board General Orders referred to in the table may be found in the comments applicable to legislation.

Table V—Licensing Information

Under the provisions of the *Milk Industry Act* and General Order 46, the Milk Board issues Class I licences to vendors and milk jobbers and Class II licences to producers. Both classes of licences are issued April 1st each year for a 12-month period or portion thereof. A summary of the 1972/73 licences issued, cancelled, and in effect December 31, 1972, is contained in Table V. There was a net decrease of 75 producers from December 1971 to December 1972, which is a 5.02-per-cent reduction from December 1971.
